HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA.

Chrysanthemum Novelties

OFFERED BY

NATHAN SMITH & SON.

IOLANTHA. In incurving pink, maturing Oct. 15th. Fine stem and foliage; height, 3½ feet; good from either bud, although second crown (about Sept. 5th) comes a few days earlier. Color a beautiful shade of soft pink. We consider this the best early pink yet produced. Certificated by C. S. A.

OMEGA. A second early yellow, the same shade as Mrs. J. J. Glessner. 7¼ inches in diameter; belongs to the V. Morel type, but having broader petals. In perfection Oct. 25th. Certificated by C. S. A.

MRS. ELMER D. SMITH. Of the many fine seedlings we have produced in the past ten years we consider this one possesses more points of excellence than any of its predecessors. A Jap. incurved of the most perfect form; full double, high rounded center; bright yellow, deeper than Golden Wedding. In the C. S. A. Cup Contest at Chicago it stood second, falling only one point behind the winner. The blooms in this exhibit were 7 inches in diameter. Stem and foliage perfect; height, scant 3 feet. This variety will rival Maj. Bonnaffon, being brighter in color, more dwarf, very similar in form, with much heavier and stronger stem. In season Nov. 1st to 10th. Four of the C. S. A. Committees gave this variety an average of 92.75 points.

Also Other Novelties and Best Standard Varieties.

THE FINEST WHITE CHRYSANTHEMUM OF THE PAST TEN YEARS

Timothy Eaton

RAISED BY

MILLER & SONS, - Bracondale, Ontario

Who reserve the right to sell in Canada at prices named below.

THIS fine white variety is the largest, fullest, most perfectly formed that has ever been exhibited, and it has secured every prize for which it was entered, and the entries were numerous. It has been tested for three years, and those who have watched it claim that it is, first of all, an easy doer, and, quite as important, that it brings a full crop of perfect blooms on single stems, plants spaced 6x9 inches. No other white variety can hope to hold its own when placed against **Eaton**, nor bring so good returns to a given space.

ORDERS BOOKED NOW. DELIVERY APRIL 1, 1901.

PRICES

1 Plant, 50 Cents; 12 Plants, $5.00; 100 Plants, $30.00.

HEADQUARTERS
For Plants Now and for the Holidays,
IMPORTED DIRECT FROM THE GROWERS IN GHENT, BELGIUM AND OTHER PLACES

Having been to Belgium again myself, I am well posted on their system. As the growers there are all syndicated, I can assure you no one can obtain cheaper rates than I.

ARAUCARIAS
We are headquarters and can give you more value than any house in America can. Order quickly before stock is all gone, and while the weather is not too cold. This is a rare chance. I have only about 1000 left.
These I purchased myself and they are of my own selection during my trip to Belgium in September, and I can offer you special prices. No seedlings; raised from top cuttings only.

EXCELSA.
5 in. pots, fine thrifty plants, only 50 cts. each 5½ in. pots, 3 to 4 tiers, 12 in. high and above, 60 cts. to 70 cts.; 5½ to 6 in. pots, 3 to 4 tiers, strong, bushy plants, 75 cts. and 80 cts.; 6 in. pots, 16 in. high, $1.00; specimen plants, 6 in. pots, 5 to 6 tiers, 22 to 25 in. high, very fine, $1.75 to $2.00.

Araucaria Compacta Glauca, very fine, bushy, 6 in. pots, 18 to 25 in. across, $1.25; specimen plants, 6 to 7 in. pots, $1.50 to $2.25.

AZALEAS FOR CHRISTMAS BLOOMING.
Deutsche Perle (double pure white) and Vervæneana (pink variegated, the best of all), few flowers open and full of buds ready to open, from 50 cts. to $1.00 and $1.25.

AZALEAS Indica, large stock, my own selection while in Ghent, 10 to 12 inches, 35 cts. each.
Larger sizes, 40 cts. and 50 cts. each.
Specimen plants. Mme. Van der Cruyssen, $1 75 and $2.00 each.
Leading American varieties, such as Mme. Van der Cruyssen, Bernhard's Andrea Alba, Deutsche Perle, Empress of India, Prof. Walter, Simon Mardner, Vervæneana and others.

CORYPHA AUSTRALIS Hardiest palm of all Have 500 of them in 5 in. pots, 12 to 18 in. high, 45 cts. each.

Latania Borbonica, 6 in. pots, very fine, at the rate of $6.00 per doz.
Kentia Belmoreana, 5 in. pots, 35 cts.
Dracæna Brunnii, 5½ in. pots, 24 in. high, most favored house dracæna, 50 cts. each.
Dracæna Indivisa, specimen plants, imported, 6 in. pots, 30 to 36 in. high, 40 cts. each.

FICUS ELASTICA (Rubber plants).
Have 1500, imported last Spring:
5½ to 6 in. pots, $4.00 per doz.
Specimen plants, 6 in. pots, $5.00 per doz.

BEGONIAS SEMPERFLORENS GIGANTEUM.
Best blooming Winter Begonia, 6 in. pots, 25 cts. to 35 cts. each.
President Carnot, 5 in. pots, 25 cts. each.
Other Winter-blooming Begonias, leading varieties, 4 in. pots, 7 cts. each.

CHRYSANTHEMUM STOCK PLANTS
Merry Monarch, best early and profitable white 'mum in cultivation; strong clumps, 75 cts. per doz; $5.00 per 100.
(If pots are wanted add 2 cts. each.)

Asparagus Sprengerii, 4 in. pots, $1.20 per doz.
Chinese Primroses, bushy plants, 4 in. pots, that will bloom at Xmas, at the rate of $6.00 per 100; 5 in. pots, full of buds, $1.80 per doz.; 6 inch, large plants, $3.00 per doz.
Cyperus (Umbrella Plants), 4 in. pots, $17.00 per 100.
Large Honeysuckles, grown in 6 in. pots, 20 cts. each.
Hardy Ivies, strong plants, 3 in. pots, 7 cts. each.
Geraniums, 2½ in. pots leading varieties $2.50 per 100.

Cash with order, please. Money can be sent safely by Express or Post Office money order, registered letter, draft on Philadelphia banks, etc Goods must travel at purchaser's risk.

STUDER'S PRICE LIST,

Which please keep for future use, as I do not issue a catalogue, and this advertisement, which appears only once, contains all I have to offer. In thus saving expenses I am enabled to sell first-class stock at moderate prices. My aim is to grow the best plants possible in the smallest pots possible to save freight charges. Below I give a condensed description of my plants, for if depending on size of pots only you might be deceived. I quote here prices, the lowest possible for the quality offered, per single plant, so the small buyer will get stock as cheap as the larger one. I always add extras to help pay freight. This offer is good as long as stock lasts, which is crowding at present a bench space of over 20,000 square feet.

SEED TRADE REPORT

AMERICAN SEED TRADE ASSOCIATION.

ALBERT MCCULLOUGH, Cincinnati, O., President; F. W. BOLGIANO, First Vice-President; S. G. COURTEEN, Milwaukee, Wis., Second Vice-President; S. F. WILLARD, Wethersfield, Conn., Secretary and Treasurer.

Points and information from seedsmen, and all interested in this column, solicited. Address EDITOR SEED TRADE, care of FLORISTS' EXCHANGE, P. O. Box 1697, New York.

Rochester, N. Y.— The firm of Briggs Brothers & Co., of Rochester, has been incorporated to deal in seeds; capital, $25,000. Directors—H. B. Hathaway, H. E. Stockbridge, and W. S. Briggs, Rochester.

The Seed Trade Outlook.—That there is a shortage of nearly all the leading varieties of vegetable seeds is generally understood, but its effect on the trade, as yet, has been but little considered. The fact of high prices being the result of short crops is one that follows the same conditions in all industries; it is simply a question of supply and demand. A shortage of seeds does not affect the consumer in the same ratio as does a scarcity of grains, fruits or any of the manufactured articles; as the cost of seed is very small in proportion to other expenses incident to the production of a crop of vegetables. He who buys seed by the packet will not pay a cent more for his supply than if the wholesale price had not advanced a particle. The cost of peas and beans, because of the advance, will be probably double what it would be in seasons of plenty, but the cost per acre will not be enhanced in proportion to the benefits to be derived from the smaller acreage that will be planted, and the economy that will be practiced in the sowing of seeds. The market gardener will sow or plant sparingly; in many instances he will not use more than half as much as when seeds are plentiful, hence cheap; and it is safe to say he will get larger crops by not overcrowding, besides considerable expense will be saved in thinning out.

Beans and peas are short, very short, particularly the latter. Many of the growers cannot fill half of their orders. One dealer told the writer he had ordered 100 bushels of a pea now in great demand, and did not get one specimen. That condition of affairs can be easily explained when the amount required for the coming season's planting is taken into consideration; and this fact is going to materially affect prices for several years to come. Some of the large growers put out 25,000 bushels of peas for seed purposes, and when peas are worth more than $3 per bushel, it means a very large capital to be invested, which will be a long time in returning.

The commission trade will suffer from high prices, in a measure. Not so much on fine seeds as upon beans and peas, which cannot be manipulated to the same extent as cabbage, turnips and carrots. On the other hand, it will gain by an increase of sales. A certain class of "inducements" will not be held out for the purpose of building up trade; 16 packets of seed for a quarter is about as bad as the 16-to-1 financial policy.

The wholesale trade should benefit from non-competition by those who take the advantage of the surplus market, buy up surpluses at a ruinous rate, and sell to the trucker at less than wholesale values. It is to be hoped, in the interest of the trade, that the large dealers will not supply the market gardeners at lower rates than they would the smaller dealers, their customers as was the case last year.

The trade has now an opportunity to do a profitable business for some years to come; the shortage along many lines will stimulate an advance on all, which can be kept up for some time, if they so will it. The Seedsmen's League, we think, is giving this matter due attention, and will undoubtedly protect the interests of its members.

Government Seed Testing.

The following article on this subject is extracted from the Report of the Secretary of Agriculture for 1900:

As the mandate of Congress has laid upon the Department of Agriculture the work of purchasing and distributing larger amounts of seed than ever before, the duty of carrying out this task in an effective manner has become still more imperative than formerly. For several years past the Division of Botany, by my direction, has tested the seeds of the Congressional distribution to ascertain their mechanical purity and germination. The importance of these tests will be appreciated when it is known that the average mechanical purity of the seeds distributed last year was 97.3. The average germination of the same seeds was 91.4. These averages, I consider, indicate the high character of the seeds in the Congressional distribution, so far as mechanical purity and germination are concerned. It has been alleged, however, that while the seeds distributed by the Department were of highly creditable germination and mechanical purity, they were deficient in purity of stock, genuineness, or trueness to name. Tests to ascertain the validity of these allegations were therefore inaugurated. These tests show that the average purity of stock last year was 86.7 per cent. Therefore, although the extent of this defect has been greatly exaggerated by those opposed to the policy of seed distribution, there is nevertheless sufficient reason to warrant me in taking steps to effect a remedy. I have therefore established the following standard for purity of stock:

The standard of trueness to name for each variety shall be the average of the percentage of trueness to name in not less than five commercial samples of the same variety purchased under the direction of the Secretary of Agriculture in the open market from five or more reliable seed houses, and the Secretary of Agriculture shall be the sole judge of the results of the tests reported by the officer or officers charged therewith by him. Not less than one hundred plants from each lot of the seeds furnished by the contractor shall constitute a test.

The maintenance of the high standards for seeds distributed at the direction of Congress will place these seeds above reproach. There is, however, another improvement which I propose to inaugurate in the Congressional distribution. The Department has maintained for some years past a trial ground, in which it has made comparative tests of the standard varieties of vegetables, and also of many of the novelties which are placed on the market by American seedsmen. These experiments have shown that each year there are offered new varieties of established superiority, which the Department without difficulty can secure and distribute. By proper handling, these novelties can be purchased at prices little if at all higher than those of the common varieties heretofore included in the Congressional distribution. Furthermore, it will be remembered that three years ago, with the permission of Congress, I set apart from the seed appropriation a fund to be devoted to the introduction of new and valuable seeds and plants from foreign countries. The plants thus introduced have been tested by the various State experiment stations, by properly qualified private experimenters, and by the Department itself, most of our own experiments having been conducted on the Potomac Flats testing grounds, placed at our disposal two years ago by authority of Congress and by permission of the Secretary of War.

Several plants thus introduced have, as heretofore reported, demonstrated their capacity of increasing the agricultural products of our country by millions of dollars annually. Some of these seeds should be very widely distributed. It should, therefore, be the policy of the Department to introduce into the Congressional seed distribution new varieties of established superiority developed in the United States or imported from foreign countries, to distribute these varieties for one or more years until they have been sufficiently brought to the attention of the people, and then to discontinue their distribution, leaving the demand thus created to be supplied through the ordinary commercial channels. In this way the Department will be enabled to carry out the original intent of the seed-distribution law, will furnish seeds of the highest character, and will avoid the evil of competition with the regular seed trade.

* * *

It appears from the report of the Assistant Secretary on the purchase and distribution of seeds, that of the total appropriation for this purpose of $130,000 there has been expended during the fiscal year $127,654, of which $24,293.73 was for salaries of employees engaged in seed distribution and $20,000 was devoted as provided by Congress for the purchase of rare and valuable foreign seeds and plants distributed through the agency of the Section of Seed and Plant Introduction, and which have already been covered in the present report.

The records of the Seed Division show that apart from $2,120.91 expended for miscellaneous seeds, and $1,663 for vegetable and field seeds distributed to sufferers by flood in Texas, there were purchased 14,738,968 packets of seeds of all sorts, of which 13,531,469 were distributed to Senators, Representatives and Delegates in Congress, an excess over the two-thirds reserved by law for Members of Congress of 3,705,490 packets.

Seedsmen's Non-Warranty Clause.

Editor Florists' Exchange:

The wise men of the Department of Agriculture have seen a light—a bright light; they have unearthed a seed house that has discovered a difference between field seeds and vegetable seeds, so that a guarantee can be given on the former that could not be done on the latter. This is apparently what Mr. Pieters means by the following quotations:

"Northrup, King & Co., of Minneapolis, Minn., offer terms of sale that commend themselves because they cover just this point. Their terms read 'Satisfaction guaranteed. Purchasers ordering our best grades may return them at our expense, if not found entirely satisfactory on receipt and examination, and the money that has been paid for seed and freight will be promptly refunded.'

"Of course, the firm cannot make this offer for all grades of seed, but they show their confidence in the quality of their sterling brand and give a practical assurance to buyers that these seeds are good. Such terms are even more liberal than a specific guarantee, because the firm takes the chances of meeting a very critical custom and having seed returned, not because it is poor, but because the buyer thinks it ought to be better."

Now, we would like to ask how Northrup, King and Co.'s guarantee differs from that of all other seedsmen. They say if the seed is not satisfactory it can be returned at once, or on receipt, and the money will be refunded. They do not say—no seedsman can say—they will return the money if the seeds have been put to a test and found wanting. They only guarantee satisfaction so far as appearances go; and if the customers do not like the looks of the seed they can return the seed and get their money back. This is precisely what all others in the trade do who use the guarantee clause. We do not know of one that has been compelled to use or adopt that clause (which has been made necessary by unscrupulous buyers) but what gives their customers the same privilege.

We know very well that the firm named

will do just as they agree being perfectly upright in all their dealings; but no more so than others—many others. No one can be straighter than straight, and that is just what the trade, as nearly as any other class of business men, desire to be. But the taking advertisement does not by any means show a new departure in the line of guarantee.

ONE IN THE TRADE.

HEADQUARTERS FOR

LORRAINE BEGONIAS

We offer the following for immediate delivery:

BEGONIA GLOIRE DE LORRAINE

Fine strong plants from 2¼-in. pots, $15.00 per 100; 3-¼in. pots, $25.00 per 100.

Begonia Gloire de Lorraine Nana Compacta

Fine strong plants from 2¼-in. pots, $15.00 per 100; 3½-in. pots, $27.50 per 100.

We especially recommend the 3½-in. size as being exceptionally well rooted and of strong, healthy growth; almost ready for a shift to a 6-in. pot. These plants should find a ready sale at Christmas, as they will be in full flower at the time.

Fine Plants in flower, in 6-inch pans, at $1.00 each.

Begonia Caledonia, the White Lorraine

Plants from 3½-in. pots, $5.00 each.

We are the only Firm in America offering this fine new Novelty this year.

BEGONIA "LIGHT PINK LORRAINE."

"If at first you don't succeed, try, try, try again."

This is reply to some Florists and Gardeners who have bought **BEGONIA GLOIRE DE LORRAINE,** and same failed to develop, under the treatment given, to their entire satisfaction.

"LORRAINE" Begonias have come to stay, being the grandest flowering plant ever introduced, especially for the gay and festive Christmas-time, and "LIGHT PINK LORRAINE" is the best stayer of them all.

Listen to what Messrs. Pennock Bros., Philadelphia, Pa., said about its staying qualities last Christmas:

PHILADELPHIA, December 26, 1899.

MR. EDWIN LONSDALE:

Dear Sir—We wish to tell you how much we are pleased with the sport from Begonia Gloire de Lorraine having delicate pink flowers, which you sold us. It is of value not only for the exquisite color and largeness of its flowers, but what is of even more importance than these qualifications to the retailer is *its lasting qualities.*

In decorating our window last week two of these plants were put in among a number of the original Lorraines, and while the plants of the older Lorraines lost their flowers, some "LIGHT PINK LORRAINE" is to-day in as good shape as when put in, and in decorating yesterday they were again used

Our customers seemed to like it, for they were the first to sell, and had we known these two were in the window they could have been sold many times over.

Thinking you would be interested in knowing how well it has done with us, we are,

Yours very truly,
(Signed) PENNOCK BROS.

NURSERY DEPARTMENT.

AMERICAN ASSOCIATION OF NURSERYMEN.

THEODORE J. SMITH, Geneva, N. Y., President; N. W. HALE, Knoxville, Tenn., Vice-President; GEORGE C. SEAGER, Rochester, N. Y., Secretary; C. L. YATES, Rochester, N. Y., Treasurer.

The Pan-American authorities have decided to give, during the progress of the exposition, practical illustrations of methods for fighting insect pests infesting fruit and other trees and shrubs. Methods and paraphernalia constructed on the most approved principles will indicate the drift of scientific investigation, which must prove to be of great benefit.

Sophora Japonica, Japanese Pagoda Tree.

A shipment of 100,000 young peach trees from Georgia nurseries, bound for Cape Colony and Natal, South Africa, was made this week. The trees go largely into Natal, and a large number going to that country is consigned to Ladysmith. Cape Colony fruit growers get less than half of the shipment.

Painesville, O.—The Storrs & Harrison Company are utilizing steam power this season in breaking up the condensed bales of moss used for packing purposes. Trade is brisk with this concern; over 160 carloads of nursery stock have been dispatched from the firm's grounds since October 2 last.

Christmas Trees.—With the advent of December the minds of all of us, young and old, turn to Christmas, as preparations for it have to be commenced. The nurseryman attaches some importance to the occasion, as probably enabling him to do some business when but little else is a-going. Christmas trees are wanted, and wanted fresh. A nursery well supplied with trees need never fear the forests' products, which nowadays line the sidewalks of all large cities. Such trees are cut a good way ahead, and often drop their foliage almost as soon as housed. With the demand for evergreens for ornamental planting, the nurseryman can get a better price for his trees for this purpose than the ordinary purchaser of a Christmas tree desires to pay; but there are always some folks who prefer a good tree, fresh from the nursery, to any other, and they will pay the price for such a one. Many nurserymen have regular customers for trees, and these customers are often of an economical turn, and have their trees dug up early, before freezing up, and placed—or planted—in a box, there to remain until Christmas is over, when they are planted out, at the first favorable opportunity. A few trees boxed in this way, in anticipation of disposing of them, would, no doubt, result profitably.

The trees to be used must be bushy, with a conical outline, and well shaped. Because the branches must be fairly stiff on which to hang presents, the number of eligible trees is limited. The spruce, in its various forms, is nearly the only available kind. The Norway, white, black, Douglas and balsam leave but few others to be added. Depending on the locality from which cut, the white, black and balsam come from the mountains. Nurseries usually have Norway spruce, and lately quite a few of the Colorado form of the Douglas fir, or spruce, have been seen. For small rooms, and where not many ornaments are to go on the tree, the ordinary Arbor vitæ is a useful tree, as it fits a corner nicely, and its branches are fairly stiff. In cases where a tree is expected to be kept in the house some time, it is a good plan to dig it with a few roots attached, set it in a box, and fill in with damp soil. The soil steadies the tree as well as maintaining it in position, lessening the danger of the leaves dropping prematurely.

Outlook for the Nursery Business.—Keeping pace with all other industries, nurserymen have experienced a greatly increased demand for stock for the past two years. This demand came none too soon. Though not generally known, many large firms throughout the country had been drawing on their reserves for some time previous, so little call was there for their goods, while the expense of maintaining their establishments was practically the same as usual. To-day the demand for all kinds of stock is good. There are men now improving their grounds who were as well able to do so three years ago, but they needed the stimulus which the sight of neighbors' improving supplies afforded before going to work on their own places. Good example is catching, hence we see everywhere public and private grounds being embellished and trees and shrubs planted. The period of depression had been such a lengthy one that large quantities of first-class stock were not carried by many firms, consequently, at the present time, there is no large stock of heavy trees in the trade; but there are good supplies of a fair size. The indications for the coming year are still very good; inquiries for stock on a large scale are already being made.

Prices have not advanced greatly, the larger sales apparently satisfying most nurserymen. Still, values have increased slightly, perhaps from 10 to 25 per cent. on some articles, and with the running out of stock, which it seems probable Spring may bring, a little advance may be maintained.

There are certain trees which always sell to some extent, no matter what the state of trade may be. Maples, birches, weeping trees, flowering cherries, dogwood, Judas, beeches, sweet gum, tulip tree, magnolias, sour gum, plane, poplars, flowering peaches, oaks, laurel willow, and linden, I would particularly mention. Maples, especially Norway and sugar, are reliable and beautiful trees, adapting themselves to more situations than many others. With the poplar and the plane, they are much used in cities, and are good subjects for those who have some city trade. Weeping birch, weeping elm and all the long list of weepers are much in demand always, but near cities are seldom sold more than a tree or two at a time. It is the parks and large private places which buy by the hundred. The same may be said of many of the other trees mentioned. Magnolias, especially the Chinese section, which embraces such sorts as soulangeana, conspicua and others, can always be sold; so, also, can such noble-looking species as tripetala and macrophylla. Flowering cherries, peaches, and crabs never want customers. A large tree on one's own ground, to show its character, is sure to bring custom. Oaks have become extremely popular. The old idea concerning them of slow growth and difficulty of transplanting has given way to a better knowledge of them and their requirements, and they are now in great demand. The pin oak has given great satisfaction. There are two reasons for this: It is naturally a most lovely tree, and it transplants almost as easily as a maple. The bicolor also moves well. This is of a massive growth, with large leaves, quite unlike the pin in foliage, as it has bright green, much-divided leaves. I would name as the best sellers the pin, scarlet, red, white, bicolor and chestnut, though all large plantings take in all the hardy species.

Sophora Japonica, Japanese Pagoda Tree.

Although the Sophora japonica has been in cultivation in Europe for nearly one hundred and fifty years, it may be said to be rare in collections still. Being a Japanese tree, it may not be hardy in the colder parts of the Northern States; but in the vast territory in which it would thrive it is rarely seen. There are two reasons for this: The first is that its rather slow growth acts against its sale, and then the tree has to stand a good many years before it flowers. But when it does bloom, it creates such a glorious picture that those who see it regret they had not known of its beauty earlier. The flowers are borne in large panicles, creamy white, pea-shaped, and make a great display. Not the least of the tree's merits is the production of its flowers in late Summer—August—when hardly a tree or shrub is in bloom. In the vicinity of Philadelphia, the home of many of the earlier botanists and horticulturists, there are several fine specimens of the sophora, notably in what is now Fairmount Park. The illustration is of a tree flourishing there, quite close to Horticultural Hall, and there are extremely fine specimens at George's Hill and Belmont Mansion. As readers of THE FLORISTS' EXCHANGE will see, the tree is of well-rounded proportions. In this respect it is one of the best for certain plantings. Except for some particular purpose, these broad, round-headed trees are out of place near tall buildings, unless there are tall-growing ones between them and the building. In most cases such trees as the sophora, Norway maple, and others of like round-headed growth, are in good positions when set as single specimens on a lawn or for avenues not over wide.

Concerning the sophora, I should add that as it flowers so late in some seasons its seeds fail to mature, but, as a rule, they mature here, and seedlings are not difficult to obtain. There is a variegated and a weeping form of this tree.

JOSEPH MEEHAN.

House of Begonia Gloire de Lorraine, Grown by C. W. Ward, Cottage Gardens, Queens, N. Y.

Coal Dust as Fuel.

Carl Beers, florist, Bangor, Me., has, according to a local paper, discovered a process by which he can use coal dust as fuel in his greenhouse boilers. In order to ensure combustion, he built his chimney to a height of 70 feet. At a height of 40 feet an offset was constructed to contain his appliance, which, it is said, is an aluminum propeller, or fan, "driven by the surplus heat as it escapes through the flue." In order to prevent fusion of the metal by the heat the blades of the fan have been glazed. The points of the axes of the rod to which the fan is made fast, are composed of platinum, the bearings in which the points revolve being of hardened glass set in light steel frames. The fans, of which there are two, revolve horizontally inside the flue, and turn at the rate of 2,500 revolutions a minute, increasing the draught so that it is equal "to that produced by a Sturtevant blower with a pressure of two ounces per square foot of grate." After three years' use, the newspaper article goes on to say, "it was found apparently as perfect as when first put into motion. The bearings showed no appreciable wear and tear.

"The chimney which Mr. Beers built had to be very strong or the vibration set up by the whirling fans day and night, week after week would have shattered it in a single season. When the draught got too strong, the lower draughts under the boilers were shut to decrease it. The chimney, Mr. Beers says, was the most expensive part of the whole establishment.

"Coal dust costs $1 per ton, and coal averages $6 per ton. One ton of dust used after Mr. Beers' method does the work of two tons of ordinary coal, so that a sum equal to $5.50 per ton of the latter is saved. Mr. Beers says the chimney was expensive in the beginning, but in the first two seasons of its use it paid for itself and earned money besides. It ought to if it makes coal worth 50 cents a ton."

The same newspaper is authority for the statement that Mr. Beers has also discovered a method of mixing coal dust with "five different ingredients," whereby it "burns" twice as long and gives twice as much heat as anthracite coal." His mixture is made into lumps, pressed in egg-shaped moulds, which are capable of perfect combustion, "when put into the fire the lumps turn white like chalk, and slowly become incandescent, and remain so, at a white heat until they are entirely consumed. From one ton of the coaline, as he has named, burned under one of his boilers, not more than a pint of ashes remained in the grate after combustion had ceased."

This "coaline" is made in two sizes, egg and chestnut. A patent has been applied for.

Foreign Plant Notes.

The meeting of the Royal Horticultural Society on November 20, although held under the most unfavorable conditions as regards light and weather, was of peculiar interest to florists by reason of two very beautiful exhibits. The most striking was a large group of the new hybrid Winter-flowering begonias from the establishment of Messrs. Veitch & Son. These have been raised by hybridizing B. socotrana with tuberous-rooted varieties, and while the plant partakes, in a great measure, of the characteristics of the first-named parent, the flowers resemble the tuberous-rooted section, but are much more lasting. Mr. Heal, the clever raiser of these interesting plants, informed the writer that if they are grown in a temperature of from 55 to 60 degrees the flowers will not drop for four weeks. The plants are erect, sturdy and very floriferous; the individual flowers are from 2 to 4 inches across. Some of them are single, some semi-double, and a few quite double. They commence blooming early in November and continue until the end of February.

The following were the most noteworthy of the varieties exhibited:

ENSIGN, rich rose pink; on account of its erect habit this would be extremely valuable for florists.

WINTER CHEER, rich rose carmine, most effective color; habit of plant erect and vigorous.

WINTER PERFECTION, rose pink; flowers very large and semi-double.

MRS. JAMES H. VEITCH, brilliant rose pink, very large and beautifully formed flowers. Habit of plant rather dwarf and compact.

Cannell made a very fine display of Begonia Gloire de Lorraine, but the hybrids noted above fairly put them in the shade.

The new race is quite easy to cultivate (from cuttings only) and will doubtless become very popular on your side.

The other exhibit referred to was a new Tacsonia (T. militaris) from the establishment of Sander & Co. The flowers are very large, of good substance and of a brilliant crimson color. In a country where climbers are so much esteemed as they are in America, this plant will doubtless enjoy a great popularity. The period of its blooming is from November to May. It was rightly awarded a first-class certificate. S. B. DICKS.

Begonia Gloire de Lorraine.

Our illustration shows a house of this begonia as grown by C. W. Ward, at the Cottage Gardens, Queens, L. I. Four thousand plants were grown; and that the cultural methods adopted have been successful the picture testifies to far plainer than any word description. The chief aim has been to build up the plants slowly, so that when they are taken from the greenhouse, instead of going to pieces in a few days, they shall retain the lasting qualities which this begonia is noted for when handled at other seasons of the year.

A Private View.

There was a private exhibition of chrysanthemums at H. H. Hunnewell's estate, Wellesley, Mass., last week which attracted a good many visitors. The large plants were grouped in the greenhouses, and presented a pretty sight with a background of tall shrubs; while in the foreground were arranged a few dwarf ferns, grevilleas, browallias, etc.

Among the large chrysanthemum plants were observed many of the prize-winning varieties at the late show of the Massachusetts Horticultural Society, viz.: Mutual Friend, Louis Boehmer, Mrs. Alpheus Hardy, Georgiana Pitcher, Marion Henderson, Madame Hodgson, Onyx, Mrs. O. P. Bassett and Arethusa, the latter a seedling raised by T. D. Hatfield, the gardener. The smaller plants grown to one flower and stem also presented a fine appearance; in fact, the appearance of the whole estate reflected great credit on Mr. Hatfield.

F. J. N.

Reminiscences of the Christmas Trade in Chicago.

We may observe, at the outset, that what we are apt to look upon nowadays as the florist's harvests—viz.: Thanksgiving, Christmas, Easter, school commencements and Decoration Day—were not known to the old-time grower, nor had he, as now, a class of plants cultivated especially for cut flowers. These then deserved really the name of a by-product, the plants usually coming into bloom at regular periods of the year, and being grown on from year to year, in pots, partly as decorative material, but usable, also, to cut from as wanted. All this is now changed, and the grower who can time his big cut for the harvest, when it does come, is apt to be the winner; in other words, a ready command of flowers at the right time has the half mark of success.

The dawn of the florist's Christmas trade in this city worthy even of a mention did not appear until after 1860. Contrary to present conditions, New Year's trade was the talk of the day, and not Christmas. Again, such a thing as a cut-flower order, except for personal adornment, did not enter into the question at all. Baskets of flowers of simple design, and what we then called "bouquets," the latter usually befrilled with a paper collar, the acme of the art of the day, a sort of pyramid, perhaps, for the dinner table, were chiefly in demand. Neither basket nor bouquet had any dressing above, just a plain, flat surface. If honored by a camellia, the price was greatly enhanced; if by a rose, to use it as a bud or in the unopened state would be wasting good material. Up, say, to 1862, a $1 or $2 bouquet was a good one, a $5 basket worth talking about, and any florist who took in $25 or $50 during the holidays was on the top of the heap.

By 1864 matters had begun to change, yet how modest compared to those of later years! One of the crack florists of the day gloried over his Christmas sales of 1864 of $50.40; New Year's, $74; 1865, Christmas, $46.95; New Year's, $87.50; 1866, Christmas, $62; New Year's, $94. This was before there were any flower stores in the city. Orders were usually obtained in some down-town shop and made up and delivered from the greenhouses; $10 being considered a good order, $20 a novelty.

While there were quite a number of florists by that time, none was equipped to supply a good cut of flowers; stems then were of no moment. It is pretty safe to say that for flowers alone not more than $1,000 was taken in by all the florists as the total for holiday work up to New Year, 1867.

Before another Christmas came around, at least two florist stores had opened; pretty modest affairs, as yet. The cultivation of flower-producing plants in midwinter was gradually increasing, and cut camellias, regularly imported from Philadelphia, became great factors in all floral work. The same florist's account book for the holiday trade of 1870-71 shows that his receipts had increased to the then phenomenal sum of $969.55. There were six florists with stores now doing the cream of the work, and all the florists in the city perhaps might take in $6,000 to $8,000, all told, for the holiday trade.

By this time New Year's trade had become of no moment, and the real Christmas materials, which included greens in sundry forms, became very important factors. The sale of this stock was for a time absolutely in the hands of the florists. In 1876 a small glass box, filled with ground pine, came from the woods of Wisconsin. Its great value over any other green being discovered, three barrels were obtained the next year. By 1869 the consignment had grown to 40 barrels, f. o. b. in the woods at $3.68 per barrel; in 1876 to 150 barrels, the price reduced to $2.25. But, alas! this year the city was flooded by outside parties, and the material sold at half what it cost in the woods at first. From this on, others than retail florists began to sell at first hands, and the quantity disposed of increased enormously.

By 1882, for example, the seedsmen, J. C. Vaughan, James King, and Hiram Sibley & Co., handled 84 tons, at an average price of $4.50 per 100 pounds, the stock coming in crates instead of barrels. The same year, too, 127 cases of holly were reported. Only a few years before, the first holly was used here. Since then the supplies of both have greatly increased, greens being scarce one year and overabundant another. Two years ago they were too cheap to be profitable; this year conditions bid fair to be the other way. In some years 350 to 400 tons of greens reached the city, with the supply of holly estimated as high as 3,000 to 4,000 crates. The best florists now use but little greens, although lots of holly are disposed of. Strangely enough, laurel never was a favorite in this city. A large commission houses sell the cuts of hundreds of other growers, not only from our own vicinity, but regular shipments come from Ohio, Indiana, Michigan and other States.

It goes without saying, however, that if this city is a big receiving depot it is no less a distributing one. During shipping days for Christmas and other similar occasions, thousands of boxes go to the express offices; in fact, so important is the business to these companies that they keep wagons running to collect from florists alone—a big change from the time when a shipper himself had to deliver his consignment to the express office.

As we said before, it is not flowers alone that go to make up the florists' Christmas harvest, but a varied assortment of greens, holly, hardy ferns, red berries, wild smilax, long needle pines, palm and other leaves; in fact, anything suitable for a joyous remembrance and modern keeping of Yuletide or old Christmas, including contributions from the North and the South, differing in degree from those called for at Easter. Then plants cut a far greater figure than at Christmas, not, perhaps, that suitable subjects would not find better Christmas sales, but outside of palms, ferns, azaleas, some poinsettias, primroses and the like, really choice plants are not grown to any extent for Christmas. But, then, the uncertainty of the weather for delivery purposes at the latter period is a factor to be thought of.

Since the time we first took a hand in the struggle there has been a great change indeed. There are now between three and four hundred florists, small and large, to say nothing of outsiders, with more or less great expectations. All we can add is that we wish them all abundant success and A Merry Christmas.

EDGAR SANDERS.

Plant of Capsicum Annuum, grown by A. Schultheis, College Point, L. I.

Orchids for Christmas.

Orchids for Christmas flowering are comparatively few, yet in looking through the houses I find the following: First on the list is Cattleya Percivallana, which will simply be in its glory by Christmas; a few stray plants are commencing to bloom now. Next is Cattleya Trianæ; although with us this variety is less reliable than the preceding, flowering here mostly in January and February. A limited number, however, will be in bloom by Christmas. Some growers are successful in flowering this variety profusely at that time, and hence it must rank as a Christmas orchid. Cattleya Chocœnsis, with its sweet-scented flowers, will also be in its Christmas garb.

Of other showy orchids there are: Lælia autumnalis, now in spike and bud, and ought to be "just right." The same may be said of L. anceps. Calanthe Veitchii, with its graceful sprays, is another welcome Christmas orchid. Cypripedium insigne is a valuable standby for Christmas, and hard to beat both for durability and beauty. Oncidium varicosum; established old plants of this variety are hard to hold back for Christmas; they are generally over by the middle of November. If, however, plants are imported late, say in August, fixed up, and put in a light place close to the glass, a great number, if not all, will flower, and be valuable additions to the short list of Christmas orchids.

Besides those enumerated above there are, of course, varieties that will "drop in" unexpectedly just at the right time; but all of those mentioned are, more or less, most reliable varieties for flowering at Christmas.

JOHN E. LAGER.

Summit, N. J.

Capsicum Annuum.

A little over a year ago Louis Schmutz, of Flatbush, N. Y., put on the market a little plant with pepper like fruit of many colors, ranging from white, light blue and purple, to bright scarlet.

The plants proved very taking, and this season they have been cultivated more extensively. Our illustration shows a plant grown by A. Schultheis, of College Point, L. I. This pepper is not a new thing by any means, but is rather to be classed among the oldest plants in cultivation. Its revival as a decorative subject seems to have been taken up on both sides of the Atlantic during the past year or so. We recently saw a plant in the store of a Jersey druggist that had been brought to him as a curiosity from Southampton, England, and the week following we noticed a wagonload offered for sale by a street vendor in Brooklyn.

Mr. Schultheis has grown the plant extensively this season, and has certainly done it well; the major portion have measured two feet or more through, being also well covered with the many-colored fruits.

Packing and Shipping Cut Flowers.

Read before the Chicago Florists' Club by Walter S. Heffron, Nov. 1, 1900.

In attempting to instruct how to place cut stock on a wholesale market in as perfect condition as possible, some few generalities will apply with equal force to all localities and conditions.

The shipping box is an important and much neglected feature; on its suitability much depends. The proper dimensions are not arbitrary, and are wholly dependent on the class and variety of the stock to be shipped. Great depth, breadth and excessive length and weight are to be avoided. Depth, because of pressure from weight on the lower part of contents, also because of greater liability of stock heating in transit. Width, because of unwieldiness. The various express companies, as a rule, have at the several points of transfer but a single employee to handle the packages, and even where there are several employees, rarely more than one attends to the same package. A box that is overly wide is a constant source of temptation. Nine times out of ten it will be on edge, with more or less disastrous results to the contents. Weight speaks for itself. Excessive length is open to the same general objection that attaches to great width, with the added drawback that, for all stock save particularly long stemmed, there is increased difficulty in properly securing it from shifting. Safe proportions for a shipping box, in my estimation, would be one ranging from six to ten inches in depth, never exceeding 18 inches in width, and three times the length of stems of stock packed in it. The proportions are for average general stock, roses, carnations, etc., and would not hold good for extra short or long, the exception proving the rule.

The box should have a fastening reasonably secure, but one that can be unfastened on arrival easily, quickly, and without damage to box or contents. Nails or screws should never be employed, save, possibly on special shipments, where, for good reasons, the regular box is not used. There is no necessity of attempting to make a burglar-proof box. The smallest loss a grower has is that of pilfering in transit and a fastening that provides for a reasonable amount of delay in opening will safeguard that contingency. A tight fitting lid with one of the several good hasp devices or metal catches is excellent. Nothing excels a heavy sash cord or light rope of good quality. Straps are a nuisance, as the strain soon puts the hole in the wrong place for the tongue of the buckle and either the strap is soon ruined and worthless from efforts to remedy this trouble or the cover is never tight enough to prevent the air from having too easy entrance.

The shipping box should always be lined with paper. Several thicknesses should be used. The paper not only acts as a cushion, equalizing the jar, but the dead air spaces so formed are the best non-conductors that could possibly be provided. Many growers use a lining during severe weather to keep out the cold. Is it not just as essential to prevent the penetration of heat? One is as destructive in its effects as the other; the remedy is the same. Nothing is better for this purpose than the ordinary newspaper.

In placing several layers of stock in the same box, always be careful to have them carefully separated, and so separated that they can be removed at destination without destroying the layer as originally packed. Many use tissue or wax paper for this purpose. Each of these is unfit. Wax paper draws the tissue and ruins the color, fragrance and texture of many kinds of flowers, and wax and tissue alike are so soaked by the moisture and drainage from foliage and stem above and below, that they almost invariably give way with the weight of the layer. The result is one jumbled mass. Manila or newspaper in several thicknesses is the best, as these materials have strength enough to stand considerable strain, and, being porous, they quickly absorb any surplus moisture, retaining same for a long period, providing a tempering of the enclosed air, very beneficial on a long or hot trip.

In placing flowers in the box, care should be taken to put the deepest colored stock, where substance of flower is equal, in the bottom of the box grading upward, the lightest colored or white on top as colored stock will show the effects of weight and crushing less freely.

I will not go into the question of proper cutting and bunching. That is a local question and depends on the outlet. Some markets want carnations 50 to the bunch, some 25; some bulb stock in dozens; others, again, in quarter hundreds, some heads even, some stems, and so on. These are all important points, but I presume them to be known to the shipper.

All flowers, after cutting and before packing should be placed in water long enough to ensure the stem having absorbed sufficient water to keep the flower fresh until arrival at destination and some hours after.

Pots and jars that are used for that purpose must be kept clean, and if practicable, should never be used for any other purpose. Many flowers have been ruined from having absorbed oil and various chemicals through the water in which they were placed.

Particularly during hot weather do not freshly recut stems before packing except where necessary to facilitate packing. The pores at the point where the stem is severed have partly closed, retaining the water. If recut, the stem will drain, and the flower be deprived and wilt.

Lilies, chrysanthemums and other large petaled flowers are better under done than over, on the hardening off side. The petals of such flowers, if full of water and chilled, at each jar and move are apt to crack or bruise; if soft, and even inclined to wilt, they will yield to movement and pressure, will show no trace of bruise or crack afterward, and will straighten up under proper treatment in a short time. Many more flowers can be packed in the same space, saving time, trouble, and expressage.

Stems of most annuals and perennials and other soft wooded blooms should be cleaned of bottom foliage before being sent to market. Many become offensive within a few hours after being placed in water, and the chance of sale is thereby lessened and the price lowered. Many, after reaching that stage, are so permeated with the odor that even if the stem be cleaned the flower or upper foliage retains so great a part of the smell that notwithstanding the bloom is perfect, it has gone past the selling stage. This should not be done, however, excepting for above stated reason, unless it is to remove unsightly foliage, as many flowers absorb water nearly, if not quite, as readily through the leaf as through the stem.

The use of highly colored twines in tying bunched stock should be avoided. The dye nearly always runs when the bunch is in water, and the dye strikes in. The customer then insists that the flowers are old when the contrary is the case. Take valley, as an example. I have seen many dollars' worth of value taken off a shipment from this alone. The stems at bottom being bleached nearly white from forcing, are also soft, and the dye from a blue, green or yellow string will run in the stem like ink in a blotter. On the contrary, some flowers should always be tied with string to match the stem in color, that is, of course, where the bunch goes to the customer as originally tied.

Violets, valley, most bulb stock and any easily wilting flower should have a quantity of moist tissue paper wrapped around and over the ends of stems. Smilax is better sprinkled and should always be rolled singly. Asparagus plumosus and Sprengeri will ship best and keep better afterward if kept perfectly dry.

A safe rule is never to sprinkle any flower for shipment. The foliage only should be freshened, and that, in the majority of cases, but sparingly. The only exception to this, that comes to mind at present, is the poinsettia, and that which we call a flower is really not the flower at all, simply highly colored foliage surrounding the flower proper, and which retains all its leaf characteristics.

Views of Interior of Store of S. Feast & Sons, Baltimore.

A Local Horticultural Society.

At a recent meeting of the State Board of Horticulture, in Denver Col., Harry C. Harris gave a very interesting sketch of the inauguration and development of the El Paso County Horticultural Society, an association devoted principally to floricultural matters. He spoke of the efforts made to interest the school children, and the gratifying success attending this work; also of the endeavors looking toward the improvement of home grounds, by the offering of prizes. Mr. Harris concluded his remarks as follows:

Our prize list and expenses of the second year were over one thousand dollars (a gain over the first year of ten hundred per cent). The success of this work is not entirely dependent upon the money represented by the show schedule. There are always those in your cities who are ready to furnish this when they are sure of getting "a straight deal," as they themselves express it; but the first requisite must be an inexhaustible supply of nerve, or determination not to allow anything to frustrate the aim in view. As was published recently, "One of the noble qualities of man is in letting himself be pushed into enterprises not remunerative."

In societies of this class it occurs to me the first thing to do is to interest the public by showing that the management is not in the interest of any clique or circle. This can be done by the work among the children; by requesting the public officials—such as the county commissioners or the mayors of the cities—to appoint some members of committees, or select children for places of prominence; and by enlisting the enthusiasm of the newspaper people, and they are the first ready to help. To show that we were not working for self interest, children prettily dressed, sold flowers during the exhibition of this season, in aid of the India Famine Fund; and at the close of the exhibition the exhibits were sold for the local Day Nursery.

Amateur growers and managers can more easily interest the general public than can the commercial man; and the organization is the stronger for having a large membership of amateur growers, as they have leisure and interest in such work.

A public organization of this kind—if to be permanent—must have a perfect system of books and vouchers, and have them audited by a public committee at the close of each year; thus inspiring confidence in the management, and this is the foundation stone.

A Baltimore Florist's Store.

Our illustrations are reproduced from photographs of interior views of the new store of Samuel Feast & Sons, corner North Charles and Pleasant Streets, on the occasion of their recent formal opening. The store is the first one in this town, especially fitted up and decorated for the special purpose. Messrs. Feast spared no cost in the arrangements, and accomplished a happy combination of convenience and artistic effects. The ornamentation of the store affects the imperial style, which lends itself so advantageously to plant and floral decorations. Notable among the fine decorative plants used was the graceful Cocos plumosus, a plant which deserves much greater popularity than it enjoys at present. In every detail, in fact, the store presents features for imitation, which it would be difficult to describe briefly. Other florists speak about making similar improvements, among them E. A. Seidewitz, who plans the rebuilding of his business house on Lexington Street. T. E.

The Chrysanthemum.

Full blown you beam,
And glint and gleam—
Each petal's like a fishbone,
And at the foot-
Ball match you're put
On Arabella's wishbone.
'Tis there you shine
And never pine
While panting like the grampus
Each player glides
And slips and slides
And bumps along the campus.
Chrysanthemum! Chrysanthemum!
You are the whiskered bloom
That blows apace
And lights with grace
Thanksgiving's pensive gloom.

You lightly bob
And glow and throb
Athwart the flowered damask,
And thrill to hear
Fair Guinivere
For turkey or for ham ask.
You charm the board
Whose gobbler lord
Begilds our tairy vision,
And see the gay
Bird tucked away
With swiftness and precision.
Chrysanthemum! Chrysanthemum!
To-day your happy fate
It is to be
From sea to sea
The turkey's running mate.

Chrysanthemum,
To stay you've come,
Your glory fate can stop not;
From morn till night
All feel the light
That glimmers on your topknot.
All swear by you,
For it's as true
As that we all are living,
With you away
Thanksgiving Day
Would hardly be Thanksgiving.
Chrysanthemum! Chrysanthemum!
You're here, and ever may
It be your fate
To make elate
And gild Thanksgiving Day.
—CHICAGO TIMES-HERALD.

Review of Chrysanthemum Market.

New York.

In reviewing the market conditions of the present and comparing them with those of last year, we feel assured that during this season the demand for chrysanthemums has been just as good, if not better than that experienced one year ago. Early varieties, especially, sold better this year. The fact that they were eight or ten days later than usual may have had something to do with this, for when the early kinds come into direct competition with good field-grown asters, as was the case in 1899, such early flowers must necessarily suffer on the market. This year, however, outdoor flowers were practically done when the first chrysanthemums were ready for sale, consequently better prices were realized than it was possible to obtain one year ago.

While we believe that the supply has not been so heavy as usual this year, it has been quite evident that the percentage of what are called fancy blooms has been greater in proportion, and the immense gluts of the inferior grades that have usually been experienced, were not so noticeable; though, of course, there have been occasions this season when the supply was in excess of the demand.

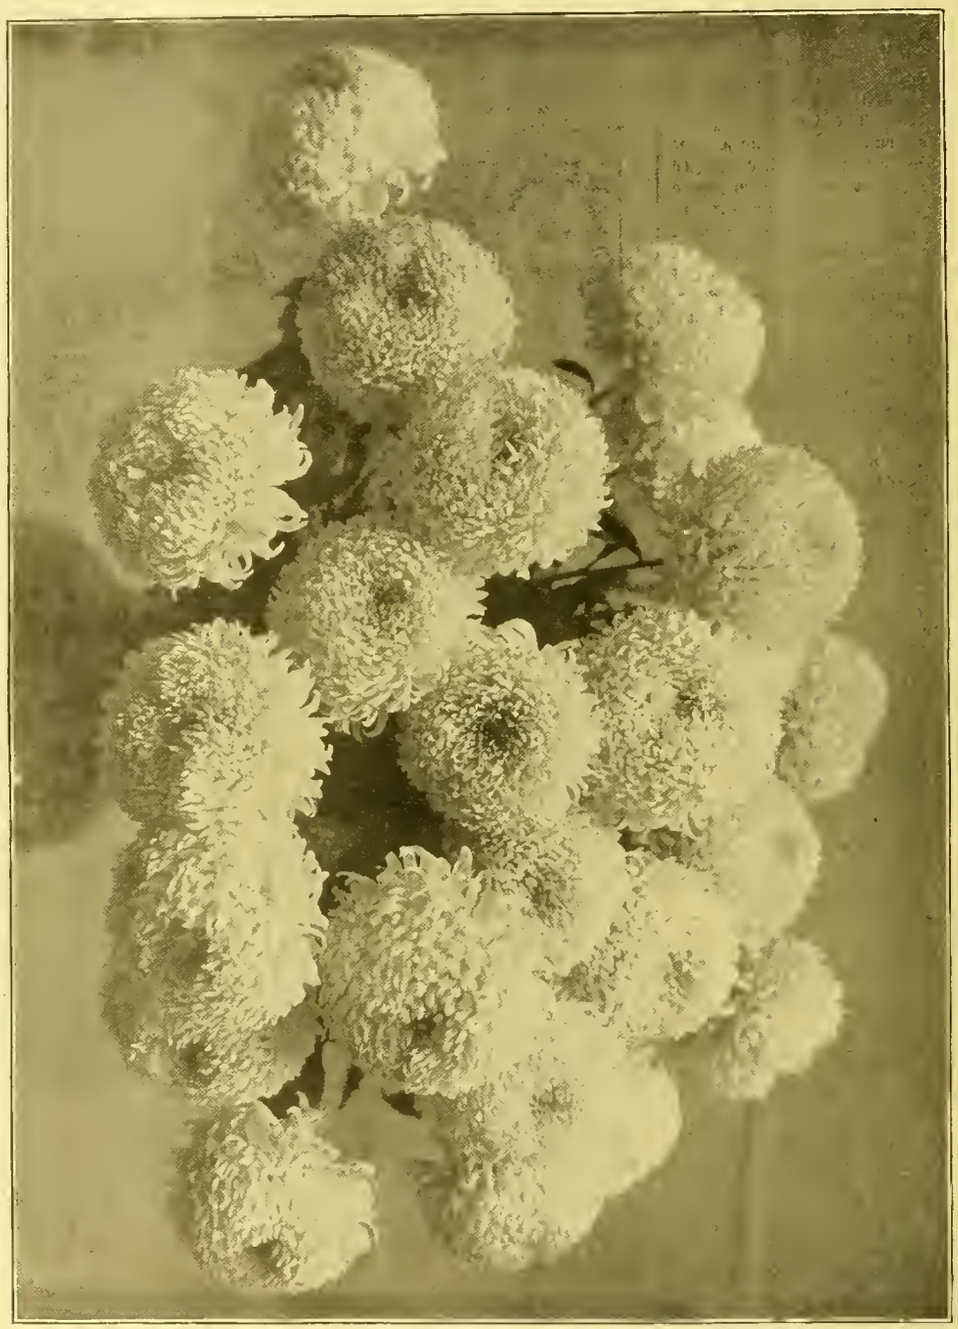
As to the varieties that have found the most favor. There was nothing new among the early ones; Mme. Gastellier was the first to reach the market, being received by September 18—ten days later than last year. This was the only variety in the market for about a week, when Mme. Bergmann began to arrive, followed closely by that earliest pink variety, Marquis de Montmort. These three sorts held sway until the week ending October 6, and may be said to have sold satisfactorily. When Montmort were good the flowers realized $3 a dozen; and the other two varieties named sold equally well, according to their size.

During the week ending October 20 the better kinds began to arrive; these were Glory of the Pacific, Polly Rose, Midge, Sunshine, Yellow Monarch, White Monarch and Mutual Friend. The two Monarchs will probably not be grown much another year; they are not firm enough to be satisfactory, and can well be dropped from the list. Polly Rose, the white Glory of the Pacific, remains a prime favorite.

In the week following, the new yellow, Walter Molatsch appeared. This variety is an acquisition in its class. The flowers coming large, and having fine stem and foliage, made this kind at once a favorite yellow. It realized fancy prices.

Maud Dean was the leader in pink and Mrs. Jerome Jones in white. Only a few Wm. H. Chadwick came to this market, and they were very fine; more of this variety will no doubt be seen another season.

The end of this week saw the last of the large fancy blooms, and for Thanksgiving the chrysanthemums in the market were mostly of the grades that brought from $2.50 per dozen down to 75c. This holiday about winds up the demand for chrysanthemums so far as the New York market is concerned, though the late white, Yanoma, will be seen in limited quantities until the middle of December.



New Chrysanthemum Timothy Eaton, as Shown at New York; Winner of C. S. A. Trophy at Chicago.

Reproduced by Courtesy of *American Gardening*.

By the beginning of November, and owing probably to the summer-like weather experienced, the market was at its fullest for the season, and, as all other flowers were also plentiful at that time, prices for the poorer grades of chrysanthemums shrunk considerably. Select blooms, however, kept up fairly well in value. The best varieties coming in at this time were Viviand-Morel, Mrs. H. Robinson, Mrs. Trenor L. Park and Bonnaffon. Following close upon these were many other varieties, the cream of which were Modesto, Mrs. H. Weeks, Col. D. Appleton, President Smith, Golden Wedding and Pennsylvania. Of red varieties the best were G. W. Childs, Intensity and Black Hawk.

During the week ending November 24

As to varieties that will be discarded, besides the two Monarchs, we think the white Bonnaffon will share the same fate; this latter variety is apt to be too small, and comes in at a time when better whites are on the market.

Of the seedlings that have been shown before the C. S. A. committee in this city, a terra cotta red, Japanese reflexed variety, named Brutus, is one that should find a place in all collections. Being ready for the market at the beginning of November, and having good stem and foliage, will give it a front position among the red kinds. Yanariva, a very pale pink variety, of the same type is, we believe, not decided enough in color and failed to be certificated by this committee. Mrs. W. B. Chamberlain, of the same type, and a beautiful pink color, will no doubt prove a favorite, and should become one of our standard varieties. A bright crimson variety named Malcolm Lamont, Japanese reflexed, coming in about the middle of November, is a good one; but whether it will prove better than Intensity is a question. An unnamed variety, number 19, is a clear yellow, of the Japanese incurved type; a fine large flower, but was weak in the stem when shown. If this fault is not a constitutional one, the variety will make a good commercial sort.

There has been but one competitive exhibition in this city, and judging from the quality of the exhibits and the number of people that attended, we cannot believe that the popularity of the flower show with the general public is on the wane. The exhibition mentioned was held in the Berkeley Lyceum, under the auspices of the American Institute. The hall was crowded with admirers each evening; the attendance during the day, however, being not so good.

The 12 best varieties shown were: Major Bonnaffon, Jeannie Falconer, W. H. Chadwick, Solar Queen, Mutual Friend, Mrs. T. L. Park, Chenon de Leche, G. J. Warren, Frank Hardy, Golden Wedding, Mayflower and Merza.

The best six kinds were Chenon de Leche, Major Bonnaffon, Madame Deis, Golden Wedding, Helen Bloodgood and Merza. For vase of yellow, Col. D. Ap-

pleton and Golden Wedding are about the best. The best white was Timothy Eaton; best pink, Viviand-Morel; best vase of red or crimson, Mrs. Bigelow or Intensity. For the best six specimen plants, Rustique, G. W. Childs, Garden Queen, Minerva, Mrs. Peabody, Miss Georgiana Pitcher. The best three plants George W. Childs, Garden Queen and Minerva.

The best single plant we have seen was George W. Childs, and for single stem plants grown in six-inch pots, the best kinds were: Pembroke, Rustique, Silver Cloud, Mrs. H. Robinson, Mrs. H. Weeks, Major Bonnaffon, Goldmine, Soucie and Viviand-Morel.

The pompon varieties are not likely to become popular as commercial flowers, because in the market where blooms are sold by the dozen or hundred, size counts more than any other point. The retailer who grows part of his own stock, however, would find a beach of pompons as profitable as the large blooms; and the flowers could be used on many occasions when other stock is short, and where it would be impossible to use the larger chrysanthemums.

If the C. S. A. would formulate a scale for certificating pompons, the trade in general would get more interested in them, and the class of growers cited would cultivate the pompon varieties, as these would certainly add to the class of flowers grown for bouquet work, such as bouvardia, stevia, heliotrope, etc.

S. B.

A Grower's View.

In reviewing our market, which is New York, so far as we could see, the supply was about the same as last year, while the demand was better. This was particularly the case in the early part of the season, owing to the poor quality of the roses which were being sent in at that time. Our prices were better than those of last year, which was probably due, more than anything else, to the fact that the flowers were better. Yellow was the color that was asked for most in the early part of the season, and a batch of Sunderbruch which we had at that time brought handsome prices. Perhaps our experience differs from the general run of growers, as we try to grow nothing but the very highest grade. We find that New York will pay a good price for almost any variety, providing it is up to the exhibition standard in size, foliage and stem.

What we consider the best varieties to grow are here given:

YELLOW—October Sunshine, Sunderbruch, Trenor L. Park, Appleton and Golden Wedding.

WHITE—Robinson, Frank Hardy (if you can get it good), Merza and Mrs. Jerome Jones.

PINK—Morel, Perrin, Maud Dean.

A variety we used to grow well, but which is going back all round this section, is Mayflower. The flower is nothing to what it should be, compared with the stem.

Pennsylvania we shall drop. We cannot make this variety produce good foliage.

Of the new varieties of the year Colonel D. Appleton is easily the best, though the introducers might have told us that this variety does best on the late bud. White Bonnaffon is a well-shaped flower, but far too small for present-day requirements. Very few of this year's introductions will be heard of again, I imagine.

With regard to our exhibition, so far as the chrysanthemums alone were concerned, the show was better than any previously held, with an attendance about the same as last year. For exhibition varieties our choice is as follows:

Twelve kinds—Jennie Falconer, Colonel D. Appleton, Golden Wedding, G. J. Warren, Mme. Carnot, Jerome Jones, Madam Deis, Frank Hardy, W. H. Chadwick, T. Carrington, Chenon de Leche, Viviand-Morel.

Six kinds—Chenon de Leche, Warren, H. J. Jones, Appleton, Morel, Deis; vase of yellow, Appleton or Golden Wedding; white, Merza; pink, Morel: vase of red, H. J. Jones, if size is the chief desideratum; vase of brown, Rustique.

Six specimen plants—Lincoln, Ivory, Silver Cloud, Mrs. H. Weeks, Iora and Red Warrior. Twelve single stems in 6-inch pots—Bonnaffon, Robinson, Merza, Morel, Perrin, Chenon de Leche, Jerome Jones, Weeks, Appleton, T. L. Park, Minerva and Golden Wedding.

As regards pompons, we are not of those who believe that these small-flowered types are going to be popular. It is all very nice to say they are artistic, beautiful, etc., every word of which is true; but the American public loves the big flower best; and I am afraid I agree with them. Pompons are a handsome feature outside when the frost keeps off till late, as it did this year; and for the purpose of making an outside display they are certainly valuable. Little Pet, yellow; La Purite, white; and Magnificus, white, are best known to me.

As regards a revised classification, I would not like to express any opinion. The chrysanthemum has been crossed and recrossed until the types are merged into each other, and what is a good Japanese variety on the crown bud may be a true incurved on the terminal. It will take a Solomon these days to definitely determine the status of some of our varieties.

What I would like to see, above all things, is the National Chrysanthemum Society having a big boom. It makes the chrysanthemum lover feel good to read of the splendid shows given in England and France by the national societies there. Can we not go and do likewise?

C. TOTTY.

BEST TWELVE VARIETIES OF CUT BLOOMS—Viviand-Morel, Mrs. F. Perrin and Inter Ocean, pink; Eureka, Mrs. J. W. Lewis and Mrs. Jerome Jones, white; Modesto, Peter Kay, Pennsylvania and Major Bonnaffon, yellow; Kate Broomhead, bronze yellow, and John Shrimpton, red.

BEST SIX KINDS—Any of the above might be named, or if other varieties are required, I give three more: Lady Hanham, Mme. Carnot, and Chas. Davis.

BEST VASE OF YELLOW—Modesto, first choice; Peter Kay, second.

BEST VASE OF WHITE—Eureka, first choice; Mrs. J. Jones, second.

BEST VASE OF PINK—Viviand-Morel, first choice; Mrs. F. Perrin, second.

BEST VASE OF RED—John Shrimpton.

BEST VASE OF BRONZE—Kate Broomhead.

Best six specimen plants, three specimen plants, one specimen plant, I would cover, by listing ten plants rather than as called for. These are: Louis Boehmer, Peter Kay, Lady Isabel, Mutual Friend, The Bard, Kate Broomhead, Red Warrior, Mrs. F. A. Constable, Mrs. E. B. Freeman, Mrs. J. G. Breer and Silver Cloud.

As regards pompon varieties, I think there is a desire to increase the cultivation of these chrysanthemums next year. There is a steady demand for them, which, though not heavy as yet, would undoubtedly reach goodly proportions were the grower to pay more attention to this type. To show how little attention is paid to them, it need only be mentioned that where pompons are grown at commercial places, there are few instances where the name of any of the varieties is known.

F. J. NORTON.

Elmira, N. Y.

For 12 exhibition blooms I would name the following: Col. D. Appleton, Fee du Champseur, Pennsylvania, Chito, Maud Dean, Wm. H. Chadwick, Mayflower, Rustique, Mrs. F. A. Constable, Merza, Goldmine, Eclipse.

Twelve commercial—Ivory (white and pink), Col. D. Appleton, Pennsylvania, Bonnaffon, Hicks-Arnold, John K. Shaw, Helen Bloodgood, Maud Dean, Clara Goodman, Lucie Faure, Wm. H. Chadwick and Eclipse.

Six varieties for exhibition—Col. Appleton, Maud Dean, Wm. H. Chadwick, Eclipse, Mayflower and Pennsylvania.

Six commercial varieties—Col. Appleton, Maud Dean, Wm. H. Chadwick, Eclipse, Bonnaffon and Ivory.

Best vase of yellow, Col. Appleton; best vase of white, Wm. H. Chadwick; best vase of pink, Helen Bloodgood; best vase of red, Geo. W. Childs; best vase of bronze, Bronze Beauty.

Six specimen plants—Ivory, Mrs. S. T. Murdock, Miss Georgiana Pitcher, The Bard, Golden Trophy, Hicks-Arnold.

Three specimen plants—The Ivorys, The Bard and Miss G. Pitcher.

One specimen plant—The Bard.

Twelve single stem plants in 6 inch pots—Bonnaffon, Golden Trophy, Queen, John K. Shaw, Minerva, Pennsylvania, Jennie Falconer (Peter Kay), Mrs. F. A. Constable, Iora, Col. D. Appleton, Goldmine and Viviand-Morel.

Mrs. Weeks, although a beautiful white, is "too touchy" for commercial use. Autumn Glory drops its petals. Black Hawk damps and burns, but is a beautiful cut flower, the handsomest red for decorative effect. Shilowa is inferior to Black Hawk. Xeno is too dull in its lavender pink shade. Lavender Queen is much better. Cullingfordil is the most profitable red to grow; there being no loss from damping or burning, and the color is always good. Hicks-Arnold is still the best selling bronze.

Pompons will grow in favor with the amateur, but are of little use commercially.

A revised classification of chrysanthemums would be useful, but I doubt if it could be successfully accomplished by American methods.

G. P. R.

Partial View of the Exhibition of the Pennsylvania Horticultural Society, Philadelphia.

Boston.

It would seem that the supply this season was heavier than before, there being some additional growers of chrysanthemums for the market this year, while all the old growers planted just as many, if not more, than in past years. Then, again, more of the growers turned out really first-class stock than in other seasons. The demand for this flower seemed to have increased proportionately, for though there was a time, at the height of the season, as is usual, when chrysanthemums went "hard," the demand held up very well under an increased supply. Prices, too, the past season have kept to the standard of other years, though there was a tendency through the season to a little falling off on values of really fancy grades, due, no doubt, to the increased supply of these grades.

Among the varieties in greatest demand were the following:

EARLY—Bergmann and Fitzwygram, white; Marion Henderson, yellow; Montmort and Glory of the Pacific, pink.

MID SEASON—Ivory, white; Gold Lode and J. E. Lager, yellow; Mrs. Perrin, pink, and John Shrimpton, red.

LATER—Mrs. Jerome Jones, Wanamaker, white; Rieman, yellow; Maud Dean, pink, and Cullingfordil, red.

The annual exhibition of chrysanthemums given by the Massachusetts Horticultural Society seemed to be as popular as ever. In regard to naming the best of exhibition varieties for certain purposes, I will follow, to a great extent, the prize list of the Massachusetts Horticultural Society at its recent show.

St. Joseph, Mo.

The chrysanthemum supply and demand are and have been so far this season about equal to those of last year; if any difference, the demand is lighter, at least not so steady, owing, perhaps, to warm weather holding on so late, and to the very dull, cloudy, rainy, sloppy days experienced the past two weeks. We think probably election had also something to do with the state of trade. As to varieties, we have not seen anything new worthy of special note. Regarding colors and demand, we find that there are very few calls for anything except white, pink and yellow, white leading, the others about equal. Odd colors are not wanted. We also find less call for very large flowers, except for football players and their rooters.

K.

Indianapolis.

The supply of chrysanthemums for this season has been somewhat excessive, but taking the unfavorable weather into consideration, the election excitement and the general dullness of trade during November, the result should be called satisfactory. The prices ranged from 50c. to $1 a dozen, the latter price being for the very best; $2 and $3 were asked for good average flowers. There has been no difference in prices from those of the last two years. There seemed to be an overabundance of cheap flowers all through the season, the warm weather bringing them on the market fast, many good blooms being weakened and partly spoiled from being too soft.

The best sellers in this vicinity were for EARLY WHITE AND PINK:—Fitzwygram, because early, otherwise not satisfactory; Bergmann, doubtful; Monrovia; Midge; Willowbrook; Ivory, white and pink, good; Glory of the Pacific, good; Mrs. Robinson, good; Georgienne Bramhall, very good; George S. Kalb; Mrs. O. P. Bassett, good; Mrs. H. Weeks and Autumn Glory, good.

MIDSEASON:—Bonnaffon, A1; Mary Hill, good; Henry Hurrell; Golden Wedding, good; Merza; W. H. Chadwick, good; Mayflower, good; Mrs. Perrin, doubtful; Viviand-Morel, good; Orizaba; Evangeline, very good; Lavender Queen; Francis B. Hayes, A1; Black Hawk; Solar Queen; Geo. W. Childs; Quito, good pot plant; Eda Prass, doubtful; Mdlle. Lucie Faure; Garden Queen; Helen Bloodgood; Pres. W. R. Smith; White Swan, Pluma, promising; Modesto; White Bonnaffon, promising, and Denominantion.

LATE:—Niveus, Merry Christmas, Goldmine, good; Yanoma, H. W. Rieman, good; Mrs. Murdock, good; Snowball, Xeno; Mrs. Jerome Jones, good; Superba, good, and W. H. Lincoln.

In seedlings and sports nothing of importance was noticed, excepting seedling Nellie, a fine white, shown by H. W. Rieman. He has a few other seedlings which are promising. John Hartje will introduce a sport of H. W. Rieman, yellow, which seems very good.

The annual trade exhibit, open to the public, was well attended. The general opinion of the merchants and others interested seems to be that a big exhibition could again be held, showing that chrysanthemum shows, if started in the right way, and for the interest of the retailer and the public, with the assistance of the wholesaler, could be made a go.

As to exhibition varieties in this vicinity much cannot be said, as most of the kinds grown are for profit only; however, some of the older varieties are still good and showy, such as Bonnaffon, Georgienne Bramhall, O. P. Bassett, Autumn Glory, Golden Wedding, Mayflower, Viviand-Morel, Solar Queen, Goldmine, and others.

In commercial varieties we would mention for best vase of red, George W. Childs; bronze, Autumn Glory; pink, Mrs. Murdock; white, Mrs. Robinson; yellow, Bonnaffon.

Very few plants were raised in this vicinity. More attention should be paid to this branch, and the best varieties for this purpose specially advertised. Many more good plants of larger sizes would have been sold at paying prices. Single stem plants are no good for retail trade; plants in pots from 6 inch to 10 inch, sell best. Among the few plants raised here may be mentioned Bonnaffon, white and yellow; Mrs. Perrin; Ivory, white and pink; George W. Childs; Quito, and others.

Pompon varieties have not found favor in this city and vicinity; no effort will be made by many to raise this class.

The present system of classification seems all right and acceptable. The distinction between the different classes should be more closely followed. We would suggest that the Society take up the matter of encouraging an annual exhibition in different cities, from year to year, under the Society's auspices.

While the florists, as a rule, claim that there is no money in chrysanthemums, there are as many plants raised as ever. There is nothing to take the place of them; they will always be in demand, and are beautiful in pure colors. The weather was against them this season; in good frosty weather they make their debut. Early ones, while needed, are not profitable to the retailer.

W. B.

Cincinnati.

As to a comparison of supply and demand with previous years, I will say that in this locality fewer chrysanthemums have been grown. But, from a wholesaler's standpoint, I have handled more good flowers, sold them at better prices, and sold out closer, none having to go to waste, than in any season since I have been in the business. Of course, these blooms were nearly all shipped from other localities adjacent to Cincinnati.

The first to arrive was White Fitzwygram, about October 6; these sold at 15c. each, and were followed a few days later by Yellow Fitzwygram, which realized the same figure. For very early I have seen nothing better than this variety when well done; and while not a large flower, it is much more graceful than Bergmann, Kate Brown or any of this class. Following close upon these came Glory of the Pacific. I do not like it; but there is no commercial sort on the market that will take its place for early pink, if it can be grown so as to retain its color. Mrs. Robinson is the one to grow for all classes. Its good qualities are too well known to dwell on; so I will pass along to that grand old variety, Ivory. You all know it; you all grow it (or ought to); you all sell it. It is what might be called an intermediate. Then along down the line come such sorts as Perrin, Bonnaffon, Golden Wedding, Wanamaker, Maud Dean, Mrs. Jerome Jones, President Wm. R. Smith, Lincoln, Mayflower and Viviand-Morel. All these varieties are money-makers for the growers, the wholesalers and the retailers. They are kinds that must not be discarded until it has been proven that they have been superseded by something better, and, personally, I have not seen such yet.

The wholesale prices on all of the above-named varieties have been from 75c. to $2 per dozen, according to quality. The bad sellers are, as a general thing, those of every color other than white, pink and yellow, and these colors must be in their true form. There is only a very limited quantity of anything else that will pay.

To name all of the bad sorts would fill a Webster's dictionary; and right here I would say that the time has arrived for the great heads of the Chrysanthemum Society to get together and revise, for the benefit of the chrysanthemum growers and sellers in the United States and, in fact, the world (as America leads everything), a list of such varieties as are known to be a success financially—for money talks. The exhibition sorts will do for a few to grow, but not for the masses.

Now as to the seedlings—those it has been my pleasure to see for 1900. The first, and one I think all growers should make a note of, is Iolantha, a fine early pink, incurved, larger and better made than Mrs. Perrin, good stem (about four feet) and foliage, ready to cut about October 15. This variety is the property of Nathan Smith & Son, Adrian, Mich. Yanariva, flesh pink, built not unlike Viviand-Morel, stem a little weak, foliage good; will make a good commercial sort. It is the property of John N. May, Summit, N. J. Nellie: this is an easy name and stands for a cream white Japanese incurved, with grand, stiff stem and fine foliage. There is a place for Nellie. She is the property of Henry Rieman, Indianapolis, Ind. Arab, a bronze of medium size, incurved, good in stem and foliage; and if you want a bronze, this one is all right. It is owned by Theodore Bock, Hamilton, O. Mary Hill (the name you will all remember, and if you have ever seen this flower it would also be fixed in your memory) is an improved Perrin, but better in every way. It is owned by the E. G. Hill Co. Malcolm Lamont is a deep red, and where red is wanted this one is all right. The variety is also owned by the E. G. Hill Co.; its great fault is that the petals drop very easily. Mrs. Elmer D. Smith, yellow, on the order of Bonnaffon, no better, but the foliage is handsomer, is the property of Nathan Smith & Son, Adrian, Mich.

The seedlings I have just described are the best I have seen of the 1900 lot. They may be hard to grow and it may be that only the introducers can grow them; that, of course, remains to be seen.

Regarding exhibitions, the Cincinnati Florists' Society holds monthly shows during the Fall, Winter and Spring months. At these exhibitions cash prizes are offered, or equivalents, and no charge is made for admission. Cincinnati has long since given up the show business where an admission had to be paid to meet the expenses. At the Flower Market which we have here, one may see a flower show any Saturday afternoon, free of charge. The only way a floral exhibition can be made a success in this or any other city is to donate the surplus to charity, for the benefit of the poor and needy. This reaches all creeds; all work to make such an exhibition a success, and the business man will readily put up a guarantee fund, which you could not possibly get by any other pretext.

Speaking of pompon varieties, Diana and Belle Poitevine are the only money-makers. These two are white, and are much sought after for funeral work. The colored sorts do not sell in this market.

It is a mistaken idea to say that the Queen of Autumn has lost any of her charms, for when she appears all associates step to the rear and wait until her season is past.

E. G. GILLETT.

Fig. 2. Cut Chrysanthemum Flowers, Selected Promiscuously at Montreal Flower Show

St. Louis.

We cannot give much information that would be considered valuable, from the simple fact that this city has no growers who make any special effort in chrysanthemum culture. The quantity grown was fully as large as that of last year; in quality the flowers were no better, possibly not as good on the average. Prices ruled lower than in any previous year; those selling best being the medium-priced ones, like Ivory. Proper values for very high grade stock were hard to obtain. The best sellers were Ivory, Dalskov, Robinson, Bassett, Mrs. Glessner, for early; Golden Wedding, Modesto, Niveus, Mayflower, Appleton, Mrs. Perrin, Storm King, F. Pullman, V. Morel, Maud Dean, Major Bonnaffon and Mrs. J. Jones.

Among the poorest sellers were Glory of the Pacific, H. Sunderbruch, Mrs. Wildin, and reds and bronzes generally.

There were no pompons grown or offered for sale here, consequently they are little known in this locality, but I think they will come into favor.

A late Fall, we think, is responsible for the poorer sale this year, as outside stock was with us during the early part of the chrysanthemum season. There seems a better demand, now that the period is nearly over.

C. C. S.

Chrysanthemum Society of America.

Following are the reports of the committees judging seedlings and sports:

NOVEMBER 24.

CHICAGO.—Chestnut Hill, yellow, was exhibited by John N. May, Summit, N. J., which scored 88 points, commercial scale.

The variety exhibited by John N. May at Philadelphia, November 17, under No. 112, has been named Zampa.

EDWIN LONSDALE, Secretary.

Wyndmoor, Pa.

Detroit.

Although chrysanthemums came in late this year and we have had but very little favorable weather, the flowers seem to be as popular as ever with the flower-buying public. In white, George S. Kalb and Bergmann, Ivory, Reverie, Mrs. Jerome Jones, Toler, Chadwick, Western King and Arline were the best sellers here. In yellow, Bonnaffon, Golden Wedding, Yellow Jerome Jones, and Capt. Gridley. In pink, Murdock, Erminilda, Xeno and Helen Bloodgood seemed to be the favorites, with but very little demand either for pompon varieties or pot plants.

Our city has held no show for 10 years or more, but the matter is being agitated pretty strongly in our club, and all indications point to the holding of an exhibition in Detroit next Fall, after which I shall be able to tell your readers more about shows. RAG.

Oakland, Md.

The demand for chrysanthemums was better this year than in several years past. The supply was not equal to the demand, particularly of early varieties and first grade stock in general. Prices proved higher than last year—about 15 to 20 per cent.

For an uninterrupted succession of blooms from October 1st to January 1st we depend on not less than fifty varieties. White leads in demand, with yellow and pink following in the order named. The demand for red, bronze and other intermediate shades is small compared to that for the first three colors mentioned. Among the bad sellers we would include quite a few new ones of this year, but do not always consider one year's trial sufficient grounds to condemn a variety. Of the older sorts we will discard Mrs. Perrin, Mrs. O. P. Bassett, Solar Queen, Shillowa, White Flyer, Autumn Glory, Sunstone, Golden Trophy and Admiral Dewey (on account of being outclassed by other yellows of same date), the rest on account of unpopular color.

Our aim is to make a specialty of commercial varieties rather than exhibition varieties, although many combine both qualities. For exhibition we would name for best vase of yellow, Golden Wedding; white, Mrs. H. Weeks; pink, Maud Dean; red, G. W. Childs, and bronze, Bruant.

Of this year's introductions, from one season's experience, we would select the following as most promising: R. H. Pearson, Goldmine, yellow; White Bonnaffon, white; Superba, Lavender Queen, Orizaba, pink; Intensity, red; John Pockett, old gold, and Lady Anglesley, bronze. H. WEBER & SONS.

Newton Highlands, Mass.

The following varieties are largely grown and form the bulk of the crop sent to Boston market:

WHITE.—Lady Fitzwygram, Mme. F. Bergmann, Mrs. H. Robinson, Ivory, Mutual Friend, Minnie Wanamaker, Mrs. Jerome Jones.

YELLOW.—Marion Henderson, Gold Lode, Mrs. O. P. Bassett, Major Bonnaffon and H. W. Rieman.

PINK.—Glory of the Pacific, Pink Ivory, Mrs. Perrin, Maud Dean, F. B. Hayes, Mrs. S. T. Murdock

RED.—John Shrimpton, Cullingfordii, E. M. Bigelow.

The only variety which has obtained a certificate from the C. S. A. this season, originating in this locality, is Peerless, a white seedling in the way of Mme. Bergmann, but much larger.

In regard to the annual chrysanthemum show of the Massachusetts Horticultural Society, I think there was no appreciable difference between this year and recent years, either in interest or popularity.

As to exhibition varieties I made no complete list, but the following varieties figured largely in twenty-fives, twelves and sixes, viz.: Autumn Glory, Australie, Belle of Castlewood, Buff Globe, Good Gracious, Frank Hardy, Charles Davis, Lady Hanham, Morel, Dorothy Spaulding, Eugene Dailledouze, Eureka, Evangeline, Golden Gate, Golden Wedding, John Shrimpton, Marguerite Jeffords, Miss Georgienne Bramhall, Miss Georgiana Pitcher, Mme. Carnot, Yellow Carnot, Mme. F. Perrin, Modesto, Mrs. George West, Mrs. H. Weeks, Mrs. J. Peabody, Mrs. George A. Magee, Pennsylvania, Philadelphia, Peter Kay, Rustique, Silver Cloud, Mrs. Jerome Jones, Mrs. Barr, Mrs. J. Lewis, Mrs. Potter Palmer, Bruant, Mrs. F. A. Constable, Mayflower and Yellow Mayflower.

Varieties grown for best vase of yellow, Modesto, Peter Kay; white, Eureka, Mrs. Jerome Jones, Mrs. Bown; pink, Vivland-Morel; red, John Shrimpton; bronze, Kate Broomhead.

In specimen plants, the varieties included the following, viz.: Peter Kay, Mutual Friend, Louis Boehmer, The Bard, Mrs. F. A. Constable, Mrs. J. G. Breer, Red Warrior, Silver Cloud, Mrs. E. B. Freeman, Mrs. H. Weeks, Lady Hanham, Georgiana Pitcher, Marion Henderson, Golden Trophy, Black Hawk, Savannah, Georgienne Bramhall, Arethusa, Lady Isabel, Shellowa, Edith Smith, Kate Broomhead, Mrs. Lewis, Monoglian Prince.

Very few pompon varieties are exhibited at Boston, and probably these will remain in the background until some special effort is made in the way of prizes to bring them into prominence again.

Mount Greenwood, Ill.

I have not found the extra early varieties profitable, and so have paid little attention to those in the market this year. They bring fair prices up to the time the first large ones appear, after which they are slaughtered.

Soleil d'Octobre was our first yellow and paid well. This was followed by Yellow Queen, always a standard with us, Bonnaffon, Col. D. Appleton, perhaps the best of all yellows, then Yellow Jones and Golden Wedding.

In pinks there is room for several more good varieties; in fact, they are sadly needed. Pink Ivory (a good seller whether it comes pink or white), Perrin and Xeno were all we grew. Perrin is fine, but lacking in size. Xeno is excellent on late buds, but a washy color if the bud is taken too early.

In whites we have Ivory, White Bonnaffon, Jerome Jones and Wm. H. Chadwick. White Bonnaffon is fine, but

Springfield, Mass.

The chrysanthemum season this year held out unusually well; the New England festival—Thanksgiving—which is not complete without flowers, finished them up. It is generally agreed that those most satisfactory with our growers are some of the older sorts. For early, nothing takes the place of Ivory and Glory of the Pacific; for later, white, Minnie Wanamaker, The Queen and Mrs. Robinson are the favorites. While some will drop the two latter, others will retain The Queen at least. The best pink variety is Vivland Morel. Maud Dean is also in good favor. Golden Wedding, Major Bonnaffon and Georgiana Pitcher are the favorites in yellow. All these are for a home market, as none of our growers ship.

Prices have held about as last year, although it is thought that the flowers have been better. No seedlings or new varieties have originated in this locality.

Fig. 1. Specimen Plants Exhibited at Montreal Flower Show.

As to the present classification I think the chief difficulty with it is that the average grower will not take the trouble to investigate it, and make himself familiar with the characteristic points. If a revision were to be made I think it would be well to do away with all but the incurved, Japanese, anemone-flowered, and the pompon varieties, placing all which have a smooth and spherical outline in the incurved class, and all others which do not belong to the two latter classes, in the Japanese. The greatest objection to this would be that many beautiful forms would be lost sight of, particularly the best forms of the old Chinese incurved class. Whatever classification is made, no strict rules can be laid down as to certain varieties belonging to this or that class, but each variety should be considered in a general way to belong to the class to which it most nearly approaches; and in selecting varieties to compete in any class flowers of these varieties should be selected which most nearly approach the type established for this class. It is a well-known fact that many varieties assume different forms under different conditions, and a variety of this sort should be shown under the class, the type of which the individual flower in hand most nearly approaches, and not necessarily under the class in which the variety may usually be catalogued.

A. H. F.

I fancy will require more care in growing than some other varieties.

Among the new ones we were much pleased with Mrs. Elmer D. Smith, and think it likely to make a fine commercial variety. Timothy J. Eaton is a fine bold flower, of good color and great substance. As shown here, however, the blooms were not fully enough developed so that we could be sure the defective Wanamaker center was cured.

Yanariva is a beautiful color.

The attendance at the flower show this Fall was not so good as last year. Possibly this was due to the fact that the show was not so good.

There are no present indications that the pompon varieties will be in evidence in this market in the near future.

As a result of the crossing and recrossing and general mixing up which has been going on so actively among the large flowered varieties for years past, we have a large number of intermediate types. It seems to me that a close system of classification is impossible, and so far as the commercial grower is concerned, the commonly used descriptive words of the catalogues seem all that is needed.

The growing of chrysanthemums for cut blooms for this market has come to the point where there is little profit, except under special conditions.

W. N. RUDD.

The local horticultural society did not hold its usual exhibition this year, but several of the florists gave public receptions that were well attended.

Pompons are not much in evidence, but there is a growing feeling that they will have a prominent place in the near future.

G.

Exhibits at Montreal Show.

Illustration No. 1 shows a group of plants in not larger than 10-inch pots (with one special specimen in the center background) which was awarded second place in the challenge vase competition. The plant of Ivory at the left of the photograph was awarded a certificate as being the best plant in 10-inch pot in the show. The center plant in the foreground is a beautiful pink variety, with thread-like petals, called Autumn Queen—an ideal variety for pot culture. No. 2 shows a few of the specimen blooms, photographed the third day of the show, picked at random from the exhibits. The sixth bloom from the left in the group in the foreground, Madame Carnot, was awarded a certificate as being the best—not the biggest—bloom in the show. As exhibited this specimen measured 21 inches over the crown. Intensity, a magnificent crimson, is shown above and a trifle to the left. B.

Providence, R. I.

The demand for chrysanthemums in Providence and vicinity was ahead of all previous years. The people still want good blooms, that is, not too large, but such flowers as we get from two to three from one plant. About $2 per dozen retail suits the majority of buyers, while a few are willing to pay $3 to $4 for fancy stock.

Marquis de Montmort is still the leader in early pink with Merry Monarch for white. A few days later come Marion Henderson and Harry A. Parr, a new yellow of merit. For an early mid-season there is nothing to compare to the white and yellow Robinson.

Bonnaffon, Mrs. Park and Peter Kay, yellow; Ivory, Mrs. Crawford, Wanamaker, Western King and Fee du Chrysanthemum for white, are our best for mid season. Mrs Perrin, though small, sells well for its color. In late we have nothing that sells as well as Mrs. Jerome Jones, white; its yellow sport sells equally good. Maud Adams, Mrs. E. Buettner and Rieman are also excellent late yellows, and for a late pink we grow Mrs. Murdock; Merry Christmas is also a very valuable variety. In our opinion, Col. D. Appleton leads the list in new varieties, color, size of bloom, stem being all right.

FARQUHAR MACRAE.

Ottawa.

Chrysanthemums in this locality were more largely grown this year than formerly, but none too largely, as the successive crops have all been used, except those in houses planted especially for Christmas, which in this locality is a profitable feature of the Christmas cut-flower trade. The stock grown around Ottawa is not fancy or showy, but good medium-sized flowers. These the season through have sold from $1 to $2 per dozen, which has been the price for the last two seasons; some choice flowers have sold at $3 and a small sample of Timothy Eaton at 50c. each. But the most salable flowers here are those that can be retailed at $1.20 and $1.50.

The demand this year has been ahead of last year, and often the retailer has had to go out of town for a supply.

The varieties generally grown are (early) Mrs. Bergmann, Ivory and Mrs. Robinson for white; Marion Henderson and Lager for yellow, and Miss Dalskov and Glory of the Pacific for pink. Mid-season, white, Mrs. Weeks, Niveus, Mrs. Peabody, the Queen and Western King; yellow, Modesto, Bonnaffon, G. Pitcher, Pennsylvania, Chalfant and H. Hurrell; pink, Helen Bloodgood, Viviand-Morel and Mrs. Perrin. For the late crop, white, Mrs. J. Jones, Wanamaker, W. H. Chadwick and Merry Christmas; yellow, Lincoln, H. W. Rieman and Golden Wedding; pink, Maud Dean.

Among the varieties that have been unsatisfactory this year are Bonnaffon, not from loss of favor by the public, but that with nearly all growers in this neighborhood the plants have failed to show bud. Among newer introductions Pennsylvania promises to be one of the very best commercial sorts.

No show here this year, but at the extensive store shows interest in the flower has been as great as ever.

There are no pompon varieties grown here. E.

Montreal.

This chrysanthemum season has on the whole been a decided commercial success. The majority of retailers report an increase of sales, with a slight corresponding increase in the prices obtained. The demand has been almost wholly confined to good flowers, any inferior stock being of little value. One of the local growers has this year again found an excellent demand for flowers grown three to a stem. A few varieties, such as Glory of the Pacific, Rose Owen, Ivory and Pennsylvania, when carefully grown, are extremely effective this way, and retail readily at $1 to $1.50 per dozen flowers. With one or perhaps two exceptions, local retailers have had to rely, to a large extent, on Western flowers; but these have been plentiful and good, and no difficulty has been experienced in getting all the stock required. Excepting those mentioned above, the demand has been almost exclusively for large flowers, and for these $2 to $2.50 per dozen has been about the average price obtained. Plants, even in the smaller sizes, have proved very indifferent sellers, and it looks at present as if chrysanthemum plants of any description will have to be discarded as a commercial failure.

The varieties most in demand for cut flowers are:

EARLY.—Fitzwygram, Bergmann, Glory of the Pacific, and Polly Rose.

MIDSEASON.—Ivory, Pennsylvania, Viviand-Morel, Golden Wedding, Rose Owen, Mrs. Perrin and Charles Davis.

LATE.—Mrs. Jerome Jones, Niveus, Helen Bloodgood, and Bonnaffon.

Commercially, very few of this year's varieties have been grown; but two of these that can be relied on to find a place in future years, are Col. D. Appleton and Lavender Queen.

The annual exhibition this, as in former years, was a financial failure. Everything feasible that has been suggested to arouse popular appreciation has been tried, but public indifference is still in the ascendant, and I am afraid there is at present little hope for a change.

There are so very many varieties grown for exhibition purposes locally, and each grower is a stanch believer in his particular favorites, that it is an absolute impossibility to pick out any 12 varieties as the best. Any 12 of these varieties will give satisfaction: White, Mme. Carnot, Mrs. Weeks, Mrs. F. A. Constable; yellow, Golden Wedding, Col. D. Appleton, Minerva; Col. W. B. Smith, bronzy yellow; yellow, Mme. Carnot or Australian Gold; pink, Viviand-Morel, Iora, George A. Magee; crimson, Intensity, Black Hawk; Mrs. George West, plum color; Leonidas, claret; The Barrington, maroon, silver reverse.

Six varieties, white, Madame Carnot; yellow, Col. D. Appleton or Golden Wedding; pink, Viviand-Morel; crimson, Intensity or Black Hawk; bronze, Col. Smith.

Vase of yellow, Col. D. Appleton or Golden Wedding; white, Madame Carnot; pink, Viviand-Morel or Autumn Glory; crimson, Intensity or Black Hawk; bronze, Col. W. B. Smith or Marguerite Jeffords.

Private growers have tried nearly all the new varieties, and the following can be confidently recommended: Col. D. Appleton, Goldmine, Intensity, Lavender Queen, Souci, Orizaba, Idavan, Rustique and Nesota.

For specimen plants, the following are most suitable for six specimens: White, Mrs. Weeks, Ivory; yellow, Harry Hurrell; pink, Mrs. Perrin, Autumn Queen; crimson, Shrimpton or Childs.

Three specimen plants, Mrs. Henry Weeks, Harry Hurrel, Autumn, Queen or Mrs. Perrin. One specimen, Mrs. Weeks, or Ivory.

The pompon varieties are little grown and have been little thought of here until the recent revival. Three of the best local growers announce their intention of giving this section an extended trial next year. B.

Awards at Montreal Show.

GROUPS OF PLANTS.

Chrysanthemums and foliage plants, arranged for effect—F. C. Smith, gardener to Sir William Van Horne, first; W. J. Wilshire, gardener to Mr. R. B. Angus, second; A. Pinoteau, city gardener, third; R. W. Whitney, gardener to Mr. H. S. Mussen, fourth.

Chrysanthemums only—William Whitmag, gardener to Mr. Thomas Peck, first; J. Pidduck, Mount Royal Park, second; A. Pinoteau, third; William C. Hall, florist, fourth.

CHRYSANTHEMUM PLANTS.

Six specimen plants, distinct varieties—C. A. Smith, gardener to Mr. T. A. Dawes, Lachine, first, and challenge cup; W. G. Pascoe, gardener to Mr. Robert Reford, second; G. A. Robinson, gardener to Mr. A. Joyce, third.

Vase of Chrysanthemum Col. D. Appleton, Exhibited by A. L. Marshall at Mt. Kisco, (N. Y.) Show.

Three specimen plants, distinct varieties—G. Pascoe, first; C. A. Smith, second; F. Bennett, gardener to Mr. Joseph Bennett, Lachine, third.

One specimen plant—C. A. Smith, first; G. A. Robinson, second.

Twelve plants—G. A. Robinson.

Six plants—G. A. Robinson, first; C. A. Smith second.

Twelve plants—J. Pidduck, first.

Certificate of merit for best chrysanthemum plant in show—W. G. Pascoe.

MISCELLANEOUS PLANTS.

One hundred mixed ferns—Wilshire Bros., florists, first; John Eddy & Sons, florists, second; P. McKeons & Son, florists, third; W. C. Hall, fourth.

Fifty mixed ferns—Joseph Bennett, florist, first; John Eddy & Sons, second; W. G. Pascoe, third.

Twenty-five ferns—Wilshire Bros., first; Joseph Bennett, second.

Three specimen ferns—F. C. Smith, first.

One specimen fern—W. J. Wilshire, first; F. C. Smith, second; W. Alcock, gardener to Mrs. Hugh McLennan, third.

Fern or ferns, in hanging basket or pot, not larger than 15 inches diameter—W. J. Wilshire, first; W. Whiteman, second; John Eddy & Sons, third.

One specimen tree fern—W. J. Wilshire, first; John Walsh, gardener to Mrs. W. W. Ogilvie, second; F. C. Smith, third; G. Pascoe, fourth.

Six palms—F. C. Smith, first; W. H. Horobin, gardener to Mr. R. G. Reid, second.

Three palms—F. C. Smith, first; John Walsh, second; R. W. Whitings, third.

One specimen palm—John Walsh, first; F. C. Smith, second; Joseph Bennett, third; R. W. Whiting, fourth.

Six orchids—F. C. Smith, first.

Three orchids—W. J. Wilshire, first; R. W. Whiting, second.

One orchid—F. C. Smith, first; R. W. Whiting, second.

One epiphyllum—J. Walsh, first; W. Alcock, second.

Six Primula sinensis—W. J. Wilshire, first; C. A. Smith, second; W. G. Pascoe, third.

Six Solanum capsicastrum—C. A. Smith, first; Joseph Bennett, second; W. Alcock, third.

Two specimen pots, callas—George Robinson, first; John Walsh, second.

One specimen pot Ruellia—W. J. Wilshire, first; John Walsh, second.

One Asparagus Sprengerii, basket or pot—John Walsh, first; W. C. Hall, second.

One begonia, Oloire de Lorraine, basket or pot—F. C. Smith, first and certificate of merit; P. McKenna & Son, second.

One Acalypha Sanderii—Geo. Robinson, first; F. C. Smith, second; John Walsh, third.

Six zonal geraniums—R. W. Whiting, first.

Three flowering begonias, distinct varieties—R. W. Whiting, first.

CUT CHRYSANTHEMUMS.

Twelve blooms—W. J. Wilshire, first, and challenge cup; Thomas McHugh, gardener to the Forest and Stream Club, second; C. A. Smith, third; G. A. Robinson, fourth.

Six blooms—T. McHugh, first; C. A. Smith, second; W. J. Wilshire, third.

Three blooms, white—Thomas McHugh, first; W. H. Horobin, second.

Three blooms, yellow—Thomas McHugh, first; Fred. Bennett, second; C. A. Smith, third.

Three blooms, pink—Thomas McHugh, first; W. J. Wilshire, second; C. A. Smith, third.

Three blooms, red or crimson—W. H. Horobin, first; Thomas McHugh, second.

Certificate of merit for best and largest bloom in show—Thomas McHugh, for variety Mme. Carnot.

ROSES AND CARNATIONS.

Twelve Sunset or Perle—W. H. Horobin, second.

Twenty-five white carnations—P. McKenna & Son, first; G. A. Robinson, second.

Twenty-five carnations, light pink—P. McKeona & Son, first.

Twenty-five carnations, dark pink—P. McKenna & Son, first.

Twenty-five yellow carnations—P. McKenna & Son, first.

Mantel decoration—Wilshire Bros., first; Joseph Bennett, second.

Vase of chrysanthemums, arranged for effect, and foliage allowed—Wilshire Bros., first; P. McKenna & Son, second; Joseph Bennett, third.

Pan of foliage plants suitable for table, pan not to exceed 10 inches—Wilshire Bros., first; John Eddy & Sons, second; G. A. Robinson, third; W. C. Hall, fourth; W. Alcock, fifth.

Basket of chrysanthemums, basket not to exceed 20 inches—Joseph Bennett, first.

Basket of flowers—Wilshire Bros, first.

Funeral design, wreath, frame not to exceed 24 inches—Wilshire Bros., first; John Eddy & Sons, second; Joseph Bennett, third.

Funeral design, wreath of chrysanthemums, frame not to exceed 24 inches—Joseph Bennett, first; Wilshire Bros. and John Eddy & Sons, equal, second; P. McKenna & Son, third.

Adrian, Mich.

Supply and demand have been the same as usual, with prices about 10 per cent. lower. There was no special call for certain varieties in early and mid-season stock; pink and white sold best.

In late varieties Goldmine and Nagoya sold best in yellow; William H. Chadwick and White Bonnaffon in white, and Lavender Queen and Xeno in pink, respectively.

Of the new varieties of last season Walter Molatsch and Monrovia are valuable additions to the early yellows; Primo, early white, is also very good. Orizaba is a very fine mid-season pink and Col. D. Appleton is the best mid-season yellow introduced since the arrival of Modesto. In the late section White Bonnaffon, white; Goldmine, yellow; Lavender Queen and Superba, pink; and Intensity, crimson, have all shown up well.

We have received C. S. A. certificates on the following varieties: Iolantha, Omega, Mrs. Ritson and Mrs. Elmer D. Smith. The latter is an extra fine variety, and we think will supersede Major Bonnaffon.

For best 12 kinds of cut blooms as exhibition varieties, the following are the best with us: Merza, Orizaba, Col. D. Appleton, Idavan, Bruant, Chito, Rustique, Iora, Mrs. F. A. Constable, Lady Hanham, Lady Anglesey, V. Morel and Modesto.

Best six cut blooms, Merza, Col. D. Appleton, Rustique, Orizaba, Idavan and Bruant.

Best vase of yellow, Col. D. Appleton; white, Merza; pink, Orizaba; red, Shilowa; bronze, Rustique.

Pompons are not largely grown here and are used only on special occasions.

We think it practically impossible to make a revised classification of chrysanthemums in this country, as the types have been so intercrossed that two men equally versed would disagree on many varieties. NATHAN SMITH & SON.

FOUNDED IN 1888.

FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the trade in general.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO. LTD.

2, 4, 6, 8 Duane St., New York.

P. O. Box, 1697. Telephone 1854 John.

REGISTERED CABLE ADDRESS: Florex, New York.

SUBSCRIPTION, $1.00 PER YEAR

To United States, Canada and Mexico.
To foreign countries in postal union $2.00.
Payable in advance. The date on the address label indicates when subscription expires.

CHANGES OF ADDRESS.

When notifying the publishers to send the paper to a new address, give both old and new addresses.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISEMENTS, $1.25 PER INCH.

Special positions extra.
No advertisement less than 75 cents.
Discounts on continuous advertising.
For rates, on Wants, etc., see column for classified advertisements.
Copy must reach this office not later than Thursday in order to secure insertion in issue of the following Saturday.
Orders from unknown parties must be accompanied by cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The FLORISTS' EXCHANGE are headquarters for all standard books pertaining to the Florist, Nursery and Seed interests. Catalogue sent free on application.

Contents.

Shipping Tags and Labels.

Daniel B. Long, Buffalo, N. Y., sends us this week tag and label ideas in three-color work, one a Meteor rose, the other a geranium, both very striking and serviceable to those shippers, specialists in these lines.

Culinary Topics, a new magazine published in Boston, is offering prizes for articles on floral subjects, and announces that such articles will be published throughout the year.

Fall Shows of 1900.

The reports received from the various centers at which exhibitions have been held during the season just past, indicate that the Fall shows this year have been generally satisfactory, both from an exhibition standpoint and financially, our Canadian friends being among the exceptions so far as the paying qualities of the exhibitions are concerned. This general result, largely due to the improvement in the quality of the stock shown, and the greater publicity given the undertakings by the daily press, is all the more gratifying when are taken into consideration the various factors that militate against success which have had to be contended with, among them the presidential election, always a disturbing element so far as attendance is concerned; the inclemency of the weather, and the fact that the parks in the large cities where exhibitions have been given also have provided free flower shows for the delectation of the public. It has been observed that in places where exhibitions have been held with a free admission, the people have attended in overwhelmingly large numbers, proving conclusively that the flower show is still as popular as ever, and offering a suggestion that the price charged for admission may have had something to do with the restricted attendances which have heretofore characterized some of the flower show ventures.

In several instances it has been noted, with regret, that the trade has shown less inclination than formerly to put up exhibits, and that, too, in the face of the great inducements offered by the premium lists. This condition is one that is hard of explanation. The florist's trade is by far the greatest beneficiary from the flower show, and it would seem that every effort put forth to provide such, would receive the unstinted indorsement and support of the commercial grower. In later years, however, the very laudable endeavors of the leading horticultural societies to furnish floral exhibitions have not had accorded them the assistance from the trade which they ought and do assuredly merit. Too many of our growers have been content to allow the private gardener and the amateur to assume the burden of making the necessary display, while the commercial man has sat quietly by and drawn his share of the accruing benefits, believing that it "pays" him better to make a private show at his greenhouses with consequent less trouble and expense. We do not think there is any justification either for this belief, or the apathy to the general flower shows that it begets. Every man at all interested in his business should also be interested in the exhibitions occurring in his district to the extent of lending them his willing support. No greater evil can befall the florist trade than that the commercial grower should hold aloof from the flower show.

The beginning of a new century will be a good time for the trade to turn over a new leaf in this respect, and we hope that the shows of 1901, cordially supported by professional growers and amateurs, will set an example the like of which has heretofore never been witnessed. To this end, in some one of our large cities, the Chrysanthemum Society of America will, it is believed, afford every encouragement.

The inquiry has lately been made by some of the less optimistic, as to whether flower shows are not on the wane, and if societies are not more useful as a means for holding meetings for the discussion of horticultural and agricultural matters, rather than in promoting exhibitions. The first part of this question is, we believe, fully answered in the negative by the results attending the majority of the exhibitions this Fall, while Professor Bailey in his "Cyclopedia of Horticulture," furnishes a reply to the second query in this wise: "A leading value of an exhibition is to maintain a society. The annual or periodical show keeps alive interest in the society and thereby enables the society to extend its beneficent work." In other words, the creation of an exhibition gives all of the members something to do and prevents the society, or club, from falling into that innocuous desuetude, which the discussion of horticultural and agricultural matters, purely and simply, sooner or later, will plunge it. The horticultural society or florists' club that flourishes the most is the one that works the hardest; the one that sets itself a task, the accomplishment of which necessitates the earnest endeavor of every member; and as flower shows tend to this consummation they are to be encouraged. We would also refer our readers to some good advice on this subject appearing on page 1177, this issue, under the heading of "A Local Horticultural Society."

Spot Disease of the Violet.

We have been favored with a copy of the Bulletin on this subject, mentioned in last week's issue, page 1146, from which we make the following extracts. Mr. Dorsett says:

The conditions favoring the development and spread of the fungus may be considered under two heads, viz., natural conditions and artificial conditions. Among natural conditions those of the damp, warm, cloudy weather of the summer season are the most difficult to modify or control.

Conditions of this nature are almost invariably present during the months of August and September. The days are long and usually hot and dry, followed, as a rule, by cool, moist nights. The plants at this time are subjected to extreme changes, viz., from the hot, dry atmosphere during the day, which frequently causes them to become wilted and remain so for several hours, to the cool, moist atmosphere of the night, which causes them to become excessively turgid. Conditions of this kind induce a rapid, weak, soft, or succulent growth of the plants which is particularly subject to disease and at the same time favors the germination and development of the spores of the fungus. It is at this season of the year, as a rule, that the spot disease is most abundant and destructive. This is the time for great vigilance, and every condition influencing plant growth must be made as favorable as possible to a hardy, healthy growth which will be able to withstand the attacks of disease. The grower who is able to accomplish this and tide his plants over this critical period of their growth in a comparatively healthy condition is fortunate, and, as a rule, has little to fear from the disease during the remainder of the season.

Artificial conditions include those wholly or in part under the control of the grower. They are too often neglected, resulting, as a rule, in disease and consequent loss and discouragement. They may be enumerated as follows:

(1) Not keeping the houses or frames clean, fresh and sweet by frequently repairing and painting them and by removing and destroying rubbish of all kinds as soon as it appears.

(2) Not keeping the plants clean and in the best possible growing condition at all times.

(3) Not selecting stock from strong, vigorous plants that have been entirely free from disease.

(4) Not being careful to select only strong, vigorous, healthy stock from the cutting bed for planting in the spring.

(5) Not giving the proper attention to the selection and preparation of the soil, to the date and method of planting, and to the care and cultivation of the plants during the growing season.

(6) Not giving due consideration to the several varieties and their adaptability to the soil and location in which they are to be grown.

While the susceptibility of the plant to disease depends largely upon the way in which it has been grown, still, as a whole, some varieties are more susceptible than others; Marie Louise, for example, even under conditions most favorable to growth, is more subject to injury from spot than is Lady Hume Campbell. The former variety can be grown to perfection only under the most favorable conditions, but when thus grown it has no equal for size, color and excellency of flower. The hardier, more resistant and more prolific variety Campbell stands next to Marie Louise in quality of flowers, lacking only the deep rich color of the latter. The single varieties are, as a rule, more resistant than the double, though occasionally they are seriously affected.

Regarding preventive measures the following information is supplied:

So far as we are aware there is at present no effective remedy for this disease when it has gained a foothold. The principal fungicides in common use for the prevention and check of plant diseases have frequently been tried for this trouble, but with varying results. The experiments of the Division in spraying violets with some of the more important of these, among them Bordeaux mixture and ammoniacal solution of copper carbonate, seem to show that they possess little or no value in preventing the disease, while on the other hand they render the foliage worthless for bunching with the flowers, and thus occasion considerable loss and inconvenience. From the writer's experience and that of many others it would seem that the solution of this problem of controlling the disease lies in preventing it by giving careful attention to the production of vigorous, healthy, plant growth rather than in attempting to check the trouble after it has once gained a foothold.

The successful growing of violets free from disease and the production of flowers of the best quality are governed by a number of factors which must be kept in mind. The principal rules which should govern the grower are the following:

(1) Study carefully the behavior of the plants under the varying conditions surrounding them. Endeavor by modifying these conditions, when necessary, to secure plants of ideal development. Set the standard of excellence high and be satisfied with nothing short of its attainment.

(2) Grow the plants during the entire season where they can be given the conditions necessary for making a vigorous, healthy growth, and where they can be protected at all times from conditions likely to induce disease.

(3) Keep the houses or frames clean, sweet and in perfect condition for growing healthy plants, by repairing and painting them when necessary, and by removing and destroying all rubbish likely to harbor vermin or disease.

(4) Propagate only from healthy, vigorous stock of known parentage at the season most favorable to the plants.

(5) Select each spring none but perfectly healthy, vigorous plants from the rooted cuttings for planting into the houses or frames. Old plants are sometimes carried over, and occasionally yield a large crop of flowers. They are not as reliable as the young plants, however, and are much more liable to all kinds of disease. The best growers rarely use them if it is possible to secure strong, healthy young plants for spring or early summer planting.

(6) Keep the plants clean of yellow, dead or dying leaves, being careful to destroy them after removing them from the plants.

(7) Keep the plants free from insects and other animal pests.

(8) Give careful attention to ventilating, heating and shading the houses or frames and to watering, cleaning and cultivating the plants.

(9) Renew the soil in the beds each season before setting in the young plants by removing from eight to twelve inches of the surface soil and replacing it with that freshly prepared.

(10) Set the young plants early in the spring in the beds where they are to remain during the season, so that they may get well established before the hot, dry weather of summer makes its appearance.

Careful attention given to the above directions for a number of years will, it is believed, result in the production of a strain of plants that are not only practically disease resistant, but are also ideal as regards regularity and symmetry of growth, length and strength of flower stems, and yield, size, substance and quality of flowers produced.

A New Shipping Device.

E. H. Callahan & Co., 9 North Moore Street, New York, are introducing a triangular mail and express tube, on which they have applied for a patent. It is made of corrugated pasteboard, the corrugations running around the triangle, making the tube very strong. The boards are furnished flat, scored where two of the angles will come; the third angle is made by joining the edges with a gummed paper flap. Extension paper ends are also furnished which can be turned back inside the tube to prevent any loose contents from slipping out.

Florists' Supplies in New York for the Holidays.

While the demand for made-up baskets of plants during the holiday season is increasing year by year, it is a noticeable fact that there is less reaching out after new styles in baskets than formerly, and that retailers generally rely more upon the manner in which the baskets are filled than upon any novelty in the basket itself. The birch bark baskets are to be used more than any other kind this Christmas, and they are to be had in various shapes, also with different colored trimmings. Those finished in the dark green lufia are undoubtedly the best trimmed of any. The lufia gives such a moss-like effect that, combined with the bark, it reminds one at once of natural wood that has become partly overgrown with moss. This basket is made in many different shapes, and can be filled with plants of any color, being sure to look well.

The hamper shape is the most suitable where low-growing plants are desired; while for taller effects the round basket, with a high handle, is to be preferred. One style of the high-handled, round basket has been made, with lufia arranged around the edge so that were the handles only missing it would pass easily as a corset model. Whether or not the makers had this aim in view we do not know. The basket will, for this very reason, no doubt, find but a limited demand.

As regards other goods, judging from the stock seen, the quality of the holly this season is all right. S. J. Limprecht, 119 West 30th Street, has contracted for an unusually large number of cases of guaranteed quality, and from present indications there will be no advance on last year's prices. Mr. Limprecht also expects to have a good supply of ground pine, though shipments thus far have been smaller than half of the quantity ordered, owing to early snow falling and stopping the operations of the pickers. On this article there will probably be an advance in price.

Bronze galax leaves are coming in in fine condition now.

Reports on the supply of domestic mistletoe are to the effect that a choice crop may be expected.

Besides the natural green business, Mr. Limprecht carries a full line of florists' supplies.

H. A. Bunyard has added an annex for the handling of his extensive business in all kinds of greens by temporarily taking the vacant store at 46 West 28th Street. Green and bronze galax leaves, cut ferns, holly, wild smilax, and all available green stocks are always on hand, and with the additional space at command he will be enabled to handle with ease an immense holiday trade.

Sigmund Geller, 108 West 28th Street, has a very complete line of baskets, covering all the newest designs, and an immense stock of immortelles. A recent importation of French baskets in various colors proved about the quickest sellers on record.

Reed & Keller, 102 West 25th Street, have three floors filled to overflowing with supplies, and by next Spring expect to occupy the whole building in which they are located, for the manufacture and display of their goods. In addition to the three floors, they have a cold storage warehouse located across the street for their green goods. In wire work they have a complete line. Among their new designs are several forms of casket crosses, some being made with short supports, so that they can be filled solid with flowers and stand upon the casket without marring their beauty. Another of their latest devices is the extension circular canopy. This is a creation that can be made any height up to 10 or 12 feet. A large circle stands on a pedestal. Around the circle are placed, at intervals, 14 cornucopia glasses, in which bouquets of flowers can be put. When these cornucopias are filled and the circle and pedestal draped with vines a beautiful setting either for church or parlor decoration is the result. Baskets of every description are on hand here, among them some pretty effects in birch bark, bound with willow; while for pot covers, some daluty effects are produced in lufia.

L. J. Kreshover has opened a branch store at 173 Greenwich Street, where a full line of florists' supplies, holly and other greens are on hand for the holidays.

C. S. Hendrickson, 315 Washington Street, Cleary & Co., J. C. Vaughan, Wm. Elliott & Sons and Stumpp & Walter Co., will all have supplies of holly. A. Rolker & Sons have a full line of immortelles, baskets, jardinieres, etc.

Emil Steffens' specialty is wire designs, and he has always a full supply.

New York.

The Market.

The inclement weather experienced in the beginning of the week had a very depressing effect on the cut-flower business. Added to this, stock has become much more plentiful, and prices necessarily have dropped on the ordinary grades of both roses and carnations, as well as for bulbous stock, such as Roman hyacinths and Paper White narcissus. The quality of American Beauty is not as good as it was, and while some so-called specials go at 35c. each, others, that are strictly special, bring 50c. Bride and Bridesmaid have been quite a drug; many have been carried over and ultimately sold in job lots for funeral work at ruinous prices. Liberty roses, while not very plentiful, are seen in various stages of perfection. Some flowers have realized as high as 20c. each, others only 4c. There has also been a fair supply of good Meteor, which has met with good demand.

Chrysanthemums play but an unimportant part in the cut-flower business of this city after Thanksgiving, and although a limited quantity is still coming in, no fancy prices are obtained.

Violets, while not in very heavy supply, have, owing to the disagreeable weather, accumulated in the hands of the dealers; and such stock is now being handled by the street venders. When this is the case it is a sure indication that violets have got down to 50c. or less.

There is a limited quantity of lily of the valley, for which $5 can be realized; for a greater supply, however, it is difficult to obtain $2.50 and $3.

Roman hyacinths are a drug at present, and fail to clear out even when offered at $1.50 and $2 per 100. Paper White narcissus are in the same condition; many more are coming in than the wants of the trade warrant; $2 per 100 is the highest figure asked for narcissus.

Carnations have become much too plentiful for the demand, and quantities of the ordinary kinds have been sold as low as 50c. per 100.

Among the retailers there is a general feeling that the coming Christmas will see the biggest business on record. Plants have, however, come to be such an important feature for this holiday, that whether this prophecy (if it comes true) will pertain much to cut flowers or not, cannot be determined until Christmas is over.

Jottings.

The regular monthly meeting of the New York Florists' Club will be held Monday evening, December 10, in the rooms, corner 27th Street and Broadway. The election of officers for the ensuing year will take place, and a report from the committees on the proposed flower show for 1901 will be presented.

The last sales in the auction rooms for this season will probably be held on Friday, the 14th inst.

Visitors in town this week were H. H. Battles, Philadelphia, Pa., and W. R. Smith and W. F. Gude, of Washington, D. C., who were here attending the banquet of the St. Andrew's Society at Delmonico's on Friday, November 30.

The regular meeting of the American Institute, horticultural section, occurs Wednesday next, at 2 p. m., at the Berkeley Lyceum. Orchids will be the subject discussed. At 4 p. m. will be held, in the same building, the meeting of the Horticultural Society of New York, when Dr. Britton will talk on the subject of "Botanical Gardens and Museums Abroad."

On Thursday next, December 13, the New York Florists' bowling team will play a return match with the Flatbush boys on the latter's alleys. Monday being the day of the Florists' Club meeting, the bowlers will meet in the afternoon of that day.

John N. May was in Boston a few days this week on a business trip.

Review of Chrysanthemum Market.

(Continued).

Baltimore.

The chrysanthemum season has been satisfactory; the demand was steady and, this year, as good as ever before. Prices have ruled about 20 per cent. lower than last year; but the cause of this may be found in the inferior quality, or better, perhaps, the smaller size of the flowers offered for sale; $2.50 to $3 was a fair average retail price obtained this year.

While in a small measure the chrysanthemums may have taken the place of roses and carnations, they certainly have created a market for themselves and have become an established, regular source of income to many growers. Prominent market gardeners hold that the chrysanthemum season is about as profitable as the bedding-plant trade in Spring, and from a cultivator's standpoint, chrysanthemums are found to be the best crop to be combined with bedding-plant growing. The only men who may find reason for complaint are the rose and carnation growers. But our market has always shown a decided falling off in the supply of these flowers with the advent of the cloudy November days, so that other resources are actually necessary to meet the demands of the opening season; and, on the other hand, the rose growers and carnationists can make good what little loss in sales they do experience through the chrysanthemums, by strengthening their plants for a better Christmas crop.

Chrysanthemums are used nearly exclusively for decorating, i. e., they are not worn any more by either ladies or gentlemen, but every household has its vase or vases filled with the flowers, and they form the predominating element in church and house decorations, as well as in funeral work.

Incurved, medium-sized flowers sell the best. In color white leads, and then follow pink and yellow, while for decorating only one color is generally used. The majority of chrysanthemums are sold in collections by the dozen, and then a red or crimson flower is generally added, more as a curiosity than for the sake of its color.

Early chrysanthemums are the most profitable; as the market gets filled the prices gradually decrease, but there is an appreciable reaction of prices again toward the end of the season. Thanksgiving Day is the banner day for chrysanthemums.

Willowbrook is the favorite early white, with Bergmann second. Lady Harriet is now the popular early pink. In yellow Fitzwygram, Robert Halliday and Harry Parr are the pioneers. The leaders in different colors are:

WHITE—Robinson, Arline, Ivory, Queen, Mrs. Jerome Jones, Mayflower, Niveus.

PINK—Viviand-Morel, Shaw, Mrs. Perrin, Maud Dean, President Smith, Ivory, Jones, Mrs. Jenkins.

YELLOW—Bonnaffon, Georgiana Pitcher, Bramhall, Modesto, Mrs. Trenor L. Park, Golden Wedding.

RED—G. W. Childs.

A new Baltimore seedling of merit is Joseph W. Cook (John Cook), an early pure white, reflexed, especially recommendable as a pot plant.

Our last exhibition, free to the public, was a success in attracting a great number of visitors; but it was necessarily a small show in comparison with former efforts. The Baltimore public in general is undoubtedly devoted to flowers; still they have been reluctant to pay the admission fees charged at the preceding shows, and this has led the club to discontinue the regular exhibitions. It is, of course, difficult to analyze public sentiment; but with an enthusiastic flower-loving public, which our Baltimore people are, the indifference toward supporting the regular exhibitions cannot but indicate that the people are not satisfied with the bargain they make in paying the gate money. And why? Probably because they can admire the same fine flowers in the stores or on the market stalls, etc., and even though a greater quantity is brought together in an exhibition hall, the opportunity of examining the individual blooms there is not better than that afforded by a walk through the markets or along Charles Street. And, in fact, has not the object of the chrysanthemum shows been attained anyhow? With us, the Queen of Autumn enjoys a popularity which it would be difficult to further increase; the shows have been held to make the public appreciate the merits of the flowers; the people have learned the lesson willingly and well; they paid for it and feel that they can keep *au fait* now without incurring any further expense. And perhaps they feel, too, that in the bargain they made at the gates of the show, the florist got all the profit—they paid for the advertisement which made them flower buyers.

Nowadays, the retailers in every branch of business go to extraordinary expense to attract the public's attention, and are glad to have an opportunity to show to their customers what they want to sell, free of charge. For the shows which we have held we cannot claim any higher standard than that of a good retail trade exhibit; indeed, we had no other aim in view than to create a market for our produce.

This is probably the cause of the bad success of our late shows. The public has for more than ten years been invited again and again, to practically the same systematically staged collection of fine plants and flowers. Since the successful inauguration of the chrysanthemum shows in this city the showmen have not introduced anything of special moment to stimulate the interest of the public, while the store and market men have made great efforts to show the public, not only as fine flowers and plants in their places of business as the showmen desire to exhibit for money, but their daily varying displays are generally arranged in artistic and original designs.

The shows of the old style have outlived themselves; the public do not patronize them so freely any more, because they are out of date; not because the public are tired of going to shows. We have to aim higher, as everybody advances around us; we have to show progress in our exhibition. We have exhibited the individual plant and flower for a score of years, all the time the grower has given examples of his skill; but nowadays the grower is not in touch with the public any more. Progress has developed matters differently; there are the wholesale dealer and retailer between him and the public. Let the man in daily intercourse with the public take the lead in exhibitions now; let us show the best we can raise and arrange it to produce the best possible effect, let us show the public the many forms and ways in which the product of the gardener's skill may be enjoyed; let it henceforth be an exhibition of "ornamental horticulture" of floral art, an exposition of what the combined efforts of all the special branches of our profession can create.

On such a broader basis, the landscape gardener and floral artist will find a field to execute works of art which are beyond the scope of the ordinary business; such a show would attract the public and stimulate interest in horticulture; at the same time it would help to elevate our profession socially. Our shows would not be behind the up-to-date flower-store decorations and perhaps be successful financially again, as they were years ago when they were something new.

T. E.

Hamilton, Ohio.

I find that the supply of chrysanthemums this year has been about the same as last year, and the sales have averaged as good as those in 1899. With me, first-class flowers brought $3 per dozen, with a few dozens of Chadwick and Eclipse, 1898, bringing $4 and $5. Small flowers from pots and three to a plant ran from 50 cents to $1.50 per dozen. The early demand for small flowers was limited on account of outdoor stock, but that did not affect the better grades. I am not so much in favor of the very earliest. My experience has been that varieties like Robinson, etc., are early enough.

In pot plants, well-grown, six-inch stock sell well, and a fair supply of eight-inch and ten-inch pot plants can be handled at a fair price; six-inch bringing here 35 cents each; eight-inch, 50 cents to 75 cents; ten-inch, from $1 to $2 each.

I grow a very limited variety, and will name them here in succession of merit. Fred Walz, pink; Ivory, white; L. Canning, white; Georgiana Pitcher, A. H. Fewkes, W. H. Lincoln, Bonnaffon, yellow; Casco, claret, and Louis Boehmer, magenta. There are other varieties which can be used, but I hold close to the foregoing kinds. The most of the six-inch plants I sell for All Soul's Day; these must be fairly early, but a good many of the ones mentioned come early enough. All of the varieties I use for the larger sizes, and find, for ten-inch, none are better than Fred Walz, Ivory and Casco.

Now as to cut flowers I find the best sellers are in white, Mrs. Robinson, Adula, Mrs. F. A. Constable, White Swan and Wm. H. Chadwick; for smaller flowers the best paying ones are Ivory, Robinson, Adula and Chadwick, and, if well done, Mrs. Jerome Jones will yet remain in this list of exclusives; but I think Chadwick pays me better.

In yellows I start with R. Hooper Pearsen, Georgiana Pitcher, Golden Wedding and Eclipse, 1898, as well as the early Mrs. O. P. Bassett. All of these do well in their season.

For pink, I have Adele for first, closely followed by John K. Shaw, Viviand-Morel, Mme. Felix Perrin, Mrs. S. Murdock and Xeno. The best of them are Shaw, Murdock and Xeno, but all sell very well, except Perrin, which must be handled quick, when at its best. Of other colors I cannot say much; none of them is in a hurry to get away from me. I grow a few for variety of Mrs. Geo. West, Geo. W. Childs, H. J. Jones; a few bronze, such as Colonel Smith, Marguerite Joffords, and a good supply of Henry Nanz, the yellow bronze sport of Mrs. Jerome Jones.

I grow a good many more; among them Bonnaffon, Lincoln, Walter Molatsch, Mrs. H. Weeks, Evangeline, Queen of Plumes and others which seem to sell in certain localities; but I simply speak of my best sellers.

Of the new varieties of last spring, I have tried Water Molatsch, yellow, which has not done much for me; R. Hooper Pearson, rather a fine color; Superba, a clean rose lavender pink, rather a nice color, but a little insufficient in foliage. White Bonnaffon did not grow with me worth a cent; Pluma has excellent points except color, which is weak and rather easy touched by dampness. H. J. Jones is high in color, red, but that is all. I believe Goldmine can do good work, though the petals are not heavy enough to suit me; but it is worth another trial. Colonel Appleton I did not try. I neglected to order it in time.

Of the new seedlings I have seen very few, and those I did see did not impress me much. I think it was a little bit of an off year.

The shows have been very limited in number, except club shows, in these parts, and they did not bring out very much competition.

The show in Chicago I did not see; neither did I make a display there, being one of those who promised to do so and did not keep my promise. I will say that if the gentlemen in Chicago get promises for a liberal display, they ought not to cut their premium list in two after they obtain these promises. I believe that if a first-class show is desired, we ought to be willing to give first-class premiums and plenty of them, so that a man can make his expenses. The fact is, the glory in Chicago don't count for much in Hamilton, financially, and that, finally, is the main point.

Exhibit of James Wolfe, Waco, Texas, at Show of Texas State Floral Society.

For myself I have given my people here notice for the last three years, through the daily papers, that I will have a free show all through the season, and that every one is welcome, and the plan works well with me. I get plenty of visitors and through them make good sales.

As far as the classification is concerned, I will say that in my opinion it is a very important question. At the present time there are no proper lines drawn, and it is nothing but a mix up. Why does not the Chrysanthemum Society of America take up the matter and appoint a committee to revise the different classes on strictly comprehensible lines? Have we not in that society men fully competent to do this work? Men like G. P. Rawson, Elmer D. Smith, E. G. Hill, John May and others.

Gentlemen, it is a knotty affair, I admit; but it would make your name shine out with renewed lustre for all time.

Before closing I will add that there is plenty of room for growing good flowers at fair prices, and there is plenty of room to improve on the varieties we have. We may increase the size yet, if we want to, but I think color is at present the main point to work for, anyway, outside of yellow and white; and a far finer finish is in sight for all colors. I really think that we ought to be able to produce flowers of twelve inches in diameter and twelve inches deep; and, as far as color is concerned, can we not get as high as we are in carnations, if we try? All we require is the will; nature will do the rest, if we work her in the right direction. If we do not accomplish it all at once there are generations to come who can take up the work where we leave off.

THEO. BOCK.

Newport, R. I.

Regarding the chrysanthemum season in Newport, as far as I can learn the demand for cut flowers was fully equal to past years with no change in prices. The early varieties sold best; among these were Independence, Mrs. H. Robinson, J. E. Lager and Marion Henderson, followed later by Mrs. Weeks, Peter Kay, Major Bonnaffon and Vivand-Morel; and still later by Mrs. Jerome Jones, Eugene Dailledouze and Maud Dean. The whites and yellows were most in demand, pink coming next, and only a few calls for red; John Shrimpton being the variety most commonly grown of the latter color.

Minerva, which has been quite commonly grown as a yellow, is being given up on account of its poor shipping qualities; on the other hand, L. Canning and Joseph H. White in white, although not up to the present standard in size, are still grown for their good shipping and keeping qualities.

The exhibition held by the Horticultural Society was as popular as ever, yet the stormy weather somewhat affected the attendance. The membership of the society continues to increase, being drawn chiefly from the ranks of those not directly interested in the trade.

As regards cut flowers, I would name as best twelve: White, Eureka, Mrs. Weeks, Jerome Jones, Frank Hardy; yellow, Colonel Appleton, Peter Kay, Golden Wedding, Pennsylvania, Major Bonnaffon; pink, Viviand-Morel, Maud Dean; red, John Shrimpton.

Had a longer list been called for some of the following would have been named: Rustique, Inter-Ocean, Charles Davis, W. H. Chadwick, Kate Broomhead, Mrs. Trenor L. Park, Mrs. George West, Australie, Western King, M. Jeffords, Mrs. Carrington, Oakland, Shenandoah.

Best vase of yellow, Colonel Appleton; white, Eureka; pink, Viviand-Morel; red, John Shrimpton; bronze, Rustique.

I don't think that there is much chance of pompons becoming popular here for some time to come—the rage is for something big; and yet a plant of the Japanese anemone flowered variety, Garza, was much admired while the show was in progress.

The chrysanthemum rust, which made its appearance in many places here last season, does not appear to have made much headway. One grower has found that by carefully cutting away all old growths after the plants are through blooming, and using Bordeaux mixture liberally, that the young shoots then rooted have been perfectly clear of the disease; but that the same stock plants, when propagated by division, have, upon the approach of warm weather, invariably shown the disease, necessitating the destruction of the lot.

MAC.

New Chrysanthemum, Mrs. W. B. Chamberlain.

New Pompon Chrysanthemums. Grown by John N. May, Summit, N. J. (See Descriptive Text).

Toronto.

The chrysanthemum has been as popular as ever here, so far as I am able to judge. Several of the growers say the flowers have not sold so freely as formerly, but a close inquiry proves that there were considerably more grown this year than ever before; and as the great bulk was sold, and none of the retailers will own to having thrown many away, also that prices were as good as in previous years, I think the chrysanthemum has quite held its own.

The earliest variety seen here was, I think, Marquis de Montmort, which was offered very early in October; followed by Marion Henderson, Yellow Queen, and Bergmann. All of these early varieties sold well at good prices. After Bergmann came many sorts, and prices for a time were low; but all through the season good specimen blooms brought fairly remunerative figures. An immense quantity of Ivory, both pink and white, was offered, but good, well-finished flowers generally sold well. Mid-season varieties that appeared to find most favor were Mrs. Jerome Jones, Mrs. Weeks, Major Bonnaffon, Modesto, Mrs. Perrin, and Viviand-Morel. The later varieties were Ladysmith, Golden Wedding, and Toronto. Miller & Sons' fine new sort, Timothy Eaton, has been sold by the departmental store after whose proprietor the flower is named. The blooms were quite an attraction. This is a fine bold flower that lasts well.

George Hollis, to whose patient work we owe this and several other fine varieties, exhibited another, on the same style, at the last meeting of the Gardeners and Florists' Association. It was awarded the society's certificate of merit, and well deserved it. The stem and foliage are all that could be desired, and the flower is as good and as big as the biggest.

But few pompons were grown here, and those offered were small plants and not of the best varieties. I believe that a few good, well-grown plants of choice varieties of pompons would sell well here, but my opinion is not shared by many of our retailers.

Plants were not much in demand. Good cut flowers would always bring the grower more money than would the blooms on the plants.

T. M.

St. Paul.

The chrysanthemum has been rather disappointing to the growers in this vicinity this season. While the supply has been fully equal to that of former years, the quality has not been as good, and this has somewhat curtailed the demand.

Fitzwygram was the first to bloom, but on account of its poor flowers is hardly worth considering. Mme. Bergmann came next with blooms fully equal to those of former years, and entitling it to be classed as a first-class, No. 1, early sort. Yellow Queen was very disappointing and not worthy of further trial. Yellow Monarch was of medium quality, but hardly up to the standard of former years.

The most disappointing variety of all this year is Mrs. H. Robinson, which had such abnormally weak necks that not one flower in 20 stood erect, while the petals dropped very soon after cutting. Mrs. H. Weeks presented a nicely formed large bloom, but the petals fell as soon as the stem was stirred. Western King was also very disappointing, as it fell to pieces very quickly on being handled. Australian Gold, while somewhat better than the last named, was second class. I almost forgot to mention Maud Dean, that splendid standard pink which seems to thrive and is first class in all places and at all times, under adverse circumstances and in well-favored conditions. This year has been no exception, and this variety, as usual, has been first class.

Ivory, the old favorite, was as good as usual, flower of good substance and of fine lasting quality.

If there is one chrysanthemum which stands out preëminently the best, and which can always be relied upon for good blooms, that one is Major Bonnaffon. It is and always has been in this section of perfect form, large size, majestic appearance, a peer among its fellows. If you can only grow one variety, that one should be Bonnaffon.

Golden Wedding has been very fine; flowers of immense size and good substance, stems long and very firm and stiff. Pennsylvania has exhibited all the fine qualities promised at its introduction. Philadelphia has been perfect. W.

Holly Wreaths. Only first-class materials used—fresh green leaves plentifully clustered with berries. In ordering be sure and state sizes wanted and number of berry clusters desired on each. Goods shipped at proper time or on your order, carefully packed. Prices are most reasonably low.

Nursery Stock. All varieties of fruit—Peach, Pear, Apple, Plum, Cherry, Apricot, Quince—every one warranted true to name. Have an extra fine block of Japanese Plum.

Plants. Can furnish anything you wish in plants.

☞ Goods are the best. Prices are low.

Write for Particulars. **W. W. PULLEN, Nurseryman and Fruit Grower, MILFORD, Del.**

Mention the Florists' Exchange when writing.

H. Lincoln has produced perfect flowers of its type. It would be hard to improve on this variety. For a red, John Shrimpton has been first class in every particular. In the less common sorts, Yanoma and Kate Leach have both been disappointing. Viviand-Morel has fully maintained its reputation for being a first-class pink. Mrs. Jerome Jones has done well, and is, commercially speaking, a most profitable sort.

To briefly name the best sellers in the order of their blooming I would submit the following list: Mme. Bergmann, Mand Dean, Ivory, Major Bonnaffon, Golden Wedding, Viviand-Morel, Pennsylvania and Philadelphia.

There have been no exhibitions held here and the chrysanthemum show question seems with us as dead as in the wilds of Africa. At the same time, the buying public appreciate a good thing and know it when they see it, and there is an ever-increasing demand for good chrysanthemums. Prices have not averaged as high as in former years, though first-class stock has sold at nearly the same rates.

To the long-continued warm weather the growers attribute the poorer quality of stock. The plants were overforced and produced soft, sappy stems, ripening up late, and much of the substance which should have gone to the blossom went to the stalk instead. The cooler weather had a good effect on the later varieties, as nearly all of them were of good form and substance. VERITAS.

Louisville, Ky.

The supply of chrysanthemums during the past season has equalled all previous years, and the quality has been as good. The demand has not been as great as in previous years, being more for small and medium-sized flowers than for the extra large blossoms.

At the individual shows given by several of the local florists the attendance was not as good as in previous years, but several counter attractions at the same time may have been the cause of this.

Regarding the future of pompon varieties I cannot speak, as not enough have been shown to give a proper verdict. The present season has demonstrated that the future demand for chrysanthemums will not be for the extra large blossom, but for well-shaped, good-colored medium-sized flowers. J. S.

Seedlings Certificated by C. S. A.

IOLANTHA, a Japanese incurved pink, exhibited by Nathan Smith & Son, Adrian, Mich., October 20. Its extreme earliness was taken into consideration by the Boston committee in granting the certificate. Scored 85 points at Boston and Cincinnati.

PEERLESS, a white Japanese variety, exhibited by George Hollis, South Weymouth, Mass., October 27. Scored 85 points at Boston.

OMEGA, a yellow reflexed Japanese variety, exhibited by Nathan Smith & Son, October 27. Scored 87 points at Chicago.

JOSEPH W. COOK, exhibited by John Cook, Baltimore, a blush white Japanese reflexed variety, November 3. Scored 89 points at Philadelphia.

D. JOSEPHINE, a bright yellow incurved Japanese, exhibited November 3 by William Kleinheinz, gardener to P. A. B. Widener, Esq., Ogontz, Pa. Scored 89 points at Philadelphia.

BRUTUS, Japanese reflexed variety, terra cotta red, exhibited by John N. May, Summit, N. J. Scored 87 points at New York November 3.

YANARIVA, a flesh pink Japanese variety, exhibited by John N. May November 10. Scored 86 points at Cincinnati, 93 points at Boston, 86 points at Philadelphia.

NELLIE, a creamy white Japanese incurved, exhibited by H. W. Rieman, Indianapolis, November 10. Scored 87 points at Cincinnati.

MRS. ELMER D. SMITH, exhibited by Nathan Smith & Son, November 10, a yellow Japanese incurved variety. Scored 93 points at Chicago; exhibited on November 17, the same variety scored 90 points at Philadelphia; 94 points at Boston; 93 points at Cincinnati.

No. 19, a bright yellow Japanese incurved variety, exhibited by H. A. Molatsch, Brooklyn, N. Y., November 17. Scored 87 points at New York.

MALCOLM LAMONT, crimson, reflexed, exhibited by E. G. Hill & Co., Richmond, Ind., November 17. Scored 85 points at New York; 90 points at Philadelphia; 85 points at Cincinnati.

MRS. W. B. CHAMBERLAIN, light pink reflexed Japanese, exhibited by John N. May November 17. Scored 85 points at New York; 88 points at Boston.

TIMOTHY EATON, white, Japanese incurved, exhibited by Miller & Sons, Bracondale, Ont., November 17. Scored 92 points at Philadelphia; won C. S. A. trophy at Chicago flower show.

MARY HILL, a pink incurved variety; exhibited by E. G. Hill & Co., November 17. Scored 89 points at Cincinnati.

CHESTNUT HILL, a yellow Japanese incurved, exhibited by John N. May November 24. Scored 85 points at Philadelphia; 88 points at Boston; 86 points at Cincinnati; 88 points at Chicago.

All of the foregoing varieties have been certificated under the Society's commercial scale.

The unanimity of the scoring by the various committees in cases where certificates have been awarded at different points, is most remarkable, testifying to the practicability of the scale employed, and also to the ability of the judges in the matter of its interpretation, as well as to the conscientious work performed. In only one case does there seem to have been any great diversity of opinion, and that shows a difference of seven points, all the other decisions being astonishingly close.

LADY ROBERTS.—This variety is the result of a cross between Minnie Wanamaker and Mrs. John H. Starin, and was raised by a Toronto grower. It seems to be almost identical with the variety Timothy Eaton; in fact, several large Canadian growers, who have seen both varieties growing, and have been able to watch them, consider Lady Roberts superior to the latter variety. Lady Roberts was recently exhibited before the Gardeners and Florists' Association of Toronto, and was certificated by that body. It is likely to prove a valuable acquisition.

The stock has been purchased by the F. R. Pierson Co., of Tarrytown, N. Y., who, as announced last week, have also acquired a large block of the stock of Timothy Eaton.

New Chrysanthemum, Zampa.

New Chrysanthemum, Mrs Elmer D. Smith.

New Chrysanthemums.

CHESTNUT HILL, clear bright yellow, of excellent form and substance. A Thanksgiving variety which can be shipped any reasonable distance with absolute certainty of reaching its destination in A1 condition. Flat petals reflex and incurved. A seedling from W. H. Lincoln, with equal constitution, but better form; 3 feet; terminal bud. Season November 25 to December 10. Certificated in Philadelphia in 1899; first prize in Philadelphia for best six yellow seedling 1900; and C. S. A. certificates at Boston, Chicago, Cincinnati and Philadelphia.

ZAMPA, old gold reverse, bright strawberry red; lower petals tubular, balance flat reflex, but full to center. An acquisition for exhibition purposes, with extra good stem and foliage. Average height, 3 feet. Terminal buds; season 5th to 15th November. C. S. A. certificate.

MRS. W. B. CHAMBERLAIN, a bold, handsome pink, with long ray petals drooping, the balance reflex and incurved, making it a very artistic flower, 4½ feet, good stem and foliage; terminal. Season 10th to 20th of November.

COLLECTION OF POMPONS.

(1) Lula, a lovely pure white, globular form.

(2) Gallia, a bold, handsome flower, deep pink; clean, healthy grower.

(3) Quinola, exhibited as No. 80, deep orange yellow; a bold, handsome flower, and one of the very best of this class.

(4) Miss Ada Williams, blush, shaded white, slightly laced with violet; a lovely thing; good size, spherical form.

(5) Klondike, the most brilliant yellow of the whole family; medium size and an extra fine variety in every way.

(6) Aileen, deep lilac pink, close, compact form, of medium size; free of ruts.

These were grown by John N. May, of Summit, N. J., to whom we are indebted for the photographs and descriptions.

Springfield, Mass.

The letter of Edgar A. Higgins about sweet peas at the Pan-American exhibition at Buffalo next year, printed in last week's issue, meets with the approval of some of the sweet pea growers in this locality. Buffalo is 500 miles from this place, but cannot the plan be carried out? Let us have the views of others interested.

The annual meeting of the Hampden County Horticultural Society comes December 12. G.

Latest Facts About New Carnations

Read by Albert M. Herr, Secretary of the American Carnation Society, before the Philadelphia Florists' Club, Dec. 4, 1900.

December 1, with many growers, is the beginning of the carnation season, and even where the grower is willing to have his season begin September 1, he will find many varieties refusing to do work at that date, not getting down to

New Chrysanthemum Omega.

actual business before now. Very often these lagging varieties are those of the preceding season's introduction. This fact makes it hard to give an intelligent opinion as to the merits of the "newer carnations" to-night, and is my apology for the shortcomings of this paper.

The introduction of carnation novelties has been so fast and furious that all of our varieties are "new carnations." We do not learn how to handle a variety, so as to get the best results

Chrysanthemum Mrs. Ritson.
White sport from Viviand-Morel.

from it, before another of the same color is introduced, and has so many points of superiority over the old one that the latter is discarded for the new, and another season or two of experimental growing started. It is this everlasting change that is responsible for a goodly portion of our failures.

Another source of failure with respect to novelties the season after their introduction is the pernicious habit of holding the delivery of cuttings until a late date in the winter or spring, instead of taking what good cuttings the plants produce right along and filling orders when stock is wanted. By holding all orders until a late date there are a number of deteriorating influences that are bound to have a decided effect on a portion of the stock sent out. If there is any demand for the variety worth talking about, orders will have to be filled, either with cuttings that have been rooted for some time and held over until the date named for delivery, or they will be filled from stock propagated later even than the already late date named. Another evil of this system, and the greatest of all, is the necessity of having an immense supply of cuttings for this special date, and if there is not a good stock of them rooted early there is danger of taking cuttings that should not be used, and taking so many from the plants at one time that these are weakened for subsequent propagating purposes. Carnations are not boxes of hardware, that can be manufactured and stored away for future delivery. The cuttings should be taken at that stage of their growth when they will make the best plants for next Winter, and the buyer should have them direct from the cutting bench as soon as they are rooted, if he so desires. His method of handling them after they are rooted and the introducer's may be entirely opposite, and it is more likely that he will know how to get the best results in his soil than the introducer of the variety. When this is more fully recognized there will be fewer failures with novelties.

As to last season's introductions, in order to do no one an injustice, I have secured opinions from a few different localities, and will give them as received, omitting only the name of the writer.

Starting with Boston, a letter dated November 22, says: "So far Ethel Crocker and Genevieve Lord have proved the best. The Marquis, Lippincott and Peru are not very promising, so far. Olympia, up to date, is not very free."

From New York I have two letters, dated November 15. One states: "Up to date the only sort satisfactory is Genevieve Lord. Crocker is a great disappointment, and so are all the others we have tried." The other letter says: "Lawson is, to date, the best of any of the novelties; Lord is also showing up well. Early in the season Crocker made a magnificent showing of growth and plant and set of buds; up to three weeks ago it was the finest bench of carnations on the place, with the exception of an unintroduced novelty It then commenced to stem rot, and over half the plants are gone. Those surviving are good plants; and what few flowers we get are as fine as one could wish. The Marquis made good growth in the field, but lifted poorly. It has proved late, decidedly short stemmed and, as far as we can judge, will be at its best during February and March."

From Chicago, November 14, comes the following: "We place Lawson at the head of the list. Olympia is very satisfactory, but we are undecided as as to whether it will displace Bradt. The Marquis has not, as yet, done well; it is late in flowering, but from present indications it will give a lot of blooms from Christmas on."

Maryland, November 17, gives the following: "Genevieve Lord is leading them all. Lawson is next, although with its short stems it has as yet brought little money. The Marquis follows with fine growth, but with flowers very scarce and few expected before Christmas. Crocker would be ahead of the Marquis were all the blooms good; a great many are streaked and of bad color. We believe this will disappear later. The variety blooms early and is comparatively free. Estelle. Olympia, Riley, Morning Glory look fairly well, but we see nothing in their favor worthy of special mention."

Pittsburg, November 15, says: "Bertram Lippincott is very free, and a healthy grower, splendid. Olympia is not doing much yet. Lawson is picking up nicely. Crocker is doing well; it is a free grower. The Marquis is healthy, a free bloomer and a good grower."

From Indiana, November 19 (not Hill), comes the following: "Ethel Crocker leads in pink, with Lord a second. Lawson and The Marquis show great promise for later in the season. Olympia did not make heavy growth in the field, but is doing nicely in the house. Peru is now coming in and looks like a continuous bloomer."

California (not Sievers) states: "Mrs. Lawson is O. K., with the exception of short stems for such large flowers. Estelle is a very good scarlet; will grow plenty of it next year. Olympia very good, but rather single. Crocker is best of all for Winter. Lord could be larger. Peru is lacking in form and does not keep."

Vase of Cut Blooms Chrysanthemums.
Exhibited by Hugh Graham, at Phila. Show.

My own observation of novelties is rather limited. What I have seen of Lawson would incline me to the belief that it will be a good carnation handled differently from what it has been this season. There is something lacking, and I think it is knowledge as to its habits, a knowledge that will be attained this Winter, and will no doubt place the variety with the standard sorts. The Marquis is apparently a late bloomer, and therefore a great disappointment at this time; it is to be hoped that its behavior later will make up for this early disappointment. Crocker is with me, and, as far as I have been able to learn, with all of my customers a decided success. Without wishing to boast or detract from any other variety, I want to say that I have plants of Crocker that will make from the date of their planting in up to January 1 as many as eighteen flowers per plant by actual count, and that out of the thousands of flowers I have cut up to this time I have had practically none that could be called seconds, either from lack of color, size or form. The failures with this variety that have come to my notice are nearly all with growers who feed their carnations pretty heavily, and this Crocker will not stand. Overfeeding will make it grow too strong, and the flowers will come off color and often bursted, or of poor shape. This may not apply to every soil, but it certainly does to mine. To get results that will place Crocker on its true merits, the plants should be of a good size in the field by August 20, or even earlier, and then housed into fairly rich soil, giving them nothing excepting good treatment as to watering and temperature, with possibly a little lime or good bone added to the soil some time during the Winter, when flowers are at a low ebb, as this addition of extra fertilizer will affect the plants at once both as to the number of flowers produced and their quality. In a few weeks, however, the effect will be worn off sufficient to get them back to their natural conditions, and this one application should keep them going for the balance of the season.

Next to Crocker in earliness, and a little ahead of it in point of productive-

New Chrysanthemum Chestnut Hill.

ness, is Genevieve Lord. The flowers are not nearly so large as those of Crocker and a portion of them come off color, the same as the blooms of old Grace Wilder used to do; but this latter trait can, I think, be eliminated by selection. Olympia, with me and as far as I have seen it, is ahead of Bradt in point of productiveness, and will no doubt become a standard sort. Peru is, up to date, lacking in form, has some bacteria and lots of rust; but it is pure white, and very productive, so that it may prove better than it looks. Elm City, a white that few growers have tried, is a model in form, full of petals, flowers almost as large as those of Flora Hill, and has up to date produced more blooms per plant than any other variety, with no sign of cessation; so that I think it will prove a stayer.

There is an almost universal complaint of stem rot from many sections, and the novelties all seem to be affected with an undue proportion of it. This matter will be brought up at the next meeting of the American Carnation Society and fully discussed, in the hopes of getting some information. We Lancaster growers have practically no trouble in this direction. Whether this is owing to the pure moral and religious atmosphere of our county, or the fact that we nearly all plant into solid beds instead of benches, or is simply a case of good luck, I am unable to say.

There are a number of new candidates that will be bidding for favor this season, all of which will be forcibly brought to our notice at the coming show of the Carnation Society. The usual number of seedlings are being now tried for their second and third year, and those growers who are wise will endeavor to have some of the flowers in good shape for the show in Baltimore next February. Baltimore will be the Mecca for all carnation men then, and the citizens of that city are waiting for us with the wide-open arms of true Southern hospitality.

Before closing I want to say that it is not always wise to give up the old varieties for the new, until you are sure of the new being the best. I saw at Henry Rohrer's place, in Lancaster, the variety Lily Dean, that left nothing to be desired in the shape of a striped sort; White Cloud, that seemed to lack nothing of being the ideal white; Crane, that filled the bill entirely for a scarlet, and Triumph, that will net him more money per square foot than any of the new pinks. From what I understand Dailledouze Bros. are as well off, with several houses of Scott, as if each plant were a share of Standard Oil stock; all of which goes to show that there is quite as much in the grower as in the variety, and that no judgment should be passed on a novelty until it is properly grown; then if it falls short it can be truthfully condemned.

We carnation growers are usually too positive in our opinions. As the years progress we will some day look back to the beginning of the century, and wonder how we could have had any positiveness at all with the varieties and methods then in vogue.

Nephrolepis Wittboldii.

Our illustration shows a bench of stock plants of the new Chicago fern—Nephrolepis Wittboldii—quite a sight. This fern is absolutely distinct from the Boston fern, and unlike any other. It is increased almost as readily as the latter. Its fronds are far more majestic, so much so, that we will not be at all surprised to find the fern, one day, grown extensively for its fronds alone, for decorative purposes. Plenty of these fronds on the stock plants in the benches are from two feet to 30 inches in length, and nine inches wide in the center; stout enough to hold themselves fairly erect, with an easy, gentle curve. Another noticeable feature is that in the unfolding of each individual frond, it perfects itself to the very tip, which is a rare thing, with most of the nephrolepis.

The Wittbold Co. report that they are well satisfied with the sale of this fern, and will surely continue its propagation on a larger scale than ever. Ess.

Decorative Evergreens for Christmas.

And as then all the summer trees are seen,
So bright and green,
The holly leaves their fadeless hues display
Less bright than they;
But when the bare and wintry woods we see,
What then so cheerful as the holly tree?
SOUTHEY.

"Christmas comes but once a year, and when it comes it brings good cheer," none the less to the woodsman whose product has its only inning at this the Christmas tide. A "green" Christmas is not so profitable to the "green goods" man; though perchance he is more able to procure the long list of evergreens now in use. He is in the business to sell, however, and not to buy; he leaves this to practical and withal sentimental customers; for what is the custom of decorations, but that of practice and sentiment as in use at this time of the year! There is scarcely a business more susceptible to the elements than his. Snow is his worst enemy before he procures his stock, and his best friend afterward for what is more pleasing to the eye than a bit of green, a holly sprig, when snow is flying and the crisp snow-covered ground crackles under foot? It is like a beacon light to the mariner, and carries you back to old times and all that Christmas means; it knits you to the past and drives away your sophistries.

The custom of employing holly and other decorative evergreens at Christmas dates from earliest records and is of considerable antiquity; it has been regarded as a survival of the usages of the Roman Saturnalia, or the old Teutonic practice of embellishing the homes with evergreens as a refuge for the sylvan spirits from the Winter elements. At any rate, the custom has grown to enormous proportions and is steadily growing. It has practically become a business by itself—a source of revenue to the backwoodsmen, the railroads and so ad infinitum.

As New York leads in all things horticultural, so undoubtedly she leads in the quantity of decorative evergreens, encompassing every variety used, and being the nearest and largest port, is the biggest importer of mistletoe. One has only to "travel over the town" to gain an idea of the magnitude of this industry, which lasts scarcely a month, is here to-day and gone to-morrow. On West Street, one would imagine himself transferred to the woods and forests of Maine; on Washington Street, to the swamps of Virginia, Delaware and New Jersey, or to the orchards of Normandy and England. Yet, as in the course of events and business the natural trend is uptown.

Of all other evergreens, holly takes precedence. It is not many years since a few armfuls sufficed for the demand, most of the supply coming from Staten Island and southern Jersey. Now the Southern steamship docks and railroad freight depots are piled mountain high with the familiar 2 x 2 x 4 cases of holly from half a dozen States, including Delaware, Virginia, Maryland, and even Alabama.

It would not be well to go into statistics, as at best they are erroneous and misleading. A word to the packers and shippers, however. Good holly will always command a good price in New York; the poor stock usually finds its way to the dump pile. Two years ago more than 3,000 cases were left on the docks. One could get holly for paying the freight. Now the railroad companies force the consignor to pay freight in advance; hence less holly and better holly; so that last year the day before Christmas holly realized $6 per case, with just enough to go round at that. Of course this applies to holly shipped in on commission, and shipped to be sold at the market price controlled by supply and demand and the quality of the stock, which can readily be understood not of the best, as the "cream" is usually picked up by the big dealers, who either buy or guarantee a certain price, less charges.

That is one of the practical sides of the holly question. It may interest some to know that there are many popular superstitions connected with it. By some it is deemed unlucky to introduce holly to the house before Christmas eve. (Here, Thanksgiving practically opens the holly market, and it can be seen in all the florists' stores on that date.) It is also cherished by some after hanging in the sanctuary; and in Germany a well-berried piece hung in the doorway was considered a protection against thunder. Here, in "God's own country," it is an evidence of good cheer and good fellowship; and the humblest home will secure the smallest piece. Christmas without holly or mistletoe would be like Christmas without turkey.

In popularity, outside of its practicability, mistletoe might come first with some, at least a good second, with its ancient superstitions and customs. Botanists call it Viscum album. The American variety is well known, and comes chiefly from the Southern States, and, usually, packed in barrels, soap boxes, shoe boxes, and crates of assorted sizes, besides the imported stock from England and the orchards of Normandy. This latter is almost an unknown quantity; and the man who invents a way to get it here in perfect condition should be awarded the "Victoria Cross" or the "Cross of the Legion of Honor." Who has not heard of the song "Under the Mistletoe Bough," made immortal by Thomas Haynes Bayly, and of the story connected with it and attending legends? In ancient English history we read of the Druids cutting the mistletoe from the oak trees with a "golden hook," and in mythology of Balder, the Scandinavian Apollo, killed by an arrow made from mistletoe wood, given to the blind god Hoder by Loki, after which the sacred bough was placed under the care of Frigi, never again to be used as an instrument of evil. And so the mistletoe is consecrated to earth, the empire of Loki, and is suspended overhead, so that all who pass beneath should kiss, as an assurance that the bough is no longer an instrument of mischief; each berry represents a kiss, hence the demand for well-berried mistletoe being so persistent, yea, insatiable.

As to the many other kinds of evergreens and their uses, all are well known. Prince's pine, gathered by "Lo, the poor Indian," is also indigenous to many States; but it is apparent this year that the early crop of snow, where it doth grow, will make this pine the scarcest of "green goods" this season. For roping and wreaths Prince's pine is indispensable. Then there are hemlock and laurel, the "running" ground pine, each of which has its niche to fill.

And, thanks to "Caldwell, the woodsman," we have the Southern wild smilax, from Alabama, and the beautiful berried ilex; the former without a peer in its grace and fret-like appearance. From Florida we have palmetto leaves and crowns, needle pines and gray moss, sometimes called Spanish moss; pepper berries from California; rhododendron foliage from little Rhody (no pun intended); and Christmas trees from the Adirondacks and Maine.

There are other evergreens and other red-berried plants, but they are in too small quantities to mention.

From now on, to relieve us from our worries, we will, like Mohammed, have the mountain and the scent of the forest brought to our doors; and so, a merry and prosperous Christmas to all.

Trade Notes.

An unausually large amount of decorative work is on hand; funeral orders come in freely, which, with a brisk movement in cut flowers, quite consume the greater part of the present offerings of the growers.

Carnations seem to be scarce and growers find no difficulty in placing their entire product; rates on the best grades reached as high as $2; $1.50 is the general price on ordinary, and inferior stock does not bring over $1 to $1.25 per 100. Roses show a slight advance in values and are not over-abundant, the dull weather of the past several days having retarded their development. Best stock that for a few weeks back has been quoted at $5 per 100 is now bringing $6; the more common grades remain the same as previously quoted. Violets are in short supply. J. M. Gasser Co. offer the best stock in these seen here this season, and the blooms are extra large and of fine color. On account of the extra size and general fine quality, $1.50 per 100 is asked. These retail at $3 and $4 per 100. Paper White narcissus and Romans are offered in small quantities, but no established price as yet on them. Wholesale flower dealers at late moment report trade good and a complete cleaning up of all cut-flower stock.

Notes.

Several very brilliant window decorations among retail stores deserve mention. Smith & Fetters' window is very attractive with a well-arranged display of wheat, corn, pumpkins and choice fruit. C. M. Wagner, Erie Street, has also adopted a similar style of window display.

The window of J. M. Gasser Co.'s upper store Thanksgiving was neat, simple and attractive. It represented a football field, with goal posts at either side of the window, trimmed in the colors of two local college teams. The football in the center of the window was most suggestive of the idea of the decorator—Mr. Jones.

Ella Grant Wilson handled an extensive decoration at the Colonial Club on Wednesday of last week. The decoration was doae in white chrysanthemums, wild smilax and dogwood.

Death of a Young Florist.

Matt F. Wilhelm, 18 years old, son of M. A. Wilhelm, a retired Cleveland florist, was found dead in bed in his room at his hotel in Lorain, Ohio, on Sunday afternoon, 2d inst. Death was caused by hemorrhage. The remains were brought to Cleveland on Monday and taken to the family residence on Pearl Street, where the funeral was held on Wednesday. Burial occurred in Riverside Cemetery.

Mr. Wilhelm is prominent among the Cleveland florists, having been in the business here for many years. Since the death of his wife and daughter, about two years ago, he has been living a retired life, and his two sons, C. B. and Matt F., succeeded him. He took up his residence in Lorain a few months ago, and in September last the sons opened a branch store there, the young man who just died being in charge. He was an energetic, promising young fellow, and was held in high esteem by all who knew him.

Dennis Bros., cut flower dealers, with headquarters at Pittsburg, have succeeded to the business formerly operated by C. G. Stehr, who has left the city.

Smith & Fetters will occupy on the 15th inst. the storeroom at 150 Euclid Avenue, immediately adjoining their store, in connection with their present quarters.

REPORT OF THE JUDGES

APPOINTED BY THE

Philadelphia Florists' Club to Judge Our

GRAND NEW ROSE

QUEEN OF EDGELY

PINK AMERICAN BEAUTY.

"We are convinced that this variety is a valuable addition to the list of forcing roses, being in every respect, except color, the exact counterpart of the American Beauty. The color is a beautiful bright pink, which is good, even in the full flowers. The fragrance is also as fine as that of Beauty, and the exhibited blooms showed remarkable vigor."

(Signed) ROBERT KIFT,
WM. MUNRO,
JOS. HEACOCK.

N. B.—Two of the above Judges received first prizes for American Beauties at the Rose Show of American Rose Society, New York, March 27, 1900.

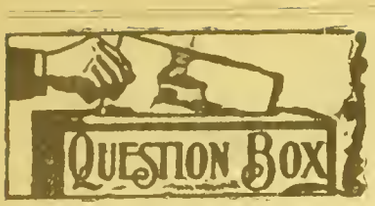
THE FINEST XMAS PLANT IN EXISTENCE

Let us send you a sample dozen of our ONE DOLLAR SIZE for your Xmas trade, or better yet, if you have calls for more expensive plants order a full line of samples, 75 cts., $1.00, $1.50, $2.00, $2.50 and $3.50 each, ranging in size from 5 inch pots to 8 inch pans. Our $1.00 size are splendid value and are very useful for table decorations combined with Adiantum Farleyense or Cuneatum. We have 3000 splendid plants and can make fine selection of shapely specimens where orders are sent in early.

THE COTTAGE GARDENS

QUEENS, LONG ISLAND

Mention the Florists' Exchange when writing.



(244) **Leaves of Pandanus Off Color.**—F. A.—The Pandanus Veitchii are suffering from being grown under too heavy shading, and probably a high temperature, with poor ventilation.

(245) **Carnations and Roses in Same House.**—Roses require a higher temperature and a more moist atmosphere than do carnations; and to grow both in one house would not be practicable. A good plan would be to put a sash partition across the middle of the house, thus making two separate houses; then roses could be put in one half and carnations in the other.

(246) **Poinsettias.**—Cut the stems in the latter part of the day, put them immediately into a deep vessel containing water and keep them in a cool room over night. It is necessary when cutting the poinsettia to place it in water immediately; if this be not done the leaves and bracts soon wilt and seldom revive.

(247) **Red Spider.**—The best cure for red spider is a strong force of water direct from the hose pipe; persistent syringing will keep down the pest. Maintaining a moist atmosphere by dampening the paths and underneath the benches will also prove a great help in keeping the spider away.

(248) **Size of Chrysanthemums Timothy Eaton and Col. Appleton.**—At the Chicago show the variety Timothy Eaton measured 13½ inches over all and was 6 inches deep. As no official measurements were taken at the last exhibition (so far as we know) we are unable to tell their exact size, but Col. D. Appleton has a record of 19 inches over the flower from stem to stem, and 22 inches in circumference.

(249) **Worms in Benches.**—F. A.—The worm in question is a hard-skinned creature, and is difficult to dispose of. It generally gets into the soil through the medium of half-decayed vegetable matter, and when once in the wooden benches the cracks in the wood afford the pest a secure hiding place. Whitewashing the wood work, inside and out, with fresh slacked lime, and repeated waterings of the soil with lime water, will, if faithfully persisted in, eradicate the insect.

(250) **Wants Daffodils for Christmas.**—Kindly inform me when would be the proper time to bring in my daffodils for forcing. I have them planted in flats, and would like to get them in the market for cut flowers as soon as possible. I did not receive the bulbs until late this year. I planted them in boxes September 15, and placed the boxes outside, covering them with manure. Some of the plants are up about half an inch and others are just commencing to sprout. Could I bring them in by Christmas or the first of the year? They have had 10 weeks in which to make roots.
SUBSCRIBER.

—The daffodils can certainly not be had in flower for Christmas; but if plenty of bottom heat is at command, they might possibly be got in for New Year's. We would not advise attempting to have them in for New Year's, however, under the circumstances. If, as stated, the bulbs have been covered with manure, the heat therefrom might have induced an unnatural growth, with probably very little root growth. If that be so, the bulbs would flower very indifferently if put into heat now. We would remove the manure and apply a covering of a few inches of soil; then let the bulbs remain where they are until the beginning of January, when they can be brought in, a few at a time, say once a week, for forcing.

(251) **Spot on Scott Carnations.**—I have two benches of Scott carnation badly affected with spot. While the plants are vigorous, some of the foliage is spotted, and more than two-thirds of a heavy crop of buds are also badly spotted. Soil and condition of the affected benches are the same as afforded for all the rest, which are perfect. There are no pipes under the affected benches, and since the disease showed, the plants have been kept much on the dry side. The soil is of light texture, with plenty of thoroughly rotted horse manure through it. A light dressing of lime and wood ashes was given when the disease first appeared.—J. C. R.

—From the description and sample sent, the plants have a very bad attack of spot. Over-watering, poor drainage, lack of ventilation and excessive heat are the chief causes for its appearance. Sometimes the conditions prevailing outside during the plant's sojourn in the field will start the disease, and when planted in the house a little oversight will cause it to spread very rapidly. After some years of experimenting with various remedies for spot, we have discarded them all. Now we try to assist nature in a more matter-of-fact way. The only reliable cure is to pick off all affected leaves close to the stem and burn them. Give plenty of ventilation; this is absolutely essential, especially in mild and damp weather. A pipe or two on each house, with the ventilators open wide enough to keep the temperature down to 60 degrees during the day, and in such weather a little air on all night will be very beneficial. In keeping the plants on the dry side, do not make the mistake of allowing them to get very dry at the bottom of the bench. A liberal coat of soot will be more beneficial than the lime and wood ashes at this time, as it contains nothing to harm a sick plant, and is one of the best-known remedies for sick foliage of any kind. It is scarcely necessary to add that plants in this condition should never be sprayed.
WM. WEBER.

(252) **Heating Problems.**—Please say what size flow pipe it will take to heat a house 26 x 100 feet; also how many 1¼-inch return pipes it will take to heat the house to 60 degrees in cold weather.—WM. T. STEWART.

—The question does not state whether steam or hot water is to be used, nor is the amount of glass in the walls given. If the roof has about the usual pitch and there is no glass in the walls, the house can be heated to 60 degrees in zero weather, with one 2½-inch flow and 12 1¼-inch returns, if steam is used, or with one 4-inch flow and 18 1¼ inch returns, with hot water. A better distribution of the heat from the flow pipe can be secured if three 2½-inch, or five 2-inch pipes are used instead of one 4-inch.—L. R. TAFT.

What size of pipe would you recommend for heating with hot water, a house 150 feet long, 20 feet wide, and located 100 feet from the boiler. I mean what size of main feed pipe, and returns to connect house with boiler.—GEO. B. MANTER.

—A good deal depends upon the height of the coils above the heater, as well as the temperature desired in the house. For 50 degrees a 4-inch pipe would answer, provided the lowest part of the coils is five feet above the top of the heater, while for 60 degrees, it would be better to use 5-inch pipes for both flow and return, unless the flow pipes are overhead in the houses, or the difference in level is more than five feet.—L. R. TAFT.

I have two greenhouses that I wish to heat with hot water. One is even span 17 x 16 feet, with three feet of glass in the side walls, and the other is a three-quarter span house, 43 x 13 feet, also with three feet of glass in the walls. What heater should I use and how should the house be piped? The temperature seldom goes below eight degrees F.—H.

—The use to which the houses are put is not stated, but if the narrow house is for roses, and the even span house for carnations or other plants that require about 50 degrees, the following plan is suggested: The houses will require about 350 square feet of radiation, but it will be well to select a boiler rated for about 500 feet. Almost any of the manufacturers of boilers whose advertisements appear in this paper, can supply what you need. About ten 2-inch pipes will be required in the narrow house, and eight in the other. Of these two could be flows and the others returns. The drawing shows the houses in the shape of an L, with the boiler at the end of the narrow house, and a door near the lower corner of the L. One of the flows can be carried overhead on the posts that support the ridge of the narrow house to the farther end, where it can connect with a coil of four pipes, which can pass around the even span house, and along the south side of the other house, to the west end where a 2-inch pipe can connect it with the heater. The other flow pipe can be carried on the purlin posts in the middle of the north side of the narrow house to the east end, and there connect with a coil of four 2-inch pipes, which can run along the north wall to the heater.—L. R. TAFT.

Which is the better way to have pipes in a greenhouse for growing carnations—under the benches or on a side wall; and how many runs of 2-inch pipe are necessary for hot water to heat two houses, 75 x 12 and 8½ to ridge? Is it safe to build greenhouses of third quality, double thick American glass, 12 x 24, because I can get such glass cheap?—SUBSCRIBER.

—If there is no glass in the side walls the houses can be heated with six 2-inch pipes, using one flow and two returns on each side. In houses 20 feet or more in width, such as are commonly used for carnations, it is well to have most of the pipes on the side walls, although one or two may be under each of the benches, but for a 12-foot house, which is probably arranged with a walk in the center and benches on each side, it will be as well to have the pipes under the benches. A serious objection to placing the pipes under benches used for carnations is that, unless care is taken in watering, the soil at the roots becomes dry. The danger will be lessened if there is a wide space between the bench and the wall and the bench is open in front, so that the warm air can pass out into the house. In the case under consideration, if the width of the walk permits, the flow pipes could be carried in the walk, on the bench legs, and the returns underneath, and at least a foot below the bottom of the bench. Ordinarily it is not best to use anything below second quality glass, but if the house is to be used for carnations, it would be less objectionable than for most other crops to use a lower grade, and the difference in price might lead to its selection. It would also be desirable to use glass 16 inches wide.—L. R. TAFT.

I am heating greenhouses with steam, but want to change to hot water. I have a stationary engine boiler. The highest point in pipe is in the flow, eight inches from ridge-pole. Would it work all right to put the expansion tank on the outside of the houses above ridge-pole?

Which is the best variety of lettuce for forcing?—F. C. M.

—It is not advisable to place the expansion tank above the roof of the greenhouse, as it is likely to freeze. If, however, it is not possible to place the tank in the boiler house so that it will be above the level of the flow pipe, or if the flow pipe cannot be readily lowered, it is possible to have the tank above the roof as proposed. The tank should be well packed to prevent loss of heat, and a half-inch pipe should run from the tank to one of the return pipes, in addition to the pipe from the tank to the highest part of the flow pipe. If arranged in this way the circulation of the water through the tank will prevent its freezing.

Grand Rapids lettuce is the best variety for forcing, as it matures quickly, and with little danger from rot and similar troubles. In most Western markets it sells as well or better than the cabbage or heading varieties. In Eastern cities the demand is for a head lettuce, and good results can be secured with some of the strains of Boston Market or White-seeded Tennisball. Belmont is one of the best.—L. R. TAFT.

I am having built a palm house, 50 feet x 40 feet; 26 feet in height; also two small greenhouses, each 50 feet long and 26 feet wide. How many lines of 4-inch pipe will it take to heat them in zero weather, the palm house to 60 degrees, greenhouses, 50 to 55 degrees? Will a 2-inch pipe be large enough to carry the heat direct from boiler to palm house, so that we could heat it without heating the greenhouses?—G. J.

—A sketch accompanying the letter shows the two small greenhouses placed end to end, with an octagonal palm house at the end farthest from the boiler house, but as the height of the walls is not given, it is not possible to give a very definite answer to the questions. If 4-inch cast iron pipe is used, the number of linear feet required for the palm house for a temperature of 60 degrees is about one-third the number of square feet of exposed glass surface, while for 55 degrees, in the other houses, the linear feet of pipe should be one-fourth the square feet of glass. Thus, if there are 3,600 square feet of glass in the palm house, 1,200 linear feet of pipe will be required, and if the other houses have 1,400 feet of glass, they will require 350 linear feet of pipe each. Instead of one 2-inch supply being sufficient for the palm house, two 4-inch should be used, with returns of the same size. These should run through the small houses, one on either side, and the pipes in the palm house should be arranged in two coils, each running half way around the house, with a flow and return pipe connecting with the boiler. In addition to the pipes which lead to the palm house the small greenhouses will need a flow and return pipe on each side. Instead of using 4-inch cast iron pipe, it will be better to use 3-inch wrought iron pipe for the flows and returns and 2-inch pipe for the coils. In the palm house the flows should be carried near the eaves around to the farther end, and there connect with the coils, which should contain one-half as many feet of 2-inch pipe as there are square feet of glass in the house.—L. R. TAFT.

BRIEFS FOR BUSY FLORISTS.

PRIMULAS for Christmas sales should be showing the flowers well by this time. If they seem at all backward run the house a few degrees warmer at night to help them along. A cheap and attractive centre piece for the table can be made by putting three or four primula plants together into a large pan; this can be done after they are in bloom without injuring them in any way, so that pans of mixed colors may be made up if desired.

COLEUS.—The stock plants of coleus must not be neglected while the houses are crowded with flowering plants for the holidays. If they happen to be young plants that were rooted in the fall, they should either be potted, or planted in flats, and be kept growing. If this is not done, or should they be checked in their growth by too low a temperature, they will be in but poor condition for yielding cuttings later on.

PELARGONIUMS.—If not already done the old plants need shaking out of the pots, the most of the soil removed from the roots, and the plants repotted. Use a good rich soil in which to pot them, and after the first watering a light syringing daily will be all the water required until the plants break into new growth.

HYDRANGEAS FOR EASTER.—If there is room under a centre bench that is not absolutely dark, hydrangeas may be put there and will, if sprayed occasionally, break into growth gradually. Of course, they must not remain under the bench after the leaf buds begin to open, but must be put into the full light, otherwise, spindly shoots only will result.

BOUVARDIA on the benches is now showing flowers freely, and if syringing is not kept up rigorously red spider will soon play havoc with the foliage, especially on the plants along the edges of the bed. Look out for mealy bug, also; bouvardia is a special favorite of this pest, and if the plants are at all crowded the bug might get a good start before being noticed.

CARNATIONS.—It is a mistake to run up the temperature of the houses to force a few extra flowers for Christmas; any extra blooms thus gained are probably lost twice over in value before the season is over. If any forcing is resorted to, it should be done very gradually, and when to be discontinued the same methods should be adopted. Raise the temperature two or three degrees only at a time, and through the day give plenty of air on all favorable occasions.

Parties interested in the cultivation of ginseng (Aralia quinquefolia) can obtain reliable information as to its culture, preparation for market and other useful points, on application to Harlan P. Kelsey, Tremont Building, Boston, Mass., who has just issued a very instructive illustrated circular on the subject.

Club Meeting.

The meeting on Tuesday last was only fairly attended, owing, no doubt, to the inclement weather. A. M. Herr read an interesting paper on carnations, which was greatly appreciated, and will be found in full in this issue. In reply to a question as to early benching of carnations, Mr. Herr said he had obtained good results from this plan, and would even plant in the houses earlier next season. He would aim to have well-established plants in pots to put out in the field in Spring, and would take them up to plant in the houses by August 1. In answer to another question as to best time to cut carnation blooms, and in what condition they should be cut and how to ship, he said that he could not answer this to be quoted as an authority in the matter, but would give his own method, which was to cut the blooms in the early morning, put them in water and ship by 5 p. m. He always cut the flowers before they were fully developed. In doing this he only consulted his own convenience, as he shipped at 5 p. m. daily, and believed the flowers carried better if held in water from six to eight hours, and as he shipped quite a distance he cut before the flower was fully open, tying in bunches of 25 and wrapping some wet moss around the stems.

Robert Kift thought the retailers preferred flowers not fully open. Wm. K. Harris said when he grew carnations, he always found fully open flowers brought most money. John Burton said then it is evident that the retailer likes undeveloped flowers, as they are cheaper.

The exhibits of the evening consisted of a vase of Queen of Edgely rose from The Floral Exchange Co.; a vase of Robert Scott rose from Robert Scott & Sons; vase of red carnation John Habermehl, from John Kahn; vase of white carnation Elm City from A. M. Herr; vase of white carnation Queen Louise from J. L. Dillon and two vases of chrysanthemums from Nathan Smith & Son of the varieties Xeno, pink; Goldmine, yellow; Superba, pink; Lavender Queen, pink tinted with lavender; White Bonnaffon, white, and Nagoya, yellow.

As the next meeting night will be New Year's the meeting will be held on the second Tuesday.

The essay for next meeting will be "The Best Ferns for Commercial Use, and Why," by Chas. W. Cox.

A ladies' night will be the event for the fourth Wednesday of January the 23d, when suitable trophies will be provided for prizes for the ladies, and a short program of singing, etc., arranged, with ample refreshments.

Growers.

The establishment of Robert Craig & Son never looked better at this time of year than it does now. First on the list is a house full of a grand lot of plants of Begonia Gloire de Lorraine; there are 2,000 in the house—a sight now worth going a long way to see, being one mass of pink flowers; the plants, from 5-inch pots up to 12-inch pans are all good. These have been grown open to the sun all the time, and cool, about 50 degrees at night, so that they are in good condition for the stores. Next we see a house full of Cyclamen gigauteum, just right for the holiday trade—strong plants with abundance of bloom. Azaleas are an important feature; a large quantity will be ready for the Christmas trade. The method used here was to start the plants by plunging them in a hot bed until the buds were well advanced, then moving them to a cooler house. By this plan all the principal varieties will be in flower. Usually, Simon Mardner and Deutsche Perle were the principal ones for Christmas; now, in addition, there will be Vervaeneana and Van-der-Cruyssen. Some of the latter are very large plants. There is also a lot of very good rubbers, in branched plants; 24 to 36 inches above the pot. Boston fern is one of the principal features, there being a large stock from 6-inch up, which are selling fast. These are all well done and are of good color. Araucarias are very numerous here this year; a strong, stocky lot of plants mostly A. compacta and A. glauca, with a few A. excelsa. In palms the principal stock for the holidays is a well-grown lot of livistona, which ought to move rapidly. Most of the Pandanus Veitchii are planted out in benches, this method being adopted to not only produce good plants, but to produce stock more freely, and the results are excellent. Plants are growing splendidly and throwing out quantities of suckers.

A. Blanc is devoting his greenhouses mostly to plants for catalogue trade of interest to florists. He has a grand lot of Asparagus Sprengerii, just right to plant out or grow on in pots. The cactus plants are also being worked up, the demand having increased the past year.

When Alfred Dimmock leaves for England on Saturday, December 15, to go home to spend a merry Christmas, he will take with him a box containing flowers of the new rose, Queen of Edgely. These are to be sent by The Floral Exchange, growers and owners of this new acquisition, to be exhibited in England.

DAVID RUST.

Omaha.

Thanksgiving business in Omaha was very brisk, but not quite up to that of last year. There was a shortage of everything in this vicinity, owing to 15 days of dark weather, something Omaha does not have very often.

The chrysanthemum season seemed to the writer very short this year, probably for no other reason than that the demand was so good from the time the flower made its appearance to Thanksgiving Day. The demand for roses is equal to the supply, except at times when Meteor falls short. Golden Gate seems to take the flower buyers' fancy more now than earlier in the season, the color being a little more pronounced. This locality has never seen such a scarcity of violets; the few that do come in are of the Princess of Wales and the Marie Louise varieties. In carnations there is also a shortage which has been felt for the last month. Daybreak seems to be the leader, with Jubilee next. Crane has not amounted to much as yet.

Omaha had to content herself this year by hearing and reading of other cities' chrysanthemum shows. But our city, since it has gone Republican, will be in line with others in the future.

J. H. B.

Baltimore.

Retail Notes.

The gay season was formally opened by the Monday german at Lehmann's Hall, last week. Black Bros. decorated the hall. Wild smilax and chrysanthemums were the predominating elements in the decoration; the treatment of crystal chandeliers being a very successful combination of asparagus and chrysanthemums. The ladies carried armfuls of flowers, American Beauties being the decided favorites. Some valley and a few orchids were also seen.

The aspect of the retail trade has changed altogether and a busy season seems to be opened.

Feast & Sons had a beautiful home wedding decoration at the Jenkins residence, on Charles street.

Wm. J. Halliday decorated the house for the marriage of Miss Gary, at which President McKinley and party from Washington were present.

Halliday Bros. had a pretty church wedding at the Grace Protestant Episcopal Church.

The skill of the Patterson park artists and the treasures of the greenhouses there were displayed at a church wedding of a niece of the park president.

CUT FLOWERS FOR CHRISTMAS

Beauties, Maids, Brides, Meteor, Carnations, Roman Hyacinths, Narcissus, Valley, Violets, both single and double. Also Asparagus Plumosus, Smilax and Adiantum. Choice stock, carefully selected and packed. Good shipping facilities.

Grand Rapids.

Trade Notes.

The extremely variable weather has had a depressing effect on home trade. Shipping business has been steady and satisfactory. Carnations were scarce all the week. Thanksgiving prices went into effect Monday. Roses were about equal to the demand, except Beauty, which are nearly always scarce. The demand for violets was far in excess of the supply; the quality was good to fair. The plants have hardly got accustomed to changeable weather yet, and will bloom better when settled cold days come. The chrysanthemum crop was ample for all demands, and there will be good chrysanthemums here for a couple of weeks yet. Paper Whites were in small supply and helped to add variety to the list of flowers. Carnations at retail brought 50c. to 75c. per dozen, Irene being in the latter class with fancies. Roses were fine, and sold for $1 to $1.50 per dozen. Beauty, $2 for shorts to $5 per dozen for extra long.

Friday morning we had a visit from Messrs Klagge and James Taylor, of Mt. Clemens, who made a tour of the greenhouses here. Crabb & Hunter's violets and carnations, especially Irene, were greatly admired. The stock at the establishment of the Burton Floral Co., particularly polasettias, was well thought of. The plants of Wm. Rattray, Henry Smith, Chadwick and Eli Cross were also on our visitors' itinerary. They expressed themselves highly satisfied with what they saw.

G. F. C.

Hartford, Conn.

Thanksgiving trade was far ahead of last year's and everything was sold out clean, stock being short of the demand. Colored chrysanthemums were most called for and yellows were the best sellers; they went at from $1 to $2 a dozen. Carnations and violets were both very scarce; the former sold at from 35c. to 50c. a dozen, and the latter at from $1 to $2 a hundred. Paper Whites, Romans and stevia sold well when everything else was gone. There was not much call for potted plants.

SHIREMANSTOWN, PA.—During the past season John F. Rupp has added two greenhouses to "The Home of Primroses;" enlarged the packing and storage shed; put up complete waterworks run by a gasoline engine, for the greenhouses, hotbeds, cold frames, and gardens. The entire greenhouse plant has been gone over with white, light yellow and dark brown paint. Four of the houses have cement walks and two paved brick, both forms making very satisfactory walks. The stock at present is in fine shape; the primroses for growing seed are in the best possible condition.

Insertion will be given in this column to all communications free from animus, but the opinions expressed do not necessarily reflect our own.

Pruning Evergreen Hedges.

Editor Florists' Exchange.

I am sorry to see in your number of November 17 that Mr. Meehan feels that I have stepped on his corns by saying that he was "wide of the mark" with respect to his statement on the pruning of evergreen hedges. When I read in his article that "pruning should not be deferred until the approach of cold weather, and the work should not be done later than a month at least in advance of freezing weather," I thought he meant by these words the latter part of September and October; but now since reading his reply I see August and the first part of September were meant. It was also not known to me that May (when it can be seen if the branches are alive or not), was called in this country "early Spring"! but Mr. Meehan says that our articles are in harmony, so that this must be so. What I formerly understood by "early Spring" was when the frost leaves us, and Nature shows signs of life again. But conifers do not start so early; and as it is necessary that the dead branches must be distinguished from the living ones, I thought, in my simplicity, that Mr. Meehan was about a month too early with his Spriag praniag.

And when I said that hedges should be pruned in August or September, I did not do so out of pure consideration for those poor tender braaches that had been overshadowed by others. Generally in places where the braaches are so crowded, there are they plentiful, so that when some do succumb to exposure to the cold, there are enough left to fill the gaps. But September is the best month for the growth of conifers, and when a hedge is pruned in August the plants grow out very soon, and the hedge becomes natural again in a couple of weeks; on the contrary, if the hedge is pruned in October, the time for growing is passed; even if the tender branches have time to harden up, the hedge remains stiff and ugly during the seven months of the year before the branches can grow out again, looking all this time like a man's hair the first week after a short pompadour hair cut, or the pelt of a sheep newly from the hands of the clipper or shearer.

When a marksman misses the center by a few inches he is wide of the mark; and when the hunter pulls the trigger only a second too early, or a second too late, he misses the game; so Mr. Meehan must not feel badly when I say he is wide of the mark as, I think he has missed the proper time for pruning evergreen hedges by a whole month. I never doabted Mr. Meehan's good intentions; but missing the mark is never done intentionally. P. OUWERKERK.

Hardiness of the Hardy Orange.

Editor Florists' Exchange.

In No. 45 of THE FLORISTS' EXCHANGE I find the following very interesting explanation of the reason why the hardy orange (Citrus trifoliata) should be hardier in Philadelphia than in Maryland: "It is very well understood that it is the hot Winter's sun that determines the hardiness or otherwise of certain plants, and the further south one goes, the less hardy are other things as well, if hard freezings occur at night."

I suppose by the above it is to be understood that the rapid thawing of the plants by the hot Winter's sun, after they have been exposed to severe night frosts, is the immediate cause of the destruction of the plants. Now this theory, though it may have many adherents, especially among practical men, is not at all unanimously upheld. Your correspondent has not had the advantage of seeing positive proof of it, nor found any records of scientific experiments which could establish it beyond doubt. On the other hand, it has been conclusively shown that a plant, or part of a plant, that has actually been frozen—that is, of which the cell sap has undergone the changes characteristic of freezing, is absolutely dead—and thus if a plant has been exposed to so severe a cold that it has been frozen, the effect of rapid or slow thawing could produce no difference, as the plant was destroyed before.

But leaving aside the question of the immediate cause of death by freezing, the relative degree of hardiness of a given plant depends unquestionably on how thoroughly its wood is ripened. It increases with the exposure to the sunlight and its intensity, and is in a measure regulated by the supply of moisture in as far as it shortens or prolongs the season of growth.

Leaving out of the discussion plants which are in especially sheltered positions, Citrus trifoliata has wintered well in this neighborhood only on high, well-drained, fully exposed land. On lower land it nearly always suffers a severe freezing back, and therefore cannot be classed as hardy in this locality.

Now, considering that the orange withstands the rigors of our Winters on high, open land, and always suffers on lower localities, it is difficult to apply the theory above quoted, for the intensity of the sun is the same in the two localities, which are only a few miles distant from one another. I may add that the plants cultivated in this neighborhood have all, or nearly all, been raised from seed grown in this locality.

T. E.

Hawthorns.

Editor Florists' Exchange:

To prevent the borer, take building paper a foot wide, wrap it loosely around (for 10-inch high) the hawthorn and 2 inches under ground The eggs of the borer will be laid about 6 inches above the surface of the ground upon the brown building (or sheathing) paper, and when the young are hatched out, they will have the paper instead of the hawthorn to bore into. Result—dead borers, whether on hawthorns, peaches or apricots.

One other impediment to the hawthorn. Some parties calling themselves gardeners trim up the stem of the hawthorn as jackasses do the lemon. Now, the hawthorn and the lemon do not want a naked trunk exposed to the sun. The remedy for a trunk-exposed hawthorn is evergreens, planted to shade the stem of the hawthorn from the sun. If stone (rockwork) is laid on the ground around the roots, the hawthorn or the lemon will thrive. The hawthorn as a lawn ornament, and the lemon as a fruit bearer are impatient of the knife. L. C. K. BAILEY CO.

Stamford, Conn.

Dahlia Helen Gould.

Editor Florists' Exchange:

In your issue of November 17, O. B. Coomes, Jr., takes exception to my letter in your number of the 3d. The imagination, evasion and misconstruction lie entirely with Mr. Coomes. I will admit that I am not very old myself, but I grew, the past year, three hundred thousand dahlia plants, devoting my entire attention to them. Mr. Coomes claims to have grown 2,000; so if the past year only was my first, I would have had as much experience as Mr. Coomes in 150 years; and I suppose that we have grown annually as many plants of Uncertainty as Mr. Coomes grows of all kinds combined. This is taking it from his own statement that he grows 2,000 a year.

The American Dahlia Society did not overstep its bounds, because every one of the judges knew the dahlia thoroughly, had grown it for years, and knew of this light variation. They therefore passed upon what they knew from long years of experience.

In regard to our purchasing the variation now called Helen Gould under the name of Mary Eustace, I will say that I can substantiate this statement. For several years there were very few deeply variegated flowers, and we easily could have selected these if we had eliminated the plants bearing the dark flowers. However, when we found the plants with the light flowers were so much weaker than the other stock, we stopped making this selection. If Mr. Coomes will remember, in his letter he stated there was some variation, and I don't think he would care to come out flatly and say that even during the past season there was no tendency to revert.

In my letter of the 3d, I state, "It is a well-known fact among dahlia growers that all fancy varieties will vary and sport, the latter permanently, but the former is an essential part and characteristic of the variety." Mr. Coomes says: "I agree with him there, for if he takes Floral Park Jewel, the many colored flowers on one plant characterizes the variety; but when he takes Helen Gould, the light-colored blossoms characterize it as a variety entirely different from the former." Now this statement would not mislead the experienced dahlia grower, but it is absolutely misleading to those not acquainted with the dahlia Uncertainty. The two are not entirely distinct varieties, because they are one and the same. The light flower is as much a part of Uncertainty as the dark or intermediate ones. You can go into any plot of Uncertainty (Floral Park Jewel), and select at least one-quarter of the number in either plants or flowers similar to those Mr. Coomes calls Helen Gould. In our own fields nearly one-half are light, owing to the fact that, in past years, we had the light strains. Helen Gould is therefore nothing more or less than the light flower of Uncertainty (Floral Park Jewel), and it is therefore physically impossible for them to be two distinct varieties.

Mr. Coomes' remark about my trying to belittle the price of Helen Gould is really amusing. What I said I repeat. I do not get my information from one trade paper, nor from one florist, but I get absolutely correct information at all times; and I never make a statement simply for the pleasure of making it. I will therefore quote the following from the American Florist, from the Philadelphia notes in issue of September 29, page 289: "Peacock of Atco is sending in some nice dahlias which differ in price, according to variety and excellence, from $1 to $5 per hundred." On October 6, page 317: "Asters are done, but there are dahlias coming to take their place." Issue of October 20, page 379: "Cosmos is now in full flower and sells for 25 cents to 75 cents per hundred; dahlias bring from $1 to $4 for the same quantity."

We had severe frost on October 19, but the following week we continued to get flowers, which were somewhat protected, although not at their best, and, in competition with chrysanthemums we received $2 per hundred for all we had. The same paper in its issue of October 27, says: "Cosmos and dahlias are still with us, but are not now the factor."

I do not believe in belittling a noble race to exalt a single individual, and that is why I took exception to Mr. Coomes' remarks about prices. Our average price for good dahlias was $2 to $3 per 100. If Mr. Coomes wants further facts we will be glad to supply them, even if he wishes to know who bought dahlias at the prices quoted above. L. K. PEACOCK.

Pan-American Progress.

The month of November, just closed, has been one of the worst for outside work that we ever remember, and somewhat retarded the finishing up of the ground work around the buildings. All of these are about under cover and the staff work and plaster are also about completed. The interior finishing and decoration will go on constantly until completion.

Between snow storms and rain the Horticultural Department managed to get in all the bulbs. Of hyacinths, tulips, narcissus, Spanish iris and other kinds, there are upward of 200,000 planted in the various beds in that portion of the grounds known as the Music Gardens. There are upward of 150 beds, and, with few excetions, these are filled with Spring flowering bulbs, the exhibits of many different firms. These beds are of all sizes, ranging from a surface of 100 square feet to that of 8,000 square feet. This portion of the grounds, entered immediately from the Elmwood gate, consists of some 15 to 20 acres, and is practically finished. It must present a most beautiful appearance in the Spring. Those few not occupied with bulbs will be filled with pansies. There are about twenty-five beds reserved for pansies, which will be planted as soon as the ground is in condition to work in the Spring. A few are occupied with hybrid perpetual roses, so that during the month of May this part of the grounds will be most attractive. A large quantity of herbaceous plants has been planted in several long borders, also in this part of the grounds.

The Department of Works has also planted about a quarter of a million bulbs. Two long borders on each side of the Cascades, each about 500 feet in length by 15 feet in width, are planted in geometrical designs with a great variety of hyacinths and tulips. The large beds destined for Summer blooming plants have also been filled with bulbs. These must make a most brilliant show in the early days of the Exposition.

With all the inclement weather a great deal of planting has been done in the neighborhood of the island on the banks of the Eastern Canal, and in that portion of the grounds occupied by the Foreign and State Buildings. The last piece of structural iron was put on the Electric Tower within a few days, making a total height of 385 feet. Looking from the Esplanade over the Cascades and Grand Basin the Electric Tower, with the grand architecture of the Transportation Building on the left, the Manufacturers' Building on the right, the Horticulture Building to the west, and the Government Building to the east, with many smaller buildings in view, will afford a most imposing sight.

The large consignment of palms, dracænas, oranges, etc., from California, has been carefully housed in extensive wooden buildings with sufficient light for their welfare. As there are to be thousands of feet of boxes filled with flowers and drooping and climbing plants, and also hundreds of vases to adorn the grounds, the propagating at the greenhouses is going on very lively. With all these and the immense amount of carpet bedding that the plans call for, an enormous quantity of plants will have to be ready by the first of June. All who have seen the Horticulture Building, the exterior of which is about completed, pronounce it the most handsome structure for the purpose that has ever been provided at any exposition; and it certainly is a beauty. The two large conservatories leading from it to the Mines and Graphic Arts Buildings are being glazed and will, by the first of the year, be heated with steam. They are large and commodious structures, and admirably adapted to the welfare of growing plants.

All visitors are charmed with the coloring of the buildings. There is a variation in all of them, but they are a most beautiful combination of tints and harmony.

WILLIAM SCOTT.

A Forecast of the Next Century.

The following statements are given in the *Ladies' Home Journal* as being based on the opinion of scientific men who have studied the subject:

Strawberries as large as apples will be eaten by our great-great-grandchildren for their Christmas dinners a hundred years hence. Raspberries and blackberries will be as large; one will suffice for the fruit course of each person. Strawberries and cranberries will be grown upon tall bushes. Cranberries, gooseberries and currants will be as large as oranges. One canteloupe will supply an entire family. Melons, cherries, grapes, plums, apples, pears, peaches and all berries will be seedless. Figs will be cultivated over the entire United States. Peas and beans will be as large as beets are to-day. Sugar cane will produce twice as much sugar as the sugar beet now does. Cane will once more be the chief source of our sugar supply. The milk-weed will have been developed into a rubber plant. Cheap native rubber will be harvested by machinery all over this country. Plants will be made proof against disease microbes just as readily as man is to-day against small-pox. The soil will be kept enriched by plants which take their nutrition from the air and give fertility to the earth.

Roses will be as large as cabbage heads. Violets will grow to the size of orchids. A pansy will be as large in diameter as a sunflower. A century ago the pansy measured but half an inch across its face. There will be black, blue and green roses. It will be possible to grow any flower in any color, and to transfer the perfume of a scented flower to another which is odorless. Then may the pansy be given the perfume of the violet.

..VERY APPROPRIATE CHRISTMAS PRESENTS..

The Water Garden

BY WILLIAM TRICKER.

This work contains nine beautiful plates, eighteen full page descriptive views of leading Water Gardens and Ponds, and numerous smaller pictures prepared with special reference to this work. On heavy enamelled paper. Elegantly bound. Large octavo.

PRICE, $2.00.

The text describes all operations from the growing of plants in tubs to the large water garden, excavation of grounds, construction of ponds, adapting natural streams, planting, hybridizing, seed saving, propagation, the aquatic house, wintering, correct designing and planting of banks and margins, and all other necessary details. Prospectus and Reviews free on application.

A. T. DE LA MARE PTG. & PUB. CO. LTD., P. O. Box 1697, New York City.

Plant Culture

NOW READY FOR DELIVERY.

FIRST ADVERTISED AS

COMMERCIAL PLANTS

THEIR PROPAGATION AND CULTURE.

BY GEORGE W. OLIVER, PROPAGATOR TO THE U. S. BOTANIC GARDEN, WASHINGTON, D.C. AND LATE OF THE ROYAL BOTANIC GARDEN, EDINBURGH.

A working Hand Book of Every-day Practice for the Florist or Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experiences of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include **Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines,** and a chapter on miscellaneous subjects in connection with the above.

This reliable cultural book has been gotten up for use not ornament, therefore the price has been fixed at a figure within the reach of all, while it contains more real practical information for those for whom it is intended than is to be found in much more pretentious works costing ten and twenty times as much money. Strongly bound to stand rough handling and plenty of it. **Price, $1.00 by mail, postpaid.**

A. T. DE LA MARE PTG. & PUB. CO., Ltd., 2 to 8 Duane St., N. Y.

COMMERCIAL VIOLET CULTURE

A Treatise on the Growing and Marketing of Violets for Profit.

By B. T. GALLOWAY,
Chief of the Division of Vegetable Physiology and Pathology, U. S. Dept. of Agriculture.

THE WORK IS THOROUGHLY PRACTICAL AND DISCUSSES FULLY:

Varieties and their Origin.
Localities where the Crop is likely to Prove Profitable.
Requirements for Success.
Construction of Houses and Frames.
Manures and Fertilizers. Heating Houses and Frames.
Picking, Bunching and Marketing. Soils and their Preparation
Propagation, Selection, Planting, Watering, Cleaning and Feeding.
Diseases and their Treatment.
Insect Enemies and Methods of Combating Them.
Cost of Producing the Crop. Profits, Etc.

Superbly illustrated with upward of 60 plates, plans and diagrams, etc.

Including Working Drawings of Model Violet Houses; Plans for Complete Heating Systems; Photographs Showing Methods of Handling Soil, Preparing the Beds, Bunching the Flowers, Packing for Shipment, Etc. Numerous Illustrations showing the character of the more important diseases are also given.

Elegantly printed on heavy woodcut paper, and bound in flexible covers of royal purple cloth and gold; 224 pages, small octavo. Price, postpaid, $1.50.

A. T. DE LA MARE PTG. & PUB. CO., Ltd., 2 DUANE STREET NEW YORK.

We can supply any book or magazine, no matter where published.

Success with House Plants

BY LIZZIE PAGE HILLHOUSE.

A complete text-book and guide to the care, cultivation and propagation of all plants in the garden and the home.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

12mo., 232 pp.; profusely illustrated, with complete and ready reference index to all plants enumerated. Price, Cloth, $1.00; Paper, 50 cents.

To Retail Florists. The old thought, that it was dangerous for a customer to know much about the care of plants, has passed away, being superseded by the newer and more intelligent one, viz.: that the more successful a customer is with plants, the greater quantity will he or she buy.

We offer Special Inducements to all who wish to handle this book. It is a good seller.

FOR PARTICULARS, ADDRESS

A. T. DE LA MARE PTG. AND PUB. CO. Ltd., 2 to 8 Duane Street, New York.

Residential Sites and Environments

By JOSEPH FORSYTH JOHNSON.

IN THREE PARTS:

PART I—THE RESIDENTIAL SITE: Introduction, The Residential Site, Five to Forty Acres, Model Home Ground, Thinning Out Woodlands, The Park Home No. 1, The Park Home No. 2, Beauties of Plant Life, Special Effect of Trees and Shrubs, Special Effect of Carpeting Plants.

PART II—PLANTING AND INTRODUCTION TO UNDULATIONS: Planting, Transplanting Trees and Large Plants, Natural Mass Planting, Natural Grouping in Boundaries, Grouping Trees, Sloping Banks, Planting Borders, Perpetual Effect, Rockeries, Aquatic and Bog Garden, Water Garden, Natural Garden.

PART III—VILLA GARDENS AND PUBLIC GROUNDS: Small Grounds, Corner Lots, A Southern Garden, Planting a Church Front, Locating Entrance Roadways, A Villa Plot, The Terrace Effect, Planting a Very Small Garden, Making the Most of the Back, A Town Square.

All Contained in One Royal Quarto Volume. Full Cloth. Price, $2.50, prepaid.

Illustrated with over fifty Plans, Diagrams and Illustrations, with lucid descriptive text and all necessary information for the development of Home and Public Grounds, showing principles and adaptations of planting suitable to all requirements from Villa to Mansion. Superbly printed, in new clear type, on the finest wood cut paper.

THE FLORISTS' EXCHANGE, 2 to 8 Duane Street, New York.

Cyclopedia of American Horticulture

THIS great work comprises directions for the cultivation of horticultural crops and original descriptions of all the species of Fruits, Vegetables, Flowers, and ornamental plants known to be in the market in the United States and Canada.

BY L. H. BAILEY, OF CORNELL UNIVERSITY, ASSISTED BY WILHELM MILLER AND MANY EXPERT CULTIVATORS AND BOTANISTS.

In Four Quarto Volumes. Illustrated With Over 2000 Original Engravings.

VOLUME ONE (A TO D, 509 PAGES, 743 ILLUSTRATIONS 9 PLATES) IS NOW READY FOR DELIVERY.

THOUGH distinctly an American work, not only plants indigenous to the North American continent are mentioned, but also all the species known to be in the horticultural trade in North America, of whatever origin. It is really a survey of the cultivated plants of the world.

The chief characteristics of this great work are comprised in our describing its source, scope, and general features. It is **AUTHORITATIVE** since its contributors are the best specialists in America, and there will be at least 5000 signed contributions from the best-known horticulturists, cultivators, and botanists in this country and in Europe. It is also most **COMPREHENSIVE** in that it presents for the first time in carefully arranged and perfectly accessible form the best knowledge of the best specialists upon greenhouse and garden practice, fruit growing, vegetable culture, forestry and the like. It is moreover fresh, entirely **ORIGINAL**; not a rehash of old material, old cuts, etc. The articles are specially prepared and illustrated for this work alone; while the trained botanist discusses the botanical features of the important commercial plants, practical cultivators submit observations on their culture, marketing, and the like, so that the reader has before him the very best practice in the most favorable localities for the perfection of any fruit, vegetable, or economic plant. The arrangement is very systematic, clear and convenient for ready reference.

THE CYCLOPEDIA is to be completed in four handsome quarto volumes, embracing about 2000 pages, with more than that number of original illustrations. It is carefully printed upon specially made paper of a permanent character, and the work will be completed this year.

This book is sold only by subscription, and orders will be accepted for the full set only. For terms of subscription and all further information, address

BOOK DEPT. THE FLORISTS' EXCHANGE, Nos. 2 to 8 Duane Street, N. Y.

CLASSIFIED ADVERTISEMENTS.

Terms: Cash with Order.

These Columns are reserved for advertisements of Wants and Stores, Greenhouses, Land, Etc., For Sale or Rent, also Second-hand Materials

Rate 10 cents per line (6 words to a line), when set solid, without display.

Display advertisements, 15 cents per line (6 words to a line).

When answers are to be addressed care of this office, add ten cents to cover expense of forwarding.

No advertisement taken for less than 50 cents, except Situations Wanted.

SITUATIONS WANTED.

COMPETENT lady stenographer desires position references. Address B. V., care of Florists Exchange.

SITUATION wanted by German, 29, single, as assistant, commercial or private place. C. B., care Florists' Exchange.

SITUATION wanted by A1 grower; would work on percentage if place in first-class condition. B. T., care Florists' Exchange.

SITUATION wanted in greenhouse by a German gardener; three years in the country. L. Gsh. 150 Central Avenue, Brooklyn, N. Y.

SITUATION wanted by married man as foreman in commercial place. Up in all branches. Can take charge. A1 references. Address 111 Roseville Avenue, Roseville, N. J.

AN all-around, thorough and competent greenhouseman wants to change his present situation; well up in cut flowers and bedding plants; middle aged; married; German. Address B. W., care Florists' Exchange.

WANTED a situation as florist-grower of first-class roses, carnations, violets, 'mums and bedding plants; reference; married; give full particulars and wages paid in first letter. Address F. R., Oakbrook, Berks Co., Pa.

SITUATION wanted by German, 31, as foreman in private or commercial place. Experienced in palms, ferns and general greenhouse plants. Vicinity of New York preferred. In answering state particulars, wages paid, etc. C. C., care Florists' Exchange.

HELP WANTED.

WANTED Partner with $2,000, in established wholesale seed business in the South. Only concern of the kind in the State. Address for particulars, B. L., care Florists' Exchange.

WANTED—A steady reliable young man, fully competent to take charge of retail store; must be a good decorator and designer. Store within 75 miles of New York City. State wages and references. B. S., care of Florists' Exchange.

WANTED, a single young man with some experience in greenhouse work; will have care of horse and must be willing to make himself generally useful. State wages with board. Address Florist, P. O. Box 907, Schenectady, N. Y.

WANTED—nursery foreman; a superintendent for one of the largest American nurseries, mainly ornamental; must be competent to handle labor and cultivation with great skill, and have a knowledge of trees, shrubs, etc., and most economic methods in nursery work; only a man of the highest ability wanted, and such a man can receive fine inducements. Address "Nursery," P. O. Box 2718, New York City.

PARTNER WANTED WITH $5,000 to buy an interest and take the management of either the greenhouses or seed department of the largest seed and floral establishment in the South. For a bright, active man who is well up in the business, this is a rare opportunity to get an interest in a well-established business. Salary, $100 per month. Do not answer unless you mean business. For particulars apply to H. E., care of Florists' Exchange.

MISCELLANEOUS WANTS.

WANTED to rent, place of from 5,000 to 10,000 feet of glass in good condition; vicinity New York City. Alfred H. Walker, Queens, N. Y.

WANTED to buy on easy terms or to lease with the privilege of buying, a small retail florist business from 3,000 to 5,000 square feet of glass. Address B. Z., care Florists' Exchange.

BOILER wanted, hot water system, sufficient for greenhouse, 1700 square feet glass; must be in perfect condition. State maker, size, price f. o. b., how long used. Address Greenhouse, Box 48, Portsmouth, Va.

MISCELLANEOUS WANTS.

WANTED—BOUQUET GREEN AND running pine, 500 pounds each; advise with price. Melrose Floral Co., Harrisburg, Pa.

WANTED AT ONCE—50 PIN OAK, 50 Red Oak, 50 Black Oak, 50 White Oak; the above to be good stuff, 18 to 24 inches high. Fred. Boerner, Cape May City, N. J.

WANTED TO BUY SURPLUS STOCK of all kinds of plants Send description and lowest cash price. First-class stock wanted only. B. F. Barr, Lancaster, Pa.

WANTED—CARNATIONS, VIOLETS, Valley, and Bulbous Stock. Whatever good stock you have in the line of cut flowers, write us. We are the headquarters for the Brooklyn trade. All payments made weekly. Hicks & Crawbuck, Wholesale Commission Florists, 108 Livingston Street, Brooklyn.

BUSINESS OPPORTUNITIES.

FOUR greenhouses well stocked with pinks, smilax and plants; 16 miles from New York; bargain to the right man for cash. Address B. Y. care Florists' Exchange.

TO LET.—Range of Greenhouses, fully stocked with roses, carnations, Easter and Spring stuff. Located in large Eastern manufacturing city. Good established trade. Stock all in fine condition and will be sold at nominal price to person renting. C. A., care Florists' Exchange.

FOR SALE—Greenhouse property for $3200, worth $5000; established 11 years, the only florist near cemetery 6 greenhouses, 8000 sq. ft. glass, in good order, stocked, heated by hot water; mushroom cellar. 20 miles from New York 2 minutes from station. Size of land, 295x270 ft. (24 valuable building lots). For particulars, address B. G., care Florists' Exchange.

FOR SALE in Pennsylvania city of 10,000 inhabitants, at once or before May, greenhouses 123x25 and 77x18, built this summer, glass 16x24, good potting house, barn, delivery wagon, cold frames, Furman boiler, large lot, general greenhouse stock and tools. $4,500. Business established 6 years. Sale on account of unexpected family changes. For particulars address B. P., care Florists' Exchange.

FOR SALE—Greenhouse establishment of 40,000 feet of glass, 16 miles from Chicago, 75 trains a day on four railroads; houses built in 1891, heated by low-pressure steam, plant in perfect order; water supply from river; 5 houses of roses, 6 of carnations, 9 of miscellaneous stock, all in A1 condition. Thirteen acres fine land, or less if wanted, so located that side track can be put in cheaply. One and a half acres of peonies, some evergreens and shrubs. Terms reasonable. Correspondence and inspection invited. Address A. B., care Edgar Sanders, 1639 Belmont Ave. Chicago, Ill.

POTTERY FOR SALE- A SACRAFICE—at Westside Ave., N. J., three miles from New York on C.R.R. of N.J. Especially adapted to making flower pots. Good local market and shipping facilities. C. Robotham, 1069 Broad St., Newark, N. J.

MISCELLANEOUS.

FOR SALE—Complete files of Florists' Exchange for the years 1892-1899 inclusive; one volume in temporary binding; also American Florist for the years 1891-1900 inclusive, two volumes in bindings; all in good order; no reasonable offer refused. Alexander MacLellan, 33 Webster Street, Newport, R. I.

NOTICE!

Is herewith given that we have transferred our business from

Hollis, L. I., to ENGLEWOOD, N. J.

WILLIAM STUPPE.

FOR SALE—GREENHOUSE PROPERTY AT NYACK, N. Y. A plot 220x125 feet, on which are four Rosehouses, 100x18x6, each house heated by a No. 16 Hitchings Boiler, and seven houses, each about 64x11 feet, heated by flues. This property will be sold cheap to quick cash buyer.

HITCHINGS & CO., 233 Mercer St., New York.

Mention the Florists' Exchange when writing.

Buffalo.

Trade News.

Along retail lines, matters are running smoothly, with trade rather moderate in extent. The weather has hardly been conducive to good transient trade. Among retailers "coming-out" parties for débutantes have resulted in some fair business, and some functions coming off about the holidays promise some activity then.

Flowers are fairly plentiful; roses probably in the lead, regarding both supply and quality. Violets now are seen that may be called good, but are not so plentiful. Chrysanthemums are practically finished.

J. H. Rebstock and Palmer & Son are showing well-grown Harrisii blooms. The former now supplements a window display with a lot of single camellias that attract attention. S. A. Anderson recently made and packed up a bride's bouquet of valley so skillfully that its occasioned use four days later at Waco, Texas, whither it was carried, was favorably reported on as regards the condition of the blooms.

Here and There.

It is reported that S. J. Rebstock has recently erected two growing houses on Cayuga Street, in Williamsville, a suburb ten miles distant from town.

Wm. Scott had a specimen display of cut blooms of Timothy Eaton chrysanthemum, which called forth unusual admiration.

Our visitors included E. Ruhlman, Lockport, N. Y., and E. A. Butler, of Niagara Falls. The latter reports a recently improved retail business. VIDI.

St. Louis.

The Market.

Business the past week with some has been excellent; with others only fair. Thanksgiving trade was a little better than the average. Prices ruled about the same as last year, with a good supply of flowers to meet the demands. The only stock that went high was violets; they were held at $1.25 per 100 for California, and the retailers refused to take hold of them.

Prices of the leading stocks are as follows: Beauty, in fair supply, at $2 to $4 per dozen; other roses being 4c. to 6c., with demand and supply about equal; carnations have been a little scarce, and now fetch 2c. to 3c. In chrysanthemums little is to be had but the remnants, and they are not very good. Violets are still in short supply, and sell at 5c.

Notes.

John M. Hudson, who has been in business, wholesale and retail, several times, will try it gain this week, by opening up at 1212 Olive Street.

Mr. Rolker, of New York, is in town, with the agency of a large Boskoop and other foreign houses for the sale of the choicest shrubs, decorative plants and novelties. He is trying to get the Western people interested in this class of stock, and we truly hope he may succeed.

Mrs. C. A. Kuehn is reported quite ill.

The store men are now on the lookout for and buying up their Christmas stock in the line of azaleas, poinsettias, and such things. An extra good trade this season is expected. C. C. S.

Hamilton, Ont.

Trade for the past week has been very satisfactory; some trouble was experienced in getting enough stock. Roses are not very plentiful after two weeks of dull weather; the quality seems to keep up, however. Good stock has brought $1 per dozen. Carnations have sold at 40c. to 50c. per dozen. Violets are very scarce.

Miss Townsend has been receiving some first-class roses. Sones is sending in some very good chrysanthemums in pots; they are about the only marketable pot-grown stock that has come in this Fall.

The wind storm of November 23 destroyed some ventilators and other glass at Webster Bros., and with one or two others of the growers. The snow fall here was exceptionally light, and the ground is quite clear again.

Thos. Kilvington, the King Street florist, has proved a very efficient member of the Park Commission. Considerable tree planting has been done this Fall, under the direction of the Commissioners. The North End Park is soon to be graded and improved. The city of Ottawa appointed a florist to a similar position and has been, I believe, well pleased with the result.

BEAVER.

West Hoboken, N. J.—Following are the scores made by the North Hudson Florists' Bowling Club November 21:

	1	2	3	4

Chicago.

Thanksgiving Trade.

The early part of the week, when shipping stock was wanted, the supply in certain lines was insufficient, and prices kept stiff; by Wednesday, however, values gave way, except on strictly fancy stock. Everything got cleared off, notwithstanding that a vast quantity was thrown on the market, especially of chrysanthemums, of which probably 60,000 to 70,000 were disposed of during the four days. Very good flowers realized $1.50 to $2 down to 75c. and $1.

In roses, Beauty held their own, except extra long-stemmed stock, which lagged a little at $5 per dozen. Mediums went at from $2.50 to $3.50. Extra select tea roses held fairly well at $7 to $8, and do so yet, but the vast proportion went at $3 to $6; some below these figures. In carnations, fancies touched $4, more being sold at $3; good standards fetched $2, common sorts $1 to $1.50.

The present week opened up without much change, crops evidently being somewhat off, and quite cloudy weather not helping matters. Bridesmaid roses are coming in of better color.

The supply of violets is limited, and it is difficult to realize over $1.50 for the best. Romans and Paper Whites are in supply sufficient for the demand, being rather draggy at $3 to $4.

In green goods, smilax is coming in liberally, with no extra demand. Asparagus strings are scarcer, except A. Sprengeri, which is now a good seller, being also extensively grown. Hardy ferns have now reached $1.25 per 1,000; also galax leaves.

Among Christmas greens lycopodium is provokingly scarce. Wholesalers have made advance sales which it is impossible to fill except at a loss. It is not expected that these conditions can now change for the better. This does not affect the large dealers so much as the small retailers doing business in the suburbs.

Holly begins to arrive, and, so far, is well berried. This would be a good year to try laurel again, which is usually a poor-selling article here. Wild smilax will also, no doubt, be benefited by the scarcity of lycopodium, and so should the cheaper Southern holly, which is often sent here in great quantities and sold very cheaply.

Ilex verticellata, that found such a good demand last Christmas, is already seen around, but it's too early yet to say whether it will sell as well as last year. Some California pepper tree berries are also in evidence.

Round About.

The "Chicago Carnation Co.," mentioned last week as having been incorporated, is so far an enigma. The firm has nothing to do with the Chicago Carnation Co. of Joliet. The three incorporators named are not known florists.

S. Angel opened a new retail florist's store at 2358 Indiana Avenue on December 1.

Nathan Smith & Son sent to the city last week Lavender Queen, Chadwick, Nagoya, Goldmine and White Bonnaffon, besides hosts of other chrysanthemums.

All the parks have had good shows of chrysanthemums this Fall, and on Sundays and holidays the conservatories were greatly crowded by the masses, night as well as day exhibitions being provided, the former by electric light.

F. J. Foster, of St. Louis, was a visitor Monday.

We learn this (Tuesday) morning that Mrs. C. L. Washburn is a very sick woman. Another consultation of doctors is to be held. All sympathize with the afflicted lady and her family.

Ess.

Toronto.

Trade Items.

Business during the past week was very good, with generally plenty of stock. There has been a shortage in some lines, especially Beauty and violets.

The social season has opened well, and there is every prospect of a very good period. Roman hyacinths and Paper White narcissus are coming in freely. Chrysanthemums are becoming scarcer, but there are still some fine Golden Wedding, Toronto, and other good kinds offered, and I think there will be some good flowers until Christmas. The demand for violets is lively. Valley is coming in, and the demand is fairly good.

Some fine cyclamen are to be seen around. From what I observed I think there will be some well-flowered azaleas in for Christmas. T. M.

Montreal.

Trade Notes.

We are now in the midst of a term of the most depressing weather, a dreary mixture of snow, rain and slush. Flowers of all sorts are scarce; those obtainable are of a decidedly inferior quality. Chrysanthemums are largely finished; of those left, Gold Trophy, Niveus and Bonnaffon are the only cheerful-looking ones. Roses are very scarce locally, and the indications are that they will continue so for some time yet. Carnations are fairly plentiful, but in common with everything else, show the want of sunshine. Violets at present are unobtainable. Paper Whites and Romans are good, and just now form a welcome addition. Outside supplies seem to be suffering from the same trouble as local stock, and many are the complaints and deep the grumblings at the prices charged for such inferior stock as is being sent to the retailers from outside points. Retail trade is now fairly satisfactory.

Lachine Horticultural Society.

This society has entered another busy year and intends adding to the $100 balance over all expenses—the result of its initial year's work. A juvenile section has been added, with a 25c. entrance fee. Plants will be distributed free to members, and prizes awarded for best exhibited specimens at the Fall exhibitions. Public monthly meetings are arranged for the balance of the Winter at which papers on horticultural subjects will be read by competent men. At the last executive meeting a silver tea service was presented to the energetic secretary-treasurer, C. A. Smith, in recognition of his services the past year. In future the gentleman occupying this office will receive 10 per cent. of the gross receipts for his work. The first annual dinner will be held on the 15th inst. Several men of more than local reputation have signified their intention to be present. B.

Louisville, Ky.

During the past week the supply of good roses, carnations and violets has not equaled the demand. Chrysanthemums have held up well, the late flowers being very good. Thanksgiving trade was very satisfactory, especially the sale of chrysanthemums for the football games. J. S.

NEW MARGUERITE A Great Novelty for 1900.

A cross between the yellow and white, is a constant bloomer, flowers 4 to 5 inches in diameter; fine for cut flowers, will keep for two weeks after being cut. Center half yellow, outer half pure white. Makes a fine pot plant. Will send, free by mail, 12 plants for $1.25; 6 plants, 75 cts. Order now if you want it.

Boston.

Trade Notes.

Business is now somewhat quiet again after the rush of Thanksgiving Day. Friday and Saturday last stock was very short, and the values reached on Thursday were maintained on what little was obtainable; but good bright weather Saturday and Sunday improved the supply on Monday, and prices began to totter at once. Since then, however, the weather has changed to dull days with rain or snow; the supply has not increased materially and the prices of Monday, which were lower than those of Wednesday and Thursday last week, have held out up to present writing (Wednesday, December 5).

In roses American Beauty do fairly well, the extra grades going at $6 per dozen, with smaller sizes down to $1 per dozen and less. Bride and Bridesmaid have improved in quality, but as yet are hardly up to the standard for this season generally. Kaiserin are not as good as Bride, and Carnot of good quality are scarce, selling well at $12.50 to $16 for extra stock. Red roses are short.

Carnations are now more plentiful. Fancy grades of ordinary varieties make $2.50 and $3 per 100, a few special fancies reaching $4; but the general run is from $2 to $2.50, with poorer grades at $1 and $1.50 per 100.

Chrysanthemums were pretty well cut out last week. There are still, however, a few good flowers on the market, which range in price from $1 to $1.50 per dozen, except for fancy and special grades, the former making $1.75 and $2 for fine stock, and the specials, which must be extra fine, as high as $2.50 per dozen.

Violets continue short and good stock sells without trouble at good figures. A few extras make $1.25, but this class of stock is scarce. Valley is in good supply, and does well at from $3 to $4 per 100. Harrisii lilies find more or less of a steady demand at $8 to $12.50 per 100. Paper Whites and Romans are becoming very plentiful. Mignonette of good quality sells well at $2.50 to $3 per 100.

Round About.

R. & J. Farquhar & Co. are now busy fitting up their new store on South Market Street. They have taken a whole building, comprising six large floors, which will increase their space greatly. The ground floor is nearly ready and will be devoted to the every-day needs of their customers, while the offices will occupy no little part of the second floor. The third and fourth floors will be devoted to flower and vegetable seeds, and the fifth to grass seeds; while the upper one will be found useful for the heavy line of supplies always carried.

N. F. McCarthy and William F. Malloy have been gone for about ten days on a trip South, in the vicinity of Norfolk, Va.

Freeman & Fletcher, of Auburndale, have opened a retail store at 212 Moody Street, Waltham, Mass.

Sutherland is receiving daily shipments of some very fine fancy carnations and extra fine Camphell violets.

Welch Bros. are handling some high-grade roses. Beauty, Bride, and Bridesmaid are excellent.

Elisha N. Peirce, of E. N. Peirce & Sons, was elected alderman at the city election in Waltham on Tuesday of last week.

The sixth annual reunion of the employees of Joseph Breck & Sons, which was held on Tuesday evening at the American House, took the form of a dinner and dance. The employers were represented by E. L. Hatch, the general manager, and Archibald Smith, manager of the seed department. After the dinner and the subsequent speech-making, dancing was indulged in, the floor being under the direction of Albert Wearner. About 150 persons were present.

Wm. A. Bock will have a fine lot of azaleas and Chinese primroses in flower for the Christmas trade, besides his usual large collection of palms, ferns, etc. The Boston fern is in excellent condition.

Henry M. Robinson & Co. are now very busy preparing for the holiday business in greens, and anticipate a larger and finer stock of all kinds of goods than ever before offered in their line.

E. N. Peirce & Sons will have a fine lot of azaleas in flower for Christmas. They are now bringing in some Simon Mardner, dark pink, and Denteche Perle, white, which are finely flowered for this season.

Thomas Roland's Gloire de Lorraine begonias are very fine, and together with a nice lot of cyclamen in five-inch pots and six-inch pans, should prove good sellers for Christmas. F. J. N.

Newport, R. I.

Officers Elected.

The election of officers by the Newport Horticultural Society took place on the 28th ult. About sixty members were present. The annual reports read show the society to be in a highly prosperous condition, with a total membership of 230. The prospect for effective work is good. It was voted to change the nights for meetings from the second and fourth Wednesday evenings in each month to the first and third Wednesday. Votes of thanks were passed to the retiring officers.

The society is to be congratulated on its choice of officers and committees. Richard Gardner, the new president, is well entitled to the honor, being one of the six gentlemen who founded the society 11 years ago. He has held the office of treasurer for the past ten years. Andrew K. McMahon, the new treasurer, has also been identified with the society almost from its inception.

Officers elected were: President, Richard Gardner; first vice-president, Charles D. Stark; second vice-president, Louis Ziegler; recording secretary, Thomas Fieldhouse; financial secretary, Andrew S. Meikle; treasurer, Andrew K. McMahon. Executive Committee—Richard Gardner, Thomas Fieldhouse, Andrew S. Meikle, Andrew K. McMahon, Robert Laurie, Jas. McLeish, Robert Johnston, Arthur Griffin, Bruce Butterton, Jas. Boyd, Benjamin F. Tanner and Charles D. Stark. Auditing Committee—Thatcher Bowler, W. H. Wolcott and Louis Shantsler.

Rose Sports.

One of our gardeners has a pink sport from the rose Liberty, also a pink sport from American Beauty. The latter is almost identical with the Queen of Edgely. MAC.

Orange, N. J.

The regular meeting of the New Jersey Floricultural Society occurred Wednesday, December 5. The annual election of officers resulted as follows: President, John Hayes; vice-president, Diederich Kindsgrab; secretary, George Smith; treasurer, Malcolm MacRorie. John McGowan and David Christie were elected to active membership, and Austin Colgate was made an associate member. The annual dinner will occur the second week in January, the exact date to be fixed by the Executive Committee.

J. B. D.

Worcester, Mass.

The annual meeting of the Worcester County Agricultural Society was held at Horticultural Hall, Tuesday, November 27. Henry S. Stockwell, of Sutton, was elected president, E. P. Curtis and F. L. Chamberlain, vice-presidents. This society is in a flourishing condition. It owns 46 acres, well fitted up for fairs, with all bills paid, and $45,000 surplus. There will probably be a large fair held September, 1901.

There has been no chrysanthemum show held here this Fall. Some fine flowers have been grown, and found a ready sale. J.

Cincinnati.

Trade News.

Thanksgiving trade was all that we could desire, plenty of stock and of very good quality. Prices were not advanced much. The outlook for Christmas in some lines is good; especially is this true of bulbous stock, Paper White narcissus, Roman hyacinths, and lily of the valley; also violets. Carnations will be a little scarce, as will roses. At this writing the latter are coming in lively, and I am afraid that by the time we want them for Christmas they will be hard to obtain. Chrysanthemums are still in evidence, and the best fetch $1.75 per dozen.

Jottings.

Thomas Windram left December 8 for a few weeks' hunting in Indian Territory.

R. Witterstaetter is busy getting his carnations in shape for the coming shows.

The first carnation meeting of the Cincinnati Florists' Society occurs Saturday, December 8. We look for a fine display.

Thrips seems to be getting in its work on Ethel Crocker in this section and is telling badly on the plants. Genevieve Lord is looking fine and will be right for the holidays. This variety is certainly doing all the introducers said it would.

Fred Gear has given notice of his removal to his new store at 1113 Vine Street on or about February 1.

Martin Renkauf, of Bayersdorfer & Co., Philadelphia, was here this week.

E. G. GILLETT.

TRIANGULAR

STRENGTH. DURABILITY.
LIGHTNESS. POSTAGE SAVER.

The Triangular Tube is the result of a large and varied experience in the manufacture and sale of devices for mailing and expressing. It is adapted for enclosing Plants and Cuttings, Cut Flowers, Bulbs, and for an infinite variety of uses.
This Tube is made to any size required, and a variety of styles.
It can be shipped flat, with flap gummed ready for sealing; occupying very little space, and convenient for addressing.
Furnished with or without extension paper ends for tucking in. Making a secure package, easy of examination. Ordinarily paper ends are not required; the triangle **holds** the contents much firmer than the round tube. In using this device there is **absolute** security against injury, both in **transit** and in **removal** of contents. It is **positively** many times stronger than **any** other device on the market. **A trial is all we ask.**

AMERICAN SEED TRADE ASSOCIATION.

ALBERT McCULLOUGH, Cincinnati, O., President; F. W. BOLGIANO, First Vice-President; S. G. COURTEEN, Milwaukee, Wis., Second Vice-President; S. F. WILLARD, Wethersfield, Conn., Secretary and Treasurer.

Points and information from seedsmen, and all interested in this column, solicited. Address EDITOR SEED TRADE, care of FLORISTS' EXCHANGE, P. O. BOX 1697, New York.

Hamilton, Ont.—Notice has been given of the formation of the Robert Evans Seed Company, Limited, with a capital of $50,000, head office in Hamilton, to take over the stock in trade, good-will and assets of the late firm of Robert Evans & Co., of Hamilton. The provisional directors of the new company are Richard C. Steele and Sylvester E. Briggs, the well-known seedsmen of Toronto, and James W. Hogg, of Hamilton.

Des Moines, Ia.—The employees of the Iowa Seed Company gave a party to the employees of the company's greenhouses and former employees December 1. A large gathering was present. The evening was pleasantly passed in listening to music rendered by Miss Madge Howell, songs by Mrs. Reinson and a recitation by Miss McNall. Toasts were extended by Messrs. Page, manager of the company; Reinson, foreman of the greenhouses; J. N. Albright, bookkeeper. John Hurtzneil, father of the president of the company, favored the assembly with a short story of his farm life when he was a young man in the old country.

A Valuable Iris.

The veteran Peter Barr sends us from Australia a newspaper clipping regarding a new iris, Painted Lady, exhibited at a flower show in Tatura, N. S. W., by Miss Love. Mr. Barr gives a description of the flower in the following terms: "An expert gave it as his opinion that no iris of so much refined beauty had ever before been seen in this or any other country. It belongs to the group commonly known as German iris. The flower is pure white and consists of three upright standards and three falls. Each of these petals are veined all over with rich rosy red. The pitcloid stigmas from under which runs the primrose beard are of the purest white; up the center of each runs a rosy red beam, terminating in a feathery, club-like knob. He estimates the value of the stock of this truly beautiful iris at £50, and congratulates Miss Love in having raised an iris worthy of world-wide fame."

Import and Export Statistics.

The dutiable imports of plants, trees, shrubs and vines amounted to $165,437 in October, 1900, against $121,349 in the same month of last year.

The free imports of seeds amounted in October, 1900, to $107,278, against $60,718, the value of the imports of October, 1899.

The dutiable imports of seed amounted to $40.159 in October, 1900, against $50,432 in October of the previous year.

The exports of seeds to other countries amounted to $1,591,430, in October, 1900, against $1,746,663, in the same month of 1899.

The countries to which the United States exported seeds were the United Kingdom, which received shipments to the value of $417,306 in October, 1900, against $514,359 in the same month of 1899.

Shipments to France amounted to $86,022 in October, 1900, against $67,782 in the same month last year.

Germany imported seed from the United States in October, 1900, to the value of $328,434, against $343,457 in October, 1899.

Exports to other European countries amounted to $650,725 in October, 1900, against $335,736 in October, 1899.

British North America received exports to the amount of $95,544 in October, 1900, against $481,287 in the same month of 1899.

European Notes.

In spite of the fact that rain has fallen for twenty-one days during November, your readers will learn with surprise that the watercourses are still comparatively dry, for the total rainfall in northern Europe has been less than two inches. Practically the same conditions prevail over the whole western section and the greater part of the midland, but it is only between Rome and Naples that floods have appeared. From every quarter comes the cry "we need sun." Capsicums, egg plants, the second crops of dwarf beans, with many other late ripening articles, are still green and full of moisture. The one sharp frost already reported arrested growth, but did not ripen, and the warm moisture makes matters worse. England has had only 25 hours of bright sunshine in 30 days, and many other parts of Europe have suffered almost as much, so that practical seedsmen on your side can easily understand any delays in delivery.

The absence of frost enables us to continue the work of transplanting turnips, rutabagas and mangels with fair success. Contrary to expectation, the plants of the latter are in much better condition than either of the two first named. Many lots of turnip are very sickly, particularly the yellow-fleshed varieties.

The demand for seeds continues exceptionally good, but supplies are lacking. An exception occurs in connection with the Giant Zittauer onion, of which the crop has proved a large one.

Market seeds show very little change except a sharp rise in the value of both white and brown mustard. The recent flutter in Alsyke clover has subsided and prices have dropped below the former level. In bird seeds a complete failure in the Indian crop of Inga (Rudbeckia) is reported, and only one very small parcel is left over from last year.

EUROPEAN SEEDS.

Worthy of Emulation.

Dean Alvord, the projector of Prospect Park South, Brooklyn, N. Y., has offered a series of cash prizes, aggregating $500, open to competition by the people of Brooklyn, with respect to the decoration of their home grounds. The division of the several prizes offered is as follows:

1. One hundred dollars for the grounds of detached residence showing greatest improvement between now and time of award, June 15, 1901.

2. One hundred dollars for the grounds of house standing in block showing greatest improvement between now and time of award, June 15, 1901.

3. Fifty dollars for best-kept plot 20 x 100 feet of house in block.

4. Fifty dollars for best-kept plot over 20 x 100 feet of house in block.

5. Fifty dollars for best-kept detached plot.

6. Fifty dollars for best window garden.

7. Fifty dollars for best back yard.

8. Fifty dollars for best method of concealing clothes poles from view.

The judges to be chosen will be among Brooklyn's representative citizens and will be qualified for their work.

The names and addresses of all those desiring to compete, giving the prizes for which they enter, should be sent to Mr. Alvord on or before February 1, 1901.

NURSERY DEPARTMENT.

AMERICAN ASSOCIATION OF NURSERYMEN.

THEODORE J. SMITH, Geneva, N. Y., President; N. W. HALE, Knoxville, Tenn., Vice-President; GEORGE C. SEAGER, Rochester, N. Y., Secretary; C. L. YATES, Rochester, N. Y., Treasurer.

Thomas Schreiner, a well-known horticulturist of Troy township, Venango County, Pa., died December 6.

Plainfield, N. J.—W. H. Forestel has, says the New York Herald, received word that he is an heir to part of a fortune of $5,000,000, left in Australia by a bachelor granduncle who died several years ago.

Rochester, N. Y.—George Ellwanger, of Ellwanger & Barry, celebrated his eighty-fourth birthday on December 2 last by giving a dinner at the Genesee Valley Club, to the trustees of the Reynolds Library. At the dinner an original and exquisite poem, entitled "The Vespers of the Flowers," was read by Joseph O'Connor, literary editor of the *Post Express*.

Sowing Acorns, Hickories, etc.—The quickened demand for most all kinds of nursery stock has caused a perceptible diminution of many varieties, and in many nurseries propagation is the order of the day. In this line seed sowing occupies a prominent place, and just now the falling acorns, hickories and walnuts suggest a few lines concerning them. Acorns are of two kinds, one section requiring immediate sowing, the other sowing either in Autumn or Spring. In the first section are the white chestnut, chinquapin, obtusiloba, virens and rock chestnut. In the Northern States these drop from the trees in October, and as soon as they reach damp ground start to sprout. If gathered from the ground before they sprout they may be kept a short time, but only for a few weeks.

The rest of the sorts, as well as walnuts, hickories and sweet chestnuts, may be sown either in Autumn or Spring. If kept till Spring they must be in some building, so protected that they will not only not lose weight by drying, but rather gain it by absorption. There is no better way than to place them in barrels, mixed with fine, almost dry soil. From this material they will take up a little moisture, and when Spring comes will be in good condition for sowing. Treated in this way, full success usually follows.

Hardy Chrysanthemums.—The exhibits of hardy chrysanthemums seen at the various shows held in this vicinity this Fall have comprised altogether the pompon class. While these are undoubtedly the hardiest sorts, are they the only ones hardy? Is it generally known that many of the large flowered ones are hardy? At least, it is the case here. In many of the yards in Philadelphia Gloriosum has been familiar for years, and in my own garden, in a border along the base of a high board fence, Maud Dean and Mrs. Murdock have flourished for several years. The garden is well sheltered, otherwise the plants take the weather as it comes. I am sure many other sorts besides these would do as well.

Even if not as hardy as the pompons, almost any of the large flowering kinds would survive if covered with a few forest leaves, and what more beautiful sight could there be than that made by a collection of these plants in the Fall? As many sorts flower much earlier than others, it is better to select these for outdoor culture, to have the benefit of the flowers ere frost catches them. If the plants were grown where customers could see them, it is more than probable a great many would be called for for permanent planting.

Hardy Evergreen Fern.—Hardy ferns have been in great requisition of late, keeping pace with the general demand for all kinds of plants which the last year or two has witnessed. It is not my purpose now to mention a general list of these ferns, but observing today a fine specimen of the marginal shield fern, Aspidium marginale, leads me to call attention to it as certainly the best of the evergreen ferns of this vicinity. There are other evergreen species, notably Aspidium spinulosum, A. acrostichoides, and A. pinnatifidum, and Polypodium vulgare and the wulking fern, with a few others, but superior to all rises A. marginale. Good specimens of this species will have fronds two feet in length, all rising from a central circle, and waving gracefully outward, forming a nest, which would as well entitle it to the name "bird's nest" fern as the one which now claims it. The home of this fern is on moist, rocky places. Hereabouts it is rarely found on the level ground, but usually on rocks, in ravines, where the rotting leaves and moisture sustain it. Just now this fern is much in evidence in its native retreats, its handsome, large, green fronds rising from the lately fallen leaves of the forest trees. As many creeping or low-growing evergreens, such as Chimaphila maculata, Mitchella repens, Goodyera pubescens, Pyrola secunda and others, are well under the leaves, this noble fern is the only green-foliaged plant to be seen in many places. It adapts itself readily to garden culture when in suitable situations.

Outlook for the Nursery Business.—Continuing my remarks on the prospects of the nursery business, I will now speak of shrubs. The call for these has been even greater than that for trees. Landscape gardeners and park superintendents use them in such large quantities that hundreds and even thousands of one kind are often purchased by a single customer. As with trees, it is not altogether the slight advance in price that increases the dollars. It is the larger sales that does it. While the old favorites among shrubs, such as weigelas, mock oranges, spiræas, golden bells and the like are much called for, as they always will be, there is a marked increased demand for native shrubs of all kinds, including sorts by no means abundant in most collections. Of these there are the various azaleas, Baccharis halimifolia, Cænothus americanus, Comptonia asplenifolia, the different dogwoods, hazel, hawthorns in several species, Dirca palustris, Fothergilla alnifolia, witch hazel, hydrangeas, wax myrtle, Pyrus arbutifolia, the several sumachs, wild roses, Stuartia pentagyna, vaccinium and viburnums, to say nothing of the more common natives, such as the sweet shrub and the white fringe.

These shrubs are sold in small sizes. Well rooted, two years from cuttings, answers often, as growth is rapid and freights are low on such stock.

The nurseryman or florist who has a good local trade wants better stock than this for his customers. That of about three feet, young and fairly bushy, is the kind. This class of stock generally has to stand by itself, and it must make some appearance at once.

New places will take the well-known shrubs first, as they should do, for the fact of their being well known guarantees them merit. There is much more call for shrubs for Summer and Fall display than before. There are sorts to fill such requirements. If not flowers, there is fruit or foliage. The carefully gotten-up retail catalogues of the large nursery firms give almost all the desired informa-

tion on these points, and it should not be difficult for one who has the planting of grounds to set out kinds from which interesting features will be displayed from one or the other the whole season through. Some there are, such as Pyrus arbutifolia, Photinia villosa, the various hawthorns and many viburnums, which give both handsome flowers in Spring and bright berries in the Fall. There is nothing like a few good specimens in one's own grounds to show customers what you recommend. Every day brings to the nurseryman those who are about to plant shrubs for the first time. But very few of these intending purchasers know one shrub from another. To be able to show a good specimen of what your salable plants represent, or even a photograph of them, will help make a sale. The sale of shrubs has been heavy this Autumn, and the indications are that Spring will find the nurseryman exceedingly busy.

Pruning Evergreen Hedges.

Editor Florists' Exchange.

I notice Mr. Ouwerkerk's answer in regard to the pruning of evergreen hedges. As many of your readers may forget what my advice was to which Mr. Onwerkerk evidently desires to object, may I ask you to kindly reprint it? This is it: "Inquiries are frequently made as to the proper time to prune evergreen hedges. The work of pruning should never be deferred till the approach of cold weather. The clipping of outside branches exposes the inner and weaker ones, which from their confined position have not been able to perfect themselves, and sudden exposure to freezing weather injures them. This is often seen when two evergreens are growing close together. Remove one of them and plant it apart, and where the branches had interlaced, injury will occur should sudden cold come. Pruning late in the season acts in the same way. The work should not be done later than a month at least in advance of freezing weather. Early Spring is a good time to prune an uneven evergreen hedge or one getting too large. But do not prune below live foliage, as it is difficult to induce evergreens to break afresh from old wood. This and another pruning in midsummer is usually sufficient, though where bushiness is much desired two Summer prunings may be given."

I may say now that I entirely stand by the advice there given. In reply to my article, Mr. Onwerkerk wrote you that my "remarks were wide of the mark," but after reading what he had to say I failed to see wherein he advised anything to the contrary. He now writes again, and I submit that he still fails to show any difference. In fact, he admits that he failed to see that August and September were meant by me, as he now does, in reference to the late Summer pruning. As to whether early Spring starts in April or May, it depends altogether on what place one has in mind. Last season the Rochester nurserymen would have been glad had it started at the close of March, instead of near the first of May. In this connection I was speaking of uneven hedges, or those of large size which required cutting back. As a matter of fact, our hedges require but little pruning at that time, having been properly pruned in late Summer.

Mr. Ouwerkerk tells us in his latest communication of one or two things he did not know, and I would suggest to him in all kindness that there are quite a number of things he does not know. For instance, he has spoken twice of waiting in Spring till growth starts, in order to see what *dead branches* to cut out of the hedge before pruning it. Will he excuse me suggesting further that the one who has a lot of dead branches to cut out of a hedge does not know how to prune it? Our gardeners do not expect nor do they find dead branches to cut out.

I would call his attention to his contradiction of himself in regard to the sudden exposure of weak inside shoots to cold. In his first letter he says: "Warm or cold weather has not much to do with it." In his last, "some do succumb to exposure to the cold." A great many do, Mr. Ouwerkerk.

I may also, for the benefit of your readers, refer to what Mr. Ouwerkerk says of the arborvitæ, viz., that it "can be cut at any length, as the old wood breaks easily." I would warn those having arborvitæ hedges not to be misled by this. The plants will break afresh, it is true, but it will be years before a good appearance will be made.

JOSEPH MEEHAN.

Indianapolis.

Trade for Thanksgiving was not altogether satisfactory. Business all through the month was slow and inactive. Chrysanthemums were plentiful, but mostly of poor quality. Prices ranged somewhat lower than last year. Shipped stock was not up to prices demanded. Carnations sold well; roses also, while violets were scarce, and more could have been disposed of. Good chrysanthemum plants could not be had; there seemed to be a demand for good, large plants.

The regular monthly meeting of the Florists' Association was held at the residence of Wm. Langstaff by invitation. Unfortunately the weather was very unfavorable for a large attendance. After the business of the meeting, those present were entertained in royal style by the host. Arrangements were made for the January meeting. A special committee was appointed to arrange for an extensive display of flowers and plants at the Horticultural Rooms in the State House. The committee was also instructed to have some kind of an entertainment in the evening.

Henry Geiger has started in the retail florist business at 39th and Cornelius Streets, with one house, 100x20 feet, shed and office.

The prospects for a good holiday trade are promising; stock generally is in good condition.

A movement is on foot among the principal retail merchants along several squares to make a uniform decoration along the streets; probably arches of green, with colored electric lights. The daily papers are also urging everybody to decorate. W. B.

New Brighton, Pa.

W. H. Elverson Pottery Co. has purchased from the Pittsburg Clay Mfg., Co. that portion of their business comprising flower pots, vases, hanging baskets, etc.

Toledo, O.

George F. Dixon has been removed to the infirmary suffering from sore throat and rheumatism. He came here about seven years ago from New York, and was employed by his uncle, C. N. Dixon.

WANTED to buy on easy terms or to lease with the privilege of buying a small retail florist business from 3,000 to 5,000 square feet of glass. Address B. Z., care Florists' Exchange.

Chicago.

State of Trade.

Business is somewhat uncertain, and hardly what it should be for the time of year; nor is it quite up to the standard of last year at this period. Prices are fairly well maintained at quotation rates.

In roses, Beauty are now good, and owing to increased plantings there is plenty of stock around. Meteor are none too plentiful. We want another good Winter red rose, a niche which Liberty, so far, does not fill, although later better things are expected of it. Fancy Bride and Bridesmaid as usual sell first.

The carnation market opened up this week with white the scarcest. The very best high-grade stock is not in yet, especially that with good long stems. The new varieties, perhaps owing to too weak cuttings, are not up to expectations.

Violets are far from plentiful, especially fancy stock. It is probable that much of this is sent direct to the largest retailers, hence does not appear in the open market.

Chrysanthemums are still in evidence. Fancy flowers, however, are now about over; the best bring $2 to $2.50. Chrysanthemums will hang on in this market until Christmas, but the demand is slower.

Poinsettias are showing up as Christmas approaches.

Club Meeting.

The regular meeting on December 7 was fairly well attended, as it was known that rose culture would be the topic discussed. George Collins, foreman for Peter Reinberg, talked about their new style of planting American Beauty, in the center benches only, while Paul Kopanka, with George Reinberg, treated the subject more generally. Both papers will be found in another column.

A communication from the Galveston florists was read, thanking the club for the money sent.

W. N. Rudd reported on the banquet held during the show week. Thanks in connection therewith were extended to E. C. Amling, M. Barker, O. P. Bassett, O. J. Freedman, J. B. Deamud, James Hartshorne, E. H. Hunt, Kennicott Bros. Co., A. Lange, McKellar & Winterson, George and Peter Reinberg, J. D. Thompson, Wieland & Risch, E. Wienhoeber and Wietor Bros. for contributions toward entertaining visiting florists.

A. G. Prince has closed the city salesroom of the Hinsdale Rose Co. and hereafter will act in the capacity of manager at the Hinsdale plant. The entire products of the two establishments of the Hinsdale Rose Co. and the large establishment of Henry Payne will henceforth be consigned to E. H. Hunt on commission.

Round About.

Joseph Reeves has opened a retail flower store at 55th Street and Washington Avenue.

E. G. Hill was in the city the past week with exhibits of the new roses Queen of Edgely, Marquis de Litta and Robert Scott. George Hoppe, of Hoppe & Lemke, was also here with two seedling roses from Testout and Bridesmaid, color pink, suggesting Carnot in make-up.

E. R. Tauch has withdrawn from the Harms Park Floral Co. The business will be continued under the old title by A. B. Everett and Louis Gregor.

We are happy to state that Mrs. C. L. Washburn is gaining in strength and has been removed to her home at Hinsdale.

Charles Wiffin, Desplaines, has added to his plant a new carnation house, 16 by 144 feet.

At Vaughan's seed store are seen some neat plants of the charming evergreen Biota aurea nana, also splendid specimens of Begonia Gloire de Lorraine.

The George Witthold Co. have a canopy decoration over the sidewalk in front of their Clark Street store, which Paul Blome looks after.

Fred Breitmeyer, of Detroit, and George L. Stiles, of Oklahoma, were visitors.

ESS.

MISCELLANEOUS WANTS.

WANTED—nursery foreman; a superintendent for one of the largest American nurseries, mainly ornamental; must be competent to handle labor and cultivation with great skill, and have a knowledge of trees, shrubs, etc., and most economic methods in nursery work; only a man of the highest ability wanted, and such a man can receive fine inducements. Address "Nursery," P. O. Box 2718, New York City.

WANTED—CARNATIONS, VIOLETS, Valley, and Bulbous Stock. Whatever good stock you have in the line of cut flowers, write us. We are the headquarters for the Brooklyn trade. All payments made weekly. Hicks & Crawbuck, Wholesale Commission Florists, 108 Livingston Street, Brooklyn.

BUSINESS OPPORTUNITIES.

FOUR greenhouses well stocked with pinks, smilax and plants; 16 miles from New York, bargain to the right man for cash. Address B. Y., care Florists' Exchange

FOR SALE or rent, two greenhouses, with or without residence, within six squares of Court House, no competition in cut flower growing; best chance in Ohio for right man. Address Mrs. M. E. Hover, Bellefontaine, Ohio.

FOR SALE—Greenhouse establishment of 40,000 feet of glass, 16 miles from Chicago, 75 trains a day on four railroads; houses built in 1891, heated by low-pressure steam, plant in perfect order; water supply from river; 5 houses of roses, 6 of carnations, 9 of miscellaneous stock, all in A1 condition. Thirteen acres fine land, or less if wanted, so located that side track can be put in cheaply. One and a half acres of peonies, some evergreens and shrubs. Terms reasonable. Correspondence and inspection invited. Address A. B., care Edgar Sanderson, 1639 Belmont Ave., Chicago, Ill.

POTTERY FOR SALE—A SACRIFICE—at Westside Ave., N. J., three miles from New York on C.R.R. of N.J. Especially adapted to making flower pots. Good local market and shipping facilities. C. Robotham, 1069 Broad st., Newark, N. J.

FOR SALE—GREENHOUSE PROPERTY AT NYACK, N.Y. A plot 220x125 feet, on which are four Rosehouses, 100x18x6, each house heated by a No. 16 Hitchings Boiler, and seven houses, each about 64x11 feet, heated by flues. This property will be sold cheap to quick cash buyer.

HITCHINGS & CO., 233 Mercer St., New York.

Mention the Florists' Exchange when writing.

New York.—The bowlers met on Monday afternoon; the following were the scores made:

	1	2	3
F. H. Traendly	180	177	188
T. Roehrs	146	168	152
L. C. Hafner	169	167	168
J. Donaldson	209	165	159
J. A. Shaw	146	163	140
T. J. Lang	190	184	167
A. S. Burns	157	151	153
G. Lescher	128	164	...
S. S. Butterfield	129	133	143
A. Herrington	91	98	96
J. A. Manda	131	139	188

New York vs. Flatbush.—A return match was played by these two clubs on Thursday night on the Flatbush alleys. The home team proved too strong for the visitors, winning by two out of the three games played. Each team has now scored a victory, and a third match will be in order after the holidays. There were many favorable comments upon the excellence of the alleys and the manner in which the Flatbush boys entertained the large crowd of visitors present. Separate alleys were at the disposal of the latter, where all had a good time. After the match a light lunch was served, while plenty of liquid refreshments and cigars were available throughout the evening. The scores made were as under:

NEW YORK.

	1	2	3
P. O'Mara	148	139	128
J. Thielmann	141	163	159
W. H. Siebrecht	130	132	117
L. C. Hafner	150	150	133
A. S. Burns	155	122	136
T. J. Lang	186	188	152
Totals	910	873	827

FLATBUSH.

	1	2	3
A. Zeller	143	144	131
L. Schmutz	111	148	140
T. J. Raynor	151	137	159
D. Y. Mellis	162	123	143
E. Dallednuze	152	162	178
P. Riley	142	160	131
Totals	867	894	900

The experts on the other alleys had to root for their favorites in the match, which in a measure accounts for the low scores made. Here are their figures:

	1	2	3
C. Wocker	115	134	100
Paps Zeller	92	107	98
A. Langjahr	94	110	76
J. I. Donlan	119	144	130

THE FLORISTS' EXCHANGE, $1.00 A YEAR.

Subscribe before the New Year commences.

Toronto.

All last week the weather was dull and dreary, with snow, sleet and rain, consequently but little bloom opened out. The demand for good stock was considerably above the supply and prices have gone away up. There are still considerable quantities of second-class roses around, but really good ones are scarce. Carnations are coming better, but they are bringing good prices. Chrysanthemums are nearly over. Violets are very scarce, and good ones are bringing fancy figures; the demand for this flower is very good. Valley, Romans and Paper Whites are coming in freely and generally find a ready sale—a sure sign that other stock is scarce.

Dunlop and Tidy are both showing good Liberty and Beauty roses, but they have not enough for the demand.

It is almost impossible to quote prices correctly, as they change so often. If we get a few days of good sunshine there will be a fine Christmas trade, for the demand will be good and there will then be stock to meet it. T. M.

Rochester, N. Y.

J. B. Keller's Sons report the demand for chrysanthemums at begianing of the season slow; prices lower; latter part the demand was good, but not equal to last year's prices, being 25 per cent. less. In colors yellow predominated, white next, other colors about equal. W.

The Dean Boiler Company at 2:15 p.m., December 10, received a telephonic order from the Massachusetts State Agricultural College at Amherst, Mass., for two hot water boilers to replace some boilers which had given out. The company shipped the two boilers on the 4-o'clock freight same afternoon, requiring only one and three-quarter hours in which to make the shipment.

NEW CARNATIONS

ADMIRAL CERVERA

A yellow and red striped, large flower, with fine stem; splendid grower and fine bloomer; beautiful keeper and splendid shipper.

GOETHE

A lovely light pink (in place of Daybreak), very large, fragrant flower, easy to grow and an early and continuous bloomer; will easily lead in its class. A splendid seller over the commission or retail counters.

Both of these varieties are in perfect health, and as they are two distinct colors you will need, you will make no mistake in trying them. Come and see them; it will pay you. Cuttings will be delivered as soon as ready.

$2.00 per doz.; $10.00 per 100; $47.50 per 500; $90.00 per 1000. **C. BESOLD, Mineola, L. I., N. Y.**

NEW CARNATIONS FOR 1901

LORNA (Dorner). Pure white, a decided improvement on White Cloud in size, habit, stem, form, color and continuous blooming.
$10.00 per 100; $75.00 per 1000.

MERMAID (Dorner). Salmon pink, large flower, good color, early and extremely free. Stem a little weak after transplanting, but improves quickly. A good summer bloomer in the field.
$6.00 per 100; $50.00 per 1000.

ROOSEVELT (Ward). Rich brilliant scarlet, shaded maroon. Early and free. The peer of all dark Carnations.
$12.00 per 100; $100.00 per 1000.

PROSPERITY (Dailledouze). White, overlaid with pink. An exceptionally large Carnation. The winner of the Lawson Gold Medal in 1900.
$15.00 per 100; $130.00 per 1000.

IRENE (Crabb & Hunter). Commercial pink Carnation. Free and continuous bloomer. $10.00 per 100; $75.00 per 1000.

Let us Book Your Orders Now for the New Varieties. Also for the 1900 Novelties—CROCKER, LAWSON, G. LORD, MARQUIS, OLYMPIA and PERU.

WE MAKE A SPECIALTY OF ROOTED CUTTINGS.

F. DORNER & SONS CO., La Fayette, Ind.

New and old varieties. Write for prices.

H. WEBER & SONS, Oakland, Md.
Mention the Florists' Exchange when writing.

ETHEL CROCKER

WHEN store men telegraph that they must have some Crocker for their customers, and commission men beg for consignments, in spite of the fact that there are plenty of other pinks on the market, it is a pretty sure sign that Crocker has some points of merit distinctive from the others and that there is an unfilled demand for the flower.

With the largest stock of this variety grown by any one grower in the country, I can fill your orders with carefully selected cuttings at **$4.00** per 100 or **$30.00** per 1000.

Send for list of other varieties.

Mention the Florists' Exchange when writing.

FOUNDED IN 1888.

FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the trade in general.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO., LTD.,

2, 4, 6, 8 Duane St., New York.

P. O. Box, 1697. Telephone 1854 John.

REGISTERED CABLE ADDRESS: Florex, New York.

SUBSCRIPTION, $1.00 PER YEAR

To United States, Canada and Mexico. To foreign countries in postal union $2.00. Payable in advance. The date on the address label indicates when subscription expires.

CHANGES OF ADDRESS.

When notifying the publishers to send the paper to a new address, give both old and new addresses.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISEMENTS, $1.25 PER INCH.

Special positions extra.
No advertisement less than 75 cents.
Discounts on continuous advertising.
For rates, on Wants, etc., see column for classified advertisements.
Copy must reach this office not later than Thursday in order to secure insertion in issue of the following Saturday.
Orders from unknown parties must be accompanied by cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The FLORISTS' EXCHANGE are headquarters for all standard books pertaining to the Florist, Nursery and Seed interests. Catalogue sent free on application.

Contents.

WORTHY OF EMULATION	1209

John Donn, of Baltimore, has opened a plant sanitarium, and the local papers have styled him a Doctor in Floral Surgery or D. F. S.

That New York will have a flower show in the Fall of 1901 is now an assured fact, thanks to the progressive spirit of President O'Mara and others of the members of the Florists' Club, and that the show will be a successful one from an exhibition standpoint goes without saying. In fact, it would be an insult to the florists and gardeners of the metropolis to predict otherwise. The schedule will be out in good time to allow of all necessary preparations being made by exhibitors; everybody will work with a will and in hearty sympathy with the project; the premium list is sure to be a satisfactory one; and New York will assume her wonted position as the leader in all matters horticultural in America.

GALVESTON RELIEF FUND.

Publishers Florists' Exchange:

I beg to acknowledge a further remittance through you for the Galveston Florists' Fund, to the amount of $64.30. At our meeting last Tuesday a special letter of thanks was ordered sent to the Morris County Gardeners and Florists' Society of Madison, N. J., on account of that society's untiring efforts to relieve our sufferings. Considering the area and field that the gentlemen of the above organization worked in for our benefit, it places them among the foremost workers for our cause.

I have also received a check to the amount of $19.30 from the Boston Horticultural Club, through its secretary, F. S. Davis. Kindly make note of same in your valuable paper. This remittance, added to the total as published in your issue of December 1, will make same correspond with my account. The shipment of 10,000 divers plants from the Good & Reese Co., of Springfield, Ohio, came through this week in good order, and are being distributed. Through some mistake of the shipping clerk, the plants were addressed to J. D. Pruessner, personally, instead of the Galveston florists, and in his care, and in consequence the express company presented a nice little bill for freight. The mistake is to be regretted, but we had to pay the charges, nevertheless, and have notified the Good & Reese Co. to try and have the money refunded.

We had a further donation of some fine strain of cyclamen seeds from Beaulieu, of Woodhaven, N. Y. A shipment of plants from C. Eisele, of Philadelphia, Pa., has also reached us in good condition; and the plans from Henry W. Gibbons, of New York, consisting of two complete sets of detail drawings of modern greenhouses, reached here safely.

Our chairman, J. D. Pruessaer, was instructed to kindly ask Mr. Ward to forward the articles of clothing by Mallory S. S. Line in care of the former, and we will pay the charges—that is, in case the express company should refuse to forward the package.

We have had some quite severe northers, and they denote a cold Winter. The sufferings from cold weather will be intense, because so many poor families have to live in tents, and have no prospects of being properly housed and cared for this Winter. There was a convention at Fort Worth, Texas, for the purpose of trying to induce the State Legislature to do something for our ill-fated city and county. The bulk of the work going on now is repair work, hardly any rebuilding. There are no theater or social functions of any kind this season, which in past years used to liven things in our lines. Still, we are thankful for the preservation of our lives, and in due course of time grit will accomplish the rest. I am inclined to strongly think that I will have to disobey rules and set apart a portion of the fund for distribution to enable our members to gladden the hearts of their little and dear ones for Christmas. Your appeal to your subscribers in a recent issue on our behalf is very touching, and may same have the desired effect.

We are again indebted to you for your kindness, and our feeble words of thanks are all that we can offer any of our donors in return. The Galveston florists wish each and every one of their benefactors a merry Christmas and a happy New Year, and renewed and increased success in the coming year, which all of them so justly deserve on account of their constant desire to relieve the sufferings of their fellow-men, and especially on account of their unceasing efforts on our behalf.

THE GALVESTON FLORISTS,
Per F. G. LAEVERENZ, Secretary.

We had a call from Otto Fehrlin, who is in the East looking around for a place to locate, having been obliged through circumstances over which he had no control to abandon the undertaking recently entered upon by him in St. Louis. Mr. Fehrlin, whose wife and little ones are still residing in Galveston until such time as he is enabled to settle in some favorable locality, gave us, in his own modest way, a most thrilling account of his experiences during the awful calamity that overtook his ill-fated city, and it was only necessary to hear these experiences from the lips of one of the sufferers to be fully impressed with the stupendous and heartrending nature of the devastation, and the great need for assistance to the craft there being cheerfully and extensively rendered. Beyond the monetary aid afforded by the trade, the Galveston florists will receive but little, the great bulk of the general money donations being drained for the reëstablishment of the city itself. Mr. Fehrlin reiterates, on behalf of his brother florists and himself, heartfelt thanks for the generous support already given by the trade; and it is safe to assert that were any correct realization of the extent of the losses and of the practically helpless condition of the Galveston florists to present itself to the minds of the American florist trade, a far greater amount than that already donated, and more truly representative of the well-known unbounded generosity of our craftsmen, would be willingly forthcoming. And for this we would enter an earnest plea.

Further Contributions Received.

I. L. Powell, Millbrook, N. Y..... $1.00

American Carnation Society.

NEW VARIETIES REGISTERED.

NORWAY, color pure white, a seedling of Mrs. Fisher. Flowers two and one-half to three and one-half inches in diameter; stems long, strong and graceful; delightfully fragrant and a good keeper and shipper. Splendid habit and of wonderfully vigorous growth.

EGYPT, color a rich, warm scarlet crimson; flowers averaging two and one-half to three inches, with an exquisite spicy odor, and borne on stems two and one-half to three feet in length. A continuous and free bloomer from November 1 to 15 and for the balance of the season. By H. Weber & Sons, Oakland, Md.

ALBERT M. HERR, Secretary.

Horticultural Society of New York.

This society held a meeting on Wednesday afternoon last, at the Berkeley Lyceum, James Wood, of Mt. Kisco, N. Y., presiding. The Committee on Nominations presented the following officers for election: President, James Wood; vice-presidents, Samuel Thorne, Dr. Hexamer, J. Crosby Brown, Geo. T. Powell and Spencer Trask; secretary, Leonard Barron, 136 Liberty Street, New York; treasurer, F. R. Neubold, Poughkeepsie, N. Y., with a council of 25 members. These gentlemen were duly elected.

Dr. N. L. Britton gave an interesting talk on European botanical gardens and museums, prefacing his remarks by an entertaining account of his visit to the Paris Exposition, where the collections of tuberous begonias and cacti greatly interested him. He secured 600 species of the latter for the New York Botanical Garden. The rhododendron plantings were superior to anything we have in this country, but we beat the French in the cultivation of cannas. In an annex to the exposition the doctor was greatly delighted with a collection of low-growing evergreens, which were planted for the special purpose of providing a covering for game. Dr. Britton stated that Berlin at the present day was the most active center in the world so far as botany was concerned. New greenhouses were being erected, and an attempt was making to show the plants from temperate countries in somewhat their natural relationship. Here was observed the most extensive collection of bromeliads that he had ever witnessed. A great feature was being made of the colonial department, where the various economic plants from the different colonies were collated. At Kew one of the most interesting features was the bamboo garden. The British Parliament is considering the advisability of erecting fireproof structures for the various herbarium collections at Kew, something that is very much needed.

Dr. Britton passed around photographs showing a weeping form of aspen that had developed in the grounds of the New York Botanical Garden, which created considerable interest.

Several new members were elected, and the society seems to be in a very flourishing condition, with a likelihood of accomplishing some very useful work in the near future.

There exist good grounds for the mild rebuke administered by President O'Mara at the last meeting of the New York Florists' Club with respect to trade usage in the matter of plant nomenclature. The convenient contractions of the names employed by growers and dealers and, unfortunately, by the trade press as well, are, to say the least, very undignified in many cases. Take, as examples, those cited by Mr. O'Mara.

Cattleyas are in trade parlance dubbed "cats;" Mrs. George M. Bradt carnation is resolved into "Brats," or "red Brats;" chrysanthemums into "mums." Then, too, we have cypripediums designated "sips or "cypes;" Bridesmaid rose abbreviated to "maid;" Golden Gate roses to "gates;" American Beauty roses to "butes," and so on.

As was pointed out, but little extra effort is necessary to give the correct appellation utterance, or to write it as it should be written.

The aim in the use of spoken or written plant nomenclature should be educational, without the slightest semblance of slang. We hope all interested will give heed to President O'Mara's caution against the present-day tendency to perpetuate a degenerative and ridiculous practice. We ourselves, being offenders in some degree, promise this for our part.

Society of American Florists and Ornamental Horticulturists.

DEPARTMENT OF PLANT REGISTRATION.

H. Weber & Sons, Oakland, Md., register new carnations as follows:

NORWAY, a seedling of Mrs. Fisher; color pure white; flowers two and one-half to three and one-half inches in diameter; fragrant; stems long and strong.

EGYPT, color scarlet crimson; flowers uniformly two and one-half to three inches in diameter; fragrant; stems two and one-half to three feet.

A. C. Zvolanek, Grand View, Somerset County, N. J., registers SWEET-PEA Miss FLORENCE E. DENZER, a white seedling between Zvolanek's Christmas and Emily Henderson; height four feet outdoors, five and one-half feet under glass. A continuous bloomer, especially adapted for Winter flowers; stems up to 16 inches long, usually bearing three flowers each; foliage narrow and of a dark green color.

WM. J. STEWART, Secretary.

OBITUARY.

Wm. J. Palmer, Sr.

At the moment of going to press we learn, with regret, of the death of Wm. J. Palmer, Sr., of Buffalo, which occurred Thursday, December 13. Pneumonia and heart failure were the cause of death.

James Brockie.

James Brockie, for many years florist at Cave Hill Cemetery, Louisville, Ky., died November 28, of pneumonia, aged 55. Deceased was born in Scotland, and came to Louisville when quite a young man. He leaves a widow and two children.

H. W. S. Cleveland.

H. W. S. Cleveland, a prominent landscape gardener, died Wednesday, December 5, at the home of his son, R. D. Cleveland, at Hinsdale, Ill. Mr. Cleveland was 86 years of age. He devoted many years to the improvement of landscape in the parks of Chicago and Minneapolis. At the time of the planning of Washington Park he took charge, and the original gardening in the park was done after his plans. He also had charge of the gardening of Drexel boulevard. Mr. Cleveland came to Chicago shortly before the fire, and since that time divided his interest in landscape gardening between Chicago and Minneapolis. For the last ten years he had withdrawn from active business. The body was taken to Minneapolis, where the burial took place.

Gouverneur, N. Y.

Mrs. I. M. Brainard died here recently. She leaves, besides her husband, a grown-up son and daughter, also many friends to mourn her loss.

CHANGES IN BUSINESS.

SIDNEY, O.—The Wagner Park Conservatories have just completed their plant. A general business will be done.

JACKSONVILLE, FLA.—Peter W. Wachter has sold his interest in the firm of Mills & Wachter to Charles D. Mills, the senior partner.

SEATTLE, WASH.—Frank W. Nelson has opened a florist's store here.

Lehman Bros. report a good demand for their wagon heaters as the cold weather approaches. The advantages of this useful and economical article are evidently appreciated.

New York.

The Market.

There is a general feeling among the cut-flower dealers that business is far from being as good as it ought to be at this season, considering the wave of prosperity that is supposed to be passing over the country. There has been, on several occasions this Fall, a seeming revival of trade in cut-flower lines, and for the time being we thought that business had at last taken a turn for the better. We found, however, that with each little spurt there always came a relapse; and an unsettled condition may be said to be the rule rather than the exception.

During the present week there has been little activity in the market. The largest demand for roses has been for those of the top grades, and as these are coming in in limited quantities only, an advance in the price of such stock has resulted. This may be said to apply to all varieties, excepting Bride, for which there does not appear to be much call just now. Lily of the valley has been erratic, some having been sold, in the beginning of the week, as low as $15 per 1,000. Roman hyacinths and Paper White narcissus are almost a drug in the market. Violets are not so plentiful, yet the demand is not equal to clear out the supplies daily; those left over have to be disposed of at the lowest quoted figures.

Carnations are not moving very satisfactorily. Too many grades of these now exist, and the scale of prices runs all the way from 50c. a 100 to $2 a dozen. Prosperity is bringing the highest figure mentioned. Mrs. T. W. Lawson, The Marquis and Ethel Crocker, when the stems are right, bring $10 a 100, while Mrs. George M. Bradt realizes $8 a 100.

Cattleyas are worth from 50c. to 60c. when obtainable, the supply being limited just now.

The supply of smilax, asparagus and adiantum keeps about even with the demand, and no material change in their values is noted.

Among the retailers the principal event of the week was the Post-Van Alen wedding at the home of the bride, in East 39th Street. Hodgson, Fifth avenue, had charge of the decorations, and white and green effects predominated, the flowers used consisting chiefly of Bride roses and lily of the valley.

The white china bowls, with the outer form of a swan, are again a feature for the holidays, and are being used filled with small ferns chiefly.

Charles Scallen will shortly open a retail store at 42d Street and Broadway.

Auction Sales.

With the sales of Friday the auction season for this year came to a close. Wm. Elliott & Sons report a very satisfactory season throughout, though prices have perhaps averaged a trifle lower than have obtained in other years. J. P. Cleary & Co. have experienced a successful season; the line of Japanese plants handled by this firm has not been so extensive as last year.

Jottings.

C. W. Ward, Queens, L. I., left Monday evening for a trip to Virginia and other points.

C. B. Weathered left Tuesday morning for a visit to Detroit, Mich.

Alfred Bunyard, who holds a responsible position with H. A. Siebrecht & Son, is in the Presbyterian Hospital suffering from an attack of typhoid fever.

James McManus is showing a fine collection of cyclamen plants in his window.

Visitors this week included T. W. Duggan, manager of the Dale estate, Brampton, Ont., and Otto Fehrlin, of Galveston, Texas.

The inventive genius of W. C. Krick, of Brooklyn, continues to develop with the passing years. His latest device is a serviceable, adjustable and folding Christmas tree stand, one that is very easily manipulated.

The annual dinner of the Tarrytown Horticultural Society will be held in the Florence Hotel, Thursday evening, December 27.

FIRES.

CHELSEA, MASS.—Fire occurred in the florist establishment of Michael Magee, 390 Broadway, December 9. The cause of the blaze was an overheated furnace. Damage about $100.

SOMERVILLE, N. J.—The greenhouses of Houston & Norton were totally destroyed by fire at 3 o'clock December 12. The fire was caused by the explosion of one of the boilers used for heating. The loss is $6,000.

Philadelphia.

The Market.

All of the cut-flower stores are doing good business. Every day brings many teas, receptions and dinners, and prospects for a busy season are very good. While there are plenty of flowers arriving daily, choice stock is at times difficult to obtain. Nearly all tea roses are showing the effects of the cloudy and warm weather during the Fall months, there being a large percentage with weak stems; these are piling up daily, and can only be disposed of for cheap work.

Carnations are improving in quality; still, fancy flowers are difficult to get every day. Prices have advanced to $3 and $4 per 100 for fancy stock. There is a surplus of the $1.25 and $1.50 per 100 grades.

Plant growers seem to be well satisfied with prospects for the Christmas trade. All kinds of plants are going well. There is a scarcity of four and five inch poinsettias, there being a good demand for dwarf plants of these for basket work. Many growers of these plants dropped them on account of the low price obtained the past few years. One dollar per dozen was the best figure received for the small sizes; now, this year, a much better price could be had.

Asparagus Sprengerii.

Several times recently it has been remarked that the variegated form of this plant was not constant. One grower in this city has had four plants that have been constant now for the past four years, and recently one plant was sold to a firm in Europe for $100.

Jottings.

The Bowling Club has decided to have a theater benefit this season; a date early in February is desired. The proceeds of the benefit will be used to some good advantage; one thing talked of is to give prizes for bowling to encourage the younger members.

The Little Darling, or 1,000 blossom rose, introduced by A. Blanc, is finding a good market with the retail stores as a cut flower. It is a dwarf perpetual blooming polyantha, of a delicate rosy pink color, and the hardiest of all this class of roses, blooming freely after six or eight degrees of frost, and when lifted from the ground and grown on under glass does very well. DAVID RUST.

Pittsburg.

The Market.

Trade for the past two weeks has been very satisfactory. There is an abundance of stock of good quality, excepting chrysanthemums, which are near the wind-up. Roses are in good condition, ranging in price from $5 up per 100. A good many Beauty are used, and very reasonable prices prevail.

Carnations have improved much; pink are plentiful, white and red being scarce at times. Prices at wholesale remain unchanged; at retail the flowers bring from 35c. to 75c. and over per dozen. Chrysanthemums are still coming in of good quality, but prices have advanced to 20c. and 25c. per bloom wholesale.

G. & J. Ludwig, Allegheny Market, had several fine consignments the past week, among the varieties being Invincible, Western King, Wm. H. Chadwick and White Bonnaffon; also a very fine pink named Superba.

Roman hyacinths and Paper White narcissus are plentiful at from $3 up per 100. Violets are choice and in good demand.

The Christmas greens trade is beginning to stir; ground pine is a little scarce and high in price. Moss also seems to be in short supply. Holly will be plentiful, also trees.

The plant trade for the holidays looks promising; at present sales are fair, ferns and fern dishes taking the lead. Flowering plants are not abundant; one of the best for the holiday trade is Begonia Gloire de Lorraine, of which John Bader has a small stock in fine shape. Mr. Bader's poinsettias are in good condition. He has just finished cutting a nice batch of Eucharis amazonica, which come in very handy, as lilies are yet scarce. Very few Harrisii will be cut for the holidays from present indications.

M. Renkauf, representing Bayersdorfer & Co.; S.S. Skidelsky and W.J. Boas, representing Edwards & Docker, were in town during the past two weeks. John Walker, of Youngstown, Ohio, was also a visitor.

The plans for a botanical school which were submitted to the city some time ago were adopted, and work will begin at once. E. C. REINEMAN.

Calendars Received.

Calendars for the year 1901 have been received at this office from the following firms and are hereby acknowledged with thanks:

AMERICAN BICYCLE CO. (Pope Sales Department Hartford, Conn.)—As useful and interesting as ever.

Buffalo, N. Y.

Chas. Keitsch tells me that after the rush of Christmas business the club intends taking up convention matters to formulate early plans. The hall has already been engaged.

SYRACUSE, N. Y.—Looking in on L. E. Marquisee, I found that gentleman examining a cutting bed of the white seedling from The Marquis, and to say this plant is stronger than the parent is asserting much, but it is so. There were no blooms on the plants, but no doubt we shall see the flower at Baltimore in February next. The Marquis is in fine shape, producing well; but I believe A. Woeppel, of Corning, can beat Mr. Marquisee at his own game, as it were. W. M.

Orchids.

At the meeting of the horticultural section of the American Institute, New York, on Wednesday last, John E. Lager, of Lager & Hurrell, Summit, N. J., read a most interesting paper on the subject of orchid collecting. In his opening remarks Mr. Lager referred to the growing popularity of orchids and touched on their natural distribution. The greater bulk of our most useful orchids, he said, are indigenous to this hemisphere, the region including Mexico, Central and South America, the northern part of the latter country being the principal section from which all of our most desirable species grown to-day, for profit or pleasure, come. The speaker gave a vivid account of the dangers and difficulties experienced in the collection of orchids, and of the many inconveniences met with in the transportation of the plants from their native haunts to the sea coast, drawing also a charming word picture of the beauty of the scenery surrounding their mountain homes. Continuing, he said:

"The South American Andes present one of the most curious features in the distribution of species, not only of orchids, but of everything else in plant life. Trees and herbs of a given species will occur in abundance along a certain river course or valley, with not the slightest trace of them anywhere else until we stumble across the same identical flora 200 or 300 miles away. In orchids there are several instances of this. Miltonia vexillaria occurs rather plentiful in northwestern Colombia, thence it jumps southward and reappears again in Ecuador in the form of Miltonia vexillaria rubellum. Odontoglossum crispum is another species widely scattered under various forms, its principal region being immediately north of Bogota; thence it travels along the Eastern Cordilliera for about 100 miles, although very sparingly, when suddenly it jumps across to the eastern slopes of the Central Cordillera, along which it occurs continually in smaller quantities, and finally en masse round Pasto, the extreme south of the Cauca, or near Ecuador. Cattleya Trianæ, one of the finest, best and most useful orchids in cultivation, is entirely local, and where it occurs there are, strange to say, few other species of orchids worth collecting; at least at the same altitude, running, as it does, for a stretch of 300 miles along the slopes of the Eastern and Central Cordilleras. This fact alone, to some persons, would probably indicate that the supply is inexhaustible, but looking at the matter carefully, we find that it is at the present day quite limited, inasmuch as this orchid only occurs at an elevation of from 2,000 to 4,500 feet above sea level at the highest, beyond which it is looked for in vain. This, of course, gives this cattleya a comparatively narrow strip. Along the lower slopes of the mountains, and where plants only a few years ago were found in great abundance, they are now very much thinned out indeed, and the collector must, in the majority of cases, repass the same region and gather his plants at a slow rate compared to that of a few years ago only, and at a much greater expense. Now, this may be said in regard to almost all the staple varieties of orchids; they are disappearing fast, and the day is not far off when it will be utterly impossible to obtain them in quantities. Some one will tell me that 'this has been said before, and still they are coming' in greater quantities than ever before. Very true, and just for this very reason will the supply give out; for where only a few years ago one case of orchids was collected, there are now 100 cases collected; besides, the collector is not the only exterminator. There are the landowners, who mercilessly cut down and burn large tracts of forests, planting coffee and other crops on the space they occupied, which crops bring a better and more reliable return.

"The greatest number of our most showy orchids are epiphytes. They grow mostly on trees, a limited number on rocks or stones, and others are terrestrial. The most beautiful, undoubtedly, are the epiphytes. It is a great mistake to imagine these plants growing by the thousand on the trees; on the contrary, they are very much scattered indeed; where they occur only a few at the most are found on one tree—that is to say, of a certain species. Some trees might have one plant, others as many as ten, and the greater number none at all. The orchids are found mostly on soft wooded trees, attached to the trunks or in the crotches of the branches, but always in positions where they obtain abundance of light and air. They are scarcely ever found in the dense forests or jungles, but always along river courses or openings or breaks in the forests.

"In conclusion, I wish to say a few words in regard to the culture of orchids. There is hardly any other plant that is easier to grow, and, fortunately, the most showy and useful species, with few exceptions, are of the easiest culture. If the same attention is paid to orchids as is given to other plants in general, failures would be very few. Most species delight in an abundance of light and air, accompanied with plenty of water. Failures, as a rule, can be traced to too much heat, a too close and stuffy atmosphere in the house, and insufficiency of water. Almost any kind of a greenhouse will answer the purpose for growing orchids where the temperature may be kept, say, at a minimum of 55 degrees by night and 60 to 65 degrees during the day. A higher temperature is more injurious than beneficial. The glass should be lightly shaded with a mixture of white lead and naphtha, or some other substance that may be applied thinly, for although these plants love plenty of light, our sun is too strong for them during the Summer. It is also important to place the plants not too far from the glass; a distance of from one to three feet therefrom may be said to be just right. They will then, in most cases, make better and firmer growths and produce more and better flowers than if they are placed far from the glass. In potting, good soft, fibrous peat and some live sphagnum should be used, and the plants may be placed in either baskets, pots, pans or blocks; but in whatever receptacles they are put, they should be made firm, without ramming them in too hard. An orchid that is left loose in a basket or pot will never make much headway, but gradually dwindle away and finally die."

Henry A. Siebrecht, Sr., followed with a brief review of the development of orchid culture in America, mentioning the late Isaac Buchanan and Louis Menand as being among the first men to engage in the work commercially along about the early sixties. Cypripedlums insigne, venustum and barbatum, Dendroblum nobile, a few epidendrums, zygopetalums, and bletias, were among the first kinds grown in America. Later came cattleyas and lælias. It was not until about 1880, however, that commercial orchid-growing assumed any great proportions. Mr. Siebrecht said that Sander, of St. Albans, England, had done more for orchid culture in this country than any other firm.

Several very fine exhibits were on display, that from Lager & Hurrell, Summit, N. J., being the most extensive. Included in this collection were Cattleya Percivaliana, Odontoglossum Rossi majus, Vanda cœrulea, Lælia autumnalis alba, Sophronitis grandiflora, several cypripediums, Lycaste Skinneri, Miltonia Roezlii album, Calanthe vestita and C. Veitchii, Epidendrum vittelinum majus, Oncidlum varicosum and O. Cavendishianum. These and others not enumerated were all in fine flower and made a grand display.

Julius Roehrs, Carlton Hill, N. J., had also a very fine exhibit, among which were fine specimens of the white Cattleya Trianæ virginalis and C. Trianæ Delecerses, a very pale pink; Vanda cœrulea, V. Kimballiana and oncidiums in variety, also several calanthes.

J. McNicoll, gardener to Mr. G. W. Rand, showed a number of plants of Primula Forbesii, also well-grown poinsettias.

H. Clinkaberry, gardener to Mr. C. G. Roebling, Trenton, N. J., exhibited a fine collection of orchids in flower, among which were many elegant cypripediums, including C. Spicerianum, C. Laura Kimball, C. Sanderæ, C. Leeanum, C. Patrick O'Mara and several others.

A vase of the pink chrysanthemum Superba, from Nathan Smith & Son, Adrian, Mich., graced the president's table. A plant of oncidium from Peter Duff, Orange, N. J., was also staged.

J. G. Hayden, of Floral Park, showed a nice bunch of mignonette, and Charles H. Allen, of the same place, made an exhibit of carnations, among which was a pink seedling of delicate color and good size; also vases of Mrs. T. W. Lawson, G. H. Crane, Mrs. Frances Joost, Lizzie McGowan, General Maceo and Ethel Crocker.

Collection of Ferns, Exhibited by John Thatcher, Gardener to E. Le Boutillier, Esq., and Awarded First Premium and Silver Medal at Fall Show of Pennsylvania Horticultural Society.

NOTES BY THE WAY.

CORNING, N. Y.—A. Woeppel has a fine batch of Begonia Gloire de Lorraine, proving that with a little care this popular plant can be grown successfully. He purchased the stock in July—2-inch pot size—potted the plants up, carefully shaded and watered, taking care not to wet the foliage. They are now in 5-inch pots, with perfect foliage and laden with bloom, with a loss at the rate of but four to a hundred. Cyclamens are equally well grown here. Daybreak, Crane and White Cloud are his best carnations.

ELMIRA, N. Y.—Thanksgiving found Grove P. Rawson with not enough of his choice violets and chrysanthemums to go around. Carnations were equally as scarce, but are looming up for Christmas

E N & H. N. Hoffman have a grand bench of Lawson carnations and regret they did not plant more. America and Crane are in fine crop for Christmas, when red is in such demand.

BINGHAMTON, N. Y.—W. H Graham has added a wholesale branch to his business and is handling holly, etc., in bulk.

Mrs. M L. Barnes is well pleased with Thanksgiving business, and anticipates an equally good Christmas. Her health is much improved, so that she can again give her patrons personal attention.

SCRANTON, PA.—G. R. Clark has a well-grown lot of poinsettias and expects to sell every one at Christmas, when he looks for as good business as at Thanksgiving.

Marvin & Muir disposed of their chrysanthemums at good prices. T. W. Marvin told me his stock was never finer, nor sales more satisfactory than now.

HORNELLSVILLE, N. Y.—W. A. Wettlin, reports a good season; several first-class wedding decorations used up his best stock. He anticipates a busy Christmas.

BUFFALO, N.Y.—Poinsettias at William Scott's and Liberty rose at W. J. Palmer & Son's is the all-absorbing talk, floriculturally, at this time. At Cold Springs one house, 100 feet long, is filled with the gorgeous poinsettia, and so arranged as to form a sloping bank from the entrance, commencing with plants 6 inches and ending with those up to 6 feet in height. A brilliant and striking effect is produced. The demand promises to be as good at Christmas as usual. Palmer has a window decoration of this popular flower. Will Palmer tells me the firm has such success with Liberty rose that they are discarding Meteor entirely. This speaks volumes for the new rose, as they have been most successful at all times with Meteor. W. J. Palmer is ready to discard carnation Daybreak just so soon as something better comes along, but he is not prepared to desert the old favorite yet.

Philip Breitmeyer, of Detroit, was a visitor, attending the funeral of a relative. He was pleased with what he saw in the Exposition City, but set the boys' mouths watering when he described a funeral pall made just before he left home, which contained seven thousand violets, the whole order valued at $350. There is nothing slow about Detroit, and Breitmeyer can fill any commission required.

UTICA, N. Y.—Frank Baker reports most satisfactory business, both wholesale and retail. He has a large batch of Cœlogyne cristata, which is very useful in design work, but grows so freely one is soon apt to get overstocked. W. M.

QUESTION BOX

(253) **Rose Cuttings.**—E.A.P.—Rose cuttings may be taken at any time from now on to the first of April. Sand is the best material in which to root them, and if a bottom heat of 70 degrees can be maintained, so much the better.

(254) **Azalea Flowers Spotting.**—What causes the flowers of azaleas that are being forced for Christmas to come brown spotted? In fact, some buds are brown before opening. The plants are grown in a temperature of 65 degrees and are syringed freely.—A SUBSCRIBER.

—The brown spots on the flowers are probably caused by excessive syringing after the buds begin to open; if the flowers dampen off and fall in a day or two, the water standing in the half-opened flowers is undoubtedly the cause. The buds would also turn brown if the plants were allowed to become too dry at the roots while they are being forced.

(255) **Nitrate of Soda for Violets.**—Please tell me how much nitrate of soda I should use to one gallon of water for violet plants.

—I am sorry to say that I could not intelligently supply the information wanted, not having had any experience in using nitrate of soda in a liquid form on violets. However, I may say that I would not advise its use in this form, but would use it in another form and in connection with the other important elements of plant food. Liquid horse or cow manure, diluted so as to have the appearance of strong coffee, is in most general use, and would, I am sure, give much more satisfactory results.—P. H. DORSETT.

(256) **Plants for Easter Flowering.**—Kindly let me know when to start hydrangeas and H. P. roses to have them in bloom for Easter; also tulips and Dutch hyacinths. I have just received the roses from a nursery and have potted them up. The tulips and hyacinths were boxed up in October and are now covered up out doors.

What is the proper temperature for the sand in which to root carnations? also the degree of heat necessary in the propagating house?—W. H.

—The hydrangeas should go into the house now; then they can be allowed to come along slowly. The H. P. roses, if put in about the middle of January, will be all right. Tulips and hyacinths may remain out doors until the first week in March; then they can be brought in and had in bloom for Easter with very little forcing.

A temperature of 65 degrees will be found the best for propagating carnations, and the house 5 to 8 degrees lower.

(257) **Callas.**—What is the name of the most commonly grown calla, the flowers of which are sold throughout the United States generally for funeral work? How early can nice dry bulbs be had, and which sizes should I buy to obtain from 2 to 4 or 6 flowers during the months of October to June? I would like to have a fair cut in the month of October. Where may the best be had and how should they be started?—CUTFLOWER GROWER.

Juttlingen, Germany.

—The true name of the calla grown by our florists is Richardia æthiopica. The best bulbs are grown in California, and they can be had in good condition during the month of August. Those measuring from two to three inches in diameter will be found the most useful size. These will each produce fine flowers in the season from October to May. To start them, pot into five-inch pots, place under a bench until growth commences, then give full light with plenty of heat and moisture.

(258) **A Disease of Palms.**—Will you kindly let me know the cause and remedy of the spot disease on the palm leaves inclosed? Specimen A is from an old palm; B the leaf of a young palm on which mostly the new leaves get affected. Would fir tree oil solution affect the leaves, causing same to spot?—JERSEY CITY.

—The spot disease shown by the palm leaves from your Jersey City correspondent is caused by an anthracnose in cases where the spots have a black center, and by the punctures of insects, such as the various scales that infest palms, when the spots do not have the black center. The anthracnose referred to occasionally does a good deal of damage to various members of the palm family. Fir tree oil does not have anything to do with spotting of this kind, and will not injure palm foliage unless used too strong. This oil is often used to remove the scales from the foliage, and is probably the best thing for this purpose where only a few plants are to be treated.

About all that can be done to prevent the spot fungus is to keep the plants free from insect injury, which renders them more susceptible, and to remove the affected parts as thoroughly as possible. Anthracnose does not yield readily to treatment with sprays. Where palms are badly affected with this disease it is better to destroy them so as to prevent other plants from becoming infected.—ALBERT F. WOODS, United States Department of Agriculture.

(259) **Bulbs and Other Matters.**—On October 6 I potted bulbs of hyacinths, narcissus and freesias. I threw out 8 inches of soil from an ordinary cold frame and put in 4 inches of ashes placing the pots on the ashes. I filled in around the pots with soil, but put none on top. I boarded over the frame, filling the space with straw. When bringing in a few bulbs for Christmas I found that the hyacinths and freesias had thrown a long white shoot. Will you please tell me where I made the mistake? The hyacinths have three shoots Is it best to leave on the side ones or cut them off?

I bought a lot of 12x16 glass, with which I intended to enlarge in Spring. Is it best to have the sash bars 12 inches or 16 inches apart? The remainder of the house is laid with 16x24 glass.

One of my Bradt carnations threw a flower, one-half of which was all red, the other half a true Bradt. Is this a freak or a sport, and will a cutting reproduce a similar flower or not?—X. T. Y.

—Boarding over the frame and filling in the space between the bulbs and the boards with straw is where the mistake was made. A few inches of soil was all the covering that should have been applied. The freesia would have been better if put under a bench in a cool house, as with these in the roots and leaves start almost simultaneously. Where the hyacinths show three spikes it is best to let them all come along and develop. To pull away two of them would not make the remaining one any stronger or larger.

If the glass is double thick we should advise that the sash bars be 16 inches apart.

Mrs. Bradt carnation frequently sports in the manner indicated. Taking a cutting from the shoot would not perpetuate the sport.

President-Elect N. Y. Florists' Club Walter F. Sheridan.

The newly elected president of the New York Florists' Club, Walter F. Sheridan, is one of the leading wholesale cut flower commission merchants of the metropolis, whose place of business is located at 39 West 28th Street. A sketch of Mr. Sheridan's career appeared in our issue of December 2, 1899.

President-elect New York Florists' Club, Walter F. Sheridan.

The president-elect has been one of the club's most active members for many years, and it was largely to his skillful and methodical handling of the entertainment part of the recent S. A. F. convention that that most enjoyable feature proved so successful. Whatever makes for the progress or improvement of the club, merits at all times his warmest sympathy and support, and in this he will, we have no doubt, be found a most worthy successor to the gentleman who has so ably and acceptably guided the club's affairs during the past twelvemonth, and whose indefatigable and earnest work, combined with his exceptional ability, has placed the club on a firmer and better working basis than has heretofore been the case in its history. We have every confidence that the present satisfactory status of the association will be maintained during Mr. Sheridan's tenure of office, and that he will receive, as he assuredly deserves, the hearty co-operation of the membership. Much hard work will again devolve upon the presiding officer the coming year. Mr. Sheridan will be found equal to the task before him, for, like his predecessor, he is happiest when he works the hardest.

New York Florists' Club.

The club met on Monday evening, December 10, President O'Mara in the chair. The committee's report on the result of the interview with the managers of the Madison Square Garden, with respect to the holding of a flower show in the Fall of 1901, was read and accepted. The terms and conditions stipulated by the Garden people were considered most satisfactory and were accepted. The club will put up as good an exhibition as the season will warrant, and guarantee the premiums, the arrangements made for reimbursement of the necessary amount being of such a nature as cannot but result beneficially to the club. The decision to hold a show was most favorably received; and those present whose contributions to the guarantee fund, in connection with the S. A. F. meeting, and which amounts were not called for, at once agreed that the money be applied toward a similar fund for flower show purposes. Other guarantors are respectfully asked to consent to this being done in their cases also, and to notify the treasurer of the club to that effect on an early day. Vice-President Herrington was appointed to confer with the Chrysanthemum Society of America, looking to that body's coöperation with respect to the show. It is possible that the Chrysanthemum Society may hold a meeting in New York at that time. Mr. Withers will also confer with the American Dahlia Society on flower show matters.

An endeavor will be made to have a bowling tournament during the week of the exhibition, and Captain Traendly was empowered to work up interest therein.

Later in the evening an Exhibition Committee of 14 was appointed to draw up a preliminary schedule and otherwise make preparations for the exhibition. A Ways and Means Committee was also appointed.

The resolutions to be presented to ex-President Plumb, beautifully engrossed, were on view and much appreciated, and the Starin resolutions were read and approved.

The election of officers resulted as follows: President, Walter F. Sheridan; vice-president, Alex. Wallace; secretary, John Young, reëlected; treasurer, Chas. B. Weathered, reëlected; trustees: Wm. H. Siebrecht, Frank Traendly and Wm. Wallace Burnham. The officers-elect made suitable brief addresses, promising earnest work the coming year.

The treasurer announced that the medals awarded in connection with the horticultural exhibition in August last would be distributed between this date and New Year's.

J. B. Nugent, Jr., gave an interesting account of his recent trip into Canada, paying a grand tribute to the quality of the stock seen there. He believed it was impossible, owing to the high duty, to ship cut flowers into the United States from across the border and make it pay.

Frank McMahon told of his tour through Europe this year, speaking entertainingly upon the rose show at Trier, Germany, and the Paris Exposition. At Trier Mr. McMahon remarked the great prominence given to the rose Mme. Caroline Testout, which there did excellently in the open ground. The German rose growers seemed to favor the hybrid tea varieties.

During the evening the Entertainment Committee acted well its part, as usual.

Bridgeport, Conn.

Business has been quiet since Thanksgiving, though quite a good deal of funeral work is going on. Notwithstanding the recent bad weather, the stock here is in good shape and everything points to an abundant supply for Christmas.

I understand that quite a few greenhouses will be built in and around this town this coming summer.

The florists of Bridgeport ought to form a club. They would derive from it a great deal of benefit to themselves, besides much social enjoyment.

FICUS ELASTICA.

BRIEFS FOR BUSY FLORISTS.

LILIES are all on the benches now and the principal point to be watched is to keep the plants clean. Never let greenfly get a start; if once it does get a good foothold, then it is a continual struggle to keep the pest in check even. Tobacco stems placed among the pots and a fumigation once a week is very little trouble, and if these be afforded the fly will never be seen Among the Harrisii bulbs the dreaded disease has not shown itself very much thus far; but we have seen batches of Japan longiflorum that have got the disease bad Whether or not it will prove common among the Japanese bulbs this season remains to be seen.

H. P. ROSES that have been potted or boxed up direct from the nursery, and are intended for early Spring forcing, should not be allowed to stand outdoors without affording the plants some protection from the frost around the sides of the pots or boxes. Straw leaves or litter should be packed between them; then they may remain outdoors until they are needed for forcing. If no protection can be given the pots, they had better be placed in some shed where there is plenty of light, or they might be plunged in a cold frame and the sash left off.

CYCLAMENS.—The seedlings that are coming along for next year must not be allowed to become crowded in the seed pans or boxes. They need not be potted for the first shift. Transplant them into flats, using pure leaf soil and sand. Keep the flats in a good light house, and the nearer the glass the sturdier the growth will be. Care must be exercised in watering. A soggy condition in the soil will keep the seedlings from making any progress, and for this reason it will be found advantageous to allow for drainage in the bottom of the flats.

IN THE EARLY BEDDING SEASON, when baskets, veranda boxes, vases, etc., are being filled with plants, there is always a shortage of vines and trailers for use along the edges. This fact should not be lost sight of now. All stock plants of vincas, abutilons, ivy, geraniums, etc, should be potted up if necessary, and kept growing from now on, taking a batch of cuttings whenever obtainable.

GLOXINIAS.—Seed sown now will make good strong blooming plants next Summer. Use leaf soil in which to place the seed. Cover the seed very lightly and put a piece of paper over the pan until germination occurs.

Roses.

Read before the Chicago Florists' Club, December 8, by Paul Kopaaka.

To grow good roses requires knowledge, experience, good houses, ample heating facilities, plenty of water, good soil and other conveniences. If these essentials are all there, good material can be produced.

I will not take up your time by going into full details, but will simply say a few words about soil and feeding roses in the Winter months. Too much attention cannot be paid to the soil, for it is the foundation of the whole year's work. A good grower knows now the soil he is going to use next year. He prepares his soil a year, or at least six months, in advance of the time it is to be used. When planting and other rush work is completed he prepares his soil for next year by plowing a piece of old pasture and putting the sods grass side together in a pile of rectangular form. If the soil of the pasture is light and black he adds half as much heavy loam or clay. If it is heavy he adds lighter soil. Then he can put a half-inch-thick layer of bone meal on the whole length of the pile, a layer of one-year-old cow manure a foot thick, and an inch layer of slaked lime on top and all around the pile. The lime prevents insects from penetrating the soil and laying their eggs therein, and it helps to rot the manure.

When the pile is two or three months old it should be broken down and set over (repiled), so that the different parts are well mixed and the frost can get into it. Chop up all the lumps and your soil is ready for the coming season's use.

FEEDING.

Early planted roses should have a mulch of old cow manure about the latter part of August or beginning of September. A week after the mulch should be turned over, all the lumps made fine, worked into the soil in the bench and leveled off nicely. The daily watering will soon take the fertilizing properties of the manure into the soil, so you will need to begin giving liquid manure in October, especially in the case of American Beauty. A hungry soil produces blind wood, and the plants, lacking strength to force up bottom shoots, produce only eye shoots. But it is not wise to feed roses that are off crop. They should be given a little rest by lessening the amount of water for about a week.

Before giving liquid manure prepare for it by getting the soil on the dry side, and when affording the liquid make it the substitute for a thorough watering. It is preferable to feed when the roses are beginning to come in crop, and during the time a crop is being cut. It helps to develop the buds and gives them size and a richer color. During the dark months (November and December) I would advise feeding with liquid manure but once each month, during January and Februnry twice a month, and during March and April three times a month. Select a bright day in which to feed with liquid.

Three years ago I devoted a house to experiments in feeding, using bone meal, horn shavings, night soil, nitrate of soda and liquid cow manure, and found that the cow manure gave best results.

I was requested to write about American Beauty roses grown in center benches only. Last year we planted a range of 12 houses to this variety. The roses did well up to the end of November, and by that time the plants had grown up to the glass on the south side and also on the north side, and we had to spend considerable time in keeping them tied away from the glass. When we syringed the plants, owing to the amount of foliage on them, they would not dry at night and then our troubles began. It was hard to keep away the black spot, so I thought it would be best to plant the center benches only, and I am well satisfied with the experiment. At the present time our plants are good and will produce a heavy crop of flowers for the holidays.

In the two ranges that were built this year, with the Garland gutter, we have four benches in each house, and have planted the north and south benches with Bride and Bridesmaid, and with Beauty in the two center benches. At the present time all the plants are very good, but we shall be able to tell later if the shade caused by the Beauty makes much difference to the north bench. In the Summer I had Beauty carefully watered, great care being taken not to water the soil between the rows. After they had been planted about one month we put on a mulch of well-rotted manure, which I think was an excellent plan to protect the soil from the sun. We have given the plants one top dressing of bone meal since then. Our plants are in excellent health and are producing lots of fine flowers, with bright prospects for the future. After the holidays we shall give them some manure water.

Under what conditions can roses be grown with profit more than one year? The Bride and Bridesmaid can be grown the second year in the same soil. About the 1st of July we commence to withhold water, only syringing the plants every day. We continue this treatment for about six weeks; then we prune the tops and take out all the poor wood in the bottom and scrape off some of the soil, as much as possible, from the surface, and then put on a top dressing of manure and soil mixed. After that, we bend the plants down and syringe twice every day. After the eyes commence to break the soil can be more freely watered till thoroughly soaked through.

We have some Golden Gate which we kept growing all the Summer. This is a grand rose; it is so prolific. It must be shaded in the Summer, as it cannot endure the hot sun; the petals will burn. The two-year-old roses are greatly benefited by manure watering every two weeks during the Winter.

GEO. COLLINS.

Washington.

Harrisii Lilies from Seed.

E. M. Byrnes, of the Propagating Gardens, recently began experiments in hybridizing Lilium Harrisii with one or two other kinds. Last year three plants ripened seeds; these were sown during August. From the time the seedlings appeared above ground they were kept growing all Winter. Within nine months from the sowing of the seed a number of the plants produced from one to three blooms, but as the plants had not then reached full size it could not positively be ascertained whether they were hybrids, simply Harrisii seedlings or variations from that well-known variety. After ripening, the bulbs, which were of fair size, were repotted, and now they show growths strong enough to average four or five blooms to each plant.

Improvement of Public Parks.

Samuel Parsons, Jr., has submitted to the Chief Engineer a report on the subject of remodeling the large tract of park land west of the United States capitol, including the Botanic Garden, Smithsonian and Agricultural Grounds. Mr. Parsons' scheme will entail an expenditure of $7,000,000. This includes the purchase of ground south of Pennsylvania Avenue from Third to 15th Street, and also that north of Maryland Avenue within the same limits. This ground is occupied by buildings principally of an undesirable character. The scheme has been spoken of very highly by the authorities in the War Department, and is likely to be adopted by Congress should it decide to make the appropriation.

Inaugural Ceremonies.

John J. Edson has been appointed by Senator Hanna chairman of the Inaugural Committee. Mr. Edson has not yet announced the name of the chairman of the sub-committee on decorations, which, among other matters, has the awarding of the contracts for the decoration of the ball-room. The sum set apart for this work is usually $10,000.

Open Weather.

Although we have had frosts severe enough to kill tender plants such as cosmos, a few plants are yet showing bloom. The outdoor chrysanthemums are yet in a presentable condition. Pansies are in full flower. Empress of China and Clothilde Soupert roses have some open blooms and lots of buds. Chimonanthus fragrans missed last season, owing to the big freeze of two years ago; now the wood of last Summer is covered with flowers and buds.

Other plants still in bloom are Pyrus japonica, antirrhinum and sweet alyssum.

Cincinnati.

Trade News.

Business during the past week has been all that could be desired. Stock has been very good and prices reasonable. As already predicted, roses will be scarce for Christmas. Carnations will not be any too plentiful, either.

Saturday was the first carnation meeting of the Florists' Society, and the exhibits were much better than expected, owing to the manner in which carnations all over the country have been acting. Henry Weber & Son, of Oakland, Md., had a fine display, among them Norway, a seedling of Mrs. Fisher color, pure white, flower 2 to 3 inches in diameter, with a fine stem, an all-round good sort, and Egypt, a dark crimson. Both varieties scored over 85 points. Genevieve Lord and Number 11, a pink seedling, were also very fine. W. K. Partridge won first prize for best vase of 50 blooms white with White Cloud, also first on pink with Mrs. Frances Joost; first for red with G. H. Crane. He also took premier honors for best vase of 100 assorted blooms, showing, too, a fine lot of Bride and Bridesmaid roses.

The South Park Floral Co. made a fine display of American Beauty, Bride and Bridesmaid. They took first prize on the two latter. These roses were the best seen in this market in a long time.

Ed. Helfrich, of Washington C. H., O., also exhibited Bride and Bridesmaid in fine shape.

Wm. Murphy had a large display of carnations in all the leading varieties, staged for exhibition only

R. Witterstaetter made a fine showing of his seedlings. Among these were several new ones, of which we will hear more later. He took firsts for best vase of seedlings, any color, best vase of pink, and first prize (ventilating apparatus valued at $25) for best seedling with Enquirer. The latter was, perhaps, better than ever seen before.

Mrs. E. T. Graves staged 50 blooms of Dorothy. This is certainly a fine flower, and if it proves to be a producer will become quite a favorite. It has the color that sells, the size and a good stem. The only objection, if it can be called an objection, is that the flower is a little too much fringed, though this I do not think will militate against its selling qualities. It was up for a certificate and scored over 85 points.

The weather is all that can be desired at present; the sun has been shining brightly for the past three days, and carnations in the houses are moving along nicely.

There will be plenty of bulbous stock for the holidays, and it will be the best we have had in many years. Valley sells at $4 per 100; Roman hyacinths and Paper White narcissus at $3.

Major Bonnaffon and Minnie Wanamaker chrysanthemums are still being received from George Bayer, of Toledo, O. These sell up clean at from $1.50 to $1.75 per dozen.

J. A. Peterson has just returned from a successful trip among the florists in the north central States. E. G. G.

Providence, R. I.

The Market.

A large amount of decorative work has been done here this season, notably that by J. H. Small & Son, of New York, for a church wedding. Seldom has there been such elaborate work executed in this city, and it is unfortunate that such orders could not be given to a home florist. Other lines of the business were quiet previous to Thanksgiving, and owing to the stormy weather preceding, the whole Thanksgiving trade was done in about one day. It was equal to that of last year. There was a good supply of chrysanthemums, excepting white varieties. Violets were to be had only in very limited quantities.

Beauty roses are scarce at all times. Carnations are not very plentiful; the quality is only fair; the ruling price is $2 per 100 for all kinds, except a few special fancies. Roses are hardly up to standard this season and very scarce. Roman hyacinths and Paper Whites are in good demand. Lilium Harrisii have been in the market for two weeks and find a steady demand at $15 per 100.

Jottings.

E. J. Johnstone has leased the place formerly occupied by Mr. Collamore, on Franklin Street. He has remodeled the store and is in hopes of reviving a good business at that stand. He will have a fine lot of Chinese primroses in flower for the Christmas trade, besides a large collection of palms, ferns, etc.

A. Svenson reports good business and finds his new houses, recently built, insufficient to produce stock enough to meet the demands. Sam. Kinder, of Bristol, is now setting up the cigars. Mother and son are doing well.

Holly has appeared in the market and is handled altogether by the commission men, being bought at retail at every street corner. Some choice grades are handled by Rennie & Pino, seedsmen.

T. J. Johnston was in Boston and vicinity one day this week on a business trip. M.

Poughkeepsie, N. Y.

Dutchess County Horticultural Society.

The regular meeting of the society was held December 5. There was a good attendance. The principal business was the nomination of officers for the ensuing year. The following gentlemen were nominated: President, James Blair, Thomas Emerson and Clarence Reynolds; vice-president, William G. Saltford, Wm. J. Sloan and Harold Cottam; treasurer, Chas. Mitchell; secretary, H. J. Oosterboudt and W. G. Gomersall.

A communication was received from Miss C. Cruger, stating that the American Rose Society had offered a silver medal, to be awarded at the Annandale show next June to the exhibitor making the best display of named roses. The co-operation of the Dutchess County gardeners was requested to make this show a success.

The Dutchess County Horticultural Society voted a sum of $10 to the Annandale Rose Show Committee, to be offered as a premium, to be known as "The Dutchess County Horticultural Society Prize." Five new members were elected.

The next meeting will be held on January 2, when the officers will be elected.

Buffalo.

Business Hits.

Trade among the retailers is fair, with a general opinion that active conditions somewhat out of the usual will exist at the holidays. Flowers seem in fair supply, with good violets scarce.

A run among the near-by growers of decorative stock for holiday uses shows hardly above the average quantity; the chances are all will sell out clean. At Wm. Scott's Cold Spring place poinsettias were most noticeable. Some made-up pans of these plants are very taking in appearance. Palms and ferns are also features.

J. H. Rebstock's houses are gay with some well-done Begonia Gloire de Lorraine and cyclamens. Azaleas in flower look very salable, and poinsettias have noticeably large heads, the largest we remember ever seeing.

Chas. D. Zimmerman makes a specialty of Ardisia crenulata. A lot of Boston ferns and Lorraine begonias also elicit admiration.

Neubeck & Myers have a batch of the now older variety Begonia incarnata. Properly grown, this still possesses distinctive merit.

Palmer & Son, at Lancaster, N. Y., have a fine batch of poinsettias.

We regret to note the illness of W. J. Palmer, Sr., who is confined to the house with some lung trouble.

C. J. Pult, of North Tonawanda, the "sod-crusher" man, was a caller on Wednesday. He has been abroad part of the Summer in Switzerland.

VIDI.

Baltimore.

The Market.

Weddings and parties have somewhat enlivened the otherwise rather dull trade during the past two weeks. Chrysanthemums are about cleaned out, and both roses and carnations are a little scarce. The outlook for Christmas is a shortage of the standard flowers, with a possible exception of white carnations.

Gardeners' Club.

The club held a very well-attended meeting on Monday and transacted some important business. Accepting the invitation of the Maryland State Horticultural Society, the club became a member of said society by unanimous vote. This promises to be of great benefit to both societies. Forming as they do a strong organization and representing all the horticultural interests, they will have social and political influence enough to well protect and promote the profession. The club maintains its identity as an independent association, but naturally the scope of its work will become considerably broader, and its affiliation with the State Society will undoubtedly induce members of that society to join the club. Professor William G. Johnson, State Entomologist and secretary of the State Society, was elected honorary member of the club. This gentleman gave very interesting and highly appreciated advice on cyanide fumigation, and will practically demonstrate the operation in a violet house belonging to Tom Patterson which is infested with black aphis. Professor Johnson is an enthusiastic advocate of cyanide fumigation and recommends it for general greenhouse use. He emphasized the necessity of handling the deadly poison only after getting thoroughly acquainted with its nature, but asserts that it is the most convenient and effective weapon against insect pests.

A question referring to the carnation thrips and the subsequent discussion disclosed the fact that even the men who we were wont to look upon as expert bugologists could not give a comprehensive description of the troublesome insect; beyond its color and jumping proclivities no definite data could be obtained.

The organizers of the carnation convention laid very favorable reports before the meeting.

Carnation Seedlings.

These abound around Baltimore, and a number of them are of uncommon value. Henry Fisher exhibited a fine vase of new seedlings at the last club meeting.

The Maryland State Horticultural Society will hold its annual meeting in Baltimore, December 20 and 21. Professor L. H. Bailey will deliver an address, as will a number of well-known fruit growers and scientists. T. E.

St. Louis.

The Market.

Receipts of stock have not been heavy the past week, nor has trade been anything extra. American Beauty roses and violets are in short supply. The asking price for the latter is $1.25 per 100. Other roses, as well as carnations, are in fair supply, with prices unchanged from those of last week. Bulbous stock is coming in more freely and sells out tolerably clean.

As regards the Christmas supply, this at present, seems very uncertain. The wholesale men, in some instances, decline to make any promises as to what they can furnish. The principal activity just now is in preparing green and holly. Ostertag Bros. are making great efforts to supply their very heavy trade in these lines; they have made up 2,500 little bells, and their trade in festooning runs up into the 10,000 yards. They were fortunate enough to get a good supply of green.

J. J. Beneke had a large decoration for a banquet this week, and as a consequence the town supply of flowers in several items ran out. He was also so unfortunate as to be obliged to serve on a jury at the same time. C. C. S.

Boston.

Trade Notes.

Business moves along fairly well, and all are looking forward to a good Christmas trade.

Stock is rather scarce, especially the better grades, and the demand has increased proportionately.

In roses American Beauty do well, extras bringing $45 to $50 per 100; No. 1, $25 to $35; seconds, $12.50 to $16; smaller grades, $8 and $10. Bride and Bridesmaid are improving; extras range from $12.50 to $16 per 100. Kaiserin are now showing green and do not sell well. Meteor, Liberty and Morgan are rather scarce, bringing from $3 to $8 per 100.

Carnations are in fair supply, but the demand for them has increased materially with the passing of the chrysanthemums. Good to extra stock realizes $2 to $2.50 per 100, fancies selling at $3 to $4.

A few good chrysanthemums are still to be had; these sell well at from $1 to $1.50 per dozen for ordinary stock, extras going to $2 and $2.50 per dozen.

Violets are very short and good stock is cleaned up daily; $1.50 per 100 is the ruling price for fine violets, though there are poorer grades which sell at 75c. and $1 per 100. Valley is plentiful. Harrisii lilies are in fair supply and of pretty good quality, bringing $10 to $12.50 per 100. Paper Whites and Romans have become very plentiful, and though they meet with some demand, the general supply moves slowly at an average of $1.50 per 100 for good stock of either.

John N. May, of Summit, N. J., who was in town two or three days last week, completed arrangements for the purchase of the rose Mrs. Oliver Ames, from Robert Montgomery, of Natick, Mass. The variety Mrs. Oliver Ames is a sport from Mrs. Pierpont Morgan, and originated with Mr. Montgomery about two years ago. The flower resembles the type quite a little in form and habit, but is of a lighter color with more delicate shading. At the recent chrysanthemum exhibition of the Massachusetts Horticultural Society, where Mr. Montgomery staged a handsome vase of flowers of this rose, he was awarded a bronze medal. F. J. N.

Detroit.

The Detroit Florists' Club, at its last meeting, decided to give a flower show next November. A special committee was appointed to prepare the premium list.

The club will send a large delegation to the annual meeting of the American Carnation Society in Baltimore in February next, and a strong bid will be made for the convention of that society being held in Detroit in 1902.

Tarrytown, N. Y.

The Tarrytown Horticultural Society held its monthly meeting on November 28. The chief business of the evening was the nomination of officers for the ensuing year. Henry Rayner was elected to membership. R. A.

A Business Paper FOR Business Men:
The FLORISTS' EXCHANGE

A. G. PRINCE & CO. Beg to announce to their friends and patrons that they have closed their city salesroom and that hereafter the entire product of the two establishments of the HINSDALE ROSE COMPANY and the large greenhouses of MR. HENRY PAYNE, will be consigned to **MR. E. H. HUNT, 76-78 Wabash Ave., Chicago, Ill.** A. G. PRINCE & CO.

Mention the Florists' Exchange when writing.

THE FLORISTS' EXCHANGE, $1.00 A YEAR.
Subscribe before the New Year commences.

NOTICE!

TO INSURE SAFE ARRIVAL OF PLANTS in cold weather, customers, when ordering, should give route by which plants should be shipped, and at same time notify agent in their end of line to place box in heated room until same can be called for by consignee.

Agents should be cautioned not to deliver plants except in heated wagon in freezing weather.

HEADQUARTERS

For Plants Now and for the Holidays,

IMPORTED DIRECT FROM THE GROWERS IN GHENT, BELGIUM AND OTHER PLACES

Having been to Belgium again myself, I am well posted on their system. As the growers there are all syndicated, I can assure you no one can obtain cheaper rates than I.

ARAUCARIAS

We are headquarters and can give you more value than any house in America can. Order quickly before stock is all gone, and while the weather is not too cold. This is a rare chance. I have only about 1,000 left.

These I purchased myself and they are of my own selection during my trip to Belgium in September, and I can offer you special prices. No seedlings; raised from top cuttings only.

EXCELSA.

5 in. pots, fine thrifty plants, only 50 cts. each 5½ in. pots, 3 to 4 tiers, 12 in. high and above, 60 cts. to 70 cts.; 5½ to 6 in. pots, 3 to 4 tiers, strong, bushy plants, 75 cts. and 80 cts.; 6 in. pots, 15 in. high, $1.00; specimen plants, 6 in. pots, 5 to 6 tiers, 22 to 25 in. high, very fine, $1.75 to $2.00.

Araucaria Compacta Glauca, very fine, bushy, 6 in. pots, 18 to 25 in across, $1.25; specimen plants, 6 to 7 in. pots, $1.50 to $2.25.

AZALEAS FOR CHRISTMAS BLOOMING.

Deutsche Perle (double pure white) and Vervæneana (pink variegated, the best of all), few flowers open and full of buds ready to open, from 50 cts. to $1.00 and $1.25.

AZALEAS Indica, large stock, my own selection while in Ghent, 10 to 12 inches, 35 cts. each.

Larger sizes, 40 cts. and 50 cts. each.

Specimen plants. Mme. Van der Cruyssen, $1 75 and $2 00 each.

Leading American varieties, such as Mme. Van der Cruyssen, Bernhard's Andrea Alba, Deutsche Perle, Empress of India, Prof. Walter, Simon Mardner, Vervæneana and others.

CORYPHA AUSTRALIS Hardiest palm of all. Have 5M of them in 5 in. pots, 12 to 18 in. high, 45 cts. each.

Latania Borbonica, 6 in. pots, very fine, at the rate of $6.00 per doz.

Kentia Belmoreana. 5 in. pots, 85 cts.

Dracæna Bruantii, 5½ in. pots, 24 in. high, most favored house dracæna, 50 cts. each.

Dracæna Indivisa, specimen plants, imported, 6 in. pots, 30 to 36 in. high, 40 cts. each.

FICUS ELASTICA (Rubber plants).

Have 1500, imported last Spring:
5½ to 6 in. pots, $4.00 per doz.
Specimen plants, 6 in. pots, $5.00 per doz.

BEGONIAS SEMPERFLORENS GIGANTEUM.

Best blooming Winter Begonia, 5 in. pots, 25 cts. to 35 cts. each.

President Carnot, 5 in. pots, 25 cts. each.

Other Winter-blooming Begonias, leading varieties, 4 in. pots, 7 cts. each.

CHRYSANTHEMUM STOCK PLANTS

Merry Monarch, best early and profitable white 'mum in cultivation; strong clumps, 75 cts. per doz; $5.00 per 100.
(If pots are wanted add 2 cts each.)

Asparagus Sprengerli, 4 in. pots, $ .20 per doz.

Chinese Primroses, bushy plants, 4 in. pots, that will bloom at Xmas, at the rate of $6.00 per 100; 5 in. pots, full of buds, $1.80 per doz.; 6 inch, large plants, $3.00 per doz.

Cyperus (Umbrella Plants), 4 in. pots, $15.00 per 100.

Large Honeysuckles, grown in 6 in. pots, 20 cts. each.

Hardy Ivies, strong plants, 3 in. pots, 7 cts. each.

Geraniums, 2½ in. pots, leading varieties $2.50 per 100.

Cash with order, please. Money can be sent safely by Express or Post Office money order, registered letter, draft on Philadelphia banks, etc. Goods must travel at purchaser's risk.
Mention if wanted in pots.

MR. HENRY F. MICHELL,

Of 1018 MARKET ST., PHILADELPHIA,

In Sending Us a Generous Order for our

GRAND NEW ROSE

THE QUEEN OF EDGELY

PINK AMERICAN BEAUTY,

Writes:

"We have your acknowledgment of order which you sent us April 19th on file. We are quite sure that this rose is going to be one of the greatest introductions since the American Beauty has entered the market. A great many of our customers who saw this rose praise its quality very highly, and promised us good-sized orders as soon as the plants are ready. The especially great point in this rose is that it is the BEAUTIFUL SHADE OF PINK which will be very much desired in that popular variety. We think you have AN EXCELLENT ROSE and one which will prove profitable to you."

Points and information from seedsmen, and all interested in this column, solicited. Address EDITOR SEED TRADE, care of FLORISTS' EXCHANGE, P. O. Box 1697, New York.

Arthur Cowee, of Meadowvale Farm, Berlin, N. Y., has arranged with H. H. Groff, of Simcoe, Ont., for the sale of the latter's hybrid gladioli in the United States. A neat catalogue has been issued, copies of which can be obtained from Mr. Cowee on application.

Canandaigua, N. Y.—The T. C. Parkhurst seed business was last week sold to R. A. Mather.

Omaha, Neb.—The Nebraska Seed Co. will in the near future occupy the four-story structure known as the Garfield Building on Howard Street, between Fifteenth and Sixteenth Streets.

Paris, Ill.—F. R. Magner, president of the Levings Bros., Seed Co., was killed December 14 while climbing a fence with a gun in his hands. He was 44 years of age.

Chicago.—The suit of the Leonard Seed Co. to recover from the companies that were on its risk, under a claim based on the collapse of the building last year, has resulted in favor of the companies.

Washington.—The lowest bidder for the contract of furnishing seeds for congressional distribution during the fiscal year 1902 received by the Department of Agriculture was the New York Market Gardeners' Association, at $101,975. The other estimates submitted were:

Henry Phillips Seed and Implement Co., Toledo, O.	$113,065
California Seed Growers' Co., San Francisco	118,000
Ullathorne Seed Co., Memphis, Tenn.	119,957
E. J. Weatherly, Chicago	119,765
German Seed and Plant Co., Los Angeles	122,000
Sioux City Seed and Nursery Co.	130,000
J. L. Schiller, New York	150,000

European Notes.

Two French novelties likely to meet with favor in America are Ageratum Princess Pauline and Carnation Giant of Nice. The latter is really an enlarged form of the Margaret class, very free flowering and with a good range of colors. It is a cut-and-come-again variety and can be well recommended. The ageratum is dwarf in habit, with large-sized flowers, which are of a clear pale blue color with a white center. The effect of a border of these is very striking.

Another good novelty that will eventually find its way into the seedsman's catalogue is Carnation Lord Roberts. It belongs to the tree or Winter-blooming section and was exhibited in fine form during the present week. Its color is the purest yellow; the blooms are often 3 inches across; the calyx does not split under any conditions. The flower stems are long and strong and carry four or five good flowers on each; in some rare cases as many as nine have been carried on one stem.

If anything could make double Cyclamen persicum popular it would be the splendid specimen exhibited by Ker on December 4. At present this novelty is not appreciated.

A fitting companion to the lovely Viola cornuta papilio is Viola Blue Beard, which is rather larger in the flower and of a richer true blue color. Both are at the present date (December 7) in full bloom in the open ground, and look as if they would continue flowering until the Spring arrives.

Dobbie & Co. are very favorably known for their good work in the development of garden turnips, and at the last meeting of the Royal Horticultural Society they exhibited some new hybrid forms which are interesting not only from a scientific, but also from a practical point of view. The following are likely to be the most useful: Hybrid No. 3, Dobbie's white Model × Veitch's red globe—a fine deep globe-shaped root, with purple top and clear white, very solid flesh; would make an excellent strain of the American early red top globe.

Hybrid No. 4, Dobbie's white Model × Purple-top Milan. A vigorous globe-shaped Milan with very small top and fine grain of flesh. An excellent variety for frame work and more profitable than the Milan.

Hybrid No. 6, Harrison's Green top Marble × Dobbie's Golden Ball; a very solid and attractive variety, with green top and rather pale yellow flesh. This should be an excellent long-keeping kind and will be a valuable acquisition. The same may be said of Hybrid No. 7, Early Red Globe × Dobbie's Golden Ball; a deep-formed red-topped, yellow-fleshed turnip, clean growing and very solid. Quite distinct in appearance and in every way to be recommended.

If, as seems probable, these new hybrids retain their special excellences under ordinary cultivation, they are certain to be in demand.

At the same meeting Cannell & Sons exhibited some roots of their prize-winner parsnip, nearly 35 inches in length and sufficiently high in the crown to satisfy the most critical Bostonian.

Nothing fresh as regards seeds, except a fresh supply of rain every day, which has brought all open-air operations to a standstill.

The wonderful Mrs. T. W. Lawson carnation was on show at the same meeting, but the fair dame had left her perfume at home. EUROPEAN SEEDS.

Government Seed-Testing.

Editor Florists' Exchange:

The report of the Secretary of Agriculture is both interesting and important. He says: "As the mandate of Congress has laid upon the Department of Agriculture the work of purchasing and distributing larger amounts of seed than ever before, the duty of carrying out this task in an effective manner has become still more imperative than formerly." Between the lines can plainly be read that the task is distasteful, as such a waste of money must be to any man of intelligence and honor. The fact of more than fourteen and a half million packets of seed being distributed annually free of cost to the recipients, for no other reason than their use as electioneering documents, is truly a travesty of justice that should be condemned by every honest man. There is no more sense or justice in distributing seeds indiscriminately than there is in distributing the products of any other of our industries. The seeds rarely go to the needy; neither do they go where they can in any way have the slightest influence in developing our agricultural industries, which is claimed to be the purpose of the distribution.

To encourage the cultivation of any plant, whether for its fruit, foliage, grains or forage, that we have not already tried, is highly commendable and just what the Department was created for. But how much in this line has been done? We await reply, but there comes no answer; there will be none. Every part of the habitable globe has been searched repeatedly by the most eminent horticulturists for something new and useful. The civilized and uncivilized races of the world have contributed freely of their agricultural products for our benefit; and we can hope or expect but little more.

Our seed growers have been over this ground frequently until there is nothing more to be found. The firm of Landreth & Sons has been engaged in this work for more than a century. The name of Grant Thorburn is a household word, and he began work along the same lines very nearly a century ago. Both of these firms got the most improved varieties from both hemispheres, brought them here, cultivated them with care, and by the most careful and systematic selection have developed types adapted to our conditions of soil and climate which surpass any the Old World ever did or can produce. Within the past five years many of our well-established varieties of vegetables which were selections from those obtained abroad have been returned, so much improved as to warrant the English seedsmen in sending them out as "novelties of rare merit." What those pioneers in our seed industry did is being followed up by our modern seedsmen, so that the Old World has nothing the New has not found out.

What is the Department of Agriculture doing along these lines? Just what Landreth and Thorburn did 75 to 100 years ago; getting all the vegetables China and Japan produce, as well as the Brassicas from Russia and other parts of Europe, and is now having them tested to find out their adaptability to our conditions.

At the annual fair of the American Institute, last September, one of the Department's specialists made an exhibit of the vegetables and herbs grown from the best sorts to be found in China and Japan, and a greater variety of rubbish was never seen on an exhibition table. Some of the varieties were a disgrace to the name of horticulture, and not one of the 60 or more sorts was equal to any of our productions of the last 50 years. All the use they were or could be was to show, in comparison with our productions, what can be done by selection.

The standard of trueness established by the Secretary is all right in case a bad practice is to be continued. If the tests are true, the parties that supply the seeds must, from necessity, become bankrupt; they cannot possibly put up seeds true to name at the contract price. The seedsmen's hopes are that the test will be thorough, in which case the contractor will not be in the field a second time.

The tests in our grounds last year made a very different showing from the results in the trial grounds of the Department. Our trial of Chartier radish did not show one that was true; in beets and lettuce there was in either 40 per cent. true. That they were, as stated, in the Department's grounds, we have not the slightest doubt; but how it happened is the problem hard to solve.

What the plants were that proved so valuable we do not know, as their names and characters are not given. That they will increase the nation's wealth is my desire, my hope. L.

NURSERY DEPARTMENT.

AMERICAN ASSOCIATION OF NURSERYMEN.

THEODORE J. SMITH, Geneva, N. Y., President; N. W. HALE, Knoxville, Tenn., Vice-President; GEORGE C. SEAGER, Rochester, N. Y., Secretary; C. L. YATES, Rochester, N. Y., Treasurer.

Dodgeville, Wis.—Isaac Ellwood, of Ellwood Bros., nurserymen, died December 8. Deceased was born in England in 1825. He had been totally blind for nearly eight years.

The twenty-sixth annual meeting of the New Jersey State Horticultural Society will be held at the State House, Trenton, N. J., January 3 and 4 next. A very interesting program has been prepared.

Albert Lea, Minn.—The residence on Clarence Wedge's nursery, two miles south of this city, caught fire December 12 while Mr. Wedge was absent and burned to the ground. Many valuable papers were saved, but the loss is heavy. There was some insurance.

Western Wholesale Nurserymen's Association.—It is the unanimous opinion of members of the Western Wholesale Nurserymen's Association who attended the organization's annual meeting in Kansas City last week, that there will be a considerable rise in the prices of nursery stock before Spring. The fact was brought out that the available stock is the shortest it ever has been, and that the supply is certain to be found far short of the demand when Spring opens. This is especially true of the larger fruits, apples, pears and peaches, etc., and of cherries. Apples, it is said, will be found very scarce and cherries extremely so.

About 30 nurserymen from the territory tributary to Kansas City attended the meeting. The following officers for the ensuing year were elected: President, A. L. Brooks, Topeka, Kan.; vice-president, R. H. Blair, Kansas City, Mo.; secretary and treasurer, E. J. Holman, Leavenworth, Kan.; executive committee, Peter Younger, Geneva, Neb.; A. Willis, Ottawa, Kan.; R. S. Welch, Shenandoah, Ia.; J. H. Skinner, Topeka, Kan.; A. C. Griesa, Lawrence, Kan.

Ligustrum Japonicum, Evergreen Privet.—It is common to hear all gardeners from European countries, as well as our own citizens who visit those countries, deplore the lack of broad-leaved evergreens available for planting here. They may well do this, for the number hardy enough for general use is small indeed. This is why I think the Ligustrum japonicum will be welcomed here, as it is a true evergreen and is hardy, hereabouts at least, and no doubt would thrive north of this. This plant is not the common Japanese privet, L. ovalifolium, so much used for hedging. As is well known, Japan has furnished us with a large variety of privets, and Japanese privet is a name common to many of them, more especially to the one so much used for hedges and which is also called L. californicum. But the one I refer to as being a true evergreen comes to us as Ligustrum japonicum, and its character seems to agree with the description of this species in botanical works. At any rate, whatever may be its true name, it's a good thing. My first acquaintance with it was in the Botanic Garden, Washington, where it was growing nicely. To those acquainted with the myrtle of Europe, Myrtus communis, I would say that there is some resemblance of the plant in question to it, but the leaves are larger, while being of much the same appearance and texture. As to its hardiness, it has been under my observation here for about eight years, and in all that time has been injured but once, in the Winter of 1897–98. On that occasion about a foot of the tops was frozen back. It was a severe Winter, and that but the tops suffered was satisfactory. As a rule, all Japanese privets make a late growth, and this will be unripened when freezing weather sets in, hence is apt to be hurt in very cold periods.

Protecting Trees and Shrubs in Winter.—The question of protection to trees and shrubs in Winter is one of much importance, and one opportune at the present time, as this is the month in which to do the work. Very many plants are injured in Winter which would come through in good shape with a slight protection. This is especially applicable to many evergreens. It is within the experience of most every gardener in this section that rhododendrons, yews, evergreen magnolia, box, Euonymus japonicus, and like evergreens, may be brought through many a Winter which would otherwise injure them if kept shaded from the sun, especially in the late Winter months. The explanation is that transpiration goes on much more rapidly under great light than in darkness, and it is so rapid in bright, clear, cold days, especially on the sunny side, that the leaves cannot be sustained, and they die. This damage is much more certain to result if in addition there is a carpet of snow on the ground, as light is then more intense. I think most all nurserymen are too well aware of what a sorry-looking sight their Irish yews are on the southern side after a severe Winter, while being of the usual bright green on all other sides. Sometimes every leaf is killed. The remedy is shade, given in any way at all practicable.

A correspondent, T. E., in a recent issue, very truly explains why it is that trees in low ground are winter-killed, when the same kind of tree growing on high ground will be uninjured. Peach growers are particularly well aware of this fact, and set their orchards anywhere but in a valley, if they have a choice. The Magnolia grandiflora, which I referred to in a previous article, is in a much better situation on an elevation than anywhere else, and then, if shade can be afforded, it will bring its foliage through in good shape, as well as its wood.

I can think of no use that shade could be to an unripened shoot, such as the hardy orange would have in a low situation; but nearly all gardeners have been as unlucky as I have been in my time in having geraniums and other greenhouse plants frozen, and, like me, have preserved them by raising the temperature just above the freezing point, and keeping the plants covered over in complete darkness for 24 hours. Freezing is not nearly as dangerous in darkness as in light.

Outlook for the Nursery Business—Evergreens.—In my last notes I confined myself to shrubs, and now propose to speak of evergreens. The increased demand for these has been remarkable. Old-time sales were mostly confined to the commoner sorts, but to-day sees the rarest as much in demand as the cheapest one on the list. For many years customers for evergreens were of the class who

Mention this paper. C. H. JOOSTEN, Importer, 85 Dey St., New York

measure the value of a tree by its bulk. A big Norway spruce of six feet would be much preferred to a two-foot Colorado blue spruce, if the same sum would buy either one. And even wealthy men were in this class. Without knowledge of trees or love for them, they simply cared for an evergreen of a certain size, and the less it cost the better. Horticultural journals, intelligent landscape and private gardeners, and an intelligent class of nurserymen who have adorned their own grounds have, combined, brought about a wonderful change. Too much praise cannot be given to the landscape gardeners and park superintendents of to-day, for it is largely to them that the taste for rare trees of all kinds has been so successfully fostered. The sales of evergreens are now very large, and so encouraged are nurserymen that it is now possible to get from many of them, in fair quantities, sorts which heretofore could be had but in single specimens, or not at all. The planting of these rarer kinds is bound to increase the sales of them in the future. As the trees grow they are admired and asked for, and so the good work extends. In this vicinity there are some very fine specimens of Cryptomeria japonica, Cedrus Libanii, English holly and other evergreens, and many a tree has been sold to parties who have seen these trees flourishing here.

The acquiring of land for large parks by cities and individuals is bound to create an increased demand for evergreens, and nurserymen will be wise who continue planting. The demand for certain native evergreens exceeds the supply. The Taxus canadensis, Pinus resinosa, P. Banksiana, P. inops and P. rigida could all be grown more than they are. Pinus resinosa is an uncommonly lovely pine. It is of heavy growth, with long, soft needles, deep green in color, and a fast grower. It could be used wherever the Austrian would suit.

In many cities there is a growing demand for small evergreens in pots, for the use of hotels, the filling of window boxes and the using of them for Christmas time, not altogether for Christmas trees, but for making dwellings look cheerful for the Winter season. Almost any evergreen suits, from the common, though beautiful, hemlock spruce to the rarer Japanese and other sorts. The outlook is decidedly encouraging for an increase of trade in this direction. Florists are the chief buyers of these evergreens, they securing the orders and purchasing at the nurseries. Besides this, there are florists who find sale for some choice sorts in pots in Summer to those wishing but a few for their gardens.

JOSEPH MEEHAN.

Pruning Evergreen Hedges.

Editor Florists' Exchange:

I read in your issue of December 15 what Mr. Meehan says further in regard to pruning evergreen hedges, and that I did not give any advice other than he did. As I wrote my article more to benefit those who asked for advice, and more as a warning against too early Spring or too late Summer pruning, than as an objection to his remarks, we could safely let the matter rest there were it not that Mr. Meehan gives me a little counsel about things which, he thinks, I do not know.

I am well aware of the fact that there are good hedges, and that these do not need much mending. There are also good gardeners who know how to care for hedges; but I doubt very much if the latter will ask for advice on how and when to prune. But Mr. Meehan has not to go far to see other hedges which are not so perfect, and when the caretakers of these ask for advice they are entitled to a plain answer.

Referring to Mr. Meehan's discovery of a self-contradiction on my part, as my remarks had reference to hedges, I do not see much contradiction in them, unless Mr. Meehan also means plants which have been close together. But a good nurseryman or gardener transplants his trees before they get too close together, and has very little trouble in doing it.

As regards Mr. Meehan's remarks on Arbor vitæ, I would suggest that he risk a few trees and cut them as close as he desires, so that no live foliage is left, and see what will happen to them. No doubt this experience will teach him that Arbor vitæ trees are not so averse to being pruned as many, even proiessionals, think.

I hope, Mr. Editor, I do not ask too much space in your valuable paper for such a trivial matter?

P. OUWERKERK.

(260) **Gardenia Leaves Turning Yellow.**—I have one greenhouse filled with Gardenia Veitchii japonica. The plants were a beautiful green till about a month ago; since then the leaves are gradually turning yellow. What can I do to have the leaves become green again?
C. B.

—We know of no remedy or treatment that will turn the gardenia leaves to their natural color again after they have become yellow. Gardenias should have plenty of heat and moisture to keep them going, and if these two conditions are met the plants will probably start into new growth.

(261) **Trouble With Roses.**—Please let me know what is the reason of my roses coming curled and discolored at the edges; also if red spider or too much water is the cause of the leaves dropping.—P. O.

—The roses are evidently suffering from red spider. Syringing freely every day will overcome the pest. With too much water the foliage would become stunted and fail to develop.

(262) **Rose Marechal Niel.**—Who was the rose Marechal Niel named after? Has it any connection with the French soldier Marechal Ney?—HAMILTON.

—We believe the rose in question was named after Marechal Niel, a French marshal and Minister of War, who died in 1869. It was raised by Pradel, an eminent French rosarian, in 1864. Marechal Niel was distinguished in the Crimean War (particularly at Sebastopol in 1855) and in the battles of Magenta and Solferino in 1859.

There is also a rose named Marechal Ney, an altogether different variety.

(263) **Temperature for Carnation Houses.**—Please advise what is the proper temperature, night and day, for carnation houses. My plants do not seem to be doing well. I have kept the houses at as near 48 degrees as possible at night and 60 to 65 degrees daytime; have watered sparingly and fumigate once a week, but do not spray. The plants are free from red spider, but a few have stem rot.—G. J. N.

—A night temperature of from 48 to 52 degrees, according to the varieties grown, with a day temperature of from 60 to 65 degrees, is all right. There has been a good deal of stem rot in carnations this Fall. The only remedy is to have enough stock on hand to fill in the blanks when the affected plants die out.

(264) **Fertilizers for Carnations.**—Is blood and bone a good stimulant for carnations? Doesn't the mixture act quicker than bone alone? Is a 4-inch potful to every square yard too much? How often should it be applied?—P. O.

—Ordinary liquid manure will prove a better stimulant than the blood and bone. The two latter would act quicker together than the bone alone, although we would not use so much as a 4-inch potful to the square yard. A 3-inch potful would be sufficient. As to how often the mixture should be applied, it depends altogether upon the condition of the plants. Should they be growing vigorously, it may be given once in three weeks; but if growth is not free, the fertilizer should not be applied so often. When feeding plants, their condition to receive such food must always be taken into consideration; to overfeed will check their growth and produce flowers that will soon go to sleep.

(266) **Asparagus plumosus.**—My Asparagus plumosus vines have had seed pods on them for nearly five months. These are still green, but I understand they must be purple when ripe. Can you tell me whether I should withhold water from them, or how to ripen the seeds?—J. W.

—It is not necessary to withhold water from the asparagus in order to ripen the seeds, although asparagus seems to grow better when kept on the dry side. The seeds will soon ripen now. It is better to leave them on the plants until they become purple, when they can be picked any time.—WM. H. ELLIOTT.

Educational Institutions.

There are now 21 students attending the school of practical agriculture and horticulture at Briar Cliff Manor, N. Y., with prospects for a larger number. A course in floriculture is to be one of the features here. George T. Powell is director.

A special six weeks' course in horticulture will open at the Rhode Island College, Kingston, R. I., February 20, 1901. The course will embrace instruction in fruit growing, vegetable gardening, landscape gardening, forestry, floriculture, laboratory work, plant life, insect life and greenhouse construction. Practical men have been secured to give lectures on their own specialties. F. W. Card is professor of horticulture.

At the last meeting of the Denver Florists' Club, F. T. Rusbmore was elected recording secretary, and A. E. Mauff was re-elected treasurer.

HEADQUARTERS

For Plants Now and for the Holidays,

IMPORTED DIRECT FROM THE GROWERS IN GHENT, BELGIUM AND OTHER PLACES

Having been to Belgium again myself, I am well posted on their system. As the growers there are all syndicated, I can assure you no one can obtain cheaper rates than I.

ARAUCARIAS

We are headquarters and can give you more value than any house in America can. Order quickly before stock is all gone, and while the weather is not too cold. This is a **rare chance.** I have only about 1000 left.

These I purchased myself and they are of my own selection during my trip to Belgium in September, and I can offer you **special prices.** No seedlings; raised from top cuttings only.

EXCELSA.

5 in. pots, fine thrifty plants, only 50 cts. each
5½ in. pots, 3 to 4 tiers, 12 in. high and above, 60 cts to 70 cts.; 5½ to 6 in. pots, 3 to 4 tiers, strong, bushy plants, 75 cts. and 80 cts.; 6 in. pots, 16 in. high, $1.00; specimen plants, 6 in. pots, 5 to 8 tiers, 22 to 25 in. high, very fine, $1.75 to $2.00.

Araucaria Compacta Glauca, very fine, bushy, 6 in. pots, 18 to 25 in. across, $1.25; specimen plants, 6 to 7 in. pots, $1.50 to $2.25.

AZALEAS

Indica, large stock, my own selection while in Ghent, 10 to 12 inches, 35 cts. each.

Larger sizes, 40 cts. and 50 cts. each.

Specimen plants. Mme. Van der Cruyssen, $1 75 and $2 50 each.

Leading American varieties, such as Mme. Van der Cruyssen, Bernhard's Andrea Alba, Deutsche Perle, Empress of India, Prof. Walter, Simon Mardner, Vervaeneana and others.

Prices for Easter Azaleas good only until Jan. 1, after which will be changed.

CORYPHA AUSTRALIS Hardiest palm of all. Have 5M of them in 5 in. pots, 12 to 18 in. high, 45 cts. each.

Dracæna Bruantii, 5½ in. pots, 24 in. high, most favored house dracæna, 50 cts. each.

Dracæna Indivisa, specimen plants, imported, 6 in. pots, 30 to 36 in. high, 40 cts. each.

FICUS ELASTICA (Rubber plants).

Have 1500, imported last Spring:
5½ to 6 in. pots, $4.00 per doz.
Specimen plants, 6 in. pots, $5 00 per doz.

BEGONIAS SEMPERFLORENS GIGANTEUM.

Best blooming Winter Begonia, 6 in. pots, 25 cts. to 35 cts. each.
President Carnot, 5 in. pots, 25 cts. each.
Other Winter-blooming Begonias, leading varieties, 4 in. pots, 7 cts. each

CHRYSANTHEMUM STOCK PLANTS

Merry Monarch, best early and profitable white 'mum in cultivation; strong clumps, 75 cts. per doz; $5.00 per 100.
(If pots are wanted add 2 cts. each.)

Cyperus (Umbrella Plants), 4 in. pots, $7.00 per 100.

Large Honeysuckles, grown in 6 in. pots, 20 cts. each.

Hardy Ivies, strong plants, 3 in. pots, 7 cts. each.

Geraniums, 2½ in. pots leading varieties $2.50 per 100.

Cash with order, please. Money can be sent safely by Express or Post Office money order, registered letter, draft on Philadelphia banks, etc. Goods must travel at purchaser's risk. Mention if wanted in pots.

THE GEO. WITTBOLD CO., Palms and Ferns, **1657 Buckingham Place, Chicago, Ill.**

Mention this paper.

FOUNDED IN 1888.

THE FLORISTS' EXCHANGE

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the trade in general.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published EVERY SATURDAY by

A. T. DE LA MARE PTG. AND PUB. CO., LTD.,

2, 4, 6, 8 Duane St., New York.

P. O. Box, 1697. Telephone 1854 John.

REGISTERED CABLE ADDRESS: Florex, New York.

SUBSCRIPTION, $1.00 PER YEAR

To United States, Canada and Mexico.
To foreign countries in postal union $2.00.
Payable in advance. The date on the address label indicates when subscription expires.

CHANGES OF ADDRESS.

When notifying the publishers to send the paper to a new address, give both old and new addresses.

BINDERS.

The publishers can supply binders which will hold the papers for one complete volume, keeping them in perfect order for ready reference. Price, postpaid, $1.00.

ADVERTISEMENTS, $1.25 PER INCH.

Special positions extra.
No advertisement less than 75 cents.
Discounts on continuous advertising.
For rates, on Wants, etc., see column for classified advertisements.
Copy must reach this office not later than Thursday in order to secure insertion in issue of the following Saturday.
Orders from unknown parties must be accompanied by cash or satisfactory references.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Prices on application.

BOOKS.

The publishers of The FLORISTS' EXCHANGE are headquarters for all standard books pertaining to the Florist, Nursery and Seed interests. Catalogue sent free on application

Erratum.

In advertisement of A. B. Davis & Son in issues of December 8 and 15 read price of petunia cuttings, $1.25 per 100, post paid; not $1.00 per 100.

A Merry Christmas to All.

The Guernsey Growers' Gazette has discontinued publication, on resolution passed at the last regular meeting of the association.

The Delineator, published by the Butterick Publishing Co., Limited, New York, issues a very beautiful holiday number for January. Ladies will find much to interest them in the publication named. The colored fashion plates are particularly handsome.

RANDOLPH, VT.—H. M. Totman has succeeded Totman Bros.

MAYVILLE, N. Y.—J. Ruland has given up the Baldwin greenhouse and will move to Westfield to engage in the same business. We hope, says *The Sentinel*, some one else will be induced to locate here, as it appears to be a good opening for the right person.

Society of American Florists and Ornamental Horticulturists.

DEPARTMENT OF PLANT REGISTRATION.

ROSE FREEDOM.—Arthur Griffin, Newport, R. I., registers new rose, Freedom, a sport from Liberty, identical with that variety in every respect except color, which is a bright rose; the reverse of petals, deep rose. WM. J. STEWART, Secretary.

The Free Seed Abuse.

The contract for supplying seeds to the United States Department of Agriculture for free distribution during the season of 1902 has been awarded. The contract price is $101,975. The contracting firm is the same one that has performed this work for the Government on a former occasion. The names of the unsuccessful bidders, together with the amount of their bids, are given in another column.

One gratifying feature in connection with this contract is the fact that the firms considered to be the most prominent in America have evidently washed their hands clean of the entire matter, refusing to become parties to the government's unjust work. Not only is this true of those who have at no time had any direct dealings with the government along this particular line, but also of those who at one time or another have furnished the called-for seed supplies, and taken advantage of the advertising which the carrying out of this work has been supposed to afford by publicly announcing the fact through the medium of their catalogues. These latter parties are to be congratulated upon their change of heart, and it is to be hoped that the other seedsmen of the country, and particularly those who by their offers to supply the government with seed still seek to aid our national rulers in perpetuating this needless and worse than useless squandering of public funds, will follow the commendable example thus set. Until this happens we fear the free seed abuse will continue, for so long as any part of the seed trade is a beneficiary under the law, emphatic and well-put protests, such as those contained in the circular recently issued by the secretary of the Wholesale Seedsmen's League, will pass unheeded as the idle wind; the grievance complained of not being all-embracing so far as the seed trade itself is concerned.

Under existing conditions it appears to us that this ridiculous farce of governmental seed distribution cannot be discussed unbiasedly either by the seedsmen or the Congressmen, seeing that the matter of what is looked upon as self-interest on the one hand and illegitimate selfishness on the other so largely enters into the question. Nor is it likely to receive honest treatment at the hands of a large mass of the general public who are the recipients of this bounty so liberally dispensed by our government. There are, though, to be found those who do and will deal with the subject from the standpoint of principle and right; and it is to them that those now oppressed must look for relief, until the entire seed trade, with one accord, lift its voice in demanding redress from a heinous wrong. This latter condition, however, appears to be as far off as is the millennium.

Why not have the Supreme Court pass upon the constitutionality of the legislation providing for the injustice of free seed distribution?

Plant Registration Bureaus.

The registration of new plants, at one time entirely ignored in this country, now seems in a fair way to be overdone, so far as the number of bureaus available and undertaking such work is concerned. The example set by the American Carnation Society of safeguarding the nomenclature of new varieties for its members, and preventing synonymy by registration, has been followed by other national floricultural bodies, among which are the Society of American Florists, the American Dahlia Society and latterly the American Rose Society.

No one will question the advisability of each separate organization endeavoring to further the interests of its membership to the fullest extent in its power; but existing conditions certainly frustrate a simplification of the results accruing from the important work of registration than otherwise.

The registration of the Society of American Florists is of a general character, taking cognizance of the specialties which each of the other societies represents, and with the S. A. F. some of these specialties have also been registered. There is no apparent good reason for double registration; in fact, if only one bureau were to undertake and perform the work, it would be ample and fully serve the purpose sought.

What is required with respect to this matter is the annual publication of only one list, comprehensive and complete in every detail—something that the present system precludes. We hope some arrangement can be effected between the various existing registration bureaus, whereby such a list may be forthcoming.

Attention has been called to the custom of using undignified abbreviations in connection with plant nomenclature now prevalent in trade circles, and the need for its curtailment or entire abolition. Very great assistance could be rendered toward the accomplishment of this were originators and introducers of plants to attach to these, names that allow but little scope for any such contractions and which incur no great effort in the pronunciation. Short titles like "Egypt," "Norway," etc., which have recently been applied to new varieties of carnations, and "Brutus," "Omega," etc., to chrysanthemums, could hardly be rendered in any other than their original names by even those most conservative of speech, or whose time for the utterance of lengthy appellations is most limited. So long as names affording a large "mouthful" are tagged on to plants and flowers, just so long will the tendency to cut these names short persist, and we might as well try to help the matter now as at any future time. Not only do these lengthy names tend to a continuation of a custom, the propriety of which is questioned, but they also confuse and entangle when it comes to listing them alphabetically, either in catalogues or otherwise. When you want to christen your new varieties in future, bear in mind always the admonition, "be brief; cut it short."

New York.

The Market.

The close of this week shows a decided lull in the cut-flower business. On Monday trade was quite good, and prices along all lines had an upward tendency. American Beauty reached $10 per dozen and Bridesmaid touched 15c. and 20c. each. Since Monday, however, trade has gradually decreased, and flowers were selling cheaper Thursday than on any other day this week. Plenty of evidence is around that roses and carnations are being held back. There is not the least doubt that good prices will prevail for Christmas, but only for choice stock, and no held-over flowers can be classed as choice. There is no likelihood of any shortage of cut flowers for Christmas.

White lilac is coming into the market and brings from $1.50 to $2.50 per bunch of 12 sprays. Cut poinsettias are also in and fetch from $3 per dozen upward, according to size.

Among the Retailers.

Baskets of plants form the principal feature in window displays for the holidays, and many pretty combinations are seen. Where cut flowers are used in the window, it is usually something out of the ordinary. In Thorley's Broadway store window there was an elegant bunch of the Queen of Edgely rose this week.

The weather has been so cold that there has been some delay in getting in the stock of plants, consequently the work of basket filling has had to be crowded into the last few days preceding Christmas.

Alex McConnell recently decorated the tables at the Union League Club, the occasion being the dinner of the bank presidents. American Beauty roses, set in growing adiantum and bordered with Roman hyacinths, were the feature of the tables.

The Rosary Co. (J. H. Troy, manager) have two fine specimen davallias in the window, surrounded with Begonia Gloire de Lorraine and oranges. This firm will have charge of the decoration in Mr. W. C. Whitney's mansion on January 4, when a grand ball is to be given.

Jottings.

Paul de Longpre, who is now a resident of California, has a collection of his flower paintings on exhibition at Knoedler's, Fifth Avenue.

The executive committee of the American Rose Society met on Saturday last, and decided to hold the Spring show of 1901 in the Waldorf-Astoria Hotel. The proceeds of the exhibition will be given to charity. There is every indication of a most successful show.

Isaac J. Simonson, who conducted a seed, bulb and florist supply business at 63 Barclay Street, had the misfortune to lose his entire stock by fire on Wednesday, the 12th inst. The loss is partially covered by insurance.

The Kervan Co., dealers in evergreens, have opened a branch store for the holidays at 34 West 29th Street.

J. Bahret, of Poughkeepsie, N. Y., was a visitor this week.

Aldred & Co., Fifth Avenue, furnished a casket cover on Wednesday that cost $1,000 when completed. It was made of violets only, lined with silk, and covered the casket of Judge Beaman, whose funeral took place at Windsor, Vt.

Christmas trees are moving out at a good pace this year. Along the water front, reaching from Chambers to Jay Streets, big quantities have been on sale for the past ten days. The demand for extra large trees has been the best, and this size is about cleared out. One Maine shipper, who usually brings in 20 carloads to this market, made a change this year and took his trees to Philadelphia. This venture has overloaded the market there, and many of the trees are being reshipped to this city to be sold here. The fruit and vegetable dealers in the neighborhood of West Street are handling large quantities of ground pine and holly made up into wreaths, roping, etc. Loose ground pine is not at all plentiful among these dealers.

Calendars Received.

ARTHUR COWEE, Berlin, N. Y.—Mr. Cowee has presented an original idea in calendars, and has utilized as a "picture" a reduced reproduction of the S. A. F. certificate awarded in August last for Groff collection of hybrid gladioli.

Philadelphia.

Christmas Prospects.

Prospects for a good supply of cut flowers for Christmas trade are such that the retail stores seem to be resting easy, and not worrying at all about placing orders far ahead. Indications are that all the Beauty roses will be used up. There is likely to be a surplus of medium grades of tea roses. Carnations will not be in over-supply, excepting, possibly, the poorer stock. Some say violets are likely to be scarce; then, again, you meet a man who has been on a violet grower's place, and he tells you the latter is only picking sufficient flowers for orders; but the plants are full of buds, boilers and pipes are in good condition for an extra supply of heat Saturday and Sunday nights, so you cannot tell until it is all over.

There is evidently an over-supply of holly and green stock generally, as it is not moving out fast, indicating that more than usual have bought direct.

Pennsylvania Horticultural Society.

The meeting of the Pennsylvania Horticultural Society on Tuesday last was well attended. Dr. Henry Skinner gave an illustrated lecture on "Insects Injurious to Vegetation," which was very able and most instructive. The election of officers for 1901 resulted as follows: President, James M. Rhodes; vice presidents, Dr. George Goebel, Henry F. Michell, Edward Le Boutillier and John McCleary; treasurer, Sidney W. Keith; secretary, David Rust; professor of botany, Thomas Meehan; professor of horticultural chemistry, Dr. Persifor Frazer; professor of entomology, Rev. H. C. McCook, D. D.; executive council, Moses Paxton, Wm. K. Harris, Thomas Long, Francis Canning, John Thatcher and Wm. Fowler; representative to State Board of Agriculture, Edwin Lonsdale.

The Committee on Premiums presented their report for 1901. The Fall show will be held on November 12 next.

DAVID RUST.

Buffalo.

Christmas Prospects.

In a look ahead, prospective of Christmas trade, the only condition that might have an untoward effect at that time would be bad weather. Social functions among the flower-buying classes will be numerous in entertainments that promise to be rather lavish. The retailers, however, acting from past experiences of too high prices, are a bit wary of placing many orders for flowers in advance. They very sensibly are looking up nice lots of plants, as salable at as good margins over cost as are cut flowers, and with less handling risk. The stores are quite alive to this condition, and the plant showings in poinsettias, Begonia Gloire de Lorraine, azaleas, palms and ferns are pleasing and pretentious.

Flowers give promise of being usually plentiful (or scarce, if so pre erably termed) at this time, and nothing noticeable as over abundant. A general scarcity of carnations, no doubt, will prevail. Some of the retail men who are in position to know the present trend of consuming buyers say that there now exist generally easier financial conditions among that class, and that an active cut-flower trade may reasonably be expected doing the next few weeks.

Ground pine has come in almost provokingly scarce, with holly unreasonably plentiful. The quality of the latter in most instances is satisfactory, but it has been seat in to the produce houses to be sold on commission in lots, apparently out of reason as regards quantity. Every corner grocery of pretense makes its showing of it on sale. What's to prevent when well-packed cases of it are to be had for less than cost of gathering and shipping it, and some of it a prime Delaware article at that? Holly wreaths seem to be in active call, however, and though shippers may be losers, it is still possible the apparent surplus will find sales at some price.

Jottings.

Recent callers included C. T. Guenther, Hamburg, N. Y.; Fred G. Lewis, of Lockport, and J. A. Penman, of New York, who seems to be meeting success in placing orders for Prof. Bailey's new horticultural work.

Mrs. M. Klockow, who previously was engaged in the retail trade in this city, recently opened a small but neat store at 13 Wadsworth Street. VIDI.

Boston.

The Market.

Business the early part of this week was almost entirely composed of shipping Christmas greens. The demand has been excellent, and the supply, excepting of laurel, was very good. Holly generally has been very well berried, and much of it had fine foliage, especially the native holly.

Cut-flower business has been light, as is usual the week before a holiday. The supply of stock on the market is limited, but the demand is not heavy.

In roses, the prices on American Beauty are well maintained, the supply being so limited that a small demand cleans up the stock pretty well. Bride and Bridesmaid are more plentiful; still, not so much so as the favorable weather would indicate. Prices hold about the same as last reported. Liberty is becoming more plentiful, but the supply is yet very light, the demand being far in excess of it. This rose would no doubt be a fine seller for the holidays. Growers are predicting a scarcity of roses, but there appears no reason why such should be the case.

Carnations are being held back, and though the demand is light, the small quantities brought in keep up the prices well. Extra fancy stock brings $4 per 100. Romans and Paper Whites continue very plentiful, and with lilies and other white flowers move rather slowly.

Violets are very scarce and bring good prices, extras selling at $1.25 and $1.50 per 100. Valley is plentiful, at usual prices. Mignonette is still scarce and sells well at $2.50 to $4 per 100.

Chrysanthemums are about wound up. A few good ones can yet be had, however, at from $1.50 to $3 per dozen.

The retail store windows are bright with the vari-colored Christmas plants and flowers. All the store men look forward to a good holiday trade.

Among Plant Growers.

The supply of plants this season will be large and varied, and plant growers are about cleaned out of everything sufficiently far advanced for Christmas purposes.

Azaleas intended for the festival have been pretty well bought up. Cyclamen, too, have sold well; Thomas Roland, of Nahant, George M. Anderson, of Milton, and Thomas W. Dee have brought in some fine plants. Mr. Roland also had a nice lot of Begonia Gloire de Lorraine, as did J. W. Tailby & Son, of Wellesley. Primulas of very good quality are clearing up well. Jerusalem cherries have had a large call, as have ardisias and orange trees, of which the supply was very limited this season. There are the usual quantities of poinsettias, pans of Romans and Paper Whites, pots of stevia, etc., all of which have sold well.

Jottings.

On Sunday, December 16, Mr. and Mrs. Fred R. Mathison celebrated the 25th anniversary of their wedding. A handsome collection of table silver was sent from a party of Boston florist friends.

The wholesalers have increased their force of assistants, and all are kept on the jump all day long. F. J. N.

The following is a list of officers for 1901 of the Boston Market Gardeners' Association: President, W. W. Rawson; vice-presidents, W. H. Derby and J. O. Wellington; secretary and treasurer, J. B. Shurtleff, Jr. Executive Committee: W. H. Derby, Walter Crosby, J. C. Stone, W. F. Symmes, M. Sullivan, Chas. G. Winn.

The 14th annual banquet of the association was held at the Revere House, Boston, December 13, and was the largest in its history.

Toronto.

Trade News.

Business continues good. There is a scarcity of first-class roses, violets and carnations, and prices for the former remain high. With favorable weather the Christmas supply will be sufficient; otherwise, stock will be scarce.

Club moss is not very plentiful, and the wreathing in evidence is not of the best quality. Considerable holly is on the market; commission men are handling it at low prices.

Jottings.

J. H. Dunlop is having good success with Liberty rose.

Jay & Son have improved their store and conservatory.

Fire in the greenhouses at Mount Pleasant Cemetery, Saturday last, did considerable damage.

Association Meeting.

The Gardeners and Florists' Association held its annual meeting December 18. The treasurer's report showed that all outside expenses connected with the recent chrysanthemum show had been paid, and there was sufficient funds to pay 65 per cent. of the prize money. This was ordered done. The secretary reported about 60 members in good standing. The election of officers for the ensuing year resulted as follows: President, W. J. Lawrence; first vice-president, W. Woods; second vice-president, E. Collins; secretary, William Jay; auditing secretary, R. Charlton; treasurer, George Mills; executive committee, John Chambers, A. Watkins, J. Graham, H. Dillinworth, J. H. Dunlop, W. Muston and T. Manton. T. M.

Hartford, Conn.

A number of the florists organized the Hartford Florists' Club Tuesday, December 11, and elected the following officers: President, T. J. McRonald; vice-president, W. W. Hunt; secretary, J. F. Coombs; treasurer, D. A. Spear.

American Carnation Society.

NEW CARNATIONS REGISTERED.

By E. T. Grave, Richmond, Ind.

DOROTHY, color pink, Scott shade, flower large and symmetrically built out nicely in center. Calyx strong, never bursts. Stems long and stiff, being well able to support the flower. A continuous and very free bloomer from early until late. An excellent keeper and shipper.

Dorothy is a duplicate name of an old variety, but the above has been shown and advertised before being registered, and there being none of the former Dorothy grown at this date, the name is practically new. If growers of new carnations would register the names before giving the varieties to the public, duplication could be, to a great extent at least, avoided. ALBERT M. HERR, Secretary.

To Carnation Raisers.

Mrs. J. Montgomery Sears offers through the Massachusetts Horticultural Society the following special prizes:

For the best seedling carnation originated subsequent to 1900, to be judged at three exhibitions in Horticultural Hall, Boston, in November, February and April (six blooms to be shown) and at three exhibitions in each November, February and April thereafter (25 blooms to be shown), competition limited to the originators of the varieties exhibited and to continue until one variety has won first place consecutively throughout two seasons, a cash prize of $250, and for the variety having scored next nearest to the above requirements, to be awarded a cash prize of $100.

Judging to be according to the following scale and recognition to be accorded only to varieties scoring 85 or more points:

SCALE OF POINTS.

Fragrance	20
Color	20
Form	20
Size	20
Stem	15
Calyx	5
	100

The first competition under the specifications will take place on the second day of the chrysanthemum exhibition at Boston, November 6, 1901. For further particulars address the chairman of the Schedule Committee,

WM. J. STEWART.
Horticultural Hall, Boston, Mass.

Supporting Carnations.

The illustration herewith shows a very simple method of providing support for carnations, employed by R. P. Jeffrey & Son, Bellmore, L. I. The netting used is of six-inch mesh, made of ordinary cord, and the same width and length as the bench. A tight-drawn wire is fixed clear around the sides and ends of the bench and high enough from the soil to hold the net where it will support the stems. After the wire is in place the net is spread over the bed, and the edges are laced to the wire with string; no knots are necessary; the string is simply threaded through the loops of the net and around the wire alternately until the circuit of the bench is completed. When the time comes to remove the net, the string is unfastened at one end and withdrawn; the net is then folded up and laid away, to be used another season.

The netting can be made of strong cord by a handy man, or it can be purchased at a quite reasonable cost, and will last for two or three years.

Marquisee's New White Carnation.

Editor Florists' Exchange.

Your correspondent "W. M." is in error when he states our new white carnation is a seedling from The Marquis. The Marquis does not seed. The white in question has no Marquis "blood" in it. It is a new and distinct variety and will be heard from later. "The plants were not in bloom," as your correspondent says, for we are devoting them entirely to the production of cuttings.

L. E. MARQUISEE.

BRIEFS FOR BUSY FLORISTS.

ADIANTUM CUNEATUM.—Where this fern is grown on benches for cutting purposes, some little care should be exercised in watering after cutting commences. When the plants are partially cut down, very little water should be given until new fronds begin to push up from the crown. Should the plants be kept too wet after the fronds are cut, the next crop of fronds will prove very unsatisfactory.

PELARGONIUMS of the fancy varieties should be kept right on growing after the cuttings once become rooted. Take them out of the sand without delay when roots have formed; and after they are potted keep them in a house where the night temperature is from 55 to 58 degrees. Keep the plants as near the glass as convenient, and look out for green fly. A fumigation should be given once a week.

THE FALL-STRUCK GERANIUMS must now be given more room on the benches. About this time it is just as well to pot the plants over into the 3-inch pots, and get them growing, if room for them can be spared. By starting them along now, each plant will provide a good cutting in a few weeks, thus doubling the present stock on hand if necessary.

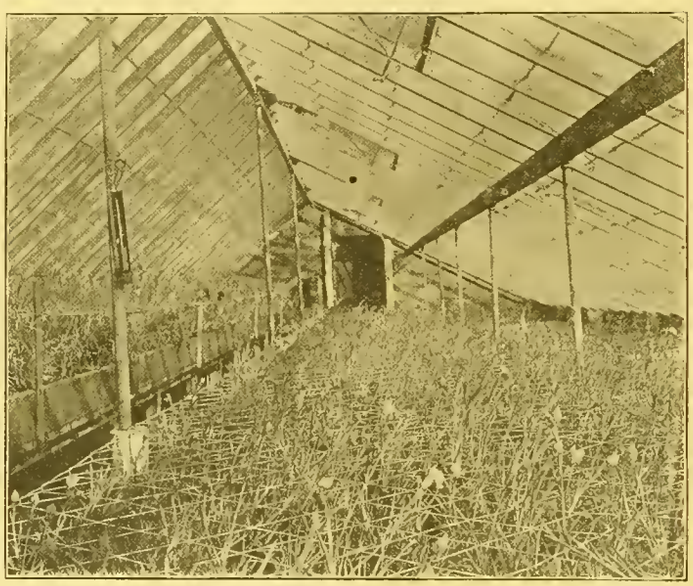
FUCASIAS.—The old plants of these, if shaken out of the pots and repotted, then put into a warm house and syringed occasionally, will soon throw out a crop of cuttings. These, if taken and rooted in the sand, will make far better plants for Spring sales than would the old plants themselves.

Among Flatbush Growers.

Louis Schmutz has another novelty this year, though it will not be at its best for the holidays. The plant is the Indian strawberry (Fragaria indica), grown in pots and trained over a wire balloon frame about 20 inches high. At the present time the wire is well covered with foliage, some berries are in sight and the many blossoms showing indicate that a full supply of fruit will materialize later. The plants are intended for decorative purposes, and will no doubt prove good sellers when they come into full crop. Mr. Schmutz has also a fine collection of flowering plants for Christmas, his poinsettias, Begonia Gloire de Lorraine, primulas and cinerarias being especially good.

Carl Woerner, manager for Mrs. P. B. Meissner, has a choice array of plants for the holidays, and the cream of the whole establishment are the magnificent specimens of Adiantum Farleyense. In one house of these the plants average about two feet across. Mr. Woerner has also been very successful with cyclamen; a house of these are at present in full bloom and they are a grand sight. The strain grown is that sent out by Lehnig & Winnefeld, of Hackensack, N. J., and the colors and size of the flowers, together with the dense foliage, leave nothing to be desired. Azaleas are also coming along nicely for the holidays, also plenty of excellent ardisias, oranges and primulas.

Chas. Zeller & Son have a fine lot of oranges and ardisias; their poinsettias and primulas are also quite up to the usual standard. The oranges raised here have gained a very wide reputation, and although there was an unusually large number grown this year, Mr. Zeller is wishing they had twice as many more, as he had to stop taking orders for them some time ago.



R. P. Jeffrey & Son's Method of Supporting Carnations.

At the Close of the Century.

Without professing to review the experiences of a century or to pose as the oldest living member of the profession of plant-growing, there are many recollections and contrasts that may readily be cited among those of us whose experiences cover three decades, and as the holiday season is a reminiscent period to most people, any further apology for the following notes may not be necessary.

Thirty years ago the cut-flower trade was decidedly an infant industry, and tile-lined refrigerators lighted by electric lights and inclosed with plate glass were luxuries beyond the reach of even the city florist, to say nothing of his provincial brother, who frequently evolved funeral designs on a small bench at the end of the potting shed, a location and an employment that had a distinctly depressing effect on the florist's assistants on a cold winter night. On such occasions the said assistants, with blue and chilly fingers (and this is a matter of personal experience), were often engaged in constructing a false foundation of toothpicks and wire on sundry double white primulas, small clusters of stevia, sprays of green stuff, and if the work in progress was of a superior character there might also be included some carnation flowers, a few stephanotis and bouvardia, and occasionally even some eucharis.

A batch of sprays of Crassula lactea was quite a choice possession at midwinter during those days, and found a ready market even in the critical city of New York.

We can imagine the greeting that would be given to such an offering in the reception rooms for five-foot Beauty and two-foot carnations that are presided over by the artists of the present day.

At the time referred to, long-stemmed flowers were the exception rather than the rule, and consequently were seldom asked for, though even at that early day there were a few churches in New York and Brooklyn, and possibly in some other Eastern cities, that made an arrangement for a regular supply of vase flowers for pulpit or altar decoration each week during the Winter. These orders were for $5, $10 or sometimes $15 worth of assorted material, suitable for the purpose, the carefully wrapped box being forwarded by special messenger.

It was troublesome at times to find sufficient good material to fill these orders, including, as they did, both foliage and flowers, but a few late chrysanthemums were a great help before the poinsettias were ready, and a good bunch of long sprays of bouvardia, and also a few shoots of cannas or hedychiums for backing, and with some of the long and pendant flowering shoots of Passiflora princeps to give an artistic touch to the arrangement, much satisfaction was given to the floral committee.

On special occasions, when the amount of the order warranted it, a spike of oncidium, one or two anthurium spathes, a few Lælia autumnalis, Eucharis amazonica, or a spike of Phajus grandiflorus might have been added, and at that period attracted more attention than such things do now.

The forcing of roses was a new industry, comparatively speaking, and had only been taken up by a select few, though possibly a greater number of varieties were cultivated by the commercial grower of that time than has been common of late years. Bon Silene and Safrano were leaders then, for it will be remembered that Perle des Jardins was not even introduced until 1874, and while Catherine Mermet preceded the introduction of the Perle by five years, yet it did not become a prominent forcing rose until after the latter variety.

And within 25 years both these fine varieties have been superseded to such a degree that it now requires some little inquiry in order to find a whole house of Perle des Jardins. A little later on the brethren dwelling among the sylvan beauties of Madison, N. J., began to be an important factor in the rose market, a position that they have held ever since with commendable regularity, and the forerunner of those express car loads of Beauty that are now reported was seen in the form of numerous long boxes filled with Cornelia Koch (or Cook) in ivory white buds the size of a hen's egg. At that time the latter rose was chiefly pot-grown, and some wonderfully fine flowers were produced by that method. Then there were also one or two growers who sent in from time to time some fine crops of Marechal Niel, though the best of these came over from Long Island, and among them the magnificent blooms grown by Burgess, of Glen Cove, remain as a specially fragrant memory among some of the older generation in the trade.

Carnations were rapidly coming to the front even at that early day, and then, as now, Flatbush was a Mecca to those interested in the divine flower, for where else could one find such large and sturdy carnation plants as in that fertile spot? And although the "prosperity" of the growers in that section was evident, still it had not then produced four-inch flowers, and La Purité, Degraw and Edwardsii were among the most prominent varieties, and gave great quantities of fair-sized flowers, though these were not marketed with two-foot stems.

Violet specialists were about as scarce as hen's teeth at that time, but numerous growers indulged in some cold frames for violet growing, and but little was heard of the "spot" and other tribulations that assail the modern grower, while in favorable seasons the quality of flowers grown in these cold frames was very fine indeed. Those were the days in which lily of the valley brought 50 cents per spray, wholesale, at Christmas time, and a gentleman named Roehrs, whose establishment was much less extensive then than now, was among the fortunate few who knew how to bring in the fragrant bells just at the right time, and also provided the market with a goodly share of them.

And the plant trade! Well, that was an infant, too, and rather a weakly one, in comparison with the acres of palms, the millions of Easter lilies and ferns, the houses full of ficus and Boston fern, and the carloads of imported azaleas, besides roses innumerable that [illegible] up the bulk of the stock of th[illegible]y. But there were enthusia[illegible] amateur ranks of that perio[illegible]velty of merit commanded a[illegible]ce, for it will be remembere[illegible]ing the period of inflation th[illegible] the close of the Civil War, and [illegible] until the great financial pani[illegible] prices in

general were high and the florists received a share in the semblance of prosperity.

A double white oleander was a comparative novelty in the early seventies, and enjoyed a large sale at remunerative prices, it being troublesome to get cuttings fast enough to supply the demand, and another very good seller during the first two or three years following its introduction was Ficus parcellii, a very beautiful variegated foliage plant when well grown, though rather too soft for use in the dwelling. Lapageria alba at $20 per plant, in six-inch pots, sold rather slowly, but what else could one do after paying the European grower two to three guineas per plant, and then adding the costs of importation?

Good orchids brought good prices from the enthusiasts, but the volume of trade in this class of plants was small in comparison with what it has been during the last decade, the importations being in smaller lots.

The Centennial Exposition in 1876 doubtless did quite a lot of good for the plant trade in succeeding years, the displays made there giving instruction and new ideas to thousands of visitors, and certainly helped to popularize plant-growing among the masses, while previous to that, in 1874 and 1875, and also in 1876, some remarkable exhibitions of fine plants and flowers were given by the old New York Horticultural Society in Madison Square Garden, exhibitions that in some respects have scarcely been equaled since.

But after all, Mr. Editor, even three decades seem to be too much to cover in one article, and lest the gentle reader may fall asleep, these more or less garrulous ramblings would better stop right now. W. H. TAPLIN.

OBITUARY.

William J. Palmer.

The regretted death of Wm. J. Palmer on Thursday, December 13, removes the pioneer of the florist business in Buffalo. The knowledge of his demise comes in sadness to many aside from those in the craft, his acquaintance being large, through his long-continued residence there. Always genial, whole-souled and kind-hearted, he made friends easily and retained them without effort. To those whose privilege it was to come more closely in contact with him he was endeared by many of the amiable qualities which he possessed. He was firm in his own opinions, but liberal-minded. Quiet and unostentatious and reserved in manner, he never sought prominence or notoriety. A commercial florist to the manner born, his career may be noted as successful. In recent years his aim had largely been that of growing flowers in a general variety suited for a retail business, and few, if any, places in the country produced such successful crops of so many kinds all the year round.

Mr. Palmer came to this country from England in 1854. He was then 19 years old and was practically without means. He remained in New York City about three months and then went to Buffalo. He secured employment as a gardener with a Mr. Webb, afterward was employed in the same capacity by Mr. Moseley, and later entered the employ of A. P. Thompson and remained with him 11 years. The next step in his movements was engaging in the commercial business. A place on what is now known as "The Circle" was purchased, greenhouses built and a business established. By industry and upright dealing Mr. Palmer there built up a flourishing trade, to which a downtown store was added in 1873. In 1880 Mr. Palmer moved his greenhouses to Lancaster, where he secured more land and enlarged them. Some years ago he admitted his son to partnership in the business, and it has grown to large proportions.

Mr. Palmer is survived by his sister, Miss Ann Palmer, and by three children, Mrs. Frank R. Kurtz, Mrs. C. Walter Goetz and Mr. W. J. H. Palmer, all of Buffalo. He was a member of Erie Lodge 161, F. & A. M.

Funeral services were held on Sunday afternoon at the residence of his son, W. J. Palmer, on Breckenridge Street.

At a largely attended meeting of the Buffalo Florists' Club, held Saturday afternoon last, a committee, consisting of William Scott, D. B. Long and W. A. Adams, was appointed to draft suitable resolutions on the death of Mr. Palmer. Pursuant to further action at this meeting, an appointed committee of four members attended the funeral services on behalf of the club, while many members also were present. A wreath, made of lily of the valley sprays, was sent by the club. Other floral tokens were numerous, showing the great esteem in which the deceased was held. VIDI.

H. W. S. Cleveland.

Brief mention was made of the death of Horace William Schaler Cleveland in our issue of last week. Those accustomed to pore over the early horticultural literature of this country will have met with Mr. Cleveland's name in the early forties, notably in the first volume of Downing's Horticulturist (1846), the deceased then being engaged extensively in truck gardening at Oatlands, Burlington, N. J., descriptions of which work, as conducted at that time, he gave in lengthy essays.

In the same issue he makes the first reference to cheap vineries, with illustration, once common in this country. Ten years afterward (1854), with Robert M. Copeland, Mr. Cleveland began his life work of landscape-gardening. He resided at Danvers, Mass., for a decade, then at Tarrytown, N. Y., going thence to Prospect Park, Brooklyn, where he was associated with Frederick Law Olmsted.

When the public-park system in Chicago was inaugurated in 1869 he went to

The Late W. J. Palmer.

that city, where he practiced his profession in partnership with Wm. M. R. French, the present director of the Chicago Art Institute. Mr. Cleveland's principal work in Chicago was done in connection with Washington Park and Drexel Boulevard, upon which he published an essay at the time.

In 1886 he moved to Minneapolis, where he was engaged upon the park system of that city until 1894.

Mr. Cleveland did much in establishing the present condition of landscape-gardening in this country, and it may be said to have arisen wholly within his time. Among his principal labors along this line, in addition to the parks mentioned, may be named the laying out of Roger Williams' Park, Providence, R. I.; the grounds, walks, and drives about the Natural Bridge, Virginia; the grounds of the Jekyll Island Club, Brunswick, Ga.; Como Park, St. Paul; all the parks of Minneapolis and Omaha; Brookside, Indianapolis, Ind.; the grounds of the State Capitols at Topeka, Kan., and Madison, Wis., and Sleepy Hollow Cemetery, Concord, Mass.

Mr. Cleveland was for 12 years corresponding secretary of the New Jersey Horticultural Society, an honorary member of the Massachusetts Horticultural Society, and a member of the American Park and Outdoor Art Association. EDGAR SANDERS.

Robert Baker.

Robert Baker, of the firm of Baker Bros., of Kansas City, Mo., died December 13, aged 87 years. He had been a resident of Kansas City for 27 years. The remains were sent to St. Louis for burial.

Correspondence

Christmas Greens.

Editor Florists' Exchange.

I note in your advertising columns the usual activity of the trade in Christmas greens, and it moves me to say that there are here in the sunny South a great many other things that might be used in this way, which, so far, do not seem to have made any impression on the trade. Why is it that the large and firm leaves of the Magnolia grandiflora are not more largely employed in these decorations? Then, too, the glossy sprays of the Prunus caroliniana and above all the brilliant masses of red berries and green leaves of the Ilex cassine (I. vomitoria, as some want it called) would be useful. This plant, so abundant in our coast region, makes a greater show of red berries than any of the common hollies, and the smooth leaves make it far easier to handle. Those who have never seen the great masses of berries on this Ilex, looking like red beads of glass, have no idea of its beauty. Our forests are now gay with the masses of the red berries of the deciduous Ilex verticillata, which would mix finely with evergreen leaves of other kinds in making decorations. Then it is not generally known that we have here a form of Ilex opaca, with golden orange-colored berries, much more freely borne than the red ones. I sent specimens of this a few years ago to Professor Sargent, of the Arnold Arboretum. He said that he had examined the trees of this country as closely as any one, but he had never before seen this golden-berried holly. He asked me to send some young wood in hopes that it could be propagated, but I never learned whether or not he succeeded, as cuttings here failed to grow, and I do not as yet know that the seedlings will retain the character. This golden-berried form is not common, but there are scattered specimens in several parts of the State.

Our beautiful Fall weather was ended by a real freeze December 11, but the character of the weather has been well shown by the fact that camellias, which commonly bloom here in the open air in March, have flowered the past week. The very double ones, as a rule, lose their buds badly, but we have in the beautiful Sarah Frost a double camellia that does excellently outside, and never fails to make perfect blooms. Chinese azaleas are unusually well budded and are getting ready for their usual mass of bloom in the Spring. We find that the Phœnicia stocks on which they are worked give us almost as much bother as the briar stocks on the roses, but the Phœnicia itself makes a fine show in the Spring.

Raleigh, N. C. W. F. MASSEY.

A Deserving Case.

Editor Florists' Exchange:

Fire broke out in the greenhouses of C. Heins, a florist on the Hudson Boulevard near Highpoint Avenue, North Bergen, about 3:30 o'clock Saturday morning. Three large greenhouses, which were well stocked with flowers and plants, were destroyed. The owner estimates his loss at $1,600. The blaze was caused by an overheated furnace.

George Ludwig, an employee of Heins who was asleep in one of the greenhouses that were destroyed, had a narrow escape from being burned to death. He found himself almost completely hemmed in by the blaze when he awoke, and he made a hasty exit just in the nick of time.

You will see by the foregoing that Chas. Heins, an old-time florist, has had the misfortune to get three greenhouses and the sheds connected with them burned down, together with every plant they contained—plants that could have been all turned into money before Christmas; and as he will have nothing more to sell before Spring, every grower will understand just how he is fixed. His neighbor florists will stock his houses for him when these are rebuilt, and will contribute all the money they can afford, but more will be needed than they are able to subscribe, and as Mr. Heins has very little capital, I think it would be a good opportunity for the craft in general to generously extend a helping hand to a brother in misfortune. Money sent to George Kogge, florist, Grand Street, Hoboken, N. J., will be duly acknowledged and given to Mr. Heins, who has not been at all slow in putting his hand in his own pocket to help an unfortunate brother in times gone by.

West Hoboken, N. J. JOHN BIRNIE.

FIRES.

ORANGE, N. J.—Fire occurred in the greenhouses of Mr. J. Crosby Brown, the banker, on Friday night, December 14, completely destroying the rose and palm houses, to the value of $10,000. It is supposed that the blaze was caused by overheated pipes. The buildings were only partially insured.

FALL RIVER, MASS.—The greenhouse of Edward Fernley was badly damaged by fire on the morning of December 10.

A new mushroom has been discovered in Belle Isle Park, Detroit, and named by Professor Peck, Agaricus pusillus. The mushroom is small and edible, having the odor and taste of an almond. It appears only in October and November.

Chicago.

Christmas Prospects and Prices.

By the time this issue reaches our readers Christmas will once more be with us; and what will the story be? At this writing (Tuesday, December 18) everything looks favorable, but the weather is cloudy, rainy and not just the thing to advance crops. If the growers will only keep up the supplies from now on and not defer shipping till the last moment, they are going to get good prices for good stock and fair values for all. Shipping orders now, and booked, tell plainly that this part of the trade is right up to the mark.

Last week business was none too good and the returns apt to make shippers wary of sending in stock; but the present week opened better, and prices near to Christmas figures are obtained, with complaints of small shipments and a hustling to fill orders.

Price lists are reasonably uniform among the dealers, and as given out the figures are about as follows: American Beauty, extra long stemmed, per dozen, $12; 30-inch, $10; 24-inch, $8; 20-inch, $6; 15-inch, $4; 12-inch, $3; 8 inch, $2. Golden Gate, Liberty, per 100, $10 to $20; Meteor, Bride and Bridesmaid, $12 to $15; seconds and good, own selection, $8 to $10; Perle, $8 to $10.

Carnations, extra select fancies, $6 to $8; standards, $4 to $5; chrysanthemums, fancies, per dozen, $3; common, $1.50 to $2.

Violets, $1.50 to $3; valley, $4 to $5.

Paper Whites and Romans, $3 to $4; adiantum, 75c. to $1.25; smilax, select, $2 per dozen; ordinary, $1.25 to $1.50; asparagus strings, 50c. to 75c.; sprays, per bunch, 50c. to 75c.; A. Sprengeri, per dozen, 25c. to 50c.; poinsettias, extra, per dozen, $3 to $5; common to good, $2.50 to $4.

Holly, Bouquet Green, Etc.

Lycopodium, or bouquet green, is scarce enough to sell wholesale in this market at $10 to $12 per 100—an unprecedented price. W. W. Barnard & Co. got hold of a 60,000-pound lot quite unexpectedly.

J. C. Vaughan will handle eight or nine car loads alone. Southern holly, so far, is not much in evidence. Wild smilax is very fine, also in great demand.

Among berried goods, Ilex cassine is being used a good deal. This is a small-leaved evergreen native holly, from the South, and on account of its foliage takes better than the Winter berry (I. verticillata), which is hardly so good or as plentiful as last year. California contributes its pepper tree berries in greater quantity than heretofore. Mistletoe also is plentiful this season and very fine. There is a large shipping demand for all this class of goods, including, also, general florists' supplies.

Among Growers.

At Vaughan's greenhouses, Western Springs, ready for Christmas, is a fine lot of Begonia Gloire de Lorraine. We wanted to see the plants growing. Unfortunately, a day was selected when Mr. Wilson was on a visit to the Chicago Carnation Co., at Joliet, but his new assistant, Mr. Jacobson, did the honors. As usual, this establishment is in the best of order. A house of stock zonal geraniums, in choice varieties, planted out in benches for cuttings, are in very fine shape. This benching is common here, including chrysanthemums. The new lemon, American Wonder, that fruits readily in a small-sized plant, is a special feature this year.

There are some nice pans of poinsettias, with fine heads, and less than a foot high, a mass of scarlet. These are more acceptable to retail florists than the leggy plants so often grown.

But the Begonia Gloire de Lorraine is the great feature here this year, and for the first time it is of home growth. The plants in 6 and 8 inch pans are a grand sight; none the less so is a large number of plants in 4-inch pots. They come high, $7.50 per dozen, wholesale; pans, $2.50 each; but the word "sold" is already marked on most of the stock. This is certainly a great plant, equally ready to flower in the smallest thumb pot or any size pot one wants to grow it in. There is here another variety called compacta, but it is not liked as well as the Lorraine.

Several ranges of pits, to be heated by steam, are being finished, and the huge packing shed and office have been rebuilt. Electric lights are installed and every convenience afforded for expediting work, day or night, when nec

Round About.

The Chicago Carnation Co. sent in to Deamud some fine flowers of their new big four carnations—Sunbeam, bright flesh pink; Bon Homme Richard, a beautifully formed white; Nydia, salmon, variegated stripe on white ground; and Prollfica, cerise pink. From another grower a red sport of Tidal Wave, much deeper in color than Evanston, sold last week at $3 per 100.

George M. Garland has built a foundry at Des Plaines expressly for casting his iron gutters.

Fred Ewert is now with A. H. Poehlmann, and Charles S. Stewart is buyer for John C. Schubert at 163 Wabash Avenue.

Fred Bahr has still 1,000 very good late chrysanthemums to send in this week and next. The varieties are white and yellow Mrs. Jerome Jones. They go to McKellar & Winterson.

Nathan Smith & Son, Adrian, Mich., are still sending lots of chrysanthemums to Deamud, the pink late variety Superba being very conspicuous.

Peter Reinberg will have a big cut of American Beauty roses from his range of new houses—the biggest Christmas cut he has ever had.

E. C. Amling has good reports from his Indiana shippers.

Wietor Bros.' crops are in fine shape, especially Meteor roses.

Kennicott Bros. Co. are to have Papa Gontier rose from Klehm's nursery.

ESS.

Montreal.

Trade Report.

As usual just before Christmas, trade has been a bit dull. A good deal of general work, however, has prevented any stagnation. The weather has cooled off considerably, and now night temperatures are anywhere from zero to 20 below. Unfortunately, the cold only brought clear nights; the days are nearly as dark as ever.

At present all indications point to a short supply of flowers at Christmas, and of lower than average quality. Plants show every indication of being as popular as ever, and the supply will be good. True, the growers are having their hands full trying to get such things as azaleas in in time, but the probability is that this popular plant will be seen in larger numbers than in former years. Poinsettias are good in quality; so are primulas and cyclamen. All the local men are carrying full supplies of palms, rubbers and ferns.

Chrysanthemum show prize money was paid at the club this week, or at least the 55 per cent. left over after all other accounts were settled.

B.

Madison, N. J.

The regular meeting of Morris County Gardeners and Florists was held in Masonic Hall on Wednesday, December 12, President Duckham in the chair. A communication was read from F. G. Leaverenz on behalf of the Galveston florists thanking the society for its noble efforts in their behalf, which had resulted in adding over $100 to the relief fund, this substantial help being gratefully appreciated by all the sufferers.

All matters pertaining to the recent show were reported settled, and the treasurer announced a slight increase over last year in the proceeds of the show.

Election of officers resulted in President Duckham, Secretary Atkins and Treasurer Charlton being unanimously re-elected to their respective offices, while J. Davies, of Morristown, fills the vice-presidential chair for the next year. With memories still fresh in mind of the enjoyable "smoker" instead of a dinner given last January, it was voted to have a similar entertainment at the regular meeting of January 9 next, and numerous invitations were ordered to be sent.

President Duckham, thanking the members for their renewed assurance of appreciation of his efforts, bespoke the hearty coöperation of members to make the coming year even more fruitful of good results than the past had been. He also gave an interesting talk on things seen during his recent European trip. He found the chrysanthemum still as popular as ever on the other side, and the best he saw certainly fully equaled the best produced here, while in regard to variety they had a much longer list of really first-rate kinds than we had, and not a few that he thought worthy of introduction and a trial here. The new plants at Sanders' St. Albans nursery and pot fruit trees at Rivers' Sawbridgeworth nursery were also highly praised.

A. H.

Our Introductions of New Carnations for 1901

...THE BIG FOUR...

SUNBEAM Extra bright flesh pink, early, free and continuous bloomer. Flowers of good form and size, borne on long stiff stems. $1.50 per doz., $10.00 per 100, $75.00 per 1000.

Trade Notes.

Business remains good, although stock is very scarce and prices are gradually climbing up. So far we have had very seasonable weather, with considerable sunshine, which will be the making of carnations, and will also help out the rose crop. Orders are coming in at a lively rate for Christmas, and this market will not have half enough stock to go round, with perhaps the exception of bulbous flowers.

In last week's report, through an oversight, I failed to mention that George & Allan made their usual fine exhibit of roses, valley, narcissus, Romans and other stock at the exhibition for December 8, taking first prize on Meteor and Perle. This firm will have a very large quantity of forcing stock for Christmas.

Saturday afternoon I was favored with a call from C. W. Ward, of Queens, N. Y. E. G. Hill was also in the city. The gentlemen had been out to Richard Witterstaetter's to see his many seedlings. Richard has some fine ones to show this season, and will have several of them at Baltimore. By the way, it is not too soon to say something regarding this meeting. About six people will attend from this city. We shall probably travel over the B. & O. R. R., stopping off on the return trip at Oakland, Md., to visit H. Weber & Son. We shall be glad to hear from any of the craft in this section who will attend, also to have them join our party. E. G. GILLETT.

St. Louis.

The Market.

Little change can be reported from this point. Receipts and demand are about normal, with complaints of slow business. Among plants poinsettias have found ready sale, and there is an active demand for azaleas; the latter are exceedingly scarce; the crop appears to be late this year. We are inclined to think that if the demand is equal to that of former years, and especially of last year, there will be a shortage in blooming plants, as there is a good call for almost anything in that line.

While the commission men report clean sales, this is probably accounted for more by the fact that not much stock is coming in than by the good demand. Roses are cheap, 5c. to 6c. being the top price, down to as low as 2c. Carnations bring 1½c. to 3c., with the supply equal to the demand. Callas are to be had in limited lots at 10c. for small ones. Violets are steady at $1 per 100. No great quantity of bulb stock is in the market.

Club Meeting.

A well-attended and lively meeting took place on the 13th. The report of the chrysanthemum committee was read, and affairs were in such shape that the treasurer was instructed to begin the paying of prizes. These will be paid in full and at once. Henry Johann, of Edwardsville, was elected to membership. By vote of the club it was decided that the next meeting be devoted to carnations. All growers of new varieties are invited to send samples of their stock. Besides this, in compliance with the scheme adopted last year, the club offers prizes of $5, $3 and $2 for the best vase of 50 carnations, any kind or color, to be competed for by the members only. This ought to bring out a fine display.

Dr. A. F. Halstead was to have read an essay on "New Carnations from a Commercial Standpoint." The doctor asked for a little more time, as pressure of business prevented the preparation of his paper. It will be read next meeting night. F. W. Ude read a paper on "Latest Facts About New Carnations." He related with inimitable humor the trials, the often blasted hopes and expectations, and the disappointments of the buyers of the new high-priced varieties sent out every year. He gave his experience with the newer kinds, as far as this season's developments would permit, laying stress upon the fact that one man's experience with a carnation is not conclusive either for or against a variety.

F. G. Ude's paper, on "Successful Violet Culture," held over from last meeting, was read. Mr. Ude explained his method of raising the fine product, among the best coming to this market, to the satisfaction of all present. A vote of thanks was tendered both gentlemen.

A vase of the new chrysanthemum Superba was exhibited by N. Smith & Son, Adrian, Mich., and was awarded a certificate of merit. For a very late variety this kind is no doubt valuable; it is a very good pink, about the color of Mrs. Murdoch, flower of fair size, of good form and of great substance, with splendid stem and foliage.

President Guy exhibited a vase of The Marquis carnation. All the flowers were, as usual, auctioned off for the club's benefit. C. C. S.

RICHMOND, INDIANA.

Pittsburg.

Business Bits.

Trade is moving along nicely, and up to date (December 18) prices have not much advanced; but from now on until after the holidays quite an increase will take place. From present indications about the usual Christmas figures will prevail, and the demand for stock will be good. Carnations have been rather scarce the last few days; no doubt stock is held back. Roses seem abundant. Roman hyacinths and narcissus are too plentiful. Harrisii lilies are scarce; only a few growers are cutting at present; $25 per 100 is asked for the flowers.

Christmas greens trade, particularly trees, is very active. So far the market is not overstocked, and it is more than likely that all the material will be sold the end of this week. Wreathing and holly are in brisk demand and of good quality. Ground pine is scarce and brings a big price. Holly is more plentiful than it ever was. Good mistletoe is also plentiful enough and well berried.

All the stores and market stands look very attractive and are well prepared for a good holiday trade, which is expected by most every one.

The News.

The December meeting of the Florists' Club again failed, only a few members being present. For the last three or four months the meetings have been so poorly attended that it looks as if they will have to be discontinued next year.

The Botanical Society of Western Pennsylvania held its regular meeting on the same night. "Pines and Other Evergreen Trees" was the subject for discussion.

A visit to Fred Burki's place in Bellevue showed everything in fine shape. His stock for the holidays will be larger and better than ever. Thirty-six houses of good size are devoted mainly to roses, carnations and asparagus. The roses are all in good condition and of the leading sorts. Carnations are in splendid shape, particularly Flora Hill, White Cloud, Mrs. Frances Joost and Morning Glory, of which sorts the cut for Christmas will be large. Ethel Crocker and The Marquis particularly are rather late, which is noticeable among other growers in our vicinity.

Mr. Burki was among the first to cut Harrisii lilies this season, and will have a nice batch for Christmas. Much space is devoted to Asparagus plumosus and A. Sprengeri, for which there is always a good demand. E. C. REINEMAN.

Lenox, Mass.

The annual meeting of the Lenox Horticultural Society was held Saturday, December 8. The society voted to hold its annual ball on Friday evening, January 29, at Sedgwick Hall, and at the next meeting the committees will be appointed. This big social event will be larger and better in every respect this year. The reports of the society indicate that the membership still keeps up and that it is prosperous. Several very instructive illustrated lectures were held last year, and it was voted to continue these public lectures this Winter. A committee was appointed to correspond with eminent speakers and secure men well versed, if possible, in horticultural matters, to speak in Lenox during the Winter. The society elected the following officers: President, Charles Russell; vice-president, Frank Butler; secretary, Joseph Martin; assistant secretary, John Donahue; treasurer, George Ferguson; executive committee, P. J. Donahue, Edwin Jenkins, Andrew Loveless.

North Adams, Mass.

Henry A. Lane has resigned his position with A. C. Stoughton and is succeeded by George Shields, of Dedham, Mass.

REPORT OF THE JUDGES

APPOINTED BY THE PHILADELPHIA FLORISTS' CLUB
TO JUDGE OUR

GRAND NEW ROSE

QUEEN OF EDGELY

PINK AMERICAN BEAUTY.

"We are convinced that this variety is a valuable addition to the list of forcing roses, being in every respect, except color, the exact counterpart of the American Beauty. The color is a beautiful bright pink, which is good, even in the full flowers. The fragrance is also as fine as that of Beauty, and the exhibited blooms showed remarkable vigor."

(Signed) ROBERT KIFT,
WM. MUNRO,
JOS. HEACOCK.

N. B.—Two of the above judges received first prizes for American Beauties at the Rose Show of American Rose Society, New York, March 27, 1900.

FOR TERMS AND PARTICULARS, APPLY TO

R. CRAIG & SON, Eastern Agents, 49th & Market Sts., PHILA., PA.

ALBERT MCCULLOUGH, Cincinnati, O., President; F. W. BOLGIANO, First Vice-President; S. G. COURTEEN, Milwaukee, Wis., Second Vice-President; S. F. WILLARD, Wethersfield, Conn., Secretary and Treasurer.

Points and information from seedsmen, and all interested in this column, solicited. Address EDITOR SEED TRADE, care of FLORISTS' EXCHANGE, P. O. Box 1697, New York.

Cape Vincent, N. Y.—Will Casler has opened a seed store here.

Philadelphia.—W. S. Appleton, with Johnson & Stokes, is lying dangerously ill at his home with typhoid fever.

European Notes.

The Smithfield show in London, held during the past week, was hardly up to its usual standard of excellence, but this was in a great measure due to the lack of rain and the great heat at the time that root seeds were being sown.

Mangel wurzels, of course, made the best show, and the best of these was Sutton's prize winner Yellow Globe. Large and shapely roots, with skin as smooth as an apple, weighing in some cases 60 pounds each, they fairly eclipsed everything else in the hall. Hard by an enterprising firm exhibited a dried plant of the parent variety, Beta vulgaris, weighing in its entirety about six ounces, so that intelligent observers were enabled to appreciate the work that has been achieved by the patient cultivator. Turnips, rutabagas, carrots and potatoes presented no special feature, and no distinctly new variety was exhibited.

The mild and moist weather has started quite a fresh growth in turnip plants and, should it continue, will enable us to report a larger average than at one time seemed possible. As illustrating the undoubted scarcity of reliable stocks of root seeds, the principal retail dealers at the before-mentioned show declined to accept any one order for more than one cwt. mangel. Five years ago they were eager to sell a ton.

EUROPEAN SEEDS.

Catalogue Making.

At the annual meeting of the American Seed Trade Association, Mr. Charles M. Page, the Des Moines (Ia.) seedsman, read a paper on several phases of the seed publicity, which was heard with marked attention by the members. Among other things Mr. Page said:

The most important subject for all catalogue seedsmen is embodied in the first question of the topic which has been assigned to me. It is an old subject, yet ever new and ever changing. Seasons differ, and what under some conditions would bring rich returns at other times falls to the ground fruitless. Each seedsman has a clientage of his own who are reached by his style of advertising and catalogue making.

The first thing to decide is what class of customers you desire to reach, for it must be admitted that no catalogue can be made to suit everybody. For the wealthy your book must be printed on heavy paper of extra finish; it must be made thoroughly artistic in every respect, with illustrations different from the ordinary, and superior composition and press work. This will be expensive, but requires a less number of catalogues and the orders will average larger when trade is once established.

For the cheap class of trade a cheaply made catalogue, printed on poor paper, with muddy ink and poor press work appears to be sufficient to catch the trade, provided the catalogue-maker can put in sufficient bombastic language to make the purchaser think he is getting the "best seeds on earth at the lowest prices." The more exaggerated the cuts and descriptions are the better it seems to take. It has always been my opinion that this class of trade is of a fleeting nature and cannot be held from year to year.

For this reason I have always catered to the middle classes and tried to make a plain, thoroughly practical catalogue, which will be of interest to the ordinary farmer and gardener. Prices are made reasonable on everything instead of the common policy of ridiculously low prices on a few items, which are more than made up by over-charges on others.

The preliminary work of preparing a catalogue is the most important. It should be begun in the Spring by having a note-book ready for jotting down items, which daily come to our attention during the busy season, and for this purpose it is well to prepare a catalogue with blank sheets of ruled paper bound in between the leaves of the book. During the Summer the catalogue editor should spend much time making notes in the field or on the trial grounds.

There is no doubt that illustrations sell goods, but there are very few engravers who can make cuts which truly illustrate vegetables, flowers or field crops in such a manner as will bring out the salient points. The best engravings are undoubtedly good wood-cuts, but they are expensive, and line drawings from which zinc etchings are made are cheap and largely used. Half-tone engravings are inexpensive, except that it requires a true artist to arrange the detail and make a good photograph. We notice that one dealer is having many half-tones made from pencil sketches, and they have a very life-like effect. A super-calendered or coated paper is imperatively necessary where half-tones are used.

In beginning work on a catalogue I make a dummy of each page, pasting on the illustrations selected in just the position I wish them to appear in the book. This assists the printer and enables me to know at the outset just what space I can allot to each department and item. Copy can then be prepared for each page independent of all others, and each page is electrotyped as soon as proof is O'K'd. By owning your own type and having the composition done in your store some expense and much vexation and annoyance is saved. [??] No matter how well written the catalogue is or how choice the illustrations, poor paper and press work will ruin the job. The paper may be thin and not of extra quality, but it must have a good finish, S. & S. C. For several years past I have saved some money in binding by having catalogues saddle stitched. * * *

The value of catch-phrases depends on their adaptability for advertising purposes. Nothing is of more value to the advertiser in any line than a pat expression, which is enforced on the public attention until it actually becomes a trade-mark. No one is likely to forget that "Jones, he pays the freight," "You touch the button and we do the rest," "Uneeda Biscuit," or "See that hump," and our friend, Mr. Burpee, has been laboring hard to make the dear people believe that "Burpee's Seeds Grow." It is not every one who can coin an expression which is apt and will take with the people. The best transient expression we have seen this year is in L. L. May's advertisement of bromus, "It will hold your hat up," but it would be valueless without the accompanying picture. * * *

ADVERTISING CHEAP COLLECTIONS.

Cheap collections are the bane of the seed business, and still almost all catalogue seedsmen will have to plead guilty of having offered them. These collections are purchased because of their cheapness, although the customer seldom has use for more than half of the varieties which the collection comprises. Their use demoralizes the trade and educates the people to believe that the actual cost of the seed is almost nothing. It robs the dealer of the sale of his regular stock at profitable prices, puts many unprofitable names on the customers' record, and thus entails a further loss in sending catalogues to them in the future. Therefore, although the temptation is strong to advertise them in order to increase the number of customers, we believe the better class of seedsmen will finally decide that it does not pay in the long run.

The strong competition now in the seed business, the department stores offering seeds at one cent per packet, the government's free seed distribution, and the newspaper's premium seed offers, all tend to make the seedman's road rough, but we believe that his best course is to stick to the legitimate trade and remember in making prices that the advertising, salaries, rent and other expenses amount to fully as much as the first cost of the seeds.—AGRICULTURAL ADVERTISING.

Waco (Tex.) Flower Show.

Editor Florists' Exchange:

Flower shows having chrysanthemums as the predominating attraction are now held very generally all over the country. In few instances, however, is there anything very remarkable about either the show itself, its management or its support. Several, especially in smaller towns, are gotten up by some charitable association, and the proceeds used to carry on the work of such. Others are gotten up by florists and gardeners for the twofold purpose of advertising and profiting by the prizes won. This Waco show, however, is not directly supported by either of the influences named above.

Only a few years ago an association of amateurs was formed here for the purpose of studying horticulture and floriculture in particular. Its membership includes the best families of Waco and contains only two or three commercial florists. Its organization stimulated the love for flowers and their cultivation, and resulted ultimately in the holding of an exhibition in the Cotton Palace.

The success of the first few shows and their popularity with the public led the society to enlarge upon its plans, so that this year its premium list in the professional classes offered inducements equal to those of any show in the country. For instance, $25 was the first prize offered in the classes for 30 best blooms in each color.

Now, one of the matters that induces me to write this is the fact that, in spite of the liberal prizes offered, there was practically no competition. If any of the northern florists fear their flowers will not carry safely that distance, I need but say that some sent there from Missouri, Michigan and Indiana arrived in fine shape.

What is more, the prize moneys are all guaranteed by the business men of the city, and there is no scaling down of any kind for any reason.

As a place to advertise Waco has few superiors, as almost every member of the society is an enthusiast on the subject of flowers, and ready and able to buy any novelty that promises well. The city of Waco has about 22,000 inhabitants, and I believe the attendance at the flower show during five days was about 10,000.

The officers of the association are almost all ladies who managed the details thoroughly, and secured the hearty coöperation of the business houses.

All who grow for exhibition should make a note of this enterprise and be sure to enter into the competition next year. The society promises to duplicate its premiums then, and we should make it a point to encourage these people, that other cities may be led to make as liberal offers and give as hearty support to Fall shows.

It certainly was discouraging to the promoters to see many of their very good prizes not competed for.

There may be a feeling abroad that flowers shipped there will not get proper attention. At no exhibition that I have ever visited has the management shown more intelligent solicitude for the exhibits of those who were not there to care for the stock themselves. A VISITOR.

American Carnation Society.

NEW VARIETIES REGISTERED.

Edgar McConnell, Sharon, Pa., registers the following:

SUNRISE.—Color of outer part of petals pure white, blending to a clear pink at the center. Flowers two and one-half to three inches, with fine clove fragrance, holding their size and color to midsummer. Stems strong and wiry, 18 to 30 inches in length. Calyx never bursts. Foliage and growth of McGowan type. A vigorous and rapid grower and a very free and continuous bloomer.

ALBERT M. HERR, Secretary.

NURSERY DEPARTMENT.

AMERICAN ASSOCIATION OF NURSERYMEN.

THEODORE J. SMITH, Geneva, N. Y., President; N. W. HALE, Knoxville, Tenn., Vice-President; GEORGE C. SEAGER, Rochester, N. Y., Secretary; C. L. YATES, Rochester, N. Y., Treasurer.

Ocean Springs, Miss.—Theodore Bechtel, of Staunton, Ill., will embark in the nursery business here.

The Great Northern Nursery Co. of Coralville, Ia., has been incorporated; capital, $25,000. Incorporators: P. J. Regan, H. J. Paasch and C. Kane, all of Coralville.

State Entomologist Scott, of Georgia, has been sustained by the federal authorities for destroying fruit trees infected with the San José scale.

The Washington Star says that Prof. W. G. Johnson has resigned from the position of entomologist at the Maryland Agricultural College, his resignation to take effect February 1, 1901. Professor Johnson has done some excellent work for horticulturists in connection with the suppression of the San José scale and otherwise. It is understood that the gentleman will be associated with the American Agriculturist.

Christmas Trees in Pots.—Nurserymen find an ever-increasing demand for Christmas trees in pots. At this writing, thousands of sawed-off trees of balsam fir, white spruce and black spruce line our sidewalks, but these are not the first choice of very many would-be purchasers. The near-by florists are beseiged by those inquiring for an evergreen in a pot. Rarely do would-be purchasers find what they want, as the potted or boxed Christmas tree has not yet a good start. The nurseryman who will pot or box a lot of good-shaped Norway spruce in sizes of from three to six feet would have no difficulty in disposing of thousands of them in all large cities. The setting up of a sawed-off tree is always an irksome job, and from this the potted tree affords relief. It is not really necessary to get the whole of the root. Enough to steady the tree well when the soil is filled in is sufficient, as but few care to keep the trees after the festivities of the season are over. With roots to them, trees keep fresh as long as required, which is a great gain over the cut-down forest trees. Nurserymen having a stock of trees available for the purpose should prune them a little this Spring, to make them more twiggy by Fall.

Parcels Post to New Zealand.—Nurserymen and florists may not all be aware that within a recent period a postal convention between this country and New Zealand permits of parcels of 11 pounds weight being sent by mail from one country to the other, at a charge of 12 cents per pound or fraction thereof. A customs declaration has to accompany the parcels. Up to five to ten pounds this is an advantage, but for a greater number of pounds it is not, as then the various express companies already in the business forward as cheaply. But no company will take, say, one, two or three pounds at 12, 24 and 36 cents, respectively, as will the governments named.

An Old New Shrub.—A great deal has been written of late about our native shrub Pyrus arbutifolia, but no more than it deserves, as it surpasses in most all respects all other shrubs of like habit of growth. It is a medium-sized bush when of mature age, found wild in many parts of the country, but rarely in large quantities in any one place. It was the province of a Pennsylvania firm to make known its worth, by illustrating it in flower and fruit and calling attention to it by advertising. Now it is called for by every one engaged in large plantings, as well as by those who need but a plant or two. In this vicinity it flowers the second week in May. The blooms are white and are produced in clusters along the shoots of the previous season's growth. Following the flowers are berries, which become bright red in Summer and remain on the bush nearly all Winter. They are particularly attractive about the time the leaves fall in Autumn, while yet there is pleasure in walking through one's grounds before Winter shuts out the fading glories of the season. Very much in its favor is the fact that it flowers when quite small. Little bushes of but two feet will bloom freely. Its merits do not end with what has been said. There is still to be mentioned its handsome Autumn foliage—a dark bronze, often mixed with scarlet, the latter color usually more pronounced in small plants than in large ones.

Outlook for the Nursery Business—Herbaceous Plants.—I will now take up another branch—the herbaceous department. There is a very great change for the better here. Time was, and not so long ago, that this branch of the business was generally reported as not paying. Small collections were carried by most nurseries, but the whole of them put together would not have equaled that which many a single firm controls to-day. That this increase is not restricted to certain localities is shown by the calls of one nursery on another to help fill out orders. It is as general in the Eastern States as in the Western ones, and even in the South the interest evidently exists. As I have suggested in some of my previous letters, there is a good deal of planting done by certain parties in emulation of others, and I believe a large proportion of the planting of herbaceous plants springs from this cause. If a neighbor fixes up his place in a nice way we wish to improve ours at once. It makes us consider whether or not we cannot improve. From this cause, I am sure many a one has set out beds and borders of herbaceous plants who never would have done it.

The evidences are that Spring will see large sales made by those who have a stock on hand, as the onward rush of trade has not yet reached its highest points. The private gardens near cities take these plants by the hundreds, as do those buying for planting in masses on large estates. It is not uncommon for thousands of these plants to find their way to one purchaser when extended alterations or large plantings are contemplated. Where a large assortment is in possession of a nurseryman visitors can see from time to time the various sorts in flower, and can readily select a list which will follow on one after the other throughout the season.

There are a lot of old-time favorites which are always called for, among them, achilleas, anemones, columbines, asclepias, asters, campanulas, larkspurs, foxgloves, hollyhocks, irises, phloxes, pentstemons, spiræas and the like, because of old association sake, and the one who has good plants and a good collection of these will be in a line for profit.

But few outside of those who possess large collections have any idea of the great variety of herbaceous plants now in cultivation here. A great many from southern Europe and even from our own Southern States can be grown here, because of their being below ground in Winter, whereas, were they of a ligneous nature they would be killed by the cold.

Nearly all Spring flowering herbaceous plants force very well. But little heat is required to bring them into flower. A few in bloom in advance of the season always make sales of the dormant ones. Prospective customers get an idea from the pot plants of what the plants really are, and in this way sales are made which would not be otherwise.

JOSEPH MEEHAN.

St. Louis.

Full particulars of the Christmas trade cannot be ascertained for this writing. Present indications are that business is a full average and possibly heavier than usual. Roses, especially American Beauty, were very scarce on Christmas Day; none were to be had at the wholesale houses. Prices were not advanced materially. Carnations were equal to the demand, but with no great oversupply. The same may be said of violets. Bulbous stock of all kinds was too plentiful.

The weather was all that could be desired—neither hot nor cold; a little snow made it look quite seasonable.

Prevent Boiler Explosions.

Editor Florists' Exchange.

It sometimes occurs that a low-pressure boiler, for some cause or another, is either cracked into pieces or destroyed by pressure, and it is always hard to ascertain the exact cause of the explosion, because the attendants dislike to assume the responsibility for the disaster.

Not long since a party having two large Dean boilers in use decided to put in a steam pump and run it by one Dean boiler which was put in for low-pressure heating. He replaced the safety with a high-pressure valve. Monday morning of last week he closed the valves leading to the heating system and was running the steam pump. Fearing that the steam would get too high with everything closed, the owner sent a farm hand to open the fire door. The latter did what he supposed he was told to do, but by mistake he opened the ash door. In a very short time the owner noticed that the pump was going it "to beat the band" and almost jumping off its foundation, and he thought he would investigate. When he entered the boiler room his hair stood on end—the first thing he saw was the steam gauge, the hand of which had gone entirely around and stood against the pin, so there is no knowing how much pressure there was in the boiler. Judging from the action of the pump he thinks there were about 100 pounds or over. He opened the fire door, closed the ash door and opened the safey valve. In our judgment, it would have been better to have left the safety valve closed, and not subjected the boiler to sudden contraction by a quick reduction of the pressure. With the fire door open and the steam pump running, the pressure would very soon have lowered beyond the danger point. We anticipate that if he had been one or two minutes later, there would have been a serious explosion and no way to account for it, because but a very short time before he had been in the boiler room, when the boiler was all right, and there was then less than 30 pounds of steam.

DEAN BOILER CO.

Detroit.

The Christmas Trade.

Taken all in all, the past Christmas has been a record breaker in every way. The weather was all that any one could wish for the delivery of stock, and the streets of our city presented the appearance of those of some country town on the occasion of a fair, having been continually jammed with buyers and shoppers for the past two weeks.

Prices ruled higher than formerly, for stock was none too plentiful on account of the dark weather and lack of sunshine for some time back. Carnations were very short. Roses were in better supply, but rather soft. Violets were also short, but some very fine ones from Mt. Clemens helped out. Breitmeyer & Sons had a house of The Farquhar, just right. In carnations Rackham had a house of G. H. Crane that were very fine, and the prices realized confirmed the retailers in their opinions of him as a robber, but they were glad to get the stock just the same. The call at Breitmeyer's seemed to be for baskets filled with plants, ranging in value from $5 to $25. This firm had an apprentice who exhibited very fine taste in the filling of the baskets. Sullivau, the Detroit Floral Co., and Taepke all report trade as exceptionally good, both in plants and cut flowers. In the green goods line the bulk of the business is done by the grocery and corner stores, and the florists in general are willing that they should do it. Boston fern led in decorative plants, with poinsettias in flowering stock.

Club Notes.

Four new members were added at the last meeting, and the premium list adopted for the show which the club has decided to hold November 12 to 15 next. All seem very enthusiastic in this matter. The plan of having a question discussed at each meeting is proving a success and a great benefit to the club.

JOSEPH MAOILL, Treasurer. A. T. DE LA MARE, President.

Toronto.

Record-Breaking Christmas.

Christmas business this year has indeed been a record breaker. The weather was about all that could be desired. The trade in plants was better than ever before. Cyclamen, azaleas, fern pans, primulas, begoniaa, ferns, mostly bostoniensia, palms, solanums, ardisias, and poinsettias all were in demand.

In cut flowers there was a big unsatisfied call for American Beauty roses, fine carnations and good violets. Beauty brought $12, $15 and $18 per dozen; violets 75c., $1 and $1.50 per bunch of 25, according to quality and location of store; carnations from 75c. to $2 per dozen. A good demand was experienced for smilax, asparagus and adiantum. There did not appear to be much pickled stock around, though a large quantity of weak-stemmed roses was in evidence. The finest roses noticed came from Dale, of Brampton; they were select Bride and Bridesmaid. Monday was a good day for delivering stock, and plants needed but little wrapping up.

The News.

The suit by S. Nason against the Toronto Floral Co. has been dismissed with costs. The business of the company is now in a prosperous condition. They remodeled their place the past Summer and have built three new houses. Their stock of Begonia Gloire de Lorraine was the best ever seen here; their Boston fern was also exceptionally fine.

T. M.

Boston.

Christmas Trade.

It was a record-breaking Christmas both for business and high prices. There seemed to be a sufficient supply of everything, but there was little of anything left on the bushes at the greenhouses or in the wholesalers' ice chests by noon of Tuesday. The price on Bride and Bridesmaid advanced Monday nearly 100 per cent. over night Sunday, and many growers felt that they had been speculating in stocks, where such advances in 24 hours are frequent occurrences.

The weather was very convenient for delivering plants and flowers. In roses, American Beauty made $12 to $15 per dozen for special grade, while extras, No. 1s and No. 2s, went at $3 per dozen. Brideamaid met a better demand than Bride, but the prices were held about even, the grower almost insisting that the buyer take some white ones at least with every colored rose, and in that way the colored helped to sell the white stock. Fancy special Bride and Bridesmaid realized $4 per dozen; extras $3 and $3.50; No. 1s, $2.00 and $2.50 and No. 2s and smaller from $6 per 100 to $12.50. The supply of President Carnot was very short; fancy specials realized $6 per dozen, extras making $5, No 1 $4. There was a very heavy call for Liberty, but the supply was short. It is the general opinion that if obtainable in goodly numbers and of good quality at this time, Liberty would be the leader for a Christmas rose. A few very fine ones realized $6 per dozen without difficulty, but most of the Liberty seen were of the very short or medium grades, which sold at from $6 to $20 per 100.

Carnations were in pretty good supply and cleaned up well, No. 1 stock selling for $5 per 100 right through, while extras made $6, fancies $8 per 100, and in some cases better prices were obtained for a limited supply of strictly choice flowers. Bright red carnations were the leaders; extra high prices were obtained for G. H. Crane of extra quality, or anything else especially good in that color.

Chrysanthemums were very little in evidence and were rather of poor quality, but pretty good prices were obtained for the few brought in.

Violets proved to be pretty plentiful, after all. Extra violets, double or single, realized $2 per 100, No. 1s making $1.50 and $1.75. A limited supply of extra Princess of Wales brought $2.50. Valley was in good supply, but the demand was not very heavy.

On Sunday and Monday quantities of valley, violets and other flowers were used in funeral work for the obsequies of the late ex-Governor Roger Wolcott, which took place on Monday morning.

Mignonette was in fair supply and sold well at $3 to $6 per 100. Paper Whites and Romans were very plentiful, as was stevia.

Retail stores report the holiday trade ahead of expectations.

Quantities of flowering plants were disposed of—azaleas, principally the brighter colors, poinsettias and colored cyclamen and primroses sold well, and the varieties of Begonia Gloire de Lorraine, though meeting with fair demand, did not clean up so well as many expected. Oranges and ardisias were scarce and in demand.

Jottings.

The regular meeting of the Gardeners and Florists' Club of Boston will be held Tuesday evening, January 1, when it is hoped a large attendance will be present. The regular monthly meeting of the Horticultural Club was held Thursday evening this week, Jackson Dawson presiding.

Welch Bros. received shipments of the rose Queen of Edgely on Saturday last week and Monday this week which were much admired. The firm expects to have daily consignments of this variety from now on. A large Christmas business was done by this concern this year.

Mrs. Wm. J. Stewart met with an accident by falling last week, which resulted in a broken arm.

The supply of greens this year was very light, more especially laurel wreaths, which were about sold out a week before Christmas. Prices advanced considerably on the laurel wreaths; the two ordinary sizes usually sold at $12.50 and $15 per 100 brought $16 and $20 per 100. The holly on the market was of uniformly good quality.

F. J. N.

BRIDGEPORT, CONN.—Christmas trade in general was better than last year. Greens were used in great abundance and prices on these goods were very low. Plant trade was good, with prices on a level with other years. Little demand for palms was experienced, but there was an increased call for flowering plants. The best trade was in cut flowers, carnations and violets taking the lead. While the general selling price of carnations was 35c. per dozen to within a week before Christmas, the value during Cristmas week rose to 75c. per dozen for general varieties, such as Scott and Daybreak; fancy carnations, such as Mrs. T. W. Lawson, G. H. Crane, Mrs. Bertram Lippincott, The Marquis and others, retailed at from $1.50 to $2 per dozen. Begonia Gloire de Lorraine sold well, but will not remain a favorite on account of dropping its flowers when removed to private houses. Poinsettias and azaleas did not sell well. Araucarias and Boston ferns were more favored. On the whole there was an increase of about 20 per cent. in the bulk of trade, with an increase in the prices of cut flowers of about 20 per cent. over those of last year. The price of plants, especially palms, was 25 to 30 per cent. lower than last year.

JOHN RECK.

FOR SALE—GREENHOUSE PROPERTY AT NYACK, N. Y. A plot 220x125 feet, on which are four Rosehouses, 100x18x6, each house heated by a No. 16 Hitchings Boiler, and seven houses, each about 64x11 feet, heated by flues. This property will be sold cheap to quick cash buyer.

HITCHINGS & CO., 233 Mercer St., New York.

THE MAN WAS RIGHT

When he said **ETHEL CROCKER**

is absolutely the best Pink Carnation ever offered to the trade; those that are growing it are more than satisfied; every Florist should grow it next year. Fine healthy Rooted Cuttings, now ready, $4.00 per 100; $30.00 per 1000. Cash with Order.

W. W. COLES, - KOKOMO, IND.

Mention the Florists' Exchange when writing.

ETHEL CROCKER

WHEN store men telegraph that they must have some Crocker for their customers, and commission men beg for consignments, in spite of the fact that there are plenty of other pinks on the market, it is a pretty sure sign that Crocker has some points of merit distinctive from the others and that there is an unfilled demand for the flower.

With the largest stock of this variety grown by any one grower in the country, I can fill your orders with carefully selected cuttings at **$4.00** per 100 or **$30.00** per 1000.

Send for list of other varieties.

ALBERT M. HERR, Lancaster, Pa.

YEAR, 1900, THE	1260

The next regular meeting of the Dutchess County Horticultural Society will be held on Wednesday, January 2, 1901, at 1:30 o'clock, at the Y. M. C. A. rooms, Poughkeepsie, N. Y. Election of officers will take place and arrangements be made for the annual dinner. W. G. G.

H. J. Jones, an English grower, uses paper plant houses for his surplus stock of chrysanthemums cultivated for exhibition cut flowers, with immense success. The structure is made of light framework and waterproof paper. After dismantling the paper can be readily stored in a dry shed, and will last several seasons.

The German papers speak highly of a dwarf helianthus named Perkeo which is being introduced by Frederick Roemer, Quedlinburg. The plant is extraordinarily floriferous, and the flowers are of the pretty color of those found on Helianthus cucumerifolius, with a velvety black center. It has been found suitable for cut flowers, as well as for pot plants, and grows freely in the open air.

The Year 1900.

The closing year of the century has been a remarkable one in several respects so far as the horticultural trade is concerned. Viewing it from a business standpoint, it may be characterized as erratic. The opening days of the year were ushered in, accompanied by the general prosperity then prevailing, a condition which continued until the usual upheaval, occasioned by the presidential election, when business stagnated somewhat, and from which setback it has not yet fully recovered. Then, too, the peculiar climatic conditions experienced this year have had their influence on the volume of trade done, these tending to a material shortening of the "season." The Paris Exposition, also, created a greater exodus than usual of the flower-buying public, although this factor was counterbalanced to some extent by an increased steamer business.

Easter trade, however, showed an advance of from 40 to 50 per cent. in the business transacted, while the past Christmas trade has shown a similar increase, with a much greater demand for cut flowers than has been experienced at this holiday for some years back.

Greenhouse building has been quite active during the twelvemonth, notwithstanding the abnormally high prices of the necessary materials remain.

Progress in securing new varieties of commercial plants has kept pace with that of former years. In carnations many new kinds have been announced, but as the standard of quality keeps on advancing, the number of varieties considered worthy has been limited. Among the kinds that have succeeded in meeting the requirements of the American Carnation Society were Governor Roosevelt (Ward), Prosperity or No. 666 (Dailledouze Bros.), Enquirer, Estelle and Elinore (Witterstaetter), and Mrs. Bertram Lippincott (Kuhn). Some promising varieties are on the tapis for exhibition at the forthcoming show of the Carnation Society, to be held at Baltimore in February next.

Our chrysanthemum hybridizers are continuing their good work. The varieties receiving the certificate of the Chrysanthemum Society of America as commercial sorts were as follows: Iolantha (Smith), Prosperity (Peerless) (Hollis), Omega (Smith), Jos. W. Cook (Cook), D. Josephine (Kleinheinz), Brutus, Yanariva, Mrs. W. B. Chamberlain, Chestnut Hill (May), Nellie (Rieman), Mrs. Elmer D. Smith (Smith), (No. 19) Golden Fame, (Molatsch), Malcom Lamont and Mary Hill (Hill & Co.), Timothy Eaton (Miller & Sons).

The list of cannas has been increased by several very valuable kinds, the work of improvement for the most part taking place in Pennsylvania.

Dahlias are still gaining in popular favor, thanks to the efforts of the American Dahlia Society, recently reorganized, and which now seems to be on a better working basis.

The American Rose Society held its first exhibition in New York City the present year, which was attended with remarkable success, both from an exhibition and patronage standpoint. The high quality of the stock exhibited, particularly from places outside of the metropolis, was indeed a revelation to many. The society certificated the following varieties, viz.: Queen of Edgely, or the Pink American Beauty (Floral Exchange), Robert Scott (Scott & Son), Baltimore (Cook). The second exhibition was held by the society in June, but owing to the unfavorable weather conditions the show was not a pronounced success, although most instructive as demonstrating the progress making in the obtaining of new varieties by American hybridizers. The society intends to continue its exhibitions during the year 1901, and will hold a show in March next in the Waldorf-Astoria Hotel, New York.

Among new varieties of roses of American origin registered this year are: New Century (Conard & Jones), Sweetheart, Debutante, Flush o' Dawn (Walsh), Pan-American (Henderson & Co.), and Freedom (Griffin).

The Society of American Florists and Ornamental Horticulturists had one of the most successful gatherings and exhibitions in its history in New York City this year. Its membership list was greatly increased thereby, and now stands, according to the latest report, at 816, including 32 life members. Agitation was set on foot at this meeting for securing a home for the society, and there is also hopes that a national charter will be forthcoming in the near future.

The nursery trade has been particularly active, and an advance of from 10 to 25 per cent. on the values of some articles experienced.

The American seed trade has been favored with an exceptionally good business year, partly due to shortages that have existed in several lines, particularly in the wax varieties of beans and the early peas, carrots, beets and American-grown varieties of turnips; and in foreign seeds, in radish and turnip. The demand was good all along the line and there do not appear to be any large surpluses. Corn has been as plentiful as any stock. The recent sharp advance in the price of onions will doubtless tend to stiffen values of onion seed. There does not at present appear to be any necessity for sacrificing anything the coming year. The fight against government free seed distribution goes on with increased vigor.

Among subjects which have more or less occupied the attention of the trade during the past year have been the progress made in the growing of bulbs in America, some demonstrations of the capabilities of home-grown stock having been satisfactorily presented.

Some of our carnation enthusiasts have shown how simple a matter it is for a carnation to be awarded 100 points, and for the first time in its history the divine flower has been adopted as a party emblem in national politics. Carnation growers are doing their utmost to establish a standard by which new varieties may be judged, so that decisions thereon shall be more uniform than has been the case recently.

In respect to uniformity of judging by scale, the work of the committees of the Chrysanthemum Society of America shows most wonderful results, due, no doubt, to the retention of the members of the several committees, or the greater portion of them, from year to year, and the experience thereby gained, also to the intelligent interpretation of the scales employed.

An effort is now making, and is likely to be successful, to have the Chrysanthemum Society of America meet at some point during the chrysanthemum season, instead of in August, as is usual now—a custom which does not seem to be productive of the best results.

The flower shows have received greater attention from the daily newspapers of the country than in former years, and on this account several of the exhibitions have achieved a greater success than was the case formerly. There is no apparent diminution in the popularity of the chrysanthemum, and it would seem expedient to foster that interest as much as possible by a continuation of these shows. New York City will, after a number of years, give an exhibition in the Fall of 1901, and an endeavor will be made to surpass then all previous attempts in the flower show line.

The literature of the trade has been augmented, during 1900, by the following books: Amateurs' Practical Garden Book (Huna and Bailey); the second volume of the Cyclopedia of American Horticulture (Bailey); Hedges, Windbreaks, etc., (Powell); and Plant Culture, (Oliver).

Death has removed, during the past year, some of our ablest associates. Of well-known men in the florist trade, there are inscribed on the 1900 death roll the names of John M. Jordan, Louis Menand, John Breitmeyer, Harry Dale, Alfred Nenner, Henry Miller, Wm. McKellar, Wm. J. Palmer, Archibald Middlemass and C. F. Baker; the retail trade has suffered great loss in the passing away of such prominent members as John M. Hodgson, Henry Butler and Michael Butler; the nursery trade laments the demise of such faithful workers as Isaac Hicks, Robert C. Brown, T. T. Lyon and David G. Yates; the seed trade, C. C. Morse and C. H. B. Breck; horticultural literature and applied botany, E. S. Carman, and ornamental horticulture, William Saunders.

The year 1900 has also witnessed one of the greatest disasters that has ever befallen a city in the devastation caused by the Galveston flood, by which thousands of lives were lost and much valuable property destroyed, the florists suffering with other dwellers in that ill-fated spot. To the credit of the trade generally, we are glad to be able to state that with characteristic generosity valuable assistance was rendered the distressed brethren, both financially and in kind.

The miners' strike in the anthracite coal district occasioned some little bother among florist users of that fuel.

Among subjects that will occupy the attention of the trade for the coming year will be the great Pan-American Exposition to be held at Buffalo, N. Y. Horticulture promises to be one of the principal features there, and everything points to a most successful display of trade products on that occasion, to view which a splendid opportunity will be afforded the craft, as the S. A. F. O. H. will meet in Buffalo in 1901.

Plant growers will look for something to beat the varieties of Begonia Gloire de Lorraine as all-round, serviceable subjects; the cause of stem rot in carnations will still be earnestly and persistently inquired for; greater efforts should be made to secure local coöperation in the purchase of coal and other supplies; more practical work, consequent upon better attendances at our florists' clubs, should ensue; the trade will exhibit its old-time and imperative interest in the annual and periodical flower shows; a better knowledge of how to handle and store cut carnation blooms will be acquired through discussion of the subject; greater uniformity in the prices of cut flowers and plants is sure to follow coöperation along this line; the prevailing credit system (or lack of system) must be overhauled and placed on a safer and more satisfactory footing; increased attention will be given to the production of American orchids, necessitated by the diminishing supplies available from tropical sources; the auxiliary societies will give some thought to "closer relations" being established between them and the S. A. F., and plant shippers will conclude whether the present custom shall continue or a charge be made for packing.

THE FLORISTS' EXCHANGE feels gratified at the continued encouragement and support accorded by the trade, by which we are enabled to retain the leading position we have long occupied among class journals pertaining to this industry, and which the past year has been strengthened by the issuance of daily editions of THE EXCHANGE during the S. A. F. O. H. convention in New York—a feat not heretofore accomplished in horticultural journalism. For the confidence reposed in us we return sincere thanks. Our every endeavor shall be directed toward meriting the continuance of that confidence; your interest shall at all times be our interest, and the advancement and ennobling of the profession the highest aim of both.

In conclusion we wish one and all A Happy and prosperous New Year, and may the new century which is about to dawn upon us be fraught with successful achievements far excelling those that have marked the past one hundred years, wonderful and glorious as these have been—deeds that shall but reflect the higher intelligence and the greater progressive spirit of our florists, developed by the experience of the passing years.

Schedule-Making.

The reports of the several suits arising from faulty schedules appearing in the English horticultural papers are not without interest in this country, and although we do not have in mind at this time any case that has necessitated the bringing of it into court for adjustment, yet there faces us a contingency of this nature under similar circumstances—that is, where perspicuity in the schedule is wanting and unjust decisions rendered in accordance therewith.

At a recent show in England a prize was offered for a "plate of six heaviest tomatoes" and awarded accordingly. Later the decision was changed to conform to a deduction that the word "heaviest" should also be taken to embrace "ripeness," the award was reversed, and the prize given to another party. The case was brought into court, and the judge, holding that the schedule having announced the decision of the exhibition judges as final, and such decision having been publicly made, decreed that the first award could not be altered except by legal process; he therefore granted judgment in favor of the plaintiff for the amount claimed, with costs.

Makers of schedules should at all times

see to it that the rules and regulations affecting both competitors and judges will admit of but one construction, and to this end such rules ought to be as explicit as possible.

Commenting on this subject in a recent issue of American Gardening, President O'Mara makes a few very good suggestions, which could be carried out in practice with beneficial results to all parties interested. He says:

"In preparing schedules it seems to me committees should differentiate in formulating rules governing exhibitions between those which apply to the committees of the society giving the exhibition and the judges who are to decide upon the exhibits. As a rule, they are grouped together under one head, and it is very often difficult for the judges to determine where their duties begin and where they end according to said rules. Some schedules announce the fact that the decision of the judges is final, others omit it, and it seems to me that it would be well to have it on all schedules.

"It might not be a bad idea to arrange for a committee of the society giving the exhibition to hear protests and pass upon them before the decision of the judges would be accepted as final, and stipulate a time, say one hour after the award is made, in which to file a protest. I know from personal experience that frequently judges do not have the time necessary to thoroughly and accurately perform the duties of their position, consequently errors of detail are made. An examining committee should be appointed out of the society giving the exhibition which would thoroughly scrutinize every exhibit and see that it came within the rules laid down by the society. The duty of passing upon such questions should not, in my opinion, be thrust upon the judges. A schedule before me, for instance, says: 'Each variety exhibited shall be properly and plainly labeled by card.' It seems to me that it would be better to have that rule read as follows: 'Each variety exhibited for competition must be properly and plainly labeled by card, otherwise the entry will be rejected.' The rule then states the kind of card required. Another rule says: 'All plants and pots shall be cleaned before being brought to the hall.' Now, they might have been cleaned six months before they came to the hall, and yet be very dirty when they arrived there. It would be better, I think, to have the rule read as follows: 'All plants and pots must be perfectly clean when exhibited, otherwise the exhibit will be rejected.' Another rule says: 'Any article manifestly unfit to show may be excluded by the committee, and the judges shall withhold any premium when the entries are unworthy of awards.' Here the duties of the committee and the duties of the judges are combined in one rule. If the article is manifestly unfit to show, the committee should not accept the entry. Another rule in another schedule says: 'All pots or tubs of exhibition plants must be clean; dirty pots or tubs may be sufficient cause for the judges to disqualify the exhibit.' This is properly work for an examining committee, not for the judges, and it should be emphatic; it should state that they should not be exhibited and would not be accepted or allowed into the exhibition by the committee. Another schedule says: 'All awards will be passed on merit alone.'"

There seems to be too great a proneness on the part of schedule makers to copy rules and regulations governing exhibitions other than their own, hence the great similarity and indefiniteness of many of the specifications. As Mr. O'Mara points out, the penalty for failure to conform is not in many instances stated (although it may be implied) along with the rule itself. Then, too, a clause providing for the consent of the exhibitors to the rules and regulations prescribed should always be inserted. This is omitted in many premium lists.

The rules should, we think, follow in some sort of sequence, beginning with the demands of the show management as to the condition of the exhibits before acceptance as such, and gradually leading up to the making of the awards and their final disposition. Very many of the rules in the present-day schedules are compiled on the "hit-or-miss" plan, a rule having been stuck in here and there as it occurred to the schedule makers. If the rules and regulations could be grouped in some methodical manner according to their application—that is, those governing plant exhibits and those having reference to cut flowers each by themselves—how much easier the interpretation of the whole would be, both for exhibitors and judges.

In making up a schedule the fact should never be lost sight of that failure to carry out the provisions therein stated on the part of the society or the exhibitor is amenable to legal jurisdiction, hence the great necessity of avoiding complications, and as far as possible rendering the construction of and conformity to these rules and regulations as clear and simple as can be.

CHANGES IN BUSINESS.

TOWNSEND, VT.—R. B. Brigham has sold his greenhouse.

PLYMOUTH, MASS.—E. F. Shaw has taken down his greenhouses and gone out of the florist business.

FARGO, N. D.—A. T. Shotwell has purchased the greenhouse of the North Dakota Floral Co., of which A. Norlander was proprietor.

DERRY, N. H.—William F. Madden has bought the Cullen greenhouses at West Derry and is managing them on his own account. He will enlarge the plant in the Spring.

RIVERSIDE, CAL.—The Chase Nursery Company, which filed articles of incorporation with the county clerk some time ago, on December 15 placed on file amended articles. The company has a capital stock of $50,000, all of which is paid up.

UPTON, MASS.—Henry O. Harrington and Libby C. Fisk have started in the florist business here, under the style of the Oak Grove Nurseries. The first-named gentleman has been an enthusiastic amateur flower grower for the past 20 years. Another greenhouse, 50 x 12 feet, will be added.

ALBANY, N. Y.—William C. King & Co. have succeeded to the business formerly conducted by Samuel Goldring at 30 North Pearl Street. William C. King, who is the son of George King, superintendent of the greenhouses at the executive mansion, will be the managing partner of the new company. Mr. King has been in the wholesale florist business for several years, having his extensive greenhouses on Yates Street.

FIRES.

BARRIE, ONT.—Fire occurred in the greenhouses of Frank Brown on December 14, doing much damage. Mr. Brown, during the fire, had the misfortune to fall upon some sharp object, inflicting a painful wound on his left hand. His loss, coming just at the holiday time, is very considerable, and as a result he will be out of business for a time at least.

ASTORIA, N. Y.—The greenhouse of Benjamin Wm. Sill, of Astoria, Long Island City, was totally destroyed with all its contents by fire Sunday night, December 16. Young Sill is an enthusiast in floriculture, and hoped from a small beginning to make a great ending. The house contained nearly 3,000 plants under culture for the Spring plant trade. Among those destroyed were some choice and presumably valuable novelties, which had their origination there, and were being guarded with jealous care. The following is a partial list: A yellow flowering semperflorens begonia, a sport from Semperflorens alba, the flowers being twice as large and a distinct yellow. This sport was in process of seeding and was valued highly. Next to that was a new salvia, a sport from Salvia Silverspot, the center of leaves yellow to creamy white, with a perfect margin of green. One new seedling begonia of special promise, a cross between Semperflorens alba and begonia Vulcan. This plant surpassed in attractiveness all the other begonias in the house, not excepting Gloire de Lorraine. Four new foliage geraniums were also made extinct by the conflagration. There was no insurance on the property, and Mr. Sill is without means to rebuild and restock.

SUBSCRIBER.

OBITUARY.

Thomas A. Williams.

Prof. Thomas A. Williams, assistant agrostologist of the Department of Agriculture, and widely known as a botanist, died at his residence in Tacoma Park, near Washington, on Sunday, December 23. He was born at Weeping Water, Neb., 35 years ago, and came to the Department of Agriculture four years ago from the South Dakota State Agricultural College, where he occupied the chair of botany. He was editor-in-chief of the *Asa Gray Bulletin*, a botanic periodical published in Washington, and professor of botany at Columbian University.

Edwin J. Glover.

Edwin J. Glover, Utica, N. Y., died suddenly December 17. He was born near Newcastle, England, in 1840, and came to the United States in 1858. During the Civil War he enlisted in the 146th Regiment of New York Volunteers, and participated in the battles of Fredericksburg, Chancellorsville, Gettysburg, Bristoe Station, Va., Mine Run, Wilderness and Appomattox. He rose to the rank of sergeant, and was honorably discharged in 1865. After engaging in various occupations, he finally entered the florist business, which he had carried on for the past ten years. Deceased was well known and generally beloved by all who came in contact with him. A widow and five children mourn his loss.

The rose is red, the violet's blue,
And the pinks are blooming fair and strong.
Chrysanthemums are white and green,
And the florist's bill is six feet long.
N. Y. HERALD.

Poughkeepsie, N. Y.

Murphy & Schaumburg have introduced a new delivery wagon of chaste appearance, fitted with a heating apparatus.

American Rose Society.

Arrangements have been completed for holding the second annual exhibition of the American Rose Society on March 19, 20 and 21, 1901. The exhibition will take place in the ball room of the Waldorf-Astoria Hotel and the proceeds will be devoted to the charitable department of the Loomis Sanitarium for Consumptives, an institution which has enormous calls upon its resources in and around New York City. The schedule of the exhibition, which has been already distributed, will be sent by the secretary, 136 Liberty Street, New York City, on application. Several special prizes in the form of cups and other plate are being arranged for, and indications point to a brilliant event. The art management of the exhibition will be in the hands of one of New York's most able artists.

The Liberty Rose.

Visitors to the recent show of the American Institute, held in New York City, greatly admired the vase of the new rose Liberty exhibited there by William Turner, of Tarrytown, N. Y.

Mr. Turner kindly furnishes us with a brief account of his cultural methods, which will prove of service to those who do not have the desired success with this beautiful rose. He says:

"When ordering last Spring I obtained half grafted, half own root stock, and while both are doing well, I can easily cut two flowers from the grafted to one from the own root stock, and better blooms. There's not the slightest doubt in my mind that grafting is the method to follow in future for this variety.

"Our roses were planted on raised benches in June, the grafted stock in from four and a half to five inches of soil; for the own root stock probably one inch less of soil was employed. The compost was made up in early Spring, at the rate of three parts of sod cut from the pasture to one of thoroughly rotten manure.

"To be candid, through June and July I felt anything but satisfied with Liberty. The plants were making a short growth, then a flower, but it seemed to me had a tendency to harden up. I changed my methods of watering, giving the plants more water. The change was appreciated, the plants in a short time making better foliage and stem and having a softer appearance. By September the grafted plants were full of roots, which induced me to give them a top-dressing of soil and manure, half and half, with a little bone added. This also suited them, as the roots took hold of the new soil in a short time, and the plants made a vigorous growth.

"Toward the end of September one thing must be watched closely, and that is black spot. On the first tendency to spot when the nights get chilly, a chink of fire heat, with air on the house, is my remedy, being careful also only to syringe on clear days. Up to this date we have not been bothered with spot, either on the grafted or own root stock.

"Liberty is very floriferous, and to allow all the flowers to mature would mean destruction to the plants. I find it best to cut off all buds with short stems. By so doing the vigor of the plants is maintained. In removing the buds, cut back to a good eye; by this means one gets a good break. It is useless to attempt to cut blooms from weak plants; have the plants good and strong before commencing to take the flowers at all.

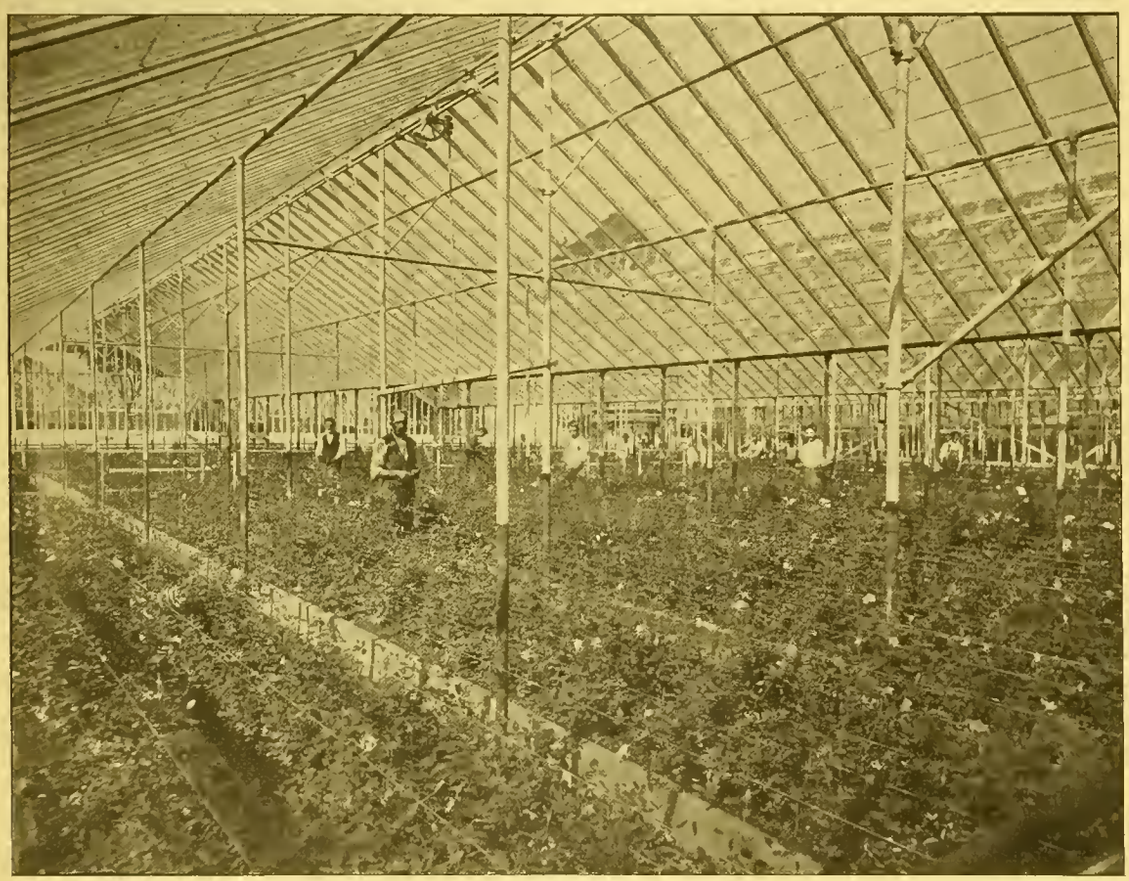
"The temperature we have kept about the same as for other roses, viz.: 68 degrees at night, with a rise of 10 to 15 degrees during the day, according to the weather.

"I know there have been some failures with Liberty. To those in this position I would say, don't discard this variety; it is too good to be thrown overboard. I may say that our success has been beyond my expectation. We started cutting steadily the first of October, and since that date have cut more flowers of Liberty, and of better quality, than from any other variety.

"Consequently I feel like giving this rose the highest honor. With me the general cry is, when roses are wanted for the table or for special orders, 'Give us Liberty.' This indicates more plainly than anything else the popularity of this rose."

Rose Queen of Edgely at Home.

The rose-growing establishment of the Floral Exchange at Edgely, Pa., a few miles east of Bristol, on the New York division of the Pennsylvania R. R., has during the past few months been of great interest to all rose growers, on account of its being the home of the new rose Queen of Edgely. And it can be very fittingly called a home, as the establishment is a model one. The houses are well kept in every way, and the whole place shows thorough supervision. Intending builders of rose houses would do well to visit this place for the pointers they would obtain. The three new houses, 30 x 225 feet each, in which this rose is growing, are model structures in every way, of light construction with pipe supports, extra bracing across the house, and 16 x 24-inch glass set the 24-inch way. The houses are even span and have two panes of glass deep on the sides. The wisdom of this is strikingly apparent, as the house is very light and the roses on the bed at the north side are really the best in the house.



Colonial House. The Floral Exchange Inc., Edgely, Pa.

This new rose, as we have previously said, is identical with American Beauty in every respect except color, which is a delightful shade of pink improving with age—something seldom found in roses. The Queen of Edgely has been largely exhibited during the past Fall. At the Philadelphia show on November 13-17 was shown a large vase filled with grand blooms of this rose, which was surrounded by crowds of admirers during the entire exhibition, who were charmed with the grace of form, rich coloring and delicious fragrance.

The Queen of Edgely came as a lucky accident, four years ago, to the Foral Exchange Nurseries. No one can tell how it was born, but some good fairy turned the red of the American Beauty into the lovely pink shade of the Queen of Edgely, leaving the grand foliage and vigor of Beauty. The advent of this new rose was kept secret for four years, until this year, when as a débutante it appeared, to charm every one who has seen it.

At the present time there are 32,000 plants of this new rose potted and over 25,000 yet in the sand. The famous rotten rock of West Philadelphia is being used in which to root the cuttings. All who have become familiar with this material know that it produces splendid roots, much better than does ordinary sand. So far, great success has been attained in striking cuttings, not a leaf being lost; as J. D. Eisele said in going through the propagating house: "You will get 101 per cent. of these, judging from appearances."

There are on this establishment 35 houses. Last season five old houses were taken down and in their places were built three even span structures. These are all open as if under one roof. This lot is called the colonial range. There being 13 beds, the thought of the 13 original States came up, hence the name. This range is provided with solid beds in which are planted Bride and Bridesmaid, all looking well and showing good promise. The range is 80 feet wide and 100 feet in length, having iron gutters and iron supports. The glass from the old houses has been utilized on the north side, while 16 x 24 glass has been used on the south side, set as in the other houses—the 24-inch way. The range is very light and undoubtedly is the right house for roses.

The coming season 50,000 feet of new glass will be added in two houses, each 50 x 350 feet; these will be devoted to the new rose.

This entire establishment is given up to rose growing. Meteor has been one of the varieties cultivated most successfully here, and as many as 25,000 plants have been grown. This year there are 11,000 plants, all doing well and certainly bringing good returns.

The cold storage room on this establishment is worth going miles to see. It was fully described in these columns in August last, and is working splendidly. At the time of our visit it was half filled with the daily cut of roses, and every part of the room was perfectly dry, so that a match could be struck on any part of it. The capacity of this room is 15,000 roses.

The entire place is heated by marine boilers. These have all seen service afloat and give every satisfaction. The bottoms of the boilers are but little below the ground level. The establishment being located near the Delaware River, water is found at a depth of three feet, so that all the water from the condensed steam comes back into a tank. This is taken care of by an automatic pump, and the results are perfect. It takes annually 1,500 tons of coal to keep this establishment going. The annual cut of roses is one million. Record cards are on the door of each house, on which the daily cut is recorded, a new card being affixed each month.

Harry Simpson is the superintendent of this large plant, and from the appearance of it has the place under thorough control. He even has a steam gauge in his bed room in the dwelling house, so arranged that it rings a bell if the pressure goes below four pounds.

This establishment began its career 30 years ago, there being then one small house. It was at that time the summer home of Dr. Edward Morwitz, owner of the Philadelphia Democrat, later passing to his son, Mr. Joseph Morwitz. From its inception it was under the successful management of Mr. D. Fuersteuberg, himself for many years manager of the Philadelphia Democrat. The Floral Exchange is now an incorporated company, Mr. D. Fuerstenberg being president and H. C. Geiger secretary. This season there are 50,000 roses on the place. Take a trip to see them, and you will receive a glad welcome.

DAVID RUST.

The firm of Alex. Dickson & Sons, seed merchants and nurserymen, Belfast and Newtonards, has just been registered as a private limited liability company. It is not intended to offer any shares to the public, and the conversion has been effected principally with regard to family arrangements.

CATALOGUES RECEIVED.

J. HAY & SONS, Brockville, Ont.—A Charming booklet entitled "Timely Suggestions to Gift Givers."

THE CALIFORNIA ROSE COMPANY, Los Angeles, Cal. Illustrated Catalogue of Roses. A handsomely illustrated, well printed and very complete catalogue of field grown, own root roses, containing cultural points and other matters of interest to planters.

A Visit to Bassett & Washburn.

A trip to Bassett & Washburn's magnificent "flower factory," as President O'Mara calls it, is always of interest. The first home in this city of the American Beauty rose, it still maintains the high standard for which it has long been noted. Nothing short of this will ever satisfy Mr. Bassett. From forty to fifty thousand plants of this rose alone are grown. The planting of so many necessitates a beginning as early as April; some are planted in May, others in June, and the latest about July 16. The plants are in all styles of growth and admirably cared for. The same with the tens; if one range is in part off crop, others are in.

One thing we desired particularly to see was the Marquis de Litta rose. Surely this is to be a sensational market variety unless, as Andrew Benson said, something happens it, of which there are is yet no signs. It has pretty growth, stout enough to need little staking, will not require the great height of house that Beauty does, produces a grand medium-length stem; flower of fine color, the bud being longer than that of Beauty, and the plants so far free from spot. The flowers sell at sight.

Some good Liberty were seen, but as yet this variety is not entirely satisfactory, although there is a call for all the flowers that can be obtained. There are expectations of better conditions later.

The two 600-foot carnation houses are a sight. White Cloud is a forest of flowers; probably 8,000 are in evidence. This variety and Flora Hill are a fine team. Crane as a red is no less satisfactory. Lester Paul is good, but inclined to be late. Lawson presents an even grand lot of plants; the stems rather short yet. Nothing equals Red Bradt; the demand from the retail men for this variety is always ahead of the supply. America bids fair to be good later. Morning Glory looks very promising; it is a better finished flower than Daybreak. Olympia is not satisfactory yet; stems are short and flowers not perfect. Whitcomb Riley is not well in flower. Peru looks good. The Marquis is not satisfactory as yet; they don't like to condemn it until it has been tried from own grown stock. Ethel Crocker is a fine thing apparently as done here. Two or three white sports from Crane were noticed.

Asparagus plumosus nanus is a great feature here. Lilies are late. Not many will be in for Christmas.

The propagators are already at work with the roses, for which they use seven houses. Fresh soil for this immense plant shows up in mountains. Five acres of maiden soil were exchanged for the old material from the greenhouse benches. A new field will be chosen for planting out carnations next Summer, well dressed with old soil from the houses. The Jones underfed mechanical stoker with blast works perfectly. Ess.

[This article was unavoidably held over from last week.—Ed.]

BRIEFS FOR BUSY FLORISTS.

ROSES.—This is an opportune time to begin propagating, and whenever a good batch of cuttings is available, get them into the sand. It might be found convenient to throw out a bench or two of the old plants quite early in the Spring, and if there is a nice stock of young plants in three-inch pots to take their place, a good start is made for another year. Any h. p. roses intended for Easter flowering may be put into a cool house and allowed to break slowly. Little water should be given them; an occasional syringing will meet their needs until growth commences.

IF THE SPIRÆAS are not already potted and put where they will start, this should be done forthwith. Under a bench in the ordinary greenhouse is as good a place as any to put them for the first few weeks after they are potted.

TULIPS AND VON SION NARCISSUS can be forced from now on with some certainty of having stems long enough to be of service. Give the plants a shaded position, where there is a good strong bottom heat, until the flower buds are almost ready to open, then put them in a cooler house in the full light.

HYDRANGEAS that have been stood under the benches for the last few weeks are breaking into growth and must now be given room on the benches. Keep the plants growing steadily from now on. Occasional fumigating will be necessary to keep down green fly.

CHRYSANTHEMUMS.—Do not neglect the stock plants of these. Any varieties the number of which it is desired to increase, and the stock of which is at all limited, should be kept growing right along and cuttings taken whenever they are ready. Cuttings taken now and rooted will each furnish another cutting in a short time; thus if one has but a few stock plants of a variety, by close propagating a good supply can be obtained.

(267) **Variegated Sweet Alyssum.**—Why is this plant not more generally used by the trade? I have used it for the past two years, and in my opinion there is nothing more beautiful for beds or borders.—SUBSCRIBER.

(268) **Shipping Trailing Arbutus.**—W. A. S.—Boxes for shipping trailing arbutus should be quite shallow. Make up the flowers into small bunches, and put two layers of these in the box with tissue paper between each layer. The mountain laurel can be put into crates or boxes of any convenient size.

(269) **Rust on Carnations.**—J. C. B. and A. R. P.—The carnation leaves are badly affected with rust. To prevent it further spreading, pick off all the diseased foliage at once; clean the surface of the beds thoroughly; dust the plants with air-slacked lime; keep the atmosphere of the house on the dry side both night and day; discontinue syringing so as to let the lime remain on the plants for eight or ten days, then spray lightly to wash it off; go over the plants again and pick off any leaves that show the disease, and repeat the dusting with lime and the keeping of a dry atmosphere.

(270) **Trouble with Seaforthia Elegans.**—Why the Seaforthia elegans plants are losing their leaves, while the other palms in the same house are all doing well, seems rather a hard problem to solve, seeing all the plants are under the same treatment. The best thing to do would be to take the plants out of the pots and find out if the trouble is not at the roots. Perhaps the palms have been over-potted; and if such is the case the bulbs should be reduced and smaller sized pots used. Or the plants may have been potted too deep, or too much animal manure may have been in the soil. We think the trouble will be found at the roots. The plants should be given an overhauling at once.

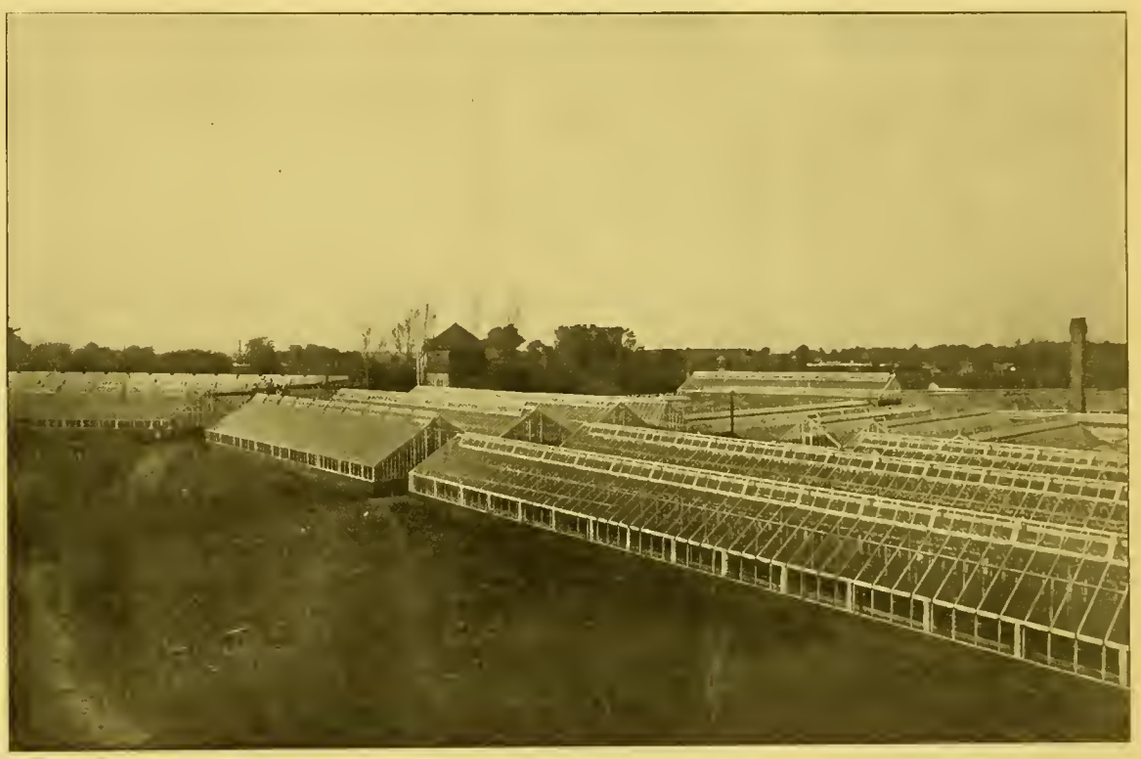
(271) **Rose Kaiserin Augusta Victoria.**—I have a house of Kaiserin Augusta Victoria roses. The plants having been run for Summer bloom, I desire to rest them from Christmas until April 1. Can I leave the plants in the greenhouse benches, dry them off for a week or two and then cover the ground with a mulch of cut hay (dry), letting them freeze up until April 1 without injury? I know the variety is hardy outside, and if the house were shaded from warm sun, I wondered whether the plants would not keep all right. I prefer to leave them in the benches, if possible.—EMPIRE STATE.

—The house can be dried down and the plants allowed to freeze. They will be in good shape for starting up in Spring. The drying down and cooling off of the house must be done gradually, however; if the heat be taken off suddenly the unripened wood will suffer. If the weather should prove mild after the holidays, there would be little danger of injury from taking away the heat; but if the weather is severe the temperature in the house should be reduced gradually, so that the process may extend over a period of two or three weeks before frost be allowed to enter the house. A light covering of hay laid over the benches will be beneficial, though it should not be applied until after the plants have become dormant and the benches cleaned of the fallen leaves, etc. Shading the house will not be necessary on days when there is bright sunshine. Open the ventilators wide, and should the weather be at all mild, the ventilators should be kept open day and night. If proper care be given to the plants by allowing them to become dormant gradually, there is no need of taking them from the benches. If the heating is done by hot water, be sure to draw all the water from the pipes before the house freezes, otherwise a set of bursted pipes will result.

(272) **A Violet Trouble.**—Please tell me what is the matter with my violets. They grew finely up to the time cold weather set in, since which time they have made very little growth. I keep them at 54 degrees in the daytime, with air on, and 38 to 42 degrees night. The plants look as if they had been frosted; the leaves turn over and the ribs turn purple. The flowers are a little white on the backs before they open, and have quite a large white center. Do you think the cold days created too big a change in the temperature? We have had the same trouble every Fall, and when we kept the plants a little warmer days, they seemed to outgrow it. The question is this: Is 54 degrees too cold for violets in the daytime with air on?—A. B. C.

—The white center in violet blooms is not unusual, but, in the writer's judgment, its cause has not as yet been satisfactorily accounted for, notwithstanding the many theories that have been advanced. Some growers claim that it is due to an oversupply of available nitrogen in the soil, which causes the plants to make too rapid growth, and others that it is the result of an unbalanced physical condition of the plant, but these theories would hardly hold in view of the fact that the one plant frequently throws perfect flowers and blooms with white centers at the same time. So far as the writer has observed, the white center is confined as a rule to the Marie Louise variety and its several strains and is more common in the Fall and early Winter. The variation in temperature, the shorter days and the comparatively small amount of sunlight during that period seem to favor its development. The turning over of the leaves and purpling of the ribs, to which A. B. C. refers, indicates an unhealthy condition of the plants, which may be due to any one of a number of causes, and is not necessarily an indication of too low temperature. The writer does not consider a night temperature of 38 to 42 degrees and a day temperature of 54 degrees too low for the successful growing of the varieties above referred to, but prefers a night temperature of 40 to 50 degrees and a day temperature of 60 degrees, and for Lady Campbell and Swanley White violets from five to ten degrees higher.

It seems to me A. B. C.'s past experience gives him a cue, and I would advise that the temperature of his houses be kept somewhat higher than that at which he has been accustomed to run them.—P. H. DORSETT, U. S. Department of Agriculture.



Home of Rose Queen of Edgely—Establishment of The Floral Exchange Inc., Edgely, Pa.

MILWAUKEE.—Christmas trade far exceeded that of former years. All good colored stock was sold out several days in advance, and the only flowers on the open market were seconds and white blooms. The sale of plants also increased largely over last season's. Wholesale prices on choice stock reached the limit on quotations sent out, and remained firm. Dealers seem well satisfied. Holly and all decorative stock was pretty well cleaned up. While grocers handled considerable holly, much of it was of inferior quality.—RASTUS.

EDWIN LONSDALE, Sec'y.

Buffalo.

Christmas Business.

As expected, plant lines led quite largely in the stores; everything commendable in flowering plants was practically sold out. On Monday the atmosphere was so mild that nearly all deliveries of plants were effected without protection. The poinsettia readily holds its own, while the Begonia Gloire de Lorraine opens up new possibilities, so nicely lending themselves to basket fixings and tissue-paper embellishments.

Cut flowers seemed to be of all classes and degrees of supply. With the delayed work of the express companies, stocks from over-night distances came very irregularly. Tuesday morning all the colored stock of any consequence was picked up clean and close; some white was in usual surplus, noticeably a few nice chrysanthemums, white roses, and Roman hyacinths and Paper White narcissus.

At the stores a wide divergence of retail selling prices was noticeable. Carnations of fair quality we saw sold as low as 75c. per dozen, while for others, only a good grade better, $1.50 per dozen was readily obtained, with $2 as top price on fancy kinds. Lily of the valley, if good, went well at $1 per dozen, and best violets at $5 per 100. The run of tea roses ranged from $2 to $5 per dozen, varying with quality. An increasing number of American Beauty in this city are disposed of at Christmas each year at fancy rates; while some hardly brought above $12 per dozen, better grades went at $18, and a number of orders for dozens were filled at $24 per dozen.

The impression gleaned was that a somewhat larger trade resulted than was ever before done here at Christmas, with decidedly the largest gains in plant lines.

An incentive to cut flowers, too, existed in several swell receptions occurring on and close to Christmas Day.

Holly and greens had their call in a very profuse way everywhere. Of the former, on Monday evening, buaches that were almost armfuls could be purchased for a nickel.

Palmer & Son cut several hundred Beauty of good quality during the five days previous to Christmas, all of reliable selling quality. Wm. Scott had some 6-foot tall poinsettias. Except in price they were a grade too high, and begged for purchasers alongside of the low pan affairs which ran short of the demand.

Rebstock ran a plant annex and made a fine show. A goodly batch of epacris and heaths proved good sellers.

In display of poinsettas and red stars, combined with colored electric-lighted tissue-paper effects, Adams had the "reddest" window in town, and a good ad. it was. S. A. Anderson reports good trade. But more to the matter, at his home a baby boy had arrived as a Christmas offering.

W. F. Kasting's home was entered by burglars Sunday evening last and silverware, jewelry and other valuables stolen. The police expect to recover the lost property.

VIDI.

CHRISTMAS TRADE.

ROCHESTER, N. Y.—We were favored with exceptionally fine weather for the Christmas trade; the temperature was just right to tempt shoppers out of doors, and the large increase in trade is partially attributable to these conditions. J. B. Keller's Sons say their trade in both plants and cut flowers increased fully 50 per cent. over last year, and the prices also showed an increase of almost that average percentage. In potted plants French daffodils and peppers sold well, as also did cyclamen, hyacinths and azaleas. There was a greater demand for violets than could be supplied, and the sale of roses and carnations came next. Poinsettias gained very largely in sales over any previous year. Salter Bros. report sales of potted plants doubled, and that the increase in the demand for cut flowers would have shown equally as large an augmentation could it have been supplied. Violets could not be had at any price in sufficient quantities. Ericas jumped into greater popularity than usual and ground pine was in excellent demand. The sale of palms, especially those in ornamental pots, also showed a large increase. In green goods for trimming there was an especially lively demand. H. E. Wilson says it was the best Christmas trade he has ever experienced. The prices were aso considerably better. Roses, chrysanthemums and carnations were the leaders in cut flowers, while begonias, azaleas and hyacinths were good sellers. He noted the liveliest possible demand for green goods, especially holly, which was shipped to this city in immense volume from the West made up into wreaths, and sold from house to house by boys who did a thriving trade. Even then it was difficult to obtain fresh, nice holly sufficient for all demands.

The E. R. Fry Florist Co. sold everything in the store and at prices that were very satisfactory. Especially was the demand brisk for carnations of the better varieties. Potted plants also received much attention, particularly azaleas, of which this house had a fairly liberal supply. Boston ferns brought good prices. The novelty of the season was wreaths of artificial galax leaves. They were very showy and, when made up tastily, strikingly attractive.—C. P. W.

ELMIRA, N. Y.—The weather was so mild and pleasant just at Christmas time that it seemed more like Easter, and both plants and flowers sold equally well. The gay poinsettia was much in demand, and even the "touchy" Begonia de Lorraine could be handled with reasonable care. (You cannot exactly call it a satisfactory "house plant," yet 'tis a lovely decoration for table and mantel, and as a hanging basket for the conservatory simply ideal).

In cut flowers carnations and violets were in extraordinary demand, with not near enough to go around. Roses sold out clean; in fact, the only surplus was in Roman hyacinths; still these were used largely to good advantage, and growing plants in pans were very salable.

Prices were reasonable all around, considering the rather short supply proportionate to demand. The quality of home-grown stock, for the most part, was O. K. Good scarlet carnations are at a premium Christmas. Gomez is the ideal crimson color and sells at sight. Christmas greens were a drug in the market, and are altogether too common for florists to handle under existing conditions. Some dealers secure all the advance orders possible, and at the last moment send in car-load lots to peddle about at any price.

There are bright prospects of reviving New Year's calls, New Year's decorations, etc. This would be good news to the florist, who recalls the good old-fashioned orders received for New Year's Day.—GROVE P. RAWSON.

NEWPORT, R. I.—The demand for cut flowers here was greater than ever before during the holidays. Carnations and violets were largely called for, especially the former; the higher prices obtained last year being fully sustained. The supply of all kinds of flowers was short. There was the usual call for berried and flowering plants in pots. Solanum capsicastrum and Ardisia crenulata were leaders, especially the former; and in flowering plants, primulas, cyclamen and azaleas were sold out. Begonia Gloire de Lorraine was offered in small lots, the smaller sized pots or pans seling most readily. Foliage plants, such as palms and ferns, went rather slowly, as also did bulbous stock in pots. Large quantities of holly and other greens were sold. The only explanation that can be given, so far as we can learn, why there was such a shortage of carnations is that owing to the extremely dry Summer many of the plants were in poor condition when benched, and have since given out entirely. Lilies for Easter with most of the growers are looking well and show no signs whatever of disease.

It was something of a novelty on Christmas evening to see a florist's place of business closed up early in the evening, being sold out—at least so far as cut flowers were concerned.—MAC.

BANGOR, ME.—Christmas trade was as good as any before experienced in this city. The weather was exceptional, not necessitating the careful wrapping that cold weather would entail. This means a saving in packing, etc., to florists in this vicinity of many hundred dollars. The volume of business done was not quite so large as in former years, but prices were better. In the line of plants, longiflorum lilies and azaleas took well. Early tulips and Chinese primroses in pots in nice bloom were among the best sellers, while evergreens, ardisins, ferns, palms, oranges, etc., found quite a ready sale. The cut flower of the day is by far the American Beauty. Introduced here only last year, it has had a great demand, bringing $18 and $20 a dozen. Other roses, such as Bon Silene, Meteor, Bride and Bridesmaid, sold well, but not in large quantities. Carnations were not in sufficient supply for the demand, bringing 75c. a dozen. Violets were very scarce; they sold at $6 per 100. As a novelty there was produced this year a fern jardiniere planted with bulbous stock in bloom. It proved a big seller. —C. BEERS.

NASHUA, N. H.—Christmas trade shows a 66 per cent. increase in volume of business done over last year. Prices were the same, there was a good supply of flowers of much better quality, and a greater demand for flowering plants, especially Begonia Gloire de Lorraine. Weather conditions were perfect.—AUGUST GAEDEKE & Co.

LEOMINSTER, MASS.—Christmas sales were about equal to those of last year. There was a better call for carnations, which sold at 50c., extra 75c., with a few dozens of higher grade, The Marquis and Mrs. George M. Bradt, at $1 per dozen. Roses were in less demand. The supply of violets was hardly sufficient to go around. In pot plants, azaleas, hyacinths, trumpet narcissus, with a limited number of poinsettias, Chinese primroses, and Erica mediterranea, found ready sale.—J. FULLER.

JAMESTOWN, N. Y.—Christmas trade was good, both in plants and cut flowers, with prices about as last year. Many more cut flowers might have been sold had they been obtainable at reasonable figures.—E. D. SPAULDING.

PITTSFIELD, MASS.—The Christmas trade was about the same as last year's, with a larger demand for cut flowers. Plants in bloom also sold well, but there was not much call for other stock. Last year the Boston fern was in good demand. Carnations were the best sellers, bringing 75c. to $1 per dozen; roses, $1.50 to $3, violets $2 to $3 per 100, and poor stock at that. There was no call for bulbous stock. Carnations received from out of town were very poor.—F. I. DRAKE.

Mrs. Theodosia B. Shepherd's New Climbing Begonia, Majorie Daw.

Begonia Marjorie Daw.

The illustration is reproduced from a picture of the original specimen of my new seedling Begonia Marjorie Daw, a cross from B. rubra by B. glaucophylla scandens. The plant possesses the vigor, strength and fine blooming qualities of B. rubra, with some general resemblances in the leaves, stem, color and texture of the flowers and in its climbing habit to B. glaucophylla scandens. It grows very rapidly, sending out long, strong shoots from the roots and innumerable side branches.

The original specimen, now about seven years old, stands in a large box, 4 feet long, 2 wide and 2 deep. It has eight main branches, three of which measure one inch in diameter one foot from the ground. The plant measures about 15 feet in height and 15 feet in width. It grows so rapidly, forming such masses of foliage, that it requires frequent trimming to allow the sunlight to shine through the branches. Twice this year at least one-fourth of the plant has been cut away without perceptibly disfiguring it.

It blooms about nine months of the year, and bears its flowers in large clusters, about 25 in a cluster. The blossoms are larger than those of B. rubra, and are an exquisite pure pink in color, with large white spots in the center of the ovary, which gradually become suffused with pink.

At the time the picture was taken the specimen was in the height of its beauty, and was adorned with 150 or more buds and blossoms. Nothing could be more beautiful than this lovely plant. It charms all who behold it.

Out of doors it grows even better than in the greenhouse, though it requires a partially shaded location. The flowers are several shades darker when grown outside. From all indications, it could be trained to grow to the second story of a house and cover a space of 20 or 30 feet. It can be cultivated as a climber or allowed to fall over the sides of large pots or boxes, making in time a most beautiful specimen.

Its perfect health, rapid growth and great beauty in flower and foliage will recommend it to all lovers of this lovely class of plants. THEODOSIA B. SHEPHERD.

Christmas Trade.

Christmas business was all that could be desired. The supply of roses, good stock, was not equal to the demand. The writer had sufficient carnations to fill all orders, William and George Murphy alone cutting over 10,000 blooms. Thomas Windram also had a good cut. Mrs. Grave, of Richmond, Ind., had a fine lot of fancy carnations that sold readily at 8c. The South Park Floral Co. came to the front with American Beauty roses, with 4-foot stems, that sold at $1 each. They were the finest roses ever seen in this market.

Plants sold well, especially Begonia Gloire de Lorraine. Palms also were largely called for. Bulbous stock went slowly. Violets were in demand, with not enough to fill all orders. Poinsettias also went well.

The weather was all sunshine up to the evening of December 24, when at about 9 o'clock it commenced to snow, and by Christmas morning the earth was white. All report a fine business, and now "a happy New Year to all."

E. G. GILLETT.

Baltimore.

Christmas Trade.

The past Christmas, from a florist's standpoint, was a busy one, and brought fair profits both to growers and dealers. The volume of trade done was a trifle over last year's. The Exchange handled a fine lot of carnations, enough to go around, and which realized from $2.50 to $5 a 100. Violets sold at from $1 to $1.50 wholesale and were disposed of as they came in. Roses, home grown, were exceedingly scarce; Philadelphia and Washington furnished the deficiency with very fine stock indeed.

The plant trade was most satisfactory; single plants and those in jardinieres and baskets were eagerly bought.

The stores were all very prettily decorated; William J. Halliday had his windows banked with poinsettias. The glow of the scarlet bracts was skilfully relieved by Christmas greens and a number of plants in baskets and vases of cut flowers. Halliday Brothers' window decoration consisted of greens and Cypripedium insigne; the very simplicity of it made it pleasing to the eye. Holly branches discreetly used to cover the pots of the orchids lent the whole the character of the season. Feast's store, different to what one is used to see here, presented not so much a Christmas decoration as an exhibition of Christmas gifts. The walls, mirrors, etc., were lavishly festooned with greens and palms. All the individual pieces and flowering plants were perfection, and many new styles and designs of jardinieres and baskets could be admired. John Cook, without any elaborate special decoration, showed fine specimens of flowering plants. Ed. A. Seidewitz as a novelty which found favor readily made a display of terra cotta imitations of rustic baskets and logs planted with green and flowering plants.

The market people did a fair business; plants were sold out at good prices, as were carnations and chrysanthemums. Greens seemed to be very plentiful; the holly crop especially has been large. The retail prices obtained for this class of green did not justify the wholesale charges. Dried flower designs sold well, as did moss wreaths. The weather was all that could be wished, Spring temperature and a few hours of sunshine.

The Maryland State Horticultural Society.

This society held its annual meeting December 20 and 21. The subjects treated were principally orchard management, marketing of fruit, vegetables, etc. Prof. L. H. Bailey gave a talk on "Modern Notions in Orchard Management." Ed. A. Seidewitz made his report on floriculture. While satisfied with the general advancement in this line and especially with the success of the Maryland florists as hybridizers, he pointed out a few defects, giving hints to amend them. To state his arguments briefly: Floriculture in Baltimore has been developed with a view to supply the retail custom of each grower, and this has led the majority of growers to cultivate a miscellaneous lot of plants. The disadvantage to the cultivator is obvious—but the home market suffers considerably by it, as comparatively few flowers are offered at wholesale, and therefore many orders that might be filled right here are sent out of town. It seems, indeed, good advice to limit one's cultures to a few specialties—in fact, two of our largest growers and retailers have found it to be the best plan. Halliday Bros. grow carnations only, and Feast nothing but roses; each of these firms has to buy daily to complete its stock of flowers.

Personal.

Prof. Johnson, State Entomologist, has resigned his post, to take up the editorial direction of the Agriculturist, and will make his residence in New York after February. His friends, in fact the whole horticultural and agricultural fraternity of Maryland, regret to lose his assistance, but wish him best success.

T. E.

Pittsburg.

Christmas Report.

The past Christmas was one of the happiest and most prosperous we have ever had; no doubt the full dinner pail caused it to be so. The flower trade was up to expectations in every way. Stock was plentiful enough, prices about as usual at the holidays, and the favorable weather helped trade considerably, also the production of flowers. Some very choice stock was handled, also some that was mighty poor, which had been held back. It was not fit for sale, and considerable of it, particularly carnations, went to sleep on the road from the grower's to the dealer.

Roses were in excellent demand and brought from $3 to $5 per dozen, costing from $15 to $20 per 100. Beauty ranged from $5 to $15 per dozen, and in a few cases a little higher. Meteor were in good demand. Carnations were plentiful; prices at wholesale were from $2.50 to $6, and higher by the dozen from 75c. up to $1.50; very few brought more. Some very fine flowers were to be seen; pink predominated; red was rather scarce. Roman hyacinths and narcissus were abundant, selling at from 75c. per dozen upward. Violets were a little short in supply, and in good demand; but prices were rather high. The stock of Harrisii lilies was limited and sold at good prices; $25 per 100 blooms, retailing at from $5 per dozen up. A few good chrysanthemums were sold at fancy values, but they were not in much demand. Mignonette went well, valley slow, poinsettias were in fair demand. Pansies sold well; a small bunch of about a dozen blooms brought 50c.

Plants went well, due to the mild weather. Blooming plants were scarce. Tulips in pans had a good call. Few begonias were to be had. Ferns, palms and other decorative plants were in good demand. Koenig of Millvale brought in some fine 12-inch pans, filled with tulips, small palms and selaginellas, which were very effective and sold readily at fancy prices.

Christmas trees were good stock this year, brought good prices, and all were sold. A few more carloads could have been disposed of at a profit. Greens were more abundant than ever before; the market was heavily overstocked, particularly with holly. Ground pine wreathing went all right at good prices, but holly wreaths and loose holly sold for what they would bring on Monday. Needle pines and Southern smilax were in fair demand. Sheet moss was scarcer than it ever was before. The quality of the holly was fair, some of it being very finely berried with good foliage, but lots of it were so poor that sales were made at 50c. the case in some instances—not enough to pay freight. Commission men handled holly heavily as well as other greens, which demoralized the market, and gave the florist little chance of making much profit.

The Christmas Business.

Although a green Christmas, there was perhaps never before such general satisfaction felt among the craft over the result of trade conditions. The weather was all that could be desired.

It was a foregone conclusion that the demand for plants would be enormous, and retailers had bought of these very heavily indeed; and to have a temperature so mild that the most delicate plants could be delivered without wrapping proved a great boon to every one concerned. Never before was there such a large demand for baskets filled with plants in variety. The shape of the basket was not considered of much importance providing the receptacle contained a nice arrangement of plants. Plain hampers, with the lids thrown back, nicely filled, proved among the best sellers. These hampers and birch bark baskets were used in largest quantities, and are, to a great exent, gradually pushing the wicker-work baskets to one side.

Begonia Gloire de Lorraine has been the most popular of all the flowering plants. Ericas have also gone exceedingly well. Ardisias, oranges, poinsettias and azaleas, when of good quality, sold out clean, while for ferns, araucarias and dracænas there was a very big demand.

Not only was the plant trade away above the average, but the cut-flower business was also extensive—very much better than has been experienced for some years. Good stock came high, but no fault was found with the high values, provided the quality was there. The time has gone by, however, when ringers can be counted among American Beauty at $1.50 apiece, or among Bridesmaid roses at 30c. each, and the sooner this fact is realized by the growers who still pursue antiquated methods, the better will it be for the cut-flower trade at Christmas time. Violets were never known to be of better color, and Bridesmaid roses and red carnations were in short supply.

Christmas trees, holly, mistletoe and wreathing had an unprecedented demand.

Among the Retailers.

Chas. Dards reports business well up to the average. Aldred & Co., did an immense trade, baskets of plants going especially well. Alex. McConnell found a large increase in both the plant and cut-flower lines, as did also Wadley & Smythe and The Gallatin Co. The Rosary bought very heavily and cleared out of everything. Scallen had the biggest business in years in both plants and flowers, and J. H. Small & Sons had a trade about double that of former years.

In the wholesale flower districts much annoyance was caused on Monday morning by the late arrival of the roses from Madison. It was almost 1 o'clock when the express wagons began to unload the boxes in 28th Street. This delay on the part of the express company, causing the shipments to be about four hours behind time, was certainly tantalizing, but could have been obviated in a great measure had the shippers sent in the roses when they were ready for market. This would have spread the consignments over four or five days, and a special car on Monday morning would not have been necessary.

There was a good demand for American Beauty, Bridesmaid, Liberty and Meteor roses, also for red carnations and violets. The top price realized for Beauty was $1.50, but no seconds could go in at that figure. The supply proved fully equal to the demand, however. The quantity of the Liberty roses thrown on the market undoubtedly affected the sale of the shorter-stemmed grades of Beauty. Liberty and Meteor sold readily, there being hardly enough to go round. The ruling values were from 50c. each down, according to quality, though a bunch of very exceptional blooms of the former from Ernst G. Asmus brought $1 each. Bride did not meet with the brisk demand experienced by Bridesmaid; of the latter rose every good flower was disposed of. Specials brought 25c. and 30c., extras 15c. to 20c., No. 1s, 8c. to 12c. No. 2s, 5c. to 6c. Where the stock had been held over and become soft and off color, the flowers were sold at any price, some going as low as $2 per 100.

Red carnations were in good demand; G. H. Crane was the best seller, and brought $12 and $15 per 100. Portia realized $6 and $8. There was a fair demand for fancy pink varieties and Mrs. George M. Bradt, and the prices ranged from 12c. to 20c. each, according to length of stem and size of flower. Prosperity brought $3 per dozen; ordinary white and pink kinds fetched from $3 to $5 per 100. Crimson varieties did not meet with such a good call.

Violets were not at all plentiful considering the increased number of plants grown over that of former years. Some flowers arrived that had been kept too long, and of course nobody wanted them at any price for store work. Good violets fetched from $1.50 to $2.50, specials $3, and they cleaned out in good shape.

Cattleyas were plentiful enough to meet the demand, and no advance over last week's prices obtained. The same remark applies to cypripediums. Roman hyacinths and Paper White narcissus were the slowest-selling flowers: $2 per 100 was considered a good price for these, many going for less.

Lily of the valley went fairly well; there was a good supply, but it cleared out nicely. Several grades were on hand. The highest price reached was $5 per 100, the shorter-stemmed stock going at $3 and $4.

Thursday business had about settled down to its ordinary form. Flowers were received only in light quantities, and while the inflated prices of Monday and Tuesday were no longer obtained, stock cleaned out in fair good shape and there was no reasonable excuse for finding fault with the trade conditions. The aftermath relative to sleepy carnations and salted roses is the only bad feature about the holiday trade. Could this practice once be eliminated, the troubles between growers and dealers at holiday times would subside.

American Beauty roses have gone down to the dollar mark for specials; Bridesmaid to 20c. and Liberty to 40c. This seems quite a drop in a few days, but New Year's Day does not count for much in the flower trade any more, and there is nothing to be gained by holding up values. As it is, the supply, while light, is just about equal to the demand, and with few exceptions stock is clearing out. Cattleyas have been quite plentiful all through the week, and 60c. has been the top figure realized for them. Lily of the valley, Roman hyacinths, narcissus and dark-colored carnations are among the stocks that are not moving satisfactorily. Cut fronds of Adiantum Farleyense are going well; as also are violets. The demand for the latter has been unusually good, probably owing to their grand color and fragrance. The excellence of the violets has been commented upon by almost every retailer. Smilax, asparagus, maidenhair fern and mignonette are not needed in any great quantity, owing to the many other seasonable greens obtainable just now. Dealers in Christmas greens are extremely well satisfied with the amount of Christmas business done. There was an excess of holly among dealers on the river front, but the quality was such that the stock could not enter into competition with the grade that the florists generally use, and we are informed that on Christmas eve cases were offered as low as 25c. each.

Jottings.

Ernst G. Asmus has been on the sick list.

President O'Mara is confined to the house through illness.

W. A. Manda, South Orange, N. J., has been ill, threatened with typhoid fever.

The Christmas plant trade was a record breaker.

Secretary Charles H. Royce, of the Eastern New York Horticultural Society, announces that the next annual meeting of that society will be held on February 13 and 14, 1901, at the rooms of the American Institute.

Best Christmas Yet.

"The best business we ever did" is the answer given by one and all of the retail florists when questioned as to the trade done at Christmas. Monday was a banner day with most of the stores, both as to cash sales and orders. Ideal weather prevailed, so that delivery was easy, no wrapping of plants being necessary.

It is difficult to say what stocks sold best; everything seemed to go well. In cut flowers American Beauty roses, of course, led, and on Tuesday morning some stores had difficulty in obtaining sufficient supplies. On Christmas morning at 5 o'clock Pennock Bros. had already used up more Beauty roses than last year and still had orders for 460 more; but every one was filled before work ceased. Mrs. Pierpont Morgan rose sold much better this year than before; one grower alone sent in 3,000 on the two days. This variety is selling better right along, no doubt due to its being grown better. Golden Gate also found many buyers. Some Liberty sold at $9 per dozen, but they all went. The Floral Exchange obtained $15 per dozen for their new rose, Queen of Edgely, against $10 for their best American Beauty.

Carnations were high, but went off well. Robert Craig & Son averaged $8 per 100 on 1,200 flowers. Many demands were made for cheaper grades, but none was to be had. Double violets were not plentiful, but evidently there was sufficient on hand.

Plant sales were very good; every plant with a few flowers on it sold readily. First on the list was Begonia Gloire de Lorraine, and as this variety has lately been much subdivided, we must place first Edwin Lonsdale's Light Pink Lorraine. Pennock Bros. say, without any hesitation, that they consider it the only variety for the retail florist. The older variety was done this year as well as it possibly could be; still it did not hold its flowers so well as the light pink sort. On Wednesday, plants of both varieties were seen side by side in another store; the Light Pink Lorraine had four to five open flowers on a stem, where the older variety had only two to three; the others had fallen.

Azaleas generally did not prove good plants for so early in the season. Mme. Van der Cruyssen was the best selling variety. Cyclamen went well, as did berried plants. Dracænas were not quite so much called for as in previous years; some of the made-up pots and pans of Dracænas terminalis and Sanderiana, with two small Boston ferns mixed in, took well.

Made-up baskets again found good sale. Joseph Kift & Son did very well with these. A little folder, tastefully gotten up, was sent out a few days ahead and no doubt did much to increase sales of these goods.

As predicted last week, a great amount of green stock was left on hand—holly, lycopodium and laurel. No doubt this can be partly accounted for by the change which many stores made in wreaths. More galax was used, also leucothœ sprays; and many wreaths were made up of a variety of evergreen sprays, with bunches of statice and cones attached. These sold very well. Some large wreaths on easels were made of magnolia leaves, and were in demand for cemetery work.

Christmas of 1900 was a good one, and has furnished food for talk for some time to come.

A Happy New Year to all.

DAVID RUST.

Providence, R. I.

A Satisfactory Christmas.

The general outcome of business for Christmas was entirely satisfactory. In some instances the quality of the flowers was a little off, showing that their stay in the cellars prior to Christmas, waiting for the big prices, was too much for them. Values never ruled higher than they did this year, and it was harder to do business, for people had to have this advance in prices explained to them before they would buy, and in many cases they did not buy gifts at the florists'.

The public here is not educated to paying from $1 up per dozen for carnations and $3 and $4 per 100 for violets, and in every case the retailer is held responsible for the increased price. More business, I think, could be done before and after the holidays were prices more uniform.

There was a good supply of everything, even to violets, which had been reported almost a failure; still there was not the quantity sold, owing to high prices. The plant trade was equal to, if not ahead of, last year's. Azaleas sold better than any other plant, notwithstanding they were soft and wholly unsuited for house culture. Next came cyclamen, primroses, Jerusalem cherries and oranges—in fact, flowering and fruited plants sold well. There was more holly than ever disposed of this year, and none left over. It was practically cleaned out Saturday night.

The weather was remarkable for this time of year; there was no snow and no frost to interfere with delivery of plants, effecting a great saving to the florists.

In the midst of all the extra business this week, there was a lot of funeral work to get out. Reports are that all the florists had more or less of it to do.

The death was announced last week of William H. Wing in this city. He was formerly in the florist business here, having a store in College Street. M. A.

Tarrytown, N. Y.

The second annual dinner of the Tarrytown Horticultural Society was held in the Florence Hotel on Thursday evening last. About 70 persons sat down to dinner, and almost two hours were spent in getting from the oysters to the ice cream. This done, President Turner called upon the newly elected officers for a few words, and each in his turn responded briefly. The election of officers for the ensuing year had been held earlier in the evening, with the following result: President, J. W. Smith; vice-president, William Scott; secretary, Thomas Cockburn; treasurer, E. W. Neubrand; recording secretary, E. Martin.

William Scott acted as toastmaster, and the balance of the night was given up to enjoyment in the form of speeches and music. Mr. Taaffe rendered some solos on the cornet, and Mr. White vocal solos. Short talks were given by W. Gomersall, Mr. Lynch, J. W. Withers, T. Withers and J. I. Donlan. Mr. Mooney gave a clever Irish sketch of the skill required by a gardener, and showed that the art of painting a piazza and building a picket fence was considered by some of the craft as essential. The Tarrytown show was mentoned by several of the speakers, and only complimentary remarks were heard thereupon, and deservedly so. The society, though only two years old, now has 95 members in good standing, and is able to put up one of the best shows in the country.

Port Chester, N. Y.

The annual meeting of the Westchester County Gardeners' Association was held Saturday evening, December 22, when the following officers were elected for 1901: President, Robert Williamson; vice-president, Andrew Grierson; treasurer, John Fraser; secretary, Edward Parker; executive committee, John Shore, William Smith, George M. Hay, William Anderson and Thomas France. It was voted to hold the annual dinner of the society in the near future. During the evening speeches were made by the retiring president, John Shore; by ex-President Peter McDonald, of the New York Gardeners' Society, who congratulated the association on its progressiveness, and by President-elect Robert Williamson, who urged the coöperation of the members in assisting him to further the interests of the society during the fifth year of its existence.

Chrysanthemums in Chicago 1900.

The chrysanthemum is still Autumn's Queen in this city and has once more told her story, which we will try in our own way to record, solely from a market point of view.

So far as one can judge, without actual statistics, the number and varieties grown and the quantity produced have not varied greatly from those of last year.

Major Bonnaffon, yellow, and Ivory, white, are still the varieties most commonly met with. Either kind is grand when at its best, and when among the smaller and cheaper flowers, is always shapely. The former this year appeared early in November and at writing the end of the first week in December, is still strongly in evidence as smaller, late blooms.

It will be a long time, with sales as good as those yet experienced, before the smaller growers will think of giving up the chrysanthemum; and the large growers, those, say, who cultivate from 20,000 to 40,000 plants each, and who complain of too low prices, show no signs yet of quitting, or even of growing a less number. There is little talk heard nowadays about the chrysanthemum season killing trade in other lines of stock. The flower comes in in its own good time, creates a boom and demand exclusively its own; fills a niche after Summer dullness, and before the Winter season for flowers fairly begins, distributing big sums of money among a very large number of growers, most of the wholesale men and every retail florist in the city.

Another feature worthy of notice is that so far the big specialists have left the chrysanthemum alone. This is in favor of the growers of mixed stock and the smaller florists generally. There is some danger and some talk, however, that the specialists, too, want a finger in the pie. Common sense would seem to point out that a short-season flower can never bear an extraordinary increased output without touching the danger line of profits—if the chrysanthemum is not already there, from a grower's point of view.

There were on the market this year fewer strictly high-grade flowers. The hot months of September and October were supposed to be responsible, in part, for this condition, especially early in the season. But is there not another reason, and that the visible falling off in the growing for, or at least exhibiting at, the flower show, and concentrating efforts on the cultivation of stock for market purposes alone? Every successful competitive flower show is a great stimulus in the production of high-grade stock and worthy of consideration along this line.

Prices this year were not greatly different from those of last, touching, for a limited number only, $4 to $5 per dozen, first on October 16 for blooms of Soleil d'October, and that simply because these were the first fine flowers to arrive; and, again, when a few dozens of Col. D. Appleton, fancy, Wanamaker, W. H. Chadwick, Golden Wedding and possibly a few others about show time made their appearance. It was, however, positive at the time that the call for extras would not have held at that price if, say, hundreds had been on the market instead of dozens. A price of $3 to $3.50 seemed the ruling rate for the best blooms, and they had to be good to bring that figure. Very good flowers, and by far the larger quantity, sold at from $1.50 to $2 down to 50c. and 75c., and even lower. Curiously enough, few of the two varieties grown most extensively—Bonnaffon and Ivory—went above $2.50; but then they were not fancy flowers when compared to the general run nowadays.

From this year's experience, except next year should turn out better, it would seem that growers will have to calculate upon the $3 limit for the bulk of the flowers sold worth talking about and from that down. There is to be recorded this year, and which can hardly be said of any other flower grown, that during the entire season practically every chrysanthemum bloom sold at some price, however poor the quality.

Last year we estimated an average price of 12c. each; it is doubtful if this figure was reached the present season. But even were 10c. the average, at the very least $100,000 worth of flowers were disposed of. The varieties best known in this market and grown in quantity were: In white, Lady Fitzwygram, Merry Monarch, Mrs. H. Robinson, Ivory, Mrs. Jerome Jones, Minnie Wanamaker, George S. Kalb, W. H. Chadwick, Merry Christmas, Fee du Champsaur and White Maud Dean. In yellow, Yellow Fitzwygram, Marion Henderson, Mrs. O. P. Bassett, Major Bonnaffon, Golden Wedding, H. W. Rieman, Yellow Queen, Modesto, Mrs. J. G. Whildin. In pink, Glory of the Pacific, Marquis de Montmort, Mrs. E. G. Hill, Mrs. Perrin, Maud Dean, Miss A. L. Dalskov, Viviand-Morel and Mrs. S. J. Murdock.

Among other kinds seen here in greater or less quantities are W. H. Lincoln, Mayflower, white and yellow, Modine, Autumn Glory, Philadelphia, Eugene Dailledouze, George W. Childs, Modesto, Mrs. Weeks, Solar Queen, Xeno, Goldmine, Australian Gold, Yellow Monarch, Lavender Queen, Mme. F. Bergmann, Black Hawk, Frank Hardy, Nyanza, Nagoya, The Queen, Nivens, H. Hurrell, Rustique, Defender, John Shrimpton and C. W. Johnson. Some of the still favorites for market purposes date pretty well back; among these, for example, are Lincoln and Wanamaker from 1890; Viviand-Morel, 1891; Childs, Ivory, Mrs. Jerome Jones, Maud Dean, 1892; Golden Wedding, Mrs. Robinson and Bonnaffon, 1893; Dailledouze, E. G. Hill, 1894; Mrs. Robinson, Rieman, Mrs. Weeks, Marion Henderson, Glory of the Pacific, 1895; Modesto, Mrs. Perrin, Pink Ivory, Yellow Monarch and George S. Kalb, 1896.

Of market pot plants there was about the same quantity grown as last year. Sales were not especially brisk. There is, however, always a notable demand in the heart of the chrysanthemum season, particularly during show week and the week following, when the papers talk up the flower. There is also a growing use of the best pot plants by the large dry goods and other stores in their window decorations. EDGAR SANDERS.

Chrysanthemums at Grand Rapids

The supply of chrysanthemums this year has been much greater than any previous season, with prices so low as to discourage so large a planting for next year. Those who were fortunate enough to have a good cut real early got good prices, but immediately after that values dropped to so ridiculously low a figure as hardly to pay the expense of cutting and shipping, to say nothing of the growing. The grade of early flowers which last year brought 8c., this season, until just before Thanksgiving, brought 1c. to 1½c. a piece. At Thanksgiving the average price obtained was about 25 per cent. less than last year.

The varieties most in demand were for early Mme. Bergmann and Glory of the Pacific. Next comes that fine large yellow, Soleil d'October; then, for mid-season, Major Bonnaffon, yellow, Ivory and Robinson, white and pink. For Thanksgiving and later, W. H. Chadwick, Western King and Jerome Jones for white; Bonnaffon and H. W. Rieman for yellow, and Murdock for pink.

Many other varieties are grown which, while they sell, have to be pushed; while such sorts as Ivory, Bonnaffon, Chadwick, Western King, Murdock, Jerome Jones and Rieman sell on sight. We do not mean to say that no other varieties well grown will not sell, but what is the use of growing a great many kinds when a few of the best would suffice? Why grow weak-necked varieties such as Carnot? At least some come that way when more than one flower is grown to a stem. Morel and Hill are apt to come too light. Take it all together, it is preferable to grow a variety that has the best color in its class, is certain to produce a good flower and is a known good seller.

Exhibitions have been dropped in this locality, simply because the public took little interest in them.

The best 12 chrysanthemums for exhibition in this locality I should judge would be W. H. Chadwick, Major Bonnaffon, Western King, Golden Wedding, Jerome Jones, Mayflower, Modesto, George W. Childs, Chito, Mme. Carnot, Helen Bloodgood, Jeannie Falconer and Murdock. In best six we have W. H. Chadwick, Golden Wedding, Bonnaffon, Chito, Western King, Mayflower. For best vase of yellow, Bonnaffon; white, W. H. Chadwick; pink, Murdock; red, George W. Childs; bronze, Hicks Arnold. Six specimen plants: L. Canning, Mrs. Perrin, The Queen, George S. Conover, The Bard and Miss M. Johnson. Three specimen plants: The Bard, L. Canning and George S. Conover. One specimen plant: L. Canning.

Best 12, if of one variety: Mrs. Robinson or Bonnaffon; if 12 varieties: Mrs. Robinson, Bonnaffon, Jeannie Falconer, Solar Queen, Mrs. Perrin, Mayflower, Charles Davis, Mutual Friend, Western King and Mrs. Reynolds, all of which can be grown under two feet in 6-inch pots.

GEO. F. CRABB.

The Water Garden

BY WILLIAM TRICKER.

This work contains nine beautiful plates, eighteen full page descriptive views of leading Water Gardens and Ponds, and numerous smaller pictures prepared with special reference to this work. On heavy enamelled paper. Elegantly bound. Large octavo.

PRICE, $2.00.

The text describes all operations from the growing of plants in tubs to the large water garden, excavation of grounds, construction of ponds, adapting natural streams, planting, hybridizing, seed saving, propagation, the aquatic house, wintering, correct designing and planting of banks and margins, and all other necessary details. Prospectus and Reviews free on application.

Plant Culture

NOW READY FOR DELIVERY.

FIRST ADVERTISED AS

COMMERCIAL PLANTS

THEIR PROPAGATION AND CULTURE.

BY GEORGE W. OLIVER, PROPAGATOR TO THE U. S. BOTANIC GARDEN, WASHINGTON, D.C. AND LATE OF THE ROYAL BOTANIC GARDEN, EDINBURGH.

A working Hand Book of Every-day Practice for the Florist or Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experiences of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include **Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines,** and a chapter on miscellaneous subjects in connection with the above.

This reliable cultural book has been gotten up for use not ornament, therefore the price has been fixed at a figure within the reach of all, while it contains more real practical information for those for whom it is intended than is to be found in much more pretentious works costing ten and twenty times as much money. Strongly bound to stand rough handling and plenty of it. **Price, $1.00 by mail, postpaid.**

A. T. DE LA MARE PTG. & PUB. CO., Ltd., 2 to 8 Duane St., N. Y.

COMMERCIAL VIOLET CULTURE

A Treatise on the Growing and Marketing of Violets for Profit.

By B. T. GALLOWAY,
Chief of the Division of Vegetable Physiology and Pathology, U. S. Dept. of Agriculture.

THE WORK IS THOROUGHLY PRACTICAL AND DISCUSSES FULLY:

Varieties and their Origin.
Localities where the Crop is likely to Prove Profitable.
Requirements for Success.
Construction of Houses and Frames.
Manures and Fertilizers. Heating Houses and Frames.
Picking, Bunching and Marketing. Soils and their Preparation.
Propagation, Selection, Planting, Watering, Cleaning and Feeding.
Diseases and their Treatment.
Insect Enemies and Methods of Combating Them.
Cost of Producing the Crop. Profits, Etc.

Superbly illustrated with upward of 60 plates, plans and diagrams, etc.

Including Working Drawings of Model Violet Houses; Plans for Complete Heating Systems; Photographs Showing Methods of Handling Soil, Preparing the Beds, Bunching the Flowers, Packing for Shipment, Etc. Numerous illustrations showing the character of the more important diseases are also given.

Elegantly printed on heavy woodcut paper, and bound in flexible covers of royal purple cloth and gold; 224 pages, small octavo. Price, postpaid, $1.50.

A. T. DE LA MARE PTG. & PUB. CO., Ltd., 2 DUANE STREET NEW YORK.

Success with House Plants

BY LIZZIE PAGE HILLHOUSE.

A complete text-book and guide to the care, cultivation and propagation of all plants in the garden and the home.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

12mo., 232 pp.; profusely illustrated, with complete and ready reference index to all plants enumerated. Price, Cloth, $1.00; Paper, 50 cents.

To Retail Florists. The old thought, that it was dangerous for a customer to know much about the care of plants, has passed away, being superseded by the newer and more intelligent one, viz.: that the more successful a customer is with plants, the greater quantity will he or she buy.

We offer Special Inducements to all who wish to handle this book. It is a good seller.

FOR PARTICULARS, ADDRESS

A. T. DE LA MARE PTG. AND PUB. CO. Ltd., 2 to 8 Duane Street, New York.

Residential Sites and Environments

By JOSEPH FORSYTH JOHNSON.

IN THREE PARTS:

Superbly printed, in new clear type, on the finest wood cut paper.

THE FLORISTS' EXCHANGE, 2 to 8 Duane Street, New York.

Cyclopedia of American Horticulture

THIS great work comprises directions for the cultivation of horticultural crops and original descriptions of all the species of Fruits, Vegetables, Flowers, and ornamental plants known to be in the market in the United States and Canada.

BY L. H. BAILEY, OF CORNELL UNIVERSITY, ASSISTED BY WILHELM MILLER AND MANY EXPERT CULTIVATORS AND BOTANISTS.

In Four Quarto Volumes. Illustrated With Over 2000 Original Engravings.

VOLUME ONE (A TO D, 509 PAGES, 743 ILLUSTRATIONS 9 PLATES) IS NOW READY FOR DELIVERY.

THOUGH distinctly an American work, not only plants indigenous to the North American continent are mentioned, but also all the species known to be in the horticultural trade in North America, of whatever origin. It is really a survey of the cultivated plants of the world.

The chief characteristics of this great work are comprised in our describing its source, scope, and general features. It is **AUTHORITATIVE** since its contributors are the best specialists in America, and there will be at least 5000 signed contributions from the best-known horticulturists, cultivators, and botanists in this country and in Europe. It is also most **COMPREHENSIVE** in that it presents for the first time in carefully arranged and perfectly accessible form the best knowledge of the best specialists upon greenhouse and garden practice, fruit growing, vegetable culture, forestry and the like. It is moreover fresh, entirely **ORIGINAL**; not a rehash of old material, old cuts, etc. The articles are specially prepared and illustrated for this work alone; while the trained botanist discusses the botanical features of the important commercial plants, practical cultivators submit observations on their culture, marketing, and the like, so that the reader has before him the very best practice in the most favorable localities for the perfection of any fruit, vegetable, or economic plant. The arrangement is very systematic, clear and convenient for ready reference.

THE CYCLOPEDIA is to be completed in four handsome quarto volumes, embracing about 2000 pages, with more than that number of original illustrations. It is carefully printed upon specially made paper of a permanent character, and the work will be completed this year.

This book is sold only by subscription, and orders will be accepted for the full set only. For terms of subscription and all further information, address

Chicago.

Christmas Trade.

Up to the Saturday preceding Christmas almost perfect weather was experienced, to the delight of the florists. Saturday and Sunday there came a small blizzard, with rain and flurries of snow. Monday opened up better, with no indications of extreme cold. So far we have had but little Winter weather in this locality.

At this writing we cannot fully tell the story of the Christmas trade, particularly with respect to the retail men. The wholesalers have had all they could attend to. The only question with them was the securing of the right grades for their fancy trade and out-of-town orders. Shipping trade began Thursday, continuing through Friday, Saturday and Sunday and even until Monday. Home buyers held off somewhat until Saturday and Monday, which is always true of the outlying retail florists, who are in hope of picking up bargains, as the business coming their way is of the cheap order.

In roses, stock on the whole was not up to the usual high standard except, perhaps, American Beauty, which were good, fairly plentiful, and for which there was a brisk demand. The supply of Bride and Bridesmaid was below the call, especially of good, clean, fresh stock. For extra fancies prices were well maintained, and it did not take a particularly high grade to fill the bill. For old stock, and that otherwise of poor quality, shippers will not get very satisfactory returns. Meteor were none too plentiful; of Liberty, none was showing in the open market. Obtainable supplies of the latter and of Marquis de Litta are sent direct on order. In carnations, whites were least called for, all good pinks and red cleared off, a few fancy Mrs. Thomas W. Lawson, at Bassett & Washburn's, with stems rather short, but flowers grand, brought $18 per 100. Mrs. Frances Joost is now coming in of much better quality. Indeed, carnation stock generally is improving.

Chrysanthemums, of which few were in the market, brought for the best $3 per dozen; there was but a limited quantity of this grade, however.

A few sweet peas were in, also lilies; the latter sold readily at $3 per dozen.

Of violets there was no great stock, the best quality selling at $3 to $4; common at $2. Poinsettias were scarce and many sold out of them before the holidays at $3 to $4 per dozen. Plenty of Romans and Paper White narcissus were on hand; some of these may be left over. Valley was none too plentiful and had a good call.

Greens at first hands were well cleared out. Lycopodium touched 15c. per pound. Of holly but little was left, an immense quantity being sold. Mistletoe was in good demand. There was a big sale of Christmas trees.

Of the plant trade we cannot speak until next week. Begonia Gloire de Lorraine cut quite a figure this year. A few heaths, some good primulas of both sinensis and the improved obconica varieties were in evidence. Azaleas were not very plentiful, those in flower meeting with good sales.

Birch baskets in a number of designs were seen in large quantities.

Round About.

John Zeck, the past week, lost a fine boy, who died of scarlet fever.

George Stollery was presented on the 17th with another son; mother and baby are doing nicely.

James Hartshorne has named a delicate pink carnation after the writer. The variety has the true fragrance of the old clove pink. Ess.
