Notice to the Reader

The information in this Supplement is organized and presented exactly as in the main volumes of TL-2, and as explained in the Introduction to Volume 1. For quick visual orientation, the reader may also refer to the commented blueprint sample pages that appear inside the cover boards of Volumes 1-7, not again reproduced here. A full, cumulated list of abbreviations used throughout TL-2 can be found in Volume 7 (pp. xxv-lvi).

The asterisk (*) denotes names of authors already treated in Volume 1 of TL-2. For such authors, information under the headings "Herbarium and Types", "Bibliography and Biography", as well as in the "Biofile" (see TL-2, Vol. 4: vii), is complete, while other data are complementary to those in the main volume.

Note: The history of Berg’s *Handbuch der pharmaceutischen Botanik* is involved. We had no opportunity to deal with all editions and secondary works such as *Pharmaceutische Waarenkunde* and *Pharmaceutische Botanik*. These books came out in various editions, in part as subtitles of the *Handbuch*. The books contain rich details also for plant taxonomy.

21.164. *Florule bryologique de la Nouvelle-Calédonie ...* Extrait des Annales des Sciences naturelles ... 1873. Oct.

Publ.: 1873, p. [1]-62, *pl. 1* (repr. from Bull. Soc. bot. France 20: *pl. 1*. 1873 to which Bescherelle refers on p. 50). *Copies:* G, U. – Reprinted and to be cited from Ann. Sci. nat. Bot. ser. 5. 18(3): 184-245. 1873. – The number of copies of this reprint was probably very restricted: E. Bescherelle sent a proof-sheet copy with journal pagination to Schiffner in Berlin with a blank cover on which the author had written a dedication. A second set of proof-sheets were sent to T. Husnot (1877). This constitutes pre-publication of which the precise date is unknown.

Index to Titles

Each book or paper treated in the foregoing text has been assigned a number printed in bold face; these are given in this index at the end of each entry. Because both short titles (the first significant words of the full title) and abbreviations of short titles are given, this index includes both. The initial definite and indefinite articles are omitted from titles. The unabbreviated short titles are alphabetized word by word, but abbreviated ones are treated as if they were single words with the omission of punctuation and spaces.

If a title is mentioned under two numbers, both are given in this index. Since the same title, at least in its short form, may have been used by two or more authors, each entry includes the name of the author in the form recommended at the end of the first paragraph of the section treating him.

Titles of exsiccata are included, printed in italics, and titles of journals taken from the surname of botanists are printed in capital letters. Both kinds of entry include, in parentheses, the surname concerned preceded by the initials of his first name with the word *see* in italics.

In addition there are three less frequently encountered kinds of references which should be identified and explained:

(1) When a second title of the same author is mentioned in the treatment of a book or paper, the index entry for the former refers to the number of the latter.

(2) It sometimes happens that in the treatment of one book or paper by author A, the title of a book or paper by author B is mentioned; this situation is indicated in the index by parenthetically instructing the user to *see* the number assigned to A's title.

(3) Similarly a book or paper by author B may be mentioned under the author A in paragraphs other than those describing his titles; this is indicated by the index-notation "*see* author A".

Index to Names

This index contains the names of authors, collectors, botanical explorers, patrons of botanists, botanical artists, and other collaborators, as well as personal surnames that have been immortalized in names of genera. The names of ships that carried exploring expeditions to remote parts of the world are included in this index too, because the user may only remember that much of the subsequent reports of the trip.

There are, however, a number of explanations and cautions:

(1) The abbreviations of author names are included in the index when they are really abbreviations, i.e. some letters or at least the initials of the first name(s) have been dropped. Such abbreviations are in *italics* and alphabetized as if they were complete words, including one or more initials, with the omission of punctuation and spaces. In this index the initials follow the abbreviation even though the abbreviation in the text is preceded by the initials.

(2) Names beginning with “Mc”, or “Mac” are treated as if spelled “Mac” in combination with the rest of the name as one word (e.g. McDougall).

(3) Similarly, double names, whether hyphenated or not, names beginning with “Da”, “De”, “Des”, “Do”, “Du”, “La”, “Le”, etc. are alphabetized as if they were one word under the first letter of the word (“Candolle” for “de Candolle” is one of the several exceptions where established usage is not conform to this convention). The same holds for Flemish and American names that begin with “Van”. If there is chance of confusion in locating such names, the index lists also the last part of the names under the appropriate letter. Hyphenated double names are not, however, cross-referenced under the last part.

(4) Names of authors of publications cited in the biography/bibliography sections are omitted from this index.

(5) “Beccari, O. 20.510-20.552” (*italic number*) refers to that part of the text just preceding the treatment of the title numbers 20.510-20.552. “Beccari, O. 21.661” (*roman number*) means there is a reference to O. Beccari in the information concerning title 21.661, which is by an author other than O. Beccari. “Hooker, J.D. *see* Beccari, O.” indicates mention of J.D. Hooker in the author paragraphs under O. Beccari.

(6) An author’s name with the notation “(*alph.*)” indicates a person who is included in the text for some reason but who did not publish items treated in this supplement (“Bourgeau, E. (*alph.*)”).

(7) The notation *v.* is used to connect the abbreviation of a personal name with the name in full to explain the meaning of the abbreviation. It is also used as a means of cross-referencing double names, maiden names of married botanists who have published under both names, and names of authors who have used more than one name for their publications. Finally, when a name is frequently used with initial(s) differing from the correct one(s), or in case of different spellings of a name, *v.* is used to connect the various versions of the name.
