7403
R88
v.14

Cambridge:
PRINTED BY JOHN CLAY, M.A.
AT THE UNIVERSITY PRESS

This Volume contains 24994 entries of titles of papers by 4351 Authors with the initial C, 17665 entries by 3072 Authors with the initial D, 7750 entries by 1368 Authors with the initial E and 6646 entries by 1230 Authors under F as far as Fittig.

In the Preface of Volume XIII there was a clerical error in the number of entries under the initial B which is corrected in the following table:—

	Authors	Entries
A	2001	11551
B	6928	40169
C	4351	24994
D	3072	17665
E	1368	7750
F to Fittig	1230	6646
	18950	108775

December, 1914.

OF

SCIENTIFIC PAPERS

1884—1900

C

C. A noteworthy specimen of Devonian Lepidodendron. Science, 9, **1887**, 516.

C., *A. K.* *The Weights and Measures Act, 1878. Educ. Times, 32, **1879**, 307.

C., *A. S.* Tidal observations of the Greely Expedition. Science, 9, **1887**, 246–249.

C., *E.* Les maladies et les insectes du poirier. Brux. Soc. Linn. Bull., [18, **1893**,] (*Nos.* 8 & 9), 12–15.

C., *H.* Whirlwinds. [1896.] Symons, Meteorol. Mag., 31, **1897**, 117–119.

C., *H. M.* With Prof. Heim in the eastern Alps. Nature, 50 (**1894**), 526–527.

C., *J.* *A practical question. [1867.] Inst. Act. Jl., 14, **1869**, 71–72.

C., *L.* The "sun" lamp. Telegr. Jl., 16, **1885**, 4–6, 27–29, 52–56.

C., *L.* L'aluminium dans les Ponts et Chaussées. Ann. Conduct. Ponts et Chauss., 38, **1894**, 553–557, 609–614.

C., *M. C.* The lunar eclipse of August 3rd. Nature, 36, **1887**, 413.

—— [Remarkable rainbow.] Nature, 38, **1888**, 414.

—— Alpine haze. [1888.] Nature, 39, **1889**, 31.

C., *P.* Die Wasserwerke von Khatatbeh. Dinglers Polytechn. Jl., 265, **1887**, 337–343.

C., *P. F.* La sécurité. [1887.] Génie Civil, 10, **1886–87**, 341.

C., *R.* Vessels for acid-digestion of soils. U. S. Div. Chem. Bull., *No.* 38, **1893**, 82–83.

C., *R. A.* Some inverted problems. Educ. Times, 48, **1895**, 29–31.

C., *V.* Some aspects of Stas's work. Nature, 44, **1891**, 134.

Cabadé, [*Ernest*]. Sur un cas de broncho-pneumonie puerpérale à streptocoques. Ass. Franç. C. R., **1891** (*Pt.* 1), 308–309.

Caballero, *Ernesto.* [Fireball at Pontevedra, Jan. 2, 1890.] Nature, 41, **1890**, 303.

—— Ball lightning. [1890.] Symons, Meteorol. Mag., 25, **1891**, 99.

—— Técnica de las preparaciones microscópicas sistemáticas. Procedimientos originales. Madrid, Soc. Hist. Nat. An., 26, **1897**, 217–241.

Cabanellas, *Gustave* [*Eugène*]. For biography *see* Lum. Élect., 30, **1888**, 98; Paris, Ingén. Civ. Mém., **1888** (*Pt.* 2), 644–648.

—— *Moyens et formules de mesure des éléments électriques et des coefficients d'utilisation avec le dispositif à deux galvanomètres. Lum. Élect., 3, **1881**, 444–446.

—— Le transport électrique de l'énergie en vue de la distribution automatique. Bases scientifiques de la question, son état et son avenir. Ass. Franç. C. R., **1884** (*Pt.* 2), 115–126.

—— Sur les bases doctrinales et l'avenir du transport de l'énergie. Les Mondes, 7, **1884**, 332–334, 381–391.

—— Transport de l'énergie. Les vérités acquises. Les Mondes, 8, **1884**, 98–102.

—— Déterminer directement l'ordre de la cause du déficit des machines dynamo-électriques. Paris, Ac. Sci. C. R., 98, **1884**, 1045–1047.

—— Mesure directe des deux composantes statiques et de la composante dynamique du champ magnétique des machines à collecteur. Paris, Ac. Sci. C. R., 99, **1884**, 126–128.

—— Machines dynamo-électriques. Confirmations expérimentales des deux réactions en marche: sur les valeurs effectives de la résistance intérieure et du magnétisme inducteur. Paris, Ac. Sci. C. R., 99, **1884**, 911–914.

—— Contributions complémentaires à la théorie des dynamos. Paris, Soc. Phys. Séances, **1884**, 173–176.

—— Procédé de représentation des valeurs numériques du coefficient de self-induction d'un système électromagnétique quelconque. Ass. Franç. C. R., **1886** (*Pt.* 1), 251–252.

—— Contribution à l'analyse et à la synthèse des dynamos et de la transmission de l'énergie (transport et distribution). Essais de Creil. Ass. Franç. C. R., **1886** (*Pt.* 2), 253–262.

—— Sur la définition du coefficient de self-induction d'un système électro-magnétique. Paris, Ac. Sci. C. R., 103, **1886**, 250–253.

—— Détermination et étude des flux magnétiques. Méthode de la servo-variation de l'induction. Synthèse des dynamos. Ass. Franç. C. R., **1887** (*Pt.* 1), 197–198.

—— Détermination des flux de force des systèmes électromagnétiques quelconques. Méthode de la servo-variation

de l'induction. Paris, Ac. Sci. C. R., 104, **1887**, 495–497.
—— Sur l'emploi du shunt dans la méthode balistique. Paris, Ac. Sci. C. R., 105, **1887**, 109–111.
—— Mémoire sur les principes théoriques et conditions techniques de l'application de l'électricité au transport et à la distribution de l'énergie sous ses principales formes, chaleur, lumière, électricité, action chimique, action mécanique. Paris, Ingén. Civ. Mém., **1887** (*Pt.* 1), 34–153.
Cabanès, [*Augustin*]. Paracelse. L'homme et l'œuvre. Rev. Sci., 1, **1894**, 616–624.
Cabanès, *Gustave.* [Sur la Vicia amphicarpa, *Dorth.*] Nîmes Soc. Sci. Bull., **1891**, xli–xlii.
—— [Sur une excursion botanique dans le bois de Signan, à Saint Gilles et dans la Camargue.] Nîmes Soc. Sci. Bull., **1891**, xliv–xlvi.
—— [Liste des plantes les plus remarquables observées à Congénies et dans les environs en août et septembre 1891.] Nîmes Soc. Sci. Bull., **1891**, lxix–lxxii.
—— Matériaux pour le prodrome d'histoire naturelle du département du Gard. Partie botanique. Catalogue des plantes non mentionnées dans l'ouvrage de de Pouzolz et nouvelles pour la flore du département du Gard. Nîmes Soc. Sci. Bull., **1891**, 8–81; **1892**, 19–46.
—— Note relative à un cas de tératologie végétale observé sur un pied d'Ornithogalum umbellatum, *Lin.* Nîmes Soc. Sci. Bull., **1892**, xliv–xlvi.
—— [Champignons récoltés dans les environs de Nîmes.] Nîmes Soc. Sci. Bull., **1892**, lxvii–lxviii, cxii–cxiv.
—— Note relative à la découverte d'un Panicum nouveau pour la flore du Gard. Nîmes Soc. Sci. Bull., **1892**, 55–58.
—— [Sur l'Orchis picta.] Nîmes Soc. Sci. Bull., **1893**, xlvi–xlvii.
—— [Plantes intéressantes pour la flore du Gard.] Nîmes Soc. Sci. Bull., **1893**, lxxiii–lxxiv, lxxviii–lxxx.
—— Note relative à quelques champignons observés de septembre à décembre 1893 dans les environs de Nîmes. Nîmes Soc. Sci. Bull., **1893**, 57–65.
—— [Sur un échantillon de Polyporus obliquus.] Nîmes Soc. Sci. Bull., **1894**, xlvi.
—— Note relative à quelques plantes nouvelles ou rares pour la flore du Gard. Nîmes Soc. Sci. Bull., **1894**, 80–92; **1895**, 9–13.
—— Les platanes du Gard. Nîmes Soc. Sci. Bull., **1894**, 118–123.
—— Plantes observées à Valleraugue sur l'Aigoual, à Camprieux et à la Sereyrède en septembre 1894. Nîmes Soc. Sci. Bull., **1895**, 1–5.
—— Un cas de tératologie végétale observé sur le Scolopendrium officinale (*Lin.*). Nîmes Soc. Sci. Bull., **1895**, 14–16.
—— Le Rhamnus alaternus, *Lin.*, de la flore du Gard. Nîmes Soc. Sci. Bull., **1896**, xxxix–xli.
—— [Floraison à Nîmes du Dasylirium gracilis.] Nîmes Soc. Sci. Bull., **1896**, lix–lx.
—— Le Scolopendrium officinale, *Lin.*, *var.* dedalea, *Doll.*, plante nouvelle pour la flore française. Nîmes Soc. Sci. Bull., **1896**, 52–60.
—— [La Marsdenia erecta au Mont Duplan.] Nîmes Soc. Sci. Bull., **1897**, xlii–xliii.
—— Note relative à un cas de tératologie végétale observé à Nîmes sur des poires développées en octobre-novembre, 1897. Nîmes, Soc. Sci. Bull., **1898**, 1–3.
—— Les loupes ou broussins. Note relative à un cas observé à Aujargues sur le "Populus alba, *Lin.*" Nîmes Soc. Sci. Bull., **1899**, 22–24.
—— Notes de tératologie végétale. Nîmes Soc. Sci. Bull., **1899**, 44–53.
—— Un nouveau fléau pour notre agriculture méridionale: maladie de l'olivier produite par un champignon parasite: Cycloconium oleaginum, *Castagne.* Nîmes Soc. Sci. Bull., **1900**, 16–22.
—— Lichens observés dans les environs de Nîmes. Nîmes Soc. Sci. Bull., **1900**, 25–47.
Cabanès, *Gustave,* & **Mazauric,** *Félix.* *See* **Mazauric** & **Cabanès.**
Cabanès, *Gustave,* & **Mingaud,** *Galien.* [Floraison et fructification automnales d'arbres fruitiers et d'ornement.] Nîmes Soc. Sci. Bull., **1897**, lii–liv.
Cabanié, ——. Relation d'une épidémie d'anémie d'origine miasmatique. Arch. Méd. Pharm. Militaires, 3, **1884**, 1–9.
Cabanis, *J*[*ean*]. *[Zwei neue Webervögel, Hyphantornis castaneigula und H. melanops, *nn. spp.*] [1883.] Jl. f. Ornith., 32, **1884**, 240.
—— *[Die Synonymie von Bradyornis.] [1883.] Jl. f. Ornith., 32, **1884**, 240–241.
—— [Lanius major ist eine gute Art.] Jl. f. Ornith., 32, **1884**, 251.
—— Anthus antarcticus, *n. sp.* Jl. f. Ornith., 32, **1884**, 254.
—— Ægialitis Mechowi, *n. sp.* Jl. f. Ornith., 32, **1884**, 437–438.
—— [Eine klimatische Abart der Chrysolis Pretrei aus Tukuman, Ch. tucumana, *n. sp.*] Jl. f. Ornith., 33, **1885**, 221–222.
—— [Ueber einige Conurus-Arten.] Jl. f. Ornith., 33, **1885**, 222.
—— [Ueber das Vorkommen von Habropyga melpoda (*Vieill.*), und Habr. paludicola, *Heugl.*, in Angola.] Jl. f. Ornith., 33, **1885**, 464–465.
—— Bradyornis (Dioptrornis) brunnea, *n. sp.* [1886.] Jl. f. Ornith., 35, **1887**, 92–93.
—— Querquedula antarctica, *n. sp.* Jl. f. Ornith., 36, **1888**, 118.
—— Vorläufige Notiz über zwei neue Paradies-Vögel. Jl. f. Ornith., 36, **1888**, 119.
—— Francolinus (Scleroptera) modestus. Jl. f. Ornith., 37, **1889**, 87–88.
—— [Ueber Hemignathus procerus, *n. sp.*, von Kauai.] Jl. f. Ornith., 37, **1889**, 331.
—— [Ueber die Psariden.] [1891.] Jl. f. Ornith., 40, **1892**, 125.
Cabanne, [*Paul*]. [Observations géologiques sur la rive gauche de la Dordogne.] Bordeaux Soc. Linn. Act., 41, **1887**, lvii–lxii.
Cabannes, [*Camille Isidore*], & **Fromaget,** *Camille.* *See* **Fromaget** & **Cabannes.**
Cabannes, [*Camille Isidore*], & **Sabrazès,** *Jean* [*Émile*]. *See* **Sabrazès** & **Cabannes.**
Cabaud, *P. A.*, & **Sainthillier,** *A. de.* *See* **Sainthillier** & **Cabaud.**
Cabedo, *José Bruno de.* Sobre a fórmula de Taylor. Gomes Teixeira Jorn. Sci., 7, **1886**, 145–149.
—— Demonstração do theorema de Cauchy. Gomes Teixeira Jorn. Sci., 9, **1889**, 7–11.
—— Duas fórmulas de analyse. Gomes Teixeira Jorn. Sci., 9, **1889**, 129–131; Fortschr. Math., **1889**, 234.
—— Sobre o resto da fórmula de Taylor. Gomes Teixeira Jorn. Sci., 10, **1891**, 13–17; Fortschr. Math., **1890**, 253.
—— Sobre a convergencia dos productos infinitos. [1892.] Gomes Teixeira Jorn. Sci., 10, **1891**, 138–140.
—— Sobre os coefficientes da serie de Fourier. Gomes Teixeira Jorn. Sci., 12, **1895**, 81–84; Fortschr. Math., **1893–94**, 395.
Cabell, *J. M.* On the action of sulphuretted hydrogen upon metallic silver. Chem. News, 50, **1884**, 208–209.
—— On crystallized phosphorous anhydride. Chem. News, 50, **1884**, 209.
—— Analysis of infusorial earth, Richmond, Va. Chem. News, 50, **1884**, 219.
Cabella, *Antonio G.* Sopra alcuni derivati dell' acido fenilcinnamico. [1884.] Gazz. Chim. Ital., 14, **1885**, 114–116.
—— Sopra alcuni derivati degli acidi fenilparacumarico e

metilatropico. [1887.] Napoli, Rend., 26, 1887, 220–224; Napoli Soc. Nat. Boll., 2, 1888, 7–10.

Cabella, *Antonio G.*, **Oglialoro-Todaro,** *Agostino*, & **Forte,** *Oreste*. *See* **Oglialoro-Todaro, Forte & Cabella.**

Caberti, *Luigi*, & **Minunni,** *Gaetano*. *See* **Minunni & Caberti.**

Caberti, *Luigi*, & **Paternò,** *Emanuele*. *See* **Paternò & Caberti.**

Cabitto, *Clemente*. La tossicità del sudore negli epilettici. Ricerche sperimentali. Riv. Sper. di Freniatria, 23, 1897, 36–51.

Cabolet, ——. Gasausströmungen in Sülldorf. Ztschr. Angew. Chem., 1895, 400–401.

Cabot, *Follen*. Report of experimental work on the dilution method of immunization from rabies. Jl. Exper. Med., 4, 1899, 181–188.

Cabot, *Godfrey L.* The flameless combustion of natural gas. Soc. Chem. Ind. Jl., 11, 1892, 801.

—— Solubility of lime in presence of sodium and potassium chlorides at various temperatures. Soc. Chem. Ind. Jl., 16, 1897, 417–419.

Cabot, *John W.* The influence of temperature in steel-making on the behavior of the ingots in rolling. [1885.] Amer. Inst. Min. Engin. Trans., 14, 1886, 84–88.

Cabot, *Louis*. The immature state of the Odonata. Part III. Subfamily Cordulina. [1890.] Harvard Mus. Zool. Mem., 17, 1890–94, *No.* 1, 52 pp.

Cabot, *Richard C.*, & **Whoriskey,** *J. J.* Substitutes for tuberculin as a means of diagnosis. Boston Soc. Med. Sci. Jl., 3, 1899, 71–74.

Cabot, *Samuel*. For biography and works *see* Amer. Ac. Proc., 21, 1886, 517–520; Auk, 3, 1886, 144.

Cabral. *See* **Vasconcellos Pereira Cabral.**

Cabreira, *Antonio*. Alguns theoremas de mecanica. Gomes Teixeira Jorn. Sci., 11, 1892, 42–54; Fortschr. Math., 1892, 876.

—— Sur la géométrie des courbes transcendantes. [*Tr.*] Lisboa Soc. Geogr. Bol., 11, 1896, 749–809.

—— Sobre as velocidades na espiral. Gomes Teixeira Jorn. Sci., 13, 1897, 49–51.

—— Sur l'aire des polygones. Lisboa Soc. Geogr. Bol., 7, 1897, 419–433.

—— Descoberta e primeiras propriedades geometricas de uma espiral binomia do primeiro gráo. [1897.] Lisboa, Jorn. Sci. Math., 5, 1898, 1–6; Fortschr. Math., 1897, 536.

—— Sobre a area dos polygonos regulares. [1897.] Lisboa, Jorn. Sci. Math., 5, 1898, 7–13; Fortschr. Math., 1897, 445.

—— Sobre a area dos polygonos semi-regulares. [1897.] Lisboa, Jorn. Sci. Math., 5, 1898, 43–47; Fortschr. Math., 1897, 446.

—— Sobre algumas applicações do theorema de Tinseau. [1897.] Lisboa, Jorn. Sci. Math., 5, 1898, 93–104.

—— Methodos novos para determinar o lado e a area de qualquer polygono regular. Lisboa, Jorn. Sci. Math., 5, 1898, 175–183.

—— Sobre a theoria dos logarithmos de ordem N. Lisboa, Jorn. Sci. Math., 5, 1898, 226–230.

—— Sobre o calculo das phases de uma funcção simples. [1900.] Lisboa, Jorn. Sci. Math., 6, [1902], 55–64.

—— Sobre as propriedades polares dos pontos. [1900.] Lisboa, Jorn. Sci. Math., 6, [1902], 70–75.

Cabrera y Diaz, *Anatael*. Los dragos de Canarias. Madrid, Soc. Hist. Nat. An., 21, 1892 (*Act.*), 80–85.

—— Catálogo de las aves del archipiélago Canario. Madrid, Soc. Hist. Nat. An., 22, 1893, 151–220.

—— Description d'une nouvelle espèce de Cynipide. Paris, Soc. Ent. Bull., 1897, 25.

Cabrera G., *Fernando*. Notas pasadas al gobierno sobre ciertas observaciones hechas con motivo de los fenómenos ocurridos en nuestras líneas telegráficas. Santiago de Chile, Univ. An., 65, 1884, 256–274.

Cabrera Latorre, *Angel*. Observaciones sobre un chimpancé de ancas blancas (Troglodytes leucoprimnus, *Less.*). Madrid, Soc. Hist. Nat. An., 26, 1897 (*Act.*), 37–42.

—— Estudios sobre una colección de monos americanos. Madrid, Soc. Hist. Nat. An., 29, 1900, 65–93.

—— [Observaciones sobre la coloración del Portax pictus.] Madrid, Soc. Hist. Nat. An., 29, 1900 (*Act.*), 98–99.

Cabrol, ——, & **Tamisier,** ——. *Relation des tremblements de terre ressentis à Bourbonne-les-Bains (Haute-Marne), du 26 mars au 25 mai 1861. France Soc. Météorol. Annu., 9, 1861, *Pt.* 2, 143–152, 154–159.

Cacciaguerra, (*cav.*) ——. Upon reflex action between the uterus and the teeth. Brit. Jl. Dental Sci., 27, 1884, 240–242.

—— Sympathetic symptoms, with hæmorrhage, between the uterus and the teeth. Brit. Jl. Dental Sci., 27, 1884, 585–587.

—— On reflex uterine-dental action, fall of teeth in gestation and in the cessation of menstruation. Brit. Jl. Dental Sci., 28, 1885, 1–4.

Cacciamali, *G. B.* Contribuzione allo studio della geologia abruzzese. Brescia Ateneo Comment., 1884, 251–256; 1885, 233–237.

—— Petroli e bitumi di Valle Latina. Riv. Ital. Sci. Nat., Siena, 9, 1889, 73–79, 129–133.

—— Il fenomeno del Carso a Fontana Liri. Riv. Ital. Sci. Nat., Siena, 9, 1889, 262–264.

—— Sopra un affioramento di schisto bituminoso a Santopadre, in provincia di Caserta. Italia Com. Geol. Boll., 21, 1890, 436–441.

—— Gli elefanti fossili di Val di Comino. [Italia], Soc. Geol. Boll., 9, 1890, 46–49.

—— Gli elefanti fossili d' Aquino. [Italia], Soc. Geol. Boll., 9, 1890, 423–425, 827.

—— Sulla possibile origine endogena di alcune puddinghe. Riv. Ital. Sci. Nat., Siena, 10, 1890, 137–139.

—— Le "bambole di creta" a Castelliri. Riv. Ital. Sci. Nat., Siena, 11, 1891, 145–146.

—— Sopra un caso di atavismo in una spiga femminea di Zea Mays. Riv. Ital. Sci. Nat., Siena, 12, 1892, 97–98.

—— Sulla classificazione dei Mammiferi. Riv. Ital. Sci. Nat., Siena, 12, 1892 (*Boll.*), 49–51.

—— Il terremoto sorano del 9 maggio 1891. Roma, Uff. Centr. Meteorol. Ann., 11 (*Pt.* 3), 1892, 1–6.

—— Geologia arpinate. [1893.] [Italia], Soc. Geol. Boll., 11, 1892, 293–333.

—— Studii.....sulla collina di Castenedolo. [1895–96.] Brescia Ateneo Comment., 1896 (*Append. No.* 1), 93 pp.

—— Filogenesi delle Idrante. Riv. Ital. Sci. Nat., Siena, 17, 1897, 137–142.

—— [Note di raffronto tra le prealpi lombarde e l'Appenino umbro-marchigiano.] Brescia Ateneo Comment., 1898, 99–111.

—— Filogenesi degli Esapodi. Riv. Ital. Sci. Nat., Siena, 18, 1898, 117–122.

—— [Sulla costituzione geologica del Monte Maddalena.] Brescia Ateneo Comment., 1899, 160–186.

—— L' "Homo mongolus." Riv. Ital. Sci. Nat., Siena, 20, 1900 (*Boll.*), 99–104.

Cacciamali, *G. B.*, & **Ragazzoni,** *Giuseppe*. *See* **Ragazzoni & Cacciamali.**

Cacciatore, *Gaetano*. For biography and works *see* Astr. Nachr., 122, 1889, 47–48; Moncalieri Oss. Boll., 9, 1889, 163–164; Nature, 40, 1889, 255; Palermo Oss. Pubbl., 4, 1889, 3 pp.; Riv. Sci.-Ind., 21, 1889, 175–176; Astr. Soc. Month. Not., 50, 1890, 177–178.

—— *[Le stelle cadenti del periodo di agosto 1870.] Moncalieri Oss. Bull., 5, 1870, 127.

—— *[Pioggie di sabbia, 18–21 marzo 1877.] Palermo. [1877.] Moncalieri Oss. Bull., 12, 1878, 145.

—— *[Osservazioni del Passaggio di Venere sul disco solare fatte in Palermo nel 6 dicembre 1882.] Spettrosc. Ital. Mem., 11, 1883, 3 pp.

—— Osservazioni della Cometa Pons-Brooks eseguite in Palermo all' equatoriale di Merz. Astr. Nachr., 108, **1884**, 79–80, 373–376.
—— Riassunto delle osservazioni meteorologiche eseguite nel R. Osservatorio di Palermo negli anni 1881–82, [1885–86, 1887–88]. Palermo Acc. Atti, 8, **1884**, 5 pp.; 9, **1887**, 5 pp.; 10, **1889**, 5 pp.
—— Sulle ondate atmosferiche prodotte dall' eruzione del vulcano Krakatoa, osservate in Palermo. Roma, R. Acc. Lincei Trans., 8, **1884**, 343–345.
—— [Ueber den neuen Stern im grossen Andromeda-Nebel.] Astr. Nachr., 112, **1885**, 300–301, 387.
—— Le stelle cadenti del periodo di agosto 1883 osservate a Palermo. Spettrosc. Ital. Mem., 13, **1885**, 83–84.
—— [Neuer Stern bei χ' Orionis.] Astr. Nachr., 113, **1886**, 313–314.
—— Beobachtung des Winnecke'schen Cometen (1886...) in Palermo. Astr. Nachr., 115, **1886**, 143–144.
—— [Beobachtungen des Cometen 1886 (Finlay).] Auf der Sternwarte in Palermo. Astr. Nachr., 115, **1886**, 239–240; 116, **1887**, 151–154, 263–264.

—— Éléments et éphéméride de la planète (267). Paris, Ac. Sci. C. R., 105, **1887**, 53–54.

—— Observations de la nouvelle Comète Brooks (1887, août 24), faites à l'Observatoire de Nice avec l'équatorial de Gautier de 0^m,38 d'ouverture. Paris, Ac. Sci. C. R., 105, **1887**, 456–457.

—— Entdeckung eines neuen Planeten (272) auf der Sternwarte in Nizza. Astr. Nachr., 118, **1888**, 287–288.

—— Beobachtungen des Cometen 1888... (Sawerthal). À l'Observatoire de Nice. Astr. Nachr., 119, **1888**, 27–28.

—— Entdeckung eines neuen Planeten (277) auf der Sternwarte in Nizza. Astr. Nachr., 119, **1888**, 111–112.

—— Auffindung des Planeten (268) Adorea auf der Sternwarte in Nizza. Astr. Nachr., 119, **1888**, 383–384.

—— Observations des planètes (169), (181), (190), (226), (246), (269), et (271), faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Bull. Astr., 5, **1888**, 51–52.

—— Nouveaux éléments de la planète (252) et éphéméride pour l'opposition de 1888. Bull. Astr., 5, **1888**, 105–107.

—— Observations des planètes (120), (138), (141), (252) et (272), faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Bull. Astr., 5, **1888**, 148–149.

—— Observations des planètes (106), (177), (207), (230), (236), (252), (261), (272), (273), [(144), (223), (275), (276), (277),] et de la Comète Sawerthal, faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Bull. Astr., 5, **1888**, 205–207, 345–347.

—— Observations des planètes (201), (212), (267), (268), (277) et de la Comète Brooks (1888 août 7), faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Bull. Astr., 5, **1888**, 495–496.

—— Observations de la Comète d'Olbers, faites à l'Observatoire de Nice (équatorial de 0^m,38 d'ouverture). Paris, Ac. Sci. C. R., 106, **1888**, 42–43.

—— Éphéméride de la planète (252) pour l'opposition de 1888. Paris, Ac. Sci. C. R., 106, **1888**, 412–413.

—— Observations de la nouvelle planète (272), découverte le 4 février, [1888,] à l'Observatoire de Nice. Paris, Ac. Sci. C. R., 106, **1888**, 463–464.

—— Eléments et éphéméride de la planète (272). Paris, Ac. Sci. C. R., 106, **1888**, 584.

—— Observations de la Comète Sawerthal, faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Paris, Ac. Sci. C. R., 106, **1888**, 1000–1001.

—— Observations de la nouvelle planète (277), découverte le 3 mai 1888, à l'Observatoire de Nice. Paris, Ac. Sci. C. R., 106, **1888**, 1392–1393.

—— Observations de la nouvelle Comète Brooks, faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Paris, Ac. Sci. C. R., 107, **1888**, 437.

—— [Entdeckung von neuen Planeten.] Astr. Nachr., 120, **1889**, 317–318, 335–336; 121, **1889**, 351–352; 124, **1890**, 135–136; 128, **1891**, 207–208; 131, **1893**, 263–264; 132, **1893**, 207–208; 133, **1893**, 119–120.

—— [Entdeckung eines neuen Planeten (285).] Astr. Nachr., 122, **1889**, 191–192.

—— Begleiter des Cometen 1889...(Brooks Juli 6). Astr. Nachr., 122, **1889**, 319–320.

—— Observations des planètes (31), (70), (87), (107), (204), (210), (231), (235), (259) et des Comètes Faye, Barnard (2 sept.), Barnard (30 oct.), faites à l'Observatoire de Nice (équatorial de Gautier, de 0^m,38 d'ouverture). Bull. Astr., 6, **1889**, 12–15.

—— Observations des planètes (113), (181), (226), (246), (247), (282), (283), et de la Comète Faye, faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 6, **1889**, 206–208.
—— Éphéméride de la planète (252) Clémentine. Bull. Astr., 6, **1889**, 209.
—— Éphéméride de la planète (272) Antonia. Bull. Astr., 6, **1889**, 209–210.
—— Observations des planètes (135), (138), (154), (167), (177), (181), (263), (264), (282), (283), et des Comètes Barnard (1888 oct. 30) et Barnard (1889 mars 31), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 6, **1889**, 259–262.
—— Observations de la Comète Barnard (1889 juin 23) et des planètes (12), (214), (248), (252), (272), (284), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 6, **1889**, 343–345.
—— Observations des Comètes Brooks (6 juillet 1889), Davidson (23 juillet 1889) et des planètes (166), (261), (277), (284), (285), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 6, **1889**, 427–430.
—— Éléments de la planète (284). Bull. Astr., 6, **1889**, 430.
—— Éléments de la planète (285). Bull. Astr., 6, **1889**, 430.
—— Observations des Comètes Barnard (31 mars 1889), Brooks (6 juillet 1889), Davidson (23 juillet 1889), Swift (17 novembre 1889) et des planètes (35), (65), (90), (168), (242), (279), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 6, **1889**, 522–524.
—— Observation de la nouvelle planète découverte le 28 janvier 1889 à l'Observatoire de Nice. Paris, Ac. Sci. C. R., 108, **1889**, 219.
—— Observations de la nouvelle planète, découverte le 8 février 1889 à l'Observatoire de Nice. Paris, Ac. Sci. C. R., 108, **1889**, 277.
—— Observations de la nouvelle planète, découverte le 29 mai 1889, à l'Observatoire de Nice. Paris, Ac. Sci. C. R., 108, **1889**, 1156.
—— Observations de la nouvelle planète découverte à l'Observatoire de Nice le 3 août 1889. Paris, Ac. Sci. C. R., 109. **1889**, 297.
—— Sur la Comète Brooks (6 juillet 1889). Paris, Ac. Sci. C. R., 109, **1889**, 400-401.
—— [Unabhängige Auffindung der Planeten (291) und (292).] Astr. Nachr., 124, **1890**, 239–240.
—— Entdeckung eines neuen Planeten (293) auf der Sternwarte in Nizza. Astr. Nachr., 124, **1890**, 287–288.
—— Entdeckung eines neuen Planeten (294) auf der Sternwarte in Nizza. Astr. Nachr., 125, **1890**, 63–64.
—— Entdeckung eines Planeten (296) auf der Sternwarte in Nizza. Astr. Nachr., 125, **1890**, 207–208.
—— Entdeckung zweier Planeten (297) und (298) auf der Sternwarte in Nizza. Astr. Nachr., 125, **1890**, 271–272.
—— Observations des Comètes Barnard (31 mars 1889), Brooks (6 juillet 1889), Swift (17 novembre 1889), Borrelly (12 décembre 1889) et des planètes (144), (176), (267), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 7, **1890**, 106–107.
—— Observations des Comètes 1889 I, Brooks (1890, mars 19) et des planètes (84), (107), (130), (181), (226), (246), (258), (259), (282), (283), (288), (289), (291), (292), (293), faites à l'Observatoire de Nice (équatorial de Gautier, de 0m,38 d'ouverture). Bull. Astr., 7, **1890**, 294–298.
—— Observations des Comètes Brooks (1890 mars 19), Coggia (1890 juillet 18), Denning (1890 juillet 23) et des planètes (103), (159), (214), (223), (236), (251), (282), (293), (294), (296), (297), (298), faites à l'Observatoire de Nice (équatorial Gautier, 0m,38 d'ouverture). Bull. Astr., 7, **1890**, 379–384.
—— Observations de comètes et de planètes faites à l'équatorial de Gautier (0m,38 d'ouverture). Nice Obs. Ann., 3, **1890**, D. 50 pp.
—— Petites planètes découvertes à l'Observatoire et calculs d'orbites. Nice Obs. Ann., 3, **1890**, E. 5 pp.
—— Observations et éléments de la nouvelle planète (289), découverte à l'Observatoire de Nice, le 10 mars 1890. Paris, Ac. Sci. C. R., 110, **1890**, 695–696.
—— Éléments et éphéméride de la nouvelle planète (293), découverte à l'Observatoire de Nice, le 20 mai 1890. Paris, Ac. Sci. C. R., 110, **1890**, 1319–1320.
—— Éléments et éphéméride de la Comète Denning (1890 juillet 23). Paris, Ac. Sci. C. R., 111, **1890**, 260–261.
—— Éléments et éphéméride de la planète (294), découverte à l'Observatoire de Nice, le 15 juillet 1890. Paris, Ac. Sci. C. R., 111, **1890**, 357.
—— Planet (298). Astr. Nachr., 126, **1891**, 95–96.
—— Entdeckung von [einem] kleinen Planeten (303). Astr. Nachr., 126, **1891**, 327–328.
—— Neuer Planet (306). Astr. Nachr., 126, **1891**, 341–342.
—— Entdeckung eines neuen Planeten (308) auf der Sternwarte in Nizza. Astr. Nachr., 126, **1891**, 383–384.
—— Beobachtung eines kleinen Planeten in der Nähe von (76) und (147). Astr. Nachr.. 127, **1891**, 231–232.
—— Planète (310). Astr. Nachr., 127, **1891**, 255–256.
—— Observations des planètes (76) Freia et (147) Protogeneia. Astr. Nachr., 127, **1891**, 301–302.
—— Entdeckung eines neuen Planeten (311) auf der Sternwarte in Nizza. Astr. Nachr., 127, **1891**, 319–320.
—— Entdeckung von [einem] neuen Planeten (313) auf der Sternwarte zu Nizza. Astr. Nachr., 128, **1891**, 175–176.
—— Entdeckung eines neuen Planeten (315) auf der Sternwarte zu Nizza. Astr. Nachr., 128, **1891**, 191–192.
—— Entdeckung eines Planeten (318) auf der Sternwarte in Nizza. Astr. Nachr., 128, **1891**, 237–238.
—— Entdeckung von zwei neuen Planeten. Planet (319). Astr. Nachr., 128, **1891**, 255–256.
—— Observations des planètes (180), (254), (261), (272), (279), (284), (287), (294), (297), (298), (300), (301) et des Comètes Zona (1890 nov. 15), Spitaler (1890 nov. 16), faites à l'Observatoire de Nice (équatorial Gautier, 0m, 38 d'ouverture). Bull. Astr., 8, **1891**, 73–76.
—— Observations des planètes (208), (245), (267), (289), (302), (303), (304), (305), (306), (307), (308), (309), faites à l'Observatoire de Nice (équatorial Gautier, 0m,38 d'ouverture). Bull. Astr., 8, **1891**, 294–297.
—— Éléments de la planète (293) Brasilia, calculés à l'aide des observations faites à Nice du 20 mai au 9 juillet 1890. Bull. Astr., 8, **1891**, 297–298.
—— Observations des planètes (76), (86), (147), (178), (181), (258), (283), (288), (305), (307), (308), (310), (311), faites à l'Observatoire de Nice (équatorial Gautier, 0m,38 d'ouverture). Bull. Astr., 8, **1891**, 455–458.
—— Éléments et éphéméride de la planète (294) Félicie. Bull. Astr., 8, **1891**, 459–460.
—— Observations de deux nouvelles planètes, découvertes à l'Observatoire de Nice, les 11 et 16 février 1891. Paris, Ac. Sci. C. R., 112, **1891**, 415.
—— Observation de la nouvelle planète (308) [(307)], découverte à l'Observatoire de Nice, le 5 mars 1891. Paris, Ac. Sci. C. R., 112, **1891**, 510.
—— Observations de la nouvelle planète découverte à l'Observatoire de Nice, le 16 mai 1891. Paris, Ac. Sci. C. R., 112, **1891**, 1301.
—— Observations de la nouvelle planète découverte à l'Observatoire de Nice, le 11 juin 1891. Paris, Ac. Sci. C. R., 112, **1891**, 1418.
—— Observations de quatre nouvelles petites planètes, découvertes à l'Observatoire de Nice les 28 août, 1er, 8 et 11 septembre 1891. Paris, Ac. Sci. C. R., 113, **1891**, 414–415.

—— Observations de deux nouvelles petites planètes, découvertes à l'Observatoire de Nice, les 24 septembre et 8 octobre 1891. Paris, Ac. Sci. C. R., 113, **1891**, 593.
—— Entdeckung eines Planeten (327) auf der Sternwarte in Nizza. Astr. Nachr., 129, **1892**, 149–150.
—— Beobachtung des Cometen 1892...(Swift März 6). À l'Observatoire de Nice. Astr. Nachr., 129, **1892**, 161–162.
—— Planet (331) (Charlois April 1). Astr. Nachr., 129, **1892**, 183–184.
—— Entdeckung eines neuen Planeten 1892 D. Astr. Nachr., 130, **1892**, 407–408.
—— Entdeckung von [zwei] neuen Planeten 1892 E und F. Astr. Nachr., 130, **1892**, 439–440.
—— Observations de la Comète Tempel-Swift et des planètes (111), (149), (226), (312), (314), (316), (317), (318), (319), faites à l'Observatoire de Nice (équatorial Gautier, $0^m,38$ d'ouverture). Bull. Astr., 9, **1892**, 7–10.
—— Éléments provisoires des planètes (314) et (317). Bull. Astr., 9, **1892**, 11.
—— Observations des planètes (252), (277), (279), (282), (284), (294), (297), (300), (312), (314), (316), (317), (318), (319), (320), faites à l'Observatoire de Nice (équatorial Gautier, $0^m,38$ d'ouverture). Bull. Astr., 9, **1892**, 219–222.
—— Observations de deux nouvelles planètes, découvertes à l'Observatoire de Nice, les 22 mars et 1er avril 1892. Paris, Ac. Sci. C. R., 114, **1892**, 971.
—— [Neue Planeten 1892 M, O, P, Q und R.] Astr. Nachr., 131, **1893**, 183–184.
—— Entdeckung [eines] neuen Planeten, 1892 U. Astr. Nachr., 131, **1893**, 311–312.
—— Entdeckung von [drei] neuen Planeten 1893 A, [D und E]. Astr. Nachr., 132, **1893**, 63–64.
—— Neuer Planet 1893 G. Astr. Nachr., 132, **1893**, 79–80.
—— Entdeckung eines neuen Planeten 1893 J. Astr. Nachr., 132, **1893**, 143–144.
—— Entdeckung von zwei neuen Planeten 1893 K und L in Nizza. Astr. Nachr., 132, **1893**, 191–192.
—— Entdeckung von drei Planeten 1893 Z, AA und AB. Astr. Nachr., 132, **1893**, 367–368.
—— Entdeckung von zwei neuen Planeten 1893 AG und AH. Astr. Nachr., 133, **1893**, 239–240.
—— Planète 1893 AF (9 août). Astr. Nachr., 133, **1893**, 319–320.
—— Entdeckung eines neuen Planeten 1893 AJ. Astr. Nachr., 133, **1893**, 351–352.
—— Observations de la Comète Swift (1892 I) et des planètes (302), (303), (305), (318), (324), (327), (330), (331), (336), (337), (338), (M), (O), (P), (Q), (R), (S), (T), (U), faites à l'Observatoire de Nice. Bull. Astr., 10, **1893**, 57–61.
—— Observations des planètes (42), (45), (274), (298), (312), (317), (344), (345), (346), (347), (348), (349), (350), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 10, **1893**, 322–324.
—— Observations des nouvelles planètes 1893 (A), (D), (E), (G), (J), (K), (L), (M), (N), (O), (P), (R), (S), (T), (U), (V), (W), (Z), découvertes à l'Observatoire de Nice. Bull. Astr., 10, **1893**, 457–462.
—— Entdeckung von drei neuen Planeten 1894 AQ, AR, AS. Astr. Nachr., 134, **1894**, 247–248.
—— Entdeckung von zwei neuen Planeten 1894 AT und AU. Astr. Nachr., 134, **1894**, 279–280.
—— [Zwei neue Planeten 1894 BA und BB.] Astr. Nachr., 135, **1894**, 31–32.
—— Observations des nouvelles planètes 1893 (AA), (AB), (AC), (AD), (AH), (AJ), (AK), (AL), (AM), (AN), (AP), découvertes à l'Observatoire de Nice. Bull. Astr., 11, **1894**, 97–100.
—— Tableau des petites planètes rencontrées par la photographie à l'Observatoire de Nice. Bull. Astr., 11, **1894**, 196–200, 524–526 ; 13, **1896**, 8–9, 372–373.
—— [Entdeckung eines neuen Planeten 1894 BJ.] Astr. Nachr., 137, **1895**, 29–30.
—— Entdeckung zweier Planeten 1894 BK und BL. Astr. Nachr., 137, **1895**, 47–48.
—— Neuer Planet 1894 BM. Astr. Nachr., 137, **1895**, 63–64.
—— Neuer Planet 1894 BN. Astr. Nachr., 137, **1895**, 93–94.
—— [Entdeckung des neuen Planeten 1895 BU.] Astr. Nachr., 137, **1895**, 239–240.
—— Entdeckung eines Planeten 1895 BX. Astr. Nachr., 138, **1895**, 15–16.
—— Entdeckung zweier Planeten 1895 BZ und CA. Astr. Nachr., 138, **1895**, 263–264.
—— [Entdeckung eines neuen Planeten 1895 CB.] Astr. Nachr., 138, **1895**, 319–320.
—— Observations des planètes (107), (158), (211), (218), (264), (283), (288), (292), (303), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 12, **1895**, 22–23.
—— Observations des planètes (326), (329), (337), (338), (344), (345), (347), (348), (350), (351), (354), (363) (deuxième opposition), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 12, **1895**, 23–25.
—— Observations des nouvelles planètes 1893 (AP), 1894 (AQ), (AR), (AS), (AT), (AU), (BA), (BB), découvertes à l'Observatoire de Nice. Bull. Astr., 12, **1895**, 25–28.
—— Observations de comètes et de planètes faites à l'équatorial de Gautier ($0^m,38$ d'ouverture). Nice Obs. Ann., 4, **1895**, D. 87 pp.
—— Petites planètes découvertes à l'Observatoire et calculs d'orbites. Nice Obs. Ann., 4, **1895**, E. 7 pp.
—— Neuer Planet 1895 CE. Astr. Nachr., 139, **1896**, 175–176.
—— Entdeckung von [zwei] neuen Planeten 1896 CH [und CJ]. Astr. Nachr., 139, **1896**, 255–256.
—— Neue Planeten 1896 CM und CN. Astr. Nachr., 139, **1896**, 271–272.
—— Neuer Planet 1896 CS. Astr. Nachr., 140, **1896**, 239–240.
—— Planet 1896 CT. Astr. Nachr., 140, **1896**, 303–304.
—— Éléments et éphéméride de la planète 1896 CS (1896 mai 4). Astr. Nachr., 140, **1896**, 349–352.
—— Observations des planètes (158), (226), (228), (288), (322), (391), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 13, **1896**, 10–11.
—— Observations des planètes (369), (370), (372), (373), (374), (375), (376), (377), (379), (380), (381), (384), (389), (deuxième opposition), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 13, **1896**, 11–13.
—— Observations des nouvelles planètes 1894 (BK), (BL), (BM), (BN), 1895 (BU), (BW), (BX), (BY), (BZ), (CA), (CB), découvertes à l'Observatoire de Nice. Bull. Astr., 13, **1896**, 14–17.
—— Entdeckung eines neuen Planeten 1896 DB. Astr. Nachr., 142, **1897**, 111–112.
—— Entdeckung von vier neuen Planeten 1896 DC bis DF. Astr. Nachr., 142, **1897**, 159–160.
—— Entdeckung von drei neuen Planeten 1897 DG bis DJ. Astr. Nachr., 144, **1897**, 191–192.
—— Observations des planètes (405), (406), (409), (410), (411), (414), (416), (417), (423), découvertes à l'Observatoire de Nice. Bull. Astr., 14, **1897**, 188–190.
—— Observations des planètes (175), (277), (308), (317), (321), (325), (332), (336), (344), (352), (358), (364), (366), (381), (391), (402), (405), faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 14, **1897**, 475–477.
—— Entdeckung eines neuen Planeten 1897 DL. Astr. Nachr., 145, **1898**, 79–80.
—— Entdeckung von drei neuen Planeten 1897 DM bis DO. Astr. Nachr., 145, **1898**, 175–176.
—— Entdeckung eines neuen Planeten 1898 DP. Astr. Nachr., 147, **1898**, 31–32.

—— Neuer Planet 1898 DU. Astr. Nachr., 147, **1898**, 399–400.
—— Observations des planètes (114), (124), (130), (137), (153), et 1896 DC, DD, DE, DF, faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 15, **1898**, 182–184.
—— Observations des planètes (194), (273), (377), (379), (403), 1897 DG, DH, DJ, DL, DM, DN, DO et 1898 DP, faites à l'Observatoire de Nice (équatorial coudé). Bull. Astr., 15, **1898**, 464–466.
—— Neuer Planet 1898 ED. Astr. Nachr., 148, **1899**, 63–64.
—— Entdeckung eines neuen Planeten 1899 EY. Astr. Nachr., 151, **1900**, 79–80.
—— Observations de la planète 1900 FA faites à l'équatorial de 9 pouces de l'Observatoire de Nice. Astr. Nachr., 152, **1900**, 157–160.
—— Éléments et éphéméride de la planète 1900 FA. Astr. Nachr., 152, **1900**, 159–160.

Not., 44, 1884, 89–96; 45, 1885, 330–343; 46, 1886, 126–135; 47, 1887, 101–108; 48, 1888, 116–122; 49, 1889, 127–130; 50, 1890, 111–119; 51, 1891, 136–146.
—— Observations of occultations of stars by the moon, and of phenomena of Jupiter's satellites, made at the Royal Observatory, Greenwich, in the year[s 1883 and 1884, 1886–95, 1897 and 1899]. Astr. Soc. Month. Not.,

44, **1884**, 97–99; 45, **1885**, 158–166; 47, **1887**, 109–114; 48, **1888**, 123–128; 49, **1889**, 132–135; 50, **1890**, 120–123; 51, **1891**, 147–154; 52, **1892**, 170–176; 53, **1893**, 136–143; 54, **1894**, 145–157; 55, **1895**, 154–158; 56, **1896**, 136–142; 58, **1898**, 96–102; 60, **1900**, 226–231.

—— Observations of the occultation of Venus by the moon, made at the Royal Observatory, Greenwich, 1884 February 29. Astr. Soc. Month. Not., 44, **1884**, 260–261.

—— Shifting of the Earth's axis. Nature, 30, **1884**, 536.

—— Observations of Comet *c* 1884 (Wolf), made at the Royal Observatory, Greenwich. [1884.] Astr. Soc. Month. Not., 45, **1885**, 55–57.

—— Occultations of stars by the moon observed during the total eclipse of the moon 1884 Oct. 4 at the Royal Observatory, Greenwich. Astr. Nachr., 110, **1885**, 109–110.

—— Observations of Comets 1885 . . . (Barnard) and 1885 . . . (Brooks) made at the Royal Observatory, Greenwich. Astr. Nachr., 112, **1885**, 405–406.

—— Letter. [On the best means of comparing and reducing magnetic observations.] Brit. Ass. Rep., **1885**, 82.

—— Observations of the Biela comet meteors made at the Royal Observatory, Greenwich. [1885.] Astr. Soc. Month. Not., 46, **1886**, 60–63.

—— Observations of Comets 1886 . . . (Fabry) and 1886 . . . (Barnard) made at the Royal Observatory, Greenwich. Astr. Nachr., 113, **1886**, 365–366.

—— Observations of Comets *d* 1885 (Fabry), and *e* 1885 (Barnard) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 46, **1886**, 125–126, 303, 348–349.

—— Observations of occultations of stars and Uranus by the moon, and of phenomena of Jupiter's satellites, made at the Royal Observatory, Greenwich, in the year 1885. Astr. Soc. Month. Not., 46, **1886**, 136–149.

—— Observations of Comets *d* 1885 (Fabry), *e* 1885 (Barnard), and *a* 1886 (Brooks), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 46, **1886**, 399–401.

—— Observations of Comet *a* 1886 (Brooks), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 46, **1886**, 459.

—— Aurora. Nature, 34, **1886**, 336.

—— Observations of Comet *f* 1886 (Barnard), made at the Royal Observatory, Greenwich. [1886–87.] Astr. Soc. Month. Not., 47, **1887**, 27, 65–66, 116.

—— Universal time. [1886.] Roy. Inst. Proc., 11, **1887**, 387–394.

—— Observations of Comet 1887 . . (Barnard May 12) made at the Royal Observatory, Greenwich. Astr. Nachr., 117, **1887**, 215–216.

—— Observations of Comets *e* 1886 (Finlay), *b* 1887 (Brooks), *c* 1887 (Barnard), and *d* 1887 (Barnard) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 47, **1887**, 275–276.

—— Observations of Comet *b* 1887 (Brooks) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 47, **1887**, 392–393.

—— The earthquake [of Feb. 23]. Nature, 35, **1887**, 462.

—— Description of the personal equation machine of the Royal Observatory, Greenwich. [1887.] Astr. Soc. Month. Not., 48, **1888**, 1–4.

—— Beobachtungen der totalen Mondfinsterniss 1888 Jan. 28. Occultations of stars observed at the Royal Observatory, Greenwich. Astr. Nachr., 118, **1888**, 363–364.

—— Observations of Comet *a* 1888 (Sawerthal), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 48, **1888**, 309, 341–343, 373–374, 382.

—— Observations of the spectrum of Comet 1888 *a* (Sawerthal), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 48, **1888**, 344.

—— Observations of Comets *a* 1888 (Sawerthal), and *e* 1888 (Barnard), made at the Royal Observatory, Greenwich. [1888.] Astr. Soc. Month. Not., 49, **1889**, 79–83.

—— Observations of Comet *e* 1888, made with the transit-circle at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 49, **1889**, 131.

—— Mean areas and heliographic latitudes of sun-spots, 1874 to [1898], deduced from photographs taken at Greenwich, at Dehra Dûn (India), and in Mauritius. [1889–99.] Astr. Soc. Month. Not., 49, **1889**, 380–383; 50, **1890**, 378–380; 52, **1892**, 24–26; 54, **1894**, 130–133; 55, **1895**, 150–153; 56, **1896**, 11–14; 57, **1897**, 2–6; 58, **1898**, 40–43, 307–312; 59, **1899**, 4–12; 60, **1900**, 157–162.

—— Observations of Comets *d* 1889 (Brooks), and *e* 1889 (Davidson), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 49, **1889**, 446–447.

—— Areas of faculæ and sun-spots, compared with diurnal ranges of magnetic declination, horizontal force, and vertical force, as observed at the Royal Observatory, Greenwich, in the year 1873 to 1888. [1889.] Astr. Soc. Month. Not., 50, **1890**, 8–10.

—— Mean daily area of sun-spots for each degree of solar latitude for each year from 1874 to 1888, as measured on photographs at the Royal Observatory, Greenwich. [1889.] Astr. Soc. Month. Not., 50, **1890**, 10–11.

—— Observations of occultations of Jupiter by the moon, made at the Royal Observatory, Greenwich, 1889 August 7. [1889.] Astr. Soc. Month. Not., 50, **1890**, 36–37.

—— Comparison of Hansen's Lunar Tables with observations made at the Royal Observatory, Greenwich in the years 1847–61. Astr. Soc. Month. Not., 50, **1890**, [41]–[175].

—— Observations of Comet *a* 1890 (Brooks), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 50, **1890**, 408–409, 523–526, 528–529; 51, **1891**, 49–50, 154.

—— Observations of the solar eclipse of 1890 June 16–17, made at the Royal Observatory, Greenwich. [1890.] Astr. Soc. Month. Not., 51, **1891**, 47–48.

—— Notes on the preparations for the work of the Astrophotographic chart at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 51, **1891**, 278–286.

—— On a new dome to be erected at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 51, **1891**, 436–438.

—— Preliminary note on the change of personal equation with stellar magnitude in transits observed with the transit-circle at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 51, **1891**, 455–458.

—— Observations of the solar eclipse of 1891 June 6, made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 51, **1891**, 558–560.

—— Introduction to the Greenwich five-year catalogue of 258 fundamental stars deduced from observations extending from 1887 to 1891, and reduced to the epoch 1890.0. [1893.] Greenwich Obsns., **1891** (*Append.*), 14 pp.

—— Observations of Wolf's periodical Comet (*b* 1891) made at the Royal Observatory, Greenwich. [1891.] Astr. Soc. Month. Not., 52, **1892**, 27–28, 118; 53, **1893**, 469.

—— Weitere Mittheilungen über den neuen Stern in Auriga. Astr. Nachr., 129, **1892**, 59–60; 130, **1892**, 237–238.

—— On the relation between diameter of image, duration of exposure, and brightness of objects in photographs of stars taken at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 52, **1892**, 125–146.

—— On the large sun-spot of 1892 February 5–18, and the associated magnetic disturbance. Astr. Soc. Month. Not., 52, **1892**, 354–357.

—— On the photographic magnitude of Nova Aurigæ, as

determined at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 52, **1892**, 357–366; 53, **1893**, 27–32.

—— On a new form of altazimuth. Astr. Soc. Month. Not., 52, **1892**, 480–484.

—— Observations of Swift's Comet (*a* 1892), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 52, **1892**, 515–516, 566–567; 53, **1893**, 69, 512.

—— Partial eclipse of the moon, 1892 May 11. Astr. Soc. Month. Not., 52, **1892**, 517–518, 565.

—— Occultation of 73 Piscium by Jupiter, 1892 May 23, observed at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 52, **1892**, 564–565.

—— Observations of Swift's Comet (*a* 1892) and Winnecke's periodic Comet, made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 52, **1892**, 605–606.

—— Observations of Brooks' Comet (*d* 1892) and Swift's Comet (*a* 1892) made at the Royal Observatory, Greenwich. [1892.] Astr. Soc. Month. Not., 53, **1893**, 48–51.

—— Observations of Holmes' Comet (*f* 1892) made at the Royal Observatory, Greenwich. [1892.] Astr. Soc. Month. Not., 53, **1893**, 52, 67–69.

—— Note on Nova Aurigæ. [1892.] Astr. Soc. Month. Not., 53, **1893**, 54.

—— [Neuer Comet Holmes.] Astr. Nachr., 131, **1893**, 133–134.

—— Possible photograph of Comet 1892 III (Holmes) taken by Mr. Schooling, 1892 Oct. 18. [With a note by Prof. H. Kreutz.] Astr. Nachr., 132, **1893**, 107–108.

—— Observations of Brooks' Comet (*g* 1892) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 53, **1893**, 134–135, 347.

—— A micrometer for measuring the plates of the Astrophotographic chart. Astr. Soc. Month. Not., 53, **1893**, 326–329.

—— Observations of Brooks' Comet (*g* 1892) and Holmes' Comet (*f* 1892) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 53, **1893**, 343–347; 54, **1894**, 39.

—— Observations of the recent conjunction of Saturn and γ Virginis made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 53, **1893**, 374–377.

—— Revised places of comets observed at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 53, **1893**, 377–379.

—— Observations of the planets Mars and Ceres, made at the Royal Observatory, Greenwich, about the time of their recent conjunction. Astr. Soc. Month. Not., 53, **1893**, 450–453.

—— Observations of the Comet Rordame-Quénisset (*b* 1893), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 53, **1893**, 502–504.

—— Observations of Brooks' Comet (*c* 1893), made at the Royal Observatory, Greenwich. [1893.] Astr. Soc. Month. Not., 54, **1894**, 38–39, 125–126, 143–144.

—— [Beobachtung des Cometen 1893...(Brooks Oct. 16).] Astr. Nachr., 134, **1894**, 29–30.

—— Observations of Comet 1893...(Brooks Oct. 16) made at the Royal Observatory, Greenwich. Astr. Nachr., 134, **1894**, 59–62.

—— [Beobachtung des Cometen 1894...(Denning März 26).] Astr. Nachr., 135, **1894**, 115–116.

—— Results of micrometer measures of double stars with the 12¾-inch Merz refractor, at the Royal Observatory, Greenwich, during the year 1893. Astr. Soc. Month. Not., 54, **1894**, 314–317.

—— Observations of Denning's Comet (*a* 1894), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 54, **1894**, 384–385.

—— Differences of R.A. and N.P.D. of Uranus and 8 Libræ and α Libræ about the time of the conjunction in 1894 April, observed with the transit-circle at the Royal Observatory, Greenwich. Astr. Soc Month. Not., 54, **1894**, 449.

—— Observations of Gale's Comet (*b* 1894), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 54, **1894**, 450, 551–553, 581–583; 55, **1895**, 172.

—— Observations of Encke's Comet made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 55, **1895**, 159–160, 320–321.

—— Note on the observations for coincidence of the collimators in flexure determinations with the transit-circle of the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 55, **1895**, 327–329.

—— Observations of occultations of stars during the total eclipse of the moon on 1895 March 10, made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 55, **1895**, 329–333.

—— Diameters of Jupiter and his satellites observed at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 55, **1895**, 477–479.

—— Diameters of Saturn and his rings, observed at the Royal Observatory, Greenwich, during the opposition of 1895. [1895.] Astr. Soc. Month. Not., 56, **1896**, 14–17.

—— Observations of Perrine's Comet (*c* 1895) made with the altazimuth at the Royal Observatory, Greenwich. [1895.] Astr. Soc. Month. Not., 56, **1896**, 79–80.

—— Meteorological observations in Manchuria. [1895.] Symons, Meteorol. Mag., 30, **1896**, 167.

—— Observations of Comet 1895...(Perrine Nov. 16). Astr. Nachr., 139, **1896**, 215–216.

—— [Beobachtungen des Cometen 1895...(Brooks Nov. 21).] Astr. Nachr., 139, **1896**, 217–218.

—— Observations of Comet *d* 1895 (Brooks) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 56, **1896**, 135.

—— Observations of Comet *a* 1896 (Perrine-Lamp) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 56, **1896**, 321–322, 392–393.

—— Results of micrometer measures of double stars made with the 28-inch refractor at the Royal Observatory, Greenwich, in the years 1894 and 1895. Astr. Soc. Month. Not., 56, **1896**, 358–367.

—— Diameters of Jupiter measured with the filar and double-image micrometers at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 56, **1896**, 429–431.

—— Observations of Comets *a* 1896 (Perrine-Lamp) and *b* 1896 (Swift), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 56, **1896**, 432–434.

—— Observations of Comet *b* 1896 (Swift) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 56, **1896**, 501–502.

—— Micrometer-measures of F. 70 Ophiuchi, made at the Royal Observatory, Greenwich. [1896.] Astr. Jl., 17, **1897**, 31.

—— Observation of Comet *f* 1896 (Perrine), made at the Royal Observatory, Greenwich. [1896.] Astr. Soc. Month. Not., 57, **1897**, 17, 82.

—— [Beobachtung des Cometen 1897...(Perrine 1896 Nov. 2).] Astr. Nachr., 142, **1897**, 29–30.

—— Observations of occultations of stars and of Jupiter and his satellites by the moon and of phenomena of Jupiter's satellites made at the Royal Observatory, Greenwich, in the year 1896. Astr. Soc. Month. Not., 57, **1897**, 183–191.

—— The new Thompson photographic telescope at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 57, **1897**, 563.

—— Observations of Comet *b* 1897 (Perrine) made at the Royal Observatory, Greenwich. [1897.] Astr. Soc. Month. Not., 58, **1898**, 23–24.

—— Proper motions of the three close polar stars Groombridge 1119, Groombridge 2283, and Groombridge 3548. [1897.] Astr. Soc. Month. Not., 58, **1898**, 44–47.

—— Comparison of the forthcoming Greenwich Ten-Year Catalogue for 1890, with certain Fundamental Catalogues. Astr. Soc. Month. Not., 58, **1898**, 353–355.

—— Observations of the companions of Sirius and Procyon made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 58, **1898**, 355–356.
—— Observations of Comet *b* 1898 (Perrine), made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 58, **1898**, 411–412, 463.
—— Observations of Comet *h* 1898 (Perrine-Chofardet) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 58, **1898**, 525.
—— The photography of the recent total solar eclipse. Photogr. Jl., 22, **1898**, 316–321.
—— Second Ten-Year Catalogue of 6892 stars, for the epoch 1890.0, from observations with the transit-circle made at the Royal Observatory, Greenwich. [1900.] Greenwich Obsns., **1898** (*Append.* II), 73+{cxl} pp.
—— Observations of planet (433) (1898 D Q) made at the Royal Observatory, Greenwich, with the 30-inch reflector of the Thompson equatorial. [1898.] Astr. Soc. Month. Not., 59, **1899**, 12–16, 88–89, 166–168.
—— Observations of Comet *i* 1898 (Brooks), made at the Royal Observatory, Greenwich. [1898.] Astr. Soc. Month. Not., 59, **1899**, 17–25, 90–91.
—— The recent eclipse. [1898.] Roy. Inst. Proc., 15, **1899**, 810–814.
—— Observations of Comet 1899 I (*a* Swift) from photographs taken with the Thompson 26-inch photographic refractor at the Royal Observatory, Greenwich. Astr. Nachr., 150, **1899**, 175–176.
—— Note on the photographs of the satellite of Neptune taken with the 30-inch reflector and 26-inch refractor of the Thompson equatorial. Astr. Soc. Month. Not., 59, **1899**, 168.
—— Observations of occultations of stars and places by the moon and of phenomena of Jupiter's satellites made at the Royal Observatory, Greenwich, in the year 1898. Astr. Soc. Month. Not., 59, **1899**, 169–175.
—— Note on diurnal variations of the nadir and level of the transit-circle at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 59, **1899**, 351–353.
—— Observation of Tuttle's Comet (*b* 1899) made with the 30-inch reflector of the Thompson equatorial at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 59, **1899**, 392.
—— Observations of planet Eros from photographs taken with the 30-inch reflector of the Thompson equatorial at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 59, **1899**, 393–399.
—— Results of micrometer measures of double stars made with the 28-inch refractor at the Royal Observatory, Greenwich, in the years 1896, 1897, and 1898. Astr. Soc. Month. Not., 59, **1899**, 400–426.
—— Observations of the satellite of Neptune from photographs taken at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 59, **1899**, 501–503.
—— Observations of Comet *a* 1899 (Swift) made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 59, **1899**, 542.
—— Comparison of the number of stars in the Greenwich Astrographic Catalogue, in the Bonn Durchmusterung, and in the Astronomische Gesellschaft Catalogues, declination 64° to 70°. Observatory, London, 22, **1899**, 268–269.
—— [Report on the expedition to Sahdol, Rewah State, Central India, to observe the total solar eclipse of 1898 January 22.] Roy. Soc. Proc., 64, **1899**, 7–9.
—— Observations of ζ Herculis, made with the 28-inch refractor at Greenwich. [1899.] Astr. Jl., 20, **1900**, 98.
—— Observations of the Leonid meteors of 1899 made at the Royal Observatory, Greenwich. [1899.] Astr. Soc. Month. Not., 60, **1900**, 163.
—— Results of micrometer measures of double stars made with the 28-inch refractor at the Royal Observatory, Greenwich, in the year 1899. Astr. Soc. Month. Not., 60, **1900**, 494–516.
—— Measures of double stars from photographs taken at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 60, **1900**, 516–519.
—— Observations of Capella as a double star made at the Royal Observatory, Greenwich. Astr. Soc. Month. Not., 60, **1900**, 595–597; Paris, Ac. Sci. C. R., 131, **1900**, 367–370.
