AN ILLUSTRATED  
DICTIONARY OF MEDICINE  
BIOLOGY  
AND ALLIED SCIENCES

---

GOULD

FOR INDEX OF SPECIAL TABLES AND  
IMPORTANT DEFINITIONS, CLASSIFYING LARGE  
NUMBERS OF FACTS. SEE PAGE XVI.

*From The Practitioner, London, August, 1895.*

"The language of medicine changes so quickly with the advance of knowledge that for practitioners who wish to keep fairly abreast of scientific progress a good medical dictionary is not so much a luxury as a necessity of intellectual life. Dr. George M. Gould, who is one of the leading ophthalmic surgeons in the United States, and editor of the *Medical News*, has in the work before us presented the profession with the completest lexicon of medical terminology that exists in the English language. . . . Dr. Gould has done for our medical language what Dr. Murray is doing for the mother tongue of English-speaking peoples. It need only be added that the work is printed in a clear type that bears witness to the careful regard of the author, as an ophthalmologist, for the reader's eyes, and is 'got up' in a style sufficiently handsome to make it an ornament to the book shelf and strong enough to withstand wear and tear of daily use."

# AN ILLUSTRATED DICTIONARY OF MEDICINE BIOLOGY AND ALLIED SCIENCES

INCLUDING THE  
PRONUNCIATION, ACCENTUATION, DERIVATION, AND DEFINITION  
OF THE TERMS USED IN

MEDICINE, ANATOMY, SURGERY, OBSTETRICS, GYNECOLOGY, THERAPEUTICS, MATERIA MEDICA,  
PATHOLOGY, DERMATOLOGY, PEDIATRICS, OPHTHALMOLOGY, OTOLOGY, LARYN-  
GOLOGY, PHYSIOLOGY, NEUROLOGY, HISTOLOGY, TOXICOLOGY, DIETETICS,  
LEGAL MEDICINE, PSYCHOLOGY, CLIMATOLOGY, ETC., ETC.

AND THE  
VARIOUS SCIENCES CLOSELY RELATED TO MEDICINE  
BACTERIOLOGY, PARASITOLOGY, MICROSCOPY, BOTANY, ZOÖLOGY, DENTISTRY, PHARMACY,  
CHEMISTRY, HYGIENE, ELECTRICITY, VETERINARY MEDICINE, ETC.

BY  
GEORGE M. GOULD, A.M., M.D.

AUTHOR OF "THE STUDENT'S MEDICAL DICTIONARY," "12,000 MEDICAL WORDS PRONOUNCED AND  
DEFINED," "THE MEANING AND THE METHOD OF LIFE;" EDITOR OF "THE MEDICAL  
NEWS," PRESIDENT, 1893-1894, AMERICAN ACADEMY OF MEDICINE; LATE  
ONE OF THE OPHTHALMOLOGISTS OF THE PHILADELPHIA HOSPITAL

BASED UPON RECENT SCIENTIFIC LITERATURE

# PREFACE.

IN this work I have conscientiously endeavored to give the greatest possible amount of lexicographic and encyclopedic knowledge within the limits of a single volume, condensed as much as is consistent with clearness, and so arranged as to furnish the student and worker with concise, accurate, and useful definitions.

I have tried to satisfy the following specific desiderata:—

1. The inclusion of the many thousands of new words and terms that have been introduced into medicine during the last few years, marked as they have been by unparalleled scientific activity and progress. To this end an almost countless number of volumes and periodicals have been systematically gleaned by myself and a tireless corps of friends and assistants. Not to have met this important and pressing need would have made this volume a work of mere inexcusable compilation and copying from the many word-books already published, instead of a fresh gathering from the living literature of the day.

2. To give the most compact epitomization of the works of older and authoritative lexicographers, including all such obsolete or obsolescent terms as may be met with in the medical encyclopedias or handbooks likely to be used by a modern student.

3. To include all the more commonly-used terms of biology—a thing highly desirable ; *a.* Because of the modern recognition of the great truth that general biologic science is the foundation of genuine and progressive medical science ; *b.* Because the best schools of medicine are more and more urging or making obligatory the preliminary biologic course of study ; and *c.* Because, so far as I know, no satisfactory lexicon of biology exists in English.

4. Keeping the size and purpose of the book well in view, to give it an encyclopedic character—not only by supplying the usual pronunciation, derivation, and definition of words, but also by showing their logical relations, their bearings, and their practical importance for the worker in literary or clinical medicine. This aim will explain a number of peculiar features, as for instance, the large number of tables, whereby at a glance one may catch the correlations of a single fact with many others, and thus at once classify and crystallize his comprehension of them. It seems deserving of mention that in modern literature there is not to be found as complete and digested a *résumé* of surgical operations, of bacteriology, of parasitology, of tests, and of many other subjects, as is here furnished.

5. When advisable, to give a pictorial illustration that would tell what words could not make clear. Hence, those who find the work helpful in this respect will thank the publishers for the generous supply of illustrations, a large number being new engravings from original drawings made expressly for this work. Conservatism in this respect, however difficult, has been the rule, because pictures, for example of surgical instruments, are plenteous and to be had for the asking, and because illustrations that are useless, or that do not illustrate, might possibly have made the book superficially more attractive, but would certainly have given ground for just criticism. Besides the large number of original illustrations first presented in this volume, many have been taken or adapted from the well-known and authoritative works of Sappey, Landois, Ziegler, Piersol, Stirling, Woodhead, Holden, Tyson, Fullerton, and others.

6. As regards orthography, to do what Professor Whitney, in the preface to his great work, *The Century Dictionary*, says is the duty of the dictionary-maker :—

“The language is struggling toward a more consistent and phonetic spelling, and it is proper in disputed and doubtful cases to cast the influence of the dictionary in favor of this movement, both by its own usage in the body of the text, and at the head of articles by the order of forms, or by the selection of the form under which the word shall be treated.”

More than this I have not attempted to do, and not to have done this much would have been distinctly wrong. The lexicographer may not impose or command, but in the interest of true and prudent progress he may suggest and advise. Both spellings are noted of words in dispute, and one is of course at liberty to accept that which he thinks best. Those who prefer to follow the older practice have against them all the best philologists, such authorities as Professor Whitney, Professor Skeat, the editors of the *Standard*, and of other great Dictionaries. Gradual, careful phonetic progress is a duty we all owe to our profession.

I have usually recommended that in medicine the diphthongs *æ* and *œ* be supplanted by *e*; such usage is already well established as regards many words, and the suggestion is in strict harmony with etymology and the spirit of the language. We do not spell such words as *gangræne*, *æther*, *æconomy*, *æternal*, *pænalty*, *mediæval*, *solecism*, *primæval*, as here written, and the redundant diphthong should not be retained in *diarrhæa*, *hæmorrhage*, *œdema*, *cæliotomy*, *pædiatric*, etc. Why is the change right in one instance and wrong in the other?

In the spelling of certain chemic words, the advice of The American Association for the Advancement of Science has, as a rule, been followed, and seems to be in the line of cautious and wise progress. The unanimous acceptance and practice of all these recommendations by the American Medical Editors' Association constitute a gratifying proof of progressiveness and freedom from irrational prejudice.

7. To indicate the best pronunciation of words by the simplest and most easily understood phonetic method. The plan I have used is simple and little liable to mistaking. The syllabification has no significance except to show the pronunciation, and in this the natural English common usage and power of letters are followed. Thus, in all but a few instances, the use of diacritic marks and vexatious signs or symbols is avoided. When a vowel stands alone or at the end of a syllable it has its natural long sound: *a*, as in *male*; *e*, as in *mete*; *i*, as in *mile*; *o*, as in *mole*; *u*, as in *mule*; when preceding, or between, consonants, the vowels have their natural short sounds, unless occasionally the use of the diacritic mark gives them the long sound, as *āt* (*ate*), *ōs* (*ose*), *īt* (*ite*). In a few instances the sign, *˘* has been used over *a*, as in *marriage*, to distinguish the sound from that of *a*, as in *harm*. When *a* has the sound of *ah*, it has generally been written *ah*. In such words as *cystotomy*, *acidity*, and the like, the pronunciation of the final vowel-sound is indicated by *e*, as being the simplest representation of the common sound not otherwise easily expressed phonetically. When *s* has the sound of *z* it is indicated by *z*. The pronunciation of some foreign words has been approximated by devices readily comprehended.

It is impossible to adequately express my deep sense of gratitude to those who have aided me in the preparation and proof-reading of this volume. Dr. C. W. Greene, the experienced philologist, also Dr. W. A. N. Dorland, Professor Charles S. Dolley, Dr. A. A. Eshner, and Professor Burt G. Wilder, have been most self-sacrificing, and to their scientific zeal, literary experience, and tireless good-will those who find the book useful will be indebted. To Dr. Dolley, the well-known biologist, belongs unstinted praise for the preparation of the definitions of biologic terms, the table of Bacteria, and that of Parasites, as well as for a number of

original drawings. Intelligence, learning, and never-failing conscientiousness have been given almost every line of the work by Drs. Dorland and Eshner. The same is true of the work of Dr. David Riesman.

It seems almost wrong to mention in a second order the names of Professor S. H. Gage, Professor Henry Leffmann, Dr. A. C. Wood, Dr. Alfred Stengel, Professor A. P. Brubaker, Dr. J. Chalmers Da Costa, Dr. A. H. Cleveland, Mr. Ryland W. Greene, Dr. J. Hendrie Lloyd, Mr. Pierre A. Fish, Dr. D. Bevan, Dr. Emma Billstein, Dr. S. McClintock Hamill, Dr. A. H. Stewart, and others.

Every author well knows, or perhaps regrets that he does not know, the blessing of a publisher and of a printer who take pride in their work above and beyond the question of dollars and cents. Such a publisher and such a printer I have had.

The acceptability of the smaller dictionaries I have offered the profession (something like twenty-five thousand copies having been distributed) leads me to hope that the present more complete work will find a wider range of usefulness.

GEORGE M. GOULD.

PHILADELPHIA, *April, 1894.*

---

## PREFACE TO THE THIRD EDITION.

The rapid exhaustion of the first and second editions of this dictionary permits me to correct a number of typographic and other errors, to modify some definitions, and to add new material throughout the entire extent of the book. I have profited by the kind criticisms of friends and of reviewers, and such suggestions as seemed to me just have been accepted and embodied in the work. In science, and especially in the science of medicine, what was true yesterday may be only half-true to-day, and may even be wholly untrue to-morrow. Old knowledge is constantly undergoing modification, and new knowledge is as constantly appearing, so that it is only by constant changes that a book seeking to reflect the condition and growth of a science can from day to day remain a perfect mirror of its progress.

The most outspoken words of praise in reviews, notices, private letters, etc., as also the exhaustion in so short a time of two large editions, give evidence that the volume has found a certain field of usefulness, and, personally, nothing can be more gratifying than the assurance that one has been of distinct service to his profession and to his fellows.

GEORGE M. GOULD.

PHILADELPHIA, *September, 1895.*

| <i>C. O. C.</i> . . . . .        | Cathodal Opening Contraction.   | <i>V. M.</i> . . . . .      | Volt-meter.  |
| <i>C. S.</i> . . . . .           | Current-strength.   | <i>W.</i> . . . . .         | Work; Weight; Watt                                   |
| <i>D.</i> . . . . .              | Duration; Density.  | <i>Z.</i> . . . . .         | Contraction (Zuckung).                               |
| <i>De. R.</i> . . . . .          | Reaction of Degeneration.   | <i>Z. Z.' Z."</i> . . . . . | Increasing Strengths of Contraction.                 |
| <i>E.</i> . . . . .              | Earth; Electromotive Force.   | $\kappa$ . . . . .          | Magnetic Susceptibility.                             |
| <i>E. M. D. P.</i> . . . . .     | Electromotive Difference of Potential.                                    | $\mu$ . . . . .             | Magnetic Permeability.                               |
| <i>E. M. F.</i> . . . . .        | Electromotive Force.  | $\omega$ . . . . .          | Ohm.   |
| <i>F. M.</i> . . . . .           | Field Magnet.   | $\rho$ . . . . .            | Specific Resistance.                                 |
| <i>H.</i> . . . . .              | Horizontal Intensity of the Earth's Magnetism; One Unit of Self-induction | $\Omega$ . . . . .          | Megohm (one-millionth part of an ohm).               |
| <i>H.</i> . . . . .              | Intensity of Magnetic Force.  | $\pm$ . . . . .             | Battery.   |
| <i>I.</i> . . . . .              | Intensity of Magnetism.   | <i>+</i> . . . . .          | Anode or Positive Pole.                              |
| <i>J.</i> . . . . .              | Joule.  | <i>-</i> . . . . .          | Kathode or Negative Pole.                            |
| <i>K.</i> . . . . .              | Electrostatic Capacity.   | <i>&gt;</i> . . . . .       | Greater than, as $K > A$ .                           |
| <i>K.</i> . . . . .              | Kathode   | <i>&lt;</i> . . . . .       | Less than.   |

## PREFIXES AND SUFFIXES USED IN CHEMISTRY.

**Am-** indicates the group  $\text{NH}_2$ .  
**Azo-, diazo-, and hydrazo-** indicate compounds in which nitrogen atoms are linked in various ways.  
**Di-** is applied as a prefix to signify *two*.  
**Im-** indicates the group  $\text{NH}$ .  
**Ket-** indicates the molecule  $\text{CO}$  in certain structural relations.  
**Mon-** is employed as a prefix to signify *one*.  
**Nitro-** indicates the group  $\text{NO}_2$ .  
**Pent-** is applied as a prefix to signify *five*.  
**per-** denotes in a rather vague sense an indefinitely large amount of the body to which it is prefixed, or to which it is referred.  
**Sesqui-** indicates the proportion of *two* to *three*.  
**Sub-** is employed in a rather vague sense to indicate deficiency of the body to which it is prefixed.  
**Tetr-** is applied as a prefix to signify *four*.  
**Thio-** indicates sulphur, especially replacing oxygen.  
**Tri-** (sometimes "*ter-*") is applied as a prefix to signify *three*.  
**-al** indicates aldehydic structure.  
**-an** is applied to a class of bodies related to the starch and sugar group.  
**-ane** indicates a saturated hydrocarbon.  
**-ase** indicates an enzyme, or non-organized ferment, *e. g.*, diastase.

This termination is at present restricted generally to enzymes of vegetable origin, but it should also be used with animal enzymes—which, however, usually end in "*in*." It would thus be better to say *pepsase* and *trypcase*, rather than *pepsin* and *trypsin*.

**-ate.** A suffix to nouns in chemistry signifying any salt formed by an acid acting on a base; *e. g.*, *sulphate*, *phosphate*.  
**-ic** denotes the higher of two valencies assumed by an element, and incidentally in many cases a larger amount of oxygen.

**-in** is of no precise significance, and is mostly applied to bodies the structure of which is not yet known.

**-yl, -ene, -enyl, and -ine** indicate hydrocarbons. According to the American system of orthography, the only case in which "*in*" is used is as a termination for a series of hydrocarbons, beginning with Ethine,  $\text{C}_2\text{H}_2$ . English writers and some American chemists use it to signify basic properties, regarding *-in* as the proper term for non-basic bodies. They thus distinguish between salicin, which forms no salts with acids, and morphin (which under such system is spelled "morphine"), which does. It must be noted that such methods are not in accordance with the tendency of modern chemist nomenclature, which seeks to express structure, not properties. The organic bases

or alkaloids are not all of the same type, and when their structure is elucidated systematic names will be found for them. Until then there is no particular gain in indicating them as a group.

-id is similar to "in."

-ol indicates alcoholic structure, *i. e.*, presence of the group HO (hydroxyl), *e. g.*, alcohol, glycerol, phenol.

-one is applied to bodies related to the starches and sugars. It is, however, not used with this significance in "pep-

tone," which word is not formed according to any established system.

-ose indicates a carbohydrate, *e. g.*, glucose, although it is also occasionally applied to the results of digestion of proteids, *e. g.*, albumose.

-ous denotes the lower of two degrees of valency assumed by an element and incidentally indicates, in many cases, a small amount of oxygen.

The word *sulphonic* indicates the group  $\text{HSO}_3$ .

## ABBREVIATIONS USED IN HYGIENE AND SANITARY LAW.

| " | Lines; each one-twelfth of an inch, or about two millimeters.   |
| 1 | A mark of affirmation or authentication.  |
| ? | A mark of doubt.  |
| - | Figures or words separated by a short dash indicate the extremes of variation, as 5-10" long, few-many flowered; <i>i. e.</i> , varying from 5 to 10 lines in length, and with few to many flowers. |

|      |                   |
|------|-------------------|
| c.c. | Cubic centimeter. |
| cm.  | Centimeter.       |
| mm.  | Millimeter.       |

|   |   |
|---|---|
| μ | The Micron, Micromillimeter, or unit of Microscopic Measurement. For convenience of reference, the following table of comparative measurements is given:— |
|---|---|

| μ | Inches   | μ  | Inches   | Inches | μ        |
|---|----------|----|----------|--------|----------|
| 1 | 0.000039 | 6  | 0.000236 | 1      | 2.5399   |
| 2 | 0.000079 | 7  | 0.000279 | 1      | 25.3997  |
| 3 | 0.000118 | 8  | 0.000315 | 1      | 253.9972 |
| 4 | 0.000157 | 9  | 0.000354 | 1      | 2539.972 |
| 5 | 0.000197 | 10 | 0.000394 | 1      | 25399.72 |

One Meter = 39 370/432 in.

|   |  |
|---|--|
| X | Used to express magnification, thus X 1000 indicates a magnification of 1000 diameters. The improper fraction $\frac{1}{1000}$ indicates the same thing, but is rarely used. |
|---|--|

|   |   |
|---|---|
| ① | An annual Herb.                         |
| ② | A biennial Herb.                        |
| ⌈ | A perennial Herb.                       |
| ⌋ | An Undershrub, deciduous.               |
| ⌋ | An Undershrub, evergreen.               |
| ⌋ | A Shrub, deciduous.                     |
| ⌋ | A Shrub, evergreen.                     |
| ⌋ | A Tree, deciduous.                      |
| ⌋ | A Tree, evergreen.                      |
| ⌋ | An herbaceous Vine, annual or biennial. |
| ⌋ | A woody Vine, deciduous.                |
| ⌋ | A woody Vine, evergreen.                |
| ⌋ | A trailing Herb, annual or biennial.    |
| ⌋ | A trailing Herb, perennial.             |
| ⌋ | An aquatic plant.                       |
| ⌋ | Flowers perfect.                        |

- ♂ . . . . . A male animal, or a plant or flower bearing only stamens or antheridia.  
 ♀ . . . . . A female animal or a plant or flower bearing only pistils or archegonia.  
 ○ . . . . . A young animal of undetermined sex, thus ♂<sub>o</sub>, young male, or ♀<sub>y</sub> for young female, but ○<sub>yw</sub> (*juvenis*, young).  
 ⊙ . . . . . A monocarpic plant.  
 ⊖ . . . . . Cotyledons accumbent.  
 ⊕ . . . . . Cotyledons incumbent.  
 ⚥ . . . . . A plant introduced and naturalized.  
 ⚭ . . . . . A plant cultivated for ornament.  
 ⚮ . . . . . A plant cultivated for use.  
 8 . . . . . Monocious.  
 ♂ ♀ . . . . . Diecious.  
 ♂ ♀ ♀ . . . . . Polygamus.  
 ∞ . . . . . Wanting or none.  
 ∞ . . . . . Numerous or indefinite; more than twenty when applied to stamens.  
 σ . . . . . The microsecond represents .001 second or the unit of time in experiments or psychophysical reactions.

Authors' names are abbreviated in the following manner:—

Ait., Aiton. Bech., Bechstein. Cham., Chamisso. Dum., Duméril, etc.

Nupt, signifies in ornithology, breeding plumage.

hornot, means a bird of the year.

-aceæ, a suffix used in botany to designate a family, the name chosen being one of the principal genera. Ex., *Rosa*, *Rosaceæ*, *Ranunculus*, *Ranunculaceæ*. Cf., *iceæ*, *ideæ*, *ineæ*, *ecæ*.

-ana, preferably used as a suffix to the name of a species around which others naturally cluster, in the naming of subsections or groups of species; e.g., the group of species of *Helix* related to *H. pomatia* may be indicated by the term *Pomatiana*.

-ensis, a termination given to the names of species only when derived from the name of their habitat; e.g., *Tænia madagascariensis*, *Daphne chinensis*, *Dracæna brasiliensis*.

Eu-, employed as a prefix in forming the names of genera, subgenera, or sections of genera before a Greek derivative.

Excl. gen., exclusit genus.

Excl. sps., exclusit species.

Excl. var., exclusit varietas, when following an onym, indicates that the group has undergone revision, and the name does not cover the original ground to the extent indicated.

-ia, -ius, -ica, -icus, -ina, -inus, -ita, -itus, terminations used in making specific names which are derived from the name of a river or other body of water, a province, a country, or a kingdom; e.g., *arabicus*.

-iceæ, -ideæ, -ineæ, suffixes used in botany to designate a family when the name taken ends in Latin -ix or -is (genitive *icis*, *idis*, *icis*); e.g., *Saliciceæ* from *Salix*, *Berberideæ* from *Berberis*, *Tamariscineæ* from *Tamarix*.

-eæ, as a rule, these suffixes, together with *ecæ*, are employed to designate botanic sub-families, tribes, and sub-tribes; e.g., *Roseæ* from *Rosa*.

-idæ, -inæ, the suffixes added to the name of the earliest known or most characteristic genus, to designate zoologic

families or sub-families; e.g., *Strix*, *Strigæ*, *Strigideæ*, *Bucerotus*, *Bucerotideæ*.

-ites, -itis, frequently employed to designate fossil organisms analogous to the living form whose generic name is the radical to which *itis* is appended. They are rarely used with specific names.

Mutatis char., *mutatis characteris*, when following a specific name signifies a change in the diagnostic characters of a species.

-astrum, -oidea or -oides, -oidalis, -oideum, -opsis, terminations employed in forming generic, sub-generic, or specific names after a Greek derivative. Bourguinat suggests that *astrum* be reserved to be appended to the name of a genus to indicate its typical sub-division. *Opsis* and *oides* should be reserved for sub-divisions of a genus which resemble another genus, by adding them to the name of that other genus when it is of Greek origin.

-oides is preferably reserved for specific names of Greek or barbarous (never Latin) origin.

(a) When the radical of the specific name is the name of a genus which it resembles, e.g., *Salix myrtilloides*, *Bupleurum ranunculoides*, *Malva abutiloides*, *Thuja cupressoides*.

(b) When the radical is the name of another species which the new one resembles. *Helix carascaloides*, a species like *H. carascalensis*.

(c) When the radical of the specific name is a Greek word signifying an animal, organ, part, object, as *Potentilla arachnoidea*, *Prenanthes deltoidea*, *Jungermannia zoöphis*, *ichthyoides*, *rhomboidale*, *pterigoides*, *paraboloides*, *dendroides*.

Only one apparent exception to the compounding of Greek and Latin has been consecrated by usage; viz.: *ovoides* from *ovum* and *εἶδος*; this has arisen from the absence of euphony in the correct form, *ooides* (ὠοι, and *εἶδος*).

pro-parte, for a part, when following a specific name indicates that since its first application the group has been revised.

Pseudo-, a prefix employed in forming specific names before a Greek derivative.

-pteris, a termination frequently employed in the generic names of ferns, for the purpose of recalling the affinities of the genus.

sp. (i) In zoölogy, abbreviation of species, written when the specific name is not known or is wanting, or if placed after the name of the authority, as *Crania craniolaris*, Linné sp., indicates that Linné is only to be credited with the specific name.

(2) In botany, species or specimen.

Sub-, a prefix employed in forming specific names before a Latin derivative. It may also be used in designating a new species before the name of another with which the first was in intimate relation. It is also used in the sense of *nearly*, *less*, *somewhat*, *slightly*. It has, moreover, a few legitimate Latin compounds which may be used for specific names; e.g., *subterraneus*, *subalpinus*-a-um, *subcurrens*, *subcutaneus*, *subtimidiatus*, *subjectus*, *submersus*, *subrotundus*, *substratus*.

Sub-sp., subspecies.

gen., genus.

var., variety, placed before the name of a plant or animal indicates that it is a hybrid of doubtful origin.

## SUNDRY ABBREVIATIONS.

|         |   |

## PREFIXES AND SUFFIXES USED IN MEDICAL TERMS.

## PREFIXES.

**A-, an-**, called *alpha privative* (Gr. *a*, *an*, or *an*), the equivalent of our prefix, *an-*, or *in-*, denotes an absence or want of the thing or quality expressed by the principal; *e.g.*, *anadynamia*, *anæsthetic*, *aphasia*, *apiraxia*, *apvrexia*, *astigmatism*, *atoni*, etc. *a* is used before consonants, *an* before vowels, and, rarely, *am* before *bl* or *br*. (To be distinguished from *ana*.)

**Ad-** (*ad*), to, at, toward, as, *adduction*, *adhesion*. The *d* is often changed in the compound to correspond to the next letter, as *adcretion*, *appendix*.

**Al-** (Arab.) article *the*; *e.g.*, *alchemy*, the secret art; *alcohol*, the very subtle.

**Amphi-** (or *amph-*) (*ἀμφι*), upon both sides, in two ways, as in *amphiarthrosis*, *amphibia*, etc.

**Ana-** (*ana*). Up, through, again; *e.g.*, *anabolism*, *anasarca*, *anatomy*, etc.

**Anti-** (or *ant-*) (*ἀντι*). Against, opposed to, opposite of; as *antiphradisia*, *antibacterial*, *antipyretic*, *antiseptic*, etc.

**Apo-** (*apo*). Off, away, upon; *e.g.*, *aponeurosis*, *apoplexy*, etc.

**Auto-** (*auto*). Self; as *autopepsia*, *autopsy*.

**Bary-** (*bary*). Heavy, difficult; as *barymezia*, *baryphonia*, etc.

**Bi-, bin-** (*bi*). Twice, twofold; *e.g.*, *bicuspid*, *bivalent*, *binocular*, *binocular*.

**Bio-** (*bio*). Life, *e.g.*, *bioplasm*, *biology*, *biolysis*.

**Brach-** (*brach*). Arm, pertaining to the arm; as *brachialgia*, *brachioncus*.

**Broncho-** (*bronch*). Pertaining to the trachea; as *bronchorrhagia*, *bronchotomy*.

**Cardi-**, **cardio-** (*καρδια*). Pertaining to the heart, as *cardiogram*, *cardialgia*.

**Celio-**, **coelio-** (*κοιλια*). Pertaining to the belly, as *celiotomy*, *coeliac*.

**Chiro-** (*χειρ*). The hand. *Chiroagra*, *chiropodist*.

**Co-, con-**. Together, along with; *e.g.*, *coitus*, *congenital*.

**Dacryo-** (*dacry*). A tear, pertaining to a tear; as *dacryoid*, *dacryo-cystitis*.

**Dactyl-** (*δακτυλος*). A finger; pertaining to the fingers; as *dactylitis*, *dactylion*, *dactylate*.

**Dermo-, dermat-** (*δερμα*). The skin; pertaining to the skin; *e.g.*, *dermatomy*, *dermatolysis*.

**Di-** (*di*). Twice, double; as *dimorphism*, *digestric*.

**Dia-** (*δια*). Through. Examples: *diabetes*, *diagnosis*, *diaphragm*, *diarrhea*, etc.

**Dyn-** (*δυναμις*). Force, power; *dynamogeny*, *dynamograph*.

**Dys-** (*dys*). Difficult, defective, painful; *e.g.*, *dysentery*, *dyspnea*, *dysuria*.

**Ec-, ex-, ecto-** (*ἐκ*, *ἐξ*, *ἐκτός*). Out, outside, away from; as in *echymosis*, *ecdemie*, *eclampsia*, *exostosis*, *exanthema*, *ectropion*, *ectoderm*.

**En-, em-** (*ἐν*, *ἐν*). In, within; as in *embryo*, *embolism*, *endemic*, etc.

**Endo-, ento-** (*ἐντός*). Within, internal; *e.g.*, *endarteritis*, *endoscope*, *entoblast*, *entoptic*.

**Entero-** (*έντερον*). The intestine; as in *enterocoele*, *enterostomy*, etc.

**Epi-** (*ἐπὶ*). Upon, over, above; *e.g.*, *epiblast*, *epicranium*, *epistaxis*, *epidemic*, etc.

**Extra-** (*ἐξ*). Outside; *e.g.*, *extravasation*, *extroversion*.

**Galact-** (*γάλα*). Milk; as *galactocoele*, *galactozemia*, *galacturia*.

**Gastro-** (*γαστήρ*). The stomach; relation to the stomach; *e.g.*, *gastrocele*, *gastrocnemius*, *gastroenterostomy*, etc.

**Genio-** (*γενειον*). Pertaining to the chin; *e.g.*, *geniohyoglossus*, *geniohyoid*.

**Glosso-** (*γλῶσσα*). Pertaining to the tongue. See *glossology*, *glossoplegia*, *glossophytia*.

**Hæma-, hæmato- or hemo-** (*αἷμα*). The blood; pertaining to the blood. See *hematemesis*, *hematoma*, *hemorrhage*, etc.

**Hemi-** (*ἡμι*). Half; as in *hemiatrochloptosis*, *hemisomnia*, *hemiplegia*.

**Hepat-** (*ἥπαρ*). The liver; pertaining to the liver. See *hepatomphræsis*, *hepatization*, *hepatostoma*.

**Hetera-** (*ετερος*). Different; opposite; *e.g.*, *heteroinfection*, *heterologous*, *heteropathy*.

**Hydro-, hydr-** (*ὕδωρ*). Water; resembling or relating to water, drops, etc.; as in *hydremia*, *hydragogue*, *hydrate*, *hydrocephalus*, etc.

**Hyper-** (*ὑπερ*). Excess; exaggerated abnormality in amount, size, quality, etc. See *hyperæsthesia*, *hypermetropia*, *hyperpyrexia*, *hypertrophy*, and others.

**Hypno-** (*ὑπνος*). Sleep. See *hypnopathy*, *hypnotism*.

**Hypo-** (*ὑπο*). Diminution as to degree, amount, size, quality, etc., or that located under or beneath; *e.g.*, *hyposthenia*, *hypoblast*, *hypoblast nifera*, *hypophthalmic*, *hypoglossal*.

**Hystera-, hystero-** (*ὑστερον*). The uterus or womb; relation to the uterus; *e.g.*, *hysterectomy*, *hystero-epilepsy*, *hysteropexia*, etc.

**Ileo-** (*ίλον*). Pertaining to the ileum; *e.g.*, *ileo-colitis*, *ileotyphus*.

**Ilio-** (*ίλον*). Pertaining to the ilium; *e.g.*, *ilio femoral*, *ilio-lumbar*.

**Im-, in-** (*in*). Privative, negative; as *imperforate*, *incarceration*, *insane*, *incontenance*.

**In-** (*εν*). In, within, upon, by; as *incubation*, *infarction*, *inflammation*, *inoculation*, etc.

**Infra-** (*infra*). Beneath, below; *e.g.*, *infra-maxillary*, *infra-scapular*.

**Inter-** (*inter*). Between. See *intercellular*, *intercostal*, *intertrigo*, and others.

**Intra-** (*intra*). Within, inside of, as *intra-articular*, *intra-dermic*.

**Iso-** (*ίσος*). Equal, like; *e.g.*, *isometric*, *isothermic*, *isopathy*.

**Kata-, kath-** (*κατα*). Down, through; as *katabolism*, *katalonia*, *kathode*.

**Leuko-** (*λευκός*). Whiteness; *e.g.*, *leukemia*, *leukocyte*, *leukomata*, *leukorrhea*.

**Lith-, litho-** (*λίθος*). Pertaining to stone, calculus, or lithic acid. See *lithemia*, *lithiasis*, *lithotripsy*, etc.

**Macro-** (*μακρός*). Largeness, hypertrophy; as in *macroglossia*, *macromelia*.

**Mal-** (*μαλ*). Bad; as *malformation*, *malpractice*, *malaria*.

**Melano-** (*μαλας*). Blackness, pigmentation; *e.g.*, *melancholia*, *melano-sarcoma*.

**Meso-** (*μέσος*). The middle; *e.g.*, *mesoblast*, *mesocolon*, etc.

**Meta-** (*μετά*). With, after; *e.g.*, *metabolism*, *metastasis*.

**Micro-** (*μικρός*). Smallness; *e.g.*, *micrococcus*, *microglossia*, *microscope*.

**Mon-, mono-** (*μόνος*). Singleness. For example, *monamin*, *monomania*, *monorchis*.

**Morpho-** (*μορφή*). Shape, form; *e.g.*, *morphography*, *morphology*, *morphometry*.

**Multi-** (*multus*). Number, many; *e.g.*, *multilocular*, *multiparous*.

**Myelo-** (*μυελός*). Referring to the brain or spinal cord; as *myeloid*, *myelitis*.

**Myo-** (*μύς*). Pertaining to a muscle or to muscularity. See *myocarditis*, *myoma*, *myopathy*.

**Neo-** (*νέος*). New, recent, young; as *neogala*, *neo-membrane*, *neoplasm*.

**Neph-** (*νέφρος*). Pertaining to the kidney; *e.g.*, *nephropostasis*, *nephritis*, *nephritis*.

**Neuro-** (*νευρον*). Relating to a nerve or to neurology. In the original Greek the word meant a cord or tendon, — *neurosis*, the stringing of the bow. It is now applied only to nerve-structure; as, *e.g.*, *neuralgia*, *neurasthenia*, *neurilemma*, *neuroglia*.

**Ob-** (*ὀβ*). In front of, against, denoting hindrance or obstruction; *e.g.*, *obstruent*, *obturator*, *occlusion*, *operation*.

**Odonto-** (*ὀδούς*). Of the teeth; as *odontology*, *odontalgia*.

**Oligo-** (*ὀλίγος*). Fewness or lack of, as *oligocythemia*.

**Ophthalm-** (*ὀφθαλμός*). Pertaining to the eye, as *ophthalmia*, *ophthalmoplegia*.

**Ortho-** (*ὀρθός*). Straight, upright, correct. See *orthoscope*, *orthopodia*, *orthopraxis*.

**Osteo-** (*ὀστέον*). Referring to bone. See *osteoblast*, *osteomyelitis*, *osteoplastic*.

**Oto-** (*οἶς*). Pertaining to the ear, as *otorrhea*, *otophone*.

**Oxy-** (*ὀξύς*). Denoting the presence of oxygen, or acidity; as *oxygen*, *oxyhemoglobin*.

**Pan-, Pant-** (*πᾶς*, *πᾶν*). All, every, universal; as *pancreas*, *pancreasitis*, *panmorphic*.

**Para-** (*παρά*). Through, near, by, by the side of, abnormality. Examples: *paracentesis*, *paresthesia*, *parenchyma*, *parotid*.

**Peri-** (*περί*). About, around. See, *e.g.*, *pericardium*, *perimeter*, *perilymph*, *periosteum*.

**Pod-** (*πούς*). Pertaining to the foot, as *podalgia*, *pododema*.

**Poly-, pol-** (*πολύς*). Many, much; *e.g.*, *polycoria*, *polygalactia*, *polyuria*.

**Præ-, pre-** (*πρᾶξ*). Before; *e.g.*, *præcordia*, *prepuce*.

**Pro-** (*πρό*). Before, down; as in *process*, *proclivitas*, *prolapse*, *proptosis*.

**Proc-, procto-** (*πρωκτός*). The anus, pertaining to the anus; *e.g.*, *proctitis*, *proctologia*.

**Pseudo-** (*ψεύδης*). False, spurious; as in *pseudarthrosis*, *pseudocystitis*.

**Pyo-** (*πύον*). Pertaining to pus or purulency; *e.g.*, *pyogenic*, *pyosalpinx*.

**Pyr-, pyro-** (*πῦρ*). Concerning fire or heat, or inflammation; *e.g.*, *pyrogenous*, *pyrexia*.

**Retro-** (*ῥέτρον*). Backward, behind; *e.g.*, *retroflex*, *retroversion*.

**Rhin-, Rhino-** (*ῥίς*). Pertaining to the nose, as *rhinoplasty*, *rhinitis*.

**Semi-** (*ἡμισ*). Half, partly, almost, as *semicaptum*, *semilunar*.

**Sphyg-** (σφύγμός). Pertaining to the pulse, as *sphygmometer*, *sphygmocentr*.  
**Sub-** (Sub). Beneath, under; and also partially or deficiency of, as *subclavian*, *subluxation*.  
**Super-** (Super). Above, upon; excess of; *e. g.*, *supercilium*, *superfecundation*.

**Supra-** (Supra). Above, upon, superior to, as *supraorbital*, *supraspinatus*.  
**Sym-, syn-** (συν). With, together, same. See, *e. g.*, *symplicapharon*, *symphysis*, *synactia*, *synchondrosis*.  
**Zoö-** (ζωον). Animal. See *zoology*, *zöochemia*.

## SUFFIXES.

**-ago** (αγειν). Gives the idea of activity, presentation, etc.; as *lumbago*.  
**-agogue** (αγειν, to bear off, carry away). Signifies an agent stimulating the function of excretion or secretion of the product. Thus, *emmenagogue*, *hydragogue*, *sialagogue*.  
**-agra** (ἀγρα, an attack, seizure). Denotes an acute attack of pain in the part, as *arthragra*, *podagra*.  
**-algia** (ἀλγος, pain). Pain in a part, expressed by the chief word; *e. g.*, *cephalalgia*, *gastralgia*.  
**-atresia** (ἀτρησία). Imperforate, as in *proctatresia*.  
**-cele** (κῆλη). A tumor, hernia, or protrusion. See *cystocele*, *hydrocele*, *meningocele*.  
**-cele**, **-cele** (κοιλία). A cavity, ventricle; *e. g.*, *mesocele*.  
**-ectomy** (εκτέμειν). Excision, excision; as in *oophorectomy*, *nephrectomy*, *splenectomy*.  
**-emia** (αἷμα, blood). Denotes a condition of the blood, or an ingredient in the same, expressed by preceding word; *e. g.*, *hydremia*, *lithemia*, *pyemia*, *uremia*.  
**-etin** (ἐτιν). Used in the names of certain resins, as *abietin*.  
**-fuge** (fugare, to expel). Driving out, an expeller, as *vermifuge*, *febrifuge*, etc.  
**-graph**, **graphy** (γράφειν, to write). An instrument; a treatise or description; *e. g.*, *sphygmograph*, *demography*.  
**-ia**, often contracted to **-y**, denotes the quality of the root-word as an abstract noun, as *akromegalia*, *akromegaly*.  
**-idae** (-ίδης). The suffix to the name of a genus forming the name of a family; *bovidæ*, *equidæ*.  
**-igo**. A variation of **-ago**; *e. g.*, *prurigo*, *vertigo*.  
**-is**, **-sis**. Present the abstract idea of activity of the root-word.  
**-ism** (-ισμός). Implies the doctrine, practice, or theory of the principal word; *Darwinism*, *tribadism*.  
**-ite** (-ίτης). Of the nature of. In anatomy, denoting a constituent part of an organ; as *serpente*, *sternite*. In chemistry, any salt of an -ous acid; as *sulphite*, *phosphite*.  
**-itis** (-ίτις). Originally the feminine ending of Greek substantives and denotes an especial activity of the root-word. By habit and general use it is now limited to inflammatory activity; as *gastritis*, *otitis*, etc.  
**-logy** (λόγος, discourse). A treatise upon; as *bacteriology*, *dermatology*, *pathology*.  
**-lysis** (λύσις, a loosening). A separation into constituent parts, or the setting free of some part; as *hydrolysis*, *analysis*.  
**-malacia** (μαλάκος, soft). Abnormal softness; as in *osteomalacia*.  
**-mania** (μανία, madness). The chief word denotes the principal

symptom of the mental affection; *e. g.*, *erotomania*, *kleptomania*, etc.  
**-meter** (μετρον, a measure). An instrument for measuring; *e. g.*, *barometer*, *anemometer*.  
**-odynia** (ὀδυνή, excessive pain). The principal word denotes the seat of great pain, as *coccygodynia*.  
**-oid** (ῥῖδος, form). Similar in shape, etc.; as in *choroid*, *cuboid*, *sphenoid*, *xiphoid*.  
**-oma** (ῥῖμα). A tumor, *e. g.*, *glioma*, *sarcoma*.  
**-opia** (ὥπη). Pertaining to the eye or vision; as in *amblyopia*, *myopia*, etc.  
**-orium**, **-torium**, **-sorium** (τήριον). Designate places, tools, etc.; as *tentorium*, *auditorium*, etc.  
**-osis**, **-osus**, derived from Greek words in -ῶν, and usually denote fullness, redundancy, excess.  
**-pathy** (πάθος). A condition of disease, and also a method of cure; as *adenopathy*, *psychopathy*, *homoeopathy*, *hydrophaty*.  
**-phobia** (φοβος, fear). Morbid or exaggerated fear or dread, as *agoraphobia*, *photophobia*.  
**-plasty** (πλασσειν, to form). Surgical plastic operation upon a part; *e. g.*, *blepharoplasty*, *rhinoplasty*.  
**-rhagia** (ῥῆγμα, to burst forth). A hemorrhage or excessive discharge; *e. g.*, *blennorrhagia*, *metrorrhagia*.  
**-rhapty** (ῥαφή, a suture). A stitching or suturing of a part; as *enterorhaphy*, *perineorhaphy*.  
**-rhea** (ῥεειν, to flow). An excessive discharge or excretion; as *blennorrhœa*, *diarrhœa*, *leukorrhœa*.  
**-scope** (σκοπεῖν, to look). An instrument for making an examination; as *laryngoscope*, *microscope*.  
**-scopy** (σκοπεῖν). An examination; as *ophthalmoscopy*.  
**-stomy** (στόμα, mouth). A suffix seen in the names of those surgical operations in which an artificial opening or passage is formed, as *enterostomy*.  
**-tas**, **-ty**. Derived originally from the Greek -της, denote abstract quality or idea, as *immunity*, *acidity*.  
**-tio**, **-atio**, **-tion**. A suffix of verbal roots denoting an action or function as taking place—an occurrence. The *n* was added to the original *-tio* by Roman and French influence.  
**-tomy** (τεμεῖν, to cut). Incision; *e. g.*, *laparotomy*, *tenotomy*.  
**-ulus**, **-ula**, **-ulum**, **-ola**, **-ion**, **-ellus**, **-illus**, **-leus**. Diminutives.  
**-uria** (ουρῆειν, to urinate). Abnormalities of the urine or of urination; as *albuminuria*, *polyuria*.

## DEGREES, DIPLOMAS, AND QUALIFICATIONS.

A. A. S. . . . . Fellow of the American Academy.  
A. B. or B. A. . . . . Bachelor of Arts.  
A. M. . . . . Master of Arts.  
C. M. . . . . Master in Surgery.  
D. D. S. . . . . Doctor of Dental Surgery.  
D. P. H. . . . . Diploma in Public Health.  
D. S. M. . . . . Diploma in State Medicine.  
D. S. S. . . . . Diploma in Sanitary Science.  
F. B. S. . . . . Fellow of the Botanical Society.  
F. B. S. Ed. . . . . Fellow Botanical Society of Edinburgh.  
F. C. S. . . . . Fellow of the Chemical Society.  
F. E. S. . . . . Fellow of the Entomological Society.  
F. F. P. S. G. . . . . Fellow of the Faculty of Physicians and Surgeons of Glasgow.  
F. K. Q. C. P. I. . . . . Fellow of the King and Queen's College of Physicians of Ireland.  
F. L. S. . . . . Fellow of the Linnean Society.  
F. R. C. P. L. . . . . Fellow of the Royal College of Physicians of London.  
F. R. C. P. Ed. . . . . Fellow of the Royal College of Physicians of Edinburgh.  
F. R. C. P. I. . . . . Fellow of the Royal College of Physicians of Ireland.  
F. R. C. S. E. . . . . Fellow of the Royal College of Surgeons of England.  
F. R. C. S. Ed. . . . . Fellow of the Royal College of Surgeons of Edinburgh.  
F. R. C. S. I. . . . . Fellow of the Royal College of Surgeons of Ireland.  
F. R. S. . . . . Fellow of the Royal Society.  
F. R. S. E. . . . . Fellow of the Royal Society of Edinburgh.  
F. R. S. L. . . . . Fellow of the Royal Society of London.  
L. A. H. . . . . Licentiate of the Apothecaries' Hall, Dublin.  
L. D. S. . . . . Licentiate in Dental Surgery.  
L. F. P. S. G. . . . . Licentiate of the Faculty of Physicians and Surgeons of Glasgow.  
L. K. Q. C. P. I. . . . . Licentiate of the King and Queen's College of Physicians of Ireland.

LL. B. . . . . Bachelor of Laws.  
LL. D. . . . . Doctor of Laws.  
L. R. C. P. L. . . . . Licentiate of the Royal College of Physicians of London.  
L. R. C. P. Ed. . . . . Licentiate of the Royal College of Physicians of Edinburgh.  
L. R. C. S. Ed. . . . . Licentiate of the Royal College of Surgeons of Edinburgh.  
L. R. C. S. I. . . . . Licentiate of the Royal College of Surgeons of Ireland.  
L. S. A. . . . . Licentiate of the Apothecaries' Society of London.  
L. S. S. . . . . Licentiate in Sanitary Science.  
M. A. . . . . Master of Arts.  
M. B. . . . . Bachelor of Medicine.  
M. D. . . . . Doctor of Medicine.  
M. K. Q. C. P. I. . . . . Member of the King and Queen's College of Physicians of Ireland.  
M. P. S. . . . . Member of the Pharmaceutical Society.  
M. R. C. C. . . . . Member Royal College of Chemistry.  
M. R. C. P. L. . . . . Member of the Royal College of Physicians of London.  
M. R. C. P. Ed. . . . . Member of the Royal College of Physicians of Edinburgh.  
M. R. C. P. I. . . . . Member of the Royal College of Physicians of Ireland.  
M. R. C. S. E. . . . . Member of the Royal College of Surgeons of England.  
M. R. C. S. Ed. . . . . Member of the Royal College of Surgeons of Edinburgh.  
M. R. C. S. I. . . . . Member of the Royal College of Surgeons of Ireland.  
M. R. C. V. S. . . . . Member of the Royal College of Veterinary Surgeons.  
M. S. . . . . Master in Surgery.  
Ph. B. . . . . Bachelor of Philosophy.  
Ph. D. . . . . Doctor of Philosophy.  
V. S. . . . . Veterinary Surgeon.

# INDEX OF TABLES

AND IMPORTANT DEFINITIONS, WHEREIN LARGE NUMBERS OF FACTS ARE  
BROUGHT TOGETHER AND CLASSIFIED.

|   | PAGE |  | PAGE |
|---|------|--|------|
| Abbreviations, . . . . .                                  | ix   | Milk, Analysis of, . . . . .                                   | 708  |
| Prefixes and Suffixes, . . . . .                          | xiv  | Monstrosities, . . . . .                                       | 779  |
| Acids, . . . . .  | 28   | Motor Points ( <i>Illustrated</i> ), . . . . .                 | 784  |
| Alcohols, . . . . .                                       | 56   | Mulatto, . . . . .   | 789  |
| Aldehyds, . . . . .                                       | 57   | Murmurs, . . . . .   | 792  |
| Anesthetics, . . . . .                                    | 79   | Muscles ( <i>Illustrated</i> ), . . . . .                      | 795  |
| Angles, . . . . .   | 83   | Nerves ( <i>Illustrated</i> ), . . . . .                       | 848  |
| Arteries ( <i>Illustrated</i> ), . . . . .                | 116  | Nuclei, . . . . .  | 878  |
| Artificial Feeding of Infants, . . . . .                  | 140  | Oils, . . . . .  | 889  |
| Bacteria ( <i>Illustrated</i> ), . . . . .                | 157  | Oleomargarin, Analysis of, . . . . .                           | 892  |
| Bandages ( <i>Illustrated</i> ), . . . . .                | 188  | Operations, Eponymic, . . . . .                                | 899  |
| Baths, . . . . .  | 195  | Organotherapy, . . . . .                                       | 940  |
| Batteries, Electrical, used in Medicine, . . . . .        | 198  | Paralyses, . . . . .   | 973  |
| Bones ( <i>Illustrated</i> ), . . . . .                   | 217  | Parasites ( <i>Illustrated</i> ), . . . . .                    | 978  |
| Breath Sounds, . . . . .                                  | 235  | Pelves ( <i>Illustrated</i> ), . . . . .                       | 1035 |
| Canals, . . . . .   | 253  | Phthisis, . . . . .  | 1075 |
| Carbohydrates, . . . . .                                  | 261  | Pigments, . . . . .  | 1085 |
| Catheters, Sizes of ( <i>Illustrated</i> ), . . . . .     | 272  | Planes, . . . . .  | 1109 |
| Cereals, . . . . .  | 280  | Plates, . . . . .  | 1114 |
| Cheese, . . . . .   | 285  | Plexuses, . . . . .  | 1121 |
| Condensed Milks, . . . . .                                | 316  | Points, . . . . .  | 1133 |
| Convulsions of Cerebrum ( <i>Illustrated</i> ), . . . . . | 323  | Poisons, . . . . .   | 1136 |
| Cranimetric Points, . . . . .                             | 337  | Position, and Position and Direction, . . . . .                | 1161 |
| Diameters, Craniometric and Pelvic, . . . . .             | 369  | Postures ( <i>Illustrated</i> ), . . . . .                     | 1167 |
| Diseases, Eponymic, . . . . .                             | 380  | Pregnancy, . . . . .   | 1175 |
| Doses, Gaubins' Table, . . . . .                          | 395  | Processes, . . . . .   | 1181 |
| Ducts, . . . . .  | 398  | Ptomains, . . . . .  | 1210 |
| Electric Units, . . . . .                                 | 413  | Râles, . . . . .   | 1235 |
| Elements, Chemic, . . . . .                               | 416  | Reflexes, . . . . .  | 1245 |
| Ethers, . . . . .   | 444  | Regions ( <i>Illustrated</i> ), . . . . .                      | 1248 |
| Exanthemata, . . . . .                                    | 450  | Resins, . . . . .  | 1253 |
| Fetometry, . . . . .                                      | 465  | Respiration, . . . . .   | 1255 |
| Fetus, Positions and Presentations of, . . . . .          | 467  | Signs and Symptoms of Disease, . . . . .                       | 1323 |
| Fevers, . . . . .   | 466  | Sinuses ( <i>Illustrated</i> ), . . . . .                      | 1329 |
| Fissures, . . . . .                                       | 473  | Skin Diseases, . . . . .                                       | 1333 |
| Flour, . . . . .  | 479  | Soaps, . . . . .   | 1338 |
| Foods, . . . . .  | 482  | Spaces, . . . . .  | 1343 |
| Foramina, . . . . .                                       | 483  | Spectacle Lenses, Numbering of, . . . . .                      | 1346 |
| Ganglia, . . . . .  | 502  | Spinal Cord, Localization in ( <i>Illustrated</i> ), . . . . . | 1354 |
| Glands, . . . . .   | 517  | Stains, Fluids for Fixing and Hardening, etc., . . . . .       | 1367 |
| Handkerchief Dressings ( <i>Illustrated</i> ), . . . . .  | 540  | Starches ( <i>Illustrated</i> ), . . . . .                     | 1408 |
| Hernia ( <i>Illustrated</i> ), . . . . .                  | 561  | Sugars, . . . . .  | 1430 |
| Hydrocarbons, . . . . .                                   | 581  | Sutures ( <i>Illustrated</i> ), . . . . .                      | 1437 |
| Insanity, . . . . .                                       | 615  | Tests, . . . . .   | 1468 |
| Knots, Surgical ( <i>Illustrated</i> ), . . . . .         | 645  | Theories, . . . . .  | 1510 |
| Koumiss, Analysis of, . . . . .                           | 646  | Thermometers, Comparison of, . . . . .                         | 1513 |
| Lamina, . . . . .   | 655  | Treatments, . . . . .  | 1532 |
| Laws, . . . . .   | 663  | Triangles, . . . . .   | 1539 |
| Leukomains, . . . . .                                     | 674  | Tumors ( <i>Illustrated</i> ), . . . . .                       | 1555 |
| Life, Expectation of, . . . . .                           | 678  | Urinary Calculi, Analysis of, . . . . .                        | 1576 |
| Ligament ( <i>Illustrated</i> ), . . . . .                | 679  | Urinary Sediments ( <i>Illustrated</i> ), . . . . .            | 1577 |
| Lines or Lineæ, . . . . .                                 | 688  | Urine, Colors of the, . . . . .                                | 1580 |
| Localization ( <i>Illustrated</i> ), . . . . .            | 701  | Veins, . . . . .   | 1592 |
| Membrana, . . . . .                                       | 741  | Wave-lengths and Frequencies of Light, . . . . .               | 1612 |
| Metric System, . . . . .                                  | 759  | Weights and Measures ( <i>Illustrated</i> ), . . . . .         | 1613 |

# AN ILLUSTRATED DICTIONARY OF MEDICINE, BIOLOGY, AND ALLIED SCIENCES.

## A

**A** [*á, àv, or áu, without*]. The Greek letter *alpha*, called *alpha privative*, equivalent to the prefix *un* or *in*. It denotes absence or want of the thing or quality expressed by the root of the word. *a-* is used before consonant, and *an-* before vowel sounds; *am-* is sometimes used before *-bl* or *-be*. Also, the symbol of *Anode*.

**Aa** [*áva, of each*]. An abbreviation, written *āā*, used in prescriptions to denote repetition of the same quantity for each item.

**āāā**. Abbreviation for *Amalgam*.

**Aasmus** (*a-as'-mus*) [*ἄσμος, a breathing out*]. Asthma.

**Ab** [*ab, from*]. A Latin prefix signifying *from*.

**Abaca** (*ab'-ak'-ah, Sp. pron. ah-vah-kah'*). Manilla hemp. See *Hemp*. Also *Musa textilis*, the plant which produces it.

**Abactinal** (*ab-ak'-tín-al*) [*ab, away; actinal, the oral surface of a radiate animal*]. In biology, aboral. Agassiz's term for the surface of radiates opposite to that having the mouth.

**Abactio** (*ab-ak'-shé-o*) [*abigere, to drive away*]. An abortion, or labor, artificially induced.

**Abactus Venter** (*ab-ak'-tus ven'-ter*) [*abigere, to drive out; venter, the belly*]. An abortion procured by artificial means.

**Abadie's Sign**. See *Signs and Symptoms, Table of*.

**Abalienated** (*ab-ál'-yen-a-ted*) [*abalienatus, alienated, estranged*]. 1. Deranged, or insane. 2. Gangrenous, or so severely injured as to require amputation or extirpation.

**Abalienation** (*ab-ál'-yen-a'-shun*) [*abalienatio; ab, away; alienare, to transfer*]. Decay, especially mental decay, insanity.

**Abanet**. See *Abnet*.

**Abaptista** (*ah-bap-tis'-tah*). Same as *Abaptiston*.

**Abaptiston** (*ah-bap-tis'-ton*) [*á priv.; βάπτιστος, immersed*]. A trephine so shaped that penetration of the brain is impossible.

**Arthrosis** (*ab-ar-thro'-sis*) [*ab, from; arthrosis, a joint*]. Same as *Diarthrosis*, or *Abarticulation*.

**Abarticular** (*ab-ar-tik'-u-lar*) [*ab, from; articular, joint*]. Not connected with or situated near a joint.

**Abarticulation** (*ab ar-tik-u-la'-shun*) [*ab, from; articulation, joint*]. 1. Same as *Diarthrosis*, a term more frequently used; sometimes also a synonym of *Synarthrosis*. 2. A luxation; the dislocation of a joint.

**Abasia** (*ah-bá'-ze-ah*) [*á priv.; βάσις, a step*]. Motor incoordination in walking. See *Astasia*.

**Abasic** (*ah-bá'-sik*). Pertaining to, or affected with, abasia.

**Abatement** (*a-bát'-ment*) [*ab, from; batuere, to strike*]. Mitigation or decrease in severity of pain, or of any untoward symptom or condition.

**Abattoir** (*ah-bat-war'*) [*Fr.*]. A slaughter-house or establishment for the killing and dressing of animals.

**Abaxial** (*ab-ak'-se-al*) [*ab, from; axis, an axle*]. Not situated in the line of the axis. In botany, indicating that the embryo is not in the axis of the seed.

**Abbé Condenser**. See *Illuminator, Abbé*. **A. Illuminator**. See *Illuminator*.

**Abbé's Apochromatic Lenses**. See *Apochromatic Lens*. **A. Catgut Rings**, rings composed of eight or ten turns of heavy catgut in the shape of an oval, with inside diameter of two inches, for use in intestinal anastomosis.

**Abbreviate, or Abbreviated** (*ab-bre'-ve-a-ted*) [*ab, from; brevare, to shorten*]. Shortened, cut short.

**Abbreviations** (*ab-bre'-ve-a'-shunz*). See *List of Abbreviations* in introductory matter.

**Abdomen** (*ab-dó'-men or ab'-do-men*) [*abdere, to hide*].

The large inferior cavity of the trunk, extending from the pelvic cavity to the diaphragm, and bounded in front and at the sides by the lower ribs and abdominal muscles, and behind by the vertebral column, the psoas and quadratus lumborum muscles. It is artificially divided into nine regions by two circular lines, the upper parallel with the cartilages of the ninth ribs, the lower with the iliac crests, and by two lines from the cartilages of the eighth rib to the center of Poupart's ligament. The regions thus formed are, above, the right hypochondriac, the epigastric, and the left hypochondriac; secondly, the right lumbar, umbilical, and left lumbar; and below, the right inguinal, the hypogastric and the left inguinal. **A., Pendulous**, a relaxed condition of the abdominal walls in which they hang down over the pubis.

**Abdominal** (*ab-dom'-in-al*) [*abdere, to hide*]. Pertaining to or connected with the abdomen. **A. Aneurysm**. See *Aneurysm*. **A. Aorta**. See *Artery*. **A. Aponeurosis**. See *Aponeurosis*. **A. Brain**, the solar plexus. **A. Compress**, a form of local pack, made by forming folds of a coarse linen towel of sufficient breadth to reach from the ensiform cartilage to the pubis; one of the folds is then wrung out of cold water, applied, and the remainder is rolled around the body so as to retain it in position. **A. Ganglia**. See *Ganglia*. **A. Gestation**. See *Pregnancy, Extra-uterine*. **A. Hysteria**, an hysterical condition simulating peritonitis, in which the abdomen becomes extremely painful to the touch, swollen, and distended with gas, attended with temporary rise of temperature. **A. Line**, the linea alba. **A. Muscles**, the internal and external obliques, the transversalis, rectus pyramidalis, and quadratus lumborum. See *Muscles, Table of*. **A. Pore**, a name applied to the openings connecting the peritoneal

cavity of a few fishes with the urino-genital cloaca, and employed in the outward transportation of the generative products. **A. Press.** See *Predum Abdo-*

ABDOMINAL REGIONS.

**Abdominal.** **A. Reflex.** See *Reflexes, Table of.* **A. Regions.** See *Abdomen.* **A. Respiration.** R. carried on chiefly by the diaphragm and abdominal muscles. **A. Ribs,** transverse ossifications (dermal?) of the abdominal wall of crocodiles and certain other reptiles. **A. Ring, External,** a triangular opening in the fibers of the aponeurosis of the external oblique muscle transmitting the spermatic cord of the male and the round ligament of the female. **A. Ring, Internal,** an oval aperture in the fascia transversalis that transmits the spermatic cord of the male and the round ligament of the female. **A. Scutella,** the broad, belly scales of serpents, so far as the anus. **A. Section.** See *Celidomy.* **A. Segments,** the more or less evident transverse divisions or somites of the abdomen in arthropods. **A. Typhus,** Enteric Fever. **A. Vertebrae,** those vertebrae in fishes, that give off ribs or processes arching the visceral cavity.

**Abdomino-anterior** (*ab-dom' in-o-an-te'-re-or*). Having the belly forward (used of the fetus in utero).

**Abdomino-genital** (*ab-dom' in-o-jen'-it-al*). Relating to the abdomen and the genitalia. **A. Nerve, Inferior,** the ilio-inguinal nerve. **A. Nerve, Superior,** the ilio-hypogastric nerve.

**Abdomino - hysterectomy** (*ab-dom' in-o-his-ter-ek'-to-me*). Removal of the uterus through an abdominal incision.

**Abdomino - hysterotomy** (*ab-dom' in-o-his-ter-ot'-o-me*). Hysterotomy through an abdominal incision.

**Abdomino-posterior** (*ab-dom' in-o-pos-te'-re-or*). Having the belly toward the mother's back (used of the fetus in utero).

**Abdomino-scrotal** (*ab-dom' in-o-skro'-tal*). Relating to the abdomen and the scrotum. **A. Muscle,** the cremaster muscle.

**Abdomino-thoracic** (*ab-dom' in-o-tho-ras'-ik*). Relating to the abdomen and thorax.

**Abdomino - uterotomy** (*ab-dom' in-o-u-ter-ot'-o-me*). See *Abdomino-hysterotomy.*

**Abdomino-vesical** (*ab-dom' in-o-ves'-ik-al*). Relating to the abdomen and the urinary bladder. **A. Pouch,** a fold of the peritoneum in which are comprised the urachal fossae.

**Abdominoscopy** (*ab-dom-in-ot'-ko-pe*) [*abdomen*; *σκοπεω*, to examine]. Examination of the abdomen

for diagnostic purposes, by inspection, palpation, measurement, percussion, etc.

**Abdominous** (*ab-dom' in-u*) [*abdere*, to hide]. Having a large abdomen.

**Abduce** (*ab-dus'*) [*ab*, away; *ducere*, to lead]. To draw away, as by an abductor muscle.

**Abducens** (*ab-dū'-sens*) [L., "leading away"]. A term applied to certain muscles, or their nerves, that draw the related part from the median line of the body. Also, the sixth pair of nerves supplying the external recti of the eye. **A. oculi.** See *Muscles, Table of.*

**Abducent** (*ab-dū'-sent*). See *Abducens.*

**Abduct** (*ab-duk'*) [*ab*, from; *ducere*, to draw]. To draw, or cause to move, away from the median line, whether of the body or of a limb.

**Abduction** (*ab-duk'-shun*) [*ab*, from; *ducere*, to lead]. 1. The withdrawal of a part from the axis of the body, or of a limb. 2. The recession or separation from each other of the parts of a fractured bone. 3. **A. of the Eyes,** the power of the external recti, measured by the maximum ability to preserve singleness of the image with prisms placed bases toward the nose. It is commonly from 6° to 8°. See, also *Adduction.*

**Abductor** (*ab-duk'-tor*). Same as *Abducens*, *q. v.* **A. Auris.** See *Muscles, Table of.*

**Abelmoschus** (*a-bel-mos'-kus*) [Ar., 'habb-el-misk, a grain of musk]. A genus of malvaceous plants. *A. esculentus* furnishes the esculent known as gumbo, or okra. *A. moschatus* affords *Ambrette*, *q. v.*, or musk-seed, formerly used in medicine. Unof.

**Abepithymia** (*ab-ep-e-thi'-me-ah*) [*ab*, from; *ἐπιθυμία*, longing]. 1. A perverted longing, or desire. 2. Paralysis of the solar plexus (the diaphragm formerly was regarded as the seat of the soul [*θυμός*], and of the desires).

**Abernethy's Operation.** See *Operations, Table of.* **A. Sarcoma,** a form of spindle-celled vascular sarcoma.

**Aberrant** (*ab-er'-ant*) [*ab*, from; *errare*, to wander]. Deviating from the normal or regular type, in appearance, structure, course, etc., e. g., the aberrant duct of the testis or liver, aberrant arteries, etc.

**Aberration** (*ab-er'-a'-shun*) [*ab*, from; *errare*, to wander]. Deviation from the normal; mental derangement; fetal malformation; vicarious menstruation; escape of the fluids of the body by any unnatural channel. In optics, any imperfection of focalization or refraction of a lens. **A., Chromatic,** the dispersion arising from unequal refraction of light of different parts of the spectrum. The violet rays being more refrangible than the red rays, are brought to a focus nearer the lens, and the image is surrounded by a halo of colors. **A., Mental,** a degree of paranoia that may or may not amount to insanity. **A., Spherical,** the excess of refraction of the peripheral part of a convex lens over the central area, producing an imperfect focus and a blurred image.

**Abesamum** (*ab-es'-am-um*) [L.]. Wheel-grease; fat charged with iron; formerly used as a remedy.

**Abevacuation** (*ab-e-vak-u'-a'-shun*) [*ab*, from; *evacuatio*]. 1. A morbid evacuation; an excessive or deficient discharge. 2. The passage of matter from one organ or cavity into another; metastasis.

**Abeysance** (*ab-a'-ans*) [O. Fr., for "open-mouthed expectation"]. A suspension of activity, or of function; a state of suspended animation, or action.

**Abi** (*ah'-be*). See *Lucuma.*

**Abiaba** (*ah-be ah'-bah*). See *Lucuma.*

**Abicum** (*ab'-ik-um*) [L.]. The thyroid cartilage. (Obs., or rare.)

**Abies** (*a'-be-ēs*) [L.]. A genus of coniferous plants, including the fir, hemlock, and spruce. *A. balsamea*, Silver Fir, Balsam Fir, or Balm of Gilead, a tree of the nat.

ord. *Conifera*, from which is derived the *Terebinthina Canadensis*. *A. canadensis*, Hemlock Spruce. Bark of the Canadian Fir-tree. Used as an astringent in various local and internal conditions. Yields Pix Canadensis. *A. excelsa*, Norway Spruce. Yields Pix Burgundica. *A. pectinata*, the European Silver Fir. Its buds are resinous, balsamic, and sudorific. Unof. **A. Preparations**, Extractum Abietis Canadensis Liquidum (B. P.). Dose  $\mathfrak{M}\text{xv}$ - $\mathfrak{L}\text{x}$ . Glycerinum Abietis (B. P.). Dose  $\mathfrak{J}$ - $\mathfrak{ij}$ . Geddes's Fluid-Extract of Hemlock Bark. Dose  $\mathfrak{M}\text{v}$ - $\text{x}$ .

**Abietene** (*a-bi'-et-en*),  $\text{C}_{11}\text{H}_{16}$ . A hydrocarbon, obtained from the *Pinus sabiniana*, a Californian nut pine. It is an aromatic, volatile liquid, agreeing in composition with normal heptane. It is extensively used as a popular remedy; called, also, *Erasene*. Unof.

**Abietic** (*ab-i-et'-ik*), **Abietinic** (*ab-i-et-in'-ik*) [*Abies*]. Pertaining to the genus *Abies*, as Abietic Acid,  $\text{C}_{14}\text{H}_{14}\text{O}_5$  or  $\text{C}_{20}\text{H}_{30}\text{O}_5$ , discovered by Maly in the resin of *Abies excelsa* and *Larix europæa*.

**Abietin** (*a-bi'-et-in*) [*Abies*]. A resinous principle obtained from the turpentine of various species of pine and fir. **A. Anhydrid**,  $\text{C}_{14}\text{H}_{12}\text{O}$ , the main constituent of Resin, *q. v.*

**Abietis Resina** (*a-bi'-et-is res-i'-nah*). The resin of the fir or pine.

**Abietie** (*ab-i-et-it*),  $\text{C}_6\text{H}_{12}\text{O}_3$ . A sugar resembling mannite, found by Rochleder in the needles of the European Silver Fir, *Abies pectinata*.

**Abiogenesis** (*ab-i-o-jeu'-e-sis*) [*â* priv.; *βίος*, life, and *genesis*]. The (theoretical) production of living by non-living matter. The older term was *Spontaneous Generation*. Other synonyms of the word are *Generatio æquivoca*, *Generatio primaria*, *Archigenesis*, *Archebiosis*, etc. The theory has been supported by Pouchet, Haeckel, Huxley, Bastian, and others. Those opposed to the doctrine are called panspermists or heterogenists. The dispute is one of the most fundamental in biology.

**Abiological** (*ab-bi-o-loj'-ik-al*) [*â* priv.; *βίος*, life; *λόγος*, treatise]. Not pertaining to biology.

**Abirritant** (*ab-ir'-it-ant*) [*ab*, from; *irritare*, to irritate]. 1. Tending to diminish irritation; soothing. 2. Relating to diminished sensitiveness. 3. A remedy or agent that allays irritation.

**Abirritation** (*ab-ir-it-a'-shun*) [*ab*, from; *irritare*, to irritate]. Diminished tissue-irritability; atony or asthenia.

**Abirritative** (*ab-ir'-it-a-tiv*) [*ab*, from; *irritare*, to irritate]. Due to, or characterized by, atony.

**Abitus** (*ab'-it-us*) [*ab*, from, away; *ire*, to go]. In comparative anatomy, any one of the narrow canals leading from a ciliated chamber to the excurrent canal, as in the higher forms of sponges.

**Abjoint** (*ab-join'*) [*abjungere*, to separate]. In biology, to separate by means of a joint or septum.

**Abjunction** (*ab-junk'-shun*) [see *Abjoint*]. In biology, the separation by means of a joint or septum, as of spores from a growing hypha in some fungi.

**Ab lactation** (*ab-lak-ta'-shun*) [*ab*, from; *lactare*, to give suck]. The end of the suckling period. The weaning of a child.

**Abblastemic** (*ab-blas-tem'-ik*) [*â* priv.; *βλάστημα*, a shoot]. In biology, non-germinal; in no way related to germination.

**Abblastous** (*ab-blas'-tus*) [*ἀβλαστος*, not budding, sterile]. In biology, producing no germs or buds.

**Ablation** (*ab-la'-shun*) [*ablatio*, removal]. Removal of a part of the body, as a tumor, by amputation, excision, etc.

**Ablatio retinæ** (*ab-la'-she-o ret-in'-e*). Detachment of the retina.

**Ablator** (*ab-la'-tor*) [L., "remover"]. A cutting in-

strument used in the removal of parts (a name chiefly used in veterinary surgery).

**Ablepharia** (*ah-blef-ar'-e-ah*) [*â* priv.; *βλεφαρον*, the eyelid]. The condition or the absence of the eyelids.

**Ablepharon** (*ah-blef'-ar-on*) [*â* priv.; *βλεφαρον*, the eyelid]. Congenital absence of the eyelids.

**Ablepharous** (*ah-blef'-ar-us*) [*â* priv.; *βλεφαρον*, the eyelid]. Having no eyelids.

**Ablepsia** (*ah-blep'-se-ah*) [*ἀβλεψια*, without sight]. 1. Blindness. 2. Dulness of perception.

**Ablepsy** (*ah-blep'-se*). See *Ablepsia*.

**Abloom** (*a-bloom'*). In biology, the state of being in blossom.

**Abluent** (*ab'-lu-ent*) [*ablucere*, to wash away]. Detergent. That which cleanses or washes away.

**Ablution** (*ab-lu'-shun*) [*ablucere*, to wash away]. Washing or cleansing the body. Separation of chemical impurities by washing.

**Abmortal** (*ab-mor'-tal*) [*ab*, from; *mors*, death]. Passing from dead or dying to living muscular fiber (used of electric currents).

**Abnerval** (*ab-ner'-val*) [*ab*, from; *νεῦρον*, a sinew]. Passing from a nerve (used of electric currents in muscular fiber).

**Abnet** (*ab'-net*) [Hebr., a girdle]. A girdle, or girdle-shaped bandage.

**Abneural** (*ab-nu'-ral*) [*ab*, from; *νεῦρον*, nerve]. Pertaining to a part remote from the neural or dorsal aspect; ventral.

**Abnormal** (*ab-nor'-mal*) [*ab*, away from; *norma*, a law]. Not normal; not conformable with nature or with the general rule. **A. Pigmentation**, any excess, deficiency, or uncommon distribution of the natural pigment cells in the rete mucosum. Sometimes caused artificially either by mechanical means, such as tattooing, or by the reduction and deposition under the epidermis of metallic salts administered as medicine, such as nitrate of silver.

**Abnormalism** (*ab-nor'-mal-izm*) [*ab*, away from; *norma*, a law]. 1. Abnormality. 2. An abnormal thing or structure.

**Abnormality** (*ab-nor-mal'-it-e*) [*ab*, away from; *norma*, a law]. The quality of being abnormal; a deformity or malformation.

**Abnormity** (*ab-nor'-mit-e*). Same as *Abnormality*.

**Aboiement** (*ah-bwah-mong'*) [Fr.]. Barking; the involuntary utterance of barking sounds.

**Abolition** (*ab-o-lish'-un*) [*abolitio*]. Destruction; cessation; suspension, as of a physiological function.

**Abomasum** (*ab-o-ma'-sum*) [*ab*, away; *omasum*, paunch]. In biology, the reed or proper digestive stomach of ruminating mammals. It is pyriform, lined by smooth mucous membrane, which secretes gastric juice. Also called "fourth," or "true," stomach; dried, it is called rennet and used for coagulating milk.

**Aborad** (*ab-o'-rad*) [*ab*, away from; *os*, mouth]. Away from the mouth; in an aboral situation or direction.

**Aboral** (*ab-o'-ral*) [*ab*, away from; *os*, mouth]. Opposite to, or remote from, the mouth.

**Aborally** (*ab-o'-ral-ly*) [*ab*, away from; *os*, mouth]. In an aboral situation, direction, or manner.

**Aborigines** (*ab-or-ij'-in-ēz*) [*ab*, from; *origo* (origin), origin, beginning]. Primitive, autochthonous, native, indigenous.

**Abort** (*ab-ort'*) [*abortare*, to miscarry]. 1. To miscarry; to expel the fetus before it is viable. 2. To prevent the full development, as of a disease. 3. To come short of full development. 4. An abortion; an aborted fetus.

**Aborticide** (*ab-ort'-tis-id*) [*abortus*, a miscarriage; *cædere*, to kill]. 1. The killing of the unborn fetus

2. The means of killing the fetus. 3. Causing the destruction of a fetus.

**Aborticidium** (*ab-or-ti-dē-um*) [*abortus*, a miscarriage; *cedere*, to kill]. Means of killing a fetus.

**Abortient** (*ab-or' shunt*) [*L. abortiens*, miscarrying]. Abortive; abortifacient.

**Abortifacient** (*ab-or' fā- shunt*) [*abortus*; *facere*, to make]. 1. Causing abortion. 2. A drug or agent inducing the expulsion of the fetus. Ergot, rue, cotton-root, and digitalis, are examples. They act by causing uterine contractions. See *Oxytocin* and *Echolic*.

**Abortion** (*ab-or' shun*) [*abortus*, a miscarriage]. The premature expulsion of the ovum before the child is viable, that is, occurring any time before the end of the sixth month. It may be produced by various general diseases, as syphilis, the acute fevers, nephritis, most exhausting diseases; by traumatism, reflex influences, emotional disturbances; by the action of various poisons, as ergot, cantharides, rue, and savin; by diseased conditions of the uterus and displacements of that organ; or by diseases of the fetus, its membranes, or the placenta. The most important symptoms are hemorrhage and pain, with final expulsion of the uterine contents. In the first two months of pregnancy the ovum is usually expelled entire; later the membranes and placenta are retained after the fetus comes away, and must be removed subsequently. By some authors expulsion of the ovum during the first three months is *abortion*; from this time to viability it is termed *immature delivery*, or *miscarriage*, and from the period of viability to that of maturity, *premature delivery*. **A.**, Artificial, that produced intentionally. **A.**, Criminal, when not demanded for therapeutic reasons. **A.**, Embryonic, up to the fourth month. **A.**, External Causes of, those acting from without, as violence, pressure, injections, etc. **A.**, Fetal, taking place subsequent to the fourth month. **A.**, Habitual, repeated *A.* in successive pregnancies. **A.**, Incomplete, when the membranes or placenta are retained. **A.**, Inevitable, when the embryo or fetus is dead, or when there is an extensive detachment or rupture of the ovum. **A.**, Internal Causes of, those due to abnormal conditions or diseases of the mother. **A.**, Missed, the death of the fetus and not followed within two weeks by its expulsion. **A.**, Ovular, that occurring during the first three weeks after conception. **A.**, Paternal and Maternal Causes of, those due to diseases of the father or of the mother respectively. **A.**, Spontaneous, that not induced by artificial means.

**Abortionist** (*ab-or' shun-ist*) [*abortus*, a miscarriage]. One who criminally produces abortions; especially one who follows the business of producing abortions.

**Abortive** (*ab-or' tiv*) [*abortus*, a miscarriage]. Prematurely born; coming to an untimely end; incompletely developed; cutting short the course of a disease; abortifacient. **A.** Epilepsy. See *Epilepsy*.

**Abortus** (*ab-or' tus*) [*L.*]. An aborted fetus; the fruit of an abortion.

**Aboulia** (*ah-bo' le-ah*). See *Abulia*.

**Aboulomania** (*ah-b o-lo-mā' ne-ah*). See *Abulomania*.

**Ab ovo** (*ah o' vo*) [*L.*]. In biology, from the egg; from the beginning.

**Abrachia** (*ah-brā' ke-ah*) [*ā priv.*; *ἄραχιον*, arm]. The condition of an armless monster. In biology, without anterior limbs.

**Brachiocephalia** (*ah-brā' ke-o sef-ā' le-ah*) [*ā priv.*; *ἄραχιον*, arm; *κεφαλή*, head]. Absence of head and arms from a fetus.

**Abbrachius** (*ah brā' k us*). A monster without arms. See *Abrahia*.

**Abrade** (*ah-brā' d*) [*abrader*, to rub off]. To remove by friction or chaling; to roughen by friction.

**Abranchia** (*ah-brang' ke-ah*) [*ā priv.*; *βράχια*, gills]. In biology, a name given to several different groups of animals that have no gills.

**Abrasio** (*ab-rā' zē-o*) [*L.*]. An abrasion. **A. corneæ**, operative removal of the epithelium of the cornea because of diseased conditions.

**Abrasion** (*ab-rā' zhum*) [*abrasio*; *ab*, priv.; *radere*, to rub]. Excoriation of the cutaneous or mucous surface by mechanical means. In dentistry, the wearing away of the dentine and enamel, or the cutting edges of the teeth, whether by mechanical or chemical means.

**Abrador** (*ab-rā' zor*) [*L.* "abrader"]. A surgeon's rasp or xyster; any file or instrument used in the surgical or dental abrasion of a surface; also, a rasp used in pharmacy.

**Abric Acid** (*ā' brik ā' id*). See *Acid*.

**Abrin** (*ā' brin*). 1. The chemical ferment or poisonous principle of jequirity, erroneously supposed to be due to a specific microbe. See *Bacillus of jequirity ophthalmia* in Table of Bacteria. 2. A vegetable albuminoid employed in the study of immunity.

**Abroma** (*ah-brō' mah*) [*ā priv.*; *βρώμος*, a stink]. A genus of sterculiaceae trees. *A. augusta*, of S. Asia, affords a milky juice, esteemed in dysmenorrhea. Unof.

**Abrotanum** (*ab-rō' tū-um*) [*ἀβρότον*, an aromatic plant]. The plant called Southern Wood, *Artemisia abrotanum*. See *Artemisia*.

**Abrupt** (*ab-rup' t*) [*abruptus*, broken off]. In biology, terminating suddenly; truncated.

**Abruption** (*ab-rup' shun*) [*abruptio*, from *ab*, and *rumper*, to break]. 1. A rupture or tearing asunder. 2. A transverse fracture.

**Abrus** (*ā' brus*) [*ἄβρος*, pretty]. Jequirity; Indian Licorice. The seeds of *A. precatorius*, or Wild Licorice. Properties are thought to be due to the presence of certain ferments. Non-sterilized infusions applied to the conjunctiva or to any mucous surface induce violent purulent inflammation with growth of false membrane. It is used in producing artificial conjunctivitis. **A.** Infusum: semina iij, aqua dest. ℥ss. Macerate and add aq. ℥ss. All unofficial. **Abri** Liqueur, strength 12 per cent.; dilute with 3 to 5 times its bulk of water and apply 2 drops daily. **Abri** Pasta, 1 in 4; used with caution in affections of the skin.

**Abscess** (*ab' ses*) [*abscessus*, a departure or separation — of the matter]. A pus-formation within some cavity of the body, the result of localized inflammation. According to location, abscesses are named *Dorsal*, *Iliac*, *Mammary*, *Ischio-rectal*, *Peri-typhliti*, *Retro-pharyngeal*, *Urethral*, etc. **A.**, Alveolar, abscess in the gum or alveolus. **A.**, Atheromatous. See *Enderleritis*, *Chronic*. **A.** of Brain, due to local injury, or to suppurative inflammation near or distant, such, especially, as diseases of the ear. The symptoms are those of pressure, impaired function of the part affected, meningitis, headache, optic neuritis, etc. **A.**, Bursal, abscess in the bursa, the most frequent being in the bursa patellæ, commonly called *Housemaid's Knee*. **A.**, Canalicular, mammary abscess that communicates with a milk duct. **A.**, Caseous, one that contains cheesy materials. **A.**, Chronic, or *Cold Abscess*, one of slow and apparently non-inflammatory development, usually about a bone, joint, or gland. **A.**, Cold. See *A.*, *Chronic*. **A.**, Congestive, the pus appears at a point distant from where it is formed. **A.**, Constitutional, due to some systemic disorder. **A.**, Critical, occurring at some critical period of an acute disease. **A.**, Embolic, formed in the clot of an embolism. **A.**, Fecal, one developing in the rectum or large intestine. **A.**, Gangrenous, one attended with death of adjacent parts. **A.**, Lacunar, one in the lacune of the urethra. **A.**, Metastatic. See *Pyemia*. **A.**, Miliary. See

*Pyemia*. **A**, Milk, or **A.**, Mammary, one in the female breast. **A.**, Multiple. See *Pyemia*. **A.**, Ossifluent. See *Ossifluent*. **A.**, Perforating, one perforating the cornea, the lung, or other containing wall. **A.**, Phlegmonous, an acute **A**. **A.**, Pointing of, the point where the abscess tends to break through its external confining wall. **A.**, Psoas, one arising from disease of the lumbar, or lower dorsal vertebrae, the pus descending in the sheath of the psoas muscle, and usually pointing beneath Poupart's ligament. **A.**, Pyemic. See *Pyemia*. **A.**, Residual, about the products of some old result of inflammation. **A**, Root, the root of *Polemonium Reptans*. Alternative, astringent and expectorant. Dose of fld. ex. 5 ss-ij. Unof. **A.**, Shirt Stud, retro-mammary abscess concurrent with a subintegumentary abscess, the two sacs communicating by means of a sinus. **A.**, Stercoraceous. See *Fecal A*. **A.**, Symptomatic, one indicative of some other affection. **A.**, Thecal, in the sheaths of tendons. **A.**, Tropical, acute hepatitis terminating in suppuration and abscess formation. **A.**, Tubercular. Same as *A.*, Cold.

**Abcession** (*ab-sesh'-un*) [*abscissio*, departure]. 1. An abscess; a critical discharge. 2. Metastasis.

**Abscissæ** (*ab-sis'-e*) [*ab*, away; *scindere*, to cut]. The transverse lines cutting vertical ones at right angles, to show by a diagram the relations of two series of facts, as, e. g., the number of pulse-beats, or the temperature record in given periods of time.

**Abcision** (*ab-sish'-un*) [*ab*, from; *scindere*, to cut]. Removal of a part, as the prepuce, or a fractured bone, by cutting. Applied particularly to a surgical operation upon a staphyломatous cornea, in which the bulging portion is excised, the parts brought together so that the posterior and chief part of the globe forms a "stump" for an artificial eye. In biology, a term applied to that mode of detachment of spores in fungi which consists in the disorganization of the zone connecting the spores with the hypha.

**Abconsio** (*ab-skou'-se-o*) [*abcondere*, to hide]. A sinus or cavity whether normal or pathological.

**Absence** (of mind) (*ab'-sens*) [*absentia*, absence]. Inattention to surroundings; in marked instances it may be a result of central lesions. It is often seen in epileptics and melancholics.

**Absentia epileptica** (*ab-sen'-she-ah ep-il-ep'-tik-ah*). Brief losses of consciousness occurring in the mild form of epilepsy.

**Absinthe** (*ab'-sin'-th* or *ab-saut'*). See *Absinthium*.

**Absinthin** (*ab-sin'-thin*) [*absinthium*]. A bitter and crystalline principle obtainable from wormwood. See *Absinthium*.

**Absinthism** (*ab-sin'-th-izm*). A disease similar to alcoholism, the result of the excessive use of absinthe. It is characterized by general muscular debility and mental disturbances, which may proceed to convulsions, acute mania, general softening of the brain, or general paralysis.

**Absinthium** (*ab-sin'-th-e-um*) [1.]. Wormwood. The leaves and tops of *Artemisia abinthium*. Contains a volatile oil and an intensely bitter principle, *Absinthin*,  $C_{20}H_{38}O$ , which is a narcotic poison. **A** increases cardiac action, produces tremor and epileptiform convulsions. Dose gr. xx-xl, in infusion. Used as a stomachic tonic. *Absinthe*, a French liquor, is an alcoholic solution of the oil exhibited with oils of anise, marjoram, and other aromatic oils.

**Absintheol** (*ab-sin'-th-e-ol*),  $C_{10}H_{16}O$ . The principal constituent of oil of wormwood; it is isomeric with ordinary camphor.

**Absolute Alcohol** (*ab'-so-lüt al'-ko-hol*). See *Alcohol*.

**Absorb** (*ab-sorb'*) [*ab*, from; *sorbere*, to suck up]. In

physiology, to suck up or imbibe, as the imbibition performed by the lacteals in the body.

**Absorbent** (*ab-sor'-bent*) [*absorbere*, to suck in]. In physiology, an organ or part that absorbs, withdraws, or takes up. A term applied to the *Lacteals* and *Lymphatics*, q. v. In materia medica, a drug or medicine that produces absorption or exudation of diseased tissue. In surgery, a substance that mechanically takes up excreted matter, as *A. Cotton*, *A. Sponge*, etc. **A**, Glands. See *Lymphatics*. **A**, System, the lacteals and lymphatics, with their associated glands.

**Absorptiometer** (*ab-sorp-te-om'-et-er*) [*ab orption*; *meter*]. A device for measuring the thickness of the layer of liquid that is taken up between two glass plates by capillary attraction. Used in conjunction with a spectro-photometer, it serves as a hematoscope.

**Absorption** (*ab-sor'-shun*) [*absorbere*, to suck in]. The permeation or imbibition of one body by another. The process whereby nourishment, medicines, morbid products of tissue metamorphosis, etc., are taken up by the lymphatic and venous systems. In ophthalmology the process by which the lens is disintegrated and carried off after the capsule has been ruptured. **A**, Lines or Bands, the lines of the spectrum, called Fraunhofer's lines; they are dark lines caused by the arrestation or absorption of the ethereal waves of certain lengths and rapidities, mainly by vapors of the sun's atmosphere. **A**, of Composition, or External Absorption, the taking up of material by the skin or mucous surfaces. **A.**, Cutaneous, absorption by the skin. **A.**, Disjunctive, the removal of living tissue around a necrosed mass, and its consequent separation from its surroundings. **A.**, Interstitial, the removal by the absorbent system of effete matters. **A**, Method, to determine whether or not hematuria is due to lesion of the bladder. It is based on the fact that the undened surface of the bladder will not absorb foreign substances. Fifteen grains of potassium iodid are injected into the bladder, and fifteen minutes later the saliva is examined for iodine. If found, it is an indication of an unhealthy state of the bladder. **A.**, Progressive, atrophy of a part due to pressure. **A.**, Pulmonary, the taking up of oxygen, or of vapors (as of ether), by the lungs. **A.**, Venous, absorption by the veins.

**Absorptive** (*ab-sor'-tiv*) [*absorbere*, to suck in]. Having the power or function of absorbing.

**Absorptivity** (*ab-sor'-tiv-i-ty*) [*absorbere*, to suck in]. The power or quality of being absorbent.

**Abstemiousness** (*ab-ste'-me-us-ness*) [*ab*, from; *temere*, wine]. Abstinence from wine. Temperance or moderation in matters of diet.

**Abstinence** (*ab-sten'-shun*) [*abstinio*, retention]. An act of abstinence, or of abstaining; retention; constipation.

**Abstergent** (*ab-st-r'-jent*) [*ab*, from; *tergere*, to cleanse]. Cleansing, detergent. See *Detergent*.

**Abstersive** (*ab-ste'-siv*) [*abstersio*]. Abstergent.

**Abstinence** (*ab'-stin-en*) [*ab*, from; *tenere*, to hold or keep]. Privation or self-denial in regard to food, liquors, etc. See *Fasting*.

**Abstract** (*ab'-trakt*) [*abtrahere*, to draw away; *Abstractum*; gen., *Abstracti*; pl., *Abstracta*]. In pharmacy, a solid preparation in which two parts of the drug are represented by one part of the abstract (which is compounded with milk-sugar). Abstracts are double the strength of fluid extracts. They are permanent, but should be kept in a cool place.

**Abstraction** (*ab-strak'-shun*) [*abstractio*, a drawing away]. Blood-letting. Also, attention to one idea to the exclusion of others. Generalization or classi-

fication of the qualities common to the individuals of a group. In pharmacy, the process of distillation.

**Abstractitious** (*ab-strak-tish'-us*) [*abstrahere*, to draw away]. Susceptible of being abstracted without change from another substance; derived or derivable by abstraction.

**Abstractum** (*ab-strak'-tum*) [*pl.*, *Abstracta*]. An abstract. See *Abstract*.

**Abstriction** (*ab-strak'-shun*) [*ab*, from; *stringere*, to bind]. Spore-formation in lower cryptogams characterized by decided constriction of the walls at the place of division.

**Absus** (*ab'-us*) [L.]. The plant *Cassia absus* of India and Egypt. Its seeds are locally employed in the treatment of ophthalmia, and are regarded as depurative. Unof.

**Abterminal** (*ab-t'-min-al*) [*ab*, from; *terminus*, end]. Passing from tendinous into muscular tissue (used of electric currents).

**Abulia** (*ah-bu'-le-ah*) [*à priv.*; *βουλή*, will]. Loss or defect of will power.

**Abulic** (*ah-bu'-lik*). Characterized by or affected with abulia; of defective will-power.

**Abulomania** (*ah-bu-lo-ma'-ne-ah*) [*à priv.*; *βουλή*, will; *μανία*, madness]. A disease of the mind characterized by imperfect or lost will-power.

**Abumbrella** (*ab-um-brul'-ah*) [*ab*, from; *umbrella*, the disc of acalephs]. In biology, a term applied to the surface of the velum, it being turned away from the disc, in medusae. Opposite of *Adumbrella*.

**Abuta** (*ah-boo'-tah*) [L.]. A genus of menispermaceous plants. *A. amara*, affords false pareira brava, and *A. rufescens* is the so-called white pareira brava. Both are S. American. Unof.

**Abutilon** (*a-bu'-til-on*) [L.]. A genus of malvaceous plants. *A. avicenna*, common in the U. S. (velvet-leaf Indian mallow); is demulcent, and is a safe remedy for diarrhea. Unof.

**Abvacuation** (*ab-vak-u-a'-shun*). Same as *Abevacuation*, *q. v.*

**Abysmal** (*ah-biz'-mal*) [*abyssus*, abyssin]. Fathomless. Pertaining to great depths in the ocean. See *Abyssal*.

**Abyssal** (*ah-bis'-al*) [*ἄβυσσος*, without bottom]. In biology, refers to plants and animals inhabiting the depths of the ocean between 100 and 1000 fathoms. **A. Theory of Light**, an hypothesis assuming the importance of phosphorescence and of luminous organs in fishes and other animals in depths of the ocean where no sunlight penetrates.

**Acacia** (*ah-ka'-she-ah*) [L.; Gr., *ἄκακία*]. 1. A large genus of leguminous trees, shrubs, and herbs, many of them Australian or African. Many of the species are medicinal, and some are poisonous. The bark is usually very astringent. Gum arabic is produced by various species, mostly either African or Asiatic. 2. *A. anthelmintica*. See *Mussanin*. *A. catechu*. See *Catechu*. *A. lebbek*, *A. nilotica*, *A. vera*, and *A. verec*, are among the species that furnish gum arabic. 3. Gum Arabic. A nearly white transparent gum exuding from *Acacia Senegal*. Soluble in water. Used in the manufacture of mucilage. Contains *Arabin*,  $C_{12}H_{22}O_{11}$ , identical in composition with cane-sugar. **A.**, Mucilage, acacia 34, water 100 parts; incompatible with alcoholic tinctures. **A.**, Syrup, mucilage 25, syrup, simp. 75. Used in various mixtures as a demulcent and to suspend insoluble powders.

**Acajou** (*ak a' jhou'*). See *Cashew*.

**Acaleph** (*ak'-al-ef*) [*ἰκαλῆφης*, a nettle, a sea-nettle]. In biology, one of the acalaphae, or sea-nettles; a medusa, a sea-blubber.

**Acalephoid** (*ak-al-ef'-oid*) [*ἰκαλῆφης*, a nettle, a sea nettle]. Resembling an acaleph.

**Acalycal** (*ah-kal'-ik-al*) [*à priv.*; *κάλυξ*, calyx]. In biology, used to describe stamens inserted upon the receptacle, not adherent to the calyx.

**Acalycine** (*ah-kal'-is-in*) [*à priv.*; *κάλυξ*, calyx]. In biology, lacking a calyx, acalycinous.

**Acalyculate** (*ah-kal'-ik'-u-lát*) [*a priv.*; *calyculus*, a calycle]. In biology, having no calycle, or accessory calyx.

**Acalypha** (*ah-kal'-if-ah*) [*ἰκαλῖφις*, unveiled]. A genus of euphorbiaceous plants. **A.**, **Ext.**, **Liq.** Dose  $\text{m x-5j}$ . *A. fruticosa*, of India, is useful in dyspepsia and diarrhea, and is tonic and alterant. *A. hispida* has similar uses. *A. indica*, a euphorbiaceous plant, common in India. The leaves are expectorant, emetic, laxative. **A. Succus**. Dose for an infant  $\text{5j}$ . Unof. *A. virginica*, of North America, is diuretic and expectorant.

**Acamathesia** (*ak-am-ath-e'-ze-ah*) [*ἀκαμάθησις*]. Same as *Akatamathesia*.

**Acamathesis** (*ak-am-ath-e'-sis*) [*ἀκαμάθησις*]. Same as *Akatamathesia*.

**Acampsia** (*ah-kamp'-se-ah*) [*à priv.*; *κάμπτειν*, to bend]. Inflexibility of a limb.

**Acanaceous** (*ak-an-a'-se-us*) [*ἰκανός*, a prickly shrub]. In biology, beset with prickles, as the edges of some leaves.

**Acantha** (*ak-an'-thah*) [*ἰκανθα*, a thorn]. In botany, a thorn or prickle; in zoölogy, a spine or fin ray; in anatomy, a vertebral process.

**Acanthæsthesia** (*ak-anth-es-the'-ze-ah*). See *Akanthesthesia*.

**Acanthia lectularia** (*ak-an'-the-ah lek-chu-la'-re-ah*) [L.]. The common bedbug.

**Acanthial** (*ak-an'-the-al*) [*ἰκανῆλιον*, a little thorn]. Pertaining to the acanthion.

**Acanthichthyosis** (*ak-anth-ik-the-o'-sis*) [*ἰκανῆλιον*, a little thorn; *ἰχθίς*, a fish]. *Ichthyosis spinosa*, *q. v.*

**Acanthion** (*ak-an'-the-on*) [*ἰκανῆλιον*, a little thorn]. See *Cranionometrical Points*.

**Acanthocarpous** (*ak-anth-o-kar'-pus*) [*ἰκανθα*, a thorn; *καρπός*, fruit]. In biology, spiny-fruited.

**Acanthocephala** (*ak-an-tho-sef'-al-ah*) [*ἰκανθα*, spine; *κεφαλή*, head]. An order of parasitic worms, characterized by a thorny armature of the head and proboscis. They are generally grouped in one genus, *Echinorhynchys*. They infest pigs, birds, and fishes, and in their larval stage live in crustaceans.

**Acanthocephalous** (*ak-anth-o-sef'-al-us*) [*ἰκανθα*, a spine; *κεφαλή*, head]. In biology, spiny-headed.

**Acanthocladaous** (*ak-anth-ok'-lad-us*) [*ἰκανθα*, a spine; *κλάδος*, a branch]. In biology, possessing spiny branches.

**Acanthoid** (*ak-an'-thoid*) [*ἰκανθα*, a spine]. Resembling a spine, or spicula; spinous.

**Acanthological** (*ak-anth-o-loj'-ik-al*) [*ἰκανθα*, a spine; *λόγος*, to speak]. In biology, pertaining to the knowledge of spines.

**Acantholysis** (*ak-an-thol'-is-is*) [*ἰκανθα*, prickle; *λύσις*, a loosening, a wasting]. Any skin disease in which there is an atrophy of the prickle-layer. **A. Bullosa**. See *Epidermolysis*.

**Acanthoma** (*ak-anth-o'-mah*) [*ἰκανθα*, a spine; *pl.*, *Acanthomata*]. A localized excessive growth in any part of the prickle-cell layer of the skin.

**Acanthomastic** (*ak-anth-o-mas'-tik*) [*ἰκανθα*, a spine; *μαστιχῆν*, mastic]. A gum produced by *Atractylis gummifera*, a plant of the Mediterranean region; valued in the Oriental countries. Unof.

**Acanthopelvis** (*ak-anth-o-pe'-vis*) [*ἰκανθα*, thorn; *πέλις*, pelvis]. Same as *Acanthopelys*.

**Acanthopelys** (*ak-anth-op'-el-is*) [*ákavtha*, thorn; *πέλγς*, pelvis]. A pelvis that is encroached upon by exostoses.

**Acanthophorous** (*ak-anth-off'-or-us*) [*ákavtha*, a spine; *φέρω*, to bear]. In biology, bearing or producing spines or thorns.

**Acanthopod** (*ak-anth'-o-pod*) [*ákavtha*, a spine; *ποίς*, foot]. In biology, an animal with spiny feet, or spine-like claws.

**Acanthopterous** (*ak-anth-op'-ter-us*) [*ákavtha*, a spine; *πτέρον*, a wing]. In biology, having spiny wings or fins.

**Acanthosis** (*ak-anth'-o'-sis*) [*ákavtha*, thorn]. Any skin disease marked by abnormalities in the prickle-cell layer. *A. Nigricans*, a general pigmentation of the skin, with papillary, mole-like growths; a rare condition.

**Acanthus** (*ak-anth'-us*) [*ákavthos*, a spine]. A genus of European herbs. *A. mollis* and *A. spinosa* were formerly much esteemed as vulnerary, antidyenteric and antihelminthic remedies; they are demulcent and mucilaginous. Unof.

**Acapsular** (*ah-kap'-su-lar*) [*à* priv.; *capsula*, a small box or capsule]. In biology, destitute of a capsule.

**Acardia** (*ah-kar'-de-ah*) [*à* priv.; *καρδία*, heart]. A monstrosity without heart, developed simultaneously with a normal fetus.

**Acardiæ** (*ah-kar'-de-ak*) [*à* priv.; *καρδία*, heart]. 1. Having no heart. 2. A fetus with no heart. See *Acardiæ*.

**Acardiæ** (*ah-kar'-di'-ak-us*) [*à* priv.; *καρδία*, heart]. See *Acardiæ*. A synonym, employed mainly by the German writers, for omphalosis. The term was adopted because of the frequent absence of the heart in this condition. **A. Acornus**. See *Asomata*. **A. Anceps**. Same as *Paracephalus*, *q. v.*

**Acardiohemia**, or **Acardiœhmia** (*ah-kar-de-o-he'-me-ah*) [*à* priv.; *καρδία*, heart; *αἷμα*, blood]. Lack of blood in the heart.

**Acardonervia** (*ah-kar-de-o-ner'-ve-ah*) [*à* priv.; *καρδία*, heart; *νεῦρον*, a sinew]. Diminished nervous action or nerve-stimulus in the heart.

**Acardiophagia** (*ah-kar-de-o-tro'-fe-ah*) [*à* priv.; *καρδία*, heart; *τροφή*, nutrition]. Atrophy of the heart.

**Acarian** (*ah-ka'-re-an*) [*ákarijs*, small, tiny]. Of or pertaining to the acarids or mites.

**Acariasis** (*ak-ar-i'-as-is*) [*à* priv.; *κείρω*, to cut]. See *Mange*.

**Acaricidal** (*ak-ar-is-i'-dal*) [*ákarijs*, small, tiny; *cædere*, to kill]. Destructive of acarids, or mites.

**Acaricide** (*ak-ar-i'-is-id*) [*ákarijs*, small, tiny; *cædere*, to kill]. An agent that destroys acarids.

**Acarid**, **Acaridan** (*ak'-ar-id*, *ak-ar'-id-an*) [*ákarijs*, small, tiny]. Pertaining to *Acarus*.

**Acarina** (*ak-ar-i'-nah*) [L.]. An order of insects (mites) with stout bodies, having the unjointed abdomen consolidated with the head and thorax, with biting, sucking, or puncturing mouth-organs, breathing mostly by means of tracheæ.

**Acarinosis** (*ak-ar-in-o'-sis*) [*acarus*, a mite]. Any disease, as the itch, produced by a mite, or acarid.

**Acarodermatitis** (*ak-ar-o-der-mat-i'-tis*) [*acarus*, a mite; *dermatitis*]. Dermatitis dependent upon or caused by acari, or mites.

**Acaroid** (*ak'-ar-oid*) [*Acarus*, a mite]. Mite-like. **A. Gum**, Botany Bay Gum; Resina lutea. An aromatic resin used in Australia as a remedy for gastric troubles, intestinal catarrhs, diarrheas, etc. Dose grs. viij-xvj, in alcoholic solution. Unof. **A. Resin**, Black Boy Gum. The resin of various species of *Xanthorrhœa*, *q. v.* Benzoic acid is prepared from it, and it is said to have the properties of storax, and balsam of Peru.

**Acarotoxic** (*ak-ar-o-toks'-ik*) [*acarus*, a mite; *τοξικον*, a poison]. Poisonous, or destructive, to acari.

**Acarpæ** (*a-ka'-r'-pæ*) [*à* priv.; *καρπος*, fruit]. A name proposed for a group of skin diseases in which there are no papules, tubercles, or elevated points.

**Acarpous** (*ak-ar'-pus*) [*à* priv.; *καρπος*, fruit]. Having no elevations; not nodular. In biology, producing no fruit; sterile, barren.

**Acarus** (*ak'-ar-us*) [*à* priv.; *κείρω*, to cut (because so small): *pl.*, *Acari*]. The mite, or tick, a parasite of man and animals. *A. autumnalis* the harvest-bug, now called *Leptus autumnalis*. *A. folliculorum*. See *Steatozoön*. *A. scabiei*. See *Scabies*.

**Acatalepsy** (*ah-kat'-al-ep-se*) [*à* priv.; *καταλαμβάνειν*, to understand]. 1. Uncertainty in diagnosis. 2. Mental impairment; dementia.

**Acataleptic** (*ah-kat-al-ep'-tik*) [*à* priv.; *καταλαμβάνειν*, to understand]. Uncertain; doubtful (used of a prognosis or a diagnosis of a disease).

**Acatamathesia** (*ah-kat-am-ath'-e-ah*) [*à* priv.; *καταμάθησις*, understanding]. 1. Inability to understand conversation, due to mental disorder. 2. A morbid blunting of the perceptions; as in psychical deafness, or psychical blindness.

**Acataphasia** (*ah-kat-af-a'-e-ah*) [*à* priv.; *κατά*, after; *φάσις*, utterance]. A disorder in the syntactical arrangement of uttered speech, due to some central lesion.

**Acataposis** (*ah-kat-ap'-o-sis*) [*à* priv.; *κατά*, down; *πίσις*, a drinking, a swallowing]. A difficulty in swallowing; dysphagia.

**Acatastasia** (*ah-kat-as-ta'-e-ah*) [*ákatastasia*]. Absence of regularity, or of fixed character, in the course of a disease, or in the nature of an excretion.

**Acatastatic** (*ah-kat-as-tat'-ik*). Marked or characterized by acatastasia; irregular; not of definite type.

**Acatarsia** (*ah-kath-ar'-se-ah*) [*ákatharsia*, uncleansed state]. Impurity; foulness; need of purgation, or cleansing.

**Acaudal** (*ah-karv'-dal*) [*à* priv.; *cauda*, a tail]. Acaudate, ecaudate, tailless, anurous.

**Acaudate** (*ah-karv'-dāt*). Same as *Acaudal*.

**Acaules** (*ah-karv'-lēz*) [*à* priv.; *caulis*, a stem]. Plants which, as in the case of lichens, algae, etc., lack a stalk, or have it but very indistinctly developed.

**Acaulescence** (*ah-karv-les'-ens*) [*à* priv.; *caulis*, a stalk]. In biology, plants wherein the growth of the main stem is arrested. Also *Acaulosia*.

**Acaulescent** (*ah-karv-les'-ent*) [*à* priv.; *caulis*, a stalk]. In botany, stemless.

**Acaulosia** (*ah-karv-lo'-se-ah*) [*à* priv.; *caulis*, a stalk]. See *Acaulescence*.

**Accelerans Nerve** (*ak-sel'-er-ans*) [L.]. A nerve from the accelerans center in the medulla to the heart, inter-mediating acceleration of its rhythm.

**Acceleration** (*ak-sel'-er-a'-shun*) [*acceleratio*]. Quickening, as of the pulse, or of the respiratory function. In biology, the term applied to change of structure during growth brought about by the addition of parts, either by "homotopy" or by "heterotopy."

**Accelerative Epilepsy** (*ak-sel'-er-a-tiv: ep'-il-ep-se*). See *Epilepsy*.

**Accelerator Urinæ** (*ak-sel'-er-a-tor u-ri'-næ*) [L.]. A muscle of the penis whose function is to expel the last drops in urination, to expel the semen, and to assist erection. The sphincter vaginæ is its analogue in the female. See *Muscles*, *Table of*.

**Accentuation** (*ak-sen-tu-a'-shun*) [*accentuare*]. A term applied to the heart sounds, generally the second, when they are louder, because of an increased blood-tension in the vessels, giving rise to a forcible elastic recoil of the latter with abrupt closure of the valves.

**Access** (*ak'-ses*) [*acces'sus*, an approach]. 1. An attack of a disease. 2. The return of a fit, or paroxysm. 3. Cohabitation.

**Accessiflexor** (*ak-ses-e-fleks'-or*) [*accessus* and *flexor*]. An accessory flexor muscle.

**Accession** (*ak-sesh'-un*) [*accessio*; *ad*, to; *cadere*, to go]. The assault, beginning, or onset of a disease, or of a stage of the same; applied especially to a recurrence of periodical disease.

**Accessive** (*ak-sesh'-iv*) [*accessus*]. Marked or characterized by sharp and sudden accessions or paroxysms.

**Accessorium** (*ak-ses-so'-re-um*) [L.]. An accessory part; an adjunct, or appendage.

**Accessory** (*ak'-ses-o-re*, or *ak-se/-o-re*) [*accessorius*]. A term applied to certain glands, muscles, ducts, nerves, arteries, *etc.*, that are often inconstant, but always auxiliary in function, course, *etc.*, to the principal. Certain small muscles, as the lumbricales, are regarded as accessory to more important muscles. In biology, something additional; as an accessory bud, fruit, or plume. **A. Buds**, in botany, buds that are developed by the side of, or above, the normal axillary bud. **A. Fruits**, in botany, those fruits a considerable portion of whose substance is distinct from the seed-vessel and formed of the accrescent and succulent calyx, or torus, or receptacle, bracts, *etc.* **A. Gland of Rosenmüller**. See *Gland*. **A. Gland of the Pancreas**, *Brunner's Glands*, *q. v.* **A. of the Parotid**, the *Socia Parotidis*, *q. v.* **A. Valves**, in zoölogy, small additional valves which occur in certain forms, as the accessory valves placed near the umbones of the genus *Pholas* among the *Mollusca*.

**Accident** (*ak'-se-dent*) [*accidere*, to occur]. 1. In legal medicine, an event occurring to an individual without his expectation, and without the possibility of his preventing it at the moment of its occurrence. 2. An intercurrent or complicating symptom or event, not to be looked for in the regular progression of an attack of disease.

**Accidental** (*ak-s'-dent'-al*) [*accidentalis*]. 1. Due to, or caused by, an accident. 2. Intercurrent; having no essential connection with other conditions or symptoms. **A. Hemorrhage**. See *Hemorrhage*.

**Accidentalism** (*ak-se-dent'-al-ism*) [*accidentalis*]. That theory of medicine that ignores pathology and etiology, and attends only to the symptoms or accidental features of disease.

**Accidentalist** (*ak-se-dent'-al-ist*) [*accidentalis*]. One who advocates or follows accidentalism.

**Accipiter** (*ak-sip'-it-er*) [L., a "hawk"]. A facial bandage with tails radiating like the claws of a hawk.

**Acclimate** (*ak-kli'-māt*) [*ad*, to; *clima*, a climate]. To accustom to a new or untried climate.

**Acclimation** (*ak-kli-mat'-a'-shun*), or

**Acclimation** (*ak-kli-mat'-a'-shun*). See *Acclimatization*.

**Acclimatization** (*ak-kli-mat-iz'-a'-shun*) [*ad*, to; *clima*, climate]. The process of becoming accustomed to the climate, soil, water, *etc.*, of a country to which a plant, animal, person, or a people has removed.

**Acclimatize** (*ak-kli-mat-iz*) [*ad*, to; *clima*, climate]. See *Acclimate*.

**Acclivis** (*ak-kli'-vī*) [L., "sloping"]. The *Obliquus internus* muscle of the abdomen.

**Accommodation** (*ak-om-o-dat'-shun*) [*accommodare*, to adjust]. Adaptation or adjustment. Adaptation of the fetus to the uterus and birth-canal. **A.**, **Absolute**, the accommodation of either eye separately. **A.**, **Anomalies of**, departures from the normal in the action of the mechanism of accommodation. **A.**, **Histological**, the occurrence of changes in the morphology and function of cells following

changed conditions. **A.**, **Negative**, the eye passive or at rest. **A. of the Eye**, that function of the ciliary muscle and lens whereby objects at different distances are clearly seen. It depends upon the inherent elasticity of the lens, which when the ciliary muscle of an emmetropic eye is at rest is adapted to the proper focalization of parallel rays of light, or of such rays as proceed from an infinite distance, or from the horizon of the observer. Objects nearer, to be clearly seen, require a greater refracting power on the part of the eye because the rays from such objects are more divergent. This additional refracting power is gained by an increased antero-posterior diameter of

the lens, *L.* (illustration annexed) brought about by the contraction of the ciliary muscle, *M*, which occasions a loosening of the suspensory ligament and a thickening of the lens by its own elasticity. **A.**, **Paralysis of**, paralysis of the ciliary muscle. **A.**, **Phosphenes**, the peripheral light streak seen in the dark after the act of accommodation. **A.**, **Range of**, the distance between the *Punctum proximum*, or nearest of distinct vision, and the *Punctum remotissimum*, or the most distant point. **A. Theory**, a theory that ascribes the production of myopia to a distention of the posterior portion of the sclera from the increased intra-ocular pressure dependent upon frequently repeated accommodation of the eyes.

**Accompaniment** (of the Cataract) (*ak-kum'-pan-e-ment*). An old name for secondary or recurrent capsular cataract; opacity of the capsule following an operation for cataract.

**Accouchée** (*ak-koo-shay*) [Fr., *a*, to; *couche*, a bed]. A woman delivered of a child.

**Accouchement** (*ak-kooosh-mong*) [*ad*, to; *couche*, bed]. The French term for labor, or delivery of a child. The act of childbirth. **A. Forcé**, rapid and forcible delivery with the hand during severe hemorrhage.

**Accoucheur** (*ak-koo-shur*) [Fr.]. A man-midwife.

**Accoucheuse** (*ak-koo-shuz*) [Fr.]. A midwife.

**Accrementital** (*ak-re-men-tish'-al*) [*accrescere*, to increase]. In biology, of or pertaining to the process of accrementation.

**Accrementition** (*ak-re-men-tish'-un*) [*ad*, to; *crecere*, to grow]. A growth in which increase takes place by interstitial development from blastema, and also by reproduction of cells by fission. The production or development of a new individual by the separation of a part of the parent; gemmation.

**Accrescent** (*ak-res'-ent*) [*accrescere*, to grow]. In biology, refers to those parts connected with the flower which increase in size after flowering, as frequently occurs with the calyx, involucre, *etc.*

**Accrete** (*ak-ret*) [*accretus*; *accrescere*, to increase, grow]. In biology, grown together.

**Accretion** (*ak-ret'-shun*) [*ad*, to; *crecere*, to increase]. A term denoting the manner by which crystalline and certain organic forms increase their material substance. Also, the adherence of parts that are normally separate.

**Accumbent** (*ak-um'-bent*) [*ad*, to; *cumbere*, to lie down]. In biology, lying against a thing. Cotyledons

are accumbent when the edges of their applied faces lie against the radicle.

**Accumulator** (*ak-u'-mu-lu-tor*) [*accumulare*, to heap up]. An apparatus to store electricity.

**A. C. E. Mixture**. An anesthetic mixture composed of alcohol 1 part, chloroform 2 parts, ether 3 parts. See *Anesthetic*.

**Acedia** (*ah-sef-de-ah*) [*ἀκηδία*]. A certain form of melancholia.

**Acellus** (*ah-sef-le-us*) [*ἄ priv.*; *κοιλία*, the belly]. Without a belly; applied to those extremely emaciated.

**Acelomatous** (*ah-sef-o'-mat-us*) [*ἄ priv.*; *κοιλίωμα*, a hollow]. In biology, destitute of a perivisceral cavity or celum.

**Acelomi** (*ah-sef-lo-mi*) [*ἄ priv.*; *κοιλία*, the belly]. In biology, worms destitute of a perivisceral cavity, as tapeworms.

**Acelomous** (*ah-sef-lo-mus*). See *Acelomatous*.

**Acelous** (*ah-sef-lus*) [*ἄ priv.*; *κοίλος*, hollow]. Without intestines; anenterous.

**Acenaphthene** (*as-en-af'-thēn*) [*aceticus*: naphthalene],  $C_{12}H_{10}$ . A hydrocarbon that occurs in coal tar, and separates on cooling from the fraction boiling at 260–280° C. It crystallizes from hot alcohol in long needles melting at 95° C. and boiling at 277° C.

**Acentric** (*ah-sen'-trik*) [*ἄ priv.*; *κέντρον*, center]. Not centric; not originating in, or pertaining to, a nerve-center; peripheric.

**Aceognosia** (*as-e-og-no'-se-ah*) [*ἄκος*, a remedy; *γνώσις*, knowledge]. A knowledge of remedies.

**Aceology** (*as-e-ol'-o-jē*) [*ἄκος*, ἄκεος, a remedy; *λόγος*, a discourse]. Therapeutics; medical and surgical treatment of disease; acology.

**Acephalan** (*ah-sef-al-an*) [*ἀκέφαλος*, headless]. An acephal, one of the *acephala*, or pertaining to such. A lamellibranchiate mollusc.

**Acephalemia**, or **Acephalhemia** (*ah-sef-al-e'-me-ah*) [*ἄ priv.*; *κεφαλή*, head; *αἷμα*, blood]. Deficiency of blood in the head.

**Acephalia** (*ah-sef-al-le-ah*) [*ἄ priv.*; *κεφαλή*, head]. In teratology, the absence of the head.

**Acephalism** (*ah-sef'-al-izm*) [*ἄ priv.*; *κεφαλή*, head]. See *Acephalia*.

**Acephalobrachia** (*ah-sef-al-o-brat'-ke-ah*) [*ἄ priv.*; *κεφαλή*, head; *βραχίον*, arm]. In teratology, absence of the head and arms.

**Acephalobrachius** (*ah-sef-al-o-brat'-ke-us*) [*ἄ*; *κεφαλή*; *βραχίον*]. A monster with neither head nor arms.

**Acephalocardia** (*ah-sef-al-o-kar'-de-ah*) [*ἄ priv.*; *κεφαλή*, head; *καρδία*, heart]. Absence of the head and heart.

**Acephalocardius** (*ah-sef-al-o-kar'-de-us*) [*ἄ*; *κεφαλή*; *καρδία*]. A monster with neither head nor heart.

**Acephalochiria** (*ah-sef-al-o-ki'-re-ah*) [*ἄ priv.*; *κεφαλή*, head; *χείρ*, hand]. Absence of the head and hands.

**Acephalochirus** (*ah-sef'-al-o-ki'-rus*) [See *Acephalochiria*]. A monster with neither head nor hands.

**Acephalocyst** (*ah-sef'-al-o-sist*) [*ἄ priv.*; *κεφαλή*, head; *κύστις*, a bladder]. The bladder-worm. A headless, sterile hydatid, found in the liver and other organs. *A. racemosa*, the hydatid mole of the uterus.

**Acephalogaster** (*ah-sef-al-o-gas'-ter*) [*ἀκρωαός*, headless; *γαστήρ*, belly]. A monster with neither head nor stomach.

**Acephalogasteria** (*ah-sef-al-o-gas-tē'-re-ah*). Absence of the head and stomach. See *Acephalogaster*.

**Acephalophoran** (*ah-sef-al-off-o-ran*) [*ἄ priv.*; *κεφαλή*, head; *φέρειν*, to bear]. In biology, a member of DeBlainville's group of molluscs, *Acephalophora*.

**Acephalopodia** (*ah-sef-al-o-po'-de-ah*) [*ἄ priv.*; *κεφαλή*, head; *πούς*, foot]. Absence of the head and feet.

**Acephalopodius** (*ah-sef-al-o-po'-de-u*). A monster with neither head nor feet. See *Acephalopodia*.

**Acephalorrhachia** (*ah-sef-al-o-ra'-ke-ah*) [*ἄ priv.*; *κεφαλή*, head; *ράχις*, spine]. Absence of the head and vertebral column.

**Acephalostomia** (*ah-sef-al-o-stō-me-ah*) [*ἄ priv.*; *κεφαλή*, head; *στόμα*, mouth]. Absence of the head, with a mouth-like opening on the superior aspect.

**Acephalostomus** (*ah-sef-al-o-stō-mus*) [*ἄ priv.*; *κεφαλή*; *στόμα*]. A monster with no head, but with a mouth-like aperture. See *Acephalostomia*.

**Acephalothoracia** (*ah-sef-al-o-tho-ra'-se-ah*) [*ἄ priv.*; *κεφαλή*, head; *θώραξ*, chest]. Absence of the head and thorax.

**Acephalothorus** (*ah-sef-al-o-tho'-rus*). A monster without head or thorax. See *Acephalothoracia*.

**Acephalous** (*ah-sef'-al-us*) [*ἀκεφαλός*, headless]. Headless.

**Acephalus** (*ah-sef'-al-us*) [*ἄ priv.*; *κεφαλή*, head]. 1. A species of omphalositic monsters characterized by complete absence of the head and usually of the upper extremities. It is the commonest condition among the omphalositic. 2. A variety of the above species marked by the highest form of development. The head is absent, but there is at least one superior extremity, and the thorax is generally fairly well-developed.

**Acer** (*a'-ser*). A genus of sapindaceous trees and shrubs; the maples. *A. saccharinum*, the Sugar Maple of North America, affords a large commercial supply of sugar. *A. rubrum*, the Red Maple, has an astringent inner bark. *A. pennsylvanicum*, Striped Maple, is said to be antemetic and alterative. Unof.

**Aceras** (*as'-er-as*) [*ἄ priv.*; *κέρας*, horn, spur]. A genus of orchids. *A. anthropophora* (green-man, man-orchid) has sudorific leaves, and the bulbs are used as salep. Unof.

**Acerates** (*as-er-a'-tēs*) [*ἄ priv.*; *κέρας*, horn]. A genus of asclepiadaceous plants, regarded by some as a section of the genus *Gomphocarpus*. *A. decumbens*, of New Mexico, is said to cure snake bites. *A. longifolia*, of the U. S., is diaphoretic. Unof.

**Aceratophorus** (*ah-se-ra-toj'-o-rus*) [*ἄ priv.*; *κέρας*, horn; *φέρειν*, to bear]. In biology, hornless, muley. Cf. *Acerous*.

**Aceratosis** (*ah-ser-at-o'-sis*) [*ἄ priv.*; *κέρας*, horn]. Deficiency or imperfection of corneous tissue.

**Acerb** (*a-serb'*) [*acerbus*, bitter]. Having a bitter, astringent and pungent taste; as certain drugs.

**Acerbity** (*a-serb'-it-ē*) [*acerbitus*, sharpness, sourness]. Acidity combined with astringency.

**Aceric** (*as-er'-ik*) [*acer*, a maple tree]. Pertaining to, or found in the maple; as aceric acid.

**Aceride** (*as'-er-id*) [*ἄ priv.*; *cera*, wax]. An ointment or plaster containing no wax.

**Acerose** (*as'-er-os*) [*avus* (*acer*), chaff]. In botany, chaffy; needle-shaped, as pine needles.

**Acerotous** (*ah-ser'-o-tus*) [*ἄ priv.*; *κηρός*, wax]. Containing no wax; said of ointments and plasters.

**Acerous** (*as'-er-us*) [*ἄ priv.*; *κέρας*, a horn]. In biology, having undeveloped, minute, or no horns or antennae; aceratophorous.

**Acervate** (*as-er'-vāt*) [*acervulus*, *p. p.* of *acervare*, to heap upon]. In biology, growing in heaps or clusters.

**Acervuline** (*as-er'-vu-lin*) [*acervulus*, a heap]. Agminated, or aggregated; as certain mucous glands.

**Acervulus**, or **Acervulus cerebri** (*as-er'-vu-lus ser'-e-bri*). Concretionary matter near the base of the pineal gland, consisting of alkaline phosphates and carbonates, with amyloid matter; brain-sand.

**Acescence** (*as-es'-ens*) [*acescere*, to grow sour]. 1. The process of becoming sour; the quality of being

somewhat sour. 2. A disease of wines, whereby they become sour owing to the agency of *mycoderma aceti*.

**Acescency** (*as-es'-en-se*). See *Acescence*.

**Acrescent** (*as-es'-ent*) [*a crescent*, to become sour]. Somewhat acid or tart; acidulous.

**Aceta** (*as-et'-ah*). Plural of *Acetum*, *q. v.*

**Acetate** (*as-et'-a-bt*) [*acetabulum*, a small cup]. An old name for the *acetabulum*.

**Acetabular** (*as-et-ab'-u-lar*) [*acetabulum*, a small cup]. Pertaining to the acetabulum.

**Acetabuliferous** (*as-et-ab-u-lif'-er-us*) [*acetabulum*, a small cup; *ferre*, to bear]. Having suckers, as the arms of cuttle fishes and squids.

**Acetabuliform** (*as-et-ab'-u-l-form*) [*acetabulum*, a small cup; *forma*, form]. Having the form of the acetabulum, or of a shallow cup; cotyloid, or glenoid.

**Acetabulum** (*as-et-ab'-u-lum*) [L., a small cup or measure]. In biology, any cup-shaped cavity or organ. The articulating cavity of the head of the femur, or the leg of an insect; one of the suckers on the arms of cephalopods, or on the scolex of a tapeworm; the receptacle of certain fungi and lichens.

**Acetal** (*as-et-al*) [*acetum*, vinegar].  $C_6H_{14}O_2$ . Ethylene diethylate, a colorless, mobile liquid, with an ethereal odor, produced by the imperfect oxidation of alcohol under the influence of platinum black. Sparingly soluble in water; boils at  $104^\circ C.$ ; sp. gr. at  $20^\circ$  is 0.8304. Its action is that of a soporific. Dose  $\mathfrak{z}$ j.

**Acetaldehyd** (*as-et-al'-de-hid*). The normal aldehyd; ethaldehyd. See *Aldehyd*.

**Acetals** (*as-et-alz*) [*acetum*, vinegar]. Products of the combination of aldehyds with the alcohols at  $100^\circ C$ .

**Acetamid** (*as-et'-am-id*),  $C_2H_5NO$ . A white crystalline solid produced by distilling ammonium acetate, or by heating ethyl acetate with strong aqueous ammonia. It combines with both acids and metals to form unstable compounds.

**Acetanilid** (*as-et-an'-il-id*),  $C_6H_5NO$ . A white, crystalline solid. Produced by boiling anilin and glacial acetic acid together for several hours; the crystalline mass is then distilled. It melts at  $114^\circ$  and boils at  $295^\circ$ . It is soluble in hot water, alcohol and ether. Under the name *antifebrin* it is prescribed as an antipyretic. Dose gr. iij-xv.

**Acetarium** (*as-et-a'-re-un*) [*gen.*, *Acetarii*; *pl.*, *Acetaria*]. A pickle or salad. **A. Scorbuticum**, a pickle containing leaves of scurvy-grass or other anti-scorbutic plants; used in the treatment of scorbutic cases. Unof.

**Acetary** (*as-et-a-re*) [*acetum*, vinegar]. An obsolete or rare name for a sour pulpy substance found in pears and some other fruits; often enclosed within a congeries of calculous granules.

**Acetate** (*as-et-at*) [*acetum*, vinegar]. Any salt of acetic acid. **A. of Lead**, plumbi acetates. See *Plumbum*.

**Acetic** (*a-et'-tik*) [*acetum*, vinegar]. Pertaining to *acetum* or vinegar; sour. See *Acid*, *Acetic*. **A. Fermentation**, the development of acetic acid by the activity of the *Mycoderma aceti*.

**Acetin** (*as-et-in*) [*acetum*, vinegar]. A chemical compound formed by the union of glycerin and acetic acid.

**Acetolatium**, (*as-et-o-la-tum*) [*gen.*, *Acetolati*; *pl.*, *Acetolati*]. Distilled vinegar, variously aromatized or medicated.

**Acetolature** (*as-et ol'-at-ur*) [*acetolaturum*]. Any acetous tincture, or medicated vinegar.

**Acetometer** (*as-et-om'-et-er*) [*acetum*, vinegar; *μέτρον*, measure]. An instrument used in the quantitative determination of acetic acid.

**Acetometry** (*as-et-om'-et-er*) [*acetum*, vinegar; *μέτρον*, measure]. The quantitative estimation of the amount

of acetic acid in vinegar. Usually made by an *acetometer*.

**Acetone** (*as-et-on*) [*acetum*, vinegar],  $C_3H_6O$ . Dimethyl Ketone. A colorless, mobile liquid, of peculiar odor and burning taste; present in crude wood-spirit; it occurs in small quantities in the blood and in normal urine, and in considerable quantities in the urine of diabetics. Like methyl alcohol it is miscible in all proportions with ether, alcohol, and water. It is an excellent solvent for resins, gums, camphor, fats, and gun-cotton.

**Acetones** (*as-et-onz*). A class of compounds that may be regarded as consisting of two alcoholic radicals united by the group CO, or as aldehyds in which hydrogen of the group COH has been replaced by an alcoholic radical.

**Acetonemia** (*as-et-o-ne'-me-ah*) [*acetone*; *αἷμα*, blood.] The presence of acetone in the blood. It may result from a number of diseases, but is characteristic of chronic diabetes, and is associated with dyspnea, subnormal temperature, lowered pulse-rate, etc. The patient finally falls into coma. The treatment consists in increasing the secretions and by removing the causes of the diseases.

**Acetonuria** (*as-et-on-u-re-ah*) [*acetone*; *οἶον*, urine]. The presence of acetone in the urine.

**Acetophenone** (*as-et-o-fel'-non*),  $C_6H_5(CO)(CH_3)$ . "Hyponone;" a hypnotic and antiseptic. Without satisfactory action. Dose  $\mathfrak{m}$ iv-xv. It results from the action of zinc methyl upon benzoyl chloride. Crystallizes in large plates, melts at  $20.5^\circ$ , and boils at  $202^\circ$ .

**Acetosella** (*as-et-o-sel'-ah*). See *Oxalis acetosella*.

**Acetous** (*as-et-us*) [*acetum*, vinegar]. Like or resembling vinegar; pertaining to, or charged with vinegar or acetic acid.

**Acetoxim** (*as-et-oks'-im*),  $(CH_3)_2C.N.OH$ . A compound formed by the action of hydroxylamin upon acetone; readily soluble in water, alcohol and ether; fuses at  $60^\circ$ , boils at  $135^\circ$ .

**Acetoxims** (*as-et-oks'-imz*). See *Aldoxims*.

**Acetphenetidin** (*as-et-fel'-net-id-in*). See *Phenacetin*.

**Acetum**, (*as-et-tum*) [*gen.*, *Aceta*; *pl.*, *Aceta*]. [L.]. Vinegar. An impure, dilute acetic acid produced by acetous fermentation of wine, cider, or other fruit-juice. See *Fermentation*. In pharmacy, a solution of the active principles of certain drugs in dilute acetic acid. There are four official *aceta*, each of which contains the soluble principles of ten per cent. of its weight, viz., of lobelia, opium, sanguinaria, and squill; the *acetum* of cantharides is official in Great Britain. **A. aromaticum** (N. F.) ["aromatic vinegar"], a mixture of alcohol, water and acetic acid, aromatized with the oils of rosemary, lavender, juniper, peppermint, cassia, lemon and cloves. **A. britannicum**, an aromatic vinegar consisting of glacial acetic acid 600.0, camphor 60.0, oil of cloves 2.0, oil of cinnamon 1.0, oil of lavender 0.5.

**Acetyl** (*as-et-il*) [*acetum*, vinegar],  $(C_2H_3O)$ . A univalent radical supposed to exist in acetic acid and its derivatives. Aldehyd may be regarded as the hydrid and acetic acid as the hydrate, of acetyl. **A. Peroxid**,  $(C_2H_3O)_2O_2$ , a thick liquid, insoluble in water, but readily dissolved by ether and alcohol. It is a powerful oxidizing agent. It is decomposed in sunlight and explodes violently when heated.

**Acetylene** (*as-et-il-en*) [*acetum*, vinegar],  $C_2H_2$ . A colorless gas, with a characteristic and very unpleasant odor, burning with a luminous, smoky flame. Illuminating gas contains a small amount of it. Formed by the imperfect combustion of illuminating gas and other hydrocarbons. The *acetylene series* of hydrocarbons has the general formula,  $C_n H_{2n-2}$ .

**Ache** (*āk*) [A. S., *a:an*, to ache]. Any continuous or throbbing pain.

**Ache** (*atch*) [Fr.]. An old, or local name for common parsley. See *Apium*.

**Acheilia** (*ah-ki'le-ah*) [*ā* priv.; *χεῖλος*, a lip]. The congenital absence of lips.

**Acheilous** (*ah-ki'lus*) [*ā* priv.; *χεῖλος*, a lip]. Born without lips; affected with acheilia.

**Acheiria** (*ah-ki're-ah*) [*ā* priv.; *χείρ*, a hand]. The congenital absence of hands.

**Acheirous** (*ah-ki'rus*) [*ā* priv.; *χείρ*, a hand]. Affected with acheiria; born without hands.

**Acheirus** (*ah-ki'rus*). An acheirous person, or fetus; one who was born without hands.

**Achene** (*a-ken'*). Same as *Achenium*.

**Achenium** (*ah-ke'-ne-um*) [*ā* priv.; *χαίνειν*, gape: *pl.*, *Achenia*]. In biology, a small, dry, one-seeded, indehiscent fruit.

**Achenocarp**, or **Achénocarp** (*ah-ke'-no-karp*) [*ā* priv.; *χαίνειν*, to gape; *καρπός*, fruit]. In biology, any dry fruit, not opening spontaneously when ripe. See *Achenium*.

**Achenodium** (*ah-en-o'-de-um*) [L.]. A cremocarp or double achenium, as produced by some umbelliferous plants. See *Achenium*.

**Achetsous**, or **Achétous** (*ah-ke'-tus*) [*ā* priv.; *χαίτη*, hair]. In biology, lacking setæ, chaetæ, or bristles.

**Achilia** (*ah-ki'le-ah*). See *Acheilia*.

**Achillea** (*ah-il'e'-ah*) [*Achilles*, its reputed discoverer]. Milfoil, Yarrow. The herb *A. millefolium*. Properties due to a bitter, aromatic, astringent, tonic extractive, *achillein*, and a volatile oil. It has long been used as a vulnerary, and has been highly recommended for intermittents, and in low, exanthematous fevers. Dose  $\frac{3}{4}$ –Oj infusion *ad lib.*; of the extractive,  $\frac{3}{4}$ –ijj; of the volatile oil, gtt. v–xv. Unof. To the genus *Achillea* belong various other unofficial medicinal plants, as *A. moschata*, of the Alps, used in preparing cordials and a diaphoretic medicine, and *A. ptarmica*, or sneezewort, a strong sialogogue.

**Achillein** (*ah-il'e-in*) [*achilleinum*; *gen.*, *Achilleini*]. An extractive from *Achillea millefolium*. See *Achillea*.

**Achilles Tendon** (*ah-il'e-z ten'-don*). See *Tendon*.

**Achilodnyia** (*ah-il-o-din'-e-ah*) [*Achilles*; *ὀδὴν*, pain]. Pain referred to the insertion of the tendo-Achillis, sometimes with apparent swelling of the tendon and of the os calcis.

**Achilus** (*ah-ki'lus*). See *Acheilous*.

**Achiote** (*a-che-o'-te*). See *Anatto*.

**Achiria** (*ah-ki're-ah*). See *Acheiria*.

**Achirous** (*ah-ki'rus*). See *Acheirous*.

**Achirus** (*ah-ki'rus*). See *Acheirus*.

**Achlamydeous** (*ah-lam-id'e-us*) [*ā* priv.; *χλαμύς*, a cloak]. In biology, flowers lacking calyx, corolla, or perianth.

**Achlorophyllous** (*ah-klo-ro-fil'-us*) [*ā* priv.; *χλωρός*, green; *φύλλον*, leaf]. In biology, without chlorophyll, or leaf-green.

**Achloropsia** (*ah-klo-rop'-se-ah*) [*ā* priv.; *χλωρός*, green; *ὄψις*, vision]. Green-blindness.

**Achlys** (*ah'-lis*) [*ἀχλὺς*, gloom, mist]. Cloudiness of the cornea.

**Achne** (*ah'-ne*) [*ἀχνη*, anything shaved off]. 1. Lint, or charpie; floss. 2. Mucus upon the eye.

**Acholia** (*ah-ko'-le-ah*) [*ā* priv.; *χολή*, bile]. Non-secretion or non-excretion of bile.

**Acholic** (*ah-kol'-ik*) [*ā*; *χολή*]. Affected with acholia.

**Acholous** (*ah'-o-lus*) [*ā* priv.; *χολή*, bile]. Pertaining to or affected with acholia.

**Achondroplasia** (*ah-kon-dro-pla'-se-ah*) [*ā* priv.; *χόνδρος*, cartilage; *πλάσσειν*, to form]. Lack of development in a cartilaginous structure; the absorption of cartilage during its transformation into bone.

**Achondroplasy** (*ah-kon'-dro-pla-se*) [*ā* priv.; *χόνδρος*, cartilage; *πλάσσειν*, to form]. Lack of the normal development of cartilage. Parrot's term for a form of fetal rickets in which the limbs are short, the curves of the bones exaggerated, and there is an absence of the proliferating zone of cartilage at the junction of the epiphyses. The children are generally still born. This condition is very much like a fetal cretinism.

**Achor** (*a'-kor*) [*ἄχωρ*, chaff, scurf, or dandruff; *pl.*, *Achores* (*a-ko'-ez*)]. *Crusta lactea*. A small pustule, followed by a scab, upon the heads of infants.

**Achordal** (*ah-ko'-dal*) [*ā* priv.; *χόρδη*, cord]. Not derived from the notochord.

**Achorion** (*a-ko'-re-on*) [*dim.* of *ἄχωρ*, chaff]. A genus including several species of fungous (or fungoid) organisms (possibly modified forms of *Penicillium glaucum*), found in the skin, especially the hair follicles. *A. keratophagus*, the form causing *Onychomycosis*, *q. v.* *A. lebertii*, the parasite of *Tinea tonsurans*. *A. schönleini*, the species occurring in ringworm or *Tinea favosa*.

**Achroa** (*ah-kro'-ah*). See *Achroia*.

**Achroia** (*ah-kroi'-ah*). Same as *Achroma*, *q. v.*

**Achroicythemia** (*ah-kroi-si-the'-me-ah*). Same as *Achroicythemia*. See also *Oligochromemia*.

**Achroicythemia** (*ah-kroi-o-si-the'-me-ah*), or **Achræocythæmia** (*ah-kre-o-si-the'-me-ah*) [*ἀχρωίς*, colorless; *κύτος*, cell; *αἷμα*, blood]. A deficiency of hemoglobin in the red blood corpuscles; also, the diseased state that is associated with such deficiency.

**Achroleucous** (*ah-kro-lu'-kus*) [*ἀχρός*, pale; *λευκός*, white]. Yellowish-white, dull cream color.

**Achroma** (*ah-kro'-mah*) [*ā* priv.; *χρῶμα*, color]. Absence of color. Pallor. Paleness, from whatsoever cause. **A.**, Congenital. See *Albinism*. **A. Cutis**. See *Leucoderma*.

**Achromasia** (*ah-kro-ma'-ze-ah*). See *Achroma*.

**Achromatic** (*ah-kro-mat'-ik*) [*ā* priv.; *χρῶμα*, color]. Pertaining to achroma; without color. **A. Lens**, one the dispersing power of which is exactly neutralized by another lens having the same curvature but of unequal refractive index. See also *Aberration* and *Objective*. **A. Triplet**. See *Microscope*.

**Achromatin** (*ah-kro'-mat-in*) [*ā* priv.; *χρῶμα*, color]. The substance in the nucleus of a cell prior to division. So called because not readily stained by coloring agents. See *Cell Body*. **A. of Flemming**. See *Paralinin*.

**Achromatism** (*ah-kro'-mat-izm*) [*ā* priv.; *χρῶμα*, color]. Absence of chromatic aberration.

**Achromatopsia** (*ah-kro-mat-op'-se-ah*) [*ā* priv.; *χρῶμα*, color; *ὄψις*, eyesight]. Color-blindness; Daltonism; dyschromatopsia.

**Achromatosis** (*ah-kro-mat-o'-sis*) [*ā* priv.; *χρῶμα*, color]. Any disease characterized by deficiency of pigmentation in the integumentary tissues.

**Achromatous** (*ah-kro'-mat-us*) [*ā* priv.; *χρῶμα*, color]. Deficient in color.

**Achromia** (*ah-kro'-me-ah*) [*ā* priv.; *χρῶμα*, color]. Albinism; achroma.

**Achromodermia** (*ah-kro-mo-d-ri'-me-ah*) [*ā* priv.; *χρῶμα*, color; *δέρμα*, skin]. An albinotic, or colorless state of the skin.

**Achromophilous** (*ah-kro-mof'-il-us*) [*ā* priv.; *χρῶμα*, color; *φιλέω*, to love]. Not readily stained; not chromophilous.

**Achromotrichia** (*ah-kro-mo-trik'-e-ah*) [*a* priv.; *χρῶμα*, color; *τριχίς*, hair]. Absence of pigment from the hair.

**Achromous** (*ah-kro'-mus*) [*ā* priv.; *χρῶμα*, color]. Pale, colorless; having no color.

**Achroödextrin** (*ah-kro-o-deks'-trin*) [*ἀχρῶος*, colorless; *dexter*, right]. A reducing dextrin formed by the action

of the diastatic ferment of saliva upon starch or glycogen. It is a modification of dextrin that may be precipitated by alcohol, and is not altered by ptyalin, nor colored by iodin.

**Achylia** (*ah-kil'ee-ah*) [*a* priv.; *χῆλος*, juice]. Absence or deficiency of juice, or of chyle.

**Achylosis** (*ah-kee-us*) [*a* priv.; *χῆλος*, juice]. Deficient chylification.

**Achylous** (*ah-kel'us*) [*a* priv.; *χῆλος*, juice]. Without chyle; deficient in chyle or juice.

**Achymosis** (*ah-ki-m'us*) [*a* priv.; *χυμος*, chyme]. Deficient chylification.

**Achyranthes** (*ah-ee-ran'thes*) [*ἀχρῶν*, chaff; *ἄνθος*, a flower]. A genus of amaranthaceous plants. *A. calcea*, of Mexico, is febrifugal. *A. repens*, of Europe and the United States, is diuretic. Unof.

**Acicula** (*as-ik'-u-luh*) [dim. of *acus*, a needle]. In biology, a spine, bristle, or prickle; the bristle-like flower of a grass.

**Acicular** (*as-ik'-u-luh*) [*acus*, a needle]. Needle-like.

**Aciculum** (*as-ik'-u-lum*) [dim. of *acus*, a needle; *pl.*, *Acicula*]. In biology, one of the slender sharp bristles in the rudimentary limbs of some worms.

**Aciculus** (*as-ik'-u-lu*) [*acus*, a needle]. In biology, a stout bristle or prickle.

**Acid** (*as'id*) [*acere*, to be sour]. A name loosely applied to any substance having a sour taste. A compound of an electro-negative element with one or more atoms of hydrogen which can be replaced by electro-positive or basic atoms. Acids vary in their terminations according to the quantity of oxygen or other electro-negative constituent. Those having the maximum of oxygen end in *-ic*; those of a lower degree in *-ous*. Where there are more than two combinations the preposition *hyper-* is prefixed to the highest, and *hypo-* to the lowest. Acids that end in *-ic*, as sulphuric acid, form salts terminating in *-ate*; those ending in *-ous* form salts terminating in *-ite*. Physiologically, acids in concentrated form act as caustics; diluted and in medicinal doses they check acid-producing and increase alkaline secretions. **A.**, **Abietic**. See *Abietic*.

**A.**, **Abric** ( $C_{12}H_{24}N_4O$ ), a crystallizable acid, said to exist in jequirity. **A.**, **Aceric**, found in the juice of *Acer campestre*, the common English maple. **A.**, **Acetic**, an acid solution composed of 36 parts of absolute acetic acid ( $C_2H_4O_2$ ), and 64 parts water. Has strong acid properties. Miscible with water and alcohol. **A.**, **Acetic, Glacial**, the absolute acid in crystalline form. An escharotic. **A.**, **Acetic, Dilute**, contains six per cent. of absolute acid. Dose ʒj-ij.

An impure form obtained by the destructive distillation of wood is known as wood vinegar, or pyroligneous acid. **A.**, **Acetic, Test**. See *Tests, Table of*. **A.**, **Aconitic** ( $C_6H_6O_6$ ), occurs in different plants, as *Aconitum napellus*, sugar cane, and beet-roots. It may be obtained by heating citric acid alone or with concentrated HCl. It crystallizes in small plates, that dissolve readily in alcohol, ether and water, and melt at  $186^{\circ}-7^{\circ}$ . An acid found in aconite. **A.**, **Adibasic**. See *A.*, *Subric*. **A.**, **Adipic** ( $C_6H_{10}O_4$ ), obtained by oxidizing fats with nitric acid. Crystallizes in shining leaflets, or prisms; soluble in thirteen parts of cold water; melts at  $148^{\circ}$ . It is dibasic and diatomic. **A.**, **Agaricic** ( $C_{16}H_{20}O_5 - H_2O$ ), a resin acid obtained from the fungus *Polyporus officinalis*, growing on larch trees. The acid has been recommended for the checking of night-sweats. It also checks the other excretions and diminishes thirst. It is mildly cathartic. Unof. **A.**, **Alanthic** ( $C_{15}H_{20}O_2$ ), *bullic acid*, found in *Inula helenium*. Occurs in needle-like crystals.

**A.**, **Aldepalmitic** ( $C_{16}H_{30}O_2$ ), the chief component of the butter of the cow. **A.**, **Algic**. See *Algin*. **A.**, **Alloxanic** ( $C_4H_2N_2O_4$ ), a crystalline acid, obtained by treating alloxan with alkalis. **A.**, **Alpha-oxy-naphthoic** ( $C_{11}H_8O_3$ ), a fragrant crystalline acid, derived from alpha-naphthol. It is strongly antiseptic and deodorant; useful in wound-dressing; but appears to be toxic when taken by the stomach. Unof. **A.**, **Alphatolonic**. See *A.*, *Phenyl-acetic*. **A.**, **Amalic** ( $C_8(C_2H_5)_4N_2O_7$ ), [*ἀμαλῶς*, weak], tetramethylalloxantin, formed by the action of  $HNO_3$ , or chlorine water, upon thein, or, better, by the reduction of dimethyl alloxan with  $H_2S$ . Consists of colorless, sparingly soluble crystals, that impart a red color to the skin. **A.**, **Amido-acetic**. See *Glycin*. **A.**, **Amido-benzoic** ( $C_7H_7NO_3$ ), occasionally found in the urine. **A.**, **Amido-succinamic**, same as *Asparagin*. **A.**, **Angelic** ( $C_5H_8O_2$ ), a crystalline monobasic acid. Exists free along with valeric and acetic acids in the roots of *Angelica archangelica*, and as butyl and amyl esters in Roman oil of cumin. Crystallizes in shining prisms, melts at  $45^{\circ}$ , and boils at  $185^{\circ}$ . It has a peculiar smell and taste. **A.**, **Anisic** ( $C_8H_8O_3$ ), obtained by oxidizing anisol and anethol with  $HNO_3$ , and from aniseed by the action of oxidizing substances. Crystallizes from hot water in long needles, from alcohol in rhombic prisms; melts at  $185^{\circ}$ , boils at  $280^{\circ}$ . It is antiseptic and antirheumatic. **A.**, **Anthranilic** ( $C_7H_7NO_2$ ), prepared by oxidizing indigo by boiling it with manganese dioxide and sodium hydroxide. It sublimes in long needles, is readily soluble in hot water and alcohol, and melts at  $144^{\circ}$ . **A.**, **Anthropocholic** ( $C_{18}H_{28}O_4$ ) [*ἀνθρωπος*, man; *χολή*, bile], an acid said to be obtainable from human bile. Its existence is doubtful. **A.**, **Anticylic**, a white fragrant powder with pleasant acid taste, readily soluble in water, alcohol, and glycerin, used as an antipyretic. Dose gr.  $\frac{1}{10}-\frac{1}{5}$ . **A.**, **Aposorbic** ( $C_5H_8O_7$ ), produced on oxidizing sorbin with  $HNO_3$ . It crystallizes in small leaflets that melt with decomposition at  $110^{\circ}$ . Easily soluble in water. **A.**, **Arabic**. See *Arabin*.

**A.**, **Arabonic** ( $C_5H_{10}O_6$ ), tetraoxyvaleric acid, obtained by the action of bromine water or  $HNO_3$  upon arabinose. **A.**, **Aromatic**, a name applied to certain organic acids occurring in the balsams, resins, and other odoriferous principles. Also, in pharmacy, a dilute mineral acid reinforced by aromatic substances in order to modify their flavor. **A.**, **Arsenous**, and **Arsenic**. See *Arsenic*. **A.**, **Aspartic** ( $C_4H_7NO_4$ ), occurs in the vinasse obtained from the beet root, and is procured from albuminous bodies in various reactions. It is prepared by boiling asparagin with alkalis and acids. It crystallizes in rhombic prisms, or leaflets, and dissolves with difficulty in water. **A.**, **Atrolactic** ( $C_9H_{10}O_3$ ), obtained from acetophenone by means of prussic acid and  $H_2SO_4$  or dilute HCl. Dissolves very readily in water; crystallizes with one-half  $H_2O$  in needles or plates; melts at  $91^{\circ}$ . **A.**, **Atropic** ( $C_{11}H_{11}O_2$ ), results from atropin, tropic acid, and atrolactic acid when they are heated with concentrated HCl. Crystallizes from hot water in monoclinic plates; is sparingly soluble in cold water, easily in ether and benzene; melts at  $106^{\circ}$ . **A.**, **Auric** ( $Au(OH)_3$ ), gold trihydroxid. **A.** **Bath**. See *Bath*.

**A.**, **Behenolic** ( $C_{22}H_{40}O_2$ ), derived from the bromids of erucic and brassidic acids. Melts at  $57.5^{\circ}$ . **A.**, **Benzoic** ( $C_7H_6O_2$ ), occurs free in some resins, chiefly in gum benzoïn, and in coal tar. It crystallizes in white, shining needles, or leaflets, melts at  $120^{\circ}$ , and distils at  $250^{\circ}$ . It volatilizes readily, and its vapor possesses a peculiar odor that produces coughing. **A.**, **Boric**. See *Boron*. **A.**, **Brassicidic** ( $C_{20}H_{30}O_2$ ), isomeric with erucic acid; produced by the action of nitric acid on erucic acid; melts at  $56^{\circ}$ . **A.**, **Brenz**

by treating alloxan with alkalis. **A.**, **Alpha-oxy-naphthoic** ( $C_{11}H_8O_3$ ), a fragrant crystalline acid, derived from alpha-naphthol. It is strongly antiseptic and deodorant; useful in wound-dressing; but appears to be toxic when taken by the stomach. Unof. **A.**, **Alphatolonic**. See *A.*, *Phenyl-acetic*. **A.**, **Amalic** ( $C_8(C_2H_5)_4N_2O_7$ ), [*ἀμαλῶς*, weak], tetramethylalloxantin, formed by the action of  $HNO_3$ , or chlorine water, upon thein, or, better, by the reduction of dimethyl alloxan with  $H_2S$ . Consists of colorless, sparingly soluble crystals, that impart a red color to the skin. **A.**, **Amido-acetic**. See *Glycin*. **A.**, **Amido-benzoic** ( $C_7H_7NO_3$ ), occasionally found in the urine. **A.**, **Amido-succinamic**, same as *Asparagin*. **A.**, **Angelic** ( $C_5H_8O_2$ ), a crystalline monobasic acid. Exists free along with valeric and acetic acids in the roots of *Angelica archangelica*, and as butyl and amyl esters in Roman oil of cumin. Crystallizes in shining prisms, melts at  $45^{\circ}$ , and boils at  $185^{\circ}$ . It has a peculiar smell and taste. **A.**, **Anisic** ( $C_8H_8O_3$ ), obtained by oxidizing anisol and anethol with  $HNO_3$ , and from aniseed by the action of oxidizing substances. Crystallizes from hot water in long needles, from alcohol in rhombic prisms; melts at  $185^{\circ}$ , boils at  $280^{\circ}$ . It is antiseptic and antirheumatic. **A.**, **Anthranilic** ( $C_7H_7NO_2$ ), prepared by oxidizing indigo by boiling it with manganese dioxide and sodium hydroxide. It sublimes in long needles, is readily soluble in hot water and alcohol, and melts at  $144^{\circ}$ . **A.**, **Anthropocholic** ( $C_{18}H_{28}O_4$ ) [*ἀνθρωπος*, man; *χολή*, bile], an acid said to be obtainable from human bile. Its existence is doubtful. **A.**, **Anticylic**, a white fragrant powder with pleasant acid taste, readily soluble in water, alcohol, and glycerin, used as an antipyretic. Dose gr.  $\frac{1}{10}-\frac{1}{5}$ . **A.**, **Aposorbic** ( $C_5H_8O_7$ ), produced on oxidizing sorbin with  $HNO_3$ . It crystallizes in small leaflets that melt with decomposition at  $110^{\circ}$ . Easily soluble in water. **A.**, **Arabic**. See *Arabin*. **A.**, **Arabonic** ( $C_5H_{10}O_6$ ), tetraoxyvaleric acid, obtained by the action of bromine water or  $HNO_3$  upon arabinose. **A.**, **Aromatic**, a name applied to certain organic acids occurring in the balsams, resins, and other odoriferous principles. Also, in pharmacy, a dilute mineral acid reinforced by aromatic substances in order to modify their flavor. **A.**, **Arsenous**, and **Arsenic**. See *Arsenic*. **A.**, **Aspartic** ( $C_4H_7NO_4$ ), occurs in the vinasse obtained from the beet root, and is procured from albuminous bodies in various reactions. It is prepared by boiling asparagin with alkalis and acids. It crystallizes in rhombic prisms, or leaflets, and dissolves with difficulty in water. **A.**, **Atrolactic** ( $C_9H_{10}O_3$ ), obtained from acetophenone by means of prussic acid and  $H_2SO_4$  or dilute HCl. Dissolves very readily in water; crystallizes with one-half  $H_2O$  in needles or plates; melts at  $91^{\circ}$ . **A.**, **Atropic** ( $C_{11}H_{11}O_2$ ), results from atropin, tropic acid, and atrolactic acid when they are heated with concentrated HCl. Crystallizes from hot water in monoclinic plates; is sparingly soluble in cold water, easily in ether and benzene; melts at  $106^{\circ}$ . **A.**, **Auric** ( $Au(OH)_3$ ), gold trihydroxid. **A.** **Bath**. See *Bath*. **A.**, **Behenolic** ( $C_{22}H_{40}O_2$ ), derived from the bromids of erucic and brassidic acids. Melts at  $57.5^{\circ}$ . **A.**, **Benzoic** ( $C_7H_6O_2$ ), occurs free in some resins, chiefly in gum benzoïn, and in coal tar. It crystallizes in white, shining needles, or leaflets, melts at  $120^{\circ}$ , and distils at  $250^{\circ}$ . It volatilizes readily, and its vapor possesses a peculiar odor that produces coughing. **A.**, **Boric**. See *Boron*. **A.**, **Brassicidic** ( $C_{20}H_{30}O_2$ ), isomeric with erucic acid; produced by the action of nitric acid on erucic acid; melts at  $56^{\circ}$ . **A.**, **Brenz**

**catechin sulphuric** ( $C_6H_4(HO)_2 \cdot O \cdot SO_2$ ), has been found in human urine, mainly after the ingestion of salicin, hydroquinon, etc. **A., Butyric** ( $C_4H_8O_2$ ) [*butyrum*, butter], an acid having a viscid appearance and rancid smell. It is obtained commercially by the fermentation of a mixture of sugar and butter or cheese in the presence of an alkaline carbonate, but occurs in various plants, in cod-liver oil, in the juice of meats, and in the perspiration. Combined with glycerin as glyceryl butyrate, it is essentially butter. The ether derived from butyric acid is the natural flavor of the pineapple. **A., Caffic** ( $C_9H_8O_4$ ), obtained when the tannin of coffee is boiled with potassium hydroxide; crystallizes in yellow prisms, and is very readily soluble in hot water and alcohol. **A., Campholic** ( $C_{10}H_{14}O_2$ ), produced on distilling camphor over heated soda-lime, or with alcoholic potash; it melts at  $95^\circ$ , and is a white, volatile solid, insoluble in cold water. **A., Camphoric** ( $C_{10}H_{16}O_4$ ), a dibasic acid, obtained by boiling camphor with  $HNO_3$ ; crystallizes from hot water in colorless leaflets; melts at  $178^\circ$ , and decomposes into water and its anhydride,  $C_8H_{14}(CO_2)_2O$ . Used in night-sweats of phthisis. Dose gr. x-xxx. **A., Camphoronic** ( $C_9H_{12}O_5 + H_2O$ ), produced by the further oxidation of camphoric acid; it occurs in the mother liquor. Loses its water of crystallization at  $100-120^\circ$  and melts at  $135^\circ$ . It forms colorless microscopic needles that are volatile and readily soluble in water. **A., Capric** ( $C_9H_{19}CO_2OH$ ), occurs in small quantity, as a glycerid in cow's butter. Crystallizes in fine needles, melting at  $30^\circ C.$ , very insoluble in boiling water. **A., Caproic** ( $C_6H_{12}O_2$ ), the sixth in the series of fatty acids; a clear, mobile oil, colorless, inflammable, and with a very acid and penetrating taste. Prepared from butter, cocoanut oil, and various other sources. **A., Caprylic** ( $C_7H_{13}CO_2OH$ ), an acid combined with glycerin, forming a glycerid existing in various animal fats; liquid at ordinary temperatures. **A., Carbamic** ( $H_2N \cdot CO_2OH$ ), an acid not known in the free state; its ammonium salt is contained in commercial ammonium carbonate. The esters of carbamic acid are called urethanes. **A., Carbazotic**. See *A., Picric*. **A., Carbolc** ( $C_6H_5OH$ ). Phenol—the correct designation of this substance—is procured from coal tar by fractional distillation. It has a very peculiar and characteristic odor, a burning taste, is poisonous, and has preservative properties. The sp. gr. at  $0^\circ$  is 1.084; it crystallizes in colorless rhombic needles that melt at  $42.2^\circ$ , boiling at  $180^\circ$ , and it is not decomposed upon distillation. At ordinary temperatures it dissolves in water with difficulty (1:15), but is soluble in alcohol, ether, glacial acetic acid, and glycerin in all proportions. Upon exposure to light and air it deliquesces and acquires a pinkish color. It is used in the manufacture of many of the artificial coloring matters, e. g., picric acid, used as a yellow dye. Large quantities of various qualities of carbolc acid are consumed for antiseptic purposes. It is a powerful antiseptic and germicide, and a violent poison. Internally it is used in vomiting and intestinal fermentation. Dose gr.  $\frac{1}{4}$ -j. **A., Carb., Aqua**, contains 10 drachms of the glycerit to 1 pint of water. Dose  $\mathfrak{z}$ j- $\mathfrak{z}$ ss. **A., Carb., Gargarisma** grs. ij- $\mathfrak{z}$ j, for fetid sore throat. **A., Carb., Glycerit**, contains acid 1, glycerin 4 parts. **A., Carb., Liquefactum**, (B. P.). Dose  $\mathfrak{m}$ j-ij. **A., Carb., Solutions**, vary from 1 to 5 per cent. in water. **A., Carb., Suppos. cum Sapone** (B. P.), each containing gr. j of carbolc acid. **A., Carb., Unguent**, contains acid 10, ointment 90 parts. **A., Carbol., Injectio Hypoderm.**, 2-5 per cent., for anthrax, and erysipelas. **A., Carbonic** ( $CO_2$ ), carbon dioxide; a product of combustion; a colorless, transparent, odorless gas,

heavier than air; incapable of sustaining respiration. It is eliminated by the lungs, and when retained in the system gives rise to cyanosis. **A., Carmine** ( $C_{17}H_{16}O_{10}$ ), coloring matter found in the buds of certain plants, and especially in cochineal, an insect inhabiting different varieties of cactus. It is an amorphous purple-red mass, very readily soluble in water and alcohol. Yields red salts with the alkalis. **A., Cathartine**, an active principle from several species of *Cassia*. It occurs in brown hygroscopic scales. Used as a laxative in doses of gr. iv-vj. **A., Cerebrinic** ( $C_{30}H_{112}NO_3$ ), an acid found in the brain and belonging to the group called cerebrinacids. **A., Cerotic** ( $C_{27}H_{54}O_2$ ) [*κηροτός*, waxy], a fatty acid, existing in the free state in beeswax, and combined with ceryl as an ether in Chinese wax. It crystallizes from alcohol in delicate needles, melting at  $78^\circ$ . **A., Chelidonic** ( $C_7H_8O_6$ ), occurs together with malic acid in *Chelidonium majus*. Crystallizes in silky needles with one molecule of water, and melts at  $220^\circ$ . **A., Chloracetic** [*chlorin and acetic*], an acid, called also *Monochloracetic acid*, produced by the substitution of chlorine for the hydrogen of the radicle in acetic acid. It is sometimes used as a caustic. **A., Chloric** ( $HClO_3$ ), an acid known only in its compounds and its aqueous solution. Some of its compounds, the chlorates, are of great service in medicine. **A., Cholic**. See *A., Cholic*. **A., Cholic** ( $C_{21}H_{42}O_6$ ), *Cholic Acid*, from glycocholic and taurocholic acids; crystallizes from hot water in small anhydrous prisms, sparingly soluble in water, and melting at  $195^\circ$ . **A., Choloidinic**, derived from Cholic Acid, and probably a mixture of this with dyslysin; all three decomposition products of bile acids. **A., Chromic**, strictly the compound  $H_2CrO_4$ ; chromium trioxide combined with water; it forms salts called chromates. In most books the chromium trioxide,  $CrO_3$ , is called by this name. It is a crystalline solid, and is a useful escharotic for the destruction of syphilitic warts and similar growths. A solution of 1:40 is used as an antiseptic wash for putrid sores and wounds. **A., Chrysanisic** ( $C_7H_5N_3O_6$ ), an acid forming golden-yellow crystals, used in the preparation of certain anilin dyes. It melts at  $250^\circ$  and sublimes. **A., Chrysenic** ( $C_{17}H_{12}O_3$ ), produced when chrysene is fused with caustic alkali. Forms silver-white leaflets and melts at  $186^\circ$ . **A., Chrysophanic** ( $C_{15}H_{10}O_4$ ), *Rheinic Acid*, exists in the lichen *Parmelia parietina*, in senna leaves, and in the rhubarb root. Crystallizes in golden yellow needles or prisms, melting at  $162^\circ$ . See *Chrysarobin*. **A., Cinchoninic** ( $C_9H_6N(CO_2H)$ ), produced by oxidizing cinchonin with potassium permanganate, or  $HNO_3$ . Crystallizes in needles, containing  $2H_2O$ , in thick prisms, or plates, with  $2H_2O$ ; melts at  $254^\circ$ . **A., Cinnamic** ( $C_9H_8O_2$ ), occurs in Peru and Tolu balsams, in storax, and in some benzoin resins. Crystallizes from hot water in fine needles, from alcohol in thick prisms; is odorless, melts at  $133^\circ$ ; soluble in hot water and in alcohol. It has been used in tuberculosis, both internally and externally. Dose  $\mathfrak{m}$ j-x, hypodermatically. **A., Citric** ( $C_6H_8O_7$ ), occurs free in lemons, black currants, bilberry, beets, and in various acid fruits. It crystallizes with one molecule of water in large rhombic prisms, which melt at  $100^\circ$ , are colorless, inodorous, and extremely sharp in taste. It is used as a discharge in calico-printing. It is refrigerant, antiseptic, and diuretic. **A., Comanic** ( $C_6H_4O_4$ ), obtained from chelidonic acid by the loss of carbon dioxide. It dissolves with difficulty in water; melts at  $250^\circ$ . **A., Comenic** ( $C_6H_4O_3$ ), is produced by heating meconic acid to  $120-200^\circ$ . It is rather insoluble in water and crystallizes in hard, warty masses.

**A., Coumalic** ( $C_6H_4O_4$ ), identical with comanic acid. Produced when malic acid is heated together with concentrated  $H_2SO_4$ ; dissolves with difficulty in cold water and melts with decomposition at  $206^\circ$ . **A., Coumaric** ( $C_9H_8O_3$ ), an acid derived from coumarin and intimately related to salicylic acid, being converted into the latter by fusion with potassium hydrate. **A., Coumarilic** ( $C_9H_8O_3$ ), a monobasic acid obtained from coumarin dibromid; crystallizes from hot water in delicate needles, melting at  $100^\circ$ ; moderately soluble in water and extremely soluble in alcohol. **A., Crenic** [*κρηνική*, a spring], an acid found in certain spring waters and also in vegetable mould and in ochreous deposits. **A., Cresolsulphuric** ( $C_7H_2O_4S$ ), exists in the urine in small traces; also found in the urine of herbivorous animals. **A., Cresylic**. See *Cresol*. **A., Croconic** ( $C_5H_2O_5$ ), is produced by the alkaline oxidation of most of the hexa-substituted benzene-derivatives; crystallizes in sulphur-yellow leaflets, readily soluble in water and alcohol; has an acid taste and reaction. **A., Cumic** ( $C_{10}H_{12}O_2$ ), is produced by the oxidation of cuminic alcohol with dilute  $HNO_3$ . Very soluble in water and alcohol, crystallizes in colorless needles or leaflets, melts at  $116^\circ$ , and boils at about  $290^\circ$ . **A., Cyanic** ( $CONH$ ), obtained by heating polymeric cyanuric acid. It is a mobile, volatile liquid, only stable below  $0^\circ$ ; reacts strongly acid; has an odor like that of glacial acetic acid; vesicates the skin; dissolves in alcohols. **A., Cyanuric**. See *A., Tricyanic*. **A., Damalic** ( $C_{12}H_{22}O_2$ ), [*δάμαλις*, heifer], has been obtained from the urine of cows and horses, and from human urine. **A., Damaluric** ( $C_7H_{12}O_2$ ) [*δάμαλις*, heifer; *οἶον*, urine], an oily compound, derivable from the urine of cattle and of mankind. **A., Desoxalic** ( $C_2H_2O_5$ ), is seen in large, shining crystals, that melt at  $85^\circ$ . **A., Diacetic** ( $C_4H_4O_3$ ), an acid present in the urine in some diseased conditions, *e. g.*, acetouria. With a solution of ferric chlorid it gives a Burgundy-red color. **A., Durylic** ( $C_{10}H_{12}O_2$ ), obtained by the oxidation of durene; crystallizes in hard prisms and melts at  $115^\circ$ . **A., Elaidic** ( $C_{18}H_{34}O_2$ ), a fatty acid, produced by the action of nitrous acid on oleic acid. Isomeric with the latter. Consists of brilliant leaflets, melting at  $44-45^\circ$ . **A., Ellagic** ( $C_{14}H_8O_6$ ), occurs in the bezoar stones (an intestinal calculus of the Persian goat). Occurs in the form of a powder containing 1 molecule of water of crystallization. Insoluble in water; light pale yellow in color; tasteless. **A., Enanthylic**, or **Ænanthylic** [*ἐνάνθη*, wine flower, a plant (*οἶνον*, wine; *ἄνθος*, flower); *ῥίζη*, principle], a complex ether formed by the action of nitric acid on fatty substances, especially castor oil. **A., Erucic** ( $C_{22}H_{42}O_2$ ), present as glycerid in rape-seed oil and in the fatty oil of mustard. Prepared by saponifying rape-seed oil with lead oxid. Crystallizes from alcohol in long needles that melt at  $33-34^\circ$ . **A., Euchroic** ( $C_{12}H_8N_2O_4$ ), an amid of mellitic acid, produced by dry distillation of the ammonium salt. It crystallizes in large prisms and is sparingly soluble in water. **A., Eugenic**. See *Eugenol*. **A., Euxanthinic** ( $C_{19}H_{18}O_{11}$ ), *Porrisic Acid*, occurs as a magnesium salt in so-called *purée*, a yellow coloring matter from India and China. Crystallizes from alcohol in yellow prisms with  $H_2O$ . **A., Evernicic** ( $C_9H_{16}O_4$ ), produced on boiling evernic acid ( $C_{17}H_{16}O_7$ ) (from *Evernia prunastri*, a lichen formerly much used in dyeing and for making a hair powder), with baryta. It melts at  $157^\circ$ . **A., Ferulic** ( $C_{10}H_{10}O_4$ ), corresponds to vanillin. It is found in asafetida, from which it may be obtained by precipitation with lead acetate. It is very soluble in hot water, crystallizes in shining needles or prisms,

and melts at  $169^\circ$ . **A., Filicic**, the main ingredient of *Male Fern*. It is a white crystalline powder with slight taste and odor, insoluble in water. **A., Fluoric** (HF), gaseous and soluble in water, a strong escharotic. The dilute acid, 1:200, is used as an internal remedy in goiter. Dose  $\mathfrak{Mxx-xxx}$ . **A., Formic** ( $CH_2O_2$ ), an acid obtained from a fluid emitted by ants when irritated; also found in stinging nettles, in shoots of the pine, and in various animal secretions. Prepared by heating oxalic acid and glycerin. It is a colorless, mobile fluid, with a pungent odor, and vesicates the skin if dropped upon it. It boils at  $99^\circ$  and at  $0^\circ$  has a sp. gr. of 1.223. **A., Galactonic**. See *A., Lactonic*. **A., Gallic** ( $C_7H_6O_3$ ), occurs free in gall nuts, in tea, in the fruit of *Cesalpinia coriaria*, mangoes, and various other plants. Obtained from ordinary tannic acid by boiling it with dilute acids. Crystallizes in fine, silky needles, containing one molecule of water. Dissolves slowly in water and readily in alcohol and ether; has a faintly acid, astringent taste; melts near  $220^\circ$ . Astringent and disinfectant; useful in night sweats, diabetes, and chronic diarrhea. **A., Gallic, Unguent**, benzoated lard 90, gallic acid 10. **A., Pyrogallic** (unofficial), obtained from gallic acid by heating the latter. Recommended locally in phagedenic chancres as an antiseptic and disinfectant in 1-2½ per cent. solutions. Dose, internally, gr. j-ij. **A., Gluconic** ( $C_6H_{12}O_7$ ), is formed by the oxidation of dextrose, cane sugar, dextrin, starch, and maltose with chlorin or bromin water. Most readily obtained from glucose. It is dextro-rotatory, but does not reduce Fehling's solution. It melts at  $200^\circ$ . **A., Glutaric** ( $C_5H_8O_4$ ), normal pyrotartaric acid. Crystallizes in large monoclinic plates, melts at  $97^\circ$ , and distils at  $303^\circ$ , at  $14^\circ$  soluble in 1.2 part of water. **A., Glycocholic** ( $C_{26}H_{43}NO_6$ ), a monobasic acid found in bile; sparingly soluble in water; crystallizes in minute needles, melting at  $133^\circ$ . **A., Glycollic** ( $C_2H_4O_3$ ), *Oxyacetic Acid*, produced by the action of nascent hydrogen upon oxalic acid. It is a thick syrup that gradually crystallizes on standing over sulphuric acid; the crystals melt at  $80^\circ$  and deliquesce in the air. It dissolves easily in water, in alcohol, and in ether. **A., Glycoluric** ( $C_4H_6N_2O_3$ ), *Hydanturic Acid*, prepared by heating urea with glycecoll to  $120^\circ$ . It is a monobasic acid; very soluble in hot water and in alcohol. Crystallizes in large, rhombic prisms. **A., Glycuronic** ( $C_6H_{10}O_7$ ), obtained by decomposing euxanthic acid on boiling with dilute  $H_2SO_4$ . It is a syrup that decomposes readily into the lactone,  $C_6H_8O_6$ , on warming. It is levo-rotatory. This acid has been found in urine; it probably does not exist in normal urine; but it appears after taking certain drugs, as benzol, indol, nitro-benzol, and the quinin derivatives. **A., Glyoxylic** ( $C_2H_2O_3$ ), obtained by oxidizing glycol, alcohol, and aldehyd. It is a thick liquid, readily soluble in water. Crystallizes in rhombic prisms by long standing over sulphuric acid. **A., Guanido-Acetic**. See *Glycoamin*. **A., Gynocardic** ( $C_{14}H_{21}O_2$ ), derived from the seeds of the *Gynocardia odorata*. It occurs as a yellowish oily substance melting at  $30^\circ C$ . ( $86^\circ F.$ ), with a distinct odor and acid taste. Used as an antispasmodic and antirheumatic. Dose gr. ½-ij. Used externally as a liniment (1 to 10 or 20). **A., Haloids** (*ασ'ιδ hal'-oids*), derivatives that arise in the replacement of the hydroxyl of acids by halogens. They are liquids of sharp odor, fuming in the air and undergoing transformation into acids and halogen hydriids. They are heavier than water. They decompose at ordinary temperatures, forming acids. **A., Hemipinic** ( $C_{10}H_{10}O_6$ ), formed by oxidizing

narcotin with dilute  $\text{HNO}_3$ . Melts at  $182^\circ$ . **A., Hesperetin** ( $\text{C}_{10}\text{H}_{10}\text{O}_4$ ), obtained from the glucoside hesperidin. Melts at  $228^\circ$ . **A., Hippuric** ( $\text{C}_9\text{H}_9\text{NO}_3$ ) [ $\epsilon\pi\pi\omicron\varsigma$ , horse;  $\omicron\iota\pi\omicron\upsilon$ , urine], *Benzoyl Glycocol*, occurs in considerable amount in the urine of herbivorous animals, sometimes in that of man. Crystallizes in rhombic prisms, and dissolves readily in hot water and alcohol. It melts at  $187^\circ$ . Its salts (hippurates of lime, lithium, and sodium) are regarded as good solvents of the urates, and are recommended in gout, rheumatism, and calculous diseases. Dose grs. iv-xvj. Unof. **A., Hircic**, a peculiar-smelling acid contained in goat's milk. **A., Homogentisic**, an acid separated by Baumann from highly-colored urine, believed to be formed by the action of bacteria on the tyrosin normally found in pancreatic digestion. **A., Homophthalic** ( $\text{C}_9\text{H}_8\text{O}_4$ ), obtained by fusing gamboge with caustic potash. Crystallizes from hot water in stout prisms, melting at  $175^\circ$ . **A., Hydantoic**. See *A., Glycoluric*. **A., Hydriodic** (HI), *Acidum Hydriodicum*; a gaseous acid. Its solution and a syrup prepared from it are used as alternatives, with the general effects of iodine. Unof. **A., Hydrobromic** (HBr), the dilute acid, which is the chief form used, consists of 10 per cent. acid and 90 per cent. water. A good solvent for quinin. Useful in hysteria, congestive headaches, and neuralgia. Is recommended as a substitute for potassium and sodium bromids. Dose  $\text{m}_{xx}-\text{z}_{ij}$ . **A., Hydrocaffic** ( $\text{C}_9\text{H}_8\text{O}_4$ ), obtained from caffeic acid by the action of sodium amalgam. **A., Hydrochloric, Muriatic Acid** (HCl), a liquid consisting of 31.9 per cent. of HCl gas in 68.1 per cent. of water. Colorless, pungent, and intensely acid. Valuable as an aid to digestion. **A., Hydrochloric, Dilute**, a ten per cent. solution of absolute acid in water. Dose  $\text{m}_{ij}-\text{x}$ . **A., Hydrocinnamic** ( $\text{C}_9\text{H}_7(\text{CH}_2)_2\text{CO}_2\text{H}$ ), *Phenyl-propionic Acid*, obtained by the action of sodium amalgam upon cinnamic acid. Very soluble in hot water and alcohol; crystallizes in needles, melts at  $47^\circ$ , and distills at  $280^\circ$ . **A., Hydrocyanic, Dilute** (HCN), *Prussic Acid*, a liquid consisting of two per cent. of the acid with 98 per cent. of water and alcohol. Generally prepared by the action of  $\text{H}_2\text{SO}_4$  on potassium ferrocyanid. It is a mobile liquid, of a sp. gr. of .697 at  $18^\circ$ ; becomes crystalline at  $-15^\circ$ ; boils at  $+26.5^\circ$ ; possesses an odor like that of bitter almonds; is extremely poisonous; a feeble acid. Prussic acid is found in the bitter almond, the leaves of the peach, and in the cherry laurel, from the leaves of which it is distilled. It is the most violent poison known, death from complete asphyxia being almost instantaneous. Valuable for its sedative and antispasmodic effects in vomiting, whooping-cough, and spasmodic affections. Dose  $\text{m}_{j}-\text{v}$ . The following preparations are employed: *Aqua Laurocerasi*, water distilled from the leaves of the cherry laurel. Dose  $\text{m}_{v}-\text{xxx}$ , with caution. *Scheele's Dilute Hydrocyanic Acid*, is a 4 or 5 per cent. solution; dangerous. *Amygdala Amara*, oil of bitter almond; used in cosmetics. **A., Hydrocyanic, Vapor**,  $\text{m}_{x}-\text{xv}$  of dilute acid in  $\text{z}_{j}$  of water, warmed and the vapor inhaled to relieve irritable coughs. **A., Hydrofluoric** (HF), an aqueous solution of hydrofluoric gas, administered in dilute form as an inhalation in phthisis and goiter. See *Fluorin*. **A., Hydro-sulphuric** ( $\text{H}_2\text{S}$ ), an acid which, both in its pure and gaseous form and in its watery solution, is much used as a chemical reagent. The gas has been employed by inhalation and by rectal injection in cases of tuberculosis. (See *Bergeron's Method*.) Called also *Hydrogen Sulfid* and *Sulphydic Acid*. **A., Hydrurilic** ( $\text{C}_8\text{H}_6\text{N}_4\text{O}_6$ ), obtained by decomposing the copper salt

with HCl. Occurs in little prisms. **A., Hyperosmic**. See *A., Osmic*. **A., Hypochlorous** ( $\text{HClO}$ ), an unstable compound, important as a disinfecting and bleaching agent. Some of its salts, the hypochlorites, have a limited use in medicine. **A., Hypophosphorous** ( $\text{H}_3\text{PO}_2$ ), its salts (hypophosphites), also the dilute acid, and a syrup prepared with it, are used as remedial agents. (See *Calcii Hypophosphis*, *Ferri Hypophosphis*, *Sodii Hypophosphis*, *Potassii Hypophosphis*.) **A., Igsauric**, an acid occurring in *St. Ignatius Bean* and certain other plants containing strychnia. It occurs in small, hard crystals with an acid, astringent taste. **A., Indoxylic** ( $\text{C}_8\text{H}_7\text{NO}_3$ ), produced from its ethyl ester by fusion with caustic soda at  $180^\circ$ . Appears as a white crystalline mass, melting at  $123^\circ$ . **A., Iodic** ( $\text{HIO}_3$ ), a monobasic acid. Its solution (two per cent.) has been recommended as an alternative subcutaneous injection. **A., Isopropyl Succinic**. See *A. Pinelic*. **A., Isosaccharic** ( $\text{C}_6\text{H}_{10}\text{O}_7$ ), an acid very soluble in water and alcohol, forming rhombic crystals, and melting at  $185^\circ$ . Its solution is dextro-rotatory. **A., Kephalo-phosphoric**, a brain-acid differing from ordinary phosphoric acid in that three molecules of its hydroxyl are replaced by one molecule each of kephalyl, stearyl, and glyceryl. **A., Lactic** ( $\text{HC}_3\text{H}_5\text{O}_3$ ), a liquid containing 75 per cent. of absolute acid in 25 per cent. of water. Produced in the fermentation of milk. Generally found impure from subsequent fermentation, except when freshly made. Useful in aiding digestion, in diabetes, and as a solvent of false membrane in diphtheria. Dose  $\text{z}_{ss}-\text{z}_{ss}$ . *A., Lactic, Dil.*, (B. P.). Dose  $\text{z}_{ss}-\text{ij}$ . **A., Lactonic** ( $\text{C}_6\text{H}_{12}\text{O}_7$ ), *Galactonic Acid*, produced from milk-sugar, galactose, and gum arabic by the action of bromine water. It crystallizes, on standing over  $\text{H}_2\text{SO}_4$ , in small needles. **A., Leuconic** ( $\text{C}_5\text{O}_3 + 4\text{H}_2\text{O}$ ), an acid produced by oxidizing croconic acid with  $\text{HNO}_3$  or chlorine. Very soluble in water; occurs in small, colorless needles. **A., Levulinic** ( $\text{C}_5\text{H}_8\text{O}_3$ ), obtained from levulose, cellulose, cane-sugar, etc. Isomeric with methyl acetoacetic acid; dissolves readily in water, alcohol, and ether; crystallizes in scales that melt at  $33.5^\circ$ ; boils with slight decomposition at  $230^\circ$ . **A., Linoleic** ( $\text{C}_{18}\text{H}_{34}\text{O}_2$ ), occurs as glycerid in drying oils, such as linseed oil, hemp oil, poppy oil, and nut oil. Prepared by saponifying linseed oil with potash. It is a yellowish oil that has a sp. gr. of 0.921. **A., Maizenic**, an acid derived from the stigmata (silk) of Indian corn; said to be a good diuretic. Unof. **A., Malic** ( $\text{C}_4\text{H}_6\text{O}_5$ ), a bibasic acid, occurring free or in the form of salts in many plant juices, in unripe apples, in grapes, and in mountain-ash berries. It forms deliquescent crystals, that dissolve readily in alcohol, slightly in ether, and melt at  $100^\circ$ ; it has a pleasant acid taste. **A., Malonic** ( $\text{C}_3\text{H}_4\text{O}_4$ ), occurs in the deposit found in the vacuum pans employed in the beet-sugar manufacture; obtained by the oxidation of malic acid with chromic acid; crystallizes in large tables or laminae; easily soluble in water, alcohol, and ether; melts at  $132^\circ$ ; at higher temperatures it decomposes into acetic acid and carbon dioxide. **A., Mandelic** ( $\text{C}_6\text{H}_5\text{CH}(\text{OH})\text{CO}_2\text{H}$ ), is formed from benzaldehyd by the action of prussic acid and HCl. Obtained naturally from amygdalin; is levo-rotatory, and forms brilliant crystals, melting at  $132.8^\circ$ . **A., Mannitic** ( $\text{C}_6\text{H}_{12}\text{O}_7$ ), obtained by the action of platinum black upon aqueous mannitol. It is a very soluble, gummy mass, and reduces Fehling's solution. **A., Mannonic** ( $\text{C}_6\text{H}_{12}\text{O}_7$ ), produced by oxidizing mannose with bromine water. **A., Meconic** ( $\text{C}_7\text{H}_4\text{O}_7$ ), a tribasic acid, occurring in opium in union with mor-

phin. Crystallizes with  $3\text{H}_2\text{O}$  in white laminae, readily soluble in hot water and alcohol. Ferric salts color the acid solutions dark red. **A., Melilotic** ( $\text{C}_6\text{H}_4(\text{CH}_2)_2\text{O}(\text{H}.\text{CO}_2\text{H})$ ), occurs free and in combination with coumarin in the yellow melilot. Crystallizes in long needles, dissolves easily in hot water, and melts at  $51^\circ$ . **A., Mellitic** ( $\text{C}_{12}\text{H}_6\text{O}_{12}$ ), occurs in mellite or honey-stone, which is found in some lignite beds. Honey-stone is an aluminium salt of mellitic acid,  $\text{C}_{12}\text{Al}_2\text{O}_{11} + 18\text{H}_2\text{O}$ , and affords large quadratic pyramids of a bright yellow color. Mellitic acid crystallizes in fine, silky needles, readily soluble in water and alcohol; has a sour, bitter taste. **A., Mellophanic** ( $\text{C}_6\text{H}_2(\text{CO}_2\text{H})_4$ ), formed by the oxidation of isodurene. Very soluble in cold water and crystallizes in small prisms. Melts at  $240^\circ$ . **A., Mesidic**. See *A. Urtic.* **A., Mesitylenic** ( $\text{C}_9\text{H}_{10}\text{O}_2$ ), obtained by gradually oxidizing mesitylene with dilute  $\text{HNO}_3$ . Crystallizes from alcohol in large prisms, from water in needles. Melts at  $166^\circ$  and sublimes very readily. **A., Metaphosphoric** ( $\text{HPO}_3$ ), a glassy solid, not volatile by heat. It is freely soluble in cold water, and is converted by boiling into orthophosphoric acid. Used as a test for albumin in the urine. **A., Metasaccharic** ( $\text{C}_6\text{H}_{10}\text{O}_8$ ), produced by oxidizing arabinose carboxylic acid with  $\text{HNO}_3$ . Melts at  $68^\circ$  when air-dried. **A., Mucic** ( $\text{C}_6\text{H}_{10}\text{O}_8$ ), is obtained in the oxidation of dulcitol, milk-sugar, galactose, galactonic acid and nearly all the gum varieties. A white crystalline powder, almost insoluble in cold water and alcohol. It melts at  $210^\circ$  with decomposition. **A., Muriatic**. See *A., Hydrochloric*. **A., Myronic** [*αιπόρ, unguent*] ( $\text{C}_{10}\text{H}_{10}\text{N}_2\text{O}_{10}$ ), an acid that occurs as a potassium salt in the seeds of black mustard. Crystallizes from water in bright needles. **A., Nitric** ( $\text{HNO}_3$ ), a liquid consisting of 68 per cent. absolute acid in 32 per cent. of water. The pure acid is colorless, fuming, and highly caustic. A very powerful escharotic, used in euterization of chancres and phagedenic ulcers. **A., Nit.**, Dilute, contains ten per cent. absolute acid. Dose  $\text{mijj}-\text{xv}$ , well diluted. **A., Nitro-hydrochloric**, *Aqua Regia*, a golden yellow, fuming mixture of four parts nitric and 15 of hydrochloric acid. A ready solvent of gold. Valuable in affections of the liver. Dose  $\text{mV}-\text{xx}$ , very dilute. **A., Noropianic** ( $\text{C}_8\text{H}_6\text{O}_3$ ), is obtained from opianic acid by heating with hydriodic acid. Readily soluble in water; melting at  $171^\circ$ . **A., Oleic** ( $\text{C}_{18}\text{H}_{34}\text{O}_2$ ), a constituent acid present in many fats and oils. Obtained in the manufacture of stearin candles. Soluble in alcohol, benzol, and the essential oils; insoluble in water. Saponifies when heated with alkaline bases. Used in making the oleates. It is a colorless oil that crystallizes on cooling. Melts at  $+14^\circ$ . Odorless in a pure condition, but becomes rancid on exposure to the air. **A., Opianic** ( $\text{C}_{10}\text{H}_{10}\text{O}_3$ ), dimethyl ether of noropianic acid. Crystallizes from hot water in fine prisms, melting at  $150^\circ$ . **A., Orsellinic** ( $\text{C}_8\text{H}_6\text{O}_4$ ), is found in different lichens of the genera *Roccella* and *Leccanora*. Consists of easily soluble prisms, melting at  $176^\circ$ . **A., Ortho-oxybenzoic**. See *A. Salicylic*. **A., Orthophosphoric** ( $\text{H}_3\text{PO}_4$ ), ordinary phosphoric acid, as distinguished from metaphosphoric and pyrophosphoric acids. **A., Osmic** ( $\text{OsO}_4$ ), the oxide of osmium, one of the rarer elements; it occurs as yellow crystals, acid, burning, yielding an intensely irritating vapor; it has been recommended for hypodermatic use in sciatica, strumous glands, and cancer. **A., Osmic, Liq.**, one per cent. Dose  $\text{miv}-\text{vj}$ , hypodermatically for sciatica, neuralgia, etc. **Potassium O-mate** ( $\text{K}_2\text{OsO}_4 + 2\text{H}_2\text{O}$ ), given in epilepsy. Dose  $\text{gr. } \frac{1}{2}$ . **A., Oxalic** ( $\text{C}_2\text{H}_2\text{O}_4$ ), a colorless crystalline solid obtained by

treating sawdust with caustic soda and potash. It occurs in many plants chiefly as potassium oxalate; with two parts of water, it crystallizes in fine, transparent monoclinic prisms that at  $20^\circ$  effloresce in dry air and fall in a white powder. It is soluble in nine parts of water at moderate temperature and quite easily in alcohol. In  $\frac{1}{2}$  gr. doses a depressant to respiratory centers. In large doses a violent poison. Unof. **A., Oxamic** ( $\text{C}_2\text{O}_2(\text{NH}_2)_2\text{OH}$ ), a monobasic acid occurring as a crystalline powder that dissolves with difficulty in cold water and melts at  $173^\circ$ . **A., Oxyacetic**. See *A., Glycollic*. **A., Oxycitric** ( $\text{C}_6\text{H}_8\text{O}_8$ ), is produced by boiling chlorocitric acid with alkalies or water. **A., Oxyuvitic** ( $\text{C}_9\text{H}_8\text{O}_3$ ), is produced by the action of chloroform upon sodium aceto-acetic ester. Crystallizes from hot water in fine needles, and melts with decomposition at about  $290^\circ$ . **A., Palmitic** ( $\text{C}_{16}\text{H}_{32}\text{O}_2$ ), an acid existing as a glycerin ether in palm-oil and in most of the solid fats. It forms fine, white needles, or pearly crystalline scales. **A., Palmitolic** ( $\text{C}_{16}\text{H}_{30}\text{O}_2$ ), an acid that is isomeric with linoleic acid; melts at  $42^\circ$ . **A., Palmitoxylic** ( $\text{C}_{16}\text{H}_{28}\text{O}_4$ ), a monobasic acid, produced from palmitolic acid on heating with fuming  $\text{HNO}_3$ . Melts at  $67^\circ$ . **A., Paracresotic** ( $\text{C}_{11}\text{H}_{18}\text{O}_3$ ), a preparation from paracresylol. It is employed usually in the form of its sodium salt,  $\text{C}_{11}\text{H}_{17}\text{NaO}_3$ , which is a safe and reliable antipyretic. It is especially of service in the rheumatism of children. Dose, to children,  $\text{gr. ij}-\text{ijj}$ ; to adults up to  $\frac{5}{8}$   $\text{ij}$ . Unof. **A., Paralactic**. See *A., Sarcocollatic*. **A., Paratartaric**. See *A., Racemic*. **A., Pelargonic** ( $\text{C}_{15}\text{H}_{30}\text{O}_2$ ), a complex ether that imparts the specific flavor to geranium and certain other aromatic oils. **A., Perosmic**. Same as *A., Osmic*. **A., Phenylacetic** ( $\text{C}_6\text{H}_5\text{CH}_2\text{CO}_2\text{H}$ ), *Alphatoluic Acid*, obtained from benzyl cyanid when boiled with alkalies. Crystallizes in shining leaflets, resembling those of benzoic acid; melts at  $76.5^\circ$ , and boils at  $262^\circ$ . It is prescribed in coughs and tuberculosis; is stimulant and antihetic. Dose of alcoholic solution  $\text{gtt. x}-\text{xx}$ . Unof. **A., Phenyl-propionic**. See *A., Hydrocinnamic*. **A., Phenyl Sulphate**, a solution of three grammes of phenol in 20 c.c. of strong sulphuric acid. Used for the detection of nitrates in water. **A., Phosphoric** ( $\text{H}_3\text{PO}_4$ ), *Orthophosphoric Acid*, contains 50 per cent. each of acid and water. Of value in strumous affections, and thought to be serviceable in dissolving phosphatic deposits. Has none of the effects derived from free phosphorus or the hypophosphites. **A., Phosphoric, Dilute**, contains ten per cent. of absolute acid. Dose  $\text{mV}-\text{xxx}$ . See *Sodium, Potassium, Calcium, etc.* **A., Phosphorous** ( $\text{H}_3\text{PO}_3$ ), a compound of hydrogen with phosphorus and hydrogen with phosphorus anhydrid. Its salts are called phosphites. **A., Phthalic** ( $\text{C}_8\text{H}_6\text{O}_4$ ), the ortho-dicarboxylic acid of benzene, obtained by oxidizing naphthalene with  $\text{HNO}_3$ . It crystallizes in short prisms or in leaflets readily soluble in hot water, alcohol, and ether. It melts at above  $200^\circ$ . See *Phthalate*. **A., Picric** ( $\text{C}_6\text{H}_2(\text{NO}_2)_3\text{OH}$ ), obtained by the nitration of phenol. It crystallizes from hot water and alcohol in yellow leaflets or prisms which possess a very bitter taste. Readily soluble in hot water, its solution imparting a beautiful yellow color to silk and wool. It melts at  $122.5^\circ$ ; a saturated solution is of some value as a wash in erysipelas. An excellent test for albumin and sugar in urine. Dose  $\text{gr. v}-\text{xv}$ . **A., Pimelic** ( $\text{C}_8\text{H}_{14}\text{O}_4$ ), *Isopropyl Succinic Acid*, melts at  $114^\circ$ . **A., Piperic** ( $\text{C}_{12}\text{H}_{16}\text{O}_4$ ), a monobasic acid, consisting of shining prisms; almost insoluble in water, and crystallizes from alcohol in long needles, melting at  $217^\circ$ . It is produced from piperin by boiling with alcoholic potash. **A., Porrisic**. See *A., Euxanthinic*. **A.,**

**Prehnitic** ( $C_{10}H_6O_8$ ), results from oxidizing prehnitol with potassium permanganate. Very soluble in water, and crystallizes in warty masses that melt at  $238^\circ$ . **A., Propargylic.** See *A., Propiolic.* **A., Propiolic.** ( $C_3H_2O_2$ ), *Propargylic Acid*, a liquid with an odor resembling that of glacial acetic acid; when cool, it solidifies to silky needles, that melt at  $+6^\circ$ ; dissolves readily in water, alcohol, and ether; boils with decomposition at  $144^\circ$ . **A., Protocatechuic** ( $C_7H_6O_4$ ), obtained from many benzene derivatives as well as from various resins (benzoin, asafetida, myrrh) on fusion with potassium hydroxid. Crystallizes with one molecule of water in shining needles or leaflets, and dissolves readily in hot water, alcohol, and ether. **A., Prussic.** See *A., Hydrocyanic.* **A., Purpuric** ( $C_6H_2N_2O_6$ ), an acid not known in the free state, since as soon as it is liberated from its salts by mineral acids it immediately decomposes into alloxan and uramil. Produced by the action of  $HNO_3$  upon uric acid. **A., Pyrogallic** ( $C_6H_6O_3$ ), pyrogallol, formed by heating gallic acid with water to  $210^\circ$ . It forms white leaflets or needles, melts at  $115^\circ$ , and sublimes when carefully heated. Readily soluble in water, less so in alcohol and ether. It is useful in the treatment of certain skin diseases, but is poisonous, and must be used with caution. **A., Pyroligneous**, the crude acid obtained in the destructive distillation of wood. It is a clear liquid of reddish-brown color and strong acid taste, with a peculiar penetrating odor described as empyreumatic, due largely to the furfural it contains. It possesses a sp. gr. of from 1.018 to 1.030, and contains from four to seven per cent. of real acetic acid. **A., Pyromellitic** ( $C_{10}H_6O_8$ ), is produced by oxidizing durene and durylic acid with potassium permanganate. Crystallizes in prisms, readily soluble in hot water and alcohol, melts at  $264^\circ$ . **A., Pyrophosphoric**, the dihydric phosphate ( $2H_2O.P_2O_5$ ), one of the forms of the so-called phosphoric acid. It differs from the ordinary (trihydric or orthophosphoric) acid, and also from the monohydric, or metaphosphoric, acid, in its reactions. It is also poisonous, which they are not. Its iron salt is used in medicine. The pure acid is a soft, glassy mass. **A., Pyrotartaric** ( $C_4H_8O_4$ ), is obtained by heating tartaric acid in a close vessel; consists of small, rhombic prisms, readily soluble in water, in alcohol, and in ether; it melts at  $112^\circ$ . **A., Pyruvic** ( $C_3H_4O_3$ ), a monobasic acid forming crystalline compounds with the acid alkaline sulphites. **A., Quillaic**, an acid existing in commercial saponin. Injected into the tissues it is said to be extremely poisonous, though not when taken by the mouth. Unof. **A., Quinaldinic** ( $C_9H_6N(CO_2H)$ ), crystallizes from hot water in needles containing  $2H_2O$ ; effloresces in the air; melts at  $156^\circ$ . Prepared by oxidizing  $\alpha$ -methyl-quinolin with chromic acid in sulphuric acid solution. **A., Quinic** ( $C_7H_{12}O_6$ ), is present in the cinchona barks, coffee beans, bilberry, and other plants. Obtained as a secondary product in the preparation of quinin. Consists of rhombic prisms, easily soluble in water; melting at  $162^\circ$ . **A., Quininic** ( $C_9H_5(O.CH_3)N(CO_2H)$ ), obtained by oxidizing quinin and quinidin with chromic acid in sulphuric acid solution. Crystallizes in long, yellow prisms; dissolves in alcohol with a blue fluorescence, and melts at  $280^\circ$ . **A., Racemic** ( $C_4H_6O_6$ ), *Paratartaric Acid*, differing from common tartaric acid, not in chemical but in physical properties. **A., Rheinic.** See *A., Chrysophanic.* **A., Rhodanic** ( $C_7H_2S_2ON$ ), obtained by the action of  $CNS(NH_4)$  upon chloracetic acid. Consists of yellow prisms, or plates, that melt at  $169^\circ$  with decomposition. **A., Ricinoleic** ( $C_{18}H_{34}O_2$ ), is present in castor oil in the

form of a glycerid. It is a colorless oil that solidifies in the cold to a hard, white mass, melting at  $16-17^\circ$ . **A., Rosolic** ( $C_{20}H_{16}O_4$ ), a phenol compound, derived from rosanilin; valued as a dye and as a staining agent. See *Stains.* **A., Rufigallic** ( $C_{11}H_2O_4 + 2H_2O$ ), a derivative of anthracene; obtained by heating gallic acid with four parts of  $H_2SO_4$  to  $140^\circ$ . Consists of reddish-brown crystals, losing water at  $120^\circ$ , and subliming in red needles. **A., Saccharic.** 1. Acidum saccharicum ( $C_6H_{10}O_6$ ), a dibasic acid; a deliquescent, gummy mass, readily soluble in alcohol. It turns brown at  $100^\circ$  and decomposes. Prepared by the action of  $HNO_3$  on sugar and various other carbohydrates. 2. ( $C_6H_{12}O_6$ ), *Tetraoxycaproic Acid*, a monobasic acid readily changeable, when free, into its lactone, saccharin. Not known in its free state. **A., Saccharonic** ( $C_6H_{10}O_7$ ), formed by oxidizing saccharin by  $HNO_3$ . Very soluble in water; forms large crystals. **A., Salicylic** ( $C_7H_6O_3$ ), *Ortho-oxybenzoic Acid*, occurs in a free condition in the buds of *Spirea Ulmaria*, in the oil of wintergreen, and in other varieties of gaultheria. It consists of four-sided prisms and crystallizes readily from hot water in long needles. Is soluble in water, and very soluble in chloroform; melts at  $155^\circ-156^\circ$ . Is a powerful antiseptic; also used in the treatment of acute articular rheumatism and myalgia. **A., Santoninic** ( $C_{15}H_{20}O_4$ ), an acid into which santonin is changed under the influence of the alkalies. **A., Sarcolactic** ( $C_3H_6O_3$ ), occurs in muscles, to which it gives their acid reaction, and in blood, especially after the muscles have been in a state of contracting activity. It is also found in urine in phosphorus poisoning. **A. Sclerotinic.** An acid found in ergot, of which it is one of the active principles. Given, hypodermically it has acted as an eccholic. See *Sclerotis.* **A., Sorbic** ( $C_6H_8O_2$ ), occurs together with malic acid in the juice of unripe mountain-ash berries. An oil that does not solidify until it has been heated with potash; almost insoluble in cold water, but crystallizes from alcohol in long needles, melting at  $134.5^\circ$ , distilling at  $228^\circ$  without decomposition. **A., Sozolic.** See *Aseptol.* **A., Sphingostearic**, an acid closely resembling stearic acid, derivable from sphingomyelin. **A., Stearic** ( $C_{18}H_{36}O_2$ ), associated with palmitic and oleic acids as a mixed ether, in solid animal fats, the tallows; crystallizes from alcohol in brilliant leaflets, melting at  $62.2^\circ$  C. **A., Stearoleic** ( $C_{15}H_{32}O_2$ ), obtained from oleic and elaidic acids. Melts at  $48^\circ$ . **A., Stearoxylc** ( $C_{18}H_{32}O_4$ ), produced by warming stearoleic acid. Melts at  $86^\circ$ . **A., Suberic** ( $C_6H_{10}O_4$ ), a dibasic acid obtained by boiling corks or fatty oils with  $HNO_3$ . Melts at  $140^\circ$  C. Forms small granular crystals very soluble in boiling water, in alcohol, and in ether. It fuses at about  $300^\circ$  F., and sublimes in acicular crystals. **A., Succinic** ( $C_4H_6O_4$ ), an acid prepared by the distillation of amber, and artificially in many other ways; occurs in certain hydatid cysts of the liver; diuretic, stimulant, and antispasmodic. Unof. **A., Sulfydric.** See *A., Hydrosulphuric.* **A., Sulphanilic** ( $C_6H_4(NH_2).SO_2H$ ), obtained by heating anilin (1 part) with fuming  $H_2SO_4$  (2 parts) to  $180^\circ$  until  $SO_2$  appears. Crystallizes in rhombic plates with one molecule of water, which effloresce in the air. **A., Sulphichthyolic**, an acid that appears to be the principal component of commercial ichthyol. Its sodium, ammonium, lithium, and zinc salts have been highly praised as efficacious in cystitis, nephritis, and diabetes. Dose grs. iss in pill or capsule. **A., Sulphocarbolic** ( $C_6H_5HSO_3$ ), phenyl bisulphate, formed by the union of carbolic and sulphuric acids. Its salts, the sulpho-carbolates, are used in medicine as intestinal antiseptics, etc. See *Aseptol.* **A.,**

**Sulphonic.** See *Aseptol*. **A., Sulphuric** (H<sub>2</sub>SO<sub>4</sub>), an acid prepared from castor oil acted upon by sulphuric acid. It is a thick syrup, that has the power of dissolving and emulsifying many substances; recommended for pharmaceutical uses. **A., Sulphuric** (H<sub>2</sub>SO<sub>4</sub>), *Oil of Vitriol*, a heavy, oily, corrosive acid, consisting of not less than 92.5 per cent. sulphuric anhydride and 7.5 per cent. of water. Of value in lead poisoning. Sometimes used as a caustic. **A., Sulph., Aromatic**, contains 20 per cent. acid, diluted with alcohol and flavored with cinnamon and ginger. Dose  $\mathfrak{m}\nu$ -xv. **A., Sulph., Dilute**, contains ten per cent. strong acid to 90 of water. Dose  $\mathfrak{m}\chi$ -xv, well diluted. **A., Sulphurous** (H<sub>2</sub>SO<sub>3</sub>), a colorless acid containing about 6.4 per cent. of sulphurous anhydride in 93.6 per cent. of water. The gas (SO<sub>2</sub>) is a very valuable disinfectant. The acid is used as a spray or lotion in diphtheria, stomatitis, and as a wash for indolent and syphilitic ulcers. The various hyposulphites are mainly valuable in that they decompose and give off sulphur dioxide. Dose  $\mathfrak{m}\nu$ -5j. See, also, *Sodium, Potassium, and Magnesium*. **A., Tannic** (C<sub>12</sub>H<sub>10</sub>O<sub>6</sub>), *Tannin*, an astringent acid obtained from nutgalls, occurring in yellowish, scaly crystals. Soluble in water and alcohol. Internally it is an antidote in poisoning by alkaloids and tartar emetic, and in hemorrhoids and catarrh of mucous membrane. Useful mainly as an astringent lotion in many skin diseases. Dose gr. j-xx. **A., Tan., Glycerit**, one part tannin in four of glycerin. **A., Tan., Suppositories**, one part of tannin to five of butter of cacao. **A., Tan., Troches**, each contain ½ gr. of tannic acid. **A., Tan., Unguent**, a ten per cent. ointment of the acid incorporated with benzoated lard. **A., Tartaric** (C<sub>4</sub>H<sub>4</sub>O<sub>6</sub>), an astringent acid, chiefly employed in refrigerant drinks and in baking powders; 20 grains neutralize 27 of potassium bicarbonate, 22 of sodium bicarbonate, and 15½ of ammonium carbonate. Dose gr. x-xxx. Widely distributed in the vegetable world, and occurs principally in the juice of the grape, from which it deposits after fermentation in the form of acid potassium tartrate (argol). It results on oxidizing saccharic acid and milk sugar with HNO<sub>3</sub>. It crystallizes in large monoclinic prisms, which dissolve readily in water and alcohol, but not in ether. It melts at 167°-170°. Its salts are the tartrates. **A., Tartronic** (C<sub>3</sub>H<sub>4</sub>O<sub>6</sub>), occurs in large prisms that are easily soluble in water, alcohol, and ether. It melts at 184° C. Produced from glycerol by oxidation with potassium permanganate. **A., Taurocholic** (C<sub>24</sub>H<sub>45</sub>NOS<sub>7</sub>), occurs in bile; very soluble in water and alcohol; crystallizes in fine needles. **A., Teracrylic** (C<sub>7</sub>H<sub>12</sub>O<sub>2</sub>), obtained by the distillation of terpentic acid. It is an oily liquid, with an odor resembling that of valeric acid, and boiling at 208° without decomposition. **A., Terebic** (C<sub>2</sub>H<sub>10</sub>O<sub>4</sub>), a monobasic acid formed when turpentine oil is oxidized with HNO<sub>3</sub>. Sparingly soluble in cold water, crystallizes in shining prisms, and melts at 175°. **A., Tetraoxycaproic**. See *A., Saccharic*. **A., Tetraoxyvaleric**. See *A., Arabonic*. **A., Thebolactic** (C<sub>3</sub>H<sub>6</sub>O<sub>3</sub>), a crystalline principle obtained from opium. **A., Tide** (*as-id-tid*). See *Tide*. **A., Trichloracetic** (HC<sub>2</sub>Cl<sub>3</sub>O<sub>2</sub>), an acid formed from acetic acid, three atoms of the hydrogen of which is (in the new acid) replaced by chlorine. It is considered one of the best reagents for the detection of albumin in the urine, and is a valuable caustic, especially for rhinopharyngological purposes. **A., Trichlorlactic** (C<sub>3</sub>H<sub>2</sub>O<sub>2</sub>Cl<sub>3</sub>), made by heating chloralcyanhydrin with concentrated HCl. It is a crystalline mass that melts at from 105° to 110°.

Soluble in water, in alcohol, and in ether. **A., Tricyanic** (C<sub>3</sub>N<sub>3</sub>O<sub>3</sub>H<sub>3</sub>), *Cyanuric Acid*, obtained from tricyanogenchloride by boiling the latter with water and alkalis. It crystallizes from aqueous solution with two molecules of water in large rhombic prisms; soluble in 40 parts of cold water; easily soluble in hot water and in alcohol. **A., Trimetic** (C<sub>9</sub>H<sub>6</sub>O<sub>6</sub>), formed when mesitylenic and uvitic acids are oxidized with a chromic acid mixture. Crystallizes in short prisms, readily soluble in hot water and alcohol, melts about 300°, and sublimes near 240°. **A., Tropic** (C<sub>6</sub>H<sub>5</sub>.C<sub>2</sub>H<sub>3</sub>(OH).CO<sub>2</sub>H), obtained by digesting the alkaloids, atropin, and belladonna with baryta water. Slowly soluble in water; crystallizes in needles or plates, and melts at 117°. **A., Umbellic** (C<sub>6</sub>H<sub>8</sub>O<sub>4</sub>), obtained by digesting umbelliferon with caustic potash, and then precipitating with acids. It is a yellow powder, decomposing at about 240°. **A., Undecolic** (C<sub>11</sub>H<sub>18</sub>O<sub>2</sub>), obtained from the bromide of undecylenic acid. It fuses at 59.5°. **A., Uric** (C<sub>5</sub>H<sub>4</sub>N<sub>2</sub>O<sub>3</sub>), an acid found in the urine of man and the carnivora—rarely in the herbivora—abundantly in the excrement of birds, reptiles, and molluscs. Crystallizes in small, white, rhombic crystals, insoluble in alcohol and ether, soluble in 1900 parts of boiling water, and in hydrochloric acid. Exists usually in combination with the metals of the alkaline group. Separated from urine by adding ten per cent. of hydrochloric acid and allowing the crystals to settle for 48 hours, when they may be separated and weighed. Haycraft's method is a more exact but extended process. **A., Uric, Murexid, Test for**. See *Murexid*. **A., Uroleucic** (C<sub>9</sub>H<sub>10</sub>O<sub>5</sub>) [*uro-, leucin*], a stellate, crystalline acid found in the urine in alkaptonuria. **A., Uvitic** (C<sub>9</sub>H<sub>8</sub>O<sub>4</sub>), *Mesidic Acid*, obtained by oxidizing mesitylene with dilute HNO<sub>3</sub>. Crystallizes from hot water in needles, melting at 287°. **A., Valeric** (C<sub>5</sub>H<sub>10</sub>O<sub>2</sub>), formed by oxidizing normal amyl alcohol. Similar to butyric acid, but is more sparingly soluble in water; boils at 186°; sp. gr. at 0° is 0.9568. It congeals in the cold and melts at 20°. A mobile liquid with caustic acid taste and the pungent smell of old cheese. Its salts have been somewhat used in medicine. **A., Veratric** (C<sub>9</sub>H<sub>10</sub>O<sub>4</sub>), occurs with veratrin in the *saladilla* seeds; crystallizes from hot water in short, white, transparent needles, melting at 179.5° C.; soluble in water and alcohol. **A., Vulpic** (C<sub>19</sub>H<sub>14</sub>O<sub>5</sub>), occurs in the lichen *Cetraria vulpina*, from which it may be extracted by chloroform or lime water. Sparingly soluble in water and ether, crystallizes from alcohol in yellow prisms, melting at 110° and subliming. **A., Xanthic** (C<sub>7</sub>H<sub>5</sub>O<sub>2</sub>CS.SiH), a heavy, oily liquid, not soluble in water, with a penetrating smell and a sharp, astringent taste, many of whose salts have a yellow color. **A., Xylic** (C<sub>6</sub>H<sub>3</sub>(CH<sub>3</sub>)<sub>2</sub>CO<sub>2</sub>H), produced by the oxidation of pseudocumene. Crystallizes from alcohol in long prisms; dissolves with difficulty in water; melts at 126° C., and sublimes readily. **A., Xylidic** (C<sub>7</sub>H<sub>10</sub>O<sub>2</sub>), obtained by oxidizing xylic acid with dilute HNO<sub>3</sub>; separates from boiling water in flocculent masses; melts at 282°.

**Acida** (*as-id-ah*) [*l.*]. Plural of *Acidum*, *q. v.*

**Acid-Albumin** (*as-id al'-bu-min*). A derived albumin. A proteid having been acted upon or dissolved in the stronger acids, and yielding an acid reaction.

**Acidiferous** (*as-id-if'-er-us*) [*acidum*, acid; *ferre*, to bear]. Containing an acid; producing acidity.

**Acidifiable** (*as-id-if-i-a-bl*) [*acidum*, acid; *feri*, to become]. Capable of becoming an acid, or of becoming sour.

**Acidification** (*as-id-if-ik-a'-shun*) [*acidum*, acid; *facere*, to make]. Conversion into an acid; the process of becoming sour.

**Acidimeter** (*as-id-im'-et-er*) [*acidum*, acid; *μέτρον*, a measure]. An instrument for performing acidimetry.

**Acidimetry** (*as-id-im'-et-re*) [*acidum*, acid; *μέτρον*, a measure]. Determination of the free acid in a solution by an acidimeter, or by chemical reactions.

**Acidity** (*as-id'-it-e*) [*acidum*, acid]. The quality of being acid; sourness; excess of acid.

**Acidology** (*as-id-ol'-o-je*) [*ἄκισ*, a bandage, a point; *λόγος*, a treatise]. The science of surgical appliances.

**Acidometry** (*as-id-om'-et-re*). See *Acidimetry*.

**Acidopeirastic** (*as-id-o-pi-ras'-tik*) [*ἄκισ*, a point; *πειράζειν*, to test]. See *Akidopeirastic*.

**Acidostephyte** (*as-id-os'-te-o-fit*) [*ἄκισ*, a point; *στεφύτη*, to test]. A sharp, or needle-shaped, osteophyte.

**Ac'ids, Aromat'ic.** Acids derived by replacing hydrogen in the benzenes by carboxyls. They are crystalline solids that generally sublime undecomposed. Most of

them dissolve with difficulty in water. **A., Diazo.** See *Diazo Acids*. **A., Dibasic**, acids containing two carboxyl groups. They are solids, crystallizable, and generally volatile without decomposition. They are mostly soluble in water and have a strong acid reaction. See *Table*. **A., Fatty**, a class of monobasic acids, formed by the oxidation of the primary alcohols. The more complex fatty acids are found in all oleaginous compounds, where they exist combined with glycerin, forming fats. The fatty acids have a general formula  $C_nH_{2n}O_2$ . See *Table*. **A., Monobasic**, products of the replacement by oxygen of the two hydrogen atoms attached to the carbon-carrying OH. These acids enter into combination with a univalent basic radical to form a neutral salt, or a salt containing one equivalent of a base. **A., Organic**, acids characterized by the carboxyl group CO.OH.

## TABLE OF DIBASIC ACIDS OF THE FATTY COMPOUNDS.

### 1. FIRST SERIES. $C_nH_{2n}-2O_4$ .

| NAME.                         | FORMULA.          | PHYSICAL CONDITION. | MELTING POINT.<br>(Centigrade.) | SOLUBILITY.                                 |
|-------------------------------|-------------------|---------------------|---------------------------------|---|
| Oxalic, . . . . .             | $C_2H_2O_4$       | Solid.              | 101°                            | Slowly in water. Easily in alcohol.         |
| Malonic, . . . . .            | $C_3H_4O_4$       | Solid.              | 132°                            | Easily in water, alcohol, ether.            |
| Succinic, . . . . .           | $C_4H_6O_4$       | Solid.              | 180°                            | Slowly in water and alcohol.                |
| Pyrotartaric, . . . . .       | $C_5H_4O_4$       | Solid.              | 112°                            | Readily in water, alcohol, ether.           |
| Adipic, . . . . .             | $C_6H_{10}O_4$    | Solid.              | 148°                            | Slowly in water.                            |
| Pimelic, . . . . .            | $C_7H_{12}O_4$    | Solid.              | 102-104°                        | . . .                                       |
| Suberic, . . . . .            | $C_8H_{14}O_4$    | Solid.              | 140°                            | Slowly in water. Readily in alcohol, ether. |
| Lepargylic (Azelaic), . . . . | $C_9H_{16}O_4$    | Solid.              | 106°                            | Slowly in water.                            |
| Sebacic, . . . . .            | $C_{10}H_{18}O_4$ | Solid.              | 127°                            | . . .                                       |
| Brassylic, . . . . .          | $C_{11}H_{20}O_4$ | Solid.              | 105°                            | Almost insoluble in water.                  |
| Roccellic, . . . . .          | $C_{17}H_{32}O_4$ | Solid.              | 132°                            | . . .                                       |
| Cetyl Malonic, . . . . .      | $C_{19}H_{36}O_4$ | Solid.              | 121°                            | . . .                                       |

### 2. SECOND SERIES. UNSATURATED DICARBOXYLIC ACIDS. $C_nH_{2n}-4O_4$ .

|                                |                |                           |       |                            |
|--------------------------------|----------------|---------------------------|-------|----------------------------|
| Fumaric, . . . . .             | $C_4H_4O_4$    | Solid.                    | . . . | Almost insoluble in water. |
| Maleic, . . . . .              | $C_4H_4O_4$    | Solid.                    | 130°  | Readily soluble in water.  |
| Ethidene Malonic, . . . . .    | $C_5H_6O_4$    | Solid.                    | 220°  | . . .                      |
| Citraconic, . . . . .          | $C_5H_6O_4$    | Solid.                    | 80°   | . . .                      |
| Itaconic, . . . . .            | $C_5H_6O_4$    | Solid.                    | 161°  | Slowly soluble in water    |
| Mesaconic, . . . . .           | $C_5H_6O_4$    | Solid.                    | 202°  | Slowly soluble in water.   |
| Allyl Malonic, . . . . .       | $C_6H_8O_4$    | Solid.                    | 103°  | . . .                      |
| Propylidene Malonic, . . . . . | $C_6H_8O_4$    | Solid.                    | . . . | . . .                      |
| Hydromuconic, . . . . .        | $C_6H_8O_4$    | Solid.                    | 195°  | Slowly soluble in water.   |
| Pyrocinchonic, . . . . .       | $C_6H_8O_4$    | Only exists in the salts. | . . . | . . .                      |
| Allyl Succinic, . . . . .      | $C_7H_{10}O_4$ | Solid.                    | 94°   | . . .                      |
| Carbocaprolactonic, . . . . .  | $C_7H_{10}O_4$ | Solid.                    | 69°   | . . .                      |
| Teraconic, . . . . .           | $C_7H_{10}O_4$ | Solid.                    | 162°  | . . .                      |
| Xeronic, . . . . .             | $C_8H_{12}O_4$ | . . .                     | . . . | . . .                      |

TABLE OF DIBASIC ACIDS OF THE FATTY COMPOUNDS.—*Continued.*3. THIRD SERIES.  $C_nH_{2n-6}O_4$ .

| NAME.                             | FORMULA.       | PHYSICAL CONDITION. | MELTING POINT.<br>(Centigrade) | SOLUBILITY.                               |
|-----------------------------------|----------------|---------------------|--------------------------------|---|
| Acetylene Dicarboxylic, . . . . . | $C_4H_2O_4$    | Solid.              | 175°                           | . . .                                     |
| Glutinic, . . . . .               | $C_4H_2O_4$    | Solid.              | 145-146°                       | . . .                                     |
| Malonic, . . . . .                | . . .          | Solid.              | 260°                           | . . .                                     |
| Diallyl Malonic, . . . . .        | . . .          | Solid.              | 133°                           | . . .                                     |
| Diacetylene Dicarboxylic, . . .   | $C_6H_2O_4$    | Solid.              | . . .                          | Readily soluble in water, alcohol, ether. |
| Tetra-acetylene Dicarboxylic, . . | $C_{10}H_2O_4$ | Solid.              | . . .                          | . . .                                     |

## 4. KETONE DICARBOXYLIC ACIDS.

|                                 |                |        |            |                                     |
|---------------------------------|----------------|--------|------------|-------------------------------------|
| Mesoxalic, . . . . .            | $C_3H_2O_5$    | Solid. | 115°       | . . .                               |
| Oxalo-acetic, . . . . .         | $C_4H_4O_5$    | . . .  | . . .      | . . .                               |
| Aceto-malonic, . . . . .        | $C_5H_6O_5$    | . . .  | . . .      | . . .                               |
| Acetone Dicarboxylic, . . . . . | $C_5H_6O_5$    | Solid. | 130°       | Readily soluble in water and ether. |
| Aceto-succinic, . . . . .       | $C_6H_8O_5$    | Solid. | 24.4-24.5° | . . .                               |
| Aceto-glutaric, . . . . .       | $C_7H_{10}O_5$ | . . .  | . . .      | . . .                               |

## 5. DIKETONE-DICARBOXYLIC ACIDS.

|                             |                |         |       |       |
|-----------------------------|----------------|---------|-------|-------|
| Oxal-diacetic, . . . . .    | $C_6H_6O_6$    | Solid.  | 77°   | . .   |
| Oxal-levulinic, . . . . .   | $C_7H_8O_6$    | Liquid. | . . . | . .   |
| Diaceto-succinic, . . . . . | $C_8H_{10}O_6$ | Solid.  | 78°   | . . . |

## 6. URIC ACID GROUP (CARBAMIDES OF THE DICARBOXYLIC ACIDS).

|  |                   |        |       |   |
|--|-------------------|--------|-------|---|
| Parabanic Acid ( <i>Oxalyl Urea</i> ), . . | $C_3H_2N_2O_3$    | Solid. | . .   | Soluble in water and ether.                                 |
| Oxaluric Acid, . . . . .                   | $C_3H_4N_2O_4$    | Solid. | . .   | Slowly soluble in water.                                    |
| Barbituric Acid ( <i>Malonyl Urea</i> ), . | $C_4H_4N_2O_3$    | Solid. | . . . | . . .   |
| Dialuric Acid ( <i>Tartronyl Urea</i> ), . | $C_4H_4N_2O_4$    | Solid. | . . . | . . .   |
| Alloxan ( <i>Mesoxalyl Urea</i> ), . . . . | $C_4H_2N_2O_4$    | Solid. | . . . | Readily soluble in water.                                   |
| Uric Acid, . . . . .                       | $C_5H_4N_4O_3$    | Solid. | . . . | Insoluble in alcohol and ether.<br>Slowly soluble in water. |
| Guanin, . . . . .                          | $C_5H_5N_5O$      | Solid. | . . . | Insoluble in water, alcohol, ether.                         |
| Theobromin, . . . . .                      | $C_7H_8N_4O_2$    | Solid. | 290°  | Slowly soluble in hot water and alcohol.                    |
| Caffein (Thein), . . . . .                 | $C_8H_{10}N_4O_2$ | Solid. | 225°  | Slightly soluble in cold water and alcohol.                 |

## TABLE OF FATTY ACIDS.

FIRST SERIES.  $C_nH_{2n}O_2$ .FIRST SERIES.—*Continued.*

## TABLE OF FATTY ACIDS.—Continued.

## FIRST SERIES.—Continued.

| NAME.            | FORMULA.  | PHYSICAL CONDITION. | MELTING POINT. (Centigrade.) | BOILING POINT. (Centigrade.) | SPECIFIC GRAVITY. |
|------------------|---|---------------------|------------------------------|------------------------------|-------------------|
| Pelargonic, .    | C <sub>9</sub> H <sub>17</sub> O <sub>2</sub>   | Liquid.             | 12°                          | 253.5°                       | ..                |
| Capric, . . .    | C <sub>10</sub> H <sub>20</sub> O <sub>2</sub>  | Solid.              | 31.4°                        | 268°                         | ..                |
| Undecylic, . .   | C <sub>11</sub> H <sub>22</sub> O <sub>2</sub>  | Solid.              | 28.5°                        | 212°                         | ..                |
| Lauric, . . .    | C <sub>12</sub> H <sub>24</sub> O <sub>2</sub>  | Solid.              | 43.6°                        | 269°                         | ..                |
| Tridecylic, .    | C <sub>13</sub> H <sub>26</sub> O <sub>2</sub>  | Solid.              | 40.5°                        | 235°                         | ..                |
| Myristic, . . .  | C <sub>14</sub> H <sub>28</sub> O <sub>2</sub>  | Solid.              | 54°                          | ..                           | ..                |
| Pentadecatoic, . | C <sub>15</sub> H <sub>30</sub> O <sub>2</sub>  | Solid.              | 51°                          | 257°                         | ..                |
| Palmitic, . . .  | C <sub>16</sub> H <sub>32</sub> O <sub>2</sub>  | Solid.              | 62°                          | ..                           | ..                |
| Margaric, . .    | C <sub>17</sub> H <sub>34</sub> O <sub>2</sub>  | Solid.              | 60°                          | ..                           | ..                |
| Stearic, . . .   | C <sub>18</sub> H <sub>36</sub> O <sub>2</sub>  | Solid.              | 62.2°                        | ..                           | ..                |
| Nondecylic, .    | C <sub>19</sub> H <sub>38</sub> O <sub>2</sub>  | Solid.              | 65.5°                        | ..                           | ..                |
| Arachidic, . .   | C <sub>20</sub> H <sub>40</sub> O <sub>2</sub>  | Solid.              | 75°                          | ..                           | ..                |
| Medullic, . .    | C <sub>21</sub> H <sub>42</sub> O <sub>2</sub>  | Solid.              | 72°                          | ..                           | ..                |
| Behenic, . . .   | C <sub>22</sub> H <sub>44</sub> O <sub>2</sub>  | Solid.              | 73°                          | ..                           | ..                |
| Lignoceric, .    | C <sub>24</sub> H <sub>48</sub> O <sub>2</sub>  | Solid.              | 80.5°                        | ..                           | ..                |
| Hyenic, . . .    | C <sub>25</sub> H <sub>50</sub> O <sub>2</sub>  | Solid.              | 77°                          | ..                           | ..                |
| Cerotic, . . .   | C <sub>27</sub> H <sub>54</sub> O <sub>2</sub>  | Solid.              | 79°                          | ..                           | ..                |
| Melissic, . . .  | C <sub>30</sub> H <sub>60</sub> O <sub>2</sub>  | Solid.              | 88°                          | ..                           | ..                |
| Theobromic, .    | C <sub>64</sub> H <sub>122</sub> O <sub>2</sub> | Solid.              | 72°                          | ..                           | ..                |

SECOND SERIES. OLEIC ACIDS. C<sub>n</sub>H<sub>2n-2</sub>O<sub>2</sub>.

|                 |  |         |      |        |    |
|-----------------|--|---------|------|--------|----|
| Acrylic, . . .  | C <sub>3</sub> H <sub>4</sub> O <sub>2</sub> | Liquid. | + 7° | 139.5° | .. |
| Crotonic, . . . | C <sub>4</sub> H <sub>6</sub> O <sub>2</sub> | Solid.  | 72°  | 182°   | .. |
| Angelic, . . .  | C <sub>5</sub> H <sub>8</sub> O <sub>2</sub> | Solid.  | 45°  | 185°   | .. |

## SECOND SERIES.—Continued.

| NAME.           | FORMULA.                                       | PHYSICAL CONDITION. | MELTING POINT. (Centigrade.) | BOILING POINT. (Centigrade.) | SPECIFIC GRAVITY. |
|-----------------|--|---------------------|------------------------------|------------------------------|-------------------|
| Pyroterebic, .  | C <sub>6</sub> H <sub>10</sub> O <sub>2</sub>  | Liquid.             | ..                           | ..                           | ..                |
| Teracrylic, . . | C <sub>7</sub> H <sub>12</sub> O <sub>2</sub>  | Liquid.             | ..                           | 268°                         | ..                |
| Nonylenic, . .  | C <sub>9</sub> H <sub>16</sub> O <sub>2</sub>  | Liquid.             | ..                           | ..                           | ..                |
| Decylenic, . .  | C <sub>10</sub> H <sub>18</sub> O <sub>2</sub> | Solid.              | +10°                         | ..                           | ..                |
| Campholic, . .  | C <sub>10</sub> H <sub>18</sub> O <sub>2</sub> | Solid.              | 95°                          | ..                           | ..                |
| Undecylenic, .  | C <sub>11</sub> H <sub>20</sub> O <sub>2</sub> | ..                  | 24.5°                        | 275°                         | ..                |
| Cymnic, . . .   | C <sub>15</sub> H <sub>28</sub> O <sub>2</sub> | ..                  | ..                           | ..                           | ..                |
| Hypogaic, . .   | C <sub>16</sub> H <sub>30</sub> O <sub>2</sub> | Solid.              | 33°                          | ..                           | ..                |
| Oleic, . . . .  | C <sub>18</sub> H <sub>34</sub> O <sub>2</sub> | Liquid.             | +14°                         | ..                           | ..                |
| Elaïdic, . . .  | C <sub>18</sub> H <sub>34</sub> O <sub>2</sub> | Solid.              | 44-45°                       | ..                           | ..                |
| Doeglic, . . .  | C <sub>19</sub> H <sub>36</sub> O <sub>2</sub> | ..                  | ..                           | ..                           | ..                |
| Erucic, . . .   | C <sub>22</sub> H <sub>42</sub> O <sub>2</sub> | Solid.              | 33-34°                       | ..                           | ..                |
| Brassicic, . .  | C <sub>22</sub> H <sub>42</sub> O <sub>2</sub> | Solid.              | 56°                          | ..                           | ..                |

THIRD SERIES. PROPIOLIC ACIDS. C<sub>n</sub>H<sub>2n-4</sub>O<sub>2</sub>.

|                  |  |         |        |      |       |
|------------------|--|---------|--------|------|-------|
| Propiolic, . .   | C <sub>3</sub> H <sub>2</sub> O <sub>2</sub>   | Liquid. | + 6°   | 144° | ..    |
| Tetrollic, . . . | C <sub>4</sub> H <sub>4</sub> O <sub>2</sub>   | Solid.  | 76°    | 203° | ..    |
| Sorbic, . . . .  | C <sub>6</sub> H <sub>6</sub> O <sub>2</sub>   | Liquid. | 134.5° | 225° | ..    |
| Diallylacetic, . | C <sub>8</sub> H <sub>12</sub> O <sub>2</sub>  | Liquid. | ..     | 221° | ..    |
| Undecolic, . .   | C <sub>11</sub> H <sub>18</sub> O <sub>2</sub> | ..      | 59.5°  | ..   | ..    |
| Palmitolic, . .  | C <sub>16</sub> H <sub>28</sub> O <sub>2</sub> | Solid.  | 42°    | ..   | ..    |
| Stearolic, . .   | C <sub>18</sub> H <sub>32</sub> O <sub>2</sub> | Solid.  | 48°    | ..   | ..    |
| Linoleic, . . .  | C <sub>18</sub> H <sub>32</sub> O <sub>2</sub> | Liquid. | ..     | ..   | 0.921 |
| Behenolic, . .   | C <sub>22</sub> H <sub>40</sub> O <sub>2</sub> | Solid.  | 57.5°  | ..   | ..    |

**Acidulated** (*as-id'-u-la-ted*) [*acidulare*, to make sour]. Somewhat sour or acid; sourish.

**Acidulous** (*as-id'-u-lus*) [*acidulare*, to make sour]. Sourish; subacid; moderately sour.

**Acidum** (*as'-id-um*) [L.]. See *Acid*.

**Acidurgia** (*as-id-ur'-je-ah*). See *Acidurgia*.

**Acies** (*a'-she-ēs*) [L., sharpness, edge, steel]. 1. Sharpness; keenness. 2. A sharp or cutting instrument. 3. Iron or steel as a medicine.

**Acinaceous** (*as-in-a'-she-us*) [*acinus*, a berry or grape-stone]. Possessing or made of kernels, small seeds, or drupelets, as a grape or raspberry.

**Acinacifolious** (*as-in-as-if-o'-le-us*) [*acinaces*, a simitar; *folium*, a leaf]. In biology, having simitar-shaped leaves.

**Acinaciform** (*as-in-as'-e-form*) [*acinaces*, a simitar; *formis*, shape]. In biology, a leaf, pod, or other object, having one straight, thick edge, and one thin and convex; simitar-shaped.

**Acinarious** (*as-in-a'-re-us*) [*acinus*, the grape]. In biology, having the surface covered with grape-like vesicles, as in certain algae.

**Acinesia** (*as-in-e'-ze-ah*) [à priv.; *κίνησις*, motion].

Motor paralysis. A loss of motion in any or all parts of the body; abstinence from motion. Also, the interval between consecutive throbs of the heart. See also *Diastole*.

**Acinesis** (*as-in-e'-sis*). Same as *Acinesia*.

**Acinetan** (*as-in-e'-tan*) [*ἀκίνητος*, motionless]. An infusorian having suctorial, tubular processes instead of cilia; one of the *Acinetæ*.

**Acinetatrophia** (*as-in-et-at-ro'-fe-ah*) [*acinesis*; *atrophia*]. Atrophy due to lack of exercise.

**Acinetic** (*as-in-e'-ik*) [*ἀκίνητος*, motionless]. Relating to, or affected with, acinesia.

**Acinetiform** (*as-in-e'-e-form*). In biology, an acinetan-like infusorian.

**Acini** (*as'-in-i*) [L.]. Plural of *Acinus*, *q. v.*

**Aciniform** (*as-in'-e-form*) [*acinus*, a grape]. Grape-like.

**Acinus** (*as'-in-us*) [*acinus*, a grape: *pl.*, *Acini*]. Any one of the smallest lobules of a conglomerate gland; a saccule of a compound racemose gland; a lobule of the liver, etc.

**Acipenser** (*as-e-pen'-ser*) [*ἄκτιπσιος*, the sturgeon]. A genus of fishes. *A. huso*. See *Ichthyocolla*.

**Acipenserid** (*as-e-pen'-ser-id*) [ἀκίπτιος, the sturgeon]. A member of the family *Acipenseridae*. A sturgeon.

**Acipenseroid** (*as-e-pen'-ser-oid*) [ἀκίπτιος, the sturgeon]. In biology, resembling the sturgeon.

**Aciurgy** (*as-e-er'-je-ah*), or **Aciurgy** (*a.-e-er'-je*) [ἀκυσ, point; ἐργειν, to work]. Operative surgery.

**Ack'ermann's An'gles**. See *Angle*.

**Aclastic** (*ak-las'-tik*) [ἀ priv.; κλαειν, to break]. Not refracting.

**Acleitocardia** (*ah-kli-to-kar'-de-ah*) [ἀ priv.; κλειν, to close; καρδια, the heart]. Imperfect closure of the foramen ovale, a fetal opening between the auricles of the heart, which prevents perfect aëration of the blood. It is thought to be connected with the disease variously known as cyanopathy, "Blue Disease," "Blue Jaundice," etc.

**Acmaistic** (*ak-mas'-tik*) [ἀκμαστικός, in full bloom]. Having no acme, or culminating point (said of fevers); continuous.

**Acme** (*ak'-me*) [ἀκμή, a point]. The critical stage of a disease; the crisis. The highest point or degree of anything.

**Acmon** (*ak'-mon*) [ἀκμων, an anvil]. The incus.

**Acne** (*ak'-ne*) [ἀκνη, a point]. *Acne vulgaris*; *Varus*; a very common, usually chronic, inflammatory disease of the sebaceous glands, occurring mostly about the face, chest, and back. The lesions may be papular, pustular, or tubercular. It occurs usually between the ages of puberty and twenty-four years, is usually worse in winter, and is associated with menstrual and gastrointestinal troubles. The individual lesions consist of minute pink, acuminate papules or pimples, in the center of which is a black-topped comedo (*A. punctata*, *A. papulosa*). **A. adenoid**. See *Lupus*, *Disseminated Follicular*. **A. adolescentum**. Synonym of *A. vulgaris*. **A. albida**. Synonym of *Milium*. **A. artificialis**, that form that disappears when the cause is removed. **A. atrophica**. Synonym of *A. varioliformis*. **A. cachecticum**, a form occurring only in starved or debilitated persons after long, wasting diseases, as phthisis. It consists of flat, livid, acneiform papules and pustules without comedones, resulting in deep pigmented scars. They are situated chiefly on the trunk and lower extremities. **A. ciliaris**, acne at the edges of the eyelids. **A. disseminata**. Synonym of *A. vulgaris*. **A. erythematosa**. Synonym of *A. rosacea*. **A. frontalis**. Synonym of *A. varioliformis*. **A. generalis**, acne that has become general over the surface of the body. **A. hypertrophica**, stage of *A. rosacea* in which there is a permanent, intensely red, non-inflammatory, nodulated thickening of the tips and sides of the nose, expanding it, both laterally and longitudinally. **A. indurata**, a variety of *A. vulgaris*, characterized by chronic, livid indurations, the result of extensive perifollicular infiltration. Especially seen in strumous subjects. **A. keloid**. See *Dermatitis papillomatosa capillitii*. **A. keratosa**, a rare form of acne in which a horny plug takes the place of the comedone, and by its presence excites inflammation. **A. mentagra**. See *Sycosis*. **A. necrotica**. Synonym of *A. varioliformis*. **A. papulosa**. See *Acne*. **A. picealis**, *Tar Acne*; a form of dermatitis that involves chiefly the extensor surfaces of the limbs, common in fiber-dressers who work with paraffin and in persons otherwise brought in contact with tar or its vapor. **A. punctata**, a variety of *A. vulgaris*. See *Acne*. **A. pustulosa**, a variety of *A. vulgaris*, characterized by dermic abscesses. **A. rodens**. Synonym of *A. varioliformis*. **A. rosacea**. *Rosacea*; *Telangiectasis faciei*; *Nexus araneus*; *Brandy Nose*; *Whisky Nose*;

*Spider Nexus*; *Spider Cancer*. A chronic, hyperemic, or inflammatory affection of the skin, situated usually upon the face, especially the nose, cheeks, forehead, and chin. It starts as a redness, which later becomes permanent and is then associated with the development of papules, pustules, and varicose vessels. In the latest stages there is an excessive formation of new tissue. Its causes are some reflex irritation of the stomach, bowels, or sexual apparatus. Common in drunkards. **A. scrofulosa**, a variety of *A. cachecticum*, that occurs in strumous children. **A. sebacea**. Synonym of *Seborrhea*. **A. simplex**, a variety of *A. vulgaris*. **A. sycosiformis**. Same as *Sycosis non parasitica*. **A. tarsi**, an inflammatory affection of the large sebaceous glands of the eyelashes (Meibomian glands). **A. varioliformis**, a rather rare disease, situated chiefly about the forehead, at the junction with the hairy scalp, and extending into the hair. It is especially abundant on the temples, and may spread over the face and body. It is a disease of adult life, but may occur before the age of twenty years. The pustules appear in groups, and each has a hard, central, necrotic scab, which presses into the skin, and when separated leaves a deep pit, at first dark red, but eventually becoming white. It is a very chronic disease, appearing in successive crops. Its etiology is unknown. **A. vulgaris**. See *Acne*.

**Acnemia** (*ak-ne'-me-ah*) [ἀ priv.; κνήμη, leg]. Deficiency in the calf of the leg.

**Acnitis** (*ak-ni'-tis*) [ἀκνή, a point; ιτις, inflammation]. See *Hydroadenitis phlegmonosa*.

**Acæ-**. See *Acæ*.

**Acælius** (*ah-se'-le-us*). See *Acælius*.

**Acolasia** (*ak-o-la'-ze-ah*) [ἀκολασία, intemperance]. Unrestrained self-indulgence; lust; intemperance.

**Acolastic** (*ak-o-las'-tik*) [ἀκολασία, intemperance]. Due to, or characterized by, acolasia.

**Acology** (*ak-ol'-o-je*) [ἀκος, remedy; λόγος, a discourse]. Acæology.

**Acolous** (*ah-ko'-lus*) [ἀ priv.; κῶλον, limb]. Having no limbs.

**Acomia** (*ah-ko'-me-ah*) [ἀ priv.; κόμη, hair]. Baldness. A deficiency of hair arising from any cause.

**Acomous** (*ah-ko'-mus*) [ἀ priv.; κόμη, hair]. Hairless, bald.

**Acondylose** (*ah-kon'-dil-ōs*). See *Acondylous*.

**Acondylous** (*ah-kon'-dil-us*) [ἀ priv.; condyle]. Having no condyles; having no joints.

**Aconine** (*ak'-o-nin*) [ἀκονιτον],  $C_{26}H_{39}NO_{11}$ . A decomposition product of aconitin.

**Aconite** (*ak'-o-nit*). See *Aconitum*.

**Aconitia** (*ak-o-nish'-e-ah*). Aconitin, or aconitina; a very poisonous alkaloid, the active principle of aconite.

**Aconitic Acid** (*ak-o-nit'-ik*). See *Acid*.

**Aconiti folia** (*ak-o-ni-ti fō'-le-ah*) [L.]. Aconite leaves. See *Aconitum*. **A. radix** (*ak-o-ni-ti ra'-dix*), aconite root. See *Aconitum*.

**Aconitina** (*ak-on-it-i'-nah*). Same as *Aconitia*. See *Aconitum*.

**Aconitum** (*ak-o-ni'-tum*) [L.]. The root of *Aconitum napellus*. Possesses a bitter, pungent taste. Produces numbness and persistent tingling in the tongue and lips. It is very poisonous. Exerts great depression of the heart, respiration, circulation, and nerves. It is antipyretic, diaphoretic, and diuretic. The active principle is *Aconitin*. Highly beneficial in fevers, acute throat affections, and inflammation of the respiratory organs. Dose gr. ss-ij. **A. Abstractum**, has double the strength of the powdered drug, or its fluid extract. Dose gr.  $\frac{1}{2}$ -j. Unof. **A. Extractum**. Dose gr.  $\frac{1}{6}$ - $\frac{1}{2}$ . **A. Ext. Fld.**, has a strength of one drop to the grain of powdered drug. Dose  $\mathfrak{m}$   $\frac{1}{2}$ -ij. **A. Liniment**

(B. P.), aconite-root, camphor, and rectified spirit. **A. Tinct.**, contains aconite 35, alcohol and water each q. s. Dose  $\text{m}\frac{1}{2}$ -iv. The following are unofficial: **Aconitina** ( $\text{C}_{33}\text{H}_{43}\text{NO}_{12}$ ) (aconitin), an amorphous solid. Dose gr.  $\frac{1}{100}$ - $\frac{1}{50}$ . **A. ferox**, a plant of the Himalayas, used internally for pneumonia and pleurisy; externally for neuralgia. Dose of the tincture (1 in 10)  $\text{m}\frac{1}{2}$ -v. **A. Injectio Hypodermica**, one grain in  $\frac{1}{2}$  ounce. Dose  $\text{m}\frac{1}{2}$ -iv. **A. Napellina**, Dose gr.  $\frac{1}{2}$ - $\frac{3}{4}$ . St. Jacob's Oil, a weak aconite liniment. **A. Oleatum**, a two per cent. solution of aconitin in oleic acid. **A. Ung.** (B. P.), eight grains to the ounce.

**Aconuresis** (*ah-kon-u-re'-sis*) [*à* priv.; *conari*, to strive; *ὀύρησις*, urination]. Involuntary discharge of urine.

**Acopa** (*ak'-o-pah*). Plural of *Acopon*, q. v.

**Acopia** (*ah-ko'-pe-ah*) [*ἀκοπία*]. Freedom from weariness.

**Acopic** (*ah-ko'-ik*) [see *Acopia*]. Refreshing; restorative; restful.

**Acopon** (*ak'-o-pon*) [*à* priv.; *κόπος*, fatigue]. A restorative, or cordial medicine or application.

**Acoprosis** (*ah-kop-ro'-sis*) [*à* priv.; *κόπρος*, excrement]. Deficient formation of feces.

**Acor** (*a'-kor*) [L.]. Acrimony: acidity, as of the stomach.

**Acorea** (*ah-ko-re'-ah*) [*à* priv.; *κόρη*, pupil]. Absence of the pupil.

**Acoretin** (*ak-o-re'-tin*) [*acorus*; *ρητίνη*, resin]. A resinous principle obtained from *Acorus calamus*.

**Acoria** (*ah-ko'-re-ah*) [*à* priv.; *κόρος*, satisfaction]. A greedy or insatiable appetite.

**Acorin** (*ak'-o-rin*) [*à* priv.; *κόρη*, the pupil]. A bitter glucoside obtained from *Acorus calamus*, or sweet flag.

**Acormous** (*ah-kor'-mus*) [*à* priv.; *κορμός*, the trunk of a tree]. Trunkless; of the nature of an acornus.

**Acormus** (*ah-kor'-mus*) [*à* priv.; *κορμός*, the trunk]. A monster without a trunk or body.

**Acorn** (*a'-korn*) [L.]. The fruit or nut of the oak. See *Camata* and *Camatina*.

**Acorn-cups** (*ah-kor'-kups*). The capsules in which acorns are seated. See *Valonia*.

**Acorus** (*ak'-o-rus*) [*à* priv.; *κόρη*, the pupil]. See *Calamus*.

**Acosmia** (*ah-koz'-me-ah*) [*à* priv.; *χόσμος*, order]. 1. Poor health. 2. An irregularity in the course of a disease.

**Acotyledon** (*ah-kot-il-e'-don*) [*à* priv.; *κοτύληδών*, a hollow vessel]. In botany, a plant producing an embryo without seed-leaves or cotyledons.

**Acotyledonous** (*ah-kot-il-e'-do-nus*) [*à* priv.; *κοτύληδών*, a hollow vessel]. Destitute of embryo or embryonic leaves, or cotyledons.

**Acouchi** (*ah-ko'-chē*). See *Acuchi*.

**Acoumeter**, or **Acouometer** (*ah-ko'-met-er*, *a-koo-om'-et-er*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. An instrument for measuring the acuteness of hearing.

**Acoumetry** (*ah-ko'-met-re*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. The measurement or testing of the acuteness of the hearing.

**Acouphonia** (*ah-koo-o-fo'-ne-ah*) [*ἀκούειν*, to hear; *φωνή*, sound]. Auscultatory percussion.

**Acouoxylon** (*ah-koo-oks'-il-on*) [*ἀκούειν*, to hear; *ξύλον*, wood]. A wooden (pine) stethoscope.

**Acousimeter** (*ah-koo-sim'-et-er*) [*ἀκουσις*, a hearing; *μέτρον*, a measure.] See *Acoumeter*.

**Acousma** (*ah-koos'-* or *koov'-mah*) [*ἀκousμα*, thing heard; *pl.*, *Acousmata*]. An auditory hallucination; a condition in which imaginary sounds are noticed by the patient, and are believed by him to be real.

**Acoustic** (*ah-koos'-tik* or *koovz'-tik*) [*ἀκουστικός*]. Relating to the ear or sense of hearing. **A. Duct**, the ex-

ternal meatus of the ear. **A. Nerve**, the portio mollis of the seventh pair. See *Nerves*. **A. Tetanus**, the rapidity of the induction shocks in a frog's nerve-muscle preparation, as measured by the pitch of a vibrating rod. **A. Tubercle**, a rounded elevation on either side of the floor of the fourth ventricle.

**Acoustics** (*ah-koos'-tik*s or *a-koovz'-tik*s) [*ἀκουστικός*]. The science of sound.

**Acquetta** (*ak-wet'-tah*) [Ital.]. Same as *Aquatozana*.

**Acquired Movements** (*ak-wit'-erd moov'-mentz*).

Those brought under the influence of the will only after conscious and attentive effort and practice, in distinction from reacquired movements, those reinstated in their former proficiency after injury to the motor regions of the brain.

**Acrapalous** (*ah-krep'-al-us*). See *Acrepalous*.

**Acramphibryous** (*ak-ram-fib'-ri-us*) [*ἄκρος*, at the end; *αὐτί*, on both sides; *βρίον*, blossom]. In biology, pertaining to plants that produce lateral as well as terminal buds.

**Acrania** (*ah-kra'-ne-ah*) [*à* priv.; *κρανίον*, skull]. The condition of a monster with partial or complete absence of the cranium.

**Acranial** (*ah-kra'-ne-al*) [*à* priv.; *κρανίον*, skull]. Having no cranium.

**Acrasia** (*ah-kra'-se-ah*) [*à* priv.; *κράσις*, moderation]. 1. Intemperance; lack of self-control. 2. Acratia.

**Acraspedote** (*ah-kras'-pe-dot*) [*à* priv.; *κράσπεδον*, a hem or border]. In biology, pertaining to Gegenbaur's group of medusae, *Acraspeda*; having a disk without velum or marginal fold.

**Acratia** (*ah-kra'-she-ah*) [*ἀκράτεια*: *à* priv.; *κράτος*, force]. Impotence, loss of power.

**Acraturesis** (*ah-krat-u-re'-sis*) [*ἀκράτεια*, lack of strength; *οὐρησις*, micturition]. Inability to micturate, from atony of the bladder.

**Acrebolic** (*ak-rek-bol'-ik*) [*ἄκρος*, at the apex; *εκβάλλον*, to throw out]. In biology, capable of protrusion by an outward movement of the tip; the introverted and eversible proboscis of certain worms and molluscs.

**Acrembolic** (*ak-rem-bol'-ik*) [*ἄκρος*, at the apex; *εμβάλλειν*, to throw in, insert]. In biology, introversion by an inward movement of the tip, as the everted proboscis of certain worms and molluscs.

**Acrepalous**, or **Acræpalous** (*ah-krep'-al-us*) [*à* priv.; *κραπάλη*, debauch]. Correcting the nausea that follows excess in drinking, or in eating.

**Acrid** (*ak'-rid*) [*acer*, *acris*, sharp]. Pungent, irritating; producing an irritation, as of the tongue, fauces, or stomach.

**Acridian** (*ak-rid'-i-an*) [dim. of *ἀκρις*, a locust]. Pertaining to the acridia or grasshoppers.

**Acridin** (*ak'-rid-in*) [*acer*, *acrid*],  $\text{C}_{13}\text{H}_9\text{N}$ . A substance produced by heating anilin and salicylic aldehyde to  $260^\circ$  with  $\text{ZnCl}_2$ . Very soluble in alcohol and ether: It occurs in crude anthracene and dissolves in dilute acids with a beautiful green fluorescence. It readily sublimes in colorless leaflets; melts at  $110^\circ$ ; and has a very pungent odor.

**Acridins** (*ak'-rid-inz*) [*acer*, *acrid*]. Substances obtained when diphenylamin is heated to  $300^\circ$  with fatty acids. They are feeble bases; their salts are decomposed by boiling water.

**Acridophagus** (*ak-rid-of'-a-gus*) [*ἀκρις*, a locust; *φαγείν*, eat]. The eater of locusts.

**Acrimony** (*ak'-rim-o-ne*) [*acrimonia*]. Irritating quality, pungency, corrosiveness: an acrid quality or state.

**Acrinia** (*ah-krin'-e-ah*) [*à* priv; *κρίνειν*, to separate]. Diminution or suppression of a secretion or excretion.

**Acrynyl** (*ak-rin'-il*) [*acer*, acid],  $C_7H_7O$ . One of the univalent radicles. **A. Sulphocyanate**,  $C_7H_7O.SCN$ , an acid and vesicating substance found in white mustard, corresponding to the essential oil of the black mustard.

**Acrisia** (*ah-kris'-e-ah*) [*a* priv.; *crisis*]. The absence of a crisis from a disease; an unfavorable crisis or turn in the course of an attack of disease.

**Acritical** (*ah-krit'-ik-al*) [*a* priv.; *κρίσις*, a crisis]. Having no crisis; not relating to a crisis.

**Acritochromacy** (*ah-krit-o-kro'-mas-e*) [*ἀκρίτος*, undistinguished; *χρῶμα*, color]. Color-blindness, achromatopsia.

**Acroesthesia** (*ak-ro-es-the'-ze-ah*). See *Acroesthesia*.

**Acroanesthesia** (*ak-ro-an-es-the'-ze-ah*) [*ἀκρον*, extremity; *ἀναισθησία*, want of feeling]. Anesthesia of the extremities.

**Acroarthritis** (*ak-ro-arth-ri'-tis*) [*ἀκρον*, extremity; *ἄρθρον*, a joint; *ῥις*, inflammation]. Inflammation of the joints of a limb.

**Acroasphyxia** (*ak-ro-as-fiks'-e-ah*) [*ἀκρον*, extremity; *ἀ* priv.; *σφίσις*, pulse]. Asphyxia of the extremities, the so-called phenomena of Raynaud.

**Acrobryous** (*ak-rob'-re-us*) [*ἀκρος*, apex; *βρίον*, a flower]. In biology, growing only at the apex.

**Acrobystia** (*ak-ro-bis'-te-ah*) [*ἀκροβυστία*, the foreskin]. The prepuce.

**Acrobystiolith** (*ak-ro-bis'-te-o-lith*) [*ἀκροβυστία*, the prepuce; *λίθος*, a stone]. A preputial calculus.

**Acrobystitis** (*ak-ro-bis-ti'-tis*) [*ἀκροβυστία*, the foreskin; *ῥις*, inflammation]. Posthitis.

**Acrocarpous** (*ak-ro-kar'-pus*) [*ἀκρος*, at the apex; *καρπός*, fruit]. In biology, fruiting at the tips, as mosses.

**Acrocephalia** (*ak-ro-sef-a'-le-ah*) [*ἀκρον*, a point; *κεφαλή*, the head]. A deformity of the head in which the vertical diameter is increased and the top is more or less pointed.

**Acrocephalic** (*ak-ro-sef-al'-ik*) [*ἀκρον*, a point; *κεφαλή*, the head]. Characterized by acrocephalia; having the top of the head unusually high.

**Acrocephaline** (*ak-ro-sef'-a-lin*) [*ἀκρον*, point; *κεφαλή*, head]. In biology, resembling birds of the genus *Acrocephalus*, the large-billed reed warblers.

**Acrocephalous** (*ak-ro-sef'-al-us*) [*ἀκρον*, a point; *κεφαλή*, the head]. Characterized by or affected with acrocephalia.

**Acrocephaly** (*ak-ro-sef'-al-e*) [*ἀκρον*, a point; *κεφαλή*, the head]. Same as *Acrocephalia*.

**Acrocheir** (*ak'-ro-kir*) [*ἀκρον*, point; *χείρ*, hand]. The ends of the fingers considered together; the forearm and hand.

**Acrochordon** (*ak-ro-kor'-don*) [*ἀκροχορδών*, literally the end of a catgut cord]. A pedunculated or penile wart. Synonym of *Molluscum fibrosum*.

**Acrocinesis** (*ak-ro-sin-e'-sis*) [*ἀκρος*, extreme; *κίνησις*, movement]. Excessive motility; abnormal freedom of movement, as seen in certain cases of hysteria.

**Acrocinctic** (*ak-ro-sin-e'-ik*) [*ἀκρος*, extreme; *κίνησις*, movement]. Characterized by acrocinesis.

**Acrocyst** (*ak'-ro-sist*) [*ἀκρος*, apex; *κύστις*, pouch]. In biology, a sort of broad sac at the top of the gonangium in certain hydroids.

**Acrodermatitis** (*ak-ro-der-mat-i'-tis*) [*ἀκρον*, extremity; *δέρμα*, skin; *ῥις*, inflammation]. Inflammation of the skin of an extremity.

**Acrodont** (*ak'-ro-dont*) [*ἀκρος*, apex or edge; *ὀδούς*, tooth]. In biology, one of or pertaining to those lizards with teeth attached to the edge of the jaw, without alveoli.

**Acrodynia** (*ak-ro-din'-e-ah*) [*ἀκρος*, an extremity; *δύσιν*, pain]. Epidemic erythema; a disease closely allied

to pellagra. It is characterized by gastro-intestinal symptoms, redness of the conjunctive, edema of the face, formation, pricking pains in the palm and soles, hyperesthesia followed by anesthesia of these parts, and an erythematous eruption preceded by bullæ, chiefly on the hands and feet, but spreading over the limbs and trunk. This is followed by exfoliation and dark brown or black pigmentation, greatest in the warm regions of the body. Wasting of the limbs, with edema, cramps, pareses, and spasms may be present, and death may follow in the old or feeble. The disease is probably due to some noxious constituent of or defect in the diet.

**Acroesthesia**, or **Acroesthesia** (*ak-ro-es-the'-ze-ah*) [*ἀκρος*, extreme; *αἰσθησις*, sensation]. Exaggerated sensitiveness, or sensibility. Sense of pain in the extremities.

**Acrogen** (*ak'-ro-jen*) [*ἀκρος*, apex; *γενής*, produced]. In biology, a member of a division of the Cryptogams which grow by terminal buds, as ferns and mosses.

**Acrogenic** (*ak-ro-jen'-ik*) [*ἀκρος*, apex; *γενής*, produced]. In biology, partaking of the character of an acrogen.

**Acrogenous** (*ak-roj'-en-us*) [*ἀκρος*, at the apex; *γενής*, produced]. In biology, growth by increase at the summit, as ferns, mosses, and certain zoöphytes.

**Acrogynous** (*ak-roj'-in-us*) [*ἀκρος*, at the tip; *γυνή*, female]. In biology, having the archegonia formed from or near the apical cell, as certain of the *Hepaticæ*.

**Acrolein** (*ak-ro'-le-in*) [*acer*, sharp; *oleum*, oil],  $C_3H_4O$ . Acrylic Aldehyd. A highly volatile liquid derived from the decomposition or the destructive distillation of glycerin. See *Acrylaldehyd*.

**Acrolenion** (*ak-ro-len'-e-on*) [*ἀκρον*, point; *ὤληνη*, elbow]. Same as *Olecranon*.

**Acromania** (*ak-ro-ma'-ne-ah*) [*ἀκρος*, extreme; *μανία*, madness]. Incurable or extreme insanity.

**Acromastitis** (*ak-ro-mas-ti'-tis*) [*acromastium*; *itis*, inflammation]. Inflammation of the nipple.

**Acromastium** (*ak-ro-mas'-te-num*) [*ἀκρον*, a point; *μαστός*, breast]. The nipple.

**Acromegalia** (*ak-ro-meg-a'-le-ah*), or **Akromegaly** (*ak-ro-meg'-al-e*) [*ἀκρος*; *μεγάλῃ*, large]. A disease characterized by abnormally great development of the extremities, and of the features of the face, including the bony as well as the soft parts. The disease is of long duration, twenty years or more, the patient finally dying of exhaustion. The etiology is unknown, although Virchow believes heredity to have an important share in its causation.

**Acromial** (*ak-ro'-me-al*) [*ἀκρος*, extremity; *ὤμος*, the shoulder]. Relating to the acromion.

**Acromicria** (*ak-ro-mik'-re-ah*) [*ἀκρος*, extremity; *μικρός*, small]. Abnormal smallness of the extremities. A condition in which there is a reduction in the size of the nose, ears, and face, as well as hands and feet.

**Acromio-clavicular** (*ak-ro'-me-o-klav-ik'-u-lar*) [*ἀκρος*, extremity; *ὤμος*, the shoulder; *clavus*, a key]. Relating to the acromion and the clavicle.

**Acromio-coracoid** (*ak-ro'-me-o-ko'-rak-oid*). See *Acromio-coracoideus*.

**Acromio-coracoideus** (*ak-ro'-me-o-ko-rak-oid-e'-us*) [*ἀκρος*, extremity; *ὤμος*, the shoulder; *κόραξ*, a crow]. A triangular ligament lying between the acromion and the coracoid process.

**Acromio-deltoides** (*ak-ro'-me-o-del-toid-e'-us*) [*ἀκρος*, extremity; *ὤμος*, the shoulder; *δελτοειδής*, deltoid]. In comparative anatomy, a muscle having as its origin the acromion, and the deltoid ridge of the humerus as its insertion.

**Acromio-humeral** (*ak-ro'-me-o-hu'-mer-al*) [ἄκρος, extremity; ὤμος, the shoulder; *humerus*]. Relating to the acromion and the humerus. **A. Muscle**, the deltoid.

**Acromion** (*ak-ro'-me-on*) [ἄκρον, a summit; ὤμος, the shoulder]. The triangular-shaped process at the summit of the scapula, that forms the attachment of the deltoid muscle.

**Acromio-thoracic** (*ak-ro'-me-o-tho-ra'-sik*) [ἄκρόμιον, shoulder; θώραξ, thorax]. In anatomy, relating to the shoulder and thorax, as the acromio-thoracic artery.

**Acromio-trapezius** (*ak-ro'-me-o-tra-pe'-ze-us*) [ἄκρόμιον, shoulder; *trapezium*]. In anatomy, a part of the trapezius muscle.

**Acromphalon** (*ak-rom'-fal-on*) [ἄκρον, a point; ὀμφαλός, the navel]. See *Acromphalus*.

**Acromphalus** (*ak-rom'-fal-us*) [ἄκρον, extremity; ὀμφαλός, the navel]. 1. The center of the umbilicus to which the cord is attached. 2. The first stage of umbilical hernia, marked by a pouting of the navel.

**Acromyodian** (*ak-ro-me-o'-de-an*) [ἄκρον, extremity; μῦς, muscle; ᾠδή, song]. In biology, having the syringeal muscles attached to the ends of the upper bronchial rings, as in certain singing birds, the *Acromyodi*.

**Acromyodic** (*a-kro-me-ol'-ik*). Same as *Acromyodian*.

**Acromyodous** (*ak-ro-mi'-o-dus*). Same as *Acromyodian*.

**Acronarcotic** (*ak-ro-nar-kot'-ik*) [acer, sharp; ναρκοῦν, to benumb]. Both acrid and narcotic.

**Acroneurosis** (*ak-ro-nu-ro'-sis*) [ἄκρον, an extremity; νῆρον, a nerve]. Any neurosis manifesting itself in the extremities.

**Acronyx** (*ak'-ro-nix*) [ἄκρον, an extremity; ὄνυξ, a nail]. The ingrowing of the nail.

**Acroparalysis** (*ak-ro-par-al'-is-is*) [ἄκρον, an extreme; παρα, by; λῆναι, to loose]. Paralysis of the extremities.

**Acroparesthesia**, or **Acroparæsthesia** (*ak-ro-par-es-the'-ze-ah*) [ἄκρον, extremity; παρά, around; αἰσθησις, sensation]. 1. Abnormal, or perverted sensation in the extremities. 2. Extreme or confirmed paresthesia.

**Acropathology** (*ak-ro-path-ol'-o-je*) [ἄκρον, an extremity; πάθος, disease; λόγος, treatise]. The pathology of the extremities.

**Acropathy** (*ak-rof'-a-the*) [ἄκρον, an extremity; πάθος, suffering]. Any disease of the extremities.

**Acropetal** (*ak-rof'-et-al*) [ἄκρον, the top; πέτερε, to seek]. In biology, developing from the base or center, upward and outward, as many leaves, lateral shoots, or flower clusters.

**Acrophobia** (*ak-ro-fó-be-ah*) [ἄκρον, a height; φόβος, fear]. Morbid dread of being at a great height.

**Acropodium** (*ak-ro-po'-de-on*) [ἄκρος, at the top; ποδῖον, dim. of πούς (πούς), foot]. In zoölogy, the entire upper surface of the foot.

**Acroposthia** (*ak-ro-pos'-the-ah*) [ἄκρος, extreme; πόσθη, foreskin]. The distal part of the prepuce.

**Acroposthitis** (*ak-ro-pos-thi'-tis*) [ἄκρος, extreme; πόσθη, foreskin]. Posthitis.

**Acrorrheuma** (*ak-ro-ru'-mah*) [ἄκρον, an extremity; ῥεύμα, a flux]. Rheumatism of the extremities.

**Acrosarcum** (*ak-ro-sar'-kum*) [ἄκρος, at the end; σάρξ (σαρκ), flesh]. In biology, a berry fruit produced by an ovary with an adnate calyx, e. g., a currant or cranberry.

**Acroscleriasis** (*ak-ro-skle-ri'-as-is*) [ἄκρον, extremity; σκληρός, hard]. Sclerotic changes in the extremities.

**Acroscopic** (*ak-ro-skop'-ik*) [ἄκρος, apex; σκοπεῖν, view]. In biology, looking toward the top.

**Acrosphacelus** (*ak-ro-sfus'-el-us*) [ἄκρον, extremity; σφάκελος, dead]. Gangrene of an extremity.

**Acrospire** (*ak'-ro-spir*) [ἄκρος, at the top; σπείρα, a coil, spire]. In biology, the first sprout of a grain.

**Acrospore** (*ak'-ro-spor*) [ἄκρος, at the end; σπορά, seed]. In biology, the spore of one of those fungi that fruit at the summit of simple erect hyphae. See *Peronospora*.

**Acrospores** (*ak'-ro-sporz*) [ἄκρος, topmost; σπορά, a seed]. See *Conidia*.

**Acrosporous** (*ak-ro-s'-po-rus*) [ἄκρος, topmost; σπορά, a seed]. Same as *Acrospore*.

**Acrotarsial** (*ak-ro-tar'-se-al*) [ἄκρος, extremity; τάρσος, tarsus]. In biology, pertaining to the instep.

**Acrotarsium** (*ak-ro-tar'-se-um*) [ἄκρος, top; τάρσος, tarsus]. The instep.

**Acroteria** (*ak-ro-te'-re-ah*) [ἀκροτήρια]. The extremities.

**Acrothymion**, or **Acrothymum** (*ak-ro-thi'-me-on*) [ἄκρος, summit; θύμος, thyme]. A rugose wart with a broad top.

**Acrotic** (*ak-rof'-ik*) [ἄκρος, extreme, outmost]. Relating to the glands of the skin; affecting the surface.

**Acrotica** (*ak-rof'-ik-ah*) [ἄκρος, extreme]. Acrotic diseases.

**Acrotism** (*ak'-krot-izm*) [ἀ priv.; κρότος, striking]. Any defective beating of the pulse; failure of the pulse.

**Acrotismus** (*ak-krot-iz'-mus*) [ἀ priv.; κρότος, striking]. See *Acrotism*.

**Acrylaldehyd** (*ak-ri'-al'-de-hid*) [acer, sharp; aldehyd],  $C_3H_4O$ . *Acrolein*, the aldehyd of the allyl series; obtained by distilling glycerin to which strong phosphoric acid has been added, or by the dry distillation of fatty bodies; a colorless, mobile liquid, boiling at  $52^\circ$ , possessing a sp. gr. of 0.8410 at  $20^\circ$ . It has a pungent odor and attacks the mucous membranes in a violent manner. It occasions an odor of burning fat. It is soluble in 2-3 parts of water.

**Actea**, or **Actæa** (*ak-te'-ah*) [ἄκτις, the elder]. A genus of ranunculaceous plants having active medicinal qualities. *A. alba*, the white cohosh, has much the same qualities as *A. spicata*. *A. cimicifuga* is more important. See *Cimicifuga*. *A. racemosa*. See *Cimicifuga*. *A. rubra*, red cohosh, and *A. spicata*, are purgative and emetic.

**Actinal** (*ak'-tin-al*) [ἄκτις, a ray]. In biology, pertaining to the oral pole, surface, or aspect of a radiate animal.

**Actine** (*ak'-tin*) [ἄκτις, a ray]. In biology, a spicular ray, in sponges.

**Actinenchyma** (*ak-tin-en'-kim-ah*) [ἄκτις, ray; ἐν γυμναι, infusion]. In biology, a tissue of stellate cells.

**Actinic** (*ak-tin'-ik*) [ἄκτις, a ray]. Referring to those wave-lengths of the spectrum corresponding to the violet and ultra-violet parts of the same that produce chemical changes in the haloid salts of silver, and are therefore valuable in photography.

**Actinochrome** (*ak-tin'-e-o-krom*) [ἄκτις, a ray; χρώμα, color]. A red pigment obtained from certain *Actinias*.

**Actinism** (*ak'-tin-izm*) [ἄκτις, a ray]. The chemical quality of light, or of the sun's rays.

**Actinohematin** (*ak-tin-o-hem'-a-tin*) [ἄκτις, ray; αἷμα, blood]. In biology, a respiratory pigment found by MacMunn in *Actinie*.

**Actinoid** (*ak'-tin-oid*) [ἄκτις, ray; εἶδος, form]. In zoölogy, radiate, as a star fish.

**Actinologous** (*ak-tin-ol'-o-gus*) [ἄκτις, a ray; λόγος, a word]. In biology, exhibiting actinology.

**Actinologue** (*ak-tin'-o-log*) [ἄκτις, a ray; λόγος, a word]. In biology, a part possessing actinologous homology.

**Actinology** (*ak-tin-ol'-o-je*) [ἄκτις, a ray; λόγος, a word]. In biology, that kind of homological relation that exists between the successive segments, regions, or divisions of a part or organ, in that they radiate or spring from it.

**Actinomere** (*ak-tin'-o-mēr*) [*ἄκτις*, ray; *μερὸς*, a part]. In zoölogy, one of the radiating partitions characteristic of the *Actinosea*.

**Actinomeric** (*ak-tin-o-mer'-ik*) [*ἄκτις*, a ray; *μερὸς*, a part]. In biology, radiately divided.

**Actinomorphic** (*ak-tin-o-morf'-ik*) [*ἄκτις*, a ray; *μορφή*, form]. Same as *Actinomorphicous*.

**Actinomorphicous** (*ak-tin-o-morf'-us*) [*ἄκτις*, ray; *μορφή*, form]. Regularly radiated, as flowers divisible into similar portions in two or more vertical planes.

**Actinomyces** (*ak-tin-om'-is-es*) [*ἄκτις*, a ray; *μύκης*, mushroom]. A genus of parasitic fungoid organisms. One species, *A. bovis*, causes the disease actinomycosis. Called also the *Ray Fungus*.

**Actinomycoma** (*ak-tin-o-mi-ko'-mah*) [*ἄκτις*, a ray; *μύκης*, a fungus; *πλ.*, *Actinomycomata*]. A tumor such as is characteristic of actinomycosis.

**Actinomycosis** (*ak-tin-o-mi-co'-sis*) [*ἄκτις*, a ray; *μύκης*, a fungus]. A parasitical, infectious, inoculable disease first observed in cattle, and also occurring in man, and characterized by the manifestations of chronic inflammation, with or without suppuration, often resulting in the formation of granulation tumors. The disease is due to the presence of a characteristic micro-parasite, the *ray fungus*, *Actinomyces bovis*, which is composed of fine mycelial threads and club-shaped bodies. The most frequent and most curable form is when the abscesses form about the jaws and teeth. The best mode of staining the threads is by Gram's method. To stain the clubs as found in man is difficult; the best results have been obtained with orange rubin or eosin. The only treatment of the disease is removal of the infected tissue. When the parasite has found a nidus in the lungs or digestive tract, all treatment is so far useless. The disease is often called *lumpy-jaw* and *holdfast*.

**Actinomycotic** (*ak-tin-o-mi-ko'-ik*) [*ἄκτις*, ray; *μύκης*, fungus]. Pertaining to or affected with actinomycosis.

**Actinophore** (*ak-tin'-o-för*) [*ἄκτις*, a ray; *φέρειν*, to bear]. In biology, one of the peripheral elements affording support to the true fin rays in typical fishes and selachians.

**Actinophorous** (*ak-tin-off'-o-rus*) [*ἄκτις*, ray; *φέρειν*, to bear]. In biology, bearing ray-like spines.

**Actinosoma** (*ak-tin-o-so'-mah*) [*ἄκτις*, ray; *σῶμα*, body]. In biology, the entire body of a simple or composite actinozoan.

**Actinospora chartarum** (*ak-tin-o-spo'-rah char-ta'-rum*) [*ἄκτις*, ray; *σῶμα*, body; *charta*, paper]. A parasitic fungus developing on paper and books.

**Actinost** (*ak'-tin-ost*) [*ἄκτις*, ray; *ὀστέον*, a bone]. In ichthyology, one of the bones supporting the pectoral and ventral fins in true fishes.

**Actinostephyte** (*ak-tin-ost'-te-o-fit*) [*ἄκτις*, a ray; *οστεοφυτε*]. An osteophyte of radiated form.

**Actinostome** (*ak-tin'-o-stöm*) [*ἄκτις*, ray; *στόμα*, mouth]. In biology, the mouth of an actinozoan.

**Actinotrichium** (*ak-tin-o-trik'-e-um*) [*ἄκτις*, ray; *θρίχ*, a hair]. In biology, a fiber in the fin-fold of an embryo fish, the forerunner of the adult fin-ray.

**Actinotrocha** (*ak-tin-ol'-ro-kah*) [*ἄκτις*, ray; *τροχή*, ring]. The larva of certain geophycean worms, characterized by rings of cilia about the mouth and anus.

**Actinozoa** (*ak-tin-o-zo'-ah*) [*ἄκτις*, ray; *ζῶον*, an animal]. A division of celerentates including the seane-mones, coral-polyps, etc., having rayed tentacles about the mouth, and a digestive sac connected to the body wall by radial dissepiments called mesenteries.

**Actinula** (*ak-tin'-u-lah*) [dim. of *ἄκτις*, ray; *πλ.*, *Actinula*]. In biology, the oval generative zoöid of a gymnoblastic hydroid, developing without intermediate metamorphosis into a hydroid of the adult form.

**Action** (*ak'-shun*) [*agere*, to do, or perform]. In physiology, a term used to denote the function of an organ.

**A., Reflex**, an involuntary movement of an organ or part of the body resulting from an impression carried by a sensory or afferent nerve to a subordinate center, and then sent back by an efferent nerve to some point at or near the source of irritation.

**Active** (*ak'-tiv*) [*agere*, to do, or perform]. In medicine, a term applied to treatment the reverse of passive, that is, where the pathological conditions are acted upon directly rather than partly controlled. Also, in a growing condition; opposed to dormant.

**A. Insufficiency of Muscles**. See *Insufficiency*.

**A. Spots**, the cortical centers of the brain, especially those that control definite muscular movements.

**Activity** (*ak-tiv'-it-e*) [*agere*, to do or perform]. Capacity for acting; sensibility; vitality; potency; energy.

**Actual** (*ak'-chu-al*) [*agere*, to do]. Real, effective; not potential.

**A. Caution**. See *Caution*.

**Actuation** (*ak-chu'-al-shun*) [*agere*, to do, or perform]. That mental function that is exercised between the impulse of volition and its actualization or performance.

**Acuchi** (*ah-koo'-chē*). The resin or balsam obtained from *Icica heterophylla*, a tree of tropical America. It is almost identical with elemi. Unof.

**Acuflopressure** (*ak-u-fl'-lo-pres-ur*) [*acus*, needle; *filum*, a thread; *pressure*]. A combination of acupuncture and ligation.

**Acuity** (*ak-u'-it-e*) [*acuitas*; *acuer*, to sharpen]. Acuteness or clearness of visual power in the perception of small or distant objects.

**Aculeate** (*ak-u'-le-ät*) [*aculeus*, a sting, prickle]. In botany, armed with prickles, i.e., *acutit*; as the rose and briar. In biology, having a sting.

**Aculeiform** (*ak-u-le'-if-orm*) [*aculeus*, prickle; *forma*, shape]. Resembling a prickle.

**Aculeolate** (*ak-u-le'-o-lät*) [*aculeolus*, a little prickle]. In biology, beset with small prickles.

**Aculeus** (*ak-u'-le-us*) [dim. of *acus*, a needle; *πλ.*, *Aculei*]. In biology, a prickle or pointed excrescence of the bark, as in the rose or raspberry; the modified ovipositor or sting of a hymenopterous insect.

**Acumeter** (*ak-oo'-met-er*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. Instrument for testing hearing.

**Acuminate** (*ak-u'-min-ät*) [*acuminatus*, pointed, acute]. Taper-pointed or sharp-pointed.

**Acuminose, or Acuminous** (*ak-u'-min-ös, or -us*) [*acumen*, point]. In biology, same as *Acuminate*.

**Acuminulate** (*ak-u-min'-u-lät*) [dim. of *acumen*, a point]. Slightly taper-pointed.

**Acupression** (*ak-u-presh'-un*) [*acus*, a needle; *premere*, to press]. Acupressure.

**Acupressure** (*ak'-u-presh-är*) [*acus*, a needle; *premere*, to press]. An operation to stop hemorrhage or aneurysm by the compression of a needle inserted into the tissues upon either side, either above or below the vessel. There are a variety of methods of performing acupressure.

**Acupuncturation** (*ak-u-punk'-chu-ra'-shun*) [*acus*, a needle; *punctura*, a puncture]. Acupuncture.

**Acupuncturator** (*ak-u-punk'-chu-ra-tor*) [*acus*, a needle; *punctura*, a puncture]. An instrument used in performing acupuncture.

**Acupuncture** (*ak'-u-punk-chär*) [*acus*, a needle; *pungere*, to prick]. Puncture of the skin or tissue by one or more needles for the relief of pain, the exit of fluid, the coagulation of blood in an aneurysm, etc.

**Acus** (*ah'-kus*) [L.]. A needle. **A. Ad Cataractam**, a cataract needle. **A. Cannulata**, a trocar to be used with a cannula. **A. Electrica**, a needle for use with electricity. **A. Exploratoria**, an exploring needle. **A. Interpunctoria**, a needle for eye-operations. **A. In-vaginata**, a sheathed needle. **A. Sutoria**, a needle for stitching wounds.

**Acute** (*ah-üt*) [*acutus*, sharp]. Merely sharp-pointed or ending in a point less than a right angle. Sometimes used in the sense of forming a sharp angle. Used of disease having a rapid and severe onset, progress, and termination. When applied to pain, sound, vision, etc., means sharp, keen.

**Acutenaculum** (*ah-u-ten-ah'-u-lum*) [*acus*, a needle; *tenaculum*: pl., *Acutenacula*]. A needle-holder.

**Acuteness** (*ah-üt'-nes*) [*acutus*, sharp]. The quality of being acute, rapid, or sharp. Referring to vision, used as a synonym of keenness or acuity.

**Acutifoliate** (*ah-u-te-fo'-le-ät*) [*acutus*, sharp; *foliatus*, leaved]. In biology, bearing sharp-pointed leaves.

**Acutilobate** (*ah-u-te-lo'-bät*) [*acutus*, sharp; *lobatus*, lobate]. In biology, possessing acute lobes, as a leaf.

**Acutorsion** (*ah-u-tor'-shun*) [*acus*, a needle; *torsion*]. The twisting of an artery with a needle as a means of controlling hemorrhage.

**Acyanoblepsia** (*ah-si-an-o-blep'-se-ah*) [*ä* priv.; *κύανος*, blue; *βλεψία*, sight]. Same as *Acyanopsia*.

**Acyanopsia** (*ah-si-an-op'-se-ah*) [*ä* priv.; *κύανος*, blue; *ὄψις*, sight]. Inability to distinguish blue colors.

**Acyctic** (*ah-sik'-lik*) [*ä* priv.; *κυκλικός*, circular]. In botany, not whorled.

**Acyesis** (*ah-si-el'-sis*) [*ä* priv.; *κύσις*, pregnancy]. 1. Sterility of the female. 2. Non-pregnancy.

**Acyetic** (*ah-si-el'-ik*) [*ä* priv.; *κύσις*, pregnancy]. Relating to pregnancy.

**Acyprinoid** (*ah-sip'-rin-oid*) [*ä* priv.; *cyprinoid*]. In biology, a region in the fauna of which the *Cypri-nide* and *Labyrinthici* are wanting.

**Acystia** (*ah-sis'-te-ah*) [*ä* priv.; *κύστις*, bladder]. Absence of the bladder.

**Acystinervia** (*ah-sis-tin-er'-ve-ah*) [*ä* priv.; *κύστις*, bladder; *nervus*, a nerve]. Paralysis or lack of nerve stimulus in the bladder.

**Ad** [*ad*, to]. A Latin prefix of words and terms, signifying *to, toward, at, etc.* *Ad deliquium*, to fainting. *Ad libitum*, at pleasure, or according to discretion.

**Ad**, or **Add**. A contraction of *Addere*, or *Additur*, meaning, *add*, or *let there be added*; used in prescription writing.

**Adacrya** (*ah-dak'-re-ah*) [*ä* priv.; *δάκρνον*, tear]. Absence or deficiency of the secretion of tears.

**Adactyl** (*ah-dak'-til*) [*ä* priv.; *δάκτυλος*, digit]. 1. Without fingers or without toes. 2. A monstrosity that has an absence of digits.

**Adactylia** (*ah-dak-till'-e-ah*) [*ä* priv.; *δάκτυλος*, a finger]. Absence of the digits.

**Adactylism** (*ah-dak'-til-izm*) [*ä* priv.; *δάκτυλος*, a finger]. The absence of the digits.

**Adactylous** (*ah-dak'-til-us*) [*ä* priv.; *δάκτυλος*, a finger]. Without fingers or toes. In biology, without claws.

**Adæmonia** (*ad-e-mo'-ne-ah*). See *Ademonia*.

**Adamantin** (*ad-am-an'-tin*) [*ἀδάμας*, from *ä* priv.; *δαμάσσειν*, to overpower]. Pertaining to adamant. **A. Cement**, a substance used for filling teeth, consisting of finely powdered silice or pumice stone mixed with an amalgam of mercury and silver. See *Amalgam*.

**A. Substance**, the enamel of the teeth.

**Adambulacral** (*ad-am-bu-lä'-kral*) [*ad*, against; *ambulacrum*]. In biology, adjoining the ambulacra, as certain ossicles in echinoderms.

**Adamita** (*ad-am-i'-tah*) [L.]. A white vesical calculus.

**Adam's Apple** (*ad'-amz ap'-pl*). See *Pomum Adami*.

**A. Operation**. See *Operations*, Table of.

**Adansonia digitata** (*ad-an-so'-ne-ah dij-it-a'-tah*). The Baobab tree, a native of Africa. The bark is used in the form of an infusion,  $\frac{3}{4}$  to Oj, as a remedy for intermittent fever. Unof.

**Adansonin** (*ad-an'-so-nin*). A febrifugal alkaloid from the leaves and bark of *Adansonia Digitata*. Unof.

**Adaptation** (*ad-ap-tä'-shon*) [*adaptare*, to adjust]. In biology, favorable organic modifications suiting a plant or animal to its environment. **A. of the Retina**, the faculty possessed by the retina of accommodating the power of vision to a diminished amount of light, as in a darkened room.

**Adarce** (*ad-ar'-se*) [*ἀδάργη*, a salty efflorescence]. A salty alkaline concretion found in salt-marshes in Asia Minor. It is detergent and has been much used in leprosy and skin diseases. Unof.

**Articulation** (*ad-ar-tik-u-lä'-shun*) [*ad*, to; *articulatio*, a jointing]. See *Arthrodia*.

**Addephagia** (*ad-e-fä'-je-ah*) [L.]. See *Bulimia*.

**Adder's-tongue** (*ad-erz-tung*). The leaves of *Ophioglossum vulgatum*, a common perennial herb; mucilaginous, and used in the preparation of salves. Unof.

**A.-wort** (*ad-erz-wert*). See *Bistort*.

**Add'ison's Disease**. Melasma suprarenale, dermatomelasma-supra-renale, or cutis area ("bronzed skin"), a disease of the supra-renal capsules, first described by Dr. Addison, and characterized by tubercular infiltration of the capsules, discoloration of the skin, progressive anemia, and asthenia, ending in death from exhaustion. See *Diseases*, Table of. **A. Keloid**. See *Keloid* and *Morphea*.

**Additamentum** (*ad-it-am-en'-tum*) [L.]. Any appendix, as an epiphysis. **A. Coli**, the appendix vermiciformis.

**Adducens** (*ad-du'-senz*) [L.]. An adductor, a term applied to certain muscles. **A. Oculi**, the internal rectus muscle of the eye.

**Adducent** (*ad-du'-sent*) [*adducens*]. Performing adduction.

**Adduction** (*ad-duk'-shun*) [*adductio*; *adducere*, to bring toward]. Any movement whereby a part is brought toward another or toward the median line of the body. **A. of the Eyes**, the power of the internal recti measured by the maximum ability to preserve singleness of the image with prisms placed bases toward the temples. It varies from 30° to 50°. See also *Abduction*.

**Adductive** (*ad-duk'-tiv*) [*adducens*]. Same as *Adducent*.

**Adductor** (*ad-duk'-tor*) [*adducere*, to bring forward]. Any muscle effecting adduction.

**Adelarthrosomatous** (*ad-el-ar-thro-so'-mat-us*) [*ä* priv.; *ἄρθρος*, manifest; *ἄρθρον*, joint; *σῶμα*, body]. In biology, indistinctly segmented, or articulated.

**Adelaster** (*ad-el-as'-ter*) [*ἄδῆλος*, not manifest; *ἀστήρ*, star]. In biology, a cultivated plant that for the time being cannot be referred to its proper genus.

**Adelocodonic** (*ad'-el-o-ko-don'-ik*) [*ἄδῆλος*, not manifest; *κώδων*, a bell]. In biology, lacking a disc or umbrella; said of a gonophore.

**Adelomorphous** (*ad-el-o-mor'-fus*) [*ἄδῆλος*, not evident; *μορφή*, form]. Not delomorphous; not clearly defined; not having a determinate form (a term applied to certain cells in the gastric glands.)

**Adelopneumona** (*ad-el-op-nu'-mo-nah*) [*ἄδῆλος*, not manifest; *πνεῦμα*, lung]. In biology, the *Pulmonifera* among gasteropods, the pulmonary cavity being hidden by the mantle.

**Adelopod, Adelopode** (*ad-el'-lo-pod, -pod*) [*ἀδελός*, not manifest; *ποῖς*, foot]. In biology, an animal with concealed or inconspicuous feet.

**Adelphia** (*ad-el'-fe-ah*) [*ἀδελφός*, brotherhood]. In biology, a group of stamens united by their filaments.

**Adelphous** (*ad-el'-fu*) [*ἀδελφός*, brotherhood]. Having stamens with more or less coalescent filaments.

**Ademonia** (*ad-e-mo'-ne-ah*) [*ἀ priv.*; *δημῶνα*, trouble, distress]. Mental distress.

**Ademosyne** (*ad-e-mos'-yne*) [*ἀδυσσινῆ*, trouble, distress]. Depression of spirits; home-sickness.

**Aden** (*ad'-den*) [*ἄδην*, an acorn, a gland]. A gland; a bubo. **A. Fever.** See *Dengue*. **A. Ulcer.** See *Phagedena tropica*.

**Adenalgia** (*ad-i-en-al'-je-ah*) [*ἄδην*, gland; *ἄλγος*, pain]. Glandular pain.

**Adenectopia** (*ad-en-ek-to'-pe-ah*) [*ἄδην*, gland; *ἐκτοπος*, away from a place]. A condition in which the gland does not occupy its proper position.

**Adenemphraxis** (*ad-en-em-fraks'-is*) [*ἄδην*, gland; *ἐμπόρις*, a stoppage]. Glandular obstruction.

**Adenia** (*ad-e'-ne-ah*) [*ἄδην*, gland]. Enlargement of the glands; *Lymphadenoma*, *q. v.*

**Adenic** (*ad-en-ik*) [*ἄδην*, gland]. Relating to or of the nature of a gland.

**Adeniform** (*ad-en'-e-form*) [*ἄδην*, gland; *forma*, resemblance]. Of the shape of a gland; glandlike.

**Adenin** (*ad'-en-in*) [*ἄδην*, a gland—first discovered in pancreatic glands],  $C_5H_5N_5$ . A leucomaine discovered in 1885 by Kossel; the simplest member of the uric acid group of leucomaines. A relation exists between hydrocyanic acid and all the members of this group, and the base, adenin, seems to be formed by polymerization of hydrocyanic acid. It occurs, with other bases, as a decomposition product of nuclein, and may be obtained from all animal and vegetable tissues rich in nucleated cells. It crystallizes in leaflets with pearly luster. It exists largely in the liver and urine of leucocythemic patients, as a result of the breaking up of the nucleated white blood corpuscles. It appears to be necessary to the formation and building up of organic matter, playing an important part, together with guanine, in the physiological function of the cell nucleus. Nuclein, the parent of adenin and guanine, has been credited with a direct relation to the reproductive powers of the cell. Adenin is not poisonous. Its physiological action is not definitely known.

**Adenitis** (*ad-en-i'-tis*) [*ἄδην*, gland; *itis*, inflammation]. Inflammation of a gland. See *Bubo* and *Lymphadenitis*.

**Adenization** (*ad-en-i-za'-shun*) [*ἄδην*, a gland]. Adenoid degeneration.

**Adeno-** (*ad-e'-no*) [*ἄδην*, gland]. A prefix used to denote relation to glands.

**Adenoblast** (*ad'-en-o-blast*) [*ἄδην*, a gland; *βλαστέω*, a germ]. Any functionally active gland-cell; a cell that assists in the glandular action.

**Adeno-carcinoma** (*ad-en-o-kar-sin-o'-mah*) [*ἄδην*, gland; *καρκίνος*, a cancer]. Adenoma blended with carcinomatous elements.

**Adenocarcinomatous** (*ad-en-o-kar-sin-o'-mat-us*) [*ἄδην*; *καρκίνος*]. Of the nature of adeno-carcinoma.

**Adenocoele** (*ad'-en-o-sele*, or *ad-en-o-se'-le*) [*ἄδην*, gland; *κήλη*, a tumor]. See *Adenoma*.

**Adenochirapology** (*ad-en-o-ki-rap-sol'-o-je*) [*ἄδην*, gland; *χειρ*, hand; *ἅπτειν*, to touch; *λόγος*, treatise]. The obsolete doctrine of the healing of scrofula by the touch of a king's hand.

**Adeno-chondroma** (*ad-en-o-kon-dro'-mah*) [*ἄδην*, gland; *χόνδρος*, cartilage; *pl.*, *Adeno-chondromata*]. A tumor consisting of both glandular and cartilaginous tissue.

**Adeno-cystoma** (*ad-en-o-sis-to'-mah*) [*ἄδην*, gland; *κύστις*, bladder; *oma*, tumor]. A cystic adenoma.

**Adenodiastasis** (*ad-en-o-di-as'-tas-is*) [*ἄδην*, gland; *διαστασις*, separation]. 1. Displacement of a gland. 2. Abnormal separation of a gland into distinct parts.

**Adenodiastatic** (*ad-en-o-di-as-tat'-ik*) [*ἄδην*, gland; *διαστασις*, separation]. Relating to or marked by adenodiastasis.

**Adenodynia** (*ad-en-o-din'-e-ah*) [*ἄδην*, gland; *ὀδύνη*, pain]. See *Adenalgia*.

**Adeno-fibroma** (*ad-en-o-fi-bro'-mah*) [*ἄδην*, gland; *fibra*, a fiber]. A combination of adenoma and fibroma.

**Adenofibromatous** (*ad-en-o-fi-bro'-mat-us*) [*ἄδην*, gland; *fibra*, a fiber]. Of the nature of adeno-fibroma.

**Adenogenesis** (*ad-en-o-jeu'-es-is*) [*ἄδην*, a gland; *γένεσις*, a creation]. The development of a gland.

**Adenography** (*ad-en-og'-ra-fe*) [*ἄδην*, a gland; *γράφειν*, to write]. A treatise on the glandular system.

**Adenoid** (*ad'-en-oid*) [*ἄδην*, gland; *ειδος*, resemblance]. Resembling a gland. **A. Acne.** See *Lupus, Disseminated Follicular*. **A. Body**, the prostate gland. **A. Disease.** Synonym of *Hodgkins's Disease*. **A. Tissue.** See *Animal Tissue*. **A. Tumor.** See *Adenoma*. **A. Vegetations**, a term applied to a hypertrophy of the adenoid tissue that normally exists in the nasopharynx. This hypertrophy is associated with the following characteristic symptoms: Vacant expression of the child, open mouth, noisy breathing, more or less impairment of the hearing, a hacking cough, a peculiar muffling of the voice, and an enlargement of the tonsils. The vegetations exert an injurious influence on the physical development of the children so affected. The most important predisposing cause is youth; they are met with in all classes of life and in all climates. Treatment consists in the early and complete removal of the growths.

**Adenoidal** (*ad-en-oid'-al*) [*ἄδην*, a gland; *ειδος*, an appearance]. Somewhat resembling a gland.

**Adenologaditis** (*ad-en-o-log-ad-i'-tis*) [*ἄδην*, a gland; *λόγος*, whites of the eyes; *itis*, inflammation]. 1. Ophthalmia neonatorum. 2. Inflammation of the glands and conjunctiva of the eyes.

**Adenology** (*ad-en-ol'-o-je*) [*ἄδην*, gland; *λόγος*, a discourse]. The science of the glandular system.

**Adeno-lymphocoele** (*ad-en-o-lymf'-o-sele*) [*ἄδην*, gland; *lymph*, lymph; *κήλη*, tumor]. Dilatation of the lymph-vessels and enlargement of the lymphatic glands.

**Adenoma** (*ad-en-o'-mah*) [*ἄδην*, gland; *oma*, tumor; *pl.*, *Adenomata*]. A tumor that has sprung from a gland or is constructed after the type of a secreting gland. **A. destruens**, a destructive form of adenoma, involving the stomach walls. **A. sebaceum**, neoplastic papules on the face, of congenital origin but of later development. The disease occupies the position of acne rosacea, *i. e.*, the middle two-thirds. The lesions are roundish, convex papules, from a millet to a hempseed in size, of a bright crimson color, but may be quite colorless and slightly translucent. They do not pale on pressure. They are usually associated with intellectual inferiority, a large proportion of the patients being imbeciles or chronic epileptics.

**Adenomalacia** (*ad-en-o-mat-al'-she-ah*) [*ἄδην*, a gland; *μαλακία*, softening]. Abnormal softness of a gland.

**Adenomesenteritis** (*ad-en-o-mes-en-ter-i'-tis*) [*ἄδην*, a gland; *μέσος*, middle; *ἐντερον*, intestine; *itis*, inflammation]. Inflammation of the mesenteric glands.

**Adeno-myoma** (*ad-en-o-mi-o'-mah*) [*ἄδην*, a gland; *μῦς*, a muscle; *oma*, tumor; *pl.*, *Adeno-myomata*]. A tumor composed of glandular and muscular tissues.

**Adeno-myxoma** (*ad-en-o-miks-o'-mah*) [*ἀδὲν*, a gland; *μύξα*, mucous; *ομα*, tumor: *pl.*, *Adeno-myxomata*]. A growth having the characters of adenoma and myxoma.

**Adenocosis** (*ad-en-on-ko'-sis*) [*ἀδὲν*, a gland; *ὄγκωσις*, swelling]. The enlargement of a gland.

**Adenoncus** (*ad-en-on-ko'-kus*) [*ἀδὲν*, gland; *ὄγκος*, a mass]. A glandular tumor.

**Ad'eno-ner'vous Fe'ver**. Synonym of *Plague*.

**Adeno-neurotic** (*ad-en-o-nu-ro't-ik*) [*ἀδὲν*, a gland; *νεῦρον*, nerve]. Pertaining to the glands and nerves.

**A. Fever**, the plague.

**Adenopathy** (*ad-en-op'-a-the*) [*ἀδὲν*, gland; *πάθος*, disease]. Any disease of a gland or of the glands.

**Adenopharyngitis** (*ad-en-o-far-in-jit'-tis*) [*ἀδὲν*, a gland; *φάρυγξ*, the throat; *ιτις*, inflammation]. Inflammation of the tonsils and pharynx.

**Adenophlegmon** (*ad-en-o-fleg'-mon*) [*ἀδὲν*, a gland; *φλέγμα*, inflammation]. Suppurative inflammation of a lymphatic gland.

**Adenophore** (*ad-en'-o-for*) [*ἀδὲν*, a gland; *φέρειν*, to bear]. In biology, the pedicle or stalk supporting a nectar gland.

**Adenophorous** (*ad-en-off'-o-rus*) [*ἀδὲν*, a gland; *φέρειν*, to bear]. Glandular, or gland-bearing.

**Adenophthalmia** (*ad-en-off-thal'-me-ah*) [*ἀδὲν*, gland; *ὀφθαλμός*, the eye]. Inflammation of the Meibomian glands.

**Adenophthalmitis** (*ad-en-off-thal-mit'-tis*). Same as *Adenophthalmia*.

**Adenophyllous** (*ad-en-off'-il-us*) [*ἀδὲν*, a gland; *φύλλον*, a leaf]. In biology, with leaves which bear glands.

**Adenophyma** (*ad-en-o-fit'-mah*) [*ἀδὲν*, gland; *φύμα*, growth]. A swelling of a gland or ganglion; a bubo.

**Adenopodous** (*ad-en-op'-o-dus*) [*ἀδὲν*, gland; *πούς*, foot]. In biology, bearing glands on the footstalk or petiole.

**Adeno-sarcoma** (*ad-en-o-sar-ko'-mah*) [*ἀδὲν*, a gland; *σάρξ*, flesh; *ομα*, a tumor: *pl.*, *Adeno-sarcomata*]. A tumor with the characters of adenoma and sarcoma.

**Adeno-scirrhous** (*ad-en-o-skir'-us*) [*ἀδὲν*, gland; *σκίρρος*]. Adenoma with scirrhous or carcinomatous elements.

**Adenosclerosis** (*ad-en-o-skle-ro'-sis*) [*ἀδὲν*, a gland; *σκληρός*, hard]. A hardening of a gland, with or without swelling.

**Adenose** (*ad'-en-ōs*) [*ἀδὲν*, gland]. Glandular; abounding in glands; gland-like.

**Adenosis** (*ad-en-o'-sis*) [*ἀδὲν*, a gland]. 1. Any glandular disease. 2. Any chronic glandular disorder.

**Adenotomy** (*ad-en-ot'-o-mē*) [*ἀδὲν*, a gland; *τομή*, a cutting]. The anatomy of the glands; dissection or incision of a gland.

**Adenous** (*ad'-en-us*) [*ἀδὲν*, gland]. See *Adenose*.

**Adephagia** (*ad-e-fa'-je-ah*) [*ἀδεφαγία*, gluttonous]. A gluttonous appetite; bulimia.

**Adephagous** (*ad-e-f'-ag-us*) [*ἀδεφαγία*]. Gluttonous.

**Adeps** (*ad'-eps*) [*L., gen., Adipis*]. Lard. The fat obtained from the abdomen of the hog, *Sus Scrofa*. Composed of 38 per cent. stearin and margarin, and 62 per cent. olein. Forms 70 per cent. of ceratum and 80 of unguentum, *q. v.* **A. anserinus**, goose-grease. **A. benzoïnatus**, contains two per cent. of benzoïn. **A. lanæ hydrosus**, hydrous wool-fat, the purified fat of the wool of sheep. **A. ovillus**, mutton suet. **Adipis, Oleum**, a fixed oil expressed from lard. **A. præparatus** (B. P.), purified fat of the hog. **Ung. Simp.**, contains white wax, benzoated lard, and almond-oil. **A. suillus**, hogs' lard; adeps.

**Adepsin** (*ad-ept'-sin*) [*adeps*, lard]. A petrolatum much like vaselin.

**Adermia** (*ah-der'-me-ah*) [*ἀ* priv.; *δερμα*, skin]. Absence or defect of the skin.

**Adermonervia** (*ah-der-mo-ner'-ve-ah*) [*ἀ* priv.; *δέρμα*, skin; *nervus*, a nerve]. Loss or lack of nerve-stimulus in the skin.

**Adermotrophia** (*ah-der-mo-tro'-fe-ah*) [*ἀ* priv.; *δέρμα*, skin; *τροφή*, nutrition]. Atrophy of the skin.

**Adesmia** (*ah-des'-me-ah*). See *Adesmy*.

**Adesmosis** (*ah-des-mo'-sis*) [*ἀ* priv.; *δυσμός*, a band]. Atrophy of the cutaneous connective tissue.

**Adesmy** (*ah-des'-me*) [*ἀδυσμος*, unfettered]. In botany, the separation of parts normally entire or united.

**Adglutinate** (*ad-glu'-tin-at*). Same as *Agglutinate*.

**Adhatoda Vasica** (*ad-hat'-o-dah vas'-ik-ah*). Malabar nut; leaves of *A. justicia*, a tree of the order of Acanthaceæ, growing in India. Expectorant and anti-spasmodic. Dose of the fld. ext. ʒ ¼–j.

**Adherence** (*ad-he'-rens*) [*adherere*, to adhere]. See *Adhesion*.

**Adherent** (*ad-he'-rent*) [*adherere*, to adhere]. In botany, adnate; the union of unlike structures.

**Adhesion** (*ad-he'-zhun*) [*adherere*, to stick to]. Abnormal union of two surfaces as a result of abrasion, inflammation, etc. **A., Primary**, called also *Healing by First Intention* and by *Immediate Union*, a method of healing of wounds by the production of lymph, followed by the vascularization and cicatrization of the exudate. **A., Secondary**, or *Healing by Second Intention*, or by *Granulation*, is that mode of healing attended by the production of pus and the formation of granulations. **A. Plaster**. See *Emplastrum*.

**Adhesive** (*ad-he'-siv*) [*adherere*, to adhere]. Sticky, tenacious. **A. Inflammation**, inflammation accompanied by plastic exudation, and tending to the union of apposed surfaces. It may be reparative in its effect, as in wounds, or it may be injurious in its results, as in some cases of pleurisy. **A. Plaster**. See *Resin and Emplastrum*.

**Adiantum** (*ad-e-an'-tum*) [*ἀ* priv.; *διαντός*, wettable]. A genus of ferns; the maiden-hair. *A. capillus-veneris* and *A. pedatum*, of N. America, are serviceable in coughs. The demulcent and anti-hectic remedy, *capillaire*, is prepared from the former. Unof.

**Adiaphoresis** (*ah-di-af-o-re'-sis*) [*ἀ* priv.; *διαφορείειν*, to perspire]. Deficient sweat.

**Adiaphoretic** (*ah-di-af-o-ret'-ik*) [*ἀ* priv.; *διαφορείειν*, to perspire]. Reducing the sweat; anidrotic.

**Adiaphorous** (*ad-i-af'-or-us*) [*ἀδιάφορος*, indifferent]. Neutral; inert; doing neither harm nor good.

**Adiapneustia** (*ah-de-ap-nüs'-te-ah*) [*ἀ* priv.; *διαπνεύσκειν*, to perspire]. A stoppage of perspiration.

**Adiathesia** (*ah-di-ath-e'-se-ah*) [*ἀ* priv.; *διάθεσις*, condition]. A condition or particular disease that is not congenital.

**Adiathesic** (*ah-di-ath-e'-sik*) [*ἀ* priv.; *διάθεσις*, condition]. Not connected with any diathesis.

**Adiathetic** (*ah-di-ath-et'-ik*) [*ἀ* priv.; *διάθεσις*, condition]. Adiathesic.

**Adicity** (*ad-is'-it-e*). In chemistry, combining capacity, according as an element or a compound is a monad, dyad, etc. Same as *Valency*.

**Adinin** (*ad'-in-in*). See *Adenin*.

**Adipate** (*ad'-ip-at*) [*adeps*, fat]. Any salt of adipic acid.

**Adipic** (*ad-ip'-ik*) [*adeps*, lard]. Of or belonging to fat. **A. Acid**. See *Acid*.

**Adipoceration** (*ad-ip-os-er-a'-shun*) [*adeps*, fat; *cera*, wax]. The formation of adipocere.

**Adipocere** (*ad'-ip-o-sër*) [*adeps*, fat; *cera*, wax]. A wax-like substance formed by the exposure of fleshy tissue to moisture, with the exclusion of air, *i. e.*, in the

earth or under water. It consists of the fatty acids in combination with the alkaline earths and ammonium. Human bodies in moist burial places often undergo this change.

**Adipogenous** (*ad-ip-ŏj-en-us*) [*adeps*, fat; *gignere*, to produce]. Producing fat and adipose tissue.

**Adipoma** (*ad-ip-ŏ-mah*) [*adeps*, fat; *oma*, a tumor; *pl.*, *Adipomata*]. A fatty tumor; lipoma.

**Adipomatous** (*ad-ip-ŏ-mat-us*) [*adeps*, fat; *oma*, a tumor]. Of the nature of adipoma.

**Adipose** (*ad-ip-ŏs*) [*adeps*, fat]. Fatty. **A.** Fin, the fleshy, rayless, dorsal fin of some fishes. **A.** Tissue, fat cells united by connective tissue; distributed extensively through the body. It is composed of triolein, tripalmitin, and tristearin, and is liquid during life or at the temperature of the living body.

**Adiposis** (*ad-ip-ŏ-sis*) [*adeps*, fat; *osis*, state]. Corpulence; fatty degeneration; fatty infiltration. **A.** hepatica, fatty degeneration or infiltration of the liver.

**Adipositas** (*ad-ip-ŏ-sit-us*) [*l.*]. Fatness; corpulence.

**Adiposity** (*ad-ip-ŏ-sit-e*). Fatness; corpulence.

**Adipsia** (*ad-ip-ŏ-se-ah*) [*a* priv.; *δίψα*, thirst]. Absence of thirst.

**Adipsic** (*ad-ip-ŏ-sik*) [*a* priv.; *δίψα*, thirst]. Pertaining to adipsia; quenching thirst.

**Adipsous** (*ad-ip-ŏ-sus*) [*a* priv.; *δίψα*, thirst]. Quenching thirst.

**Aditus** (*ad-it-us*) [*ad*, to; *ire*, to go]. In anatomy, an entrance, as to any one of the radial canals of a sponge. **A.** laryngis, the entrance to the larynx.

**Adjective Coloring Mat'ter.** See *Pigments, Colors, and Dye-stuffs*.

**Adjuster** (*ad-jus'-ter*) [*Fr.*, *adjuster*, to adjust]. He who or that which adjusts. A device formerly used for the forcible reduction of dislocations.

**Adjusting Col'lar.** See *Collar*.

**Adjust'ment, Coarse.** Commonly, the rack and pinion for raising or lowering the tube of a microscope a considerable distance without lateral deviation. **A.**, Fine, the micrometer screw generally at the top of the column of a microscope for raising or lowering the tube slowly through a short distance.

**Adjuvant** (*aj'-ne-vant*) [*adjutare*, to assist]. A medicine that assists the action of another to which it is added.

**Admortal** (*ad-mor'-tal*) [*ad*, to; *mors*, *mortis*, death]. Moving from living muscular tissue toward that which is dead or dying, as electric currents.

**Adnascent** (*ad-nās'-ent*) [*ad*, to; *nasci*, to grow]. In biology, growing upon or attached to something.

**Adnata** (*ad-na'-tah*) [*ad*, to; *nasci*, to be born, to grow]. 1. The *tunica adnata*: the conjunctiva; more correctly, a tendinous expansion of the muscles of the eye; it lies between the sclerotic and the conjunctiva. 2. One of the coats of the testicle. In zoölogy, appendages of the skin, as scales, hair, feathers.

**Adnate** (*ad-nāt*) [*adnatus*, grown to]. In biology, congenitally attached or united.

**Adnation** (*ad-na'-shun*) [*adnatus*, grown to]. The state of being adnate.

**Adnerval** (*ad-ner'-val*) [*ad*, to; *nervus*, a nerve]. Moving toward a nerve; said of electric currents in muscular fiber.

**Adneural** (*ad-nu'-ral*) [*ad*, to; *νεῦρον*, a nerve]. A term used to describe a nervous affection in which the disease is at the very point of the symptoms exclusively, as in the form of an adventitious deposit.

**Adnexa** (*ad-neks'-ah*) [*ad*, to; *nectere*, to joint; *pl.*]. Adjunct parts, as the adnexa of the uterus. **A.** bulbi, the appendages of the bulb of the eye.

**Adolescence** (*ad-ŏ-les'-en-ē*) [*adolescere*, to grow]. Youth, or the period between puberty and maturity,

usually reckoned as extending in males from about 14 to 25 years, and in females from 12 to 21 years.

**Adonidin** (*ad-on'-id-in*) [*Adonis*]. A glucosid derived from *Adonis vernalis*, a plant indigenous in Europe and Asia. Recommended in cardiac dropsy. Dose gr. 18-14. Unof.

**Adonis æstivalis** (*ad-ŏ-nis es-tiv-ŏ-lis*). A plant much used in Italy as a cardiac tonic. Similar properties possessed by *A. vernalis*. Dose of fld. ext. m-j. **A.** Tinctura, dose m-xxx.

**Adoral** (*ad-ŏ-ral*) [*ad*, near to; *os*, the mouth]. Situated near the mouth.

**Adosculation** (*ad-ŏs-ku-lat'-shun*) [*ad*, to; *osculari*, to kiss]. Impregnation by external contact without intromission.

**Adressed, or Appressed** (*ad-presd' or ap-resd'*) [*adpressus*]. Brought into contact with but not united.

**Adradial** (*ad-ra'-de-al*) [*ad*, near to; *radius*, a ray]. Near a ray, as the third series of tentacles in certain hydrozoöns. Cf. *Interradial*, *Perradial*.

**Adradii** (*ad-ra'-de-i*) [*ad*, near to; *radius*, a ray]. Special organs lying between the perradii and interradii of medusæ.

**Adrectal** (*ad-rek'-tal*) [*ad*, near by; *rectus*, straight]. In biology, near the rectum, as certain glands.

**Adrenal** (*ad-re'-nal*) [*ad*, near to; *ren*, the kidney]. In biology, adjacent to the kidney.

**Adrenals** (*ad-re'-nalz*) [*ad*, near to; *ren*, the kidney]. The supra-renal capsules.

**Adrian's Mix'ture.** A hemostatic mixture containing chloride of iron 25 parts, chloride of sodium 15 parts, and water 60 parts.

**Astrostral** (*ad-ro'-stral*) [*ad*, to, at; *rostrum*, beak]. In biology, belonging to or placed near the beak or snout.

**Adrue** (*ad-ru'-e*). Anti-emetic root. The root of *Cyperus articulatus*. Strongly recommended to check black vomit of yellow fever; antelmintic, aromatic, stomachic. Dose of the fld. ext. gtt. xx-xxx. Unof.

**Adscendent** (*ad-sen'-dent*). See *Ascending*.

**Adstriction** (*ad-strik'-shun*) [*adstrictus*, a binding]. Ligation; astringing action; constipation.

**Adsurgent, or Assurgent** (*ad-ser'-jent, as-ser'-jent*) [*ad*, to; *urgere*, to rise]. Same as *Ascending*.

**Adterminal** (*ad-ter'-min-al*) [*ad*, near to; *terminus*, the end]. Moving toward the insertion of a muscle; said of electric currents in muscular fiber.

**Adul Oil.** An oil used in India for treating rheumatism.

**Adult** (*ad-ult'*) [*adolescere*, *adultus*, to grow]. Mature; of full legal age. One of mature age. **A.** Sporadic Cretinism. See *Myxedema*.

**Adulteration** (*ad-ul-ter-a'-shun*) [*adulterare*, to corrupt]. The admixture of inferior, impure, inert, or less valuable ingredients to an article for gain, deception, or concealment. Medicines, wines, foods, etc., are largely adulterated.

**Adumbrella** (*ad-um-brell'-ah*). In biology, the upper surface of the velum in the medusæ, the opposite of exumbrella or *Abumbrella*.

**Adumbrellar** (*ad-um-brell'-ar*). In biology, pertaining to the upper or outer surface of the velum in the medusæ; opposed to *abumbrellar*.

**Aduncous** (*ad-ung'-kus*) [*ad*, to; *uncus*, a hook, barb]. In biology, hooked, as the bill of a parrot or hawk.

**Adust** (*ad-us'*) [*adustus*, burned up]. Hot and dry; parched.

**Adustion** (*ad-us'-chun*) [*adustus*, burned up]. 1. The quality of being adust. 2. Cauterization.

**Advancement** (*ad-vans'-ment*) [*M. E.*, *avancement*]. An operation to remedy strabismus, generally in conjunction with tenotomy, whereby the opposite tendon from the over-acting one, having been cut, is brought

forward, so that, growing fast in a more advanced position, it shall have more power to act upon the globe of the eye. **A.**, **Capsular**, an operation similar to that on the tendon upon Tenon's cap-sule. It must be distinguished from advancement by the fact that the tendon itself is not divided.

**Adventitia** (*ad-ven-tish'-e-ah*) [*adventitius*, foreign]. The external covering or coat of the blood-vessels.

**Adventitious** (*ad-ven-tish'-us*) [*adventitius*, foreign]. Accidental, foreign, acquired, as opposed to natural or hereditary; occurring out of the ordinary or normal place or abode.

**Adventive** (*ad-ven-tiv'-it-er*). In biology, an incompletely naturalized exotic.

**Adverse** (*ad'-vers*) [*adversus*, opposite]. In biology, turned or directed toward the axis.

**Adversifoliate** (*ad-ver-se-fol'-le-āt*) [*adversus*, opposite; *folium*, leaf]. See *Adversifolious*.

**Adversifolious** (*ad-ver-se-fol'-le-us*) [*adversus*, opposite; *folium*, leaf]. In biology, having opposite leaves.

**Adynamia** (*ah-din-a'-me-ah*) [*ā* priv.; *δύναμις*, power]. Deficiency or loss of vital or muscular power.

**Adynamic** (*ah-din-am'-ik*) [*ā* priv.; *δύναμις*, power]. Pertaining to or characterized by adynamia. **A.** **Fever**. Synonym for *Typhus Fever*, *q. v.*

**Æ-**. See *E-*.

**Æcidioform** (*e-sid'-e-o-form*) [*aikia*, a wheal; *forma*, form]. See *Æcidiostage*.

**Æcidiomycetes** (*e-sid-e-o-mi-se'-tēz*) [*aikia*, a wheal; *μύκης*, a fungus]. Æcidium fungi, including many of the rusts, blights, and mildews.

**Æcidiospore** (*e-sid'-e-o-spor*) [*aikia*, a wheal; *σπορά*, seed, spore]. In biology, a fungal spore developed by abstriction in a member of the genus *Æcidium*.

**Æcidiostage** (*e-sid'-e-o-staj*) [*aikia*, a wheal; *M. E.*, stage]. The first stage in the reproduction of uredine fungi. Same as *Æcidioform*.

**Æcidium** (*e-sid'-e-un*) [*aikia*, a wheal; *dim.*, *ιδίον*]. The cup-shaped organ producing the æcidiospores in the uredine fungi.

**Ædeægra** (*e-de-a'-grah*). See *Edeagra*.

**Ædeatrophia** (*e-de-at-ro'-fe-ah*). See *Edeatrophia*.

**Ædeæuxe** (*e-de-aux'-e*). See *Edeæuxe*.

**Ædeœitis** (*e-de-i'-tis*). See *Edeitis*.

**Ædeodynia** (*e-de-o-din'-e-ah*). See *Edeodynia*.

**Ædeogargalismus** (*e-de-o-gar-gal-iz'-mus*). See *Edeogargalismus*.

**Ædeography** (*e-de-og'-ra-fe*). See *Edeography*.

**Ædeology** (*e-de-ol'-o-je*). See *Edeology*.

**Ædeœomania** (*e-de-o-ma'-ne-ah*). See *Edeœomania*.

**Ædeomycodermatitis** (*e-de-o-mi-ko-der-mi'-tis*). See *Edeomycodermatitis*.

**Ædeopsy** (*e-de'-op-se*). See *Edeopsy*.

**Ædeoptosis** (*e-de-op-to'-sis*). See *Edeoptosis*.

**Ædeoscopy** (*e-de-os'-ko-pe*). See *Edeoscopy*.

**Ædeotomy** (*e-de-ot'-o-me*). See *Edeotomy*.

**Ægagropila** (*e-gag-ro'-pil-ah*). Plural of *Ægagropilus*.

**Ægagropilus** (*e-gag-ro'-pil-us*) [*αἰγάρος*, a wild goat; *πίλος*, felt]. An intestinal concretion formed of hair, found in animals and occasionally in man. A bezoar.

**Ægilops** (*e'-jit-ops*). See *Egilops*.

**Ægithognathus** (*e-jith-og'-na-thus*) [*αἰγίθος*, the hedge-sparrow; *γνάθος*, jaw]. Characterized by having an anteriorly truncated vomer in union with the alinatal wall and turbinals, as in passerine birds.

**Ægobronchophony** (*e-go-brong-koff'-o-ne*). See *Egobronchophony*.

**Ægonia** (*e-go'-ne-ah*) [*L.*]. A minor or slight egophony.

**Ægophony** (*e-goff'-o-ne*). See *Egophony*.

**Ægyptia ulcera** (*e-jip'-she-ah ul'-ser-ah*) [*L.*]. Egyptian ulcers; a form of ulceration of the tonsils and fauces.

**Æipathia** (*ah-ip-ath'-e-ah*) [*αἰπάθεια*, from *αἰ*, always; *πάθος*, a suffering]. Constant and incurable suffering.

**Æluropodous** (*e-lu-ro'-p'-o-dus*) [*αἰλουρός*, cat; *πούς*, foot]. Cat-footed.

**Æluropsis** (*el-u-ro'-p'-sis*) [*αἰλῖρος*, cat; *ὄψις*, appearance]. Obliquity of the eye or of the palpebral fissure.

**Æquabiliter justo major**, or **minor Pelvis** (*e-kwa-bil'-it-er*). See *Pelvis*.

**Æquator Oculi** (*e-kwa'-tor ok'-u-li*). See *Equator*.

**Æquilibrium** (*e-kwil-ib'-re-un*). See *Equilibrium*.

**Aer** (*a'-er*). See *Air*.

**Ærated** (*a'-er-a-ted*) [*ἀήρ*, the atmosphere]. Impregnated or charged with carbon dioxide or air.

**Aeration** (*a-er-a'-shun*) [*ἀήρ*, air]. The process of supplying or charging with air or with some gas, such as carbon dioxide; the state of being supplied with air or gas.

**Ærenchyma** (*a-er-en'-kim-ah*) [*ἀήρ*, air; *ἐγχύειν*, to pour]. In biology, cork-like plant tissue.

**Ærendocardia** (*a-er-en-do-kar'-de-ah*) [*ἀήρ*, air; *ἐνδόν*, within; *καρδία*, heart]. The existence of air within the heart.

**Ærenterectasia** (*a-er-en-ter-ek-ta'-se-ah*) [*ἀήρ*, air; *ἐντέρον*, intestine; *ἐκτασις*, distention]. Flatulence; distention of the abdomen by gas within the intestines.

**Ærhemoctonia** (*a-er-hem-ok-to'-ne-ah*) [*ἀήρ*, air; *αἷμα*, blood; *κτόνω*, killing]. Death by the entrance of air into the veins.

**Ærhemotoxia** (*a-er-hem-o-toks'-e-ah*) [*ἀήρ*, air; *αἷμα*, blood; *τοξικόν*, poison]. See *Ærhemoctonia*.

**Ærial** (*a'-er-al*). Pertaining to the air. **A.** **Fistula**. See *Fistula*.

**Æriferous** (*a-er-if'-er-us*) [*ἀήρ*, air; *ferre*, to bear]. Conveying air, as the trachea and its branches.

**Ærification** (*a-er-if-ik-a'-shun*) [*ἀήρ*, air; *facere*, to make]. 1. The process of charging with air; the state of being charged with air. 2. Emphysema.

**Ærifixus** (*a-er-if-huks'-us*) [*ἀήρ*, air; *fluxus*, flow]. Any abnormal escape of air, as by belching, flatulence, etc.

**Æriperitonía** (*a-er-ip-er-it-o-ne'-ah*) [*ἀήρ*, air; *περί*, around; *τείνειν*, to stretch]. Peritoneal tympanites.

**Ærobe** (*a'-er-ob*) [*ἀήρ*, air; *βίος*, life]. One of the ærobia. See *Ærobic*.

**Ærobia** (*a-er-o'-be-ah*) [*ἀήρ*, air; *βίος*, life]. Plural of *Ærobe*. Organisms that require air or free oxygen for the maintenance of life. **A.**, **Facultative**, organisms normally or usually anaerobic, but under certain circumstances acquiring aerobic power.

**Ærobic** (*a-er-ob'-ik*) [*ἀήρ*, air; *βίος*, life]. Requiring oxygen (air) in order to live. A term applied to those bacteria requiring free oxygen. Those that do not grow in its presence are called **anaerobic**. Between these extremes there are forms that are able to grow without oxygen under favorable conditions, though they make use of it when present; others that may grow in its presence, though flourishing best in its absence; these are called respectively **facultative aerobes** or **facultative anaerobes**, in distinction from those first mentioned, which are called **obligatory aerobes** or **anaerobes**.

**Ærobiosis** (*a-er-o-bi-o'-sis*) [*ἀήρ*, air; *βίος*, life]. Life that requires the presence of air, or free oxygen.

**Ærobiotic** (*a-er-o-bi-ot'-ik*) [*ἀήρ*, air; *βιωτικός*, pertaining to life]. Thriving only in the presence of free oxygen.

**Ærocomia sclerocarpa** (*e-ro-ko'-me-ah skle-ro-kar'-pah*). A South American plant, very popular as a remedy in leucorrhea, diarrhea, and albuminuria. It is astringent. *Unof.*

**Æroconiscope** (*a-er-o-kon'-is-kop*) [ἀήρ, air; κόνις, dust; σκοπεῖν, to inspect]. A device for collecting dust from the air for microscopical observation.

**Ærocyst** (*a'-er-o-sist*) [ἀήρ, air; κύστις, bladder]. In biology, the air-bladder of sea-weeds.

**Ærodermectasia** (*a-er-o-der-mek-ta'-se-ah*) [ἀήρ, air; δέρμα, skin; ἐκτασις, distention]. Surgical emphysema; distention of the subcutaneous connective tissue by air.

**Æroenterectasia** (*a-er-o-en-ter-ek-ta'-se-ah*) [ἀήρ, air; ἔντερον, intestine; ἐκτασις, dilatation]. Distention of the bowels with gas.

**Ærognosy** (*a-er-og'-no-se*) [ἀήρ, air; γνῶσις, knowledge]. See *Ærology*.

**Ærography** (*a-er-og'-ra-fe*) [ἀήρ, air; γράφω, a writing]. The description of the air and its qualities.

**Ærohydropathy** (*a-er-o-hi-drop'-a-the*) [ἀήρ, air; ἵδωρ, water; παθος, disease]. Pneumatic treatment of disease, combined with hydropathy.

**Ærohydrous** (*a-er-o-hi'-drus*) [ἀήρ, air; ἵδωρ, water]. Containing air and water, as certain minerals.

**Ærology** (*a-er-ol'-o-je*) [ἀήρ, air; λόγος, treatise]. The science of the air and its qualities.

**Ærometer** (*a-er-om'-et-er*) [ἀήρ, air; μέτρον, a measure]. An instrument for ascertaining the density of gases.

**Ærometry** (*a-er-om'-et-re*) [ἀήρ, air; μέτρον, a measure]. The science of measuring the density of gases.

**Ærophobia** (*a-er-o-fo'-be-ah*) [ἀήρ, air; φόβος, fear]. Dread of a current of air; a symptom of hydrophobia and hysteria.

**Ærophoby** (*a-er-o-fo-be*) [ἀήρ, air; φόβος, fear]. See *Ærophobia*.

**Ærophone** (*a'-er-o-fou*) [ἀήρ, air; φωνή, sound]. An instrument for increasing the amplitude of sound-waves.

**Ærophore** (*a'-er-o-för*) [ἀήρ, air; φέρειν, to carry]. 1. A device for the inflation of the lungs of a still-born child with air. 2. A breathing apparatus to be used by firemen and others, to prevent the inhalation of noxious gases.

**Ærophyte** (*a-er-o-fit*) [ἀήρ, air; φῖτον, plant]. An air-plant.

**Æropinic** (*a-er-o-pin'-ik*) [ἀήρ, air; πίνειν, to drink]. Affected with the habit of wind-sucking. Applied to a horse that habitually bites his crib or manger and swallows air.

**Æroplethysmograph** (*a-er-o-pleth-iz'-mo-graf*) [ἀήρ, air; πλήθος, fulness; γράφω, to write]. An apparatus for registering graphically the expired air; the latter raises a very light and carefully equipoised box placed over water, and this moves a writing-style.

**Æropneumonectasia** (*a-er-op-nu-mo-nek-ta'-se-ah*) [ἀήρ, air; πνεύμων, the lung; ἐκτασις, distention]. Emphysema of the lungs.

**Ærorrhachia** (*a-er-o-ra'-ke-ah*) [ἀήρ, air; ῥάχις, the spine]. An accumulation of air or gas in the spinal canal.

**Æroscopsy** (*a-er-o-skep'-se*) [ἀήρ, air; σκέψις, a viewing]. In zoölogy, the power of perceiving atmospheric changes.

**Æroscope** (*a'-er-o-sköp*) [ἀήρ, air; σκοπεῖν, to observe]. An instrument for the examination of air-dust. Also, an instrument for estimating the purity of the air.

**Æroscopy** (*a-er-as'-ko-pe*) [ἀήρ, air; σκοπεῖν, to observe]. The investigation of atmospheric conditions.

**Ærosis** (*a-er-o'-sis*) [ἀεραῖσθαι, to become air]. Gas formation within the body.

**Ærotherapeutics** (*a-er-o-ther-a-pu'-tik*) [ἀήρ, air; θεραπεῖν, to serve]. Pneumatotherapeutics; a mode of treating disease by varying the pressure or the composition of the air breathed.

**Ærotherapy** (*a-er-o-ther'-a-pe*) [ἀήρ, air; θεραπεῖν, to serve]. See *Ærotherapeutics*.

**Ærothorax** (*a-er-o-tho'-raks*) [ἀήρ, air; θώραξ, the chest]. See *Pneumothorax*.

**Ærotonometer** (*a-er-o-to-nom'-et-er*) [ἀήρ, air; τόνος, tension; μέτρον, measure]. An instrument for estimating the tension of gases in the blood.

**Ærotropism** (*a-er-ol'-ro-pizm*) [ἀήρ, air; τρέπειν, to turn]. In biology, the deflection of roots from the normal direction of growth by the action of gases.

**Ærourethroscopy** (*a-er-o-u-rèth'-ro-sko-pe*) [ἀήρ, air; οὐρήθρα, urethra; σκοπεῖν, to examine]. Urethroscopy conjoined with inflation of the urethra with air.

**Ærozoa** (*a-er-o-zo'-ah*) [ἀήρ, air; ζῷον, animal]. Same as *Ærobia*.

**Ærteriversion** (*a-er-ter-iv-er'-shun*) [ἀήρ, air; τρέπειν, to hold; vertere, to turn]. A method of arresting hemorrhage by everting the cut end of an artery, invaginating the vessel in itself and fixing the parts by a needle.

**Ærterivertter** (*a-er-ter-iv-er'-ter*) [ἀήρ, air; τρέπειν, to hold; vertere, to turn]. An instrument used in perforating ærteriversion.

**Æruginous** (*e-ru'-jin-us*). See *Eruginous*.

**Ærugo** (*e-ru'-go*) [L., gen. *Eruginis*]. 1. Rust of a metal. 2. Subcarbonate of copper. **Æ. Ferri**, the subcarbonate of iron. **Æ. Plumbi**, lead carbonate, or subcarbonate.

**Ærumna** (*e-rum'-nah*) [L.]. Mental distress, or mental and physical distress combined.

**Æs** (*ez*) [L.]. Copper or brass. See *Copper*.

**Æschrolalia** (*es-kro-la'-le-ah*). See *Eschrolalia*.

**Æschromythesis** (*es-kro-mi-the'-sis*). See *Eschromythesis*.

**Æsculin** (*es'-ku-lin*). See *Esculin*.

**Æsculus hippocastanum** (*es'-ku-lus hip-o-kas'-tanum*) [L.]. Horse-chestnut. The fruit of the common "buckeye," or horse-chestnut. Recommended in hemorrhoids. Dose gr. iij. Unof.

**Æstates** (*es-ta'-tèz*) [L., *pl.*]. Freckles, or sunburn. See *Ephelis* and *Leitigo*.

**Æsthacyte** (*es'-tha-sit*) [αἰσθησις, feeling; κύτος, a cell]. In biology, one of the sense-cells of sponges, discovered by Stewart.

**Æsthematology** (*es-the-mat-ol'-o-je*). See *Esthematology*.

**Æsthesia** (*es-the'-ze-ah*). See *Esthesia*.

**Æsthesin** (*es'-the-sin*). See *Esthesin*.

**Æsthesiogen** (*es-the'-se-o-jen*). See *Esthesiogen*.

**Æsthesiography** (*es-the-se-og'-ra-fe*). See *Esthesiography*.

**Æsthesiology** (*es-the-se-ol'-o-je*). See *Esthesiology*.

**Æsthesiomania** (*es-the-se-o-ma'-ne-ah*). See *Esthesiomania*.

**Æsthesiometer** (*es-the-se-om'-et-er*). See *Esthesiometer*.

**Æsthesiometry** (*es-the-se-om'-et-re*). See *Esthesiometry*.

**Æsthesioneurosis** (*es-the-se-o-nu-ro'-sis*). See *Esthesioneurosis*.

**Æsthesis** (*es-the'-sis*). See *Esthesis*.

**Æsthesodic** (*es-the-sod'-ik*). See *Esthesodic*.

**Æstheti** (*es'-thèt*) [αἰσθητός, perceived by the senses]. In biology, one of the sense-organs of the *Chitonida* described by Moseley.

**Æsthetica** (*es-the'-ik-ah*) [αἰσθησις, perception by the senses]. Diseases characterized by impairment or abolition of any of the senses.

**Æsthophysiology** (*es-tho-fiz-e-ol'-o-je*). See *Esthophysiology*.

**Æstival** (*es'-tiv-al*). See *Festival*.

**Æstivation** (*es-tiv'-a'-shun*). See *Estivation*.

**Æstuarium** (*es-tu-a'-re-um*). See *Estuarium*.  
**Æstuation** (*es-tu-a'-shun*). See *Estuation*.  
**Æstus** (*es'-tus*) [*L.*]. Heat; especially a flushing, or sudden glow of heat. **Æ. volaticus**, wildfire rash; strophulus.  
**Ætas** (*e'-tas*) [*L.*]. Age; a period of life. See *Age*.  
**Æthalam** (*e-tha'-le-um*) [*αἰθῶλος*, smoke, soot (referring to the spores)]. In biology, a placentoid compound plasmodium formed by certain mycetozoa, *e. g.*, the flowers of tan.  
**Æther** (*e'-ther*). See *Ether*.  
**Ætherism** (*e'-ther-izm*). See *Etherism*.  
**Æthiopification** (*e-the-op-if-ik-a'-shun*). See *Ethiopification*.  
**Æthiopiosis** (*e-the-op-e-o'-sis*). See *Ethiopification*.  
**Æthiops** (*e'-the-ops*) [*αἰθίοψ*, an Ethiopian]. An old term for any black mineral powder used in medicine.  
**Æ. antimonialis**, a black triturate of mercury, antimony, and sulphur, made after several distinct formulæ. **Æ. martialis**, black iron deutoxid. **Æ. mineralis**, black amorphous triturate of mercury with sulphur, in various proportions.  
**Æthusa** (*e-thu'-sah*). See *Ethusa*.  
**Æthusin** (*e-thu'-sin*). See *Ethusin*.  
**Ætiology** (*e-te-ol'-o-je*). See *Etiology*.  
**Afebrile** (*ah-fe'-bril*) [*à priv.*; *febrilis*, feverish]. Without fever.  
**Afetal** (*ah-fe'-tal*) [*à priv.*; *fetus*, an offspring]. Without a fetus.  
**Affection** (*af-ek'-shun*) [*afficere*, to affect]. A synonym of disease.  
**Affective** (*af-ek'-tiv*) [*afficere*, to affect]. Exciting emotion. **A. Faculties**, the emotions and propensities—especially those peculiar to man. **A. Insanity**, emotional or impulsive insanity.  
**Affectus** (*af-ek'-tus*) [*L.*]. A disordered condition.  
**A. animi**, an affection of the mind; mental disorder.  
**A. suffocatorius**. Synonym of *Diphtheria*.  
**Afferent** (*af'-er-ent*) [*afferens*, carrying to]. Carrying toward the center. **Of nerves**: conveying impulses toward the central nervous system; sensory, centripetal. **Of blood-vessels**: those, as arteries, conveying blood to the tissue, sometimes also to the gills. **Of lymphatics**: those conveying lymph to a lymphatic gland. Compare *Efferent*.  
**Afferentia, or Vasa afferentia** (*va'-sah af-er-ent'-she-ah*) [*L.*]. 1. The lymphatic vessels. 2. Any vessels carrying blood or lymph to an organ.  
**Affiliation** (*af-il-e-a'-shun*) [*ad. to*; *filius*, son]. In medical jurisprudence, the act of imputing or affixing the paternity of a child in order to provide for its maintenance.  
**Affinity** (*af-in'-it-e*) [*affinis*, akin to]. Relationship. A synonym of *Attraction*. **A., Chemical**, the force exerted at inappreciable distances, and between definite and invariable weights of two or more combining substances, whereby bodies of dissimilar nature unite to form new compounds. Contradistinguished from *cohesion*, which is an attraction between molecules. **A., Elective**, the preference of one substance for another rather than for a third or fourth. Affinity is spoken of as *compound, developed, disposing, divellent, intermediate, quiescent, reciprocal, or synthetic*, according to the part it plays, or is conceived to play, in any chemical process.  
**Affium** (*af'-e-um*) [*Arab.*, *Afiûn*]. The Asiatic name for opium.  
**Afflate** (*af-lā'*) [*afflatus*, blown upon]. Sudden in its attack; overwhelming.  
**Afflatus** (*af-lā'-tus*) [*L.*, “a blowing upon”]. 1. A draft or blast of air. 2. A sudden attack. 3. A supposed inspiration or divine influence.

**Affluence** (*af'-lu-ens*) [*affluentia*, from *affluere*, to flow to]. A determination or influx, as of blood to a part.  
**Affluent** (*af'-lu-ent*) [*affluens*, flowing to]. Producing a congestion; determinant; flowing in or upon.  
**Afflux** (*af'-lux*) [*affluere*, *affluxus*, to flow toward]. The flow of the blood or other liquid to a particular part.  
**Affluxion** (*af-luk'-shun*) [*affluere*, *affluxus*, to flow toward]. See *Afflux*.  
**Affusion** (*af-u'-shun*) [*affusio*, *affundere*, to pour upon]. Pouring water upon a substance to cleanse it, or upon the body in fevers to reduce temperature and calm nervous symptoms.  
**A-form Chronoscope**. See *Chronoscope*.  
**African** (*af'-rik-an*) [*Africa*, Latin name of the country]. Pertaining to Africa. **A. Arrow-poison**. See *Sirophanthus*. **A. Date-mark**. See *Furunculus orientalis*. **A. Fever**. Synonym of *Dengue*. **A. Gum**, gum arabic. See *Acacia*. **A. Lethargy**, or *Nelâvan*, a “sleeping sickness” affecting negroes of the West African coast. Increasing somnolence is the characteristic symptom. It is very fatal. Death after emaciation follows in from three to six months. Post-mortem examination has revealed hyperemia of the arachnoid, and it is asserted that this “sleeping sickness” is only one of the symptoms of *Filariasis*, *q. v.* No treatment avails. **A. Pepper**, *Chillies*: the intensely biting fruit of *Capsicum fastigiatum*. See *Capsicum*.  
**After** (*af'-ter*) [*A. S.*, *after*, back]. 1. The anus. The buttocks. 2. Next in succession. **A. Action**, the negative variation in an electrical current continuing for a short time in a tetanized muscle. **A. Birth**, the popular designation of the placenta, cord, and membranes, sometimes called the *secundines*. **A. Brain**. See *Hindbrain* and *Metencephalon*. **A. Care**, the care or nursing of convalescents; specifically, the treatment of patients discharged as cured from lunatic asylums.  
**A. Cataract**, *Cataracta Secundaria*; an opacity of the media of the eye after operation for cataract due to opacification of the capsule or to non-absorption of the remains of the lens-substance. **A. Damp**, a poisonous mixture of gases, such as carbon monoxid and carbon dioxid, found in coal mines after an explosion of inflammable gases. **A. Hearing**, a neurotic condition in which sounds are heard after the wave-motion that produces them has ceased. **A. Images**, continued retinal impressions after the stimulus of the light or image has ceased to act. A *positive after-image* is a simple prolongation of the sensation; a *negative after-image* is the appearance of the image in complementary colors. After-sensations may be also experienced with other senses. **A. Milk**, the *stripplings*: the last milk taken from the teat at any one milking. It is peculiarly rich in butter, as compared with the fore-milk. **A. Pains**. See *Pains*. **A. Perception**, the perception of a sensation after the stimulus has passed away. **A. Sensation**, a sensation lasting longer than the stimulus producing it. **A. Taste**, a gustatory sensation produced some time after the stimulus has been removed. **A. Treatment**. See *A. Care*.  
**Afterings** (*af'-ter-ingz*) [*A. S.*, *after*, after]. See *After-milk*.  
**Agacement des Dents** [*Fr.*]. The unpleasant sensation of teeth “set on edge” from contact of acids.  
**Agalactia** (*ah-gal-ak'-te-ah*) [*à priv.*; *γάλα*, milk]. Failure or insufficiency of the mother's milk after childbirth.  
**Agalactous** (*ah-gal-ak'-tus*) [*à priv.*; *γάλα*, milk]. 1. Without milk. 2. Not suckled; not nourished with milk.  
**Agalaxy** (*ah-gal'-ak-se*). See *Agalactia*.

**Agallocha** (ag-al'kah) [αγάλλω, the lignum aloes]. The milky juice of *Elaeagnus agallochum*, a small tree of India. The juice is very acrid, and when brought in contact with the skin blisters it. Used locally for the cure of leprosy. Unof.

**Agallochum** (ag-al'-o-kum) [αγάλλω, the lignum aloes]. Same as *Agallocha*, or the wood of the tree that produces it; eagle-wood, or aloes-wood.

**Agalorrhea, or Agalorrhœa** (ah-gal-o-re'-ah) [ἀ priv.; ῥαῖα, milk; ῥεῖν, to flow]. A cessation of the flow of milk.

**Agamic** (ah-gam'-ik) [ἀ priv.; γάμος, marriage]. 1. In biology, not sexual; not pertaining to the sexual relation; asexual reproduction; parthenogenesis.

**Agamogenesis** (ah-gam-o-jen'-es-is) [ἀ priv.; γάμος, marriage; γενεα, generation]. Reproduction without fecundation, as, e. g., by gemmation. See *Parthenogenesis*.

**Agamogenetic** (ah-gam-o-jen-et'-ik) [ἀ priv.; γάμος, marriage; γενεα, generation]. Pertaining to *Agamogenesis*.

**Agamospore** (ah-gam'-o-spor) [ἀ priv.; γάμος, marriage; σπορον, offspring]. In biology, an asexually produced spore.

**Aganactesis** (ag-an-ak-te'-sis) [ἀγανάκτησις, physical pain]. Irritation; physical pain or uneasy sensation.

**Aganoblepharon** (ag-an-o-blef'-ar-on) [ἀγανόβλεφαρος, mild-eyed]. Adhesion of the eyelids to each other.

**Agar-agar** (a'-gar-a'-gar) [t'eylon]. A kind of glue made from certain sea-weeds, such as *Gracilaria tikvahiae* and *Gelidium speciosum*, used in medicine to make suppositories, and in bacteriological studies to make a solution in which microorganisms are bred or kept. See *Gelose*.

**Agaric** (ag-ar'-ik) [ἀγαρικός, a fungus employed as tinder by the *Agari* of Sarmatia]. A fungus of the genus *Agaricus*, e. g., the mushroom and toadstool. See *Agaricus*.

**Agaric Acid** (ag-ar-is'-ik as'-id). See *Acid, Agaricic*.

**Agaricin** (ag-ar'-is-in) [see *Agaric*],  $C_{16}H_{30}O_5 + H_2O$ . A white crystalline substance, the active principle of *Agaricus albus*. It has proved useful in the night sweats of phthisis where atropia has failed. Dose gr.  $\frac{1}{15}$  -  $\frac{1}{5}$ . Unof.

**Agaricus** (ag-ar'-ik-us) [see *Agaric*]. A genus of the family of Agaricini or Mushrooms. *A. albus*, Purging Agaric, unof., a fungus parasite upon the European Larch; it contains an alkaloid, *agaricin*, and *agaric acid*. It is used as a drastic purgative, and is valuable in night sweats. Dose gr. xxx- $\frac{1}{2}$  as a purgative; gr. xv in night sweats. **A., Ext., Alcohol.** Dose gr. iij-vj. **A., Ext., Liq.** Dose miiij-xx. **A., Tinct.** Dose mxx- $\frac{1}{2}$ . The edible species, *A. campestris*, is characterized by a brownish color, that does not change when cut, and an agreeable taste. *A. chrysogonium*, Surgeon's Agaric, a parasitic fungus formerly used for *Moxa*, q. v. Soaked in solution of potassium nitrate it forms *spunk*. *A. muscarius*, Fly Agaric, a poisonous mushroom, containing an alkaloid, *Muscarin*, q. v., a powerful cardiac depressant. Dose of the alkaloid gr.  $\frac{1}{8}$ -ij. *Muscarin Nitrate*, used hypodermatically. Dose gr.  $\frac{1}{4}$ - $\frac{3}{4}$ .

**Agaster** (ah-ga'-ter) [ἀ priv.; γαστήρ, the stomach]. An animal without a stomach.

**Agastric** (ah-gast'-trik) [ἀ priv.; γαστήρ, the stomach]. Having no intestinal canal, as the tape-worms.

**Agastronervia** (ah-gas-tro-nerv'-e-ah) [ἀ priv.; γαστήρ, the stomach; nervus, a nerve or sinew]. See *Agastronervia*.

**Agastroneuria** (ah-ga-tro-nul'-e-ah) [ἀ priv.; γαστήρ, the stomach; νεύρον, a nerve]. Deficiency in the nerve-stimulus sent to the stomach.

**Agathin** (ag'-ath-in) [ἀγαθος, good],  $C_6H_5(OH).CH.N.N(CH_3).C_6H_5$ . Salicyl- $\alpha$ -methyl-phenyl-hydrazine, obtained by the interaction of salicylic aldehyde, and  $\alpha$ -methyl-phenyl-hydrazine. It is a greenish-white, crystalline substance, without odor or taste, insoluble in water, soluble in alcohol and ether, and melts at  $74^\circ C$ . Used as an anti-neuralgic in doses of eight grains, two or three times daily. Its action is cumulative. Unof.

**Agave** (a-ga'-ve) [ἀγανή, noble]. A large genus of amaryllidaceous plants, natives of North America. *A. americana*, American Aloe, the leaves of a plant growing in North America. It is diuretic and antisyphilitic. Dose of the fld. ext.  $\frac{1}{2}$  ss j. The fresh juice is also similarly employed. The fermented juice, called *pulque*, is a moderately stimulant drink, very popular in Mexico. Unof.

**Age** (āj) [M. E., *age*]. The length of time a being has existed; also, a certain stage in life. The period of life is divided into a succession of ages, as follows: 1. *Infancy*, from birth to the appearance of the temporary teeth. 2. *Childhood*, from the cutting of the first permanent teeth to puberty. 3. *Youth*, from puberty to the attainment of the full stature, that is, 18 or 19 for girls, 21 to 22 for boys. 4. *Maturity*, covers the interval from youth to the climacteric. 5. *Old-age*, or period of decline. Other divisions may be made, as, e. g., those of embryonic life, of immaturity, of maturity, of sterility, etc.

**Agenesia** (ah-jen'-e-se-ah) [ἀ priv.; γενεα, generation]. A term somewhat loosely used to designate abnormal or imperfect development. Also impotence and sterility. In botany, the asexual development of the flower.

**Agensis** (ah-jen'-es-is) [ἀ priv.; γενεα, generation]. 1. Impotence; barrenness. 2. Incomplete and defective development.

**Agenosomus** (ah-jen-o-so'-mus) [ἀ priv.; γεννῶν, to beget; σῶμα, body]. A variety of single autostic monsters, of the species *Celosoma* in which there is a lateral or median evagination occupying principally the lower portion of the abdomen, while the genital and urinary organs are either absent or very rudimentary.

**Agens** (a'-jenz) [L.]. An agent. **A. Morbi**. See *Morbi*.

**Agent** (a'-jent) [agere, to act, to do]. A substance or force that by its action effects changes in the human body.

**Agenus** (aj'-en-us) [ἀ priv.; γενος, offspring]. Cellular plants.

**Agenya** (ah-jen'-e-ah) [ἀ priv.; γενος, chin]. Congenital absence of the chin.

**Agerasia** (aj'-er-a'-se-ah) [ἀγήροσια, eternal youth]. Vigorous old age; age without its wonted feebleness and decay.

**Ageusia** (ah-gu'-se-ah or ah-ju'-se-ah) [ἀ priv.; γεῦσις, taste]. Abolition of the sense of taste.

**Ageusia** (ah-gu'-te-ah) [ἀ priv.; γεῦσις, taste]. Same as *Ageusia*.

**Agger** (aj'-er) [L.]. In anatomy, a pile or mound. **A. nasi**, an anterior prolongation and elevation of the mucous membrane covering the middle turbinate bone; its direction is almost parallel with the dorsal ridge of the nose, running forward and downward till it reaches very nearly to the anterior aperture of the nostril. **A. valvulae venae** [pl., *Aggeres valvulae-ron veno-rum*], the eminence of a venous valve; a projection within the lumen of a vein at the junction of a valve.

**Agglomerate** (ag-lom'-er-at) [agglomerare, to wind into a ball]. Grouped or clustered; massed. Crowded into a dense cluster. **A. Glands**. See *Gland*.

**Agglutinant** (*ag-iu'-tin-ant*) [*agglutinare*, to paste to]. Promotive of repair by adhesion; favorable to agglutination.

**Agglutinate** (*ag-lu'-tin-at*) [*agglutinare*, to paste to]. In biology, to glue together; to unite by adhesion.

**Agglutination** (*ag-lu'-tin-a'-shun*) [*agglutinare*, to glue upon or to]. A joining together; applied to the healing of wounds; it is called *immediate*, if by the first intention; *mediate*, if through the intermediation of some natural plastic material.

**Agglutinative** (*ag-lu'-tin-a-tiv*) [*agglutinare*, to glue upon or to]. 1. Favoring agglutination; adhesive. 2. Any substance with adhesive properties, fitted to retain the edges of wounds in apposition. Such are caoutchouc, collodion, etc.

**Aggravation** (*ag-ra'-va'-shun*) [*aggravare*, to make worse]. Increase in severity, as of a disease, symptom, or pain.

**Aggregate** (*ag'-re-gat*) [*ad*, to; *gregare*, to collect into a flock]. Grouped into a mass. **A. Glands.** See *Gland*.

**Aggregation** (*ag-re-ga'-shun*) [*ad*, to; *gregare*, to collect into a flock]. 1. The massing of materials together. 2. A congeries or collection of bodies, mostly of such as are similar to each other.

**Agitation** (*aj-it-a'-shun*) [*agitare*, to excite, arouse]. 1. Fatiguing restlessness with violent motion; mental disturbance. 2. A stirring or shaking, as in pharmacy.

**Aglet, Aiglet** (*ag'-let*, *äg'-let*) [M. E.]. In biology, a drooping anther or catkin.

**Aglia** (*ag'-le-ah*) [L.]. A speck or spot upon the cornea or on the white of the eye.

**Aglobulia** (*ah-glo-bu'-le-ah*) [*ä* priv.; *globulus*, a globe]. A decrease in the quantity of red blood corpuscles, with corresponding increase of serum.

**Aglobulism** (*ah-glob'-u-lizm*) [*ä* priv.; *globulus*, a globe]. Aglobulia; oligocythemia.

**Aglobulous** (*ah-glob'-u-lus*) [*ä* priv.; *globulus*, a globe]. Characterized by aglobulia.

**Aglossia** (*ah-glos'-e-ah*) [*ä* priv.; *γλῶσσα*, the tongue]. Congenital absence of the tongue.

**Aglossostoma** (*ah-glos-os'-to-mah*) [*ä* priv.; *γλῶσσα*, the tongue; *στόμα*, the mouth]. A fetal monster in which there is a mouth without a tongue.

**Aglossus** (*ah-glos'-us*) [*ä* priv.; *γλῶσσος*, without a tongue]. A person without a tongue.

**Agglutition** (*ah-glu-tish'-un*) [*ä* priv.; *glutire*, to swallow]. Difficulty in swallowing; inability to swallow.

**Agmatology** (*ag-mat-ol'-o-je*) [*αγματός*, a fracture; *λόγος*, discourse]. The science or study of fractures.

**Agmen** (*ag'-men*) [*agmen*, a multitude]. In biology, a taxonomic group between a class and an order.

**Agminate** (*ag'-min-at*) [*agmen*, a multitude]. Aggregated, clustered. **A. Glands.** See *Gland*, *Peyer's*.

**Ag nail** (*ag'-näl*) [A. S., *angnæg*]. 1. Hangnail. 2. A whitlow. 3. A corn on the toe or foot.

**Agnathia** (*ag-na'-the-ah*) [*ä* priv.; *γνάθος*, a jaw]. Absence or defective development of the jaws.

**Agnathus** (*ag'-na-thus*) [*ä* priv.; *γνάθος*, a jaw]. A monster with no lower jaw.

**Agnea**, or **Agnœa** (*ag-ne'-ah*) [*ἀγνοια*, want of perception]. A condition in which the patient does not recognize things or persons.

**Agnew's Operations.** See *Operations*, *Table of*.

**Agnew's Rectal Chemise.** An appliance for controlling hemorrhage from the rectum. It consists of a gum catheter to the end of which are attached three square pieces of mosquito-netting. These are moistened with a solution of the persulphate of iron, and the whole introduced into the rectum, where it acts as a plug.

**Agnin** (*ag'-nin*) [*agnus*, a lamb]. A fatty substance derivable from sheep's wool, unmixed with water; it is harder, darker, and less agreeable in color and odor than lanolin. See *Lanolin* and *Suint*.

**Agnina Membrana** (*ag-ni'-nah mem-bra'-nah*) [L.]. "The lamb-like, or woolly, membrane,"—the amnion.

**Agnus castus** (*ag'-nus kas'-tus*) [L.]. The chaste tree, *Vitex agnus castus*; its leaves and seeds were formerly used as a preservative of chastity, and its homeopathic preparations are still exhibited as anaphrodisiacs.

**-ago'ga, -agogue** [*ἀγωγός*, one who leads]. A suffix, denoting agents that drive out other substances, as emmenagogues, lithagogues, etc.

**Agomphiasis** (*ah-gom-fi'-as-is*) [*ä* priv.; *γομφίος*, a tooth]. Same as *Agomphosis*.

**Agomphious** (*ah-gom'-fe-us*) [*ἀγομφίος*, toothless]. Without teeth.

**Agomphosis** (*ah-gom-fi'-sis*) [*ä* priv.; *γομφίος*, a tooth]. 1. Absence of the teeth. 2. A loosening or looseness of the teeth.

**Agonia** (*ag'-o'-ne-ah*) [*ἀγωνία*, a contest or struggle]. 1. Distress of mind; extreme anguish. 2. The death struggle. [*ἀγνος*, barren]. Barrenness; sterility; impotence. **A. Bark.** See *Agoriada*.

**Agoniadin** (*ag-on-i'-ad-in*) [*ἀγνος*, barren],  $C_{10}H_{14}O_6$ . A glucosid found in Agonia bark, and used as an antiperiodic.

**Agonous** (*ag'-o-nus*) [*ἀγνος*, unfruitful]. Barren; impotent.

**Agony** (*ag'-o-ne*) [*ἀγωνία*, a contest or struggle]. Violent pain; extreme anguish; the death-struggle.

**Agoraphobia** (*ag-o-ra-fo'-be-ah*) [*ἀγορά*, a market-place, assembly; *φόβος*, fear]. 1. A morbid fear of open places or spaces; kenophobia. 2. Dread of assemblies; morbid dislike of crowds or of associating with others.

**Agoriada** (*ag-o-re-ah'-dah*) [Sp.]. The Brazilian tree, *Plumieria lancifolia*, and its febrifuge bark.

**Agoriadin** (*ag-o-ri'-ad-in*) [Sp.],  $C_{10}H_{14}O_6$ . A glucosid, probably the active principle of *Agoriada*.

**-agra** (*ἀγρα*, a seizure). A Greek word added as a suffix to various roots to denote *seizure*, *severe pain*; as podagra, etc.

**Aggrammatism** (*ah-gram'-at-izm*) [*ä* priv.; *γράμμα*, a word]. A phenomenon of aphasia, consisting in the inability to form words grammatically, or the suppression of certain words of a phrase. See *Aphasia*.

**Agraphia** (*ah-graf'-e-ah*) [*ä* priv.; *γράφειν*, to write]. Inability to express ideas by writing. In some cases not a single letter can be formed; in others, words, and a number of words, without meaning, can be written. See *Aphasia*. **A., Musical**, pathological loss of the ability to write musical notes.

**Agraphy** (*ag'-ra-je*) [*ä* priv.; *γράφειν*, to write]. Same as *Agraphia*.

**Agrestial** (*ag-rest'-te-al*) [*agrestis*, rural]. In biology, growing wild in the fields.

**Agria** (*ag'-re-ah*) [*ἀγριος*, wild]. A pustular eruption; malignant pustule; herpes.

**Agriecosis** (*ag-re-et-ko'-sis*) [*ἀγριος*, wild; *ἔλκος*, ulceration]. A malignant or uncontrollable ulceration.

**Agrimony** (*ag'-rim-o-ne*) [*ἀγρός*, a field; *μόνος*, alone]. The root of *Agrimonia eupatoria*. A mild astringent. Dose of fld. ext. ʒss-ij. Unof.

**Agriopsoria** (*ag-re-op-so'-re-ah*) [*ἀγριος*, wild; *ψώρα*, itch]. An incurable or severe attack, or variety, of itch.

**Agrioriganum** (*ag-re-o-rig'-an-un*) [*ἀγριος*, wild; *origanon*, origanum]. Wild Marjoram, *Origanum vulgare*.

**Agriothymia** (*ag-ro-thim'-e-ah*) [*ἄγριος*, wild; *θυμός*, mind, will]. Maniacal fury; it is variously divided or classed as ambitious, hydrophobic, religious, etc.

**Agrippa** (*ah-grip'-a*) [L.]. A person born with the feet foremost.

**Agromania** (*ag-ro-ma'-ne-ah*) [*ἄγρος*, a field; *μανία*, madness]. A mania for living in the country.

**Agrostography** (*ag-ro-sog'-ra-fe*) [*ἄγροστις*, conch-grass; *γραφειν*, to write]. See *Agrostology*.

**Agrostology** (*ag-ro-sel'-o-je*) [*ἄγροστις*, conch-grass; *λογία*, to speak of]. The botany of grasses.

**Agrypnetic** (*ah-grip-net'-ik*) [*ἄπρις*, sleep]. 1. Sleepless; wakeful. 2. Preventing sleep; agrypnotic.

**Agrypnia** (*ah-grip'-ne-ah*) [*ἄπρις*, restless; *ἕπνοος*, sleep]. Loss of sleep, sleeplessness, *Insomnia*, *q. v.*

**Agrypnocoma** (*ah-grip-no-ko'-mah*) [*ἄπρις*, sleepless; *κόμα*, coma]. Coma vigil; wakeful lethargy, with low-muttering delirium.

**Agrypnotic** (*ah-grip-not'-ik*) [*ἄπρις*, sleep]. 1. Preventing sleep; causing wakefulness. 2. A medicine that prevents sleep.

**Aguardiente** (*ah-guar-de-en'-tā*) [Sp.]. Ardent spirits; brandy or rum.

**Ague** (*ā'-gu*) [*acutus*, sharp, acute; Fr., *aigu*]. Malarial or intermittent fever, characterized by paroxysms, or stages, of chill, fever, and sweating at regularly recurring times, and followed by an interval or intermission whose length determines the epithets, quotidian, tertian, etc. In some cases there is a double paroxysm, and hence called double quotidian, double tertian, etc. The duration of each paroxysm varies from two to twelve hours. The most frequent and important complication of intermittent fever is pneumonia, the consolidation occurring very suddenly. In the blood of many malarial patients a minute hematozoan, the *hematomonas malarie*, has been found. They are seen in the red corpuscles, are hyaline, and include pigment granules. They gradually increase in size, fill the cell, a process of segmentation occurs, the cell wall breaks down, and the segments, each containing a pigment granule, are set free. These are oval and possess one to three flagella. These bodies disappear under the use of quinin. **A. Aden.** See *Dengue*. **A., Brass-founders'**, a disease common among brass-founders, characterized by symptoms somewhat resembling an imperfect attack of intermittent fever, the recurrence of the paroxysms, however, being irregular. The direct cause is generally thought to be the inhalation of the fumes of delagrating zinc or "spelter." **A., Brow**, intermittent neuralgia of the brow. **A. Cake**, chronic enlargement of the spleen in diseases of malarial origin. **A., Catenating**, ague associated with other diseases. **A. Drop.** See *Fowler's Solution*. **A., Dumb**, latent ague; masked ague; ague with no well marked chill, and with at most only partial or slight periodicity. **A., Latent**, see *A., Dumb*. **A., Leaping**, a term for the dancing mania. **A., Masked.** See *A. Dumb*. **A. Tree**, common Sassafras. **A. Weed.** 1. See *Grindelia*. 2. The *Eupatorium perfoliatum*, or thorough-wort.

**Agynary** (*aj'-in-a-re*) [*ἄπρις*, female]. In biology, having no pistil, as a double flower.

**Agynous** (*aj'-in-us*) [*ἄπρις*, female]. In biology, destitute of female reproductive organs.

**Ahypnia** (*ah-hip'-ne-ah*) [*ἄπρις*, sleep]. Sleeplessness.

**Ahypnosis** (*ah-hip-no'-sis*) [*ἄπρις*, sleeplessness]. Entire absence of the capacity to sleep, most marked in insanity.

**Aichmophobia** (*ah-mo-fo'-be-ah*) [*αἰχμή*, a spear point; *φοβία*, to fear]. An extravagant dread of sharp or pointed instruments.

**Aid-Forceps** (*ad'-for-seps*) [Fr., *aide*; *forceps*]. A device for making safe and effective traction upon the obstetrical forceps by means of a fillet or tape and a dynamometer.

**Aidoio-** (*a-doi'-o*). See *Edeco-*.

**Aidoiomania** (*a-doi-o-ma'-ne-ah*). See *Edeomania*.

**Aiglet** (*ag'-let*). See *Aglet*.

**Aigret, Aigrette** (*ag'-gret, a-gret'*). In biology, same as *Égret*.

**Ailanthus** (*a-lan'-thus*) [Malacca, *Ailanto*, "tree of heaven"]. The bark of *A. glandulosa*, commonly known as Tree of Heaven. Properties due to an oleoresin and a volatile oil. A nauseant and drastic purgative, constituting an excellent anthelmintic against tape-worm. **A., Ext. Fld.** Dose  $\text{m}\chi\text{-}\bar{5}$ . **A., Tinct.** Dose  $\text{m}\chi\text{-}\bar{3}$  ij.

**Ailing** (*al'-ing*) [M. E., *cyle*]. Indisposed; out of health; not well.

**Ailment** (*al'-ment*) [M. E., *cyle*]. A disease; sickness; complaint; usually used in reference to chronic disorders.

**Aimorrhea** (*am-or-e'-ah*) [*αἷμα*, blood; *ρῖα*, a flowing]. A bleeding, or hemorrhage.

**Ainhum** (*m-yoon'*) [negro word, meaning *to save*]. A disease in Guinea and Hindostan, peculiar to negroes, in which the little toes are slowly and spontaneously amputated at about the digito-plantar fold. The process is very slow, does not affect other toes or parts, is unaccompanied by any constitutional symptoms, and its cause is unknown. It sometimes attacks the great toe. Called also *Dactylolysis spontanea*.

**Air** [*ἄπρις* from *δεν*, to blow, or breathe]. The chief part of the atmosphere. *Atmospheric air* consists of a mixture of 77 parts by weight, or 79.19 by volume, of nitrogen, and 23 parts by weight, or 20.81 by volume, of oxygen, with 3.7 to 6.2 parts by volume of  $\text{CO}_2$  in 10,000 parts. 100 cubic inches weigh 30.935 grains. The pressure of the air at sea-level is about 14.7 pounds upon the square inch. **A., Alkaline**, free or volatile ammonia. **A., Azotic**, nitrogen. **A. Bag.** See *A. Cushion*. **A. Bath**, therapeutic exposure to air that may be heated, condensed, or variously medicated. See *Bath*. **A.-bed**, an air-tight, rubber, inflated mattress employed in conditions requiring long confinement to bed. **A.-bladder.** See *A.-vesicle*. **A. Bubbles**, in microscopy, are prepared by heating a drop of thin mucilage. They are useful as a test for central light. In oblique light the bright spot will appear on the side away from the mirror. **A.-cell**, an air-sac; an air-vesicle of the pneumonic tissue. **A., Complemental**, is that that can still be inhaled after an ordinary inspiration. **A. Conduction**, a method of testing the hearing-power by means of a watch held at varying distances from the ear, or by the employment of a number of tuning forks of varying pitch. See *Bone Conduction*. **A.-cure**, the therapeutic employment of air. **A.-cushion.** A cushion filled with air; usually made of soft india-rubber. **A., Dephlogisticated**, an old name for Oxygen. **A.-douche.** The inflation of the middle ear with air. **A.-duct.** See *Duct*. **A.-embolism**, free air in the blood-vessels during life, or the obstruction due to it. **A., Expired**, that driven from the lungs in expiration. **A., Factitious**, carbon dioxid. **A., Fixed**, an old name for carbon dioxid (carbonic acid). **A. Hunger.** See *Diabetes mellitus*. **A., Inspired**, that taken into the lungs on inspiration. **A., Mephitic**, carbon dioxid. **A.-meter.** See *Anemometer*. **A. Passages**, the nares, mouth, larynx, trachea, and bronchial tubes. **A., Phlogisticated**, nitrogen. **A.-pump**, an apparatus for exhausting or compressing air. **A., Reserve**

or **Supplemental**, that that can still be exhaled after an ordinary expiration. **A.**, **Residual**, that remaining in the lungs after the most complete expiration possible. **A.-sac**. See *Air-vesicle*. **A.-space**, a space in tissue filled with air or other gases arising from the separation, rupture, or absorption of cells. **A.**, **Stationary**, that remaining in the lungs during normal respiration. **A.**, **Supplemental**. See *A.*, *Reserve*. **A.-tester**, an instrument for testing the impurity of the air. **A.**, **Tidal**, that taken in and given out at each respiration. **A.-vesicle**, any small air-space, especially the expanded terminal portion of a minute or ultimate bronchial vessel. **A.**, **Vital**, an old name for Oxygen. See *Atmosphere*.

**Ajowan** (*aj'-oo-on*) [E. Ind.]. Bishop's Weed. The fruit of *Ammi copticum*. Carminative and antiseptic. It has been recommended in colic, diarrhea, etc. Dose of the fld. ext.  $\text{m}\times\text{xxx}$ .

**Akamathesia, Akamathesis**. See *Akatamathesia*.

**Akanthesthesia** (*a-kan-thes-the'-ze-ah*) [*ἀκανθα*, a thorn; *αἴσθησις*, sensation]. A form of paresthesia or perverted sensation in which there is a feeling as of a sharp point.

**Akanthion** (*a-kun'-the-on*). See *Acanthion*.

**Akatamathesia** (*ah-kat-am-ath-e'-ze-ah*) [*ἀ priv.*; *καταμύθησις*, understanding]. Inability to understand.

**Akataphasia** (*a-kat-af-a'-se-ah*). See *Acataphasia*.

**Akazga** (*a-kaz'-gah*) [African]. A poisonous plant of West Africa, probably a *Strychnos*. Also its bark, and an amorphous extractive derived from it. It is one of the African ordeal poisons and contains *akazgin*.

**Akazgin** (*a-kaz'-gin*) [African]. An alkaloid from *akazga*; its effects are much like those of strychnia.

**Akene** (*ak'-ēn*). See *Achenium*.

**Akido-galvano-cautery** (*ak-id-o-gal-van-o-kaw'-te-re*) [*ἄκίς*, needle; *Γαλβάνι*; *καυτήριον*, a branding-iron]. Galvanic cauterization by the needle electrode.

**Akidopeirastic** (*ak-id-o-pi-ras'-tik*) [*ἄκῆ*, *ἄκίς*, needle; *πειραστικός*, proving]. Relating to the exploratory puncture of a diseased area by means of a stout needle.

**Akinesia** (*ah-kin-e'-se-ah*). See *Acinesia*.

**Akinesis** (*ah-kin-e'-sis*) [*ἀ priv.*; *κίνησις*, quiescence]. Absence or imperfection of movement. Applied to the heart's diastole and to immotility of the iris; also to any lack of motility, especially when due to some central or cerebral cause. **A.** **Algera**, an affection manifested by voluntary abstinence from movement on account of the pain of movement, without any apparent cause of pain.

**Aknemia** (*ak-ne'-me-ah*). See *Anemia*.

**Akology** (*ak-ol'-o-jē*). See *Aecology*.

**Akral** (*ak'-ral*) [*ἄκρος*, extreme]. See *Cephalic*.

**Akrokinesis** (*ak-ro-kin-e'-sis*). See *Acrocinesis*.

**Akromegaly** (*ak-ro-meg'-a-le*). See *Acromegalia*.

**Akromikria** (*ak-ro-mik'-re-ah*). See *Acromicria*.

**Akroposthitis** (*ak-ro-pos-thi'-tis*). See *Acroposthitis*.

**Akyanopsia** (*ah-ki-an-op'-se-ah*). See *Acyanopsia*.

**Al**. The Arabic definite article, *the*, prefixed to many words to designate preëminence, etc., as alkali, alcohol. In chemical nomenclature it is used as a suffix to denote similarity to or derivation from an aldehyd, as chloral, butyral, etc.

**Ala** (*a'-lah*) [L., a wing: *pl.*, *Alæ*]. A name of various wing-shaped parts or appendages. In biology, the side petal of a papilionaceous corolla. **A.** **Auris**, the pinna of the ear. **A.** **Cinera**, a triangular space of gray matter in the fourth ventricle of the brain, probably giving origin to the pneumogastric nerves. **A.** **Majores**, 1. The greater wings of the sphenoid. See *Alisphenoid*. 2. The external labia pudendi. **A.** **Minores**, 1. The lesser wings of the sphenoid. 2.

The labia minora pudendi. **A.** **Nasi**, the lateral cartilage of the nose. **A.** **Pontis**. See *Ponticulus*. **A.** **Pulmonum**, the lobes of the lung. **A.** **of Sacrum**, the flat triangular surface of bone extending outward from the base of the sacrum, supporting the *psoas magnus* muscle. **A.** **Vespertilionis**, the broad ligament of the uterus. **A.** **Vulvæ**, the labia of the pudendum. Applied also to the armpits, parts of the sphenoid, vomer, etc.

**Alalia** (*al-a'-le-ah*) [*ἀ priv.*; *λαλία*, talk]. 1. Impaired or lost articulation from paralysis of the muscles of speech or from local laryngeal disease. 2. Aphasia due to a psychic disorder.

**Alalic** (*al-a'-lik*) [*ἀ priv.*; *λαλία*, talk]. Characterized by or pertaining to alalia.

**Alanin** (*al'-an-in*) [L., *aldehyde*],  $\text{C}_3\text{H}_7\text{NO}_2$ . Lactic acid. An organic base obtained by heating aldehyd ammonia with hydrocyanic acid in the presence of an excess of  $\text{HCl}$ ; it occurs in aggregated hard nodules with a sweetish taste; soluble in five parts of cold water; with more difficulty in alcohol; insoluble in ether. When heated, it commences to char at about  $237^\circ$ ; it melts at  $255^\circ$  and then sublimes.

**Alaninate** (*al-an'-in-āt*) [L., *aldehyde*]. A salt of alanin. **A.** **of Mercury**, a crystalline, soluble compound of mercury and alanin; antisypilitic. Dose gr.  $\frac{3}{2}$  to  $\frac{1}{4}$ . Unof.

**Alan'son's Operation**. See *Operations*, *Table of*.

**Alant Camphor**. See *Helenin*.

**Alantin** (*al-an'-tin*) [Ger., *alant*, elecampane]. Same as *Inulin*.

**Alantol** (*al-an'-tol*) [Ger., *alant*, elecampane; *oleum*, oil],  $\text{C}_{20}\text{H}_{22}\text{O}$ . Inulol. An aromatic liquid obtained from elecampane; used like creosote for phthisis.

**Alar** (*a'-lar*) [*ala*, wing]. Winglike. In biology, situated in the forks of a stem. **A.** **Ligaments**, lateral synovial folds of the ligament of the knee-joint.

**A.** **Odontoid Ligaments**, lateral ligaments of the odontoid process. **Alares musculi**, the pterygoid muscles. **Alares venæ**, superficial veins at the bend of the arm. **Alaria ossa**, lateral processes of the sphenoid bone.

**Alaris** (*al-a'-ris*) [*ala*, wing]. Wing-shaped. See *Alar*.

**Alary** (*a'-lar-e*) [*ala*, a wing]. In biology, pertaining to wings; wing-shaped.

**Alate** (*a'-lāt*) [*ala*, a wing]. In biology, winged or having winglike borders or expansions; aliferous; aligerous.

**Alate-pinnate** (*a'-lāt-pin'-āt*) [*ala*, a wing; *pinna*, a feather]. In biology, a pinnate leaf having a winged petiole.

**Alba** (*al'-bah*) [L., "white"]. The white fibrous tissue of the brain and nerves.

**Albadara** (*al-bad-a'-rah*) [Arabic]. An old name for the basal joint of the great toe.

**Alban** (*al'-ban*) [*albus*, white],  $\text{C}_{10}\text{H}_{16}\text{O}$ . A white resin that may be extracted from gutta percha.

**Albedo** (*al-be'-do*) [L., "whiteness"]. Whiteness. **A.** **retinæ**, retinal edema. **A.** **unguis**, or **unguim**, the lunula of the nail; the white semilunar place at the root of a finger nail.

**Albescent** (*al-be'-sent*) [*albescere*, to become white]. Whitish; moderately white.

**Albicans** (*al'-be-kanz*) [*albicare*, to grow • white]. White; whitish. Used as the name of either of the *corpora albicantia* at the base of the brain.

**Albicant** (*al'-be-kant*) [*albicare*, to be white]. See *Albescent*.

**Albicantia** (*al-be-kant'-she-ah*) [L.]. Plural of *Albicans*. See *Corpora*.

**Albication** (*al-be-ka'-shun*) [*albicare*, to be white]. In biology, a growing white.

**Albicomus** (*al-be-ko'-mus*) [*albus*, white; *coma*, hair]. Having white hair.

**Albiduria** (*al-bid-u'-re-ah*) [*albidus*, white; *οἶστος*, urine]. White urine.

**Albiflorous** (*al-bif-lo'-rus*) [*albus*, white; *flor*, a flower]. In biology, bearing white flowers.

**Albinism** (*al'-bin-izm*) **Albinismus** (*al-bin-iz'-mus*) [*albus*, white]. **Congenital Achromia**; **Congenital Leucoderma**. That condition of the skin in which there is a congenital absence of pigment unaccompanied by textural changes in the skin, and involving its entire surface, including the pilary filaments and the choroid coats and irides of the eyes. Usually associated with nystagmus, photophobia, and astigmatism.

**Albino** (*al-bi'-no*) [Sp.]. A person affected with albinism. Also an animal or plant differing from the normally colored members of its kind by being white or colorless.

**Albinotic** (*al-bin-ot'-ik*) [Sp.]. Affected with albinism.

**Albinuria** (*al-bin-u'-re-ah*) [*albus*, white; *οἶστος*, to mic-turate]. 1. Chyluria; whiteness of the urine. 2. Albuminuria.

**Albizzia** (*al-but'-e-ah*) [Ital., *Albizzi*, a Tuscan proper name]. A genus of leguminous plants. *A. anthelmithica*. See *Moussena*.

**Albolene** (*al'-bo-len*) [*albus*, white; *oleum*, oil]. A hydrocarbon oil, colorless, tasteless, odorless, and not affected by exposure to air or strong acids. It is a form of lanolin, and is used as an application to inflamed surfaces and for spraying the respiratory passages.

**Albuginea** (*al-bu-jin'-e-ah*) [*albus*, white]. White, or whitish. **A. oculi**, the sclerotic coat of the eye. **A. ovarii**, and **testis**, the tunica albuginea of the ovary and testicle. The spleen, the epididymis, the penis, and the kidneys have each an investment or capsule called *albuginea* or *tunica albuginea*.

**Albugineous** (*al-bu-jin'-e-us*) [*albus*, white]. 1. Whitish. 2. Resembling the white of an egg.

**Albuginitis** (*al-bu-jin-i'-tis*) [*albus*, white; *itis*, inflammation]. Inflammation of a tunica albuginea.

**Albugo** (*al-bu'-go*) [L.]. 1. A white spot, as upon the cornea. 2. A whitish, scaly eruption. 3. The white of an egg.

**Albumen** (*al'-bu-men* or *al-bu'-men*) [*albus*, white]. The white of an egg. See *Albumin*.

**Albumenoid** (*al-bu'-men-oid*). See *Albuminoid*.

**Albumenuria** (*al-bu-men-u'-re-ah*). See *Albuminuria*.

**Albumimeter** (*al-bu-min-i'-et-er*) [*albus*, white; *μέτρον*, measure]. An instrument for determining the quantitative estimation of albumin in urine, or in any compound or mixture.

**Albumin** (*al-bu'-min*) [*albus*, white]. A proteid substance, the chief constituent of the body. Its molecule is highly complex and varies widely within certain limits in different organs and conditions. It contains approximately the following percentages: Carbon 51.5 to 54.5; hydrogen 6.9 to 7.3; nitrogen 15.2 to 17.0; oxygen 20.9 to 23.5; sulphur 0.3 to 2.0. Its approximate formula is  $C_{72}H_{112}N_{16}O_{23}S$ . Albumen, white of egg, often called albumin, is largely composed of it. Other varieties are called after their sources or characteristic reactions, as acid-albumin, alkali albumin, muscle-, serum-, ovum-, vegetable-albumin, etc. Normal albumin is the type of a group of proteids known as albumins. For the various tests for albumin, see *Table of Tests*, under *Test*. See also, *Proteids* and *Native Albumins*. **A. of Bence-Jones**, a variety

found in pseudo-albuminuria. It does not give a precipitate with an excess of  $HNO_3$  except on standing, when a coagulum forms that will be redissolved on heating. **A., Blood**. See *Serum-albumin*. **A., Caseiform**, that variety not coagulated by heat, but precipitated by acids. **A., Circulating**, that found in the fluids of the body. **A. Crystals**. See *Crystalloids*. **A., Derived**, a modification of albumin resulting from the action of certain chemicals. **A., Egg-**. See *Egg-albumin*. **A., Muscle-**, a variety found in muscle-juice. **A., Native**, any albumin occurring normally in the organism. **A., Organic**, that forming an integral part of the tissue. **A., Serum-**. See *Serum-albumin*. **A., Test Solution** of, a filtered solution of the white of an egg in 100 c.c. of distilled water. **A., Vegetable**, that form that is found in various vegetable juices.

**Albuminate** (*al-bu'-min-at*) [*albus*, white]. The compound of albumin and certain bases, as albuminate of iron, or of iron and potassium, etc.

**Albuminaturia** (*al-bu-min-at-u'-re-ah*) [*albus*, white; *οἶστος*, urine]. The abnormal presence of albuminates in the urine.

**Albuminiferous** (*al-bu-min-if'-er-us*) [*albumin*; *ferre*, to bear]. See *Albuminiferous*.

**Albuminimeter** (*al-bu-min-im'-et-er*). See *Albumimeter*.

**Albuminin** (*al-bu'-min-in*) [*albumin*]. The non-nitrogenous substance of the cells that enclose the white of birds' eggs.

**Albuminiparous** (*al-bu-min-ip'-ar-us*) [*albumin*; *parere*, to produce]. Yielding albumin.

**Albuminogenous** (*al-bu-min-oi'-en-us*) [*albumin*; *γενίς*, producing]. Producing albumin.

**Albuminoid** (*al-bu'-min-oid*) [*albumin*; *ειδος*, form].

1. Resembling albumin. Applied to certain compounds having many of the characteristics of albumin. 2. Any nitrogenous principle of the class of which normal albumin may be regarded as the type. **A. Disease**, also spoken of as *lardaceous*, *waxy*, or *amyloid degeneration*. A form of degeneration usually affecting simultaneously a number of the viscera, and occurring secondarily to some preëxisting disease. Those viscera most usually the seat of the change are, in the order of frequency, the spleen, liver, kidneys, intestine and lymph glands. The tissues around the capillary vessels are first affected; from these centers it spreads till the whole organ or section presents a pale, glistening, waxy, or bacon-like appearance. This is due to the infiltration of a peculiar proteid substance, lardacein, which, with iodine, gives a deep mahogany brown color, the characteristic test for the disease. The preëxisting trouble is either some chronic suppuration, as in bone or joint disease, or some wasting disease like pulmonary tuberculosis, syphilis, etc. The only way in which the disease may be arrested is by thorough removal of the cause.

**Albuminoids** (*al-bu'-min-oids*) [*albumin*]. Substances resembling true proteids in their origin and composition. They are amorphous non-crystalline colloids, occurring as organized constituents of the tissues, and also in fluid form. Mucin, Nuclein, Keratin, Fibroin, Spongin, Elastin, Gelatin, Chondrin, etc., are the principal members of the group.

**Albuminometer** (*al-bu-min-om'-et-er*). See *Albuminometer*.

**Albuminone** (*al-bu'-min-on*) [*albumin*]. A principle derivable from certain albuminoids; it is not coagulable by heat, and is soluble in alcohol.

**Albuminorrhea** (*al-bu-min-or'-e-ah*) [*albumin*; *ροία*, a flow]. Copious abnormal discharge of albumins.

**Albuminose** (*al-bu'-min-os*) [*albumin*]. 1. A product of the digestion of fibrin or any albuminoid in very

ALBUMINOMETER.

dilute hydrochloric acid; acid albumin. 2. Albumose, or the product of the digestion of albumin by the gastric juice.

**Albuminosis** (*al-bu-min-o'-sis*) [*albumin*]. Abnormal increase of the albuminous elements in the blood, or the condition that results from such increase.

**Albuminous** (*al-bu'-min-us*) [*albumin*]. Containing, or of the nature of an albumin.

**Albumin-Peptide** (*al-bu'-min-pep'-ton*). Same as *Albuminose* (2d def.).

**Albumins** (*al-bu'-min-z*). See *Albumin*.

**Albuminuria** (*al-bu-min-u'-re-ah*) [*albumin*; *oipov*, urine]. The presence in the urine of albumin, a mixture of serum-albumin and serum-globulin in various proportions. True albuminuria must be distinguished from the presence of albumin due to an admixture with the urine of blood, pus, or other albuminous fluid. However, even under these circumstances it must be remembered that true albuminuria may be coexistent. Albumin in the urine may result from a number of causes, *e. g.*, mechanical interference with the renal circulation; from congestion, lesions, and organic diseases of the kidneys themselves; from toxic substances in the blood, such as lead, in which case there is a granular form of nephritis; from changes in the blood due to various diseases, as anemia, purpura, scurvy, and sepsis; in pyrexia; in certain nervous disorders, such as tetanus, delirium tremens, apoplexy, Graves's disease, and epilepsy; in various functional disorders, as dyspepsia, high living, great exertion, *etc.*, and during pregnancy. The etiology of albuminuria is still undetermined, but it is now recognized that it will be produced by any condition that interferes with the nutrition of the glomeruli or renal epithelium.

**A. of Adolescence.** See *A., Cyclic*. **A., Adventitious.** See *A., Pseudo*. **A., Cardiac**, that due to chronic valvular disease. **A., Cyclic**, a condition also known as physiological, simple, functional, or transient albuminuria, or the albuminuria of adolescence, in which a small quantity of albumin appears in the urine, especially of the young, at stated times of the day; hence the term "cyclic." The nature of this phenomenon is not positively known, but it is probably the result of some changes in the renal circulation. **A., Dietetic**, that due to the ingestion of certain forms of food, especially eggs, cheese, and pastry. **A., Dyscrasic.** See *A., Hematogenous*. **A., False**, a mixture of albumin with the urine during its transit through the urinary passages, where it may be derived from blood, pus, or special secretions that contain albumin. **A., Febrile**, that due to fever, or associated with acute infectious diseases, slight changes occurring in the glomeruli without organic lesion. **A., Functional.** See *A., Cyclic*. **A., Gouty**, albumin in the urine of elderly people, who secrete a rather dense urine containing an excess of urea. **A., Hematogenous**, that resulting from some abnormal blood-condition, and not due to nephritis. **A., Hepatic**, that form associated with marked disturbance of the hepatic function, as shown by slight jaundice and vague dyspeptic attacks. **A., Intrinsic.** See *A., True*. **A., Mixed**, the presence of a true- and pseudo-albuminuria. **A., Morbid**, that due to any pathological condition. **A., Nephrogenous**, that due to renal disease. **A., Neurotic**, that due to nervous disorders. **A., Paroxysmal.** See *A., Cyclic*. **A., Physiological**, the presence of albumin in normal urine, without appreciable coexisting renal lesion or diseased condition of the system. **A., Pseudo**, *A., Adventitious*: albuminuria dependent upon the presence of such fluids as blood, pus, lymph, spermatic fluid, or the contents of an abscess-cavity, in the urine. **A., Simple.** See

*A., Cyclic*. **A., Temporary**, that lasting but for a short time. **A., Tests of.** See *Table of Tests*, under *Test*. **A., Transient.** See *A., Cyclic*. **A., True**, *A., Intrinsic*; that due to the excretion of a portion of the albuminous constituents of the blood with the water and salts of the urine.

**Albuminuric** (*al-bu-min-u'-rik*) [*albumin*; *oipov*, urine]. Associated with, of the nature of, or affected by, albuminuria. **A. Retinitis.** See *Retinitis*.

**Albuminurorrhoea** (*al-bu-min-u-ror-r'-ah*) [*albumin*; *oipov*, urine; *rhoa*, a flowing]. See *Albuminuria*.

**Albumose** (*al'-bu-mos*) [*albumin*]. Any albuminoid substance ranking among the first products of the splitting up of proteids by enzymes, and intermediate between the food-albumins and the typical peptones. According to Kühne there are at least two albumoses, *antialbumose* and *hemialbumose*. The latter, after the precipitation and filtering off of the para-peptones, *e. g.*, in the peptic digestion of fibrin, yields the following: 1. *Protalbumose*, soluble in hot and cold water and precipitable by NaCl in excess. 2. *Deutroalbumose*, soluble in water, not precipitated by NaCl in excess, unless an acid be added at the same time. 3. *Heteroalbumose*, insoluble in hot or cold water, soluble in dilute or more concentrated solutions of NaCl, and precipitable from these by excess of the salt. 4. *Dysalbumose*, same as heteroalbumose, except that it is insoluble in salt solutions.

**Albumosuria** (*al-bu-mos-u'-re-ah*) [*albumose*; *oipov*, urine]. The abnormal presence of an albumose in the urine.

**Albumum** (*al-ber'-num*) [*L.*, "sap-wood"]. In biology, young wood, sap-wood.

**Alcahest** (*al'-ka-hest*) [Uncertain derivation]. An old name for the supposed universal solvent, and for a medicine curative of all congestions. **A. of Glauber**, a crude potassium carbonate derived from the burning of potassium nitrate with hot coals.

**Alkali** (*al'-ka-li*). See *Alkali*.

**Alcaptone** (*al'-kap'-ton*). See *Alkapton*.

**Alcaptonuria** (*al'-kap-ton-u'-re-ah*). See *Alkaptonuria*.

**Alchemist** (*al'-kem-ist*) [Origin doubtful]. One who practices alchemy.

**Alchemy** (*al'-kem-e*) [Arab., of doubtful derivation]. The supposed art of the transmutation of metals (into gold) and of finding a remedy for all diseases. Modern chemistry is the development of this chimerical medieval dream.

**Al'cock's Canal.** See *Canal*.

**Alcohol** (*al'-ko-hol*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. Ethyl alcohol,  $C_2H_5O$ . A liquid obtained by the distillation of fermented grain or starchy substance. It is used in pharmacy as a solvent for resins, and as a base for all tinctures. Commercial alcohol contains 91 per cent. of absolute alcohol, with 9 per cent. of water. It is inflammable, colorless, and possesses a pungent odor and burning taste. Sometimes it is used externally as a stimulant lotion. Internally, it is a powerful cerebral excitant; in large doses a depressant, narcotic poison, producing muscular incoördination, delirium, and coma. It is a food within the limits of 5j-5j per day; its continued use is apt to result in epilepsy, amblyopia, and insanity. In the form of wine, whisky, or brandy, it is valuable in diphtheria, adynamic fevers, and poisoning by cardiac depressants. **A., Absolute**, spirit containing no water. **A., Amyl**,  $C_5H_{11}O$ , commonly known as "Potato Spirit" and "Fusel Oil"; a transparent, colorless liquid. **A., Anhydrous**, one free from water. **A., Aromatic**, an alcohol containing phenyl. **A., Benzyl**,  $C_{11}H_{10}O$ , obtained from benzaldehyd by the action of sodium amalgam. It is a

colorless liquid, with a faint aromatic odor; boils at 205°; its sp. gr. at 0° is 1.002. It dissolves with difficulty in water, but readily in alcohol and ether. **A. deodoratum**, deodorized alcohol, containing 92.5 per cent. by weight of ethyl-alcohol and 7.5 per cent. of water. **A., Dilute**, composed of 41 per cent. by weight of ethyl-alcohol. **A., Ethyl.** See *Alcohol.* **A. of Fermentation**, has a disagreeable odor; boils at 129–130°; occurs in fusel oil; consists mainly of inactive isobutyl carbinol. **A., Methyl**,  $\text{CH}_3\text{O}$ , known as "Wood Spirit." **A., Phenic.** See *Acid, Carbohic.*

**Alcoholate** (*al'-ko-hol-at*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. 1. A chemical compound, as a salt, into which an alcohol enters as a definite constituent. 2. A preparation made with alcohol.

**Alcoholature** (*al ko hol' at chūr*) [Fr. *alcoolature*]. An alcoholic tincture, especially one prepared with fresh plants.

**Alcoholic** (*al-ko-hol' ik*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. 1. Pertaining to, containing, or producing alcohol. 2. One addicted to the use of spirituous drinks. **A. Radicals**, the name applied to the univalent radicals,  $\text{C}_n\text{H}_{2n+1}$ .

**Alcoholica** (*al-ko-hol'-ik-ah*) [Arab., *al*, the; *kohol*, a stain]. In pharmacy, alcoholic preparations.

**Alcoholimeter** (*al-ko-hol-im'-et-er*). See *Alcoholometer*.

**Alcoholimetry** (*al-ko-hol-im'-et-re*). See *Alcoholometry*.

**Alcoholism** (*al'-ko-hol-izm*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. The morbid results of excessive or prolonged use of alcoholic liquors. The term **acute A.** has been used as a synonym for inebriety. The **chronic** form is associated with severe lesions or disturbances of the digestive, respiratory, and nervous systems.

**Alcoholismus** (*al-ko-hol-i'-mus*). Syn. of *Alcoholism*.

**Alcoholization** (*al-ko-hol-iz-a'-shun*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. The art or process of alcoholizing; the state of being alcoholized; the product of the process of alcoholizing.

**Alcoholize** (*al'-ko-hol-iz*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. 1. To impregnate with or blend with alcohol. 2. To convert into an alcohol. 3. To reduce to a very subtle powder.

**Alcoholometer** (*al-ko-hol-om'-et-er*) [*alcohol*;  $\mu\acute{\epsilon}\tau\rho\nu\nu$ , a measure]. A hydrometer or other instrument used in determining the percentage of alcohol in any liquid.

**Alcoholometry** (*al-ko-hol-om'-et-re*) [*alcohol*;  $\mu\acute{\epsilon}\tau\rho\nu\nu$ , a measure]. The determination of the proportion of alcohol present in any liquid.

**Alcoholophilia** (*al-ko-hol-o-fil'-e-ah*) [*alcohol*;  $\phi\acute{\iota}\lambda\acute{\iota}\alpha$ , to love]. The appetite for strong drink; a craving for intoxicants.

**Alcohols** (*al'-ko-holz*) [Arab., *al*, the; *kohol*, a stain, or finely powdered]. A series of neutral compounds resembling bases exhibiting gradations corresponding to their increase in molecular weight. They are derived from the normal hydrocarbons by replacing hydrogen with the group OH. The lower alcohols are mobile liquids, readily dissolving in water and possessing the characteristic alcohol odor; the intermediate members are more oily, and dissolve with difficulty in water; while the higher are crystalline solids without odor or taste. The alcohols resemble the fats. Their boiling-points increase gradually (with similar structure) in proportion to the increase of their molecular weights. See *Table*. **A., Diatomic**, those formed by replacing two atoms of hydrogen in a hydrocarbon by two molecules of hydroxyl. **A., Dibasic.** See *A., Diatomic*. **A., Dihydric.** See *Glycols*, and *Table of Alcohols*. **A., Divalent.** See

*Glycols*. **A., Hexahydric**, alcohols containing six hydroxyl groups attached to six different carbon atoms. They approach the sugars very closely in their properties, having a very sweet taste, but differ from them in

## TABLE OF THE ALCOHOLS.

| Anisyl, . . . . .   | $C_8H_{10}O_2$ | Solid.  | 259° | ... |
| Piperonyl, . . . .  | $C_8H_8O_3$    | Solid.  | ...  | ... |
| Vanillin, . . . . . | $C_8H_{10}O_3$ | Solid.  | ...  | ... |
| Phenyl Glycerol, .  | $C_9H_{12}O_3$ | Solid.  | ...  | ... |
| Mesicerin, . . . .  | $C_9H_{12}O_3$ | Liquid. | ...  | ... |

that they do not reduce an alkaline copper solution and are not fermented by yeast. Moderate oxidation converts them into glucoses,  $C_6H_{12}O_6$ . They are obtained from the latter by the action of sodium amalgam. **A., Monatomic.** See *A., Monovalent*. **A., Monohydric.** See *A., Monovalent*. **A., Monovalent (Monohydric),** products of the replacement of one atom of hydrogen of the hydrocarbons by the hydroxyl group HO. **A., Normal,** primary alcohols in which the replacing group possesses normal structure. **A., Primary,** products of the replacement of one hydrogen atom in carbinol by alkyls. **A., Secondary,** products of the replacement of two hydrogen atoms in carbinol by alkyls. **A., Tertiary,** products of the replacement of all of the three hydrogen atoms of carbinol by alkyls. **A., Triatomic,** those formed by replacing three atoms of hydrogen in a hydrocarbon by three molecules of hydroxyl. **A., Unsaturated,** those derived from the unsaturated alkylens in the same manner as the normal alcohols are obtained from their hydrocarbons. In addition to the general character of alcohols, they are also capable of directly binding two additional affinities. See *Table*.

**Alcoömeter** (*al-ko-om'-et-er*). See *Alcoholometer*.

**Alcornin** (*al-kor'-nin*) [Sp.]. A peculiarly fatty, crystallizable substance, supposed to be the active principle of alcornouque.

**Alcornouque** (*al-kor-no'-kwa*) [Sp.]. 1. Cork, or the cork-oak. 2. The *Alchornea latifolia*, a euphorbiaceous tree of tropical America. Its bark is bitter and tonic, and has been used as a remedy in phthisis. Unof.

**Aldane** (*al'-dän*) [See *Aldehyd*]. A chemical compound formed by uniting two or more molecules of an aldehyd and removing the aqueous elements.

**Aldehyd** (*al'-de-hid*) [*al*, the first syllable of alcohol; *dehyd*, from *dehydratus*],  $C_2H_4O$ . Alcohol deprived of two atoms of hydrogen, or *acetic aldehyd*. It is a colorless, limpid liquid, with a characteristic odor. When exposed to the air or to oxygen it is converted into acetic acid. It boils at 208°, and has a sp. gr.

of 0.8009 at 0°. It is miscible in all proportions with water, ether, and alcohol. Internally it produces intoxication, anesthesia, and asphyxia. The vapor is used in catarrhal congestions and ozena. **A., Anisic,**  $C_8H_8O_2$ , results on oxidizing various essential oils (anise, fennel, *etc.*) with dilute  $HNO_3$ . A colorless oil of sp. gr. 1.123 at 15°, and boiling at 248°. **A., Benzoic,**  $C_7H_6O_2$ , the oil of bitter almonds. **A., Cinnamic,**  $C_9H_8O_2$ , the chief ingredient of the essential oil of cinnamon and cassia. It is a colorless, aromatic oil, that sinks in water and boils at 247°. **A., Formic,** is asserted to have extreme value as a microbicide and antiseptic, even its fumes and its solution of one part in 20,000 being destructive to various pathogenic germs. **A., Protocatechuic,**  $C_6H_3(OH)(OH).CHO$ , the parent substance of vanillin and piperonal, prepared from pyrocatechin by the action of chloroform. It dissolves readily in water, forms brilliant crystals, and melts at 150°. **A., Salicylic,**  $C_6H_4(OH).CHO$ , occurs in the volatile oils of the different varieties of *Spinea*. It is an oil with an aromatic odor, boiling at 196°, with a sp. gr. at 15° of 1.172; easily soluble in water, and colors the skin an intense yellow.

**Aldehydene** (*al-de-hi'-den*) [*aldehyd*],  $C_2H_2$ . A chemical radicle derived from ethylene.

**Aldehyds** (*al'-de-hidz*) [See *Aldehyd*]. A class of compounds intermediate between alcohols and acids, derived from their corresponding primary alcohols by the oxidation and removal of two atoms of hydrogen, and converted into acids by the addition of an atom of

TABLE OF THE ALDEHYDS.

## A. OF THE FATTY COMPOUNDS.

1. ALDEHYDS OF THE PARAFFIN SERIES,  $C_nH_{2n}O$ .

| NAME.   | FORMULA.        | PHYSICAL CONDITION. | MELTING POINT.<br>(Centigrade) | BOILING POINT.<br>(Centigrade) | SPECIFIC GRAVITY. |

| Anisic, . . . .  | $C_8H_8O_2$ | Liquid | ...    | 248° | 1.123 at 15° |
| Protocatechuic,  | $C_7H_6O_3$ | Solid  | 150°   | ...  | ...          |
| Vanillin, . . .  | $C_8H_8O_3$ | Solid  | 80-81° | ...  | ...          |

oxygen. They contain the group COH. They exhibit in their properties a gradation similar to that of the alcohols. The lower members are volatile liquids, soluble in water, and have a peculiar odor, but the higher are solids, insoluble in water, and cannot be distilled without decomposition. See *Table*.

**Aldepalmitic Acid** (*al-de-pal-mit'-ik as'-id*). See *Acid, Aldepalmitic*.

**Alder** (*al'-der*). See *Abnus*.

**Al'derman's Nerve**. See *Arnold's Nerve*, in *Nerve Table*.

**Aldin** (*al'-din*) [see *Aldehyd*]. An amorphous basic chemical substance, formed from an ammonia compound of aldehyd. Several aldins are known.

**Aldol** (*al'-dol*) [see *Aldehyd*],  $C_4H_8O_2$ . A colorless, odorless liquid, obtained by the action of dilute HCl on crotonaldehyd and acetaldehyd. It is miscible with water, and at 0° has a sp. gr. of 1.120; upon standing, it changes to a sticky mass that cannot be poured.

**Aldoses** (*al'-do-sez*) [see *Aldehyd*]. The aldehyd alcohols, containing the atomic group CH(OH).CHO.

**Aldoxim, or Aldoxime** (*al-doks'-im*) [See *Aldehyd*]. Products of the combination of aldehyds or ketones and free hydroxylamin. They are usually liquid bodies that boil without decomposition.

**Ale** (*al*) [A. S., *calve*]. An alcoholic beverage brewed from malt and hops. It contains from three to seven per cent of alcohol. See *Malt Lignors*.

**Aleatico** (*al'-e-at'-tik-n*) [It.]. An excellent sweet red wine, prepared in Tuscany, and esteemed one of the best and most delicate stimulants of its class.

**Alecithal** (*ah-les'-ith-al*) [*à* priv.; *λεκιθος*, yolk]. A term applied to certain ova having the food-yolk absent, or present only in very small quantity.

**Alegar** (*al'-le-gar*) [A. S., *calvo*; *egar*, sour]. Vinegar made of ale.

**Alembic** (*al'-em'-bik*) [Arab., *al*, the; *ambiz*, a cup]. A vessel used for distillation.

**Alembroth** (*al'-em'-broth*) [Origin unknown]. An old name for a compound of the chlorid of ammonium and mercury. Its solution has been used of late as an antiseptic.

**Alepidote** (*ah-lep'-e-dot*) [*à* priv.; *λεπις*, a scale]. Without scales, as certain fishes.

**Aleppo Boil, Button, Evil, Pustule, or Ulcer**. See *Lurunculus orientalis*.

**Aletrin** (*al'-et-rin*). See *Aletris*.

**Aletris** (*al'-et-ris*). Star Grass, Unicorn Root, Starwort, Colic Root. The root of *A. farinosa*. Tonic, diuretic, and anthelmintic. Formerly a popular domestic remedy in colic, dropsy, and chronic rheumatism. Dose of fld. ext. ℥x-xxx; of tincture (1 in 8 proof spirit) ʒi-ij; of aletrin, the extractive, gr. ʒiv. **A. Cordial**. Dose ʒj three times daily. Unof.

**Aleukemia** (*ah-lu-ke'-me-ah*) [*à* priv.; *λευκός*, white; *aima*, blood]. Deficiency in the proportion of white cells in the blood.

**Aleurometer** (*al-u-rom'-et-er*) [*ἀλετρον*, flour; *μέτρον*, a measure]. An instrument used for the examination of crude gluten as to its power of distending under the influence of heat, as a means of judging of the value of a flour for bread-making. A similar instrument, termed an *aleuroscope*, has also been invented.

**Aleuronat** (*al-u'-ro-nat*) [*ἀλετρον*, flour]. A vegetable albumin used as a substitute for bread in cases of diabetes.

**Aleurone** (*al-u'-rōn*) [*ἀλετρον*, fine flour]. Proteid matter in the form of small rounded particles, found in seeds.

**Aleuroscope** (*al-u'-ro-skōp*) [*ἀλετρον*, flour; *σκοπεῖν*, to view]. See *Aleurometer*.

**Alexander-Adam's Operation**. See *Operations, Table of*.

**Alexanderism** (*al-eks-an'-der-izm*) [*Alexander*]. The insanity of conquest; agriothymia ambitiosa.

**Alexander's Operation**. See *Operations, Table of*.

**Alexeteric** (*al-eks-e-ter'-ik*) [*ἀλεξήτηρ*, defender]. Good against poison, venom, or infection.

**Alexia** (*al-eks'-e-ah*) [*à* priv.; *λέξις*, word]. Word-blindness. A form of aphasia and a special type of psychical blindness, in which the patient is unable to recognize ordinary written or printed characters. **A., Musical**, musical blindness; pathological loss of the ability to read music.

**Alexifer** (*al-eks'-if-er*) [*ἀλεξέειν*, to repel; *φάρμακον*, a poison]. A remedy or object that serves as an amulet or antidote against poison.

**Alexin** (*al-eks'-in*) [*ἀλεξέειν*, help]. 1. Any defensive proteid; any phylaxin or sozin. 2. An antibacterial substance found by Hankin in the blood of certain animals and giving immunity to certain toxins. 3. A synonym for *Tuberculocidin*.

**Alexipharmac, or Alexipharmic** (*al-eks-e-far'-mak, or -mik*) [*ἀλεξέειν*, to repel; *φάρμακον*, a poison]. A medicine neutralizing a poison.

**Alexipharmacon** (*al-eks-e-far'-mak-on*) [*ἀλεξέειν*, to repel; *φάρμακον*, a poison]. Any alexipharmac medicine.

**Alexipyretic** (*al-eks-e-pi-rett'-ik*) [*ἀλεξέειν*, to ward off; *πυρετός*, a fever]. A febrifuge.

**Alexiteric** (*al-eks-e-ter'-ik*). See *Alexeteric*.

**Aleze** (*ah-lez*) [Fr., *alze*]. A cloth to protect the bed from becoming soiled by excreta, etc.

**Alfonsin** (*al-fon'-sin*) [from Alfonso Ferri, a sixteenth century surgeon]. An old form of bullet extractor.

**Algæ** (*al'-je*) [*alga*, a seaweed]. A group of acotyledonous plants, of simple vegetable construction, living mostly in the water.

**Algaroth** (*al'-gar-oth*) [It., *Algarotti*, the Veronese physician]. Oxychlorid of antimony.

**Algedo** (*al-je'-do*) [*ἀλγηδών*, pain]. Severe pain in the generative organs and extending to the urinary organs, sometimes arising from a sudden stoppage of gonorrhea.

**Algefacient** (*al-je-fa'-shent*) [*algere*, to be cool; *facere*, to make]. Cooling.

**Algeinuresis** (*al-jin-u-re'-sis*) [*ἀλγεῖν*, to feel pain; *οὐρῆσις*, urination]. Painful urination.

**Algera, or Algeros** (*al-je'-rah*, or; *ros*) [*ἀλγηρός*, painful]. Painful; characterized by pain.

**Algesia** (*al-je'-se-ah*) [*ἀλγησις*, pain]. Pain; suffering.

**Algesichronometer** (*al-je-se-kro-nom'-et-er*) [*ἀλγησις*, pain; *χρόνος*, time; *μέτρον*, a measure]. An instrument used to note the lapse of time before a nerve center responds to a painful stimulus.

**Algesimeter** (*al-je-im'-et-er*) [*ἀλγησις*, pain; *μέτρον*, a measure]. An instrument for determining the acuteness of the sense of pain.

**Algesis** (*al-je'-sis*). See *Algesia*.

**Algesthesis, or Algæsthesia** (*al-je-the'-sis*) [*ἀλγος*, pain; *αἴσθησις*, feeling]. The perception of pain; any painful disease.

**Algetic** (*al-je'-ik*) [*ἀλγεῖν*, to have pain]. Pertaining to, or producing, pain.

**-algia** (*al'-je-ah*) [*ἀλγος*, pain]. A suffix denoting pain, as odontalgia, neuralgia, etc.

**Algid** (*al'-jid*) [*algidus*, cold]. Cold, chilly. **A. Fever**, a pernicious intermittent fever, with great coldness of the surface of the body. **A. Cholera**, Asiatic cholera.

**Algin** (*al'-jin*) [*alga*, a seaweed]. Alginic acid; a gummy substance derivable from seaweeds and forming a good substitute for gum arabic.

**Algology** (*al-gol'-o-ji*) [*alga*, a seaweed; *λέγειν*, speak]. That department of botany treating of algæ, phycolgy.

**Algotometer** (*al-gom'-et-er*) [*ἀλγος*, pain; *μέτρον*, a measure]. An instrument for testing the sensibility of a part to pain.

**Algotmetry** (*al-gom'-et-re*) [*ἀλγος*, pain; *μέτρον*, a measure]. The testing of pain.

**Algophobia** (*al-go-fō'-be-ah*) [*ἀλγος*, pain; *φόβος*, dread]. Unreasonable or morbid dread of pain.

**Algophobic** (*al-go-fō'-bik*) [*ἀλγος*, pain; *φόβος*, dread]. Characterized by algophobia.

**Algophobist** (*al-go-fō'-bist*) [*ἀλγος*, pain; *φόβος*, dread]. One who morbidly dreads pain.

**Algor** (*al'-gor*) [L.]. A sense of chilliness or coldness. *A. Progressivus*. Syn. of *Scleroderma Neonatorum*.

**Algos** (*al'-gos*) [*ἀλγος*, pain]. Pain; a painful disease, or attack.

**Algosis** (*al-go'-sis*) [*alga*, seaweed]. The causation of disease by certain plants, as algæ.

**Algospasm** (*al'-go-spazm*) [*ἀλγος*, pain; *σπασμός*, spasm]. Painful spasm or cramp.

**Alibert's Ke'loid**. See *Keloid* and *Diseases, Table of*.

**Alibility** (*al-ib-il'-e-te*) [*alibilis*, nutritive]. Availability of a nutritious substance for absorption and assimilation.

**Alible** (*al'-i-bl*) [*alibilis*, nutritive]. Nutritive; absorbable and assimilable.

**Alicant** (*al'-ik-ant*) [from *Alicante*, in Spain]. A strong, sweet, and dark-colored Spanish wine.

**Alices** (*al'-is-ēs*) [L.]. Red spots preceding the pustulation in smallpox.

**Alienation** (*al-yen-a'-shun*) [*alienatio*; *alienare*, to withdraw]. Mental derangement, insanity.

**Alienist** (*al'-yen-ist*) [*alienare*, to withdraw]. One who treats mental diseases; a specialist in the treatment of insanity.

**Aliethmoid** (*al-e-eth'-moid*) [*ala*, a wing; *ἰθμός*, a strainer]. In birds, the wing of the ethmoidal portion of the orbito-nasal cartilage.

**Aliferous** (*al-if'-er-us*) [*ala*, a wing; *ferre*, to bear]. Winged; alate; aligerous.

**Aliform** (*al'-if-orm*) [*ala*, wing; *forma*, shape]. Wing-shaped. **A. Process**, the wing of the sphenoid. See *Alisphenoid*. *Aliformes musculi* (*al-if-or'-mez mus'-ku-li*). The aliform or wing-shaped muscles; the pterygoid muscles.

**Aligerous** (*al-if'-er-us*) [*ala*, wing; *gerere*, to bear]. Having wings; alate; aliferous.

**Aliment** (*al-im'-ent*) [*alimentum*, from *alimentare*, to nourish]. Nourishment, food. A substance that, acted upon by the digestive and assimilative organs, yields the sources and repairs the losses of heat, force, or the tissues of the body.

**Alimentary** (*al-im-en'-ta-re*) [*alimentum*, from *alimentare*, to nourish]. Nourishing. **A. Bolus**, the food after mastication and just prior to swallowing. **A. Canal, Duct, System, or Tube**, the digestive tube from the lips to the anus, with its accessory glands.

**Alimentation** (*al-im-en-ta'-shun*) [*alimentare*, to nourish]. The process of the reception and conversion of food into material fit for nourishment. **A., Rectal**, the nourishing of a patient by the administration of small quantities of concentrated food through the rectum. There are many formulæ for these nutritious enemata, the most important of which are the following: 1. *Leube's Pancreatic-meat Emulsion*.—

"For rectal alimentation: chop five ounces of finely-scraped meat still finer, add to it one and a-half ounces of finely-chopped pancreas, free from fat, and then three ounces of lukewarm water; stir to the consistency of a thick pulp. Give at one time, care being taken to wash out the rectum with water about an hour before." 2. *Mayet's Formula*.—"Fresh ox-pancreas 150 to 200 grams; lean meat 400 to 500 grams. Bruise the pancreas in a mortar with water at a temperature of 37° C., and strain through a cloth. Chop the meat and mix thoroughly with the strained fluid, after separating all the fat and tendinous portions. Add the yolk of one egg, let stand for two hours, and administer at the same temperature, after having cleansed the rectum with an injection of oil. This quantity is sufficient for 24 hours' nourishment, and should be administered in two doses." 3. *Rennie's Formula*.—"Add to a bowl of good beef-tea one-half pound of lean, raw beefsteak pulled into shreds. At 99° F. add one drachm of fresh pepsin and one-half drachm of dilute HCl. Place the mixture before the fire and let it remain for four hours, stirring frequently. The heat must not be too great, or the artificial digestive process will be stopped altogether. It is better to have the mixture too cold than too hot. If alcohol is to be given it should be added at the last moment. Eggs may also be added, but should be previously well beaten." 4. *Peaslee's Formula*.—"Crush or grind a pound of beef-muscle fine; then add one pint of cold water; allow it to macerate 40 minutes, and then gradually raise it to the boiling point; allow it to boil for two minutes—no more—and then strain." 5. *Flint's Mixture*.—"Milk  $\frac{5}{8}$  ij, whisky  $\frac{5}{8}$  ss, to which add half an egg."

**Alimentivity** (*al-im-en-ti'-e-te*) [*alimentare*, to nourish]. The instinct that impels the animal organism to take food or nourishment.

**Alinasal** (*al-in-a'-sal'*) [*ala*, a wing; *nasus*, the nose]. Pertaining to the *ala nasi*, or wing of the nose.

**Aliped** (*al'-ip-ed*) [*ala*, a wing; *pēs*, a foot]. Characterized by having the fingers or toes connected by a membrane, for purposes of flight.

**Aliptic** (*al-ap'-tik*) [*ἀλειπτικός*]. 1. Relating to inunction. 2. Gymnastic; pertaining to physical culture.

**Alisma** (*al'-iz'-mih*) [*ἀλίσμα*, plantain]. A genus of endogenous plants. *A. plantago*, or water plantain, has pungent, acrid qualities, and is used as a diuretic and stimulant. Unof.

**Alismín** (*al'-iz'-mín*) [*ἀλίσμα*, plantain]. An extractive or precipitate, obtained from the tincture of *Alisma plantago*.

**Alisphenoid** (*al-is-fē'-noid*) [*ala*, a wing; *σφῆν*, a wedge; *εἶδος*, form]. 1. Pertaining to the greater wing of the sphenoid bone. 2. That bone which in adult life forms the main portion of the greater wing of the sphenoid.

**Alizarín** (*al'-iz-a'-rín*) [Arab., *al*, the; *ázarah*, to extract],  $C_{15}H_8O_4$ . The red coloring principle occurring in the madder plant, *Rubia tinctorium*, and in anthracene, a coal-tar product. It occurs in red prismatic crystals, readily soluble in ether and alcohol. The alizarins form a group of the anthracene colors. See *Conspectus of Pigments* under *Pigment*. **A. Blue**, a crystalline blue coloring matter formed by heating nitroalizarin in combination with  $H_2SO_4$  and glycerin. **A. Red**, a pale flesh-color used in dyeing.

**Alkahest** (*al'-ka-hest*). Same as *Alcahest*.

**Alkaescence** (*al-ka-les'-ens*) [Arab., *al-qali*, soda-ash]. Slight or commencing alkalinity; alkaline quality or tendency.

**Alkaescent** (*al-ka-les'-ent*) [Arab., *al-qali*, soda-ash]. Somewhat alkaline; mildly alkaline.

**Alkali** (*al'-ka-li*) [Arab., *al-qali*, soda-ash]. The term includes the hydrated oxides of the alkali metals; these are electro-positive, are strong bases, uniting with acids to form salts, turn red litmus blue, and saponify fats. **A., Caustic** (usually potash), when so concentrated as to possess caustic properties; potash and soda are called **fixed alkalies**, because permanently solid; soda is called a mineral, potash a vegetable, and ammonia a volatile alkali.

**Alkali-albumin** (*al'-ka-li-al-bū'-mín*). A derived albumin; a proteid having been acted upon by dilute alkalies and yielding an alkaline reaction.

**Alkaligenous** (*al-ka-lij'-en-us*) [*alkali*; *γενής*, producing]. Affording or producing an alkali.

**Alkalimeter** (*al-ka-lim'-et-er*) [*alkali*; *μέτρον*, a measure]. An instrument for estimating the alkali in a substance.

**Alkalimetry** (*al-ka-lim'-et-re*) [*alkali*; *μέτρον*, a measure]. The measurement of the amount of an alkali in a substance.

**Alkaline** (*al'-ka-lín*) [*alkali*]. Having the qualities of or pertaining to an alkali. **A. Bath**. See *Bath*. **A. Copper Test**. See *Tests*, *Table of*. **A. Tide**. See *Tide*.

**Alkalinity** (*al-ka-lín'-it-e*) [*alkali*]. The quality of being alkaline.

**Alkalinuria** (*al-ka-lín-u'-re-ah*) [*alkali*; *οὖρον*, urine]. Alkalinity of the urine.

**Alkalization** (*al-ka-li-zā'-shun*) [*alkali*]. The act of rendering a thing alkaline; the state or quality of being rendered alkaline.

**Alkaloid** (*al'-ka-loid*) [*alkali*; *εἶδος*, likeness]. Resembling an alkali.

**Alkaloidal** (*al-ka-loid'-al*) [*alkali*; *εἶδος*, likeness]. Having the qualities of an alkaloid.

**Alkaloids** (*al'-ka-loi-tz*) [*alkali*; *εἶδος*, likeness]. All nitrogenous vegetable compounds of basic and alka-

line character, or their derivatives, from which bases may be isolated. They are chief constituents of the active principles of the vegetable drugs employed as medicines or poisons. Those alkaloids containing no oxygen are generally liquid and volatile; such are nicotine and conine. The others are solid, crystallizable, and non-volatile. **A., Putrefactive**. See *Putromaines*.

**Alkaluretic** (*al-ka-lu-ret'-ik*) [*alkali*; *οὖρον*, urine]. Causing or tending to cause a flow of alkaline urine.

**Alkanet** (*al'-kan-et*) [Sp., dim. of *alcaña*, henna]. The root of the herb, *Alkanna* (*Anchusa tinctoria*), yielding a red dye that is used in staining wood, coloring adulterated wines, and in pharmacy to give a red color to salves, etc.

**Alkan'na Red**. See *Alkannin*.

**Alkannin** (*al'-kan-in*) [Sp., dim. of *alcaña*, henna]. Alkanna red; a valuable coloring matter obtained from alkanet. It is a dark, brownish-red, resinous mass, or powder, insoluble in water, but soluble in alcohol and ether, neutral in reaction.

**Alkapton** (*al-kap'-ton*). A yellowish resinous body occasionally found in urine, which on exposure to air acquires a brownish tint. It does not ferment and does not reduce bismuth like glucose, though it throws down a somewhat brownish mass. It is highly soluble in water, but only sparingly in ether.

**Alkaptonuria** (*al-kap-ton-u'-re-ah*) [*alkapton*; *οὖρον*, urine]. The presence of alkapton in the urine. It has been found in cases of pulmonary tuberculosis, and in other instances in which there are no local lesions or general disease. It is without clinical significance.

**Alkarsin** (*al-kar'-sin*) [*alcohol*; *arsenic*]. Cadet's Fuming Liquid; an extremely poisonous liquid containing cacodyl. It is of a brown color, and on exposure to the air ignites spontaneously.

**Alkophyr** (*al'-ko-fir*). Brücke's name for a variety of peptone soluble in alcohol.

**Alkoxid** (*al-koks'-id*) [*alcohol*; *oxid*]. A chemical compound formed by the union of an alcohol with a metallic base.

**Alkylogens** (*al-ki'l'-o-jenz*). See *Esters*, *Haloid*.

**Alkyls** (*al'-kilz*) [*alkali*]. The name applied to the univalent alcohol radicals,  $C_nH_{2n+1}$ ; methyl, ethyl, etc., are alkyls.

**Alkyl-sulphids** (*al'-kil-sul'-fids*). Thio-ethers. Sulphur analogues of the ethers. They are colorless liquids, mostly insoluble in water and possessing a disagreeable odor resembling that of garlic.

**Allagostemonous** (*al-ag-o-ste'-mon-us*) [*ἀλλοστής*, change; *στίχων*, a thread or stamen]. In botany, the alternate insertion of the stamens on the receptacle and corolla.

**Allamanda** (*al-am-an'-dah*) [*Allamand*, a Swiss scientist]. A genus of apocynaceous climbing shrubs of tropical America. *A. cathartica* is diaphoretic, emetic, cathartic, and refrigerant. Unof.

**Allantiasis** (*al-an-ti'-as-is*) [*ἀλλῆς*, a sausage]. Sausage poisoning, due to putrefactive changes in imperfectly cured sausages, or in those made from bad materials.

**Allantoic** (*al-an-to'-ik*) [*ἀλλῆς*, a sausage; *εἶδος*, resemblance]. Pertaining to the allantoids. **A. Parasite**, a form of autotite in which the weaker fetus forms anastomoses with the allantoid or placental circulation of the stronger, thus becoming directly dependent for its nutrition upon the circulation of the latter. It is characterized by a partial or complete disappearance of the heart of the parasite.

**Allantoid** (*al-an-to'id*) [*ἀλλῆς*, sausage; *εἶδος*, resemblance]. 1. Resembling or like a sausage. 2. Relating to the allantoids.

**Allantoidian** (*al-an-toid'-e-an*) [*ἄλλῳς*, a sausage; *εἶδος*, resemblance]. Any animal which in its fetal condition possesses an allantoid.

**Allantoin** (*al-an'-to-in*) [*ἄλλῳς*, a sausage; *εἶδος*, resemblance],  $C_4H_6N_2O_3$ . A crystalline substance occurring in traces in normal urine, and prepared from uric acid by oxidation processes. Also the characteristic constituent of the allantoid fluid, and likewise found in fetal urine and amniotic fluid. It crystallizes in small, shining, colorless, hexagonal prisms, soluble readily in hot water. It reduces Fehling's solution on prolonged boiling.

**Allantois** (*al-an'-to-is*) [*ἄλλῳς*, a sausage; *εἶδος*, resemblance]. One of the fetal appendages or membranes, derived from the mesoblastic and hypoblastic layers. Its function is to convey the blood-vessels to the chorion. The lower part finally becomes the bladder, the rest, the urachus.

**Allantotoxin** (*al-an-to-toks'-ik-on*) [*ἄλλῳς*, a sausage; *τοξικόν*, a poison]. A name applied to a poisonous substance, probably a ptomaine, that develops during the putrefactive fermentation of sausage, especially that made of blood and liver.

**Allarton's Operation.** See *Operations, Table of*.

**Allasotonic** (*al-as-o-ton'-ik*) [*ἄλλῳσσειν*, to vary; *τόνος*, tension]. In biology, a term applied to the transient movements produced by stimulation, in mature plant organs; opposite of *Auxotonic*.

**Allen's Closet.** See *Sewage, Disposal of*. **A. Tests.** See *Tests, Table of*.

**Allenthesis** (*al-en'-the-sis*) [*ἄλλος*, other; *ἐνθεσις*, insertion]. The presence or the introduction of foreign bodies into the organism.

**Allentheton** (*al-en'-the-ton*) [*ἄλλος*, other; *ἐνθεσις*, insertion]. A foreign body present in the organism.

**Alleorgan, or Allœorgan** (*al-e-or'-gan*) [*ἄλλορος*, of another sort; *ὄργανον*, organ]. Same as *Alloplast*.

**Alloësis, or Allœosis** (*al-e-o'-sis*) [*ἄλλοωσις*, change]. 1. Change; alterative effect; recovery from illness. 2. Mental disorder.

**Alleotic, or Allœotic** (*al-e-o'-ik*) [*ἄλλοώσις*, change]. Alterative.

**Allepigamic** (*al-ep'-ig-am'-ik*) [*ἄλλος*, other; *ἐπι*, upon; *γαμικός*, relating to marriage]. In biology, a term applied by Poulton to the colored foreign objects displayed by certain animals during courtship, as by the bower birds.

**Allesthesia** (*al-es-the'-se-ah*) [*ἄλλος*, other; *αἰσθησις*, feeling]. Same as *Allochiria*.

**Allevation** (*al-e-va'-shun*) [*ad*, to; *levare*, to lift up]. 1. The relief of pain. 2. The raising or lifting of a patient from the bed or from the reclining posture.

**Allevation** (*al-e-ve-a'-shun*) [*alleviatus*; *ad*, to; *levare*, lift up]. The relief or palliation of pain.

**Alleviative** (*al-e'-ve-a-tiv*) [*allevare*, to lighten]. 1. Tending to mitigate or relieve pain. 2. A remedy for the relief of pain.

**Alleviator** (*al-e'-ve-a-tor*) [*allevare*, to lighten]. A device for raising or lifting a sick person from the bed.

**Allex** (*al'-eks*) [*L.*]. Same as *Hallex*.

**Allheal** (*awl-hell'*) [*A. S.*, *all*; *hælan*, to heal]. The official valerian, *Valeriana officinalis*; also the plant *Stachys palustris*.

**Alliaceous** (*al-e-a'-shus*) [*allium*, garlic]. Resembling garlic or pertaining to the same.

**Alligator-forceps** (*al'-e-ga-tor-for'-seps*). A surgeons' toothed forceps, one of the jaws of which works with a double lever.

**Alligator Pear** (*al'-e-ga-tor pār*). The seeds of *Persea gratissima*, or Avocado Pear. A Mexican remedy for intercostal neuralgia, and internally, an anthelmintic (?). Dose, internally, of the fld. ext. ℥xxx-3j.

**Allingham's Operations.** See *Operations, Table of*. **Allingham's Rectal Plug.** An appliance for controlling hemorrhage from the rectum.

**Allis's Inhaler.** See *Anesthetic*.

**Allis's Sign.** See *Signs and Symptoms, Table of*.

**Alliteration** (*al-it-er-a'-shun*) [*ad*, to; *litera*, letter]. A form of dysphasia in which the patient arranges his words according to the sound.

**Allium** (*al'-e-um*) [*L.*]. Garlic. The bulb of *A. sativum*. Contains a pungent volatile oil (allyl sulphid), that is found also in the leek and the onion. The tubers are used both as a food and as a condiment, and are stimulants to digestion. **A. cepa**, the common onion, and **A. porrum**, the leek, have similar qualities. **A., Syr.**, contains, fresh garlic 20, sugar 80, dil. acetic acid q. s. Dose 3j-3iv.

**Allochetia** (*al-o-ke'-te-ah*). Same as *Allochezia*.

**Allochezia** (*al-o-ke'-ze-ah*) [*ἄλλος*, other; *χεῖρ*, to desire to go to stool]. 1. The passage of feces from the body through an abnormal opening. 2. The passing of non-fecal matter from the bowels.

**Allochiria** (*al-o-ki'-re-ah*) [*ἄλλος*, other; *χεῖρ*, hand]. An infrequent tabetic symptom, in which, if one extremity be pricked, the patient locates the sensation in the corresponding member of the other side.

**Allochroic** (*al-o-kro'-ik*) [*ἄλλος*, another; *χρῶμα*, color]. Of changeable or diversified color.

**Allochromasia** (*al-o-kro-ma'-ze-ah*) [*ἄλλος*, other; *χρῶμα*, color]. Color-blindness.

**Allochromatic** (*al-o-kro-mat'-ik*) [*ἄλλος*, other; *χρῶμα*, color]. Of a changeable color.

**Allocinetic** (*al-o-sin-et'-ik*). See *Allokinetic*.

**Allocryptic** (*al-o-krip'-tik*) [*ἄλλος*, other; *κρυπτός*, hidden]. In biology, a term applied by Poulton to mimetic coloration in animals produced by covering themselves with foreign objects.

**Alloësis** (*al-e-o'-sis*). See *Alloësis*.

**Alloëotic** (*al-e-o'-ik*). See *Alloëotic*.

**Allogamy** (*al-oq'-am-e*) [*ἄλλος*, other; *γάμος*, marriage]. In biology, cross fertilization.

**Alloisomerism** (*al-o-i-som'-er-izm*) [*ἄλλος*, other; *ἰσομερής*, having equal parts]. The application of the same structural formula to many different compounds; a variety of isomerism.

**Allokinetic** (*al-o-kin-et'-ik*) [*ἄλλος*, other; *κίνησις*, motion]. Moved or set in motion by external impressions or forces; not autokinetic.

**Allolalia** (*al-o-lal'-le-ah*) [*ἄλλος*, other; *λαλεῖν*, to speak]. Any perversion of the faculty of speech.

**Allolalic** (*al-o-lal'-ik*) [*ἄλλος*, other; *λαλεῖν*, to speak]. Affected with allolalia.

**Allomerism** (*al-on'-er-izm*) [*ἄλλος*, other; *μέρος*, shape]. In chemistry, the property of retaining a constant crystalline form while the chemical constituents present, or their proportions, vary.

**Allomorphism** (*al-o-morf'-izm*) [*ἄλλος*, other; *μορφή*, shape]. The property possessed by certain substances of assuming a different form while remaining unchanged in constitution.

**Allopathy** (*al-op'-a-the*) [*ἄλλος*, other; *πάθος*, affection]. According to Hahnemann, the inventor of the term, that method of the treatment of disease consisting in the use of medicines the action of which upon the body in health produces morbid phenomena different from those of the disease treated. Opposed to homeopathy. It need hardly be said that modern scientific medicine is based upon no such theory, or definition, as that supplied by homeopathy. See *Regular*.

**Allophasia** (*al-off'-as-is*) [*ἄλλος*, other; *οἶσος*, speech]. Incoherency of speech; delirium.

**Allophemy** (*al-off'-e-me*) [*ἄλλος*, other; *οἶμι*, to speak]. See *Heterophemy*.

**Alloplast** (*al'-o-plast*) [*ἄλλος*, other; *πλαστός*, form, mold]. In biology, a plastid composed of several tissues; the opposite of homoplast.

**Allorhythmia** (*al'-o-rith'-m-ah*) [*ἄλλος*, other; *ῥυθμός*, rhythm]. Variation in interval of the pulse. See *Pulse*, *Pulsus*, and *Cardiac Rhythm*.

**Allosematic** (*al-o-sem'-at-ik*) [*ἄλλος*, other; *σημα*, a sign, mark, or significant character]. Applied to coloration which enables an animal to associate itself with some large or dangerous animal.

**Allosteatodes** (*al-o-ste-at-o'-dez*) [*ἄλλος*, other; *στέατος*, fat-like]. Marked by perversion or morbidity of the sebaceous secretion.

**Allotoxin** (*al-o-toks'-in*) [*ἄλλος*, other; *τοξικόν*, poison]. Any substance, produced by tissue metamorphosis within the organism, that tends to shield the body by destroying microbes or toxins that are inimical to it.

**Allotriodontia** (*al-ot-re-o-don'-she-ah*) [*ἄλλότριος*, strange; *ὄδον*, tooth]. 1. The transplanting of teeth from one person to another. 2. The existence of teeth in abnormal situations, as in tumors.

**Allotriocresis** (*al-ot-re-o-ek'-ris-is*) [*ἄλλότριος*, strange; *ἔκκρισις*, excretion]. The discharge or elimination of foreign matters with the excretions.

**Allotriogeusia** (*al-ot-re-o-gu'-se-ah*). Same as *Allotriogeusia*.

**Allotriogeusia** (*al-ot-re-o-gu'-se-ah*) [*ἄλλότριος*, strange; *γεῦσις*, taste]. Perversion of the sense of taste; abnormality of the appetite.

**Allotriolithiasis** (*al-ot-re-o-lith'-as-is*) [*ἄλλότριος*, strange; *λίθος*, a stone]. The formation or existence of a calculus of unusual material, or composed entirely or in part of a foreign body.

**Allotriophagy** (*al-ot-re-off'-a-je*) [*ἄλλότριος*, strange; *φαγεῖν*, to eat]. Depraved or unnatural appetite.

**Allotriotaxis** (*al-ot-re-o-tek'-is*) [*ἄλλότριος*, strange; *τίσις*, birth]. 1. Abnormality in delivery. 2. The birth or delivery of a monstrosity.

**Allotriuria** (*al-ot-re-u'-re-ah*) [*ἄλλότριος*, strange; *οὔρον*, urine]. Abnormality of the urine.

**Allotrope** (*al'-o-trōp*) [*ἄλλος*, different; *τροπή*, a change]. One of the forms in which an element capable of assuming different forms may appear.

**Allotrophic** (*al-o-trof'-ik*) [*ἄλλος*, other; *τροφή*, nourishment]. Having perverted or modified characters as a nutrient.

**Allotropism** (*al-ot-ro-pizm*) [*ἄλλος*, other; *τρόπος*, method]. 1. The term expresses the fact of certain elements existing in two or more conditions with differences of physical properties. Thus carbon illustrates allotropism by existing in the forms of charcoal, plumbago, and the diamond. See *Isomeric*. 2. Appearance in an unusual or abnormal form.

**Allotropy** (*al-ot-ro-pe*). Allotropism.

**Allotrylic** (*al-o-tril'-ik*) [*ἄλλότριος*, foreign; *ἔλη*, principle]. Due to the presence of a foreign principle or material; enthetic. **A. Affections**, morbid states caused by the lodgment of foreign substances in the organism. The foreign substance may be animate or inanimate, organic or inorganic.

**Alloxan** (*al-ok'-an*) [*allantoin*: oxalic],  $C_4H_2N_2O_4$ . The ureid of mesoxalic acid; it is produced by the careful oxidation of uric acid, or alloxantin with nitric acid or chlorin and bromin. It appears in long, shining, rhombic prisms, easily soluble in water, with a very acid reaction, and possessing a disagreeable taste. The solution placed on the skin slowly stains it a purple red. It occurs in the intestinal mucus in cases of diarrhoea.

**Alloxanic Acid** (*al-oks-an'-ik*). See *Acid*.

**Alloxantin** (*al oks-an'-tin*) [*allant in*: oxalic],  $C_4H_2N_2O_4$ . A substance obtained by reducing

alloxan with  $SnCl_2$ , zinc and  $HCl$ , or  $H_2S$  in the cold. It occurs in small, hard, colorless prisms that turn red in air containing ammonia. Its solution has an acid reaction.

**Alloy** (*al'-oi'*) [from the French word *alou*, a contraction of *a la loi*]. 1. A compound of two or more metals by fusion. See *Gold Plate* and *Gold Solder*. 2. The least valuable of two or more metals that are fused together.

**Allozoöid** (*al-o-zo'-oid*) [*ἄλλος*, other; *ζωοίδης*, like an animal]. In zoölogy, a zoöid differing from the organism producing it.

**Allspice** (*awl'-spis*). See *Pimenta*, and *Florida Allspice*.

**Allure** (*al'-ur'*). Synonym of *Influenza*.

**Allyl** (*al'-il*) [*ἄλη*, matter],  $C_3H_5$ . A non-saturated univalent alcohol-radical of the oils obtained from alliaceous plants. It does not exist in the free state.

**A. Alcohol**,  $C_3H_5HO$ , a colorless inflammable liquid, with pungent odor, boiling at  $97^\circ C$ . **A. Aldehyd**,  $C_3H_5O$ , a syn. of *Acrolein*. **A. Cyanid**. See *Sinamin*. **A. Mustard Oil**,  $CS.N.C_3H_5$ , Allyl thiocarbimide. The principal constituent of ordinary mustard oil. It is a liquid not readily dissolved by water; boils at  $150.7^\circ$ ; at  $10^\circ$ , it has a sp. gr. of 1.017; it has a pungent odor and vesicates the skin.

**A. sulphid**,  $(C_3H_5)_2S$ , the essential oil of garlic. **A. thiocarbimide**. See *A. Mustard Oil*.

**A. tribromid**,  $C_3H_5Br_3$ , a colorless liquid used as an antispasmodic. Dose, five drops. Unof.

**Allylamin** (*al-il'-am-in*) [*ἄλη*, matter; *ammonia*],  $NH_2(C_3H_5)$ . Ammonia in which a hydrogen atom is replaced by allyl. It is a sharply caustic mobile liquid.

**Allylin** (*al-il'-in*) [*ἄλη*, matter],  $C_6H_{12}O_3$ . Monoallyl ether, produced by heating glycerol with oxalic acid. It is a thick liquid, boiling at  $225-240^\circ$ .

**Almeciga** (*al-mal'-thig-ah*) [Sp.]. See *Elemi*.

**Almen and Nylander's Test**. See *Tests, Table of*.

**Almen's Tests**. See *Tests, Table of*.

**Almond** (*am'-und*) [M. E., *almonde*]. See *Amygdala*.

**A. Bread**, a variety of bread made from almond flour, for use by diabetics. It is made as follows: Take of blanched sweet almonds a quarter of a pound. Beat them as fine as possible in a stone mortar, remove the sugar by putting in a linen bag and steeping for a quarter of an hour in boiling water acidulated with vinegar; mix this paste thoroughly with three ounces of butter and two eggs. Add the yolks of three eggs and a little salt, and stir well for some time. Whip up the whites of three eggs and stir in. Put the dough thus obtained into greased moulds and dry by a slow fire. **A. of the Ear**, the tonsil. **A. Mixture**. See *Amygdala Mistura*. **A. Oil**, oleum amygdalæ, the fixed oil obtained from both the sweet and the bitter almond. It is odorless, agreeable to the taste, and of a yellow color; sp. gr. .919 at  $15^\circ C$ . It is used in pharmacy and medicine and in soap-making. **A. Oil, Bitter**, Oleum amygdalæ amare. See *Amygdala*. **A. Paste**, a magma of bitter almonds, alcohol, white of egg and rose-water, used to soften the skin and prevent the hands and lips from chapping. **A. of the Throat**, the tonsil.

**Alnuin** (*al'-nu-in*) [Celtic, *al*, near; *lan*, a river-bank]. A precipitate from the tincture of *Alnus rubra*. Said to be alterative and resolvent. Dose gr. ii-x. Unof.

**Alnus** (*al'-nus*) [Celtic, *al*, near; *lan*, a river-bank]. Alder Bark. The bark of the American Alder. *A. serrulata*, contains tannic acid. The decoction of bark and leaves is astringent, and used as a gargle and as a lotion for wounds and ulcers. Dose of powdered bark gr. x.

**Allochias** (*ah-b'-ke-ah*) [*ἄ* priv.; *λόχια*, the lochia]. Absence of the lochia.

**Aloe** (*al'-o*) [*ἄλoη*, the aloe]. The inspissated juice of several species of aloe, of which the *A. socotrina*, *A. barbadensis*, and *A. capensis* are most commonly used. Its properties are due to a glucosid, *aloin*,  $C_{17}H_{14}O_7$ . A tonic astringent, useful in amenorrhœa, chronic constipation, and atonic dyspepsia. It is also an emmenagogue and anthelmintic. Dose gr. j-v. **A. americana**. See *Agave*. **A. Decoct.**, Comp. (B.P.). Dose gr. ss-ij. **A. Enema** (B.P.), aloes, carbonate of potassium; mucilage of starch. **A. et Asafœtida**, Pil., aloes and asafetida aa gr. i  $\frac{1}{4}$ . **A. et Canellæ**, Pulv., contains powdered bark of *Canella alba*. Dose gr. v-xx. **A. et Ferri**, Pil., contains gr. j each of aloes, ferrous sulphate, and aromatic powder, incorporated with confection of roses. **A. et Mastich**, Pil., "Lady Webster's" pill, contains each aloes gr. ij, mastich and red rose gr. ss. **A. et Myrrh**, Pil., contains each aloes gr. ij, myrrh, gr. j, aromatic powder gr. ss, mixed with syrup. **A. et Myrrh, Tinct.**, aloes 10, myrrh 10, alcohol 100 parts. Dose  $\frac{3}{4}$  ss- $\frac{3}{4}$  j. **A. Ext. Aquosum**, prepared by mixing 1 with 10 parts boiling water, straining and evaporating. Dose gr. ss-v. **A. Pil.**, aloes and soap aa gr. ij. **A. Purificata**, the common drug purified by solution in alcohol and evaporation. Dose gr. j-v. **A. Socotrin**, Pil. (B. P.), contains socotrin, aloes, hard soap, oil of nutmeg and confection of roses. Dose gr. v-x. **A. Tinct.**, consists of aloes 10, glycyrrhiza 10, dil. alcohol 100 parts. Dose  $\frac{3}{4}$  ss- $\frac{3}{4}$  j. **A. Vin.**, has aloes 6, cardamon 1, ginger 1, str. white wine 100 parts. Dose  $\frac{3}{4}$  j- $\frac{3}{4}$  iv.

**Aloedary** (*al'-o-ed-a-re*) [*ἀλoηδάριον*, aloedarium]. A compound aloetic purgative medicine.

**Aloeretin** (*al-o-e-re'-tin*) [*ἄλoη*, aloes; *ῥητινη*, resin]. A brown resin contained in aloes.

**Aloes** (*al'-oz*). See *Aloe*. **A. Caballine** [*caballus*, a horse]. Coarse aloes, used in veterinary medicine. **A. Hepatic**, dark liver-colored aloes, mostly Socotrine or Barbadian. **A. Lign.** See *Agallochum*.

**Aloes-wood** (*al'-oz-wood*). See *Agallochum*, and *Aquilaria*.

**Aloetic** (*al-o-et'-ik*) [*ἄλoη*, the aloe]. Containing or pertaining to aloes.

**Aloetin** (*al-o-e'-tin*) [*ἄλoη*, the aloe; *ῥητινη*, resin]. 1. Aloeretin. 2. A yellow crystalline principle obtainable from aloes; aloeretic acid.

**Alogia** (*ah-lo'-je-ah*) [*ἄ* priv.; *λόγος*, word, reason]. 1. Inability to speak, due to some psychical defect. 2. Stupid or senseless behavior.

**Alogotrophy** (*al-o-got'-ro-fe*) [*ἄλογος*, strange, absurd; *τροφή*, nutrition]. Irregular and perverted nutrition, leading to deformity.

**Aloin** (*al'-o-in*) [*ἄλoη*, the aloe]. A bitter principle found in aloes. It forms fine needles, possesses a very bitter taste, and acts as a strong purgative. Several glucosids of this name are described; as *Barbaloin*, *Nataloin*, *Zavaloin*, *Socaloin*, *q. v.*

**Alonette's Operation**. See *Operations*, Table of.

**Alonsenel** (*al-on-sen-el'*) [Fr.]. A variety of the *Cowania mexicana*, a tall, rosaceous shrub of Mexico and the Rocky Mountain region. It is also called Cowan Plant and Cliff-rose. It is locally valued as a styptic and astringent. Unof.

**Alopecia** (*al-o-pe'-se-ah*) [*ἄλωπηξ*, a fox]. Baldness; Calvities; a term employed to designate the forms of baldness occurring in any disease as a symptom of the latter, or occurring as a purely local affection of the follicles in which the pilary filaments are lodged. It may be universal or partial, congenital or acquired, physiological or pathological, symmetrical or asymmetrical. It follows a large number of systemic

affections. **A. adnata**. See *A.*, *Congenital*. **A. areata**; *Area celsi*; *Tinea decalvans*; *Porrigo decalvans*; *Alopecia circumscripta*; that condition in which suddenly or slowly one or several, usually asymmetrically distributed, patches of baldness appear upon the hairy regions of the body, more often upon the scalp and parts covered by the beard. The patches vary in size from a pin-head to an involvement of the entire surface from the coalescing of many patches. The disease may be produced by traumatism of the head, nervous shock, neurasthenia, ringworm of the scalp and syphilis. **A. circumscripta**. See *A. areata*. **A.**, *Congenital*, a rare form, seldom complete, due to absence of hair-bulbs. **A. furfuracea**; *Alopecia pityroides capillitii*; *Pityriasis capitis*; *Schorrhea capillitii*; *Pityriasis simplex*; *Dandruff*; a form of baldness associated with a disorder of the scalp marked by hyperemia, itching, and exfoliation of dry or fatty scales from its surface. It may be acute or chronic, and produce a dryness, brittleness, and lack of luster in the hair. **A. localis**; *A. neuritica*; that form occurring in one or more patches at the site of an injury, or in the course of a recognizable nerve. **A. neuritica**. See *A. localis*. **A. neurotica**, a name given to baldness of tropho-neurotic origin. **A. orbicularis**. Same as *A. circumscripta*. **A. pityroides capillitii**. See *A. furfuracea*. **A. pityroides universalis**, a rapid and general denudation of hair occurring in debilitated states, preceded by abundant desquamation of fatty scales. The skin is rather firmer and stiffer than normal. **A. senilis**; *Senile Calvities*; that occurring in old age from atrophy and sclerosis of the scalp. **A. simplex**, the idiopathic premature baldness of young adults. Most common in males. Often associated with premature grayness. **A. syphilitica**, that due to syphilis. **A. universalis**, that in which there is a general falling out of the hairs of the body.

**Alopecist** (*al-o-pe'-sist*) [*ἄλωπηξ*, a fox]. One who makes a specialty of the treatment of baldness.

**Alopecoid** (*al-o-pe'-koid*) [*ἄλωπηξ*, a fox; *ειδως*, form]. Resembling a fox; vulpine.

**Alouchi** (*al-oo'-chi*). See *Acuchi*.

**Alouette's Amputation**. See *Operations*, Table of.

**Aloxanthin** (*al-oks-an'-thin*).  $C_{15}H_{10}O_6$ . A yellow substance obtained from barbaloin and socaloin by the action of bichromate of potassium.

**Alpestrine** (*al-pe'-trin*) [*alpestris*, alpine]. Peculiar to mountain districts, as alpestrine diseases.

**Alpha** (*al'-fah*) [*ἄλφα*, the first letter of the alphabet]. The Greek letter  $\alpha$ , used in combination with many chemical terms to indicate the first of a series. **A. Angle**. See *Angle*. **A.-dextrin**. Same as *Erythro-dextrin*. **A. Kava Resin**. See *Lecwinin*. **A.-naphthol**. See *Naphthol*. **A.-naphthol Test**. See *Tests*, Table of. **A.-oxynaphthoic Acid**. See *Acid*, *Alpha-oxynaphthoic*.

**Alphenic** (*al-fen'-ik*) [Fr., *Alphénic*]. White barley sugar.

**Alphonsin** (*al-fon'-sin*). See *Alfousin*.

**Alphos** (*al'-fos*) [*ἄλφος*, vitiligo]. 1. An old name for leprosy. 2. Psoriasis. 3. A term vaguely applied to various skin diseases. See *Psoriasis*.

**Alphosis** (*al-fō'-sis*) [*ἄλφος*, vitiligo]. Albinism; leucoderma.

**Alpinia** (*al-pin'-e-ah*) [*Alpinus*, Italian botanist of the sixteenth century]. A genus of zingiberaceous tropical plants. *A. officinarum*, *A. chinensis*, and other species furnish Galangal, *q. v.* Still other species are medicinal. Unof.

**Alsace Gum** (*al-sās'-gum*). See *Dextrin*.

**Alstonidin** (*al-ston'id-in*) [*Alston*, a Scotch botanist]. An amorphous substance contained in a variety of Dita bark.

**Alstonin** (*al'-sto-nin*) [*Alston*, a Scotch botanist]. 1. An amorphous substance contained in a variety of Dita bark. 2. A crystalline alkaloid,  $C_{21}H_{20}N_2O_4$ , obtained from *Alstonia Constricta*.

**Alter** (*awl'-ter*) [*L.*, "other"]. To castrate, or spay.

**Alterant** (*awl'-ter-ant*). Same as *Alterative*.

**Alteration** (*awl'-ter-a'-shun*) [*alterare*, to make other]. A change, as of form. **A. Theory**. See *Difference Theory*.

**Alterative** (*awl'-ter-a-tiv*) [*alter*, another]. A medicine that alters the processes of nutrition and excretion, restoring, in some unknown way, and without sensible evacuation, the normal functions of an organ or of the system. It seems to be a necessary or convenient term covering our ignorance of the *modus operandi* of certain medicines, as mercury, iodine, etc. **A., Compound**, a domestic remedy consisting of bamboo, brier-root, stillingia, burdock-root, and poke-root, aa fld. ext.  $\frac{3}{4}$ ij, prickly-ash bark fld. ext.  $\frac{3}{4}$ j. Recommended by Sims in scrofulous affections. Dose  $\frac{3}{4}$ j-ij.

**Alternate** (*awl'-ter-nat*) [*alternare*, to do by turns]. In botany, applied to that form of leaf-arrangement in which only one leaf occurs at a node. **A. Generation**. See *Alternation of Generations*.

**Alternating** (*awl'-ter-nat-ing*) [*alternare*, to do by turns]. Occurring successively. **A. Insanity**, a form of insanity in which there are regular cycles of exaltation and depression.

**Alternation** (*awl'-ter-na'-shun*) [*alternare*, to do by turns]. Repeated transition from one state to another. **A. of Generations**. 1. In biology, a generative cycle in which the young do not resemble the parent, but like forms are separated by one or more unlike generations. 2. That form of reproduction in which some of the members of the cycle can produce new beings non-sexually, while in the final stage reproduction is always sexual. Tenia or tapeworm, is an example. The segments, *Proglottides*, are hermaphrodite, and are evacuated with the feces. From the egg, fertilized after it is shed, is developed the embryo, that is swallowed by another animal, in whose tissues it forms an encysted stage (*Cysticercus*, *Cœnurus*, or *Echinococcus*). To undergo further development the cysticercus must find another host, where it forms new segments.

**Althaus's Oil**. A modification of Lang's Oil. It is made as follows: Metallic mercury 1 part, pure lanolin 4 parts, 2 per cent. carbolic oil 5 parts. It forms a homogeneous gray cream that has no tendency to decomposition. It is used in the treatment of syphilis in injections of m.v. at a dose.

**Althea** or **Althæa** (*al-the'-ah*) [*L.*]. Marsh-mallow. The peeled root of *A. officinalis*, a plant of the mallow family. It consists of about one-third of vegetable mucus and starch, together with the alkaloids *Asparagin* and *Althein* (latterly regarded as identical). Its decoction is employed as a mucilaginous drink. **A. syrapi** contains four per cent. althea. Dose indefinite. *Asparagin* possesses sedative and diuretic properties, and is useful in ascites and gout. Dose gr. ij-ijj.

**Althein** (*al-the'-in*). See *Althea*.

**Alticomous** (*al-tik'-o-mus*) [*altus*, high; *coma*, head of hair, foliage]. In biology, leafy at or near the summit only.

**Altitude** (*al'-te-tud*) [*altitudo*, height]. The height, as of an individual. In climatology, the elevation of a place above the sea-level. **A. staff**, a device em-

ployed for measuring the exact height of recruits. It consists of a rigid upright with a vertex-bar moving without play at right angles to the upright.

**Altricious** (*al-trish'-us*) [*altrix*, a nurse]. Requiring a long nursing; hence, slow of development (the reverse of precocious).

**Aluchi** (*al-ol'-chi*). See *Acuchi*.

**Aludel** (*al'-u-del*) [*Arab.*, *al*, the; *uthal*, utensil]. In chemistry, a pear-shaped glass or earthen vessel used in sublimation.

**Alum** (*al'-um*) [*alumen*, alum]. Any one of a class of double sulphates formed by the union of one of the sulphates of certain non-alkaline metals with a sulphate of some alkaline metal. The standard (or common commercial) alum, the official *Alumen*, U. S. P., is the aluminium-potassium sulphate,  $Al_2(SO_4)_3 + K_2SO_4 + 24H_2O$ . It is a powerful astringent and styptic in medicine, and is extensively used in the arts. It is employed by bakers to whiten their bread, but the effect upon the system is probably injurious. Ordinary **A. Ammoniac** is the same as the above, except that the potassium is replaced by ammonium. It is official in Great Britain, and is extensively used on account of its cheapness. What is known as *concentrated* or *patent* alum, is the normal aluminium sulphate (*aluminii sulphas*) which is not a true alum. **A. Ammonio-ferric** (*Ferri et Ammonii sulphas*), U. S. P., is strongly styptic, and is useful in leucorrhea. Dose gr. v-x. **A. Potassio-ferric** is extremely similar to the *A. ammonio-ferric*. (For *A. Rubidium*, see *Rubidium*). **A. Sodæ**, double sulphate of sodium and aluminium, is too soluble for ordinary uses. The other alums are very numerous, but they are of little interest to the physician. **A. Whey**, a preparation obtained by boiling  $\frac{3}{4}$ ij of alum in a pint of milk, and straining. It is used as an astringent and internal hemostatic, in wineglassful doses.

**Alumen** (*al-u'-men*) [*L.*, *gen.*, *Aluminis*]. See *Alum*. **A. exsiccatum**, burnt or dehydrated alum.

**Alumina** (*al-u'-min-ah*) [*L.*]. Sesquioxide of aluminium; the principal ingredient of clay, and of many stones, earths and minerals.

**Aluminate** (*al-u'-min-ât*) [*alumina*]. A basic salt of alumina.

**Aluminated Copper**. See *Lapis divinus*.

**Aluminiferous** (*al-u'-min-if'-er-us*) [*alumen*, alum; *ferre*, to form]. Yielding alum.

**Aluminium** (*al-u'-min'-e-um*) [*L.*].  $Al = 27$ . Quantivalence II, IV. A silver white metal distinguished by its low sp. gr., about 2.6. **A. hydrate**,  $Al_2(HO)_6$ , a tasteless white powder, feebly astringent. Dose gr. ij-xx. **A. and Potassium sulphate**,  $K_2Al_2(SO_4)_4$  (*Alum. q. v.*), a valuable astringent used in catarrh, leucorrhea, gonorrhœa. Dose gr. x-xx. In teaspoonful doses, an emetic. **A. sulphate**,  $Al_2(SO_4)_3$ , an antiseptic and astringent used as a lotion in 5 per cent. solution. **A. acetate**, unof.; a disinfectant. **A. acetotartrate**, unof.; a disinfectant.

**Aluminosis** (*al-u'-min-o'-sis*) [*aluminium*]. A pulmonary disease common among workers in aluminium; the dust collects within the lung tissue.

**Alumol** (*al-um'-ol*) [*aluminium*]. An astringent and antiseptic "sulphur combination of aluminium." Useful in gonorrhœa, endometritis, ear, nose and skin diseases, etc. Used in the main externally. Unof.

**Alum Root**. The root of *Heuchera americana*. Properties due to gallic and tannic acids. It is very astringent. Dose of the fld. ext. gtt. x-xx. Also the root of *Geranium maculatum*, a mild and safe astringent. See *Geranium*. Unof.

**Alusia** (*al-u'-ze-ah*) [*âbrev*, to wander]. Hallucination; morbid state of mind.

**Alutaceous** (*al-u-ta'-she-us*) [*aluta*, soft leather]. In botany, of a pale brown color, like untanned leather.

**Alvearium** (*al-ve-a'-re-um*) [L.]. The external auditory canal or meatus.

**Alveloz** (*al-vel-oth'*) [Sp.]. An extractive from *Euphorbia icterodoxa*, having diuretic properties. It is highly recommended as a topical application in cancer. Unof.

**Alveolar** (*al-ve'-o-lar*) [*alveolus*, a small hollow]. Pertaining to the alveoli or sockets of the teeth. **A. Abscess**, a gum-boil. **A. Arch**, the alveolar surface of the jaw. **A. Artery**, a branch of the internal maxillary. **A. Border**, the face margin of the jaws. **A. Cancer**. See *Cancer*. **A. Index**, in craniometry, the gnathic index; the ratio of the distance between the basion and alveolar point, to the distance between the basion and the nasal point, multiplied by 100. (Sometimes the basilar index is called the alveolar index.) See *Index* and *Cranimetrical Points*. **A. Point**. See *Cranimetrical Points*. **A. Process**, the border of the superior maxilla in which the alveoli are placed. **A. Sarcoma**. See *Sarcoma*.

**Alveolarium** (*al-ve-o-la'-re-um*) [*alveus*, a bee-hive]. A name sometimes applied to the external meatus of the ear. It is so called because the wax of the ear gathers in that place.

**Alveolate** (*al-ve'-o-lat*, or *al'-ve-o-lat*) [*alveolatus*, hollowed out like a little tray]. In biology, pitted, honey-combed.

**Alveoli** (*al-ve'-o-li*). Genitive and plural of *Alveolus*.

**Alveolitis** (*al-ve-o-li'-tis*) [*alveolus*, a hollow; *itis*, inflammation]. Inflammation of the alveolus of a tooth.

**Alveolo-condylean** (*al-ve'-o-lo-kon-dil'-e-an*) [*alveolus*, a hollow; *κόνδυλος*, a knuckle]. In craniometry, pertaining to the alveolus and condyle. **A. Plane**. See *Plane*.

**Alveo'o-dental** (*al-ve'-o-lo-den'-tal*) [*alveolus*, a hollow; *dens, dentis*, a tooth]. Pertaining to the teeth and their sockets.

**Alveolo-labialis** (*al-ve'-o-lo-lab-e-a'-lis*) [*alveolus*, a hollow; *labium*, the lip]. The buccinator muscle.

**Alveolo-subnasal** (*al-ve'-o-lo-sub-na'-sal*) [*alveolus*, a hollow; *sub*, under; *nasus*, nose]. In biology, pertaining to the alveolar and subnasal points of the skull. **A. Prognathism**. See *Prognathism*.

**Alveolus** (*al-ve'-o-lus*) [L.; *pl.* *Alveoli*]. The bony socket of a tooth. **A. of Glands**, the ultimate sacs of a racemose gland. **A. of the Lungs**, are the air cells. **A. of the Stomach**, or the *alveolar structures*, are depressions, like honeycomb cells, found in the stomach, intestines and esophagus.

**Alvergnat's Pump**. An instrument used in estimating the gaseous constituents of the blood.

**Alveus** (*al'-ve-us*) [*alveus*, a trough]. A trough, tube, or canal; applied to ducts and vessels of the body. **A. communis**, the utricle of the ear. **A. hippocampi**, a certain structure in the cerebral hemisphere investing the convexity of the hippocampus major.

**Alviduca** (*al-ve-du'-ka*) [*alvus*, the belly; *ducere* to lead]. Laxative or cathartic medicines.

**Alvifluxus** (*al-ve-fluks'-us*) [*alvus*, the belly; *fluxus*, a flow]. A free alvine discharge; a diarrhea. **A. Torminosus**. A synonym of *Dysentery*.

**Alvine** (*al'-vin* or *-vini*) [*alvinus*; *alvus*, belly]. Pertaining to the belly. **A. Concretion**, an intestinal calculus. **A. Dejections**, the feces. **A. Discharges**, the feces. **A. Obstruction**. Synonym of *Constipation*.

**Alvus** (*al'-vus*) [L.]. The belly, or its contained viscera.

**Alymphia** (*ah-limf'-e-ah*) [*à priv.*; *lymphā*, clear water]. A deficiency of lymph.

**Alysm**, or **Alysmus** (*al'-izm*, or *al-iz'-mus*) [*ἀλυσμός*, a wandering]. Disquietude; restlessness; mental disquiet; sadness; anxiety.

**Amadelphous** (*am-ad-el'-fus*) [*ἀμα*, together; *ἀδελφός*, brother]. In zoölogy, gregarious.

**Amadou** (*am'-a-doo*) [Fr., *amadouer*, to coax]. German tinder or touchwood; *Boletus ignarius*, a fungus found on old tree-trunks, used to stanch local hemorrhage, as a dressing of wounds, etc.

**Amalgam** (*am-al'-gam*) [*μάζαμα*, a soft mass]. A combination of mercury with any other metal. See *Copper Amalgam*. **A. Carrier and Plugger**, an instrument designed for carrying and introducing amalgam into the cavity of a tooth. **A. Manipulator**, an instrument used by dentists for preparing amalgam fillings.

**Amalgamation** (*am-al-gam-a'-shun*) [*μάζαμα*, a soft mass]. In metallurgy, the process of combining mercury with some other metal, as practiced in separating silver and gold from some other ores.

**Malic Acid** (*am-al'-ik*). See *Acid*.

**Amandin** (*am-an'-din*) [Fr., *amande*, almond]. A proteid contained in sweet almonds.

**Amandine** (*am-an'-din*) [Fr., *amande*, almond]. A kind of cold cream or almond paste.

**Amanitin** (*am-an'-it-in*) [*ἀμανίται*, a kind of fungus]. 1. A principle identical with cholin, obtained from the fly agaric. 2. A poisonous glucosid obtainable from various species of agaric.

**Amara** (*am-a'-ra*) [*amarus*, bitter]. Bitters.

**Amaranthus spinosa** (*am-ar-an'-thus spi-no'-sah*) [L.]. The fresh root of the shrub is used in India as a specific in gonorrhea. An emollient and diuretic. Dose indefinite. Unof.

**Amarin** (*am-a'-rin*) [*amarus*, bitter],  $C_{21}H_{15}N_2$ . Triphenyl dihydroglyoxalin, results from boiling hydrobenzamid with caustic potash. It crystallizes from alcohol and ether in prisms, melting at  $113^{\circ}$ . It exerts a poisonous effect on animals.

**Amarone** (*am-ar-on'*) [*amarus*, bitter],  $C_{16}H_{11}N$ . A crystalline substance produced by the dry distillation of hydrobenzamid and other substances.

**Amarthritis** (*am-ar-thri'-tis*) [*ἀμα*, together; *ἄρθρον*, a joint; *itis*, inflammation]. Arthritis affecting many, or several joints at once.

**Amasesis** (*ah-mas-e'-sis*) [*à priv.*; *μᾶσησις*, chewing]. Inability to chew the food.

**Amassette** (*am-as-et'*) [Fr.]. A kind of spatula, often of horn, used in color-grinding and in pharmacy.

**Amasthenic** (*am-as-the'n-ik*) [*ἀμα*, together; *σθένος*, strength]. Uniting the chemical ray of light in a focus, as a lens.

**Amastia** (*ah-mas'-te-ah*) [*à priv.*; *μαστός*, breast]. The condition of being without mammae or nipples.

**Amativeness** (*am'-at-iv-nes*) [*amare*, to love]. The sexual passion.

**Amatory** (*am'-at-o-re*) [*amator*, a lover]. Pertaining to love. **A. Fever**, love-sickness; chlorosis. **A. Muscles**, the oblique muscles of the eye, used in ogling.

**Amaurosis** (*am-aw-ro'-sis*) [*ἀμαυρόειν*, to darken]. A term that, from its vagueness, is happily becoming disused, signifying partial or total loss of vision. When partial, the word *amblyopia* is now used; when complete, *blindness*. The word is still sometimes used to express blindness when the cause is unknown or doubtful. **A. Albuminuric**, that due to renal disease. **A. Cerebral**, that due to atrophy of the optic nerve. **A. Congenital**, that form existing from birth. **A. Diabetic**, that associated with diabetes. **A. Hysterical**, that associated with hysteria, usually in the female. **A. Reflex**, that resulting from

a reflex action upon the optic nerve following some remote source of irritation. **A. Saburral**, sudden temporary blindness occurring in an attack of acute gastritis. **A. Uremic**, that due to an acute attack, or an exacerbation of a chronic form of nephritis.

**Amaurotic** (*am-aw'-rot'-ik*) [ἀμαυρωτός, to darken]. Relating to, or affected with amaurosis. **A. Cats-eye**, a light-reflex through the pupil in suppurative choroiditis.

**Amaxophobia** (*am-aks-o fo'-be-ah*) [ἄμαξα, a car; φόβος, fear]. Morbid dread of being in, or riding upon, a car or wagon.

**Amazia** (*ah-ma'-ze-ah*) [ἄ μαστός, the breast]. Congenital absence of the mammary gland. See *Amastia*.

**Amber** (*am'-ber*). See *Succinum*.

**Ambergris** (*am'-ber-gris*) [*amber*; Fr. *gris*, gray]. A substance excreted by the sperm whale, *Physeter macrocephalus*. It is not known whether it is a pathological product or not. It exhales a fragrant, musky odor when warmed, and is used in adynamic fevers, chronic catarrh, and nervous diseases. Dose, gr. j-ij. Unof. See *Ambrein*.

**Ambidexter** (*am-be-deks'-ter*) [*ambo*, both; *dexter*, the right hand]. An ambidextrous person.

**Ambidextrous** (*am-be-deks'-trus*) [*ambo*, both; *dexter*, the right hand]. Able to use both hands equally well.

**Ambigenous** (*am-bij'-en-us*) [*ambi*, both; *genus*, born]. In biology, having a perianth with parts resembling sepals and petals.

**Ambiparous** (*am-bip'-ar-us*) [*ambi*, on both sides; *parere*, to produce]. In biology, producing both kinds; as a bud that produces both leaves and flower.

**Ambloma** (*am-blo'-mah*) [ἀμβλωμα, an abortion; *pl.*, *Amblomata*]. An amblosis or abortion; an aborted fetus.

**Amblosis** (*am-blo'-sis*) [ἀμβλωσις, an abortion]. An abortion.

**Amblotridium** (*am-blo-thrid'-e-um*) [ἀμβλωτρίδιον, an aborted fetus; *pl.*, *Amblotridia*]. 1. An aborted fetus. 2. An abortifacient drug or agent.

**Amblotic** (*am-blot'-ik*) [ἀμβλωτικός. See *Amblosis*]. Abortifacient.

**Amblyaphia** (*am-ble-a'-fe-ah*) [ἀμβλῆς, dull; ἄψῃ, touch]. Dullness of the sense of touch.

**Amblyocarpous** (*am-ble-o-kar'-pus*) [ἀμβλῆς, blunt, dulled; καρπός, fruit]. In botany, possessing abortive seeds.

**Amblyopia** (*am-ble-o'-pe-ah*) [ἀμβλῆς, dulled; ὤψ, eye]. Subnormal acuteness of vision, due neither to dioptric abnormalism nor to visible organic lesion. It may be *congenital*; from the use of tobacco (*A. nicotinic*), or alcohol, or other toxic influences; from *traumatism*; or it may be *hysterical*. *Nyctalopia* or day-blindness, and *hemeralopia* or night-blindness, are other forms; it may arise from *entoptic phenomena*, such as *muscae volitantes*, *micropsia*, *megalopsia*, *metamorphopsia*, etc. It may take the form of *contracted fields of vision*, of *color-blindness*, or *anesthesia of the retina*. **A. exanopsia**, amblyopia from disuse, or from non-use; argamblyopia is a preferable term. **A. post-marital**, *A.* due to sexual excess, called *Burns's Amaurosis*.

**Amblyopiatrics** (*am-ble-o-pe-at'-riks*) [amblyopia; ἱατρική, belonging to medicine]. The therapeutics of amblyopia.

**Ambolic** (*am-bol'-ik*) [ἀμβολῆ, a putting off]. Causing abortion; abortifacient.

**Ambon** (*am'-bon*) [ἄμβων, the lip of a cup]. The fibrocartilaginous ring that surrounds a socket in which the head of a large bone is received, such as the acetabulum, or the glenoid cavity.

**Ambos** (*am'-bos*) [Ger.]. The incus, or anvil bone.

**Ambosexual** (*am-bo-seks'-us*) [*ambo*, both; *sevus*, sex]. Hermaphroditic.

**Amboyna Button** (*am-boi'-nah but'-un*). See *Frambesia*.

**Ambra Grisea** (*am'-brah gris'-e-ah*). Synonym of *Ambegris*.

**Ambrein** (*am'-bre-in*) [Fr., *Ambre*]. A substance much resembling cholesterol; it is obtained from ambergris by digestion in hot alcohol.

**Ambrette** (*am-bret'*) [Fr.]. The seed of *Abelmoschus moschatus*, *q. v.*; musk-seed. Used in perfumery, and formerly prescribed as a substitute for musk. Unof.

**Ambrosia** (*am-bro'-zhe-ah*) [ἄμβροσία, the food of the gods]. A genus of coarse composite-flowered herbs. *A. artemisiifolia*, common hog-weed of North America; is stimulant, tonic, antiperiodic, and astringent. *A. trifida*, of the United States, has similar properties. The pollen of these plants is by some regarded as a cause of hay-fever. Unof.

**Ambulacral** (*am-bu-lat'-kral*) [ambulacrum, a walk, alley]. In biology, related to an ambulacrum.

**Ambulacrum** (*am-bu-lat'-krum*) [ambulacrum, a walk, alley; *pl.*, *Ambulacra*]. In biology, one of the radiating series of perforations in the shell of an echinoderm.

**Ambulance** (*am'-bu-lans*) [ambulare, to walk about]. In Europe the term is applied to the surgical staff and arrangements of an army in service. In the United States the word is restricted to a vehicle for the transference of the sick or wounded from one place to another.

**Ambulatory** (*am'-bu-lat-o-re*) [ambulare, to walk about]. Relating to walking. **A. Blister**, a blister that changes its location. **A. Clinic**, a clinic for patients that can walk. **A. Erysipelas**, erysipelas that shifts from place to place. **A. Tumor**, a pseudo-tumor. **A. Typhoid**, walking typhoid; enteric fever in which the patient does not, or will not take to his bed.

**Ambulo** (*am'-bu-lo*) [ambulare, to walk about]. A pseudo-tumor of the abdomen; a painful and shifting abdominal distention due to flatulence.

**Ambury** (*am'-ber-e*). See *Anbury*.

**Ambustion** (*am-bus'-chun*) [ambustio, a burn]. A burn or scald.

**Ameba** or **Amœba** (*am-e'-bah*) [ἄμειβη, a change]. A colorless, single-celled, jelly-like protoplasmic organism found in sea and fresh waters, constantly undergoing changes of form, and nourishing itself by surrounding objects. The white corpuscles of the blood perform *ameboid movements*, i. e., changes of form, consisting of protrusions and withdrawals of substance. *A. buccalis* and *A. dentalis* (perhaps identical species) have been found upon human teeth. *A. coli*, ameba of dysentery. *A. uro-genitalis*, has been observed in urine and in vaginal secretions.

**Ameban** (*am-e'-ban*) [ἄμειβη, a change]. 1. Of the nature of or pertaining to an ameba. 2. Any organism that may be classed as an ameba.

**Amebic** (*am-e'-bik*) [ἄμειβη, a change]. Pertaining to or characterized by amebæ.

**Amebicidal** (*am-e-bis-id'-dal*). See *Amebicide*.

**Amebicide** (*am-e'-bis-id*) [ἄμειβη, a change; cedere, to kill]. 1. Destructive of amebæ. 2. A remedy that destroys amebæ.

**Amebodont** (*am-e'-bo-dont*) [ἄμειβη, change; ὄδοντ, a tooth]. In biology, pertaining to molar teeth in which the ridges or crests are alternate; the opposite of antiodont.

**Ameboid** (*am-e'-boid*) [ἄμειβη, a change]. Resembling an ameba in form or in changes; used of white blood-cells, etc.

**Amel** (*am'-el*) [Anglo-French, *amal*, enamel]. An old name for *Enamel*.

**Amelectic** (*am-el-ek'-tik*). Affected with ameleia; apathetic.

**Amcleia** (*am-el-i'-ah*) [*ἀμύλεια*, indifference]. Morbid apathy; indifference.

**Amelia** (*ah-me'-le-ah*) [*ἀ priv.*; *μήλος*, a limb]. Absence of the limbs from arrested development, or atrophy.

**Amelification** (*am-el-if-ik-a'-shun*) [M. E., *amell*: *facere*, to make]. The formation of the enamel of the teeth by means of the enamel cells—ameloblasts.

**Amelioration** (*am-el-yo-ra'-shun*) [*ad*, to; *melior*, better]. Improvement or amendment, as in symptoms.

**Ameliorative** (*am-el'-yo-ra-tiv*) [*ad*, to; *melior*, better]. Tending to produce an amendment of symptoms.

**Ameloblast** (*am-el'-o-blast*) [Anglo-French, *amal*, enamel; *βλαστός*, a germ]. In biology, an enamel-cell, one of the cylinder cells covering the papilla of the enamel organ, and forming a beautifully regular epithelial layer that produces the enamel, the *Membrana adamantina* of Raschkow.

**Amelus** (*am'-el-us*) [*ἀ priv.*; *μήλος*, a limb]. A monstrosity without limbs.

**Amendment** (*am-end'-ment*) [M. E., *amendement*]. Improvement or recovery of health, more or less complete.

**Amenia** (*ah-me'-ne-ah*). See *Amenorrhea*.

**Amenomania** (*am-en-o-ma'-ne-ah*) [*amanus*, agreeable; *mania*, madness]. A mild form of mania in which the symptoms are manifested under the form of gayety, fondness of dress, exaggeration of social condition, etc.; a cheerful, or joyous delirium; a morbid elevation of the spirits.

**Amenorrhea** (*ah-men-o-re'-ah*) [*ἀ priv.*; *μήν*, month; *ῥέω*, to flow]. Absence, irregularity, or suppression of menstruation when it should normally be present. The secretion may be retained, the result of congenital or acquired atresia of some part of the lower genital tract; or it may not take place in consequence of an imperfect development of the ovaries or uterus; or it may be suppressed because of some form of constitutional disease, especially anemia. **Primitive**, is a term applied to those cases in which the catamenia have not appeared at the proper time, and **Secondary**, to those in which the discharge has been arrested after it has existed during the reproductive period of life.

**Amenorrheal** (*ah-men-o-re'-al*) [*ἀ priv.*; *μήν*, month; *ῥέω*, to flow]. Pertaining to amenorrhea.

**Ament** (*a'-ment*) [*ab*, from; *mens*, *mentis*, the mind]. A person affected with amentia; an idiot.

**Ament or Amentum** (*am'-ent*, *am-ent'-um*) [*amen'tum*, a strap or thong]. In biology, a scaly spike or catkin.

**Amentaceous** (*am-en-ta'-she-us*) [*amentum*, a strap or thong]. In biology, related in some way to an ament.

**Amentia** (*ah-men'-she-ah*) [*ἀ priv.*; *mens*, mind]. Defective intellect; a vague term synonymous with idiocy or imbecility.

**Amentum** (*am-ent'-um*). See *Ament*.

**Amenty** (*ah-men'-te*) [*ἀ priv.*; *mens*, mind]. Amentia.

**American** (*am-er'-ik-an*) [*America*]. Peculiar, or belonging, to America. **A. Aloe**. See *Agave americana*. **A. Catarrh**, a synonym for chronic post-nasal catarrh. **A. Centaury**, the herb *Sabbatia angularis*, employed as a substitute for gentian. **A. Columbo**, the root of *Frasera carolinensis*. Tonic, aperient; in large doses, purgative. Dose of the fld. ext.  $\mathfrak{m}\text{xx}-\mathfrak{z}\mathfrak{j}$ . *Fraserin*, a concentrated extract. Dose gr.  $\text{ij}-\text{ijj}$ . Unof. **A. Hellebore**. See *Veratrum viride*. **A. Ipecac**. See *Gillenia*. **A. Ivy**, the twigs and bark of *Ampelopsis quinquefolia*. Alternative,

tonic, astringent, and expectorant. Dose of the fld. ext.  $\mathfrak{m}\text{xxx}-\mathfrak{z}\mathfrak{j}$ . *Ampelopsin*, the concentrated ext. Dose gr.  $\text{ij}-\text{iv}$ . Unof. **A. Saffron**. See *Carthamus*. **A. Senna**. See *Senna*. **A. Spikenard**, the rhizome of *Aralia racemosa*. Aromatic, diuretic and alterative. Used in rheumatism, dropsy, and scrofulous affections. Dose of the decoction indefinite. Unof. **A. Swiss Food**, a variety of infant milk food with the following composition: Water 5.68, fat 6.81, grape-sugar and milk-sugar 5.78, cane-sugar 30.43, starch 30.85, soluble carbohydrates 45.35, albuminoids 10.54, ash 1.21. **A. Valerian**. See *Cypripedium*. **A. Wormseed**. See *Chenopodium*.

**Amertume** (*am-ar-tum'*) [Fr.]. A disease of wine, characterized by bitterness, and caused by a specific bacillus.

**Ametabolic** (*ah-met-ab-ol'-ik*) [*ἀ priv.*; *μεταβολός*, changeable]. Not due to, or causing, or undergoing, metabolism.

**Ametria** (*ah-met'-re-ah*) [*ἀ priv.*; *μήτρα*, womb]. Absence of the uterus.

**Ametrometer** (*ah-met-rom'-et-er*) [*ἀ priv.*; *μέτρον*, a measure; *ὄψις*, sight]. An instrument for measuring ametropia.

**Ametropia** (*ah-met-ro'-pe-ah*) [*ἀ priv.*; *μέτρον*, a measure; *ὄψις*, sight]. Ametropia exists when an imperfect image is formed upon the retina, due to defective refractive power of the media, or to abnormalities of form of the eye. In *myopia* the antero-posterior diameter is too great, or the power of the refractive media is too great; *hypermetropia* (or *hyperopia*) is the exact reverse of the last; *astigmatism* is due to imperfect curvature of the cornea, or of the retina, or to inequality of refracting power in different parts of the lens; *presbyopia* is due to inelasticity of the lens, producing insufficient accommodation; *aphakia*, or absence of the lens, produces both insufficient refracting power and loss of accommodation.

**Ametropic** (*ah-met-rop'-ik*) [*ἀ priv.*; *μέτρον*, a measure; *ὄψις*, sight]. Affected with or pertaining to ametropia.

**Amianthium** (*am-e-an'-the-um*) [*ἀμ'ανθος*, unspotted; *ἄνθος*, flower]. A genus of liliaceous or melanthaceous plants. *A. musca toxicum* ('fly poison'), a handsome flowering plant of the United States; has properties not unlike those of veratrum. Unof.

**Amiantus** (*am-e-an'-tus*), or **Amianthus** (*am-e-an'-thus*). See *Asbestos*.

**Amic** (*am'-ik*) [*ammonia*]. Pertaining to an amin, or having the nature of an amin.

**Amici Prism** (*am-e'-chè priz'm*). See *Prism*.

**Amicrobic** (*ah-mi-kro'-bik*) [*ἀ priv.*; *microbion*, microbe]. Not due to, or associated with, microbes.

**Amid** (*am'-id*) [*ammonia*]. A chemical compound produced by the substitution of an acid radical for one or more of the hydrogen atoms of ammonia. The amids are primary, secondary, or tertiary, according as one, two, or three hydrogen atoms have been so replaced. They are white crystalline solids, often capable of combining with both acids and bases. **A. Bases**. See *Amins*, *Primary*.

**Amidin** (*am'-id-in*) [Fr., *amidon*, starch]. Starch altered by heat into a horny, transparent mass; soluble starch; that part of starch which is soluble in water.

**Amidins** (*am'-id-inz*) [*ammonia*]. Mono-acid bases produced from the nitrites by heating with ammonium chlorid. In the free condition they are quite unstable. They contain the group C.NH.NH<sub>2</sub>.

**Amido-acetic acid** (*am'-id-o-as-e'-tik as'-id*). See *Glycocoll* and *Glycin*.

**Amido-acid** (*am'-id-o-as'-id*) [*ammonia*; *acetum*, vinegar]. An acid containing the amido-group, NH<sub>2</sub>.

**Amidogen** (*am-id'-o-jen*) [*amid*; *γεννᾶν*, to produce].

The hypothetical radical,  $\text{NH}_2$ , regarded as an essential part of all amids. See *Amid*.

**Amido-glycerol** (*am'-id-o-glī's-er-el*). See *Serin*.

**Amido-kephalin** (*am'-id-o-kef'-al-in*) [*amid*; *κεφαλή*, the head]. One of the modifications of kephalin found in the brain tissue. The name is sometimes extended to other similar principles, the amidokephalins.

**Amido-lipotide** (*am'-id-o-lip'-o-tid*). Any one of a very peculiar group of nitrogenous fats said to exist in the brain.

**Amidomyelin** (*am'-id-o-mī'el-in*) [*amid*; *μυελός*, marrow],  $\text{C}_{11}\text{H}_{22}\text{N}_2\text{P}_2\text{O}_{10}$ . A bipolar alkaloid or basic principle, derivable from brain tissue. It gives name to a group of similar bodies, the amidomyelins.

**Amidoplast** (*am'-id-o-plast*) [*ἀμύρον*, starch; *πλασθεῖν*, to form]. In biology, a name proposed by Errera for leukoplastids. Proteid granules whose functions it is to form starch grains.

**Amido-succinamic Acid** (*am'-id-o-suk-sin-am'-ik as' id*). Same as *Asparagin*.

**Amidoxim, or Amidoxime** (*am-id-oks'-im*). See *Oxamidin*.

**Amidulin** (*am-id'-u-lin*) [*Fr.*, *amidon*, starch]. Soluble starch; prepared by the action of  $\text{H}_2\text{SO}_4$  on starch, thus removing the starch-cellulose.

**Amimia** (*ah-mim'-e-ah*) [*ἀ priv.*; *μῖμος*, a mimic]. An aphasic symptom consisting in loss of the power of imitation or of pantomime speech. **A. Musical**, pathological loss of the power of playing musical instruments.

**Amin** (*am'-in*) [*ammonia*]. The *Amins* are chemical compounds produced by the substitution of a basic atom or radical for one or more of the hydrogen atoms of ammonia; or basic derivatives of carbon, containing nitrogen and viewed as ammonia derivatives. In deportment they bear some similarity to ammonia. The lower members are gases with ammoniacal odor and are readily soluble in water; they differ from ammonia in their combustibility. The highest members are liquids soluble in water, only the highest are sparingly soluble. They are called *Monamins*, *Diamins*, *Triamins*, etc., according to the number of amidogen molecules,  $\text{NH}_2$ , substituted for H. **A. Colors**. Same as *Anilin Colors*, q. v. **A. Primary**, an amin in which one hydrogen atom is replaced by a monovalent alkyl. **A. Secondary**, an amin in which two hydrogen atoms are replaced by monovalent alkyls. **A. Tertiary**, an amin in which three hydrogen atoms are replaced by monovalent alkyls.

**Aminol** (*am'-in-ol*) [*amin*]. A gaseous substance derived from the methylamin of herring-brine mixed with milk of lime. This gas is cheap and powerfully disinfectant, and it has been used in the purification of sewage.

**Amins Process**. See *Sewerage, Disposal of*.

**Amitosis** (*ah-mīt-of'-sis*) [*ἀ priv.*; *mitosis*, indirect cell-division, karyokinesis; *μῖτος*, a thread; *osis*]. Cell multiplication by direct division, or simple cleavage, the nucleus usually assuming an hour-glass shape and dividing before the protoplasm. The opposite of *mitosis*.

**Amitotic** (*ah-mīt-of'-ik*) [*ἀ priv.*; *μῖτος*, thread]. Of the nature of, or characterized by, amitosis. **A. Cell Division**, direct nuclear subdivision, as distinguished from karyokinesis.

**Amixia** (*ah-mīks'-e-ah*) [*ἀ priv.*; *μῖξις*, mixing]. In biology, the formation of a new species without the mingling of two individuals or their germs; asexual reproduction, parthenogenesis.

**Amma** (*am'-ah*) [*ἀμμα*, a tie; *pl.*, *Ammata*]. A truss or girdle for hernia.

**Ammelid** (*am'-el-id*) [*Ammonia*; *melamid*],  $\text{C}_3\text{H}_4\text{N}_4$ .

$\text{O}_2$ . A substance produced by boiling melamin with alkalis or acids; it is a white powder that forms salts with both acids and bases.

**Ammelin** (*am'-el-in*) [*Ammonia*; *melam*],  $\text{C}_3\text{H}_5\text{N}_3\text{O}$ . A white powder, insoluble in water, soluble in alkalis and mineral acids. Produced by boiling melamin with alkalis and acids.

**Ammeter** (*am'-et-er*) [*ampere*; *ἄμπερ*, a measure]. A form of galvanometer in which the value of the current is measured directly in amperes.

**Ammi** (*am'-i*) [*ἄμμι*, an African plant]. A genus of umbelliferous herbs bearing aromatic seeds or fruits. The seeds of several species are locally used in medicine. Unof. *A. copticum*. See *Ajowan*.

**Amnism** (*am'-izm*) [*ἄμμος*, sand]. Ammotheraphy; psammism.

**Ammonemia**, (*am-o-ne'-me-ah*). See *Ammoniciemia*.

**Ammonia** (*am-o'-ne-ah*) [*L.*]. A volatile alkali,  $\text{NH}_3$ . See *Ammonium*. **A. Carmin**. See *Stains, Table of*.

**Ammoniac** (*am-o'-ne-ak*). See *Ammoniacum*.

**Ammoniacal** (*am-o-nī'-ak-al*) [*ammonia*]. Containing or relating to ammonia.

**Ammoniacum** (*am-o-nī'-ak-um*) [*ἀμμωνιακός*, belonging to ammonia; *gen.*, *Ammoniaci*]. Ammoniac. A gum obtained from a Persian plant, *Dorema Ammoniacum*. A stimulating expectorant and laxative, resembling asafetida. Employed in chronic bronchial affections. Dose gr. x-xxx. **A. cum Hydrargyro Emplastrum**, ammoniac 72, mercury 18 per cent., oleate of mercury .8, dilute acetic acid 100, lead plaster, with sulphur, and oil, q. s. **A. Emplastrum**, 100 parts of ammoniac, digested with 140 parts of acetic acid, diluted, strained, and evaporated. **A. Emulsum**, a four per cent. emulsion in water, the resin being suspended by the contained gum. Dose  $\frac{5}{8}$  ss-j.

**Ammoniameter** (*am-o-ne-am'-et-er*) [*ammonia*; *μέτρον*, a measure]. An instrument for testing the strength of solutions of ammonia.

**Ammoniemia, or Ammoniaemia** (*am-o-ne-el'-me-ah*) [*ammonia*; *αἷμα*, blood]. The theoretical decomposition of urea in the blood, yielding ammonium carbonate.

**Ammoniorrhea** (*am-o-ne-or-el'-ah*) [*ammonia*; *ῥεῖν*, to flow]. The passage of ammoniacal urine.

**Ammonium** (*am-o'-ne-um*) [from the name of Jupiter Ammon, because first discovered near his temple in Libya; *gen.*, *Ammonii*]. A hypothetical alkaline base, having the composition  $\text{NH}_4$ . Exists only in combination. It occurs most commonly in the form of *ammonia gas*,  $\text{NH}_3$ , which, dissolved in water, is the water of ammonia of commerce. Inhalation of the gas causes suffocation and edema of glottis. The salts first stimulate and then paralyze the motor nerves. It is useful as a stimulant, as an antagonist in cardiac depression, and locally in bites and stings of venomous reptiles and insects. **Ammonia Aqua**, water of ammonia, a solution containing ten per cent. of the gas in water. Dose m v- $\frac{5}{8}$  ss, well diluted. **A. Aqua Fortior**, contains 28 per cent. of the gas in solution. **A. Aromatic Spt.**, spirit of ammonia, with am. carb., am. aq., ol. lemon, lavender and pimenta, alcohol and water. Dose  $\frac{5}{8}$  ss-ij. **Ammonii acetat liq.**, Spirit of Mindererus, dilute acetic acid neutralized with ammonia. Dose  $\frac{5}{8}$  j- $\frac{5}{8}$  j. **A. benzoas**,  $\text{NH}_4\text{C}_7\text{H}_5\text{O}_2$ . Dose gr. v-xv. **A. Bicarbonas**. Dose gr. ij-x. **A. bromid**,  $\text{NH}_4\text{Br}$ . Dose gr. x- $\frac{5}{8}$  ss. **A. carbonas**,  $\text{NH}_4\text{HCO}_3$ ,  $\text{NH}_4\text{NH}_2\text{CO}_2$ , a mixture of carbonate and dicarbonate. Dose gr. v-x. **A. chlorid**,  $\text{NH}_4\text{Cl}$ , sal ammoniac. Dose gr. j-xx. **A. chloridi trochisci**, each lozenge contains gr. ij of the salt. **A. fluorid**, used in hypertrophy of the spleen.

Dose gr.  $\frac{1}{2}$ – $\frac{1}{4}$ . **A. glycyrrhizas.** Unof. An expectorant. **A. iodium,**  $\text{NH}_4\text{I}$ . Dose gr. ij–x. **A. liniment,** am. aq. 35, alcohol 5, cottonseed oil 60. **A. Molybdenate Test.** See *Tests, Table of*. The following *salts* and their preparations are official: **A. nitras,**  $\text{NH}_4\text{NO}_3$ , used only in preparing nitrous oxid. **A. phosphas,**  $(\text{NH}_4)_2\text{HPO}_4$ . Dose gr. v–xx. **A. picras,**  $\text{C}_6\text{H}_5(\text{NH}_4)(\text{NO}_2)_2\text{O}$ , a salt in yellow needles, of bitter taste; like other picrates it is explosive, and must be handled with care. It is antipyretic and antiperiodic, and tends to correct gastric disturbances. Dose gr. v in 24 hours; best given in wafers, each containing half a grain. **A. Spt.,** a ten per cent. solution of aqua ammoniac in alcohol. Dose  $\text{℥}\text{x}$ – $\text{ʒ}\text{ij}$ , diluted. **A. sulphas,**  $(\text{NH}_4)_2\text{SO}_4$ , used only in the preparation of other ammonium salts. **A. valerianas,**  $\text{NH}_4\text{C}_8\text{H}_9\text{O}_2$ . Dose gr. j–v. *Raspail's Eau Sedatif* (unof.), aqua ammoniac  $\text{ʒ}\text{ij}$ , sodium chlorid  $\text{ʒ}\text{ij}$ , spt. vini camph.  $\text{ʒ}\text{ij}$ , aq.  $\text{ʒ}\text{xxxij}$ . For local use.

**Ammon's Fissure.** See *Fissure*. **A.'s Horn.** See *Hippocamp*. **A.'s Operation.** See *Operations, Table of*. **A.'s Posterior Scleral Protuberance,** a variety of posterior ectasia of the sclera of the eye.

**Ammophilous** (*am-off'-il-us*) [*ἄμμος*, sand; *φίλος*, loving]. In biology, inhabiting sandy places.

**Ammotherapy** (*am-o-ther'-a-pe*) [*ἄμμος*, sand; *θεραπεύειν*, to heal]. The use of sand-baths in the treatment of disease.

**Amnemonic** (*am-ne-mon'-ik*) [*ἄ* priv.; *μνημονικός*, relating to the memory]. Accompanied by or resulting in impairment of the memory.

**Amnemosyne** (*am-ne-mos'-en-e*) [*ἄ* priv.; *μνημοσύνη*, memory]. Forgetfulness.

**Amnesia** (*am-ne'-se-ah*) [*ἀμνησία*, forgetfulness]. Defect of memory. Loss of the memory for words. **A. Acustica**, word-deafness. **A. Periodic.** See *Double Consciousness*.

**Amnesic** (*am-ne'-sik*). Relating to amnesia.

**Amnesia** (*am-nes'-te-ah*) [*ἀμνηστία*, forgetfulness]. Amnesia.

**Amnesic** (*am-nes'-tik*) [*ἀμνηστία*, forgetfulness]. 1. Amnesic. 2. Causing amnesia.

**Amnia** (*am'-ne-ah*) [*ἄμνιον*, a young lamb]. Plural of *Amnion*, *q. v.*

**Amniac** (*am'-ne-ak*) [*ἄμνιον*, a young lamb]. Amnionic.

**Amnio-chorial** (*am-ne-o-ko'-re-al*) [*ἄμνιον*; *χόριον*, a membrane]. Pertaining to both amnion and chorion.

**Amniocleptesis** (*am-ne-o-klep'-sis*) [*ἄμνιον*, amnion; *κλεπτεῖν*, to steal away]. The slow and unnoticed escape of the liquor amnii.

**Amnion** (*am'-ne-on*) [*ἄμνιον*, a young lamb]. The innermost of the fetal membranes; it is continuous with the fetal epidermis at the umbilicus, forming a complete sheath for the umbilical cord and a sac or bag in which the fetus is enclosed. It contains one or two pints of liquor amnii. It is a double non-vascular membrane, the inner layer or *sac* derived from the epiblast, the outer from the mesoblast. The cavity of the inner folds is called the *true amnion*, that of the outer, the *false*. **A., Dropsy of**, excessive secretion of liquor amnii.

**Amnionic** (*am-ne-on'-ik*) [*ἄμνιον*, a young lamb]. Relating to the amnion.

**Amniorrhea**, (*am-ne-o-re'-ah*) [*ἄμνιος*, amniotic liquor; *ῥέειν*, to flow]. The discharge of the liquor amnii.

**Amniota** (*am-ne-o'-tah*) [*ἄμνιον*, a young lamb]. Animals with an amnion and allantois, comprising mammals, birds, and reptiles. Those without an amnion are called *Anamniota*.

**Amniotic** (*am-ne-o'-ik*) [*ἄμνιον*, a young lamb]. Re-

lating to the amnion, as the *A. fluid*. **A. Fluid.** Same as *Liquor amnii*.

**Amniotis** (*am-ne-o'-tis*) [*ἄμνιον*, a young lamb]. See *Amniotitis*.

**Amniotitis** (*am-ne-o-ti'-tis*) [*ἄμνιον*, a young lamb; *τις*, inflammation]. Inflammation of the amnion.

**Amniotome** (*am'-ne-o-tom*) [*ἄμνιον*, a young lamb; *τόμη*, a cut]. An instrument for puncturing the fetal membranes.

**Amnitis** (*am-ni'-tis*). Same as *Amniotitis*.

**Amæba** (*am-e'-bah*). See *Ameba*.

**Amæboid** (*am-e'-boid*). See *Ameboid*.

**Amæbodont** (*am-e'-bo-dont*). See *Amebodont*.

**Amænomania** (*am-e-no-ma'-ne-ah*). See *Amenomania*.

**Amomum** (*am-o'-mum*) [*ἄμωμον*, an Eastern spice plant]. A genus of scitamineaceous plants to which the cardamom (*A. cardamomum*) and Grains of Paradise (*A. granum paradisi*) belong.

**Amorphia** (*ah-mor'-fe-ah*) [*ἄ* priv.; *μορφή*, form]. Shapeless condition.

**Amorphism** (*ah-mor'-fin-izm*) [*ἄ* priv.; *Morpheus*, the god of sleep]. The condition resulting from the withdrawal of morphine from one habituated to the drug.

**Amorphism** (*ah-mor'-fizm*) [*ἄ* priv.; *μορφή*, a form]. The state or quality of being amorphous or without shape; specifically, absence of crystallization; want of crystalline structure.

**Amorphous** (*ah-mor'-fus*) [*ἄ* priv.; *μορφή*, a form]. Formless, shapeless, non-crystallized. **A. Quinin**, quinoidin, its salts being non-crystallizable.

**Amorphus** (*ah-mor'-fus*) [*ἄ* priv.; *μορφή*, a form]. An acardiacus without head or extremities. See also *Anideus*. **A. Globulus.** See *Anideus*.

**Amotio** (*am-o'-she-o*) [*L.*]. A detachment. **A. Retinæ.** See *Ablatio Retinæ*.

**Ampac** (*am'-pak*) [*E. Indian*]. An East Indian rutaceous tree of the genus *Xanthoxylum* or *Ampacus*. Its leaves are used in medicating baths, and its odoriferous resin is a stimulant. Unof.

**Ampelopsin** (*am-pel-op'-sin*). See *American Ivy*.

**Ampelopsis** (*am-pel-op'-sis*). See *American Ivy*.

**Ampelotherapy** (*am-pel-o-ther'-a-pe*) [*ἀμπέλος*, a grapevine; *θεραπεύειν*, to heal]. The *Grape-cure*, *q. v.*

**Ampérage** (*om'-pär-ahj*) [*Fr.*]. The number of amperes passing in a given circuit.

**Ampère** (*om-pär')* [a French physicist]. See *Electrical Units*. **A.'s Laws** relate to the forces between conductors carrying electric currents. *Avogadro's law*, that equal volumes of a gas when under the same conditions contain the same number of molecules, is also called Ampère's Law. In honor of Ampère, the unit of measurement of an electric current is called an *Ampère*.

**Ampèremeter** (*am'-pär-me-ter*) [*Ampère*; *μέτρον*, to measure]. An instrument for estimating the current of an electric circuit in amperes.

**Ampère's Law.** See *Law*.

**Amphanthium** (*amf-an'-the-um*) [*ἀνφί*, about; *ἄνθος*, a flower]. See *Clinanthium*.

**Amphemerina** (*am-fe-mer'-in-ah*) [*ἀσθημερινός*, daily]. A hectic or intermittent fever that recurs daily.

**Amphi-** (*am'-fe*) [*ἄμφω*, around]. A prefix signifying *about*, *on both sides*, *around*, *etc.*, as *amphiarthrosis*, *amphibia*, *etc.*

**Amphiarthrosis** (*am-fe-ar-thro'-sis*) [*ἄμφω*, around; *ἄρθρον*, a joint]. A form of mixed articulation in which the surfaces of the bones are connected by broad discs of fibro-cartilage, or else they are covered with fibro-cartilage and connected by external ligaments. It is distinguished by limited flexion in every direction, as, *e.g.*, between the vertebrae.

**Amphiaster** (*am'-fē-as-ter'*) [*αμφι*, around; *ἀστρον*, a star]. In biology, the figure formed in both direct and indirect cell division, by the achromatin threads and chromatin granules united to form the so-called nuclear spindle, together with the threads of cell-protoplasm radiating from a rounded clear space at each end of the spindle known as the stars or suns.

AMPHIASTER IN AN OVARIAN EGG.

**Amphibia** (*am-fib'-e-ah*) [*ἀμφι*, both; *βίος*, life]. A class of the *Vertebrata*, living during their life both in the water and upon the land, as the frog, newt, etc.

**Amphibious** (*am-fib'-e-us*) [*ἀμφι*, both; *βίος*, life]. Living both on land and water.

**Amphiblastic** (*am-fē-blas'-tik*) [*ἀμφι*, on both sides; *βλαστος*, a germ]. In biology, pertaining to that form of complete segmentation that gives rise to an amphiblastula.

**Amphiblastula** (*am-fē-blas'-tu-lah*) [*ἀμφι*, on both sides; dim. of *βλαστος*, a germ]. In biology, the mulberry-mass or morula-stage in the development of a holoblastic egg. It follows the stage known as amphimorula.

AMPHIBLASTULA.

**Amphibleritis** (*am-fē-bles-tri'-tis*) [*ἀμφι*, both; *βλαστρον*, a net; *ιτις*, inflammation]. Inflammation of the retina.

a, Granular cells which will form the epiblast. b, Ciliated cells which become invaginated to form the hypoblast. (After Balfour.)

**Amphiblestroid** (*am-fē-bles'-troid*) [*ἀμφι*, both; *βλαστρον*, a net; *ειδος*, form]. Net-like. A. Membrane, the retina.

**Amphibolia** (*am-fē-bo'-le-ah*) [*ἀμφι*, both; *βόλια*, uncertainty]. The vacillating period of a fever or disease.

**Amphibolic** (*am-fē-bo'-lik*) [*ἀμφι*, both; *βολος*, uncertain]. Uncertain; doubtful. A qualification applied by Wunderlich to a period in the febrile process occurring between the fastigium and the defervescence, and marked by irregular exacerbations and remissions.

**Amphibranchia** (*am-fē-brang'-ke-ah*) [*ἀμφι*, around; *βράγχια*, the gills]. The tonsils, pharynx, and nasopharynx.

**Amphicarpic** (*am-fē-kar'-pik*). Same as *Amphicarpous*.

**Amphicarpous** (*am-fē-kar'-pus*) [*ἀμφι*, on both sides; around; *καρπός*, fruit]. In biology, producing fruit of two kinds, either as regards form or season of ripening.

**Amphicelous** (*am-fē-sē'-lus*) [*ἀμφι*, at both ends; *κοίλος*, hollow]. In biology, biconcave, as the center of the vertebrae of fishes.

**Amphicrania** (*am-fē-kra'-ne-ah*) [*ἀμφι*, both; *κρανιον*, the skull]. Headache affecting both sides of the head.

**Amphicreatin** (*am-fē-kre'-at'-in*) [*ἀμφι*, around; *κρέας*, flesh],  $C_9H_{19}N_5O_7$ . One of the muscle-leucomaines. It crystallizes in brilliant oblique prisms of a yellowish-white color. It is tasteless and faintly basic. It resembles creatin in its properties.

**Amphicreatinin** (*am-fē-kre'-at'-in-in*) [*ἀμφι*, around; *κρέας*, flesh],  $C_9H_{18}N_5O_7$ . A member of the creatinin group of leucomaines said to have toxic qualities. It is derived from muscle.

**Amphid** (*am'-fid*) [*ἀμφι*, both]. In chemistry, a name given to a salt of an acid containing oxygen; that is, a name given to salts other than haloid.

**Amphideum** (*am-fid'-e-um*) [*ἀμφιδέα*, a ring; *πλ.*, *Amphideum*]. The margin or edge of the os uteri.

**Amphidiarthrosis** (*am-fē-di-ar-thro'-sis*) [*ἀμφι*, both; *διάρθρωσις*, articulation]. The articulation of the lower jaw, as it partakes of the nature both of ginglymus and arthrodis.

**Amphidisc**, **Amphidisk** (*am'-fē-disk*) [*ἀμφι*, at both ends; *δίσκος*, a round plate]. In biology, a sponge-spicule consisting of an axil terminated by two toothed discs.

**Amphigenous** (*am-fij'-en-us*) [*ἀμφι*, both; *γένος*, kind]. In biology, growing indifferently on both sides, as certain parasitic fungi.

**Amphigony** (*am-fij'-o-ne*) [*ἀμφι*, on both sides; *γονος*, offspring]. The sexual process in its broadest sense; gamogenesis.

**Amphimixis** (*am-fi-miks'-is*) [*ἀμφι*, on both sides; *μίξις*, mixing]. In biology, the mingling of two individuals or their germs; sexual reproduction.

**Amphimonerula** (*am-fē-mo-ner'-u-lah*) [*ἀμφι*, on both sides; *μονήριον*, single]. In biology, the monerula or cytode-stage of an unequally segmenting, holoblastic egg.

**Amphimorula** (*am-fē-mor'-u-lah*) [*amphi*, on both sides; *morula*, a mulberry]. In biology, the morula, or globular mass of cleavage cells resulting from unequal segmentation, the cells of the hemispheres being unlike in size.

**Amphioxus** (*am-fē-oks'-us*) [*ἀμφι*, both; *ὀξύς*, sharp]. A genus of fishes tapering at both ends, as the lancelet.

**Amphipyrenin** (*am-fē-pi-rē'-nin*) [*ἀμφι*, around; *πυρην*, mass]. The nuclear membrane of a cell.

**Amphismela** (*am-fis-me'-lah*) [*ἀμφι*, both; *μήλη*, a probe]. A double-edged surgical knife.

**Amphisphalsis** (*am-fē-sfal'-sis*) [*ἀμφισφαλισις*, a throwing or turning round]. Circumduction, as of a limb in reducing a luxation.

**Amphistoma** (*am-fis'-to-mah*) [*ἀμφι*, double; *στόμα*, mouth]. A genus of trematode worms, named from the mouth-like apparatus at either end. One species, *A. hominis*, has been found in the large intestine of man, in the tropical regions. See *Parasites*, Table of.

**Amphistylic** (*am-fē-sti'-lik*) [*ἀμφι*, on both sides; *στυλος*, a pillar]. In biology, having styles or supports on both sides, as the mandibular arches of sharks.

**Amphitheat** (*am'-fē-thekt*) [*ἀμφι*, on both sides; *θηκός*, sharpened]. In biology, having unequal angles or surfaces.

**Amphitoky** (*am-fil'-o-ke*) [*ἀμφι*, both; *τόκος*, producing]. The production of both male and female forms in parthenogenesis.

**Amphitropous** (*am-fil'-ro-pus*) [*ἀμφι*, around; *τρέπειν*, to turn]. 1. In biology, having the funiculus attached to the ovule midway between the chalazal and micropyle. 2. Having a C-shaped embryo.

**Amphodiplopia** (*am-fō-dip'-lo'-pe-ah*) [*ἀμφω*, both; *διπλός*, double; *ὤψ*, eye]. Double vision affecting each of the eyes.

**Ampho-peptone** (*am-fō-pep'-tōn*). See *Peptones*.

**Amphophile** (*am'-fō-fil*) [*ἀμφω*, both; *φιλέιν*, to love]. Readily stainable alike with acid and basic dyes (a qualification applied to certain histological and pathological elements).

**Amphophilous** (*am fōf'-il-us*) [*ἀμφω*, both; *φιλέιν*, to love]. Staining with either alkaline or acid dyes.

**Amphora** (*am'-fō-rah*) [*ἀμφι*, on both sides; *φορεῖν*, a bearer]. In biology, the lower portion of a seed capsule, or pyxidium.

**Amphoric** (*am-for'-ik*) [*amthora*, a two-handled vessel]. Like the sound produced by blowing across the mouth of a bottle. **A. Breathing**, breath sounds with an amphoric or musical quality heard in diseased conditions of the lung, as in phthisis with cavity-formation. **A. Resonance**, in auscultation, a metallic sound like that of blowing into a bottle, caused by the reverberation of sound in a cavity of the lung. **A. Respiration**. See *A. Breathing*.

**Amphoricity** (*am-for-is'-i-ty*) [*amphora*, a two-handled vessel]. The quality of being amphoric; the giving forth of amphoric sounds.

**Amphoriloquy** (*am-for-il'-o-kwee*) [*amphora*, a bottle; *loqui*, to speak]. The production of amphoric sounds in speaking.

**Amphorophony** (*am-for-of'-o-ne*) [*ἄμφορος*, a jug; *φωνή*, a sound]. An amphoric resonance or sound.

**Amphoteric** (*am-for-ter'-ik*) [*ἄμφοτερος*, both of two]. Having the power of altering the color of both red and blue test paper, as milk. Neither acid nor alkaline; applied to such substances as glucose, gums, etc.

**Amplectant** (*am-plek'-tant*) [*amplecti*, embrace]. In biology, embracing; winding about, as a tendril or petiole.

**Amplexation** (*am-pleks-a'-shun*) [*amplexatio*, an embrace]. The treatment of a fractured clavicle by an apparatus that fixes the shoulder and covers a part of the chest and neck.

**Amplexicaudate** (*am-plex-e-kaw'-dat*) [*amplexatio*, an embrace; *cauda*, a tail]. In biology, having the entire tail included in the interfenoral membrane.

**Amplexicaul** (*am-pleks'-e-kawel*) [*amplexus*, embracing; *caulis*, a stem]. In biology, clasping or embracing the stem, as a leaf.

**Amplexifoliate** (*am-pleks-e-fol'-le-āt*) [*amplexus*, embracing; *folium*, leaf]. In biology, plants, the leaves of which embrace the stem.

**Ampliation** (*am-ple-a'-shun*) [*ampliare*, to increase]. Dilatation or distention of a part or cavity.

**Amplification** (*am-plif-ik-a'-shun*) [*amplificare*, to enlarge]. 1. Increase of the visual area, in microscopy. 2. Enlargement, as of a diseased organ.

**Amplifier** (*am'-ple-fi-er*) [*amplificare*, to enlarge]. An apparatus sometimes used in microscopy for increasing the magnification. It consists of a diverging lens or combination placed between the objective and the ocular, and giving to the image-forming rays from the objective an increased divergence. **A., Tolles's**, an accessory used in magnification and first made effective by a manufacturer named Tolles.

**Amplitude** (*am'-ple-tūd*) [*amplitudo*, the extent of a thing]. The range or extent, as of vibrations and undulations, the pulse, etc.

**Ampulla** (*am-pul'-ah*) [*l.*, a Roman wine jug]. The trumpet-mouthed or dilated extremity of a canal, as of the lachrymal canal, the receptaculum chyli, the Fallopian tubes, mammary ducts, semicircular canals, vas deferens, etc. Chemically, the term denotes a large-bellied bottle. **A. of Bryant**, the apparent distention of an artery immediately above a ligature, due to the contraction of the vessel above the ampulla where it is not completely filled with clot. **A. Chyli**, the receptaculum chyli. **A., Lieberkühn's**, the cecal terminus of one of the lacteals in the villi of the intestines. **A. of Rectum**, the portion above the perineal flexure. **A. of Vater**, the site of entrance of the common bile-duct and pancreatic duct into the duodenum.

**Ampullula** (*am-pul'-u-luh*) [dim. of *ampulla*, a Roman wine jug]. A small ampulla, as in the lymphatic or lacteal vessels.

**Amputation** (*am-pu-ta'-shun*) [*amputare*, to cut away]. The removal of a limb or part of the body by the

knife, ligature, or other means, or as a result of gangrene, constriction (e.g., of the cord, in the fetus), or the disease, *ainhum*. For special amputations see *Operations, Table of*. **A., Accidental**, the separation of a limb by some form of accident. **A., Bloodless**, one in which there is but slight loss of blood, on account of the circulation being controlled by mechanical means. **A., Central**, one in which the scar is situated at or near the center of the stump. **A., Circular**, that performed by making a single flap, by circular sweeps of a long knife, through skin and muscles, in a direction vertical to the plane of the limb. **A., Circular Skin Flap**, a modification of the circular, in which the skin flap is dissected up, and the muscles divided at a higher level. **A., Coat-sleeve**, a modification of the circular, in which the cutaneous flap is made very long, the end being closed by being gathered together by means of a tape. **A., Congenital**, amputation of fetal portions due to constriction by amniotic bands of lymph. **A. in the Contiguity**, amputation at a joint. **A. in the Continuity**, amputation of a limb elsewhere than at a joint. **A., Consecutive**, an amputation during the period of suppuration or later. **A., Cutaneous**, one in which the flaps are composed exclusively of the integuments. **A., Diclastic**, one in which the bone is broken with an osteoclast, and the soft tissues divided by means of an écraseur. Its object is to avoid hemorrhage and purulent infection. **A., Double Flap**, one in which two flaps are formed from the soft tissues. **A., Dry**. See *A., Bloodless*. **A., Eccentric**, one in which the scar is situated away from the center of the stump. **A., Elliptical**, one that may be performed by a single sweep, as in the circular method; the wound, however, having an elliptical outline, on account of the oblique direction of the incision. **A. of Expediency**, one performed for cosmetic effect. **A., Flap**, one in which one or more flaps are made from the soft tissues, the division being made obliquely. **A., Flapless**, one in which, on account of destruction of the soft parts, flaps cannot be formed, the wound healing by granulation. **A., Galvano-caustic**, one in which the soft parts are divided with the galvano-cautery, followed by division of the bone by the saw. **A., Immediate**, one done within twelve hours after the injury, during the period of shock. **A., Intermediary or Intermediate**, one performed during the period of reaction, and before suppuration. **A., Intrauterine**. See *A., Congenital*. **A., Major**, amputation of the extremities above the wrist or ankle joints. **A., Mediate**. See *A., Intermediary*. **A., Minor**, amputation of the extremities below the wrist or ankle joints. **A., Mixed**, a combination of the circular and flap methods. **A., Multiple**, amputation of two or more members at the same time. **A., Musculo-cutaneous**, one in which the flaps consist of skin and muscle. **A., Musculo-tegumentary**. See *A., Musculo-cutaneous*. **A., Natural**. See *A., Congenital*. **A., Oblique**. See *A., Oval*. **A., Osteoplastic**, one in which there is section and apposition of portions of bone, in addition to the amputation. **A., Oval**, a modification of the elliptical, in which the incision consists of two reversed spirals, instead of the one oblique. **A., Partial**, 1. One in which but a portion of the extremity is removed. 2. An incomplete congenital amputation. **A., Pathological**, one done for tumor or other diseased condition. **A., Primary**, one done after the period of shock and before the occurrence of inflammation. **A., Racket**, a variety of the oval amputation, in which there is a single longitudinal incision continuous below with a spiral incision on either side of the limb. **A., Secondary**, one performed during the period of sup-

putation. **A.**, Spontaneous. See *A.*, Congenital. Also occurs in the disease, anhum. **A.**, Subperiosteal, one in the continuity, the cut end of the bone being covered by periosteal flaps. **A.**, Surgical, a formal amputation in contradistinction to accidental or congenital *A.* **A.**, Synchronous. See *A.*, Multiple. **A.** by Transfixion, one done by thrusting a long knife completely through a limb, and cutting the flaps from within out. **A.**, Traumatic, one performed on account of injury.

**Amputatura** (*am-pu-tat' u'-rah*) [*L.*; *pl.*, *Amputatura*]. An amputation; loss of a member.

**Amuck** (*a-mu&*) [Malay]. In a state of murderous frenzy; in Oriental regions persons, mostly hashish eaters, often attack and kill those whom they meet while in a state of wild fury. In some cases the infuriated persons take this method of seeking death, for they are shot down at sight.

**Amusia** (*ah-mu'-se-ah*) [*á* priv.; *musa*, *μουσα*, muse]. Pathological loss or subnormal ability to produce or comprehend music or musical sounds, an abnormality as regards music analogous to aphasia as regards the faculty of speech. **Motor A.**, the music is understood, but there is loss of the power of singing or of otherwise reproducing music. **Paramusia**, faulty and imperfect reproduction of music. **Sensory A.**, musical deafness, or the loss of the power of comprehension of musical sounds. See also *Alexia*, *Musical*; *Agaphia*, *Musical*; and *Amimia*, *Musical*.

**Amussat's Operations.** See *Operations*, *Table of*.

**Amyelencephalia** (*ah-mi-el-en-sef'-a'-le-ah*) [*á* priv.; *μυελον*, marrow; *κεφαλη*, the head]. Congenital absence of both brain and spinal cord.

**Amyelencephalus** (*ah-mi-el-en-sef'-al-us*) [*á* priv.; *μυελον*, marrow; *κεφαλη*, the head]. A fetal monster having neither brain nor spinal cord.

**Amyelia** (*ah-mi-el'-le-ah*) [*á* priv.; *μυελος*, marrow]. The congenital absence of the spinal cord.

**Amyelinic** (*ah-mi-el-in'-ik*) [*á* priv.; *μυελος*, marrow]. Having no myelin; applied to certain nerve fibers, especially those seen in neuromata.

**Amyelonervia** (*ah-mi-el-o-ner'-ve-ah*). See *Amyelonervia*.

**Amyeloneuria** (*ah-mi-el-o-nu'-re-ah*) [*á* priv.; *μυελος*, marrow; *νευρον*, a nerve]. Paresis of the spinal cord.

**Amyelotrophy** (*ah-mi-el-o'-ro-fe*) [*á* priv.; *μυελος*, marrow; *τροφη*, nourishment]. Atrophy of the spinal cord.

**Amyelus** (*ah-mi-el-us*) [*á* priv.; *μυελος*, marrow]. A fetal monstrosity with partial or complete absence of the spinal cord.

**Amyencephalus** (*ah-mi-en-sef'-al-us*). See *Amyelencephalus*.

**Amygdala** (*am-ig'-dal-ah*) [*L.*; *gen.*, *Amygdalæ*]. 1. Almond. The seeds of *Prunus Amygdalus*, var. *amara* and *dulcis*, containing the principle *Emulsin* or *Synapsase*. The former contains *Amygdalin*. The expressed oil of the sweet almond is a demulcent useful in skin affections; in doses of ʒj-ij it is a mild laxative. The oil of *A. amara* is used in cosmetics. 2. The tonsil. **A. amaræ**, **Aq.**, a 1:1000 solution of the oil in water. Dose indefinite. **A. amaræ**, **Ol.**, a volatile oil, bitter to the taste. Contains 3-14 per cent. of hydrocyanic acid. Dose ʒj-ʒj. **A. amaræ**, **Spt.**, oil of bitter almond 1, alcohol 80, distilled water q. s. **A.**, **Emulsium**, oil of sweet almonds 6 per cent., sugar, water, and acacia q. s. Dose ʒj-ʒss. **A. expressum**, **Ol.**, oil of sweet almonds. **A.**, **Pulv.**, **Comp.** (*B. P.*), contains sweet almonds, refined sugar, and gum acacia. Used to make (*A.*, *Emulsium*). **A.**, **Syr.**, sweet almond 14, bitter almond 4, sugar 20, orange flower water 10, water 13, syrup q. s.

**Amygdalæ** (*am-ig'-dal-e*) [*L.*, *pl.*]. The tonsils.

**Amygdalin** (*am-ig'-dal-in*) [*Amygdala*],  $C_{20}H_{27}NO_{11} + 3H_2O$ . A substance that occurs in bitter almonds, and in various plants, as well as in the leaves of the cherry laurel. It forms white, shining leaflets, of a bitter taste, readily soluble in water and hot alcohol.

**Amygdaline** (*am-ig'-dal-in*) [*ἀμυγδαλίνη*, almond]. 1. Almond-like. 2. The fissure ectad of, or collocated with the amygdaloid tubercle. See *Fissure*.

**Amygdalitis** (*am-ig'-dal-i'-tis*) [*ἀμυγδαλίτις*, almond; *ιτις*, inflammation]. Tonsillitis.

**Amygdaloid** (*am-ig'-dal-oid*) [*ἀμυγδαλίνη*, almond; *ειδος*, form]. Like a tonsil, or almond. **A. Fossa**, the depression for the lodgment of the tonsil. **A. Tubercle**, a projection of gray or cortical matter at the end of the descending cornu of the lateral ventricle of the brain. It is attached to the temporal lobe, and appears to be nearly isolated by white substance.

**Amygdalolith** (*am-ig'-dal'-o-lith*) [*ἀμυγδαλίτης*, an almond; *λίθος*, a stone]. A concretion or calculus found in the tonsils.

**Amygdalonus** (*am-ig'-dal-ong'-kus*) [*ἀμυγδαλόνυς*, almond; *ὄγκος*, a mass]. Any tumor or swelling of the tonsil.

**Amygdalopathy** (*am-ig'-dal-op'-a-the*) [*ἀμυγδαλίτης*, an almond; *πάθος*, a disease]. Any disease of the tonsils.

**Amygdalotome** (*am-ig'-dal-o-tom*) [*ἀμυγδαλίτης*, an almond; *τέμνω*, to cut]. An instrument used in cutting the tonsils.

**Amygdalotomy** (*am-ig'-dal-o'-o-mē*) [*ἀμυγδαλίτης*, a tonsil; *τέμνω*, to cut]. Tonsillotomy; partial or complete abscission of a tonsil.

**Amykos** (*ah-mi'-kos*) [*á* priv.; *μύκος*, a fungus]. An antiseptic fluid composed of boric acid, glycerin and infusion of cloves. Of reputed service in gonorrhea, dental caries, and catarrhs. Unof.

**Amyl** (*am'-il*) [*ἀμύλον*, fine starch]. The hypothetical radical  $C_5H_{11}$  of amyl alcohol, the fifth term of the series of alcohol radicals,  $C_nH_{2n+1}$ . **A. Alcohol**. See *Amylic Alcohol*. **A. Hydrate**. See *Amylic Alcohol*. **A. Nitrite**, nitrite of amyl,  $C_5H_{11}NO_2$ , a clear, yellowish liquid, ethereal, aromatic, volatile; produces vascular dilatation and great cardiac activity, and hence is useful in angina pectoris, respiratory neuroses, etc. Dose, internally, ʒj-ʒj dissolved in alcohol; by inhalation, ʒj-v. **A. Valerianate**. See *Apple Oil*.

**Amylaceous** (*am-il'-se-us*) [*amylum*, starch]. Containing starch; starch-like. See *Corpora amylacea*.

**Amylene** (*am'-il'-en*) [*ἀμύλον*, starch],  $C_5H_{10}$ . A transparent, liquid hydrocarbon, having anesthetic properties, but dangerous to use. See *Anesthetic*. **A. Hydrate**,  $C_5H_{12}O$ , a tertiary alcohol having hypnotic effects, and antagonistic to strychnin. Dose ʒj-ʒj. Unof.

**Amylic** (*am-il'-ik*) [*ἀμύλον*, starch]. Pertaining to Amyl. **A. Alcohol**, Fusel Oil, Potato Starch Alcohol, Amyl Hydrate. An alcohol having the composition  $C_5H_{12}O$ , occurring in the continued distillation of fermented grain. The pure substance has considerable value as a hypnotic. In large doses it suppresses tactile sensibility and produces motor paralysis. It is employed with advantage in mental disorders. It was formerly much used to adulterate whisky. Dose ʒj-ʒj. Unof.

**Amylo-dextrin** (*am-il-o-dek's-trin*). Same as *Erythro dextrin*. See *Soluble Starch*.

**Amylogen** (*am-il'-o-jen*) [*ἀμύλον*, starch; *γενής*, produce]. Soluble starch.

**Amylogenic** (*am-il-o-jen'-ik*) [*ἀμύλον*, starch; *γενής*, produce]. Starch producing.

**Amyloid** (*am'-il-oid*) [ἀμύλον, starch; εἶδος, form]. Starch-like. **A. Bodies**, pathological products resembling starch grains found in the membranes of the brain and other nervous tissues, the prostate, etc. **A. Degeneration**, waxy, fatty, or lardaceous degeneration; a disease occurring in most of the organs of the body, and indicative of impaired nutritive function. It is a nitrogenous, not starchy body, of uncertain composition. For staining see *Iodin*, *Methyl Violet*, *Safranin*, *Rose Bengale*, in *Table of Stains*. **A. Kidney**. See *Bright's Disease*.

**Amyolysis** (*am-il-ol'-is-is*) [ἀμύλον, starch; λύσις, solution]. The digestion of starch, or its conversion into sugar.

**Amyolytic** (*am-il-o-lit'-ik*) [ἀμύλον, starch; λύσις, solution]. Pertaining to or effecting the digestion of starch. Pertaining to ferments, like the saliva and pancreatic juice, that convert starch into sugar.

**Amylometer** (*am-il-om'-et-er*) [ἀμύλον, starch; μέτρον, a measure]. An apparatus for estimating the amount of starch in a solution.

**Amyloplast** (*am-il-o-plast*) [ἀμύλον, starch; πλάσσειν, to form]. A leucoplast; a starch-forming protoplasmic granule.

**Amylopsin** (*am-il-op'-sin*) [ἀμύλον, starch; ὄψις, appearance]. A ferment said to exist in pancreatin. See *Ferments*.

**Amylose** (*am'-il-os*) [ἀμύλον, starch]. Any one of a certain group of the carbohydrates, comprising starch, glycogen, dextrin, inulin, gum, cellulose, and tunicin.

**Amylum** (*am'-il-um*) [L., *gen. Amyli*],  $C_6H_{10}O_5$ . Starch. The internal cells of *Triticum vulgare*, common wheat, all other cereals, and many tubers, piths, and roots, such as potato, cassava, etc.; it constitutes nearly the whole of arrow-root, tapioca, and sago. It is converted into glucose by boiling with mineral acids. It is one of the most valuable nutrients known, but inert medicinally. **A. glyceritum**, a jelly for external application. Starch 10, water 10, glycerin 80. **A., Mucilago** (B. P.), used in making enemata. **A. iodatum**, contains starch 95, iodine 5 per cent., triturated with distilled water and dried. Dose 3 j- $\bar{z}$  ss. See *Table of Carbohydrates under Carbohydrate*.

**Amyocardia** (*am-i-o-kar'-de-ah*) [ἀ priv.; καρδιά, muscle; καρδία, the heart]. Lack of muscular power in the heart's contractions.

**Amyosthenia** (*am-i-o-sthe'-ne-ah*) [ἀ priv.; μῦς, muscle; σθένος, force]. Deficient muscular power without obvious disease or lesion.

**Amyosthenic** (*am-i-o-sthen'-ik*) [ἀ priv.; μῦς, muscle; σθένος, force]. Pertaining to amyosthenia. Also, a medicine or agent depressing muscular action.

**Amyotrophia** (*am-i-o-trof'-fe-ah*) [ἀ priv.; μῦς, muscle; τροφή, nourishment]. Atrophy of a muscle.

**Amyotrophic** (*am-i-o-trof'-ik*) [ἀ priv.; μῦς, muscle; τροφή, nourishment]. Dependent on or relating to muscular atrophy. **A. Paralysis**, that which is due to muscular atrophy.

**Amyotrophy** (*am-i-ot'-ro-fe*). See *Amyotrophia*.

**Amyous** (*am'-i-us*) [ἀ priv.; μῦς, muscle]. Weak; deficient in muscle or muscular strength.

**Amyrin** (*am'-e-rin*) [*amyris*],  $C_{40}H_{66}O$ . A resinous principle derived from Mexican Elemi. *Amyris elemifera*, L.

**Amyris** (*am'-e-ris*) [L.]. A genus of tropical trees and shrubs producing fragrant resins and gums, such as Elemi, etc.

**Amyxia** (*ah-miks'-e-ah*) [ἀ priv.; μύξα, mucous]. Deficiency in the normal secretion of mucus.

**Ana** (*an'-ah*) [ἀνά, so much each]. A Greek preposition signifying *through, up, again*, etc. In prescriptions contracted to *aa*, meaning of *each*.

**Anabamous** (*an-ab'-am-us*) [ἀνά, upward; βαίνειν, to go]. In biology, climbing, as certain fishes (*Anabas scandens*).

**Anabasis** (*an-ab'-as-is*) [ἀναβαίνειν, to go up]. The increasing stage of a fever or other acute disease; the stage preceding the climax.

**Anabatic** (*an-ab-at'-ik*) [ἀναβατικός, ascending]. Increasing; growing more intense; as the anabatic stage of a fever.

**Anabiosis** (*an-ab-i-ol'-sis*) [ἀναβίειν, to come to life again]. The phenomenon of a restoration of vitality possessed by certain organisms after apparent death, or even after heating to 140° C.

**Anabiotic** (*an-ab-i-ol'-ik*) [ἀναβίειν, to come to life again]. 1. Relating to anabiosis. 2. Restoring the strength or activity.

**Anabole** (*an-ab'-o-le*) [ἀναβάλλειν, to throw up]. A throwing up; what is thrown up; vomit; vomiting; expectoration; regurgitation.

**Anabole** (*an-ab'-o-le*) [ἀναβάλλειν, to throw up; ἔργον, work]. The force expended or work performed in anabolism, or in anabolic processes.

**Anabolic** (*an-ab-ol'-ik*) [ἀναβάλλειν, to throw or build up]. Pertaining to or characterized by anabolism.

**Anabolin** (*an-ab'-o-lin*) [ἀναβάλλειν, to throw or build up]. Any substance formed during the anabolic process.

**Anabolism** (*an-ab'-o-lizm*) [ἀναβάλλειν, to throw or build up]. Synthetic or constructive metabolism. Activity and repair of function. Opposed to *Catabolism*. The process by which simpler elements are built up into more complex. See *Metabolism*.

**Anabrosis** (*an-ab-ro'-sis*) [ἀνάβρωσις, an eating up]. Corrosion, or superficial ulceration.

**Anabrotic** (*an-ab-ro'-ik*) [ἀνάβρωσις, an eating up]. Pertaining to anabrosis; corrosive.

**Anacamptic** (*an-ak-amp'-tik*) [ἀνακάμπτεν, to bend back]. Reflected, as sound or light; pertaining to or causing a reflection.

**Anacanthous** (*an-ak-an'-thus*) [ἀνὰκανθος, spineless]. Without spines.

**Anacardium** (*an-ak-ar'-de-um*) [ἀνά, up; καρδία, the heart, from its heart-shaped seeds]. 1. A genus of tropical trees. *A. occidentale* yields cashew gum and the cashew nut. 2. The oil of the pericarp of the cashew nut, known as cardol, and used as an escharotic. Of reputed value in leprosy. **A. Tinct.**, 1 to 10 of rectified spirit. Dose, mjj-x. **A. Ung.**, one part of the tar to eight of lard or vaselin. Used as a blistering ointment.

**Anacatadidymous** (*an-ak-at-ad-id'-im-us*) [ἀνά, up; κατά, down; διδυμος, a twin]. Divided above and below, but joined centrally into one; said of certain twin monsters.

**Anacatadidymus** (*an-ak-at-ad-id'-im-us*) [ἀνά, up; κατά, down; and διδυμος, a twin]. An anacatadidymous monstrosity.

**Anacatharsis** (*an-ak-ath-at'-sis*) [ἀνά, up; κάθαρσις, purgation]. Expectoration; vomiting.

**Anacathartic** (*an-ak-ath-at'-tik*) [ἀνά, up; κάθαρσις, purgation]. Causing anacatharsis.

**Anaclasis** (*an-ak'-las-is*) [ἀνάκλισις, a breaking off, or back]. 1. Reflection or refraction of light or sound. 2. A fracture; forcible flexion of a stiff joint.

**Anaclastic** (*an-ak-las'-tik*) [ἀνάκλισις, a breaking off, or back]. Pertaining to refraction, or to anaclasis.

**Anaclisis** (*an-ak'-lis-is*) [ἀνάκλισις, a reclining]. Decubitus; the reclining attitude.

**Anacroasia** (*an-ak-ro-a'-ze-ah*) [ἀν priv.; ἀκρόασις, hearing]. Inability to understand words that are heard, while the same words if read by the patient are understood.

**Anacrotic** (*an-ak-rof'-ik*) [*av* priv.; *ἀκρόωσις*, hearing]. Relating to or characterized by anacrotism.

**Anacrotism** (*an-ak'-ro-tizm*) [*ἀνακροτέειν*, to lift up and strike together]. A peculiarity of the pulse-curve, when a series of closely placed elastic vibrations occur in the upper part of the line of ascent, so that the apex appears dentate and forms an angle with the line of descent. It takes place in dilatation and hypertrophy of the left ventricle, when extensibility of the arterial wall is diminished, in great diminution in the velocity of the blood-stream, after ligation of an artery, etc.

ANACROTIC RADIAL PULSE-  
TRACINGS  
a, a, the anacrotic parts.

**Anacusia** (*an-ak-u'-se-ah*) [*av* priv.; *ἀκούειν*, to hear]. Complete deafness; abolition of the sense of hearing.

**Anadenia** (*an-ad-e'-ne-ah*) [*av* priv.; *ἀδην*, gland]. Insufficiency of glandular function. Chronic want of gastric secretion.

**Anadicrotic** (*an-ah-di-krot'-ik*) [*ἀνά*, upward; *δύ*, twice; *κρότος*, a stroke]. Characterized by anadicrotism.

**Anadicrotism** (*an-ah-di'-krot-izm*) [*ἀνά*, upward; *δύ*, twice; *κρότος*, a stroke]. Dicrotism of the pulse-wave occurring in the upward stroke.

**Anadidyous** (*an-ad-id'-im-us*) [*ἀνά*, up; *δίδυμος*, a twin]. Cleft upward into two, while single below—said of certain joined twins.

**Anadidymus** (*an-ad-id'-im-us*) [*ἀνά*, up; *δίδυμος*, a twin]. An anadidyous monster.

**Anadiplosis** (*an-ah-dip-lo'-sis*) [*ἀνά*, up, back; *διπλόω*, to double]. The reduplication or redoubling of a fever-paroxysm.

**Anadiplotic** (*an-ah-dip-lo'-ik*) [*ἀνά*, up; *διπλόω*, to double]. Characterized by anadiplosis.

**Anadipsia** (*an-ah-dip'-se-ah*) [*ἀνά*, intensive; *διψία*, thirst]. Intense thirst.

**Anadipsic** (*an-ah-dip'-sik*) [*ἀνά*, intensive; *διψία*, thirst]. Causing or relating to great thirst.

**Anadosis** (*an-ad'-o-sis*) [*ἀνάδοσις*, distributing]. Vomiting; upward determination of blood.

**Anadrom** (*an-ad'-rom*) [*ἀνά*, up; *δραμεῖν*, to run]. In biology, a fish that ascends rivers to spawn.

**Anadromous** (*an-ad'-ro-mus*) [*ἀνὰδρῶμος*, running up]. Ascending; moving upward. Said of pains, etc.

**Anæmatopoeisis** (*an-e-mat-o-poi'-e-sis*). See *Anæmatopoeisis*.

**Anæmatosis** (*an-e-mat-o'-sis*). See *Anematosis*.

**Anæmia** (*an-e-m'-ah*). See *Anemia*.

**Anæmotrophy** (*an-e-mot'-ro-fe*). See *Anemotrophy*.

**Anaërobia** (*an-a-er-o'-be-ah*) [*av* priv.; *ἀήρ*, air; *βίος*, life]. Microorganisms having the power of living without either air or free oxygen. **A.**, **Facultative**, applied to organisms normally or usually living in the presence of oxygen, but under certain circumstances becoming anaërobic.

**Anaërobic** (*an-a-er-o'-bik*) [*av* priv.; *ἀήρ*, air; *βίος*, life]. A term used of microorganisms, that live in the absence of free oxygen or air. See *Aërobic*.

**Anaërobiosis** (*an-a-er-o-bi-o'-sis*) [*av* priv.; *ἀήρ*, air; *βίος*, life]. Life sustained in the absence of free oxygen; the power of living where there is no free oxygen.

**Anaërobiotic** (*an-a-er-o-bi-o'-ik*). Same as *Anaërobious*.

**Anaerobious** (*an-a-er-o-be-us*) [*av* priv.; *ἀήρ*, air; *βίος*, life]. In biology, capable of existing without free

oxygen by a power of obtaining oxygen from organic substances.

**Anaërophyte** (*an-a-er-o-fit*) [*av* priv.; *ἀήρ*, air; *φυτόν*, a plant]. In biology, a plant capable of living without a direct supply of oxygen.

**Anaëroplastic** (*an-a-er-o-plas'-tik*) [*av*., priv.; *ἀήρ*, air; *πλαστικόν*, to shape]. Pertaining to anaëroplasty.

**Anaëroplasty** (*an-a-er-o-plas-te*) [*av* priv.; *ἀήρ*, air; *πλαστικόν*, to shape]. The treatment of wounds by immersion in warm water, so as to exclude the air.

**Anæsthesia** (*an-es-the'-ze-ah*). See *Anesthesia*.

**Anæsthetic** (*an-es-thet'-ik*). See *Anesthetic*.

**Anætiological** (*an-e-te-o-loi'-ik-al*). See *Anetiological*.

**Anagallis** (*an-ag-al'-is*) [*L.*]. A genus of plants. **A.**

**Arvensis**, Pimpernel. An herb having some local reputation as a remedy for rheumatism and as a preventive of hydrophobia. Dose of the fluid extract ʒj.

**Anagenensis** (*an-aj-en-e'-sis*) [*ἀναγενεσις*, regeneration]. Reparation or reproduction of tissues.

**Anagnostakis's Operation**. See *Operations*, Table of.

**Anagraph** (*an'-a-graf*) [*ἀναγραφή*, a writing out]. A physician's prescription or recipe.

**Anagyrin** (*an-aj-i'-rin*) [*Anagryris*, from *ἀνά*, backward; *γῆρας*, a circle],  $C_{14}H_{18}N_2O_2$ . An alkaloid from the seeds of *Anagryris fatida*, *L.*, a leguminous shrub of Southern Europe. Its hydrochlorate is poisonous, slowing the respiration, and interfering with the heart's action. Unof.

**Anakroasia** (*an-ak-ro-a'-se-ah*). See *Anacroasia*.

**Anakusis** (*an-ak-u'-sis*). See *Anacusia*.

**Anal** (*a'-nal*) [*anus*, the fundament]. Pertaining to the anus.

**Analepsia** (*an-al-ep'-se-ah*). See *Analepsis*.

**Analepsis** (*an-al-ep'-sis*) [*ἀναλήψις*, a taking up]. Recovery of strength after disease.

**Analepsy** (*an'-al-ep-se*). See *Analepsis*.

**Analeptic** (*an-al-ep'-tik*) [*ἀναληπτικός*, restorative]. 1. Restorative. 2. Any agent restoring strength after illness, as nourishing foods and tonics.

**Analgen** (*an-al'-jen*) [*av* priv.; *ἀλγος*, pain],  $C_{26}H_{14}N_2O_4$ . A white, tasteless, crystalline powder, almost insoluble in water, soluble with difficulty in cold alcohol, but more readily in hot alcohol and dilute acids. It melts at 400.4° F. It is employed as an analgesic, antineuralgic, and antipyretic, in doses of from seven and a half to thirty grains. Unof.

**Analgesia** (*an-al-je'-ze-ah*) [*a* priv.; *ἀλγος*, pain]. Insensibility to or absence of pain.

**Analgesic** (*an-al-je'-sik*) [*av* priv.; *ἀλγος*, pain]. 1. Anodyne; relieving pain. 2. Affected with analgesia.

3. A remedy that relieves pain either by depressant action on the nerve centers or by impairing the conductivity of nerve fibers.

**Analgesin** (*an-al-je'-sin*). See *Antipyrin*.

**Algæa** (*an-al'-je-ah*) [*av* priv.; *ἀλγος*, pain]. Paralysis of the sense of pain; absence of pain.

**Algalic** (*an-al'-jik*) [*av* priv.; *ἀλγος*, pain]. Analgesic.

**Analognism** (*an-al'-o-jism*) [*ἀναλογισμός*, reasoning; *ἀνά*, through; *λόγος*, ratio]. Diagnosis by analogy or by reasoning.

**Analogous** (*an-al'-o-gus*) [*ἀνάλογος*, conformable]. Conforming to, proportionate, answering to. See, also, *Analogue*. **A. Tissues**, morbid tissues similar to the elementary and normal tissues of the body.

**Analogue** (*an'-al-og*) [*ἀνάλογος*, conformable]. A part or organ having the same function as another, but with a difference of structure. The correlative term, *homologue*, denotes identity of structure with difference of function. The wing of the butterfly and that of the bird are *analogous*, but the wing of a bird and the arm of a man are *homologous*. **A.**, **Non-homologous**, are parts that have a similarity of

function without any similarity as to relative position, *e.g.*, the legs of a lizard and those of a lobster. **A., Homologous**, is used of parts that are similar both as to function and relative position, *e.g.*, the wings of a bat and of a bird.

**Analysis** (*an-al'-is-is*) [*ἀναλύειν*, to unloose]. The resolution of compound bodies into simpler, or constituent parts. **A., Densimetric**, analysis of a subject by means of determining the specific gravity of the solution and thus estimating the amount of dissolved matter. **A., Gasometric**, the determination of the constituents of gaseous compounds, especially the determination of the amount of oxygen in samples of atmospheric air. **A., Gravimetric**, the quantitative determination by weight of the elements of a body. **A., Organic**, the determination of the elements of matter formed under the influence of life. The analysis of animal and vegetable tissues. **A., Proximate**, the determination of the simpler compound elements into which a substance may be resolved. **A., Qualitative**, the determination of the nature and number of elements that compose a body. **A., Quantitative**, the determination of the proportionate parts of the various elements of a compound. **A., Spectral**, the determination of the composition of a body by means of the spectroscope. **A., Ultimate**, the resolution of a compound, not into its simpler constituents, but its ultimate elements. **A., Volumetric**, the quantitative determination of a constituent by ascertaining the volume of a liquid required to complete a given reaction.

**Analyzer** (*an'-al-i-zer*) [*ἀναλύειν*, to unloose]. In microscopy, the Nicol prism placed at some level above the object which receives and exhibits the properties of light after polarization.

**Anamirtin** (*an-am-er'-tin*) [*Anamirta*, a genus of plants],  $C_{19}H_{36}O_2$ . A glycerid derived from *Cocculus indicus*, the berry-like fruit of *Menispermum cocculus*, L.

**Anamnesia** (*an-am-ne'-ze-ah*). See *Anamnesis*.

**Anamnesis** (*an-am-ne'-sis*) [*ἀνάμνησις*, a recalling to mind]. 1. The faculty of memory; recollection. 2. That which is recollected: information gained regarding the past history of a case from the patient or from his friends or from other persons.

**Anamnestic** (*an-am-nes'-tik*) [*ἀνάμνησις*, a recalling to mind]. 1. Recalling to mind; remembering. 2. Restorative of the memory.

**Anamnia** (*an-am'-ne-ah*). See *Anniota*.

**Anamnionic** (*an-am-ne-on'-ik*). Same as *Anamnistic*.

**Anamnistic** (*an-am-ne-on'-ik*) [*ἀν priv.*; *ἀνίον*, am-nion]. In biology, without an amnion, as fishes.

**Anamorphism** (*an-am-orf'-izm*). Same as *Anamorphosis*.

**Anamorphosis** (*an-am-orf'-o'-sis*) [*ἀναμόρφωσις*; *ἀνα*, again; *μορφένειν*, to form]. Distortion or anomaly of development. In biology, gradual change of form in successive members of a group.

**Anamorphosy** (*an-am-orf'-fo-se*). See *Anamorphosis*.

**Anam Ulcer**. A form of phagedena such as is common in hot countries. It begins with an inflammation starting from a small abrasion of the skin, generally on the foot and leg, with sloughing of the inflamed skin, producing a sharp-cut ulcer that spreads slowly, preceded by an area of inflammation. Its course is remarkably slow, and its resistance to treatment obstinate. Syphilis and anemia are predisposing factors.

**Anandria** (*an-an'-dre-ah*) [*ἀν priv.*; *ἀνὴρ*, man]. Lack of virility; male impotence.

**Anandrous** (*an-an'-drus*) [*ἀν priv.*; *ἀνὴρ*, a male]. In biology, without stamens.

**Anantherous** (*an-an'-ther-us*) [*ἀν priv.*; *anthera*, anther]. In biology, without anthers.

**Ananthous** (*an-an'-thus*) [*ἀν priv.*; *ἄνθος*, a flower]. In biology, destitute of flowers.

**Anantochasmus** (*an-an-to-kaz'-mus*) [*ἀναντῆς*, steep; *χασμα*, a chasm]. Lissauer's term for a skull in which there is a forward inclination of the line connecting the basion and staphylon.

**Anantocoryphus** (*an-an-to-kor'-if-us*) [*ἀναντῆς*, steep; *κορυφή*, the crown]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line connecting the bregma and lambda is between 52° and 41°.

**Anantopyl** (*an-an'-o-pyl*) [*ἀναντῆς*, steep, up-hill; *πίλη*, an entrance]. A term applied by Lissauer to skulls in which the foramen magnum looks slightly forward when referred to the radius fixus as a horizontal.

**Ananturaniscus** (*an-an-tu-ran-is'-kus*) [*ἀναντῆς*, steep; *ὀμπανσχορ*, canopy, vault]. Lissauer's term for a skull in which there is a forward inclination of the line joining the alveolar point and the posterior border of the incisive foramen.

**Ananturanus** (*an-an-tu-ra'-nus*) [*ἀναντῆς*, steep; *ὀμπανός*, the vault]. Lissauer's term for a skull in which the radius fixus being horizontal, there is a forward-looking of the palate.

**Anapeiratic** (*an-ap-i-rat'-ik*) [*ἀναπειρασθαι*, to do again]. Due to frequent repetition; a general term for such affections as writers' and telegraphers' cramp, or paralysis.

**Anaphalantiasis** (*an-af-al-un-ti'-as-is*) [*ἀνα*, up; *φάλαθος*, bald in front]. The falling out of the eyebrows.

**Anaphases** (*an-af-a'-sez*) [*ἀνά*, up; *φάσις*, a phase]. In biology, the phenomena of karyokinesis immediately preceding the formation of the daughter stars, and up to the formation of the resting daughter nuclei. See *Metaphases*.

**Anaphia** (*an-a'-fe-ah*) [*ἀν priv.*; *αἴψι*, touch]. Defect in the sense of touch.

**Anaphrodisia** (*an-af-ro-di'-e-ah*) [*ἀν priv.*; *Ἀφροδίτη*, Venus]. Absence or impairment of sexual appetite.

**Anaphrodisiac** (*an-af-ro-di'-e-ah*) [*ἀν priv.*; *Ἀφροδίτη*, Venus]. 1. Relating to, affected by, or causing anaphrodisia. 2. An agent that allays the sexual desire.

**Anaphroditic** (*an-af-ro-di'-ik*) [*ἀν priv.*; *Ἀφροδίτη*, Venus]. Asexually produced.

**Anaphroditous** (*an-af-ro-di'-it-us*) [*ἀν priv.*; *Ἀφροδίτη*, Venus]. Having no sexual impulses or appetite.

**Anaplaste** (*an'-ap-laz*) [*ἀνά*, up; *πλάσσειν*, to build]. The stage of growth and development; the period before full maturity.

**Anaplast** (*an'-ap-last*) [*ἀναπλάσσειν*, to shape]. See *Leucoplast*.

**Anaplastic** (*an-ap-las'-tik*) [*ἀναπλάσσειν*, to build up]. 1. Relating to anaplasty; restoring a lost or defective part. 2. An agent that facilitates repair by restoring or increasing the plastic elements of the blood.

**Anaplasty** (*an'-ap-las-tv*) [*ἀναπλάσσειν*, to build up]. Operation for the renewal or restoration of lost parts, commonly called a plastic operation; plastic surgery.

**Anaplerosis** (*an-ap-le-ro'-sis*) [*ἀνά*, up; *πληρόειν*, to fill]. The restoration or repair of a wound, sore, or lesion in which there has been a loss of substance.

**Anaplerotic** (*an-ap-le-ro'-ik*) [*ἀνά*, up; *πληρόειν*, to fill]. 1. Promotive of repair, favoring granulation. 2. A remedy or application that promotes repair.

**Anapneometer** (*an-ap-ne-om'-et-er*) [*ἀναπνοή*, respiration; *μέτρον*, a measure]. An anapnograph.

**Anapnograph** (*an-af'-no-graf'*) [*ἀναπνοή*, respiration; *γράφειν*, to write]. An apparatus registering the movements of inspiration and expiration, together with the quantity of air inhaled.

**Anapnoic** (*an-af'-no'-ik*) [*ἀνά*, against; *ἀπνοία*, want of breath]. Favoring respiration; relieving dyspnea.

**Anapnometer** (*an-af'-nom'-et-er*) [*ἀναπνοή*, respiration; *μέτρον*, a measure]. An anapneometer.

**Anapophysis** (*an-af'-off'-is-is*) [*ἀνά*, back; *ἀπόφυσις*, an offshoot]. An accessory process of a lumbar or posterior dorsal vertebra, corresponding to the inferior tubercle of the transverse process of a typical dorsal vertebra.

**Anarcotin** (*ah-nar'-kō-tin*) [*ἀν* priv.; *ναρκωτικός*, narcotic]. Narcotin, so called from its lack of narcotic power.

**Anargyros** (*an-ar'-jir-us*) [*ἀν* priv.; *ἀργύρος*, silver; *φλ.* *Anargyri*]. An old name for a practitioner who treated the sick gratuitously.

**Anarrhea**, or **Anarrhœa** (*an-ar'-e'-ah*) [*ἀνά*, up; *ῥοία*, flow]. Afflux to an upper part, as of blood to the head.

**Anarrhexis** (*an-ar'-eks'-is*) [*ἀνά*, up; *ῥήξις*, fracture]. Surgical refracture of a bone.

**Anarthria** (*an-ar'-thre-ah*) [*ἀν* priv.; *ἄρθρον*, articulation]. 1. Partial aphasia from partial destruction of the paths of the motor tracts of speech, and characterized by defective articulation. 2. Without joints.

**Anarthrous** (*an-ar'-thrus*) [*ἀν* priv.; *ἄρθρον*, a joint]. Jointless. So corpulent that no joints are visible.

**Anasarca** (*an-ah-sar'-kah*) [*ἀνά*, through; *σάψ*, the flesh]. An accumulation of serum in the areolar tissues of the body. If associated with effusion of fluid into serous cavities it is called *general dropsy*. If the affection is local, it is called *edema*. This local form is generally the result of some mechanical obstruction to the flow of blood in the part.

**Anasarcous** (*an-ah-sar'-kus*) [*ἀνά*, through; *σάψ*, the flesh]. Affected with anasarca.

**Anaspadias** (*an-as-pa'-de-as*) [*ἀνά*, up; *σπένειν*, to draw]. An urethral opening upon the upper surface of the penis.

**Anastaltic** (*an-as-tal'-tik*) [*ἀνασταλτικός*, checking, putting back, or up; *στέλλειν*, to send]. 1. Strongly astringent. 2. Centripetal; afferent; used of nerve-currents.

**Anastasis** (*an-as'-tas-is*) [*ἀνάστασις*, a setting up]. Recovery; convalescence; a state of improving health, vigor, or development.

**Anastate** (*an'-as-tāt*) [*ἀνάστατος*, caused to rise]. Any substance that appears in or is characteristic of an anabolic process.

**Anastatic** (*an-as-tat'-ik*) [*ἀνάστατος*, caused to rise]. Tending to recovery; restorative.

**Anastole** (*an-as'-to-le*) [*ἀναστόλη*, retracted]. Retraction; shrinking away, as of the lips of a wound.

**Anastom** (*an'-as-tōm*) [*ἀνά*, above; *στόμα*, mouth]. Any mouthless organism; specifically, a member of the genus *Anastoma*, among the Gasteropods or Orthoptera, or *Anactomus* among the Salmonidæ.

**Anastomosis** (*an-as-to-mō'-sis*) [*ἀναστυμώειν*, to bring to a mouth]. The intercommunication of vessels. *Anastomotic arteries of the thigh*, etc., branches of the brachial, femoral, etc., whereby the collateral circulation is established after ligation for aneurysm, etc. The term has been inaccurately used of the junction of the nerve-filaments. **A.**, **Crucial**, an arterial anastomosis in the upper part of the thigh, formed by the anastomotic branch of the sciatic, the first perforating, the internal circumflex, and the transverse branch of the external circumflex. **A.**, **Intestinal**, an operation consisting in establishing a communication between the intestine above and that below the obstruc-

tion, in cases of intestinal obstruction. In this way the impermeable portion of the bowel is excluded from the fecal circulation.

**Anastomotic** (*an-as-to-mō'-ik*) [*ἀναστυμώειν*, to bring to a mouth]. Pertaining to anastomosis.

**Anatherapeusis** (*an-ath-er-ap'-u'-sis*) [*ἀνά*, forward; *θεραπεύω*, medical treatment]. Treatment by increasing doses.

**Anathrepsis** (*an-ath-rep'-sis*) [*ἀνὰθρεψις*, a fresh growth]. A renewal of lost flesh after recovery.

**Anathreptic** (*an-ath-rep'-tik*) [*ἀνὰθρεψις*, a fresh growth]. Restorative of lost flesh; nutritive.

**Anatomical** (*an-at-om'-ik-al*) [*ἀνατομία*, anatomy]. Pertaining to anatomy. **A.** **Tubercle**. See *Terruca necrogenica*.

**Anatomism** (*an-at'-om-izm*) [*ἀνατομία*, anatomy]. The theory that anatomical conditions determine all the phenomena of life, health, and disease.

**Anatomist** (*an-at'-om-ist*) [*ἀνατομία*, anatomy]. One who is expert in anatomy. **A.**'s **Snuff-box**, the triangular space between the tendons of the extensor of the metacarpal bone of the thumb and the extensor of the first phalanx on the back of the hand.

**Anatomy** (*an-at'-o-me*) [*ἀνά*, up, apart; *τέμνειν*, to cut]. The dissection of organic bodies in order to study their structure, the situations and uses of their organs, etc. **A.**, **Applied**, anatomy as concerned in the diagnosis and management of pathological conditions. **A.**, **Comparative**, the investigation and comparison of the anatomy of different orders of animals or of plants, one with another. **A.**, **Descriptive**, a study of the separate and individual portions of the body, apart from their relationship to surrounding parts. **A.**, **Gross**, anatomy of the macroscopic tissues. **A.**, **Homological**, the study of the correlations of the several parts of the body. **A.**, **Minute**, that studied under the microscope. **A.**, **Morbid or Pathological**, a study of diseased structures. **A.**, **Physiognomical**, the study of expressions depicted upon the exterior of the body, especially upon the face. **A.**, **Regional**, a study of limited parts or regions of the body, the divisions of which are collectively or peculiarly affected by disease, injury, operations, etc. **A.**, **Surgical**, the application of anatomy to surgery. **A.**, **Topographical**, the anatomy of a single portion or part of the body. **A.**, **Transcendental**, the study of the general design of the body, and of the particular design of the organs. **A.**, **Veterinary**, the anatomy of domestic animals.

**Anatropsis** (*an-at-rip'-sis*) [*ἀνὰτριψις*, a rubbing]. Rubbing; the removal of a part or growth by scraping or rubbing; inunction. Also an upward or centripetal movement in massage.

**Anatripsology** (*an-at-rip-sol'-o-je*) [*ἀνὰτριψις*, a rubbing; *λόγος*, science]. The science of friction as a remedial agent.

**Anatriptic** (*an-at-rip'-tik*) [*ἀνὰτριψις*, a rubbing]. A medicine to be applied by rubbing.

**Anatropal** (*an-at'-ro-pal*) [*ἀνὰτριπναι*, to turn upside down]. See *Anatropous*.

**Anatropous** (*an-at'-ro-pus*) [*ἀνά*, up; *τρέπναι*, to turn]. In biology, inverted. Applied to the ovule when completely inverted, so that the hilum and micropyle are brought close together.

**Anaudia** (*an-au'-de-ah*) [*ἀν* priv.; *αὐδή*, voice]. Loss of voice; dumbness; inability to articulate.

**Anaxonia** (*an-aks'-o'-ne-ah*) [*αν* priv.; *ἄξων*, axle, axis]. In biology, organic forms wholly irregular or varying, and without axes.

**Anazoturia** (*an-as-ot'-u'-re-ah*) [*αν* priv.; *azotum*, nitrogen; *οὔρον*, urine]. A name applied to that form of chronic diuresis in which urea is deficient or absent from the urine.

**Anbury** (*an'-ber-e*) [E. dialect]. A soft tumor or pendulous wart, chiefly on horses and cattle.

**Ancecerite** (*an-se'-ser-īt*) [*ἄγκη*, bent; *κέρας*, a horn]. In biology, a curved process attached to the peduncle of the second pair of antennae in certain crustacea.

**Ancestral germ-plasmas**. Weismann's "*Ähnungsplasmen*." See *Id.*

**Anchieta** (*an-che'-a'-tah*) [Anchieta, a Brazilian botanist]. A genus of violaceous plants. *A. salutaris*, vegetable mercury. The root of a violaceous plant growing in Brazil, highly recommended as a purgative, and as an alterative in syphilitic affections; it is possibly identical with *Munaea*, *q. v.*

**Anchilops** (*ang'-kil-ōps*). See *Anchylops*.

**Anchorage** (*ang'-kor-āj*) [M. E., *ankren*, an anchor]. The fixation of a floating or displaced viscus, whether by a natural process or by surgical means.

**Anchusa** (*ang-ku'-sah*) [*ἄλυσσα*, alkanet]. A genus of boraginaceous herbs. See *Alkanet*.

**Anchusin** (*ang'-ku-sin*) [*ἄλυσσα*, alkanet].  $C_{35}H_{40}O_8$ . The red coloring matter characteristic of alkanet-root. See *Alkanet*.

**Anchyloglossia** (*ang-kil-ōs'-glos'-e-ah*). See *Tongue-tie*.

**Anchylops** (*ang'-kil-ōps*) [*ἄγκη*, near; *ὤψ*, the eye]. Abscess at inner angle of eye, prior to rupture.

**Anchylosis** (*ang-kil-ō'-sis*). See *Ankylosis*.

**Anchylostomiasis** (*ang-kil-ō-sto-mī'-as-is*). See *Dochmiasis*.

**Anchylostomum** (*ang-kil-ōs'-to-mum*) [*ἄγκύλος*, crooked; *στόμα*, mouth]. A genus of slender nematoid worms inhabiting the human intestines. *Dochmius* (*Anchylostoma*) *duodenalis*. Leuck. See *Parasites*, *Animal*, *Table of*.

**Ancipital** (*an-sīp'-it-al*) [*anceps*, double]. In biology, two-edged.

**Ancome** (*an'-kum*) [E. dialect]. An inflammation or swelling that comes on suddenly.

**Ancon** (*ang'-kon*) [*ἄγκων*, the elbow]. Originally the olecranon process; applied to the elbow generally.

**Anconad** (*ang'-ko-nad*) [*ἄγκων*, the elbow]. Toward the olecranon, or elbow.

**Anconagra** (*ang-kon-a'-grah*) [*ἄγκων*, the elbow; *ἄρα*, a seizure]. Arthritic pain at the elbow.

**Anconal** (*ang'-kon-al*) [*ἄγκων*, the elbow]. Pertaining to the elbow.

**Anconéal** (*ang-kō'-ne-al*). Same as *Anconal*.

**Anconen** (*ang'-kon-en*) [*ἄγκων*, the elbow]. Belonging to the ancon in itself.

**Anconeus** (*ang-kō-ne'-us*) [*ἄγκων*, the elbow]. A small muscle, an extensor of the forearm, inserted into the olecranon and upper third of the forearm. It arises from the external condyle of the humerus. See *Muscles*, *Table of*.

**Anconoid** (*ang'-kon-oid*) [*ἄγκων*, the elbow]. Resembling the elbow.

**Ancora** (*ang'-ko-rah*) [L., an anchor]. In biology, an anchor-shaped Synapta spicule.

**Ancyloblepharon** (*an-sil-ō-blef'-ar-on*). See *Ankyloblepharon*.

**AncylGLOSSUM** (*an-sil-ō-glos'-um*). See *Tongue-tie*.

**Ancylomele** (*an-sil-ō-me'-le*). See *Ankylo-mele*.

**Ancyroid** (*an'-sir-oid*) [*ἄγκυρα*, anchor; *είδος*, form]. Shaped like an anchor.

**Andersch's Ganglion**. See *Ganglia*, *Table of*.

**Anderson's Antipruritic Powder**. A powder used in eczema. It consists of powdered starch,  $\mathfrak{V}$  vj; oxid of zinc,  $\mathfrak{I}$  iss; powdered camphor,  $\mathfrak{I}$  ss.

**Anderson's (McCall) Ointment**. An ointment consisting of powdered bismuth oxid  $\mathfrak{I}$  j, oleic acid f  $\mathfrak{I}$  j, white wax  $\mathfrak{I}$  iij, vaselin  $\mathfrak{I}$  ix. These are heated together and when nearly cool a little oil of rose is added. It is an excellent soothing ointment for the skin.

**Anderson's Pill**. The compound gamboge pill.

**Andira** (*an-di'-rah*) [L.]. A genus of tropical leguminous trees. *A. araroba*, affords the Goa Powder (see *Araroba*). Several species yield active medicines, chiefly of local repute. *A. inermis* (Cabbage-tree) *A. anthelmintica*, of Brazil, and *A. retusa*, of Guiana, have barks efficacious against worms.

**Andranatomy** (*an-dran-ot'-o-me*) [*ἀνдр*, a man; *ανατομία*, anatomy]. Human anatomy; the anatomy or dissection of the male human subject.

**Andrecium**, or **Andræcium** (*an-dre'-se-um*) [*ἀνдр*, a man; *οἶκος*, a house]. In biology, a term applied to the stamens as a whole.

**Androclinium** (*an-dro-kin'-e-um*). See *Clinandrium*.

**Andro-diecious** (*an-dro-di'-e'-she-us*) [*ἀνдр*, male; *δύς*, two; *οἶκος*, a house]. In biology, flowers staminate on one plant, perfect on another.

**Androgallactozemia** (*an-dro-gal'-ak-to-ze'-me-ah*) [*ἀνдр*, man; *γάλα*, milk; *ζημία*, loss]. The presence of milk in the male mammary.

**Androgonidium** (*an-dro-gon-id'-e-um*). See *Androspore*.

**Androgyna** (*an-droj'-in-ah*) [*ἀνдр*, man; *γυνή*, woman]. An hermaphrodite; a female in whom the genital organs are similar to those of the male.

**Androgyneity** (*an-droj'-in-e'-it-e*) [*ἀνдр*, man; *γυνή*, woman]. Hermaphroditism.

**Androgynism** (*an-droj'-in-izm*) [*ἀνдр*, man; *γυνή*, woman]. Hermaphroditism.

**Androgynous** (*an-droj'-in-us*) [*ἀνдр*, man; *γυνή*, woman]. Hermaphrodite. In biology, having male and female flowers in the same inflorescence.

**Androgynus** (*an-droj'-in-us*) [*ἀνдр*, man; *γυνή*, woman]. An hermaphrodite. A male with genital organs similar to those of the female.

**Androgyny** (*an-droj'-in-e*). See *Androgynism*.

**Andrology** (*an-drol'-o-je*) [*ἀνдр*, man; *λόγος*, science].  
1. The science of man, especially of the male sex.  
2. The science of the diseases of the male genitourinary organs.

**Andromania** (*an-dro-ma'-ne-ah*) [*ἀνдр*, a man; *μανία*, madness]. Nymphomania, *q. v.*

**Andromeda** (*an-drom'-e-dah*) [*Ἀνδρουμένη*, a mythological character]. A genus of Ericaceae shrubs having poisonous or narcotic properties. The leaves of *A. mariana* and *A. nitida*, of North America, and of *A. polyfolia* of both continents, are useful in the external treatment of old ulcers, a decoction being applied hot to the sore. Unof.

**Andromonæcious** (*an-dro-mo-ne'-she-us*) [*ἀνдр*, male; *μόνος*, single; *οἶκος*, house]. In biology, of or pertaining to a plant that bears staminate and perfect, but no pistillate flowers.

**Andromorphous** (*an-dro-mor'-fus*) [*ἀνдр*, man; *μορφή*, form]. Shaped like a man.

**Androphobia** (*an-dro-fō'-be-ah*) [*ἀνдр*, man; *φόβος*, dread]. Fear or dislike of man.

**Androphonomania** (*an-dro-fō-no-ma'-ne-ah*) [*ἀνδροφόνος*, man-killing; *μανία*, madness]. Homicidal insanity.

**Androphore** (*an'-dro-fōr*) [*ἀνдр*, man; *φέρειν*, to bear]. In biology, a stalk supporting an andrecium, a staminal column, or a body supporting an antheridium. In biology, a generative bud of a hydrozoan producing male elements only.

**Andropogon** (*an-dro-po'-gon*) [*ἀνдр*, man; *πόγων*, beard]. A genus of coarse grasses of many species. *A. nardus* affords oil of citronella; *A. citratus*, lemon-grass oil; *A. schwananthus*, oil of rusa, etc. These oils are employed in perfumery, and are said to be useful in rheumatism. The oil-bearing andropogons are chiefly S. Asiatic. Unof.

**Androsporangium** (*an-dro-spo-ran'je-am*) [ἀνδρ, man; σπορά, a spore; αγγείου, a vessel]. In biology a sporangium producing androspores.

**Androspore** (*an'-dro-spor*) [ἀνδρ, a man; σπόρος, seed]. In biology, the peculiar swarmspore of the *Eidogoniae* which develops to a "dwarf male" and gives rise to antherozooids.

**Androtomous** (*an-drot'-o-mus*) [ἀνδρ a man; τεύειν, to cut]. In biology, characterized by congenital division of the stamens into several parts.

**Androtomy** (*an-drot'-o-me*). See *Andranatomy*.

**Andrum** (*an'-drum*) [Guzerali *andrum*; ἀνδρόνυμ]. A form of elephantiasis *Arabum* characterized by edema of the scrotum.

**Aneccrisia** (*an-ek-ris'-ah*) [ἀν priv.; ἐκ, out; κρίσις, separation]. The suppression or deficiency of any excretion.

**Anechinoplacid** (*an-ek-i-no-plas'-id*) [ἀν priv.; ἐχίνος, a hedgehog; πλάς, a plate]. In biology, having the madreporic plate destitute of spines; the opposite of *Echinoplacid*.

**Anectasia** (*an-ek-tá-se-ah*). See *Anectasis*.

**Anectasis** (*an-ek'-tas-is*) [ἀν priv.; ἔκτασις, extension]. Deficient size of an organ or part.

**Aneilema** (*an-i-le'-mah*) [ἀνά, up; εἰλέειν, to roll]. Flatulence; air or wind in the bowels; colic.

**Anelectric** (*an-el-ek'-trik*) [ἀν priv.; ἡλεκτρον, amber]. Readily giving up electricity.

**Anelectrode** (*an-el-ek'-trol*) [ἀνά, upward; ἡλεκτρον, amber; ὁδός, a path]. The positive pole of a galvanic battery.

**Anelectrotonic** (*an-el-ek-tro-ton'-ik*) [ἀν priv.; ἡλεκτρον, electricity; τόνος, tension]. Relating to anelectrotonus. **A. Zone**. See *Zone*.

**Anelectrotonos** (*an-el-ek-trol'-o-nos*) [ἀν priv.; ἡλεκτρον, electricity; τόνος, tension]. Anodal electrotonus.

**Anelectrotonus** (*an-el-ek-trol'-o-nus*) [ἀν priv.; ἡλεκτρον, electricity; τόνος, tension]. In electrotherapy, the decreased functional activity that occurs in a nerve in the neighborhood of the anode. See *Electrotonus* and *Catelectrotonus*.

**Anel's Operation**. See *Operations, Table of*. **A. Probe**, or **Sound**, a fine probe used in operations upon the lachrymal passages. **A. Syringe**, a syringe used in injecting fluids into the lachrymal passages.

**Anelytrous** (*an-el'-il-rus*) [ἀν priv.; ἐλυτρον, shard]. In biology, with membranous wings, and no elytra.

**Anematopoesis** (*an-e-mat-o-poi'-e-sis*) [ἀν priv.; αἷμα, blood; ποίησις, a making]. Deficient formation of blood.

**Anematosis**, or **Anæmatosis** (*an-e-mat'-o-sis*) [ἀναιμία, bloodless]. 1. General, or idiopathic anemia; the morbid state or process that leads to anemia; that diathesis that is associated with an anemic tendency. 2. Anemia dependent on want of development of the red corpuscles of the blood.

**Anemia** (*an-el'-me-ah*) [ἀν priv.; αἷμα, blood]. Deficiency of blood, or deficiency of the relative number of its red corpuscles, the latter being the most generally understood meaning and use of the term. It may be *general* or *local*. *Ischemia* is a form of local anemia, and is the result of mechanical interference with the circulation of the affected part, either from vaso-motor spasm, thrombosis, embolism, or the action of styptics. The cause of general anemia is often obscure, or it may be due either to an insufficient food-supply and excessive drain or blood-waste, or from repeated hemorrhages or exhausting discharges. The action of certain poisons, as mercury and lead, will also produce a form of anemia. Prolonged anemia will give rise to fatty degeneration of the organs and tissues. *Idiopathic*, *pernicious*, *es-*

*sential*, *progressive*, *malignant*, etc., are terms denoting a type resisting all treatment and steadily progressing to a fatal termination. **A. Idiopathic**, advances to a fatal issue, and is associated with febrile symptoms; its causation is not evident; it is called also *Primary Anemia*. **A. Local**. See *Hyperemia*, *Ischemia*, and *Anemia*. **A. lymphatica**. Synonym of *Hodgkin's Disease*. See *Lymphadenoma*. **A. Primary**. See *A. Idiopathic*. **A. Secondary**, or **Symptomatic**, follows some ascertainable lesion or injury, or from some other disease. **A. Symptomatic**. See *A. Secondary*.

**Anemiate**, or **Anæmate** (*an-el'-me-āt*) [ἀν priv.; αἷμα, blood]. Affected with anemia.

**Anemiated**, or **Anæmiated** (*an-el'-me-a-ted*). See *Anemic*.

**Anemied**, or **Anæmied** (*an-el'-mid*) [ἀν priv.; αἷμα, blood]. Anemic.

**Anemic**, or **Anæmic** (*an-em'-ik*, *an-el'-mik*) [ἀν priv.; αἷμα, blood]. Pertaining to anemia. **A. Murmur**, a blood murmur, or soft murmur heard at the base of the heart over the great vessels. **A. Necrosis**, a necrosis or death of scattered patches of the heart muscle, due to a want of nourishment. It arises from atheroma occluding the cardiac arteries and their branches.

**Anemometer** (*an-e-mom'-et-er*) [ἀνεμος, wind; μέτρον, a measure]. An instrument for measuring the velocity of the wind.

**Anemometry** (*an-e-mom'-et-re*) [ἀνεμος, wind; μέτρον, a measure]. The art of measuring the velocity and direction of the wind, principally by means of the *anemometer*.

**Anemone** (*an-em'-o-ne*) [ἀνεμώνη, wind flower]. An important genus of ranunculaceous herbs, most of which have active medicinal and poisonous qualities, and some of which are used in medicine. See *Pulsatilla*.

**Anemonin** (*an-em'-o-nin*) [ἀνεμώνη, wind-flower], C<sub>15</sub>-H<sub>12</sub>O<sub>6</sub>. The active principle of the *Anemone*. It is given in bronchitis, asthma, and convulsive cough. Dose gr. ¼-¾ twice daily.

**Anemonol** (*an-em'-on-ol*) [ἀνεμώνη, wind-flower; oleum, oil]. The volatile oil extracted from anemone; it is a powerful vesicant.

**Anemophilous** (*an-em-off'-il-us*) [ἀνεμος, wind; φίλος, loving]. Depending for cross-fertilization upon the agency of the wind, as certain flowers.

**Anemosis**, or **Anæmosis** (*an-em-o'-sis*) [ἀν priv.; αἷμα, blood]. Defective supply of blood; anemia dependent on want of red blood corpuscles. See *Anematosis*.

**Anemotrophy**, or **Anæmotrophy** (*an-em-ol'-ro-fe*) [ἀν priv.; αἷμα, blood; τροφή, nourishment]. A deficiency of blood nourishment; an impoverished state of the blood.

**Anencephalia** (*an-en-sef-al'-le-ah*) [ἀν priv.; ἐγκέφαλος, brain]. Congenital absence of the brain.

**Anencephalic** (*an-en-sef-al'-ik*) [ἀν priv.; ἐγκέφαλος, brain]. Pertaining to or characterized by anencephalia.

**Anencephalohemia** (*an-en-sef-al-o-he'-me-ah*) [ἀν priv.; ἐγκέφαλος, brain; αἷμα, blood]. Insufficiency of blood in the brain.

**Anencephaloid** (*an-en-sef'-al-oid*) [ἀν priv.; ἐγκέφαλος, brain]. Pertaining to anencephalia.

**Anencephaloneuria** (*an-en-sef-al-on-ul'-re-ah*) [ἀν priv.; ἐγκέφαλος, brain; νεῦρον, a nerve]. Imperfect nerve-action of the brain.

**Anencephalotrophia**, or **Anencephalotrophy** (*an-en-sef-al-o-tro'-fe-ah* or *-bol'-ro-fe*) [ἀν priv.; ἐγκέφαλος, brain; τροφή, nutrition]. Atrophy, or lack of nutrition of the brain.

**Anencephalus** (*an-en-sef'-ul-us*) [*ἀν* priv.; *ἐγκέφαλος*, brain]. 1. A species of single autostic monsters in which there is neither a trace of the brain nor a rudimentary representative of it. 2. According to Saint-Hilaire, a variety of the above species in which there is extensive laying open of the spinal canal with absence of the spinal cord.

**Anencephaly** (*an-en-sef'-ul-e*). See *Anencephalia*.

**Anenergesia** (*an-en-er-jé'-ze-ah*). See *Anenergia*.

**Anenergia** (*an-en-er'-je-ah*) [*ἀν* priv.; *ἐνέργεια*, energy]. Lack of vigor or power.

**Anenteremia** (*an-en-ter-e'-me-ah*) [*ἀν* priv.; *ἐντέρον*, an intestine; *αἷμα*, blood]. Bloodless condition of the bowels.

**Anenteroneuria** (*an-en-ter-o-nu'-re-ah*) [*ἀν* priv.; *ἐντέρον*, an intestine; *νεῦρον*, a nerve]. Intestinal atony.

**Anenterotrophia** (*an-en-ter-o-tro'-fē-ah*) [*ἀν* priv.; *ἐντέρον*, an intestine; *τροφή*, nourishment]. Defective intestinal nutrition.

**Anenterous** (*an-en-ter-us*) [*ἀν* priv.; *ἐντέρον*, intestine]. In biology, having no intestine, as a tapeworm or a fluke.

**Anepia** (*an-ep'-e-ah*) [*ἀνεπίης*, speechless]. Inability to speak.

**Anepiploic** (*an-ep-ip-lo'-ik*) [*ἀν* priv.; *ἐπίπλοον*, the caul]. Having no epiploëon.

**Anepithymia** (*an-ep-e-thim'-e-ah*) [*ἀν* priv.; *ἐπιθυμία*, desire]. Loss of any natural appetite.

**Anerethisia** (*an-er-eth-is'-e-ah*) [*ἀν* priv.; *ἐρεθίζειν*, to excite]. Imperfect irritability, as of a muscle or nerve.

**Anergia** (*an-er'-je-ah*) [*ἀν* priv.; *ἐργον*, work]. Sluggishness; inactivity.

**Anergic** (*an-er'-jik*) [*ἀν* priv.; *ἐργον*, work]. Characterized by sluggishness; as *anergic* dementia. **A. Stupor**. See *Insanity*, *Stuporous*.

**Aneroid** (*an'-er-oid*) [*ἀν* priv.; *νηρός*, wet; *εἶδος*, form]. Dispensing with a fluid, as quicksilver. **A. Barometer**. See *Barometer*.

**Anerythroblepsia** (*an-er-ith-ro-blep'-se-ah*). Same as *Anerythroptasia*.

**Anerythroblepsy** (*an-er'-ith-ro-blep-se*). Same as *Anerythroptasia*.

**Anerythroptasia** (*an-er-ith-ropt'-se-ah*) [*ἀν* priv.; *ερυθρός*, red; *ὄψις*, sight]. Subnormal color perception of red. See *Blindness*.

**Anesis** (*an'-es-is*) [*ἀναισις*, remission]. An abatement or relaxation in the severity of symptoms.

**Anesthesia**, or **Anæsthesia** (*an-es-the'-ze-ah*) [*ἀνασθησία*, want of feeling]. A condition of insensibility or loss of feeling due to pathological conditions of the centers, conducting paths of the nerves, or the peripheral terminations of the same, or to artificial production by means of anesthetics. **A., Bulbar** or **Central**, due to central disease. **A., Crossed**, anesthesia on one side of the organism, due to a central lesion of the other side. **A., Doll's Head**, a form of anesthesia extending over the head, neck, and upper part of the chest. **A. dolorosa**, severe pain experienced after the occurrence of complete motor and sensory paralysis, a symptom observed in certain diseases of the spinal cord. **A., Local**, of a limited part of the body. **A., Muscular**, loss of the muscular sense. **A., Peripheral**, depending upon conditions of the end-organs of the nerves. **A., Surgical**, by means of anesthetics for the purpose of preventing pain, producing relaxation of muscles, or for diagnostic purposes.

**Anesthesimeter** (*an-es-thez-im'-et-er*) [*ἀνασθησίμα*, want of feeling; *μέτρον*, a measure]. An instrument to measure the amount of an anesthetic administered in a given time.

**Anesthetic**, or **Anæsthetic** (*an-es-the'-ik*) [*ἀν* priv.; *αἰσθάνεσθαι*, to feel]. A substance that produces insensibility to feeling or to acute pain, diminished muscular action, and other phenomena. Anesthetics may be general, local, partial and complete. **A., General**; the following are the substances that have been used for general anesthesia: **AMYLENE**,  $C_5H_{10}$ , a mobile liquid, thin, colorless, translucent; action rapid, producing partial anesthesia. It is used in Germany under the name of *Pental*; it is best administered by means of Junker's inhaler, which modifies its unpleasant odor; it should not be brought near a flame. **CARBON TETRACHLORIDE**, not so irritating to the organs of respiration, but far more dangerous than chloroform. **CHLORAL HYDRATE**, action indirect and incomplete. Rarely, if ever, now used. **CHLOROFORM**, by inhalation. Largely employed in general surgery. It seems to have a selective action upon the nervous system, and also exercises a direct influence upon the muscular tissues of the heart. It paralyzes the vaso-motor system, and death results from cardiac paralysis. Chloroform should always be administered freely mixed with air. The *Method of definite mixtures*, however, as recommended by Clover, and Bert, while admirable in theory, is not entirely practical. The *Lister Method*, also known as the *Scotch* or *Open Method* of administering chloroform, consists in pouring a small amount of the anesthetic upon a common towel arranged in a square of six folds, and holding this as near to the face as can be borne without inconvenience. Various inhalers have been devised for the administration of chloroform, the best of which are *Clover's*, which consists of a large bag capable of containing a given volume of air, into which the vapor of a given quantity of chloroform is allowed to enter, the mixture being so arranged that the tension of chloroform vapor in the air is maintained below 4.5 per cent; *Junker's*, as modified by *Dudley Buxton*, which consists in the inhalation of air containing the chloroform vapor, the latter being taken up by pumping the air through a bottle containing half an ounce of the anesthetic; *Krohn and Sesemann* have modified the foregoing by doing away with the intermittent, jerky delivery of the vapor and by adding to the face-piece an expiration-valve guarded by a stiff feather, which, rising in expiration and falling in inspiration, registers the force and strength of respiration (*Feather respiration register*); *Sansom's* apparatus is a modification of *Snow's*, substituting a gutta-percha covering for the cold-water jacket of *Snow*; *Snow's inhaler* consists of a metallic cylindrical vessel, containing two coils of blotting paper, permitting free circulation of air, and surrounded by another cylinder containing water, the latter being for the purpose of equalizing the temperature. *Syncope* resulting from chloroform administration should be treated by lowering the head, artificial respiration, inhalation of nitrite of amyl, electrical stimulation, and possibly acupuncture of the heart. **ETHYLENE CHLORIDE**, formerly called *ethylene chlorid*, *Dutch liquid*, *chloric ether*, closely resembles chloroform, but is less of a cardiac depressant. It is considered safer than chloroform. Death results from paralysis of the respiratory centers. **ETHER**, by inhalation, is probably the safest known agent for the production of prolonged narcosis. Its action is directed largely to the nervous system, which becomes profoundly affected. It frequently causes spasmodic action and suspension of respiratory action. Death results from paralysis of respiration. It may be administered alone or in combination with nitrous oxid gas, in which case the patient is more rapidly narcotized. A variety of inhalers have been devised

for its administration, as follows: *Allis's* is probably the best form of open inhaler. It consists of a metal frame, so arranged that a flannel bandage can be stretched across and the whole surrounded with a leather case, which acts as a face-piece. *Clover's portable ether inhaler* consists of a dome-shaped receptacle pierced by a central shaft connecting with a rubber bag into which the patient breathes. Moving with the face-piece is a metal indicator to register the amount of ether admitted. A water chamber surrounds the ether vessel to regulate the temperature. *The Cone* is much used in America. A towel is folded into the shape of a cone, a sponge is placed at the apex, and the ether poured upon this. *Herriott's apparatus* may be used for giving gas and ether. In his inhaler the inspiratory and expiratory valves are placed in a little chamber near the face-piece; a free draught of air is permitted. *Ormsby's inhaler* consists of a leather face-piece, crowned with a cone-shaped wire cage covered with leather and joined to a soft leather bag, covered by a loose net to prevent excessive expansion. The wire cage contains a sponge on which the ether is poured. *Rentle* adds to a cone containing a flannel cap a mask for the face. *Rectal etherization* may be resorted to in operations about the face and throat. The ether vapor is introduced into the bowel, the process taking longer for complete anesthetization than by the usual method. ETHIDENE CHLORID is similar in its action to chloroform. Patients take a longer time to recover consciousness than when chloroform is used, but they experience fewer after-effects, and recover rapidly. Anesthetization occurs in three to five minutes. HYDROBROMIC ETHER (*bromid of ethyl*) produces unconsciousness and anesthesia in one minute, and complete muscular relaxation in two or three minutes. The heart's action is somewhat weakened. Return to consciousness after withdrawal of the ether is very prompt. Its use may be followed by vomiting. According to some observers, death results from cardiac failure, while others believe it kills by direct action upon the respiratory center. It is best administered by an Allis inhaler, and is of most service in minor surgery for short operations. NITROUS OXID, by inhalation, is much used by dentists for extraction of teeth. The symptoms resemble those of asphyxia, hence it is more important to watch the respiration than the pulse. It may be employed in minor surgical operations. There are but few after-effects, those most often observed being headache and malaise. *Bert's method* of administering nitrous oxid consists in giving it in conjunction with oxygen under pressure; by this method the administration may be prolonged indefinitely. *Clover's Gas and Ether Inhaler* is intended for the administration of a mixture of these anesthetics; it is so arranged that gas can be given alone, or in combination with the ether. *Buxton's apparatus* is used for the administration of gas only, and possesses a special contrivance to filter the air. *Fontaine's chamber* is an apparatus devised to keep the patient under an atmospheric pressure equal to 26 inches mercury, so that the vapor inhaled would be 50 per cent. gas and 50 per cent. air, and asphyxia thus be prevented. The employment of *supplemental bags* has been advocated by Braine. The patient breathes into these bags, the gas supply being turned off and the expiratory valve closed. It is claimed that this method produces a more prolonged period of unconsciousness. Various accessory instruments are needed in the use of gas, such as gags, mouth openers, and mouth props, spoons, etc. **A., Local**, an anesthetic that, locally applied, produces absence of sensation in the organ or tissue so treated.

ALCOHOL, locally, removes sensation to pain, while tactile sense persists. Cool the alcohol to about 10° below the freezing point, by placing it in ice and salt, and place the part to be numbed in it. BISULPHID OF CARBON, by spray or irrigation, has a disgusting odor, and is a powerful poison. CARBOLIC ACID, painted over the skin—its action, however, is caustic. CHLORETHYL, in vapor form, is useful in minor and dental surgery. CHLORID OF METHYL,  $\text{CH}_3\text{Cl}$ , allowing the liquid chlorid to drop on the skin or mucous membrane. Unless kept carefully under control the vitality of the tissues may be affected. COCAIN is used in subcutaneous injections, by painting over mucous surfaces, or by instillation into the eye. As a paint a 20 per cent solution is used, weaker preparations being of little value over cutaneous surfaces; several coats are necessary. A 10 per cent. solution should be used on mucous surfaces; for the eye a 4 per cent. solution will answer, and this solution is strong enough when cocain is employed as a spray. Hypodermatically, mix-v of a 10 to 20 per cent. solution are usually injected, and this may be repeated two or three times during the operation. DRUMIN is oxalate of lime prepared from a euphorbiaceous plant. It was formerly suggested as a local anesthetic, but has been found not to possess anesthetic properties. ETHER, in spray, is recommended by Dr. B. W. Richardson. The anesthesia thus produced is confined to the skin, and is very transient. It may produce a slough from excessive freezing. FARADIC CURRENTS were formerly used by dentists, but are of no value. RHIGOLENE, in spray, its use being similar to that of ether. **A. Mixtures** contain combinations of substances for producing anesthesia. The following are the most important: **A. C. E. MIXTURE**:—alcohol, sp. gr. .838, 1 part; chloroform, sp. gr. 1.497, 2 parts; ether, sp. gr. .735, 3 parts. **BILLROTH'S**:—chloroform 3 parts, alcohol and ether each 1 part. It is best administered by the open method. **LINHART'S**:—alcohol 1, chloroform 4. It is administered similarly to chloroform. **MARTINDALE'S**:—a volumetric mixture, the ingredients of which evaporate almost uniformly; it consists of absolute alcohol, sp. gr. .795, one volume; chloroform, sp. gr. 1.498, two volumes; pure ether, sp. gr. .720, three volumes. **MEDICO-CHIRURGICAL SOCIETY OF LONDON**:—ether 3, chloroform 2, alcohol 1. **METHYLENE**, or **BICHLORID OF METHYLENE**, a mixture of methylic alcohol 30 per cent., and chloroform 70 per cent. The so-called "*Liquid of Regnaud*" consisted of 80 per cent. chloroform, 20 per cent. methylic alcohol. Methylene is not much used, several deaths from cardiac paralysis having occurred from its employment. **NUSSEBAUM'S**, ether 3, chloroform 1, alcohol 1. **RICHARDSON'S**:—alcohol 2, chloroform 2, ether 3. **SANFORD'S**:—the so-called "*Chloramyl*," is a mixture of chloroform and amyl nitrate in the proportion of two drachms of the nitrate to the pound of chloroform. It is a dangerous mixture, both drugs depressing the heart. **VIENNA GENERAL HOSPITAL**:—ether 9, chloroform 30, alcohol 9. **VIENNA MIXTURE**:—ether 3, chloroform 1. **VON MERING'S**:—chloroform one volume, dimethylacetol two volumes. It is said to produce no failure of respiration or heart, and no lowering of the blood pressure. **WACHSMUTH'S**:—one-fifth part of oil of turpentine is added to the chloroform. It is said to prevent any danger of heart-failure.

Various methods have been suggested by means of which the influence of the anesthetic may be prolonged or its dangers and sequelæ largely averted. The following are the most important:—**DASTRE-MORAT'S**; con-

sists in the injection of 1 or 1.5 c.c. of the following mixture:—morph. hydrochlor. 10 centigram., atropin. sulph. 5 milligram., aq. destill. 10 grms. The atropin is said to lessen the after-sickness and abrogate salivation and bronchial secretion. FORNÉ'S:—the preliminary administration of chloral before using chloroform, 2 to 5 grams an hour before. KAPPELER'S:—a combination of chloral hydrate and ether, 40 grains of the former. The duration of anesthesia is prolonged and the recovery retarded, but the after-effects are more marked. NUSSEBAUM'S:—injection of  $\frac{1}{16}$  to  $\frac{1}{8}$  grain of morphin previous to the administration of chloroform. Less of the anesthetic is needed, while the stupor is prolonged; vomiting is increased. OBALINSKI'S:—hypodermatic injection of cocain, 2 to 5 centigrams of a three per cent. solution during chloroform anesthetization. TRÉLAT'S:—administration of 2 to 4½ grams of chloral hydrate, and 10 to 20 grams of syrup of morphin in 60 grams of water, repeating the dose in 15 minutes, and following by chloroform anesthesia.

Attempts have repeatedly been made to estimate the comparative safety of the various anesthetics used for the production of general anesthesia. In 1879 the "GLASGOW COMMITTEE" of the British Medical Association concluded in favor of ether, declaring that chloroform lowered the blood tension and depressed the action of the heart. In 1889 the HYDERABAD COMMISSION arrived at the conclusion that chloroform produced an arrest of respiration before there was a stoppage of the heart. It is thought, however, that the climate—that of India—may have had some effect in producing this result, since in temperate climates the heart usually fails before there is a depression of respiration.

**Anestheticism** (*an-es-thet'-is-izm*) [*ἀνασθησις*, insensible]. The quality of being anesthetic.

**Anesthetization** (*an-es-thet-iz-a'-shun*) [*ἀνασθησις*, insensible]. The process of rendering insensible.

**Anesthetize** (*an-es'-thet-iz*) [*ἀνασθησις*, insensible]. To put under the influence of an anesthetic.

**Anesthetizer** (*an'-es-thet-i-zer*) [*ἀνασθησις*, insensible]. One who administers an anesthetic.

**Anethol** (*an'-eth-ol*) [*ἀνῆθ*, up; *αἶθερ*, to burn; *oleum*, oil],  $C_{10}H_{12}O$ . The methyl ether of anol; it occurs in ethereal oils, from which it separates in the cold in the form of white, shining scales, melting at 21° and boiling at 232°. It is the chief constituent of the essential oils of anise and fennel. It is employed in preparing the *Elixir anethi*, N. F., being more fragrant and agreeable than the anise oil.

**Anethum** (*an'-e'-thum*) [*ἀνῆθον*, anise; *gen.*, *Anethi*]. Dill; the dried fruit of *Peucedanum graveolens*, indigenous to Southern Europe. Aromatic, carminative, and stimulant. **A. Aqua** (B. P.). Dose  $\frac{3}{4}$  i–ij. **A. Oleum** (B. P.). Dose  $\frac{m}{i}$ –iv.

**Anetic** (*an-et'-ik*) [*ἀναιτικός*, relaxing]. Soothing; calmative; anodyne.

**Anetiological** (*an-e-te-o-logy'-ik-al*) [*ἀν* priv.; *αἰτία*, cause; *λόγος*, word]. Having no known cause; dysteleological.

**Anetus** (*an'-et-us*) [*ἀνετός*, loosened]. Any intermittent fever.

**Aneuria** (*an-u'-re-ah*) [*ἀ* priv.; *νεῦρον*, a nerve or fiber]. Lack of nervous power or stimulus.

**Aneuric** (*an-u'-rik*) [*ἀ* priv.; *νεῦρον*, a nerve or fiber]. Characterized by aneuria; impairing the nervous activity.

**Aneurysm** (*an'-u-rizm*) [*ἀνέρισμα*, a widening]. A tumor consisting of a dilated artery, or communicating with an artery. In the early stages there is an expansile pulsation of the tumor generally associated

with a systolic murmur or bruit. In the later stages the laminated coagulum increases, so that pulsation may be absent, and pressure of the growing aneurysm upon the adjacent organs may give rise to secondary troubles, as pain, dyspnea, dysphagia, paralysis, or spasm. Inequality in the pupils follows from pressure on the sympathetic in thoracic aneurysm. Aneurysm may be caused by rupture, wounding, disease, or weakness of the arterial walls, or by increased blood pressure following over-exertion. Embolism also may be a cause; gout and alcoholism act as predisposing causes. *Cardiac dilatation* is sometimes spoken of as aneurysm of the heart. **A., Abdominal**, one of the abdominal aorta. **A. by Anastomosis**, a dilatation of a large number of vessels—small arteries, veins, and capillaries—the whole forming a pulsating tumor under the skin. This form of aneurysm is especially seen upon the scalp. **A., Arterio-venous**, the formation of an abnormal communication between an artery and a vein. If the communication is direct it is termed *aneurysmal varix*, but when there is an intervening sac it is called a *varicose aneurysm*. **A., Bérard's**, a varicose aneurysm with the sac in the tissues immediately around the vein. **A., Cirroid**, a tortuous lengthening and dilatation of a part of an artery. **A., Compound**, one in which one or several of the coats of the artery are ruptured and the others merely dilated. **A., Consecutive, or Diffused**, follows rupture of all the arterial coats with infiltration of surrounding tissues. **A., Dissecting**, when the blood forces its way between the media and adventitia. **A., Ectatic**, an expansion of a portion of an artery due to yielding of all the coats. It is merely a dilatation of the vessel. **A., Endogenous**, one formed by disease of the vessel walls. **A., Exogenous**, one due to traumatism. **A., False, or Spurious**, one in which there has occurred a rupture of all the coats, and the effused blood is retained by the surrounding tissues. **A., Fusiform**, a spindle-shaped dilatation of the artery. **A., Medical**, an internal aneurysm; i. e., one situated within the thoracic or abdominal cavity. **A., Mixed**. See *A., Compound*. **A., Sacculated**, a sac-like dilatation of an artery communicating with the main arterial trunk by an opening that may be relatively large or small. **A., Park's**, a variety of arterio-venous aneurysm in which the arterial dilatation communicates with two contiguous veins. **A., Pott's**. Same as *Aneurysmal Varix*. **A., Rodrigues's**, a varicose aneurysm in which the sac is immediately contiguous to the artery. **A., Spurious**. See *A., False*. **A., Verminous**, one containing hematozoa.

**Aneurysmal** (*an-u-riz'-mal*) [*ἀνέρισμα*, a widening]. Of the nature of or pertaining to an aneurysm. **A. Varix**. See *Aneurysm*.

**Aneurysmatic** (*an-u-riz-mal'-ik*) [*ἀνέρισμα*, a widening]. Affected with or of the nature of aneurysm.

**An euthanasia** (*an-u-than-a'-ze-ah*) [*ἀ* priv.; *εὐθανασία*, an easy death]. A painful or difficult death.

**Anfract** (*an'-frakt*) [*anfractus*, a winding]. An anfractuous or sinuosity; an anfractuous organ or structure.

**Anfractuose** (*an-frak'-tu-ös*) [*anfractus*, a winding]. In biology, bent back and forth, winding, as certain stamens, or the brain fissures.

**Anfractuosity** (*an-frak-tu-ös'-it-e*) [*anfractus*, a bending round]. Any one of the furrows or sulci between the cerebral convolutions.

**Anfractuous** (*an-frak'-tu-us*) [*anfractus*, a bending round]. Characterized by windings and turnings; sinuous.

**Angiectasis** (*an-je-ek'-tas-is*). See *Angiectasts*.

**Angeo-** (*an'-je-o*). See *Angio-*.

**Angelic Acid** (*an-jel'-ik as'-id*). See *Avid*.

**Angelica** (*an-jel'-ik-ah*) [L.]. The seeds and root of *Archangelica officinalis* and other species. An aromatic stimulant and emmenagogue. Dose of the fld. ext.: Seeds ℥ v-x; root ʒ ss-j. Unof.

**Angel's Wing** (*an'-jelz wing*). A deformity of the scapula in which it turns forward and then backward, giving the shoulder a peculiar dorsal bulge, as in a scoliotic chest.

**Anger's Operation.** See *Operations, Table of*.

**Angiectasis** (*an-je-ek'-tas-is*) [*ἀγγειον*, a blood-vessel; *ἐκτασις*, dilatation]. Abnormal dilatation of a vessel, as in aneurysm, etc.; enlargement of capillaries.

**Angiectopia** (*an-je-ek'-to'-pe-ah*) [*ἀγγειον*, a vessel; *ἐκτοπος*, displaced]. Displacement or abnormal position of a vessel.

**Angielcus, or Angeielcus** (*an-je-el'-kus*) [*ἀγγειον*, a vessel; *ἐλκος*, an ulcer]. An ulcer in the walls of a vessel.

**Angiemphraxis** (*an-je-em-fraks'-is*) [*ἀγγειον*, a vessel; *ἐμπορσις*, obstruction]. Obstruction of a vessel, or of vessels.

**Angiitis, or Angeiitis** (*an-je-i'-tis*) [*ἀγγειον*, a vessel; *ιτις*, inflammation]. Inflammation of a lymph vessel or blood vessel.

**Angina** (*an'-jin-ah* or *an-ji'-nah*) [*angere*, to strangle]. A sense of choking or suffocation, a symptom of inflammatory affections of the pharynx. It is synonymous with *Cynanche*. **A. acuta** or **simplex**, simple sore-throat. **A. externa**. Synonym of *Mumps*. **A., Hogskin**. Synonym of *Diphtheria*. **A. laryngea**. Synonym of *Laryngitis*. **A. lingualis**. Same as *Glossitis*. **A., Ludwig's**, acute suppurative inflammation of the connective tissue surrounding the submaxillary gland. **A. membranacea**. Synonym of *Croup*. **A. parotidea**, the mumps, or *Parotitis*, *q. v.* **A. pectoris**, a paroxysmal neurosis with intense pain and oppression about the heart. It usually occurs in the male after forty years of age, and is generally associated with diseased conditions of the heart and aorta. There is a sense of impending death, and frequently there is a fatal termination. **A. pectoris-vasomotoria**, a term given by Nothnagel and Landois to an angina associated with vaso-motor disturbances, coldness of the surface, etc., but never resulting fatally. **A., Pseudo-**, is a neurosis occurring in young anemic females, characterized by a less grave set of symptoms and never resulting fatally. **A. simplex**. See *A. acuta*. **A. tonsillans**, *Quinsy*, *q. v.* **A. trachealis**, the *Croup*, *q. v.* **A. ulcero-membranous**. See *Tonsillitis, herpetic*.

**Anginoid** (*an'-jin-oid*) [*angere*, to strangle]. Resembling angina.

**Angioasthenia** (*an-je-o-as-the'-ne-ah*) [*ἀγγειον*, a vessel; *ἀσθένεια*, weakness]. Atony of the blood-vessels.

**Angiocarditis** (*an-je-o-kar-di'-tis*) [*ἀγγειον*, a blood-vessel; *καρδια*, the heart; *ιτις*, inflammation]. An inflammation of the heart and blood-vessels (hypothetical).

**Angiocarpous** (*an'-je-o-kar-pus*) [*ἀγγειον*, a vessel; *καρπός*, fruit]. In biology, having the fruit invested with a distinct covering or husk; having a closed apothecium; having the hymenium inclosed by the sporocarp.

**Angiochhalasis, or Angeiochhalasis** (*an-je-o-kul'-as-is*) [*ἀγγειον*, a vessel; *χάλασις*, relaxation]. Dilatation or relaxation of the blood-vessels.

**Angiocholitis** (*an-je-o-ko-li'-tis*) [*ἀγγειον*, a vessel; *κολη*, bile; *ιτις*, inflammation]. Inflammation of the biliary ducts.

**Angioderma pigmentosum** (*an-je-o-der'-mah pig-men-to'-sum*). See *Atrophoderma*.

**Angiodiastasis** (*an-je-o-di-as'-tas-is*) [*ἀγγειον*, a vessel; *διαστασις*, a separation]. 1. Displacement or dilatation of a vessel. 2. Retraction of the severed ends of a blood-vessel.

**Angioembolus** (*an-je-o-em'-bo-lus*) [*ἀγγειον*, a vessel; *ἐμβολος*, anything thrown in]. A plug (as of clotted blood) in a vessel.

**Angiogenesis** (*an-je-o-jeu'-es-is*). See *Angiogeny*.

**Angiogeny** (*an-je-og'-en-c*) [*ἀγγειον*, a vessel; *γεννάειν*, to produce]. The development of the vessels.

**Angioglioma** (*an-je-o-gli-o'-mah*) [*ἀγγειον*, a vessel; *γλία*, glue; *όμα*, a tumor; *pl.*, *Angiogliomata*]. A gliomatous vascular tumor of the spinal cord.

**Angiograph** (*an'-je-o-graf*) [*ἀγγειον*, a vessel; *γράφειν*, to write]. A form of sphygmograph invented by Landois.

**Angiography** (*an-je-og'-ra-fe*) [*ἀγγειον*, a vessel; *γράφη*, a writing]. A description of the vessels; angiology.

**Angiohemothrombus** (*an-je-o-hem-o-throm'-bus*) [*ἀγγειον*, a vessel; *αἷμα*, blood; *θρόμβος*, thrombus]. A clot in a blood-vessel.

**Angiohydrology** (*an-je-o-hi-drol'-o-je*) [*ἀγγειον*, a vessel; *ἵδωρ*, water; *λόγος*, science]. The science of the lymphatic vessels, their contents, etc.

**Angiokeratoma** (*an-je-o-ker-at-o'-mah*) [*ἀγγειον*, a vessel; *κέρας*, horn; *όμα*, tumor]. Lymphangiectasis; Telangiectic warts; a very rare disease of the extremities characterized by warty-looking growths that develop on dilated vessels in persons with chilblain, etc. Dark spots the size of pins' points or pins' heads, evidently vascular, develop as an attack of chilblains is subsiding. The disease is peculiar to childhood, and especially occurs in females.

**Angioleucitis** (*an-je-o-lu-si'-tis*) [*ἀγγειον*, a vessel; *λευκός*, white; *ιτις*, inflammation]. Inflammation of the lymphatic vessels.

**Angiolithic** (*an-je-o-lith'-ik*) [*ἀγγειον*, a vessel; *λίθος*, a stone]. Literally, a qualification applied to a vascular and crystalline formation. Practically applied to neoplasms in which crystalline or mineral deposits take place, with hyaline degeneration of the coats of the vessels.

**Angiology** (*an-je-o'-o-je*) [*ἀγγειον*, a vessel; *λόγος*, science]. The science of the blood vessels and lymphatics.

**Angiolymphitis** (*an-je-o-limf-i'-tis*) [*ἀγγειον*, a vessel; *lymphā*, lymph; *ιτις*, inflammation]. Same as *Angioleucitis*.

**Angiolymphoma** (*an-je-o-limf-o'-mah*) [*ἀγγειον*, a vessel; *lymphā*, water; *όμα*, tumor; *pl.*, *Angiolymphomata*]. A tumor formed of lymphatic vessels.

**Angioma** (*an-je-o'-mah*) [*ἀγγειον*, a vessel; *όμα*, a tumor; *pl.*, *Angiomata*]. A tumor formed of blood-vessels. Called also *Erectile* or *Vascular Tumor*.

**A., Cavernous**, with communicating alveolar spaces. See *Varix, Cirroid*. Capillary and venous angiomata are called *Nevi*, or *Mothers' Marks*. **A., Cystic**. Synonym of *Lymphangioma circumscriptum*. **A., Infective**. See *A. serpiginosum*. **A. pigmentosum atrophicum**. See *Xeroderma pigmentosum*. **A. serpiginosum**, infective angioma; *nevus lupus*; a very rare disease of the skin in which minute vascular points are formed in rings or other groups, that spread at the borders, while fresh points are continually developing beyond them. The points look like grains of cayenne pepper. It occurs usually in girls, but its etiology and pathology are unknown.

**Angiomalacia** (*an-je-o-mal-a'-se-ah*) [*ἀγγειον*, a vessel; *μαλάκεια*, a softening]. Softening of the blood-vessels.

**Angiometer** (*an-je-om'-et-er*). See *Sphygmograph*.

**Angiomonospermous** (*an-je-o-mon-o-sper'-muc*) [*ἄγγειον*, a vessel; *μόνος*, alone; *σπέρμα*, seed]. In biology, producing seeds within a closed ovary.

**Angiomyoma**, or **Angiomoma** (*an-je-o-mi-o'-mah* or *an-je-mi-o'-mah*) [*ἄγγειον*, a vessel; *μῦς*, a muscle; *ὄμα*, a tumor; *pl.*, *Angiomyomata*]. A vascular and erectile muscular tumor.

**Angioneoplasm** (*an-je-o-ne'-o-plazm*). See *Angioneoplasma*.

**Angioneoplasma** (*an-je-o-ne-o-plaz'-mah*) [*ἄγγειον*, a vessel; *νέος*, new; *πλάσμα*, moulded substance; *pl.*, *Angioneoplasmata*]. A neoplasm made up of blood-vessels or lymph-vessels.

**Angioneurosin** (*an-je-o-nu'-ro-sin*). Synonym of *Nitroglycerin*.

**Angioneurosis** (*an-je-o-nu-ro'-sis*) [*ἄγγειον*, a vessel; *νεῦρον*, a nerve]. A neurosis of the blood-vessels; a disturbance of the vaso-motor system,—a symptom of many diseases.

**Angio-neurotic** (*an-je-o-nu-rot'-ik*) [*ἄγγειον*, a vessel; *νεῦρον*, a nerve]. Pertaining to angioneurosis. **A.** Edema, a swelling, with associated symptoms, probably due to vaso-motor lesion.

**Angionoma** (*an-je-on'-o-mah*) [*ἄγγειον*, a vessel; *νομή*, ulcer]. Ulceration of a vessel.

**Angioparalysis** (*an-je-o-par-al'-is-is*) [*ἄγγειον*, a vessel; *παράλυσις*, to disable on one side]. Vaso-motor paralysis.

**Angioparalytic** (*an-je-o-par-al-il'-ik*) [*ἄγγειον*, a vessel; *παράλυσις*, to disable on one side]. Relating to or characterized by angioparalysis.

**Angioparesis** (*an-je-o-par'-es-is*) [*ἄγγειον*, a vessel; *παρεσις*, a letting go]. Paresis or partial paralysis of the vaso-motor apparatus.

**Angiopathy** (*an-je-op'-a-the*) [*ἄγγειον*, a vessel; *πάθος*, disease]. Any disease of the vascular system.

**Angioplania** (*an-je-o-pla'-ne-ah*) [*ἄγγειον*, a vessel; *πλάνη*, a wandering]. Irregularity or abnormality in the course of a vessel.

**Angioplasmic** (*an-je-o-plas'-tik*). See *Vasifactive*.

**Angiorrhagia** or **Angeiorrhagia** (*an-je-or-a'-je-ah*) [*ἄγγειον*, a vessel; *ρήγνυμι*, break]. Bleeding from a vessel.

**Angiorrhea** (*an-je-or-e'-ah*) [*ἄγγειον*, a vessel; *ρεῖν*, to flow]. An oozing of blood.

**Angiorrhaxis** (*an-je-o-reks'-is*) [*ἄγγειον*, a vessel; *ρήξις*, a bursting]. Rupture of a blood-vessel.

**Angiosarcoma** (*an-je-o-sar-ko'-mah*) [*ἄγγειον*, a vessel; *σάρξ*, flesh; *ὄμα*, a tumor; *pl.*, *Angiosarcomata*]. A vascular sarcoma.

**Angiosarcomatous** (*an-je-o-sar-ko'-mat-us*) [*ἄγγειον*, a vessel; *σάρξ*, flesh; *ὄμα*, a tumor]. Of the nature of or affected with angiosarcoma.

**Angioscope** (*an'-je-o-skōp*) [*ἄγγειον*, a vessel; *σκοπεῖν*, to inspect]. An instrument for examining the capillary vessels.

**Angiosialitis** (*an-je-o-si-al-i'-tis*) [*ἄγγειον*, a vessel; *σάλις*, saliva; *ιτις*, inflammation]. Inflammation of the duct of a salivary gland.

**Angiosis** (*an-je-o'-sis*) [*ἄγγειον*, a vessel]. Any disease of blood-vessels or lymphatics.

**Angiospasm** (*an'-je-o-spazm*) [*ἄγγειον*, a vessel; *σπασμός*, a spasm]. A convulsive neurosis of the blood-vessels; a vaso-motor spasm.

**Angiospastic** (*an-je-o-spas'-tik*) [*ἄγγειον*, a vessel; *σπασμός*, spasm]. Characterized by or of the nature of angiospasm.

**Angiosperm** (*an'-je-o-sper'm*) [*ἄγγειον*, a vessel; *σπέρμα*, seed]. In biology, a plant the seeds of which are produced within a closed vessel.

**Angiosporous** (*an-je-os'-po-rus*) [*ἄγγειον*, a vessel; *σπόρος*, a seed]. In biology, producing spores or asci within a hollow receptacle, said of fungi.

**Angiostegnosis** (*an-je-o-steg-no'-sis*) [*ἄγγειον*, a vessel; *στεγνῶσις*, stoppage]. Stoppage or constriction of a vessel.

**Angiostegnotic** (*an-je-o-steg-not'-ik*) [*ἄγγειον*, a vessel; *στεγνῶσις*, stoppage]. Relating to angiostegnosis; as-tricting; causing contraction of blood-vessels.

**Angiostenosis** (*an-je-o-ste-no'-sis*) [*ἄγγειον*, a vessel; *στένωσις*, a straitening]. Constriction or narrowing of a vessel.

**Angiostatous** (*an-je-o-sto'-mat-us*) [*ἄγγειον*, a vessel; *στόμα*, mouth]. In biology, having the mouth or opening narrow or not dilatable.

**Angiostrophe** (*an-je-os'-tro-fe*) [*ἄγγειον*, a vessel; *στρόφη*, twist]. Torsion of a vessel, as for the control of hemorrhage.

**Angiotasis** (*an-je-of'-as-is*) [*ἄγγειον*, a vessel; *τασις*, tension]. The tension of the vessels.

**Angiotatic** (*an-je-of-at'-ik*) [*ἄγγειον*, a vessel; *τασις*, tension]. Relating to angiotasis.

**Angiotelectasia** (*an-je-o-tel-ek-ta'-ze-ah*) [*ἄγγειον*, a vessel; *τέλος*, end; *ἐκτασις*, dilatation]. Dilatation of capillary vessels.

**Angiotomy** (*an-je-of'-o-me*) [*ἄγγειον*, a vessel; *τομή*, a cutting]. The incision or dissection of a vessel.

**Angle** (*ang'-gl*) or **Angulus** (*ang' gu lus*) [*angulus*, an angle]. The degree of divergence of two lines that meet each other; the space between two such lines. **A. a.**, that one of Lissauer's angles between the radius fixus and a line joining the alveolar and subnasal points. **A. of Aberration**. See *A. of Divergation*. **A.**, **Ackermann's**, certain angles, characteristic of kyphosis, which mark the base of the skull in cases of encephalocele and hydrocephalus; for example, the occipito-sphenoidal angle is abnormally sharp. **A.**, **Acromial**, that formed between the head of the humerus and the clavicle. **A.**, **Alpha**. 1. In optics, that formed by the intersection of the visual line and optic axis. 2. In craniometry, that one of Lissauer's angles between the radius fixus and a line joining the hornion and subnasal point. **A.**, **Alveolar**, that formed between a line passing through a spot beneath the nasal spine and the most prominent point of the lower edge of the alveolar process of the superior maxilla and the cephalic horizontal line. **A.**, **Alveolo-condylar**. See *A.*, *Orbito-alveolo-condylar*. **A.**, **Anterior (of Ilium)**. See *A.*, *External (of Ilium)*. **A.**, **Anterior (of Scapula)**. See *A.*, *Cervical (of Scapula)*. **A.**, **Anterior Parietal**. See *A.*, *Parietal (of Quatrefoiges)*. **A.**, **Antero-external (of Ischium)**, in veterinary anatomy, the posterior extremity of the supracotyloid crest. **A.**, **Antero-internal (of Ischium)**, in veterinary anatomy, the portion of the ischium that helps to close the obturator foramen inwardly. **A. of Aperture**, in optics, that included between two lines joining the opposite points of the periphery of a lens and the focus. **A.**, **Auricular**, in craniometry, those cephalic angles having their apices at Broca's auricular point. **A.**, **Auriculo-cranial**, in craniometry, the auricular angles whose sides pass through the cranium. **A.**, **Auriculo-facial**, in craniometry, those auricular angles whose sides pass through the face. **A.**, **Auriculo-frontal**. See *A.*, *Frontal*. **A.**, **Auriculo-occipital**, in craniometry, the combined sub-occipital and supra-occipital angles. **A.**, **Auriculo-parietal**. See *A.*, *Parietal (of Broca)*. **A. b.**, that one of Lissauer's angles included between the radius fixus and a line joining the bregma and nasion. **A.**, **Barclay's**. See *A.*, *Orifacial*. **A.**, **Basifacial**, in craniometry, that between the basi-cranial and basifacial axes. **A.**, **Basilar**, in craniometry, that between the naso-basilar and basi-alveolar lines. **A.**, **Beta**, that one of Lissauer's angles

included between the radius fixus and a line joining the hormion and bregma. **A., Bi-orbital**, in optics, that formed by the intersection of the axes of the orbits. **A., Broca's**. See *A., Facial*, *A., Occipital*, and *A., Parietal*. **A. c.**, that one of Lissauer's angles included between the radius fixus and a line joining the lambda and opisthion. **A., Camper's**. See *A., Facial*, and *A., Maxillary*. **A., Carpal**, in biology, the bend of the wing. **A., Cephalic**, in craniometry, a general term for the cranial and facial angles. **A., Cerebellar**. See *A., Suboccipital*. **A., Cerebral**. 1. In craniometry, that formed by the frontal, Broca's parietal, and the supra-occipital angles. 2. See *A. of Segond*. **A., Cervical (of Scapula)**, in veterinary anatomy, the point of union of the anterior and superior borders of the scapula. **A., Chi**, that one of Lissauer's angles included between two lines running from the hormion to the basion and staphylion. **A., Cloquet's**. See *A., Facial*. **A., Condylar**, that between the planes of the basilar groove and the occipital foramen. **A., Co-orbital**, in craniometry, that formed by the crossing of the anatomical plane of the head by the bi-orbital plane. **A., Coracoscapular**, in biology, that between the axes of the coracoid and scapula. **A., Coronofacial (of Gratiolet)**, in craniometry, the angle that the facial line of Camper forms with the plane passing through the coronal suture. **A., Costal**. See *A., Subcostal*. **A., Cotyloid**, in veterinary anatomy, the portion of the ilium included between the cotyloid foramen and the supra-cotyloid crest. **A., Cotyloidean**. See *A., Antero-external (of Ischium)*. **A., Cranial**, in craniometry, angles corresponding to the auricular angles, but having their apices at the anterior border of the occipital foramen. **A., Craniofacial (of Ecker)**. See *A., Metafacial*. **A., Craniofacial (of Huxley)**, in craniometry, that formed at the middle of the anterior border of the jugum sphenoidale by lines drawn from the basion and nasal spine. **A., Critical**, that made by a beam of light passing from a rarer to a denser medium, with the perpendicular, without being entirely reflected. **A. of Cuvier**. See *A., Facial*. **A. of Daubenton**. See *A., Occipital*. **A., Deschamps's**. See *A., Iniofacial*. **A. of Deviation**. 1. In botany, that formed by a leaf, branch, or root with the axis upon which it is borne. 2. In magnetism, the angle traversed by the needle when disturbed by some magnetic force. 3. In optics, that formed by a refracted ray and the prolongation of the incident ray. **A. of Divergence**, in botany, that formed between succeeding organs in the same spiral or whorl. **A., Dorsal (of Scapula)**, in veterinary anatomy, the junction of the superior and posterior borders of the scapula. **A. of Dürer**. See *A., Facial*. **A., Ecker's**. See *A., Sphenoidal* and *A., Craniofacial*. **A. of Elevation**, in optics, that made by the visual plane with its primary position when moved upward or downward. **A., Ehippial (Welcker's)**. See *A., Sphenoidal*. **A., Ethmocranial**. See *A., Olfactory*. **A., External (of Ilium)**, in veterinary anatomy, the anterior superior spine of the ilium. **A., External (of Mulder)**, in craniometry, that produced by the junction of Camper's line and a line joining the basi-occipital bone and the nasion. **A., External (of Pubes)**, in veterinary anatomy, the portion of the pubic bone constituting the chief part of the cotyloid cavity. **A. of the Eye**. See *Canthus*. **A. f.**, that one of Lissauer's angles included between the radius fixus and a line joining the inion and opisthion. **A., Facial (of Broca)**. See *A., Ophryospinal Facial*. **A., Facial (of Camper)**, in craniometry, that between the facial line of Camper and the line drawn through the auricular and subnasal points.

**A., Facial (of Cloquet)**, in craniometry, that between the line drawn through the ophryon and the alveolar point and the auricular-alveolar line. **A., Facial (of Cuvier)**. See *A., Facial (of Geoffroy St. Hilaire)*. **A., Facial (of Dürer)**, in craniometry, that formed by a line tangent to the brow and the lobule of the nose and a line joining the lobe of the ear and the lower part of the nasal septum. **A., Facial (of Jacquart)**, in craniometry, that between the line joining the subnasal point and the glabella and the line joining the subnasal and auricular points. **A., Facial (of Segond)**. See *A. of Segond*. **A., Facial (of Geoffroy St. Hilaire)**, in craniometry, that between the facial line of Camper and the line joining the auricular point and the edge of the incisors. **A., Facial (of Topinard)**. See *A., Ophryo-spinal Facial*. **A., Facial (of Virchow and Holder)**, in craniometry, that formed by the union of a line joining the naso-frontal suture and the most prominent point of the lower edge of the superior alveolar processes, and a line joining the superior border of the external auditory meatus and the lower border of the orbit. **A., Fick's**, in craniometry, one formed by the intersection of the basilar groove, and a line joining the symphysis menti and the basion. **A., Frontal**, in craniometry, one formed by lines joining the auricular point and the ophryon and bregma. In ornithology, that formed between the forehead and the upper margin of the beak. **A., Frontal (of Lissauer)**, that one included between lines joining the metopion and the bregma and nasion. **A., Fronto-glabellar**, the degree of inclination of the forehead. **A., Gamma**, in optics, that formed at the center of rotation of the eyes by the optic and visual axes. **A., Genal**, in biology, the posterior angle of the movable gena of trilobites. **A., Gratiolet's**. See *A., Coronofacial*. **A., Humeral (of the Scapula)**, in veterinary anatomy, a name given to the head of the shoulder blade. **A., Huxley's**. See *A., Craniofacial*. **A. i.**, that one of Lissauer's angles included between the radius fixus and a line joining the posterior border of the incisor foramen and the alveolar point. **A., Ilio-ischial**, that between the ischium and the cotylo-sacral rib of the ilium. **A., Ilio-pubic**, in veterinary anatomy, that existing between the ilium and pubes. **A., Ilio-vertebral**, that existing between the iliac bones and the spinal column. **A. of Incidence**, in optics, the angle at which a ray of light strikes a denser medium and undergoes reflection or refraction. **A. of Inclination (of Pelvic Canal)**, in obstetrics, that formed by the anterior wall of the pelvis with the conjugate diameter. **A. of Inclination (of Pelvis)**, in obstetrics, that formed by the pelvis with the general line of the trunk, or that formed by the plane of the inferior strait with the horizon. **A., Inferior (of Scapula)**. See *A., Humeral*. **A. of Inflection**, in veterinary anatomy, that formed by the quarter of the hoof of a solidiped with the commencement of the bar. **A., Iniofacial**, in craniometry, Deschamps's modification of Camper's line. It is the angle included between the two lines extending from the inion to the glabella and from the inion to the symphysis of the chin. **A., Internal (of Ilium)**, in veterinary anatomy, the posterior superior spine of the ilium. **A., Internal (of Pubes)**, in veterinary anatomy, the name for the angle of the pubes. **A., Internal (of Walther)**, in craniometry, that included between a line joining the glabella and the nasion and another from the occipital protuberance to the crista galli. **A., Interradial**, in biology, that formed in the star-fish by the coming together of the lateral walls of two adjacent ambulacral grooves. **A. of the Ischio-pubic**

**Arch**, that formed by the junction of the ischio-pubic rami. **A. of Jacquart**. See *A., Facial*. **A. of Jaw**, the junction of the lower border of the ramus of the mandible with its posterior border. **A. of Landzert**, that formed by the plane of the basilar groove and the horizontal line of the jugum sphenoidale. **A. of Lavater**, in craniometry, that contained between a line joining the point of the nose and the outer angle of the eye, and a line running from the same point to the angle of the mouth. According to Lavater, the greater the angle the more intelligent the individual. **A., Limiting**. See *A., Critical*. **A. of the Lips**, those formed by the union of the lips at either extremity of the mouth. **A., Lissauer's**, in craniometry, a number of angles in the median plane of the skull included between lines radiating from a fixed line connecting the inion and hornion (*radius fixus*). See also *A., Frontal*, and *A., Parietal*. **A., Louis's**, that between the manubrium and gladiolus of the sternum due to retraction in the upper part of the thorax. **A. of Ludovici**. See *A., Louis's*. **A., Ludwig's**. See *A., Louis's*. **A., Lumbo-iliac**, in veterinary anatomy, that formed by the junction of the sacrum and ilia. **A. m.**, that one of Lissauer's angles included between the radius fixus and a line joining the opisthion and the basion. **A., Maxillary (of Camper)**, in craniometry, that included between two lines extending from the point of contact of the upper and lower central incisor teeth, one to the ophryon and the other to the most prominent point of the lower jaw. **A., Metafacial (of Serres)**, that which the pterygoid processes form with the base of the skull. **A., Meter-**, in optics, the degree of convergence of the eyes when centered on an object one meter distant from each. **A. of the Mouth**. See *A. of the Lips*. **A., Mu**, that one of Lissauer's angles included between the radius fixus and a line joining the hornion and basion. **A., Mulder's**. See *A., External*. **A. n.**, that one of Lissauer's angles included between the radius fixus and a line joining the nasion and alveolar point. **A. n',** that one of Lissauer's angles included between the radius fixus and a line joining the nasion and subnasal point. **A., Nasal (of Ranke)**, in craniometry, that included between the horizontal plane of the skull and a line passing through the middle of the alveolar border beneath the nasal spine and the center of the naso-frontal suture. **A., Nasal (of Welcker)**, in craniometry, that included between the naso-basilar and naso-subnasal lines. **A., Naso-basal (of Welcker)**. See *A., Nasal*. **A., Nasomalar**, in craniometry, that formed by two lines converging from the outer margins of the orbits to the base of the nose. **A. of the Neck**. See *A. of the Nucha*. **A. of the Neck of the Femur**, that formed between the neck and shaft of the femur. **A., Negative**, the name given to Quatrefages' parietal angle when it is inverted. **A. of the Nose**, that between the nose and the cheek. **A., Nu**, that one of Lissauer's angles included between the radius fixus and a line joining the hornion and nasion. **A. of the Nucha**, that formed by the junction of the nucha with the neck. **A. o.**, that one of Lissauer's angles included between the radius fixus and a line joining the lambda and bregma. **A. of Obliquity of Femur**, that formed by the shaft of the femur and a vertical line. **A., Occipital**, in craniometry, that formed by the intersection of the basicranial axis and the plane of the occipital foramen. **A., Occipital (of Broca)**, in craniometry, that between the lines joining the opisthion and the basion and nasal points. **A., Occipital (of Daubenton)**, in craniometry, the angle that Daubenton's line makes with the line joining the basion and opisthion. **A.,**

**Occipital, Second**, in craniometry, that formed by two lines joining the opisthion and the nasion and nasal spine. **A., Olfactory**, in craniometry, that formed by the intersection of the plane of the cribriform plate of the ethmoid and the basicranial axis. **A., Omega**, that one of Lissauer's angles between the radius fixus and a line joining the hornion and lambda. **A., Ophryo-alveolo-auricular**. See *A., Facial (of Cloquet)*. **A., Ophryo-spinal-facial**, in craniometry, that included between two lines from the nasal spine to the ophryon and auricular point. **A., Optic**, that included between lines joining the extremities of an object and the nodal point. The smallest is about 30 seconds. **A., Orbito-alveolo-condylar**, in craniometry, that included between the horizontal visual and alveolo-condylar planes. **A., Orbito-basilar**, in craniometry, that included between Barclay's basifacial plane and the plane of the orbital axes. **A., Orbito-facial**. See *A., Orbito-maxillary*. **A., Orbito-maxillary**, in craniometry, that included between the two lines joining the auricular point and the glabella and alveolar border. **A., Orbito-occipital**, in craniometry, that included between the plane of the occipital foramen and the bi-orbital plane. **A., Orifacial (of Barclay)**. 1. That included between Camper's line and the plane of mastication. 2. That included between the median antero-posterior line of the palatine arch and the median antero-posterior line of the plane of the lower border of the inferior maxilla. **A. p.**, that one of Lissauer's angles included between the radius fixus and a line joining the staphylion and alveolar point. **A., Palatine**, in craniometry, that included between Camper's line and a line on the plane of the alveolar arch. **A., Parietal (of Broca)**, in craniometry, that included between two lines joining the auricular point and the bregma and lambda. **A., Parietal (of Lissauer)**, that included between lines drawn from the bregma and lambda to the most prominent point of the parietal bone. **A., Parietal (of Quatrefages)**, in craniometry, that formed by the lines drawn through the extremities of the transverse maximum or bizygomatic diameter and the maximum transverse frontal diameter (called *positive* when it opens downward, *negative* when it opens upward). **A., Parietal, Posterior**, in craniometry, that included between two lines tangent to the parietal eminence and the most prominent points of the zygomatic arch. **A., Pi**, that one of Lissauer's angles included between the radius fixus and a line joining the hornion and alveolar point. **A. of Polarization**, in optics, the angle of reflection at which light is most completely polarized. **A., Positive**. See *A., Parietal (of Quatrefages)*. **A., Posterior (of Ilium)**. See *A., Cotyloid*. **A., Posterior (of Pubes)**, in veterinary anatomy, that portion of the pubes that helps to close in the obturator foramen internally. **A., Posterior (of Scapula)**. See *A., Dorsal (of Scapula)*. **A., Postero-external (of Ischium)**, in veterinary anatomy, the tuberosity of the ischium. **A., Postero-internal (of Ischium)**, in veterinary anatomy, the ischiadic arch. **A., Premaxillary**. See *A., Basifacial*. **A., Prepubic**, that formed by the male urethra in front of the pubes, the penis being in a flaccid state. **A. of Prognathism**, in craniometry, the angle indicating the degree of forward projection of the face. **A., Psi**. 1. That one of Lissauer's angles included between the radius fixus and a line joining the hornion and opisthion. 2. In optics, that between the optic axis and line of fixation. **A. of the Pubes**, that formed by the junction of the pubic bones at the symphysis. **A., Pyramidal**. See *A., Positive*. **A. of Quatrefages**.

See *A.*, *Parietal*. **A. of Ranke**. See *A.*, *Nasal*. **A. of Reflection**, in optics, that which a reflected ray of light makes with a line drawn perpendicular to the point of incidence. **A. of Refraction**, in optics, that which exists between a refracted ray of light and a line drawn perpendicular to the point of incidence. **A. of Rib**, a line on the external surface of the shaft of the vertebral extremity of the rib, to which is attached the tendon of the sacro-lumbalis muscle. **A. s.**, that one of Lissauer's angles included between the radius fixus and a line joining the basion and staphylion. **A.**, **Sacro-vertebral**, that which the sacrum forms with the last lumbar vertebra. **A. of Segond**, in craniometry, angles formed between lines drawn from the basion to the various other craniometrical points. The *Facial* angle of Segond is that between the line passing through the basion and mental points and the line passing through the basion and opisthion. The *Cerebral* angle of Segond is that between the line passing through the basion and opisthion. **A. of Serres**. See *A.*, *Metajacial*. **A. Sigma**, that one of Lissauer's angles included between the radius fixus and a line drawn from the hornion to the staphylion. **A.**, **Sincipital**. See *A.*, *External* (of *Mulder*). **A. Spal**. See *A.*, *Summi Palati*. **A.**, **Sphenoidal**, in craniometry, that included between two lines joining the nasion and the basion with the center of the transverse groove of the optic commissure, at the point where the sloping anterior surface of the sella turcica passes over into the horizontal surface of the olivary eminence. **A.**, **Squinting**, that indicating the degree of divergence of the affected eye in strabismus. **A.**, **Sterno-clavicular**, that existing between the clavicle and the sternum. **A. of St. Hilaire (Geoffroy)**. See *A.*, *Facial*. **A.**, **Subcostal**, that formed by the outward inclination of the false ribs with the middle line of the body. **A.**, **Suboccipital**, in craniometry, that included between two lines joining Broca's auricular point with the posterior border of the occipital foramen and the external occipital protuberance. **A.**, **Subpubic**, that formed at the pubic arch. **A.**, **Summi Occipitis**, Lissauer's angle included between lines connecting the most prominent point of the occipital squama and the lambda and inion. **A.**, **Summi Palati**, Lissauer's angle included between lines drawn from the staphylion and alveolar point to the highest point of the arch of the palate. **A.**, **Supra-occipital**, in craniometry, that formed by two lines joining Broca's auricular point with the lambda and the external occipital protuberance. **A.**, **Symphysian**, that which the profile of the symphysis of the lower jaw makes with the plane of the inferior border of the lower jaw. **A.**, **Tentorial**, in craniometry, that included between the plane of the tentorium and the basiscranial axis. **A. of Topinard**. See *A.*, *Facial*. **A. of Torsion**, the amount of twisting in the shaft of a bone. **A.**, **Total Cranial**, in craniometry, that measuring the cranial cavity between lines drawn from the auricular point to the opisthion and opisthion. **A. of the Uterus**, that at the cornua of the uterus, where the oviducts enter. **A.**, **Venosus**, that formed between the right and left brachio-cephalic veins. **A.**, **Vertebro-iliac**. See *A.*, *Ilio-vertebral*. **A.**, **Vestibular**, that formed in the vestibule by the junction of its posterior and middle walls. **A. of Virchow and Holder**. See *A.*, *Facial*. **A.**, **Visual**. See *A.*, *Optic*. **A. of Vogt**, in craniometry, that included between lines joining the nasion and the basion and alveolar point. **A.**, **Walther's**. See *A.*, *Internal*. **A.**, **Welcker's**. See *A.*, *Ephippial*, *A.*, *Nasal*, and

*A.*, *Nasobasal*. **A.**, **Xiphoid**, in anatomy, that formed by the sides of the xiphoid notch. **A. y.**, that one of Lissauer's angles included between the radius fixus and a line joining the lambda and inion.

**Angleberry** (*ang'-gl-ber-ē*) [*M. E.*, *angle*; *bery*]. Butchers' name for bovine tuberculosis. See *Grapes*.

**Anglesey Leg** (*ang'-gl-se leg*) [so called after the Marquis of Anglesey]. An artificial limb formed from a solid piece of wood hollowed out to receive the stump and provided with a steel joint at the knee. The ankle joint was made of wood, to which motion was communicated by strong cat-gut strings posteriorly and a spiral spring anteriorly.

**Anglicus sudor** (*ang'-lik-us sud'-dor*) [*L.*]. English sweating fever. A contagious malignant fever, also known as *Ephemera maligna*, characterized by black or dark-colored sweat.

**Anglo-Swiss Food**, an artificial infant food with the following composition: Water, 6.54; fat, 2.72; grape-sugar and milk-sugar, 23.29; cane-sugar, 21.49; starch, 34.55; soluble carbohydrates, 46.43; albuminoids, 10.26; ash, 1.20.

**Angophrasia** (*ang-go-fra'-ze-ah*) [*ἄγγελον*, to choke; *φρῶσις*, utterance]. A speech-defect consisting of a choking, drawing, and agitated utterance, with repetitions and nasal sounds, occurring in paralytic dementia.

**Angor** (*ang'-gor*) [*angor*, a strangling]. Synonymous with *Angina*. Applied by some to epigastric pain.

**Angry** (*ang'-gre*) [*M. E.*, *angerich*]. Characterized by acute inflammation and pain, as an *angry* sore.

**Angström's Law**. See *Law*.

**Anguilulidæ** (*ang-gwīl'-u-lid-ē*) [*anguilla*, an eel]. The small nematoid worms that live in vinegar and sour paste.

**Anguilliform** (*ang-gwīl'-if-orm*) [*anguilla*, an eel; *forma*, form]. In biology, having the characters or form of an eel.

**Anguillula** (*ang-gwīl'-u-lah*) [dim. of *anguilla*, an eel]. A genus of parasitic round worms. *A. Stercoralis*. See *Thread-worms* and *Parasites*, *Animal*, *Table of*.

**Anguine** (*ang'-gwin*) [*anguis*, a snake]. In biology, snake-like.

**Anguish** (*ang'-gwish*) [*angustia*, narrowness, distress]. Extreme bodily or mental distress.

**Angular** (*ang'-gu-lar*) [*angulus*, an angle]. Pertaining to an angle. **A. Artery and Vein**, the terminal branches of the facial artery and vein. **A. Gyrus, or Convolution**, the *pli courbe*, a convolution of the brain. **A. Movement**, the movement between two bones that may take place forward and backward, or inward and outward. **A. Processes**, the external and internal extremities of the orbital arch of the frontal bone.

**Angularis scapulæ Muscle** (*ang-gu-la'-ris skap'-u-le*). The *levator anguli scapulæ*. See *Muscles*, *Table of*.

**Anguliferous** (*ang-gu-lif'-er-us*) [*angulus*, an angle; *ferre*, to bear]. In biology, having the last whorl angled or cornered.

**Angulinerved** (*ang'-gu-lin-er-ēd*) [*angulus*, an angle; *nervum*, a nerve]. In biology, said of leaves in which the veins or nerves diverge from the midrib; pinnately nerved.

**Angulo-dentate** (*ang'-gu-lo-den'-tāt*) [*angulus*, an angle; *dentatus*, toothed]. With angular teeth.

**Angulus** (*ang'-gu-lus*) [*L.*]. See *Angle*.

**Angustate** (*ang-gus'-tāt*) [*angustare*, to straiten; to narrow]. Narrow.

**Angustia** (*ang-gus'-te-ah*) [*L.*]. Constriction; abnormal narrowness; distress.

**Angusticollis** (*ang-gus-te-koll'-is*) [*angustus*, narrow; *collum*, a neck]. In biology, with a slender neck.

**Angustidentate** (*ang-gus-te-den'tāt*) [*angustus*, narrow; *dens*, a tooth]. In biology, with slender teeth.

**Angustifoliate** (*ang-gus-te-fō'le-āt*) [*angustus*, narrow; *foliatus*, leaved]. In biology, with narrow leaves.

**Angustirostrate** (*ang-gus-te-ros'trat*) [*angustus*, narrow; *rostrum*, beak]. In biology, having a narrow or compressed beak.

**Angustiseptate** (*ang-gus-te-sep'tāt*) [*angustus*, narrow; *septum*, a partition]. In biology, having a narrow septum.

**Angustura** (*ang-gus-tū'rah*) [Sp., *Angostura*, a S. A. town]. Cusparia Bark. The bark of *Galipea cusparia*. A stimulant tonic and febrifuge used in malignant bilious fever, intermittent fever, and dysentery. In large doses emetic. Dose of fld. ext.  $\text{m}_x$ —xxx; of the bark gr. x—xl. Unof. **Infus. Cuspariæ** (B. P.). Dose  $\frac{3}{4}$  i—j.

**Angusturin** (*ang-gus'tu-rin*) [Sp., *Angostura*, a S. A. town]. Synonym of Brucein, *q. v.*

**Anhaloin** (*an-hāl'ō-in*) [*Anhalonium*]. An intensely poisonous alkaloid, derived from the fruit of *Anhalonium* (*Mamillaria*) *lewinii*, a cactus. It produces collapse, followed by tetanus. Unof.

**Anhalonium lewinii** (*an-ha-lō'ne-um le-win'c-i*) [L.]. The cactus of this name is a native of Mexico. Its active principle is intensely poisonous and resembles strychnin in action. Dose of the extract gr. j. Unof.

**Anaphia** (*an-ha'fē-ah*). See *Anaphia*.

**Anhela** (*an-he'lāh*) [*anhelatio*, asthma]. A difficulty in breathing. **A. amphemerina**, **A. asinina**, **A. canina**, **A. clamosa**, **A. clangosa**, **A. delassans**, **A. perennis**, **A. puerilis**, **A. spasmodica**, **A. strangulans**, **A. suffocans**, **A. tussiculosa**, synonyms of *Pertussis*.

**Anhelation** (*an-he-lā-shun*) [*anhelare*, to pant]. Shortness of breath; dyspnea.

**Anhematosis** (*an-hem-āt-ō'sis*) [*ân priv.*; *ânuatōew*, to make bloody]. Defective formation of the blood.

**Anhidrosis** (*an-hid-ro'sis*) [*ân priv.*; *îdṛōs*, sweat]. Absence or deficiency of sweat excretion.

**Anhidrotic** (*an-hid-rot'ik*) [*ân priv.*; *îdṛōs*, sweat]. 1. Tending to check sweating. 2. An agent that checks sweating.

**Anhystous** (*an-his'tus*) [*ân priv.*; *îstōs*, a web]. Structureless; not organized; plasmic.

**Anhydremia** (*an-hi-dre'mē-ah*) [*ân priv.*; *îdṛōp*, water; *aiua*, blood]. The opposite of hydremia; an abnormal decrease in the relative proportion of the water to that of the salts of the blood.

**Anhydrid** (*an-hi'drid*) [*ân priv.*; *îdṛōp*, water]. One of a class of chemic compounds that may be regarded as made up of one or more molecules of water in which the whole of the hydrogen is replaced by negative or acid radicals (that may themselves contain hydrogen).

**Anhydro-ecgonin** (*an-hi'dro-ek'go-nin*) [*ân priv.*; *îdṛōp*, water; *îk*, out of; *γογόε*, born]. A basic substance in the cocaine and ecgonin series, but more remote from cocaine than ecgonin.

**Anhydro-glycocholoral** (*an-hi'dro-gli-ko-klo'ral*). See *Chloralose*.

**Anhydromyelia** (*an-hi-dro-mi-el'le-ah*) [*ân priv.*; *îdṛōp*, water; *μυελίον*, marrow]. A deficiency of the fluid that normally fills the spinal cavity.

**Anhydrous** (*an-hi'drus*) [*ân priv.*; *îdṛōp*, water]. In chemistry, a term used to denote the absence of hydroxy] or of constitutional water.

**Anhysteria** (*an-his-te're-ah*) [*ân priv.*; *îstēra*, the womb]. Absence of the uterus.

**Anideus** (*an-id'e-us*) [*ân priv.*; *eidōs*, form]. The lowest form of omphalosite, in which the parasitic

fetus is reduced to a shapeless mass of flesh covered with skin.

**Anidous** (*an-id'us*) [*ân priv.*; *eidōs*, form]. Formless, from general arrest of development; used of fetal monsters.

**Anidrosis** (*an-id-ro'sis*). See *Anhidrosis*.

**Anidrotic** (*an-id-rot'ik*). See *Anhidrotic*.

**Anile** (*an'il*) [*anilis*, an old woman]. Imbecile.

**Anilid** (*an'il-id*) [Arab., *al*, the; *nil*, dark blue].

Compounds formed by the action of acid chlorids or acid anhydrids upon the anilins. They are very stable derivatives.

**Anilin** (*an'il-in*) [Arab., *al*, the; *nil*, dark blue],  $\text{C}_6\text{H}_5\text{N}$ . Amidobenzene; formed in the dry distillation of bituminous coal, bones, indigo, isatin, and other nitrogenous substances. It is made by reducing nitrobenzene. It is a colorless liquid with a faint peculiar odor, boiling at  $183^\circ$ ; its sp. gr. at  $0^\circ$  is 1.036. When perfectly pure it solidifies on cooling, and melts at  $-8^\circ$ .

It is slightly soluble in water, but dissolves readily in alcohol and ether. Combined with chlorine, the chlorates, and hypochlorites, the various anilin dyes are produced. It is a powerful narcotic poison. It is used in chorea and epilepsy with benefit in one-half grain doses. Unof. **A. Black**,  $\text{C}_{10}\text{H}_{15}\text{N}_3$ , one of the indulins formed by the oxidation of anilin by means of potassium chlorate in the presence of copper or vanadium salts. It is a dark-green amorphous powder, insoluble in the ordinary reagents, and is used in calico printing as a black color. See *Conspectus of Pigments*, under *Pigment*.

**A. Red**. See *Fuchsin*. **A. Sulphate**,  $[\text{C}_6\text{H}_5\text{NH}_2] \text{SO}_4\text{H}_2$ , used as a test for lignin. See *Stains*, *Table of*. **A. Violet**. See *Tyrolin*.

**Anilinophile** (*an-il-in'ō-fil*) [*anilin*; *φιλέω*, to love]. Readily stained with anilin.

**Anilism** (*an'il-izm*) [*anilin*]. An acute or chronic disease produced in workmen in anilin factories by the poisonous fumes.

**Anility** (*an-il'it-c*) [*anilis*, an old woman]. The state of being imbecile or childish.

**Anima** (*an'im-ah*) [*animus*, spirit]. The soul; the vital principle; formerly, the active principle of a drug or medicine.

**Animal** (*an'im-al*) [*anima*, the spirit, breath, or life]. An organic being having life and power of motion. Pertaining to the same. The animal kingdom is composed of the *Vertebrata*, *Mollusca*, *Articulata*, and *Radiata*. **A. Black**. See *Conspectus of Pigments*, under *Pigment*.

**A. Charcoal**, bone-black, ivory-black, etc., is the product of calcining bones in close vessels. **A. Chemistry**, that concerning itself with the composition of animal bodies. **A. Electricity**, electricity generated in the body. **A. Function**, any physiological action or process. **A. Gum**,  $\text{C}_{12}\text{H}_{10}(\text{O})_{10} + 2\text{H}_2\text{O}$ . A substance prepared from mucin by Landwehr, and so named on account of its resemblance to the gum of commerce. It occurs in many tissues of the body, is soluble in water, and in alkaline solution readily dissolves cupric oxid, the solution not being reduced on boiling. It yields no coloration with iodine, and is very feebly dextrorotatory. **A. Heat**, the normal temperature of the body, about  $98.5^\circ \text{F}$ .

**A. Kingdom**, a name for all animals considered collectively. **A. Magnetism**, mesmerism, hypnotism, etc. **A. Oil**. See *Dippel's Oil*. **A. Starch**. See *Glycogen*. **A. Tissue**. See *Tissue*.

**Animalcule** (*an'im-al'kül*) [*animalculum*, dim. of *animal*, a minute animal; *pl.*, *Animalcula*]. An organism so small as to require the microscope for its examination.

**Animalculism** (*an-im-al'-ku-lizm*) [*animalculum*, a little animal]. See *Spermism* and *Inoculation*.

**Animalculist** (*an-im-al'-ku-list*) [*animalculum*, a little animal]. See *Inoculation*.

**Animalization** (*an-im-al-iz-a'-shun*) [*animalis*, animate]. The process of assimilating food to the tissues of the body.

**Animation** (*an-im-a'-shun*) [*animare*, to have life or existence]. To be possessed of life. Formerly used to denote the effect of the vital principle by which the fetus acquires the power of continuing its existence.

**A., Suspended**, a condition marked by interrupted respiration and consciousness; caused by strangulation, the inhalation of carbon dioxide or other gases, etc.

**Anime** (*an'-im-e*) [Fr., *animé*, origin doubtful]. A name of various resins, especially that of *Hymenaea courbaril*, a tree of tropical America; sometimes used in plaster, etc. Unof. See *Copal*.

**Animism** (*an'-im-izm*) [*anima*, soul]. Stahl's theory of life and disease, namely, that the soul is the source of both normal and pathologic activities.

**Anion** (*an'-e-on*) [*ἀνά*, up; *ἰόν*, going]. In electrolysis, an electro-negative element. See *Ion*.

**Anions** (*an'-e-onz*) [*ἀνίον*, going up]. The atoms that collect around either pole when a compound is decomposed by electricity.

**Aniridia** (*an-ir-id'-e-ah*) [*ἀν* priv.; *ἰρίς*, the rainbow]. Absence or defect of the iris.

**Anisandrous** (*an-is-an'-drous*) [*ἀνισος*, unequal; *ἀνὴρ*, male]. Same as *Anisostemenous*.

**Anisanthous** (*an-is-an'-thus*) [*ἀνισος*, unequal; *ἄνθος*, flower]. In biology, varying as to the form of the perianth.

**Anischuria** (*an-is-ku'-re-ah*) [*ἀν* priv.; *ἰσχωρία*, retention of urine]. Enuresis or incontinence of urine.

**Anise** (*an'-is*). See *Anisum*.

**Anisic** (*an-is'-ik*) [*anisum*, anise]. Pertaining or belonging to anise. **A. Acid**. See *Acid*. **A. Aldehyd**. See *Aldehyd*.

**Anisin** (*an'-is-in*) [*anisum*, anise],  $C_{12}H_{11}N_2O_3$ . An artificial crystalline alkaloid, a derivative of anise.

**Anisobryous** (*an-is-ob'-re-us*) [*ἀνισος*, unequal; *βρίον*, growth]. Same as *Monocotyledonous*.

**Anisocoria** (*an-is-o-ko'-re-ah*) [*ἀνισος*, unequal; *κόρη*, pupil]. Inequality in the diameter of the pupils.

**Anisodont** (*an-i'-so-dont*) [*ἀνισος*, unequal; *ὀδός*, tooth]. In biology, having irregular teeth of unequal length.

**Anisognathous** (*an-is-og'-na-thus*) [*ἀνισος*, unequal; *γνάθος*, jaw]. In biology, having the two jaws unlike as to the molar teeth.

**Anisogynous** (*an-is-og'-in-us*) [*ἀνισος*, unequal; *γυνή*, a female]. In biology, with fewer carpels than sepals.

**Anisol** (*an'-is-ol*) [*anisum*, anise],  $C_7H_5O$ . Methyl phenyl ether, produced by heating phenol with potassium and methyl iodide or potassium methyl sulphate in alcoholic solution. It is an ethereal-smelling liquid, boiling at  $152^\circ$ ; its sp. gr. at  $15^\circ$  is 0.991.

**Anisomelous** (*an-is-om'-el-us*) [*ἀνισος*, unequal; *μέλος*, a limb]. With limbs of unequal length.

**Anisomerous** (*an-is-om'-er-us*) [*ἀνισος*, unequal; *μέρος*, part]. In biology, having the parts or organs unequal in successive series, as parts of the flowers in different whorls, or ridges, or successive molar teeth.

**Anisometropia** (*an-is-o-me-tro'-pe-ah*) [*ἀν* priv.; *ἴσος*, equal; *μέτρον*, a measure; *ὤψ*, the eye]. A difference in the refraction of the two eyes.

**Anisometropic** (*an-is-o-me-tro'-pik*) [*ἀν* priv.; *ἴσος*, equal; *μέτρον*, a measure; *ὤψ*, the eye]. Affected with anisometropia.

**Anisopetalous** (*an-is-o-pet'-al-us*) [*ἀνισος*, unequal; *πέταλον*, leaf]. In biology, with unequal petals.

**Anisophyllous** (*an-is-off'-il-us*) [*ἀνισος*, unequal; *φύλλον*, leaf]. In biology, applied to the leaves of a pair of whorls when they are unequal.

**Anisopia** (*an-is-o'-pe-ah*) [*ἀνισος*, unequal; *ὤψ*, eye]. Inequality of visual power in the two eyes.

**Anisopleural** (*an-is-o-plu'-ral*) [*ἀνισος*, unequal; *πλευρά*, the side]. In biology, bilaterally asymmetric.

**Anisopogonous** (*an-is-o-pog'-o-nus*) [*ἀνισος*, unequal; *πώγων*, beard]. In biology, applied to feathers the vanes of which are asymmetric.

**Anisopterous** (*an-is-op'-ter-us*) [*ἀνισος*, unequal; *πτερόν*, a wing]. In biology, with asymmetric or unequal wings.

**Anisospore** (*an-i'-so-spōr*) [*ἀνισος*, unequal; *σπόρα*, a spore]. In biology, one of the two varieties of spores produced by colonial species of Radiolarians.

**Anisostemenous** (*an-is-o-stem'-en-us*) [*ἀνισος*, unequal; *στήμων*, a thread]. In biology, applied to plants the stamens of which are not of the same number as the petals.

**Anisosthenic** (*an-is-o-sthen'-ik*) [*ἀνισος*, unequal; *σθένος*, strength]. Not of equal power; used of pairs of muscles, etc.

**Anisostomous** (*an-is-os'-tom-us*) [*ἀνισος*, unequal; *στόμα*, mouth]. With an irregular mouth or orifice.

**Anisotropic** (*an-is-o-tro'-pik*) [*ἀνισος*, unequal; *τροπή*, turning]. Not possessing the same properties in all directions with respect to light. In biology, varying in irritability in different parts or organs.

**Anisotropous** (*an-is-ot'-ro-pus*) [*ἀνισος*, unequal; *τρέπειν*, to turn]. Not isotropous; not having the same refracting power in all directions. A term applied to doubly refracting bodies.

**Anisum** (*an'-is-nm*) [L.; *gen.*, *Anisi*]. Anise. The fruit of *Anisum pimpinella*. Its properties are due to a volatile oil. It is slightly stimulant to the heart action. It is useful chiefly to liquefy bronchial secretions, and is therefore a favorite ingredient in cough mixtures. Dose gr. x-xx. **A. Aqua**, oil of anise 1, water 500 parts. Dose indefinite. **A. Essentia** (B. P.). Dose  $\text{m}\lambda$ -xx. **A. Oleum**, an ingredient in tinct. opii camph. Dose,  $\text{m}\lambda$ -v. **A. Spt.**, a ten per cent. solution of the oil in alcohol. Dose,  $\text{ʒi}$ -ij.

**Anisyl** (*an'-is-il*) [*anisum*, anise],  $C_{11}H_9O_2$ . A hypothetical radicle supposed to be found in anise and its derivatives.

**Anitrogenous** (*ah-ni-tro'-en-us*) [*ἀ* priv.; *νίτρον*, niter; *γενής*, producing]. Non nitrogenous.

**Anixus** (*ah-niks'-e-us*) [*ἀ* priv.; *ἰσός*, the loins]. In biology, without hips and thighs.

**Ankle** (*ang'-kl*) [M. E., *ancle*]. The joint between the tibia and fibula above and on the sides, and the astragalus below. It is a ginglymus joint, with three ligaments, the anterior, internal, and external. **A.-bone**, the astragalus. **A. Clonus**, the succession of a number of rhythmic muscular contractions in the calf of the leg, when the limb is extended and the foot flexed suddenly by a pressure upon the sole. It is a symptom of various diseases of the myelon, such as meningo-myelitis. See *Reflexes*, Table of. **A.-jerk**. See *A. Clonus*. **A.-joint**. See *Ankle*. In biology, the tarsal joint. **A. Reflex**. See *A. Clonus*.

**Anklet** (*ang'-let*) [M. E., *ancle*]. A leathern band to pass around and support the ankle.

**Ankuroid** (*ang'-ku-roid*). See *Ankyroid*.

**Ankyleron** (*ang-kil-en'-ter-on*) [*ἀγκύλη*, a coil; *έντερον*, an intestine]. An adhesion between intestinal coils.

**Ankyloblepharon** (*ang-kil-o-blef'-ar-on*) [*ἀγκύλη*, a thong or loop; *βλεφαρον*, the eyelid]. The adhesion of the ciliary edges of the eyelids.

**Ankylocheilia** (*ang-kil-o-ki'-le-ah*) [*ἀγκύλη*, loop; *χῆλος*, lip]. Adhesion of the lips.

**Ankylocolpos** (*ang-kil-o-kol'-pos*) [*ἀγκύλη*, a noose; *κόλπος*, the vagina]. Atresia or closure of the vagina or vulva.

**Ankylocore** (*ang-kil-ok'-o-re*) [*ἀγκύλη*, a noose; *κόρη*, the pupil]. Obliteration of the pupil by closure and adhesion.

**Ankylodontia** (*ang-kil-o-don'-she-ah*) [*ἀγκύλη*, a loop; *ὄδον*, a tooth]. Irregularity in the position of the teeth.

**Ankyloglossia** (*ang-kil-o-glos'-e-ah*) [*ἀγκύλη*, a noose; *γλῶσσα*, the tongue]. Tongue-tie.

**Ankyloglossotome** (*ang-kil-o-glos'-o-tom*) [*ἀγκύλη*, a noose; *γλῶσσα*, the tongue; *τόμη*, a cut]. An instrument used in treating tongue-tie.

**Ankylomele** (*ang-kil-o-me'-le*) [*ἀγκυλομήλη*; *ἀγκύλος*, bent; *μήλη*, a probe]. A curved probe.

**Ankylomerism** (*ang-kil-om'-er-izm*) [*ἀγκύλη*, a tie; *μέρος*, a part]. Abnormal adherence of parts to each other.

**Ankylopodia** (*ang-kil-o-po'-de-ah*) [*ἀγκύλη*, a loop; *πῶς*, a foot]. Ankylosis of the ankle-joint.

**Ankyloproctia** (*ang-kil-o-prok'-te-ah*) [*ἀγκύλη*, a loop; *πρωκτός*, the anus]. Atresia of the anus.

**Ankylorrhinia** (*ang-kil-o-rin'-e-ah*) [*ἀγκύλος*, a loop; *ῥίς*, the nose]. Marked adhesion between the walls of a nostril.

**Ankylose** (*ang'-kil-ös*) [*ἀγκύλος*, bent]. To be, or to become, consolidated or firmly united, as two bones; used commonly of pathologic, but sometimes of normal, union.

**Ankylosis** (*ang-kil-o'-sis*) [*ἀγκύλος*, a stiff joint]. Union of the bones forming a joint, resulting in a stiff joint. **A., False, or Spurious**, is due to the rigidity of surrounding parts. **A., True, or Bony**, when the connecting material is bone. **A., Ligamentous**, when the medium is fibrous.

**Ankylostoma** (*ang-kil-os'-to-mah*), or **Ankylostomum** (*ang-kil-os'-to-mum*) [*ἀγκύλος*, crooked; *στόμα*, a mouth]. A genus of nematoid worms, one species of which, *A. duodenale*, is found in the human intestine. This is now referred to the genus *Dochmius*. See *Ankylostomiasis*.

**Ankylostomiasis** (*ang-kil-os-to-mi'-as-is*) [*ἀγκύλος*, crooked; *στόμα*, a mouth]. A peculiar anemia produced by the parasite *Ankylostoma duodenale* (*Dochmius duodenalis*. Leuck), sucking the blood from the walls of the duodenum. It is especially prevalent among brickmakers and other workmen in Europe. It is called also *Dochmiasis*, *Brickmakers' Anemia*, *Tunnel Anemia*, *Miners' Cachexia*, *Egyptian Chlorosis*, *Tropical Chlorosis*, etc. Male fern and thymol expel the worm.

**Ankylotia** (*ang-kil-o'-she-ah*) [*ἀγκύλη*, a noose; *ὄς*, ear]. Union of the walls of the meatus auditorius.

**Ankylotome** (*ang-kil'-o-tom*) [*ἀγκύλη*, a loop; *τόμη*, a cut]. 1. A knife for operating on tongue-tie. 2. Any curved knife.

**Ankyrism** (*ang'-kir-izm*) [*ἀγκύρισμα*, a hooking]. Articulation or suture by one bone hooking upon another.

**Ankyroid** (*ang'-kir-oid*) [*ἀγκυρα*, a hook]. Hook-shaped. **A. Cavity**, in the brain, the posterior cornu of the lateral ventricle. **A. Process**, the coracoid process.

**Anlage** (*an'-lag-e*) [Ger., "a laying out"]. In biology, a term adopted from the German to indicate (1) a primary constituent of the germ or organism; (2) a constitutional predisposition.

**Annandale's Operation**. See *Operations*, Table of.

**Annatto** (*an-at'-o*). See *Annatto*.

**Anneal** (*an-äl'*) [Saxon, *annelan*, to heat]. To heat and cool slowly, as gold or other metals.

**Annealing** (*an-äl'-ing*) [Saxon, *annelan*, to heat]. The process of applying heat to a metal for the purpose of removing brittleness and increasing its ductility and malleability.

**Annectent** (*an-ek'-tent*) [*ad*, to; *nectere*, to bind]. In biology, linking or binding together.

**Annellism** (*an'-el-izm*) [*anellus*, dim. of *annulus*, a ring]. In biology, possessing a ringed structure.

**Annidalin** (*an-id'-al-in*). See *Aristol*.

**Annotin** (*an'-o-tin*) [*annotinus*, of last year]. In biology, one year old.

**Annotinous** (*an'-ol'-in-us*) [*annotinus*, of last year]. In biology, having distinct yearly growths.

**Annotto** (*an-ol'-o*) [native American]. Annatto, arnotto. A coloring matter obtained from the pellicles of the seeds of *Bixa orellana*. L. Used to color plasters. Also employed as an artificial color for butter. See *Pigments*, *Conspectus of*.

**Annual** (*an'-u-al*) [*annus*, a year]. Yearly. In biology, plants that mature and die in one year.

**Annuens** (*an'-u-ens*) [*annuere*, to nod]. The rectus capitis anticus minor muscle. See *Muscles*, Table of.

**Annuent** (*an'-u-ent*) [*annuere*, to nod]. Serving to bend the head forward; as annuent muscles.

**Annular** (*an'-u-lar*) [*annulus*, a ring]. Ring-like. A number of ligaments of the joints are called annular, as those of the ankle, wrist, etc. **A. Cartilage**, the cricoid cartilage. **A. Finger**, the ring finger. **A. Muscle of Müller**, the circular fibers of the ciliary muscle. **A. Process, or Protuberance**, the pons varolii. **A. Reflex** (of macula), a ring-like reflection sometimes seen with the ophthalmoscope surrounding the macula.

**Annulism** (*an'-u-lizm*) [*annulus*, a ring]. The state or quality of being ringed, as shown in certain worms.

**Annulose** (*an'-u-los*) [*annulus*, a ring]. In biology, possessing rings.

**Annulus** (*an'-u-lus*) [*annulus*, a ring]. A ring-shaped or circular opening. A circular or rounded margin. In biology, an encircling band, as those about the capsules of mosses; the spore-cases of ferns, the mantle. Cf. *Molluscs*, etc. **A. abdominalis**, the external and internal abdominal rings. **A. abdominis**, the inguinal ring. **A. ciliaris**, the boundary between the iris and choroid. **A. fibrosus**, the external part of the intervertebral discs. **A. membrani tympani**, an incomplete bony ring that forms the fetal auditory process of the temporal bone. **A. osseus**, the tympanic plate. **A. ovalis**, the rounded or oval margin of the *Foramen ovalis*. **A. subgenitalis**, a firm, cartilaginous-like, subgenital ring, the supporting plate of the subumbrella in medusæ. **A. tracheæ**, any tracheal ring. **A. umbilicus**, the umbilical ring. **A. of Vieussens**. Same as *A. ovalis*.

**Anocarpous** (*an-o-kar'-pus*) [*άνω*, upward; *καρπός*, fruit]. In biology, bearing fruit on the upper side of the frond.

**Anocathartic** (*an-o-kath-ar'-tik*) [*άνω*, upward; *καθαρτικός*, purging]. Emetic.

**Ano-coccygeal** (*a-no-kok-sij'-e-al*) [*anus*, the fundament; *κόκκυξ*, the coccyx]. Pertaining to the anus and the coccyx. **A. Ligament**, connects the tip of the coccyx with the external sphincter ani muscle.

**Anodal** (*an'-o-dal*) [*άνά*, up; *ὁδός*, a way]. Relating to an anode; electrically positive. **A. Diffusion**. Same as *Cataphoresis*. **A. Opening Contraction**. See *Contraction*.

**Anode** (*an'-öd*) [*άνά*, up; *ὁδός*, a way]. The positive pole of a galvanic battery.

**Anodic** (*an-od'-ik*) [*άνά*, upward; *ὁδός*, way]. In biology, applied to the upper edges of leaves arranged in ascending spirals.

**Anodontia** (*an-o-don't-she-ah*) [*ân priv.*; *ὄδων*, tooth]. Absence of the teeth.

**Anodyne** (*an'-o-din*) [*ân priv.*; *ὀδίνω*, pain]. A medicine that gives relief from pain. From their tendency to produce sleep they are called *hypnotics*. **A.**, Hoffman's. See *Ether*.

**Anodynia** (*an-o-din'-e-ah*) [*ân priv.*; *ὀδίνω*, pain]. Absence of pain.

**Anœa** (*an-e'-ah*). See *Anoia*.

**Anoesia** (*an-o-e'-ze-ah*) [*ânnoesia*, a want of sense]. Want of understanding.

**Anogenic** (*an-o-jen'-ik*) [*ânâ*, upward; *γενε*, produced]. In biology, of ascending or inward growth.

**Anoia** (*an-o-i'-ah*) [*ânnoia*, idiocy]. Synonym of *Idiocy*.

**Anol** (*an'-ol*) [see *Anethol*],  $C_9H_{10}O$ . A substance obtained from anethol by heating it with caustic alkali to 200–230°. It consists of brilliant leaflets, melting at 92°.

**Anomaliflorous** (*an-om-al-if-lo'-rus*) [*anomalus*, irregular; *flos*, flower]. In biology, bearing irregular flowers.

**Anomaliped** (*an-om'-al-ip-ed*) [*anomalus*, irregular; *pes*, foot]. In biology, characterized by having one of the phalanges of the middle toe joined to the inner toe, and three to the outer toe, as in syndactylous birds, the kingfisher, etc.

**Anomalocephalous** (*an-om-al-o-sef'-al-us*) [*ânômaλoς*, strange; *κεφαλή*, the head]. Having a deformed head.

**Anomalocephalus** (*an-om-al-o-sef'-al-us*) [*ânômaλoς*, strange; *κεφαλή*, the head]. One who has a deformed head.

**Anomalognathous** (*an-om-al-o-gon'-at-us*) [*ânômaλoς*, strange; *γονάτιον*, hip-joint]. In biology, said of birds (*Passeres*) having no ambiens muscle.

**Anomalous** (*an-om'-al-us*) [*ânômaλoς*, not ordinary]. Irregular; characterized by deviation from the common or normal order.

**Anomalus** (*an-om'-al-us*) [*ânômaλoς*, not ordinary]. A muscle or muscular slip sometimes occurring beneath the levator labii superioris alaeque nasi.

**Anomaly** (*an-om'-al-e*) [*ânômaλia*, irregularity]. A marked deviation from the normal or typical structure or occurrence.

**Anomobranchiate** (*an-o-mo-brang'-ke-ât*) [*ânomoς*, irregular; *βραγχία*, gills]. In biology, characterized by having anomalous gills.

**Anomo-carpous** (*an-o-mo-kar'-pus*) [*ânomoς*, irregular; *καρπός*, fruit]. In biology, producing anomalous or irregular fruits.

**Anomocephalus** (*an-o-mo-sef'-al-us*) [*â priv.*; *νόμος*, law; *κεφαλή*, head]. See *Anomalocephalus*.

**Anomophyllous** (*an-o-mof'-il-us*) [*â priv.*; *νόμος*, a law; *φύλλον*, a leaf]. In biology, with irregularly-arranged leaves.

**Anomphalous** (*an-om'-fal-us*) [*ân priv.*; *ὀμφαλός*, navel]. Having no navel, a condition that may result from disease or from a surgical operation.

**Anomural** (*an-o-mu'-al*) [*ânomoς*, irregular; *αἰρά*, tail]. In biology, characterized by having a small, irregular tail.

**Anonychchia** (*an-o-nik'-e-ah*) [*ân priv.*; *ὄνυξ*, nail]. Absence or defect of the nails.

**Anonym** (*an'-o-nim*) [*ânônymoς*, nameless]. In biology, an insignificant or unscientifically formed name.

**Anonyma** (*an-on'-im-ah*) [*ân priv.*; *ὄνυμα*, name]. The innominate artery.

**Anonymous** (*an-on'-im-us*) [*ân priv.*; *ὄνυμα*, a name]. Nameless. **A.** Bone. See *Innominate*.

**Anoöpsia** (*an-o-op'-se-ah*) [*ânô*, upward; *ὄψις*, vision]. Strabismus in which the eye is turned upward.

**Anophthalma** (*an-off-thal'-mah*). See *Anophthalmia*.

**Anophthalmia** (*an-off-thal'-me-ah*) [*ân priv.*; *ὀφθαλμός*, eye]. Congenital absence of the eyes. **A.** *cyclopica*, a congenital malformation in which the eye-socket is very ill developed and the orbit rudimentary or altogether absent.

**Anophthalmos** (*an-off-thal'-mus*) [*ân priv.*; *ὀφθαλμός*, eye]. 1. Congenital absence of the eyes. 2. A person born without eyes.

**Anopia** (*an-o'-pe-ah*) [*ân priv.*; *ὤψις*, the eye]. Absence or rudimentary development of the eye.

**Anopluriform** (*an-o-plu'-rif-orm*) [*ânoplus*, unarmed; *οἶπά*, tail; *forma*, form]. Resembling or related to a louse.

**Anopsia** (*an-op'-se-ah*) [*ân priv.*; *ὄψις*, vision]. See *Amblyopia*.

**Anopsy** (*an'-op-se*). Same as *Anopsia*.

**Anopylus** (*an-o-pi'-lus*) [*ânâ*, forward; *πίλη*, a gate]. Lissauer's term for a skull in which there is a strong forward inclination of the foramen magnum.

**Anorchia** (*an-or'-ke-ah*). See *Anorchism*.

**Anorchism** (*an'-or-kizm*) [*ân priv.*; *ὄρχις*, the testicle]. Absence of the testicles.

**Anorchous** (*an-or'-kus*) [*ân priv.*; *ὄρχις*, the testicle]. Without testicles.

**Anorchus** (*an-or'-kus*) [*â priv.*; *ὄρχις*, the testicle]. A person in whom the testicles are absent or not descended.

**Anorectic**, **Anorectous** (*an-o-rek'-tik*, *an-o-rek'-tus*) [*ân priv.*; *ὀρεξίς*, appetite]. Without an appetite.

**Anorexia** (*an-o-rek'-se-ah*) [*ân priv.*; *ὀρεξίς*, appetite]. Absence or diminution of appetite, occurring in gastric diseases, fevers, and many chronic affections. **A.**, **Hysteria**. See *Apepsia*, *Hysteria*. **A. nervosa**, an hysterical affection occurring chiefly in young neurotic females. It is characterized by extreme emaciation and a great aversion to food.

**Anorganic** (*an-or-gan'-ik*) [*â priv.*; *ὄργανον*, an organ]. Not containing organs, as the epidermis.

**Anorhin** (*an'-or-in*) [*ânâ*, upward; *ῥίς*, the nose]. A term applied by Lissauer to skulls in which the subnasal point lies above the *radius fixus* taken as a horizontal.

**Anorophos** (*an-o'-ro-fos*) [*â priv.*; *ὀροφος*, a roof]. Not having the skull-cap.

**Anorthopia** (*an-or-tho'-pe-ah*) [*ân priv.*; *ὀρθός*, straight; *ὄψις*, vision]. 1. A defect in vision in which straight lines do not seem straight, and parallelism or symmetry is not properly perceived. 2. Squinting; obliquity of vision.

**Anorthosis** (*an-or-tho'-sis*) [*ân priv.*; *ὀρθωσις*, a making straight]. Absence or defect of erectility.

**Anosia** (*an-o'-se-ah*) [*â priv.*; *νόσος*, disease]. Without disease; normal health.

**Anosmia** (*an-oz'-me-ah*) [*ân priv.*; *ὀσμή*, smell]. Partial or complete loss of the sense of smell, due either to local disease or disease of the olfactory nerves or bulb. It is associated with impairment or loss of the sense of taste.

**Anosphrasia** (*an-os-fra'-ze-ah*) [*ân priv.*; *ὀσφρασία*, smell]. Defect or absence of the sense of smell.

**Anosphresia** (*an-os-fre'-se-ah*). See *Anosphresis*.

**Anosphresis** (*an-os-fre'-sis*) [*ân priv.*; *ὀσφρησις*, odor]. Same as *Anosphrasia*.

**Anosphresy** (*an-os'-fre-se*). See *Anosphresia*.

**Anospinal** (*a-no-spi'-nal*) [*anus*, the fundament; *spina*, the backbone]. Relating to the anus and the spinal cord. **A.** Center is situated in the lumbar portion of the spinal cord; it controls the anal sphincters.

**Anostomus** (*an-o-sto'-mus*) [*ânâ*, upward; *στόμα*, mouth]. Lissauer's term for a skull in which the alveolar point is elevated above the *radius fixus*, the latter being horizontal.

**Anostosis** (*an-os-to'-sis*) [*áv* priv.; *ὀστίον*, bone]. Defective development of bone.

**Anotus** (*an-ot'-tus*) [*áv* priv.; *ὄτις*, the ear]. An earless monstrosity.

**Anovesical** (*a-no-ves'-ik-al*) [*anus*, the fundament; *vesica*, the bladder]. Pertaining conjointly to the anus and urinary bladder.

**Anoxemia** (*an-oks-e-e'-me-ah*) [*áv* priv.; *oxygen*; *αἷμα*, blood]. An abnormal condition due to the breathing of an insufficient amount of oxygen; mountain sickness; balloon sickness.

**Ansa** (*an'-sah*) [L., a "handle;" *pl.*, *Anse*]. A loop or curved structure suggesting by its form the handle of a vessel; a loop in a nerve, intestine, or vessel, or in a surgeon's thread. **A. capitis**, the zygomatic arch. **A., Haller's**, the loop formed by the nerve joining the facial and glosso-pharyngeal nerves. **A., Henle's**. See *Henle's Loop*. **A. hypoglossi**, a loop formed at the middle of the neck by the junction of the descendens noni nerve with branches of the second and third cervical nerves. **A. of Reil**, the name given to that portion of the brain just ventrad of the thalamus. **A. sacralis**, a loop joining the ganglion impar (G. Walteri) with the sympathetic trunks of the two sides. **A. of Vieussens**, a loop extending from the third cervical ganglion and surrounding the subclavian artery. **A. of Wrisberg**, the nerve joining the right great splanchnic and right pneumogastric nerves.

**Anserine** (*an'-ser-in*) [*anserinus*; *anser*, a goose]. Resembling a goose. **A. Disease**, an emaciation of the hands, rendering the tendons unduly prominent, and suggesting the appearance of a goose's foot. **A. Skin**. See *Cutis anserina*.

**Anstie's Test**. See *Tests, Table of*.

**Ansulate** (*an'-su-lát*) [*ansula*, a little handle]. The coiled and bent-over extremity of a stem or tendril.

**Ant-, Anti-** (*ánt-* or *an'-te*) [*ávτι*, against]. Prefixes to compound words signifying opposed to, against, counteracting, etc.

**Antacid** (*ant-as'-id*) [*anti*, against; *acidus*, acid]. A substance counteracting or neutralizing acidity; an alkali.

**Antacrid** (*ant-ak'-rid*) [*anti*, against; *acer*, sharp]. Correcting acidity in the secretions. **A. Tincture**. See *Guaic Mixture, Fennel's*.

**Antadiform** (*ant-ad'-if-orm*) [*anti*, opposite; *ad*, toward; *forma*, form]. In biology, having the dorsal and ventral contours inversely similar, as in certain fishes.

**Antagonism** (*an-tag'-o-niz-m*) [*ἀνταγωνίζεσθαι*, to struggle against]. Opposed activity, as of two sets of muscles or of two remedial agents.

**Antagonist** (*an-tag'-o-nist*) [*ἀνταγωνιστής*, counteracting]. A term applied to a drug that neutralizes the therapeutic effects of another. In anatomy, a muscle that acts in opposition to another. Applied also to diseases that seem to exclude each other. See *Drug*. **A., Associated**, a name given to that muscle of a healthy eye that turns the globe in the same direction as the affected muscle of the opposite eye would, if normal, turn the eye to which it belongs.

**Antagonistic** (*an-tag-o-nis'-tik*) [*ἀνταγωνιστής*, counteracting]. Opposing. **A. Drugs, Table of**. See *Drug*.

**Antalgic** (*ant-al'-jik*) [*ávτι*, against; *ἄλγος*, pain]. 1. Relieving pain. 2. A remedy relieving pain.

**Antalkaline** (*ant-al'-kal-in* or *-en*). An agent neutralizing alkalies, as acids.

**Ambulaculacral** (*ant-am-bu-la'-kral*) [*ávτι*, against; *ambulacrum*, a walk]. In biology, located opposite or away from the ambulacra.

**Anaphrodisiac** (*ant-af-ro-dis'-e-ak*) [*ávτι*, against; *ἀφροδίσια*, sexual desire]. 1. Lessening the venereal desires. 2. An agent that lessens the venereal impulse; an anaphrodisiac.

**Antapoplectic** (*ant-ap-o-plek'-tik*) [*ávτι*, against; *ἀποπληξία*, apoplexy]. Efficient in preventing or treating apoplexy.

**Antarthritic** (*ant-ar-thrit'-ik*) [*ávτι*, against; *ἄρθριτικός*, gouty]. 1. Relieving the gout. 2. A medicine for the relief of gout.

**Antasthenic** (*ant-as-then'-ik*) [*ávτι*, against; *ἀσθένεια*, weakness]. Tending to correct debility and restore the strength.

**Antasthmatic** (*ant-az-mat'-ik*) [*ávτι*, against; *ἄσθμα*, short breath]. 1. Relieving the asthma. 2. A medicine serving for the relief of asthma.

**Antatrophic** (*ant-at-rof'-ik*) [*ávτι*, against; *ἀτροφία*, wasting]. 1. Preventing atrophy. 2. A drug that will prevent wasting or atrophy.

**Antebrachium** (*an-te-bra'-ke-um*) [*ante*, before; *brachium*, the arm]. The forearm.

**Antechamber** (*an'-te-chám-ber*) [*ante*, before; *ME.*, *chamber*, a room]. In biology, the space between the guard-cells of a stoma.

**Antecoxal** (*an-te-koks'-al*) [*ante*, before; *coxa*, the hip joint]. In biology, located anterior to a coxa.

**Antecurvature** (*an-te-ker'-vat-chür*) [*ante*, forward; *curvatus*, bent]. A forward curvature.

**Antedisplacement** (*an-te-dis-plás'-ment*) [*ante*, forward; *O. F.*, *displacer*, to put out of place]. Forward displacement of a part or organ.

**Antedonin** (*an-te-don'-in*) [*Antedon*, a crinoid, from *ἀντιδόν*, the Greek medlar]. A pigment obtained from *Comatula rosacea*, a crinoid echinoderm.

**Anteflexion** (*an-te-flek'-shun*) [*ante*, before; *flectere*, to bend]. A bending forward. **A. of Uterus**, a condition in which the fundus sinks between the cervix and the neck of the bladder.

**Antefurca** (*an-te-fer'-kah*) [*ante*, before; *furca*, a fork]. In biology, a Y-shaped chitinous prop affixed to the under surface of the thorax of insects and projecting into the thoracic cavity. Cf. *Medifurca* and *Postfurca*.

**Antegrade** (*an'-te-grád*) [*antegredi*, to precede]. Anabolic; not retrograde or catabolic.

**Antehelix** (*an-te-he'-liks*). See *Anthelix*.

**Antelocation** (*an-te-lo-ka'-shun*) [*ante*, before; *locus*, a place]. The forward displacement of an organ or viscus.

**Antembasis** (*ant-em'-bas-is*) [*ἀντέμβασις*, interlocking]. The setting or locking of bones.

**Antemetlic** (*ant-e-met'-ik*). See *Antiemetic*.

**Ante mortem** (*an'-te mor'-tem*) [L.]. Before death.

**Antenarial** (*an-te-na'-re-al*) [*ante*, before; *nares*, the nostrils]. Situated in front of the nostrils.

**Antenna** (*an-ten'-ah*) [*ávτείνειν*, to stretch out]. In biology, one of the paired, articulated, sensory appendages of the head of an arthropod. One of a pair of long additions to the male flower in certain orchids.

**Antennaria** (*an-ten-a'-re-ah*). See *Everlasting*.

**Anteocular** (*an-te-ok'-u-lar*) [*ante*, before; *oculus*, the eye]. In biology, situated in advance of the eyes.

**Anteoperculum** (*an-te-o-per'-ku-lum*) [*ante*, before; *operculum*, a lid]. In biology, the *Preoperculum*, *q.v.*

**Anteorbital** (*an-te-or'-bit-al*) [*ante*, before; *orbita*, the track of a wheel]. In comparative anatomy, placed in advance of the eyes.

**Ante partum** (*an'-te par'-tum*) [L.]. Before delivery.

**Antepectoral** (*an-te-pek'-tor-al*) [*ante*, before; *pectus*, the breast]. Placed in front of the chest.

**Antepectus** (*an-te-pek'-tus*) [*ante*, before; *pectus*, the breast]. In biology, the sternal region of the prothorax.

**Antephalitic** (*ant-ef-e-all'-tik*) [*ἀντί*, against; *ἐφιάλης*, nightmare]. Preventive of nightmare.

**Antepileptic** (*ant-ep-il-ep'-tik*) [*ἀντί*, against; *ἐπιληψία*, epilepsy]. Relieving epilepsy.

**Anteprostatic** (*ant-le-pres-lat'-ik*) [*ante*, before; *προστατή*, one who stands before]. Situated before the prostate. **A. Glands**, certain small accessory glands sometimes found between Cowper's gland and the prostate.

**Anterethic** (*an-ter-eth'-ik*) [*ἀντί*, against; *ἐρεθισμός*, irritation]. Soothing; allaying irritation.

**Anterior** (*an-te'-re-or*) [*anterior*, forward]. Situated ventrad or hemad of a corresponding organ, the latter being designated as *posterior* (or *posterior*). **A. Poliomyelitis**, inflammation in the anterior horns of the spinal cord, giving rise to a characteristic paralysis; common in children. **A. Rotation**, the forward turning of the presenting part in labor.

**Antero-** (*an'-te-ro-*) [*anterior*, before]. A prefix signifying position in front.

**Anterograde** (*an'-te-ro-grād*) [*anterior*, before; *gredi*, to go]. Proceeding from before; moving back.

**Antero-inferior** (*an'-te-ro-in-fē'-re-or*) [*anterior*, forward; *inferior*, lower]. Situated in front and below.

**Antero-lateral** (*an'-te-ro-lat'-er-al*) [*anterior*, before; *latus*, a side]. In front and to or on one side; from the front to one side.

**Antero-parietal** (*an'-te-ro-par-iē'-et-al*) [*anterior*, before; *paries*, a wall]. Anterior and also parietal. **A. Area**, the anterior part of the parietal area of the cranium. **A. Gyrus**, or **Convolution**, the ascending frontal convolution of the brain.

**Antero-posterior** (*an'-te-ro-pos-te'-re-or*) [*anterior*, forward; *posterior*, backward]. From before backward. **A. Plane**. See *Median plane*.

**Antero-superior** (*an'-te-ro-su-pe'-re-or*) [*anterior*, forward; *superior*, upper]. In front and above.

**Anterotic** (*ant-e-rot'-ik*) [*ἀντί*, against; *ἐρωτικός*, pertaining to love]. Anaphrodisiac.

**Ante-uterine** (*an-te-ut'-er-in*) [*ante*, before; *uterus*, the womb]. In front of the womb.

**Anteversion** (*an-te-ver'-shun*) [*ante*, before; *vertere*, to turn]. A turning forward. **A. of Uterus**, the fundus is bent toward the symphysis pubis, the cervix toward the sacrum.

**Anthela** (*an'-the-lah*) [*ἀνθήλη*, the downy plume of the reed]. In biology, an open paniculate cyme.

**Anthelicine** (*an-thel'-is-in*) [*ἀνθελίς*, the inner curvature of the ear]. Pertaining to the anthelix.

**Anthelix** (*an'-he-lik*s or *an'-the-lik*s) [*ἀνθελίς*, the inner curvature of the ear]. The ridge surrounding the concha of the external ear posteriorly.

**Anthelmintic** (*an-thel-min'-tik*) [*ἀντί*, against; *ἐλμινς*, a worm]. 1. Efficacious against worms. 2. A vermicide. An agent either killing or rendering powerless intestinal parasites; a *vermifuge* expels worms.

**Anthemis** (*an'-them-is*) [*ανθίς*, a flower]. Camomile. The flower-heads of *A. nobilis*, with properties due to a volatile oil, a camphor, and a bitter principle. Useful in coughs and spasmodic infantile complaints. An excellent stomachic tonic. Infusion of  $\mathfrak{z}$ iv to  $\mathfrak{O}$ j, given in doses of  $\mathfrak{z}$ j-ij. No official preparations. **A.. Extract** (B. P.), dose gr. ij-x. **A., Infus.** (B. P.), dose  $\mathfrak{z}$ j-iv. **A. Ol.**, the volatile oil of camomile. Dose mjj-x, in sugar.

**Anthemoptyc** (*ant-hem-op'-te-ik*) [*ἀντί*, against; *αἷμα*, blood; *πρίσις*, a spitting]. Checking pulmonary hemorrhage.

**Anthemorrhagic** (*ant-hem-or-aj'-ik*) [*ἀντί*, against; *αἷμα*, blood; *παύσις*, a bursting]. Checking or tending to prevent hemorrhage.

**Anth** (*an'-ther*) [*ἀνθράς*, in full bloom]. In biology,

the male sexual organ in plants; the summit and essential part of the stamen. It contains the pollen or fecundating substance of the flower.

**Antheridia** (*an-ther-id'-e-ah*). Plural of *Antheridium*, q. v.

**Antheridium** (*an-ther-id'-e-um*) [*anthera*, anther; Gr. dim., *ιδίον*]. The male or fertilizing organ of higher cryptogams; the organ that produces antherozoids.

**Antherozoid** (*an'-ther-o-zo-id*) [*anthera*, anther; *ζῷδες*, zoöid]. In biology, one of the motile fertilizing bodies of higher cryptogams, analogous to the spermatozoid of animals. The male reproductive cell of cryptogams.

**Anthesis** (*an-the'-sis*) [*ἀνθισσις*, the full bloom of a flower]. The act of flowering; florescence.

**Anthocarpous** (*an-tho-kar'-pus*) [*ἀνθος*, flower; *καρπός*, fruit]. In biology, applied to collective or accessory fruits characterized by thickened floral envelopes.

**Anthoclinium** (*an-tho-clin'-e-um*) [*ἀνθος*, flower; *κλίνη*, a bed]. See *Clinanthium*.

**Anthocyanin** (*an-tho-si'-an-in*) [*ἀνθος*, flower; *κυανός*, blue]. The soluble pigment of blue flowers.

**Anthodium** (*an-tho'-de-um*) [*ἀνθος*, a flower; *εἶδος*, form]. In biology, the so-called "flower" of the *Compositae*, really a capitulum or head of flowers.

**Anthogenesis** (*an-tho-jen'-es-is*) [*ἀνθος*, a flower; *γένεσις*, production]. In biology, a phase of alternation of generations exhibited by certain hemipterous insects, plant lice, etc.

**Antholeucin** (*an-tho-lu'-sin*) [*ἀνθος*, a flower; *λευκός*, white]. The soluble pigment of white flowers.

**Antholysis** (*an-thol'-is-is*) [*ἀνθος*, a flower; *λύσις*, a breaking up]. In biology, that retrograde metamorphosis in which the normal character or location of the parts of a flower is altered.

**Anthony's Fire**, St. A popular name for *Erysipelas*.

**Anthophilous** (*an-thoff'-il-us*) [*ἀνθος*, a flower; *φίλος*, loving]. In biology, fond of flowers, as a bee.

**Anthophore** (*an-tho-fōr*) [*ἀνθος*, a flower; *φέρειν*, to bear]. In biology, the stalk that bears the corolla, stamens, and pistil in certain flowers, formed by the elongation of the internode between the calyx and corolla.

**Anthotaxis** (*an-tho-taks'-is*) [*ἀνθος*, a flower; *τάξις*, order]. The arrangement of flowers in flower-clusters.

**Anthoxanthin**, **Anthoxanthine** (*an-tho-zan'-thin*) [*ἀνθος*, flower; *ξανθός*, yellow]. In biology, the yellowish pigments of fruits and flowers.

**Anthozoöid** (*an-tho-zo'-oid*) [*ἀνθος*, a flower; *ζῷον*, an animal; *εἶδος*, likeness]. A single zoöid of the flower-like animals. *Actinozöa*; e. g., a coral polyp.

**Anthraxemia** (*an-thras-e'-me-ah*) [*ἀνθραξ*, a coal; *αἷμα*, blood]. Wool-sorter's disease; splenic fever of animals; the presence in the blood of *Bacillus anthracis*, the microbe of true anthrax or malignant pustule.

**Anthracene** (*an'-thra-sēn*) [*ἀνθραξ*, a coal],  $C_{14}H_{10}$ . A hydrocarbon formed from many carbon compounds when they are exposed to a high heat; also from coal-tar. It crystallizes in colorless, monoclinic tables, showing a beautiful blue fluorescence; dissolves with difficulty in alcohol and ether, but easily in hot benzene; melts at  $213^{\circ}$ . It is the base from which artificial alizarin is prepared. **A. Colors**. See *Pigments*, *Conspectus of*. **A. Oil**, the fraction of coal-tar distilling from  $270^{\circ}$  C. and over. It consists of that portion of the tar that is made up of bodies possessing the highest boiling points, and is distinguished from the heavy oil fraction by a separation, on cooling, of solid matters. In it has been found naphthalene, methyl-naphthalene, anthracene, phenanthrene, methyl-anthracene, pyrene, carbazol, etc.

**Anthracia** (*an-thra'-se-ah*) [*ἄνθραξ*, a coal]. A name for diseases characterized by the formation of carbuncles. **A. pestis**, the plague. **A. rubula**. Synonym of *Frambesia*.

**Anthractic** (*an-thras'-ik*) [*ἄνθραξ*, a coal]. Pertaining to or of the nature of anthrax.

**Anthracite** (*an'-thras-it*) [*ἄνθραξ*, a coal]. A variety of mineral coal containing but little hydrogen, and therefore burning almost without flame.

**Anthracnosis** (*an-thrak-no'-sis*) [*ἄνθραξ*, a coal; *νόσος*, disease]. Black rot, a fungus disease of vines, caused by the *Phoma uvicola*, or *Sphaeceloma ampelium*.

**Anthracoid** (*an'-thrak-oid*) [*ἄνθραξ*, coal; *εἶδος*, form]. Resembling anthrax.

**Anthracometer** (*an-thrak-om'-et-er*) [*ἄνθραξ*, coal; *μέτρον*, a measure]. An instrument for estimating the amount of carbon dioxide in the air.

**Anthracometry** (*an-thrak-om'-et-re*) [*ἄνθραξ*, carbon; *μέτρον*, a measure]. The determination of the amount of carbon dioxide in air.

**Anthracoecrosis** (*an-thrak-o-ne-kro'-sis*) [*ἄνθραξ*, coal; *νεκρωσις*, death]. The necrotic transformation of a tissue into a black mass, as in dry gangrene.

**Anthracosis** (*an-thrak-o'-sis*) [*ἄνθραξ*, carbon; *νόσος*, disease]. A chronic interstitial pneumonitis with pigmentation of the lung, in coal-miners.

**Anthracotophus** (*an-thrak-o-ti'-fus*) [*ἄνθραξ*, a coal; *τύφος*, smoke, stupor]. Synonym of the *Plague*.

**Anthrakokali** (*an-thrak-o'-kal-ē*) [*ἄνθραξ*, coal; *Ar.*, *qali*, soda ash]. An alkaline powder made by heating powdered mineral coal with a strong solution of caustic potash, with or without sulphur. It is used internally and externally in skin diseases, rheumatism, etc. Unof.

**Anthranilic Acid** (*an-thran-il'-ik*). See *Acid*.

**Anthranol** (*an'-thran-ol*) [*ἄνθραξ*, coal; *oleum*, oil],  $C_{14}H_{10}O$ . A body isomeric with anthrol. It is produced by the careful reduction of anthraquinone with tin and acetic acid. It crystallizes from alcohol in shining needles, melting with decomposition at  $165^{\circ}$ .

**Anthraquinone** (*an-thra-kwin-on'*) [*ἄνθραξ*, coal; *Sp.*, *quina*, bark],  $C_{14}H_{8}O_2$ . Produced by oxidizing anthracene with  $HNO_3$ . It sublimes in yellow needles, melting at  $277^{\circ}$ , soluble in hot benzene and  $HNO_3$ .

**Anthrarobin** (*an-thra-ro'-bin*) [*ἄνθραξ*, coal; *aroba*, E. Ind. name for the bark of a leguminous tree]. A derivative of alizarin, similar to chrysarobin. A yellowish-white powder, insoluble in water, but soluble in alcohol and dilute alkaline solutions. Useful in psoriasis. Unof.

**Anthrax** (*an'-thraks*) [*ἄνθραξ*, a coal or carbuncle]. 1. A carbuncle; a painful, dark-colored tumor of the cellular tissue, ending in mortification of the part and the discharge of a fetid, bloody pus. The *benignant anthrax* has no fatal consequences. 2. The true or *malignant anthrax*, called also *malignant pustule*, is caused by the infection from animals suffering from splenic apoplexy, and is due to a specific bacillus, which, from a single center, may extend over the body and invade the intestinal tract, producing in this way, or by direct infection of diseased meat, the *intestinal type* of the disease. See *Bacillus (anthrax)*. 3. The disease called black-leg, or quarter-evil (of sheep, cattle, etc.), is associated with what is called *symptomatic anthrax*. It is due to the microorganism called *Bacillus chauvvei*, (Arloing, Cornevin and Thomas). **A. Fever**. Synonym of *Anthrax*. **A., Internal**. See *Pustula maligna*. **A., Symptomatic**. See *Black-leg*.

**Anthrol** (*an'-throl*) [*ἄνθραξ*, a coal],  $C_{14}H_{10}O$ . A body obtained from anthracene-sulphonic acid. It crystallizes in leaflets, dissolving with a yellow color in the alkalis, and in  $H_2SO_4$  with a blue color when heated.

**Anthrophobia** (*an-thro-fo'-be-ah*). See *Anthropophobia*.

**Anthropiatrics** (*an-thro-pe-at'-riks*) [*ἄνθρωπος*, man; *ιατρική*, the art of medicine]. Ordinary human (non-veterinary) medicine.

**Anthropobiology** (*an-thro-po-bi-ol'-o-jē*) [*ἄνθρωπος*, man; *βίος*, life; *λόγος*, word]. The science of the life-history of man.

**Anthropocholic Acid** (*an-thro-po-kol'-ik*). See *Acid*.

**Anthropogenesis** (*an-thro-po-jen'-es-is*) [*ἄνθρωπος*, man; *γένεσις*, generation]. The development of man, as a race (*phylogenesis*) and as an individual (*ontogenesis*).

**Anthropogenous** (*an-thro-po'-en-us*) [*ἄνθρωπος*, man; *γεννάειν*, to produce]. Pertaining to *Anthropogenesis*.

**Anthropogeny** (*an-thro-po'-en-e*) [*ἄνθρωπος*, man; *γεννάειν*, to produce]. The study or science of the descent of man.

**Anthropoglot** (*an'-thro-po-glōt*) [*ἄνθρωπος*, man; *γλῶσσα*, the tongue]. Human-tongued, as a parrot.

**Anthropography** (*an-thro-pog'-ra-fe*) [*ἄνθρωπος*, man; *γράφειν*, to write]. A treatise upon the human structure or organism.

**Anthropoid** (*an'-thro-poid*) [*ἄνθρωπος*, a man; *εἶδος*, form]. Man-like, as an ape, or as all primates above the lemuroids.

**Anthropology** (*an-thro-pol'-o-jē*) [*ἄνθρωπος*, man; *λόγος*, discourse]. The science of the nature, physical and psychological, of man and of mankind.

**Anthropometalism** (*an-thro-po-met'-al-izm*) [*ἄνθρωπος*, man; *M.E.*, *metal*]. Hypnotism or the like condition, induced by looking at a metallic disc.

**Anthropometer** (*an-thro-pom'-et-er*) [*ἄνθρωπος*, man; *μέτρον*, a measure]. An instrument used in anthropometry.

**Anthropometry** (*an-thro-pom'-et-re*) [*ἄνθρωπος*, man; *μέτρον*, a measure]. The determination of the measurement, weight, strength, and proportions of the human body.

**Anthropomorphic** (*an-thro-po-mor'-fik*) [*ἄνθρωπος*, man; *μορφή*, form]. Man-like.

**Anthroponosography** (*an-thro-po-no-sog'-ra-fe*) [*ἄνθρωπος*, man; *νόσος*, sickness; *γράφειν*, to write]. A description of the diseases of mankind.

**Anthrophagy** (*an-thro-poff'-a-jē*) [*ἄνθρωπος*, man; *φαγεῖν*, to devour]. 1. Cannibalism. 2. Sexual perversion leading to rape, mutilation, and cannibalism.

**Anthrophobia** (*an-thro-po-fo'-be-ah*) [*ἄνθρωπος*, man; *φόβος*, fear]. A symptom of mental disease consisting in fear of society.

**Anthropophysiography** (*an-thro-po-fiz-e-og'-ra-fe*) [*ἄνθρωπος*, man; *φύσις*, nature; *γράφειν*, to write]. The science or description of the natural characters of the human species.

**Anthroposomatology** (*an-thro-po-so-mat-ol'-o-jē*) [*ἄνθρωπος*, man; *σῶμα*, body; *λόγος*, science]. The sum of what is known regarding the human body.

**Anthropotomy** (*an-thro-pot'-o-me*) [*ἄνθρωπος*, man; *τομή*, section]. Human anatomy, or dissection of the human body.

**Anthropotoxin** (*an-thro-po'-toks-in*) [*ἄνθρωπος*, man; *τοξικόν*, poison]. The toxic substance excreted by the lungs of human beings.

**Anthropurgic** (*an-thro-per'-jik*) [*ἄνθρωπος*, man; *ἔργον*, work]. Acted upon or influenced by man.

**Anthropic** (*ant-hi-drop'-ik*) [*ἄντι*, against; *ἵδωρ*, water]. Effective against dropsy.

**Anthypnotic** (*ant-hi-not'-ik*) [*ἄντι*, against; *ἵπνωσις*, sleep]. 1. Preventive of sleep. 2. An agent that tends to induce wakefulness.

**Anthypochondriac** (*ant-hi-p-o-kon'-dre-ak*) [*ἄντι*, against; *ὑποχονδριακός*, affected in the hypochondrium]. Efficient in overcoming hypochondriasis.

**Anthyseric** (*ant-his-ter'-ik*) [*αντι*, against; *ίστερα*, the womb]. Overcoming hysteria.

**Anti-** (*an'-te-*) (sometimes contracted to *ant*) [*αντι*, against]. A prefix of compound words signifying counteraction, opposition, etc.

**Antiaditis** (*an-ti-ad-i'-tis*) [*αντιας*, a swollen tonsil; *τις*, inflammation]. Tonsillitis.

**Antiadoncus** (*an-ti-ad-on'-kus*) [*αντιας*, a swollen tonsil; *ὄγκος*, a heap]. Any tumor or swelling of the tonsils.

**Antiae** (*an'-ti-e*) [*antiae*, the hair growing on the forehead]. In biology, the frontal points or feathers growing forward on the base of the upper mandible.

**Antialbumate** (*an-te-al'-bu-māt*) [*αντι*, against; *albumen*, white of egg]. Parapeptone; a product of hydrochloric-acid digestion on albumin. The pancreatic ferment changes it into antipeptone. When treated with acids it is converted into the substance called by Kühne *antialbumid*, which is identical with the *hemiprotein* of Schützenberger and the *dyspeptone* of Meissner, *q. v.*

**Antialbumid** (*an-te-al'-bu-mid*). See *Antialbumate*.

**Anti-albumin** (*an-te-al-bu'-min*) [*αντι*, against; *albumen*, white of egg]. An alleged product of the action of dilute hydrochloric acid upon albumin; it is probably one of the preformed substances existing in the proteid molecule. The other has been called *hemi-albumin*. Gastric juice first converts them into *anti-albumose* and *hemi-albumose*, and these finally into *anti-peptone* and *hemi-peptone*.

**Anti-albumose** (*an-te-al-bu'-mos*) [*αντι*, against; *albumen*, white of egg]. One of the albumoses produced by the action of pancreatic juice on albumin. It resembles syntonin or acid albumin, and is convertible into antipeptone.

**Antiafrodisiac** (*an-te-af-ro-dis'-e-ak*). See *Anaphrodisiac*.

**Antiar** (*an'-te-ar*). See *Antiarin*.

**Antiarin** (*an'-te-ar-in*) [Javanese, *antiar* or *antschar*],  $C_{14}H_{20}O_5 + 2H_2O$ . The active principle of *Antiaris toxicaria* or *Uras antiar*, the Javanese poison-tree. It is used as an arrow poison, and is intensely poisonous. It is a cardiac depressant. Dose gr.  $\frac{1}{100}$ .

**Antiarthritic** (*an-te-ar-thrit'-ik*) [*αντι*, against; *αρθριτις*, the gout]. A remedy against gout.

**Antiasthmatic** (*an-te-as-mat'-ik*) [*αντι*, against; *ἀσθμα*, short breath]. Relieving or preventing asthma.

**Antibacterial** (*an-te-bak-te'-re-al*) [*αντι*, against; *βακτηρια*, a staff, stick]. Opposed to the germ theory of disease.

**Antibacteric** (*an-te-bak-te'-rik*) [*αντι*, against; *βακτηρια*, a staff, stick]. Destructive to bacteria.

**Antibechic** (*an-te-beck'-ik*) [*αντι*, against; *βήξ*, a cough]. 1. Alleviating or curing cough. 2. A remedy for cough or hoarseness.

**Antibilious** (*an-te-bil'-yus*) [*αντι*, against; *biliosus*, full of bile]. Effective against bilious disorders.

**Antibiotic** (*an-te-bi-ot'-ik*) [*αντι*, against; *βίος*, life]. 1. Tending to destroy life. 2. Antagonistic to a belief in life.

**Antiblenorrhagic** (*an-te-blen-or-aj'-ik*) [*αντι*, against; *βλιννος*, mucus; *ρήγνυμαι*, to burst]. Efficacious in preventing gonorrhea.

**Antibrachial** (*an-te-bra'-ke-al*) [*αντι*, against; *βραχιον*, the arm]. Pertaining to the forearm.

**Antibrachium** (*an-te-bra'-ke-um*) [*αντι*, against; *βραχιον*, the arm]. The forearm; antebrachium.

**Antibromic** (*an-te-bro'-mik*) [*αντι*, against; *βρωμος*, a stench]. 1. Deodorant. 2. A drug that destroys often-ive smells. A deodorizer.

**Anticachectic** (*an-te-kak-ek'-tik*) [*αντι*, against; *κακίς*, bad; *ἔξω*, habit]. Effective in destroying cachexia.

**Anticalcareous** (*an-te-kal-ka'-re-us*) [*αντι*, against; *calx*, lime]. In veterinary medicine, preventing glanders.

**Anticalculus** (*an-te-kal'-ku-lus*) [*αντι*, against; *calculus*, a pebble]. Good against calculus; antilithic.

**Anticarcinomatous** (*an-te-kar-sin-o'-mat-us*) [*αντι*, against; *καρκινωμα*, cancer]. Preventing carcinoma.

**Anticardium** (*an-te-ka'-de-um*) [*αντι*, over against; *καρδια*, the heart]. The scrobiculus cordis, or pit of the stomach; the infrasternal depression.

**Anticarious** (*an-te-ka'-re-us*) [*αντι*, against; *caries*, decay]. Preventing decay, as of the teeth.

**Anticatarrrhal** (*an-te-kat-ar'-al*) [*αντι*, against; *κατάρρως*, a flowing down]. Counteracting catarrh.

**Anticaustotic** (*an-te-ka-u-sot'-ik*) [*αντι*, against; *καυσος*, heat]. Counteracting fever.

**Anticaustic** (*an-te-ka-u-s'-tik*) [*αντι*, against; *καυστικός*, caustic]. Arresting the action of a caustic agent.

**Antichirotetanus** (*an-te-ki-ro-tet'-an-us*) [*αντιχειρ*, the thumb; *τέτανος*, spasm]. Same as *Antichirotonus*.

**Antichirotonous** (*an-te-ki-rol'-o-nus*) [*αντιχειρ*, the thumb; *τόνος*, convulsive tension]. Affected with or manifesting antichirotonus.

**Antichirotonus** (*an-te-ki-rol'-o-nus*) [*αντιχειρ*, thumb; *τόνος*, tension]. Forcible and steady inflection of the thumb, seen in or before some attacks of epilepsy.

**Antichlorotic** (*an-te-klo-rol'-ik*) [*αντι*, against; *χλωρότης*, greenness]. Counteracting chlorosis.

**Anticholeric** (*an-te-kol-er'-ic*) [*αντι*, against; *χολέρα*, cholera]. Good against cholera.

**Anticholerin** (*an-te-kol'-er-in*) [*αντι*, against; *χολέρα*, cholera]. A product isolated by Klebs from cultures of cholera-bacilli, and thought to be bactericidal, curative, and immunifying.

**Anticipating** (*an-tis'-ip-a-ting*) [*anticipare*, to take before]. Applied to the occurrence of periodical phenomena in disease or health, before their customary time, as in intermittent fever or the catamenia.

**Anticlinal** (*an-te-kl'-nal*) [*αντι*, against; *κλίνειν*, to slope]. Sloping in opposite directions. **A. Vertebra**, in man, the tenth thoracic vertebra, where the thoracic vertebra begin to assume the characters of the lumbar.

**Anticnemion** (*an-tik-ne'-me-on*) [*αντι*, against; *κνήμη*, leg]. The shin or front of the leg.

**Anticollic** (*an-te-kol'-ik*) [*αντι*, against; *κολική*, colic]. Efficacious against colic.

**Anticontagious** (*an-te-kon-ta'-jus*) [*αντι*, against; *contagiosus*, contagious]. Counteracting contagion.

**Anticonvulsive** (*an-te-kon-zul'-siv*) [*αντι*, against; *convulsus*, convulsed]. Effective against convulsions.

**Anticopometer** (*an-te-ko-pom'-et-er*) [*αντικοπή*, resonance; *μέτρον*, a measure]. A pleximeter.

**Anticous** (*an-ti'-kus*) [*anticus*, that which is in front]. In biology, turned toward the center of the flower, as *introrse* anthers.

**Anticritical** (*an-te-krit'-ik-al*) [*αντι*, against; *κρίσις*, a crisis]. Preventing the crisis of a disease.

**Anticryptic** (*an-te-krip'-tik*) [*αντι*, against; *κρύπτειν*, to hide, to keep secret]. In biology, applied to such mimetic colors as enable animals to approach their prey, as in the frog, *Ceratophrys cornuta*.

**Anticus** (*an-ti'-kus*) [*anticus*, that in front]. Anterior, in front of.

**Antidiarrheal** (*an-te-di-ar-e'-al*) [*αντι*, against; *διάρρην*, a flowing through]. Preventing or overcoming diarrhea.

**Antidigestive** (*an-te-di-jes'-tiv*) [*αντι*, against; *digestio*, digestion]. Preventing the proper digestion of the food.

**Antidinic** (*an-te-din'-ik*) [*αντι*, against; *δινος*, a whirl]. Curing or preventing vertigo.

**Antidotal** (*an-te-do'-tal*) [*αντι*, against; *διδόναι*, to give]. Of the nature of an antidote.

**Antidote** (*an'-te-dot*) [ἀντί, against; δίδωμι, to give]. An agent preventing or counteracting the action of a poison. The official **A.**, **Arsenical**, of the German Pharmacopeia is prepared by dissolving 100 parts of the hydrated sulphate of iron in 250 parts of water, to which add (without heat) 15 parts of burnt magnesia and 250 parts of water. **A.**, **Chemical**, changes the chemical nature of the poison so that it becomes insoluble or harmless. **A.**, **Mechanical**, prevents absorption by holding the poison in mechanical suspension or by coating the stomach. **A.**, **Physiological**, supplies its own peculiar and neutralizing effect upon the system. **A.**, **Universal**, a mixture of one part of dissolved iron sulphate in two parts of magnesia water. See *Drug*.

**Antidotum** (*an-tid'-o-tum*). See *Antidote*.

**Antidromy** (*an-tid'-ro-me*) [ἀντί, against; δρᾶμειν, to run]. In biology, having a spiral arrangement the opposite of that of contiguous parts. Cf. *Heterodromy*.

**Antidynamic** (*an-te-di-nam'-ik*) [ἀντί, against; δύναμις, force]. Weakening; depressing.

**Antidyscratic** (*an-te-dis-krat'-ik*) [ἀντί, against; δυσκράσια, bad temperament]. Tending to overcome, as a dyscrasia.

**Antidysenteric** (*an-te-dis-en-ter'-ik*) [ἀντί, against; δυσεντερία, dysentery]. 1. Serviceable against dysentery. 2. A remedy for dysentery.

**Antidysuric** (*an-te-dis-u'-rik*) [ἀντί, against; δυσουρία, difficult micturition]. Relieving dysuria.

**Antiemetic** (*an-te-e-met'-ik*) [ἀντί, against; ἐμετικός, causing vomit]. Preventing emesis; relieving nausea.

**A. Root**. See *Adrua*.

**Antifat** (*an'-te-fat*). See *Fucus vesiculosus*.

**Antifebrile** (*an-te-feb'-ril*) [ἀντί, against; febris, a fever]. An agent reducing a fever; a febrifuge.

**Antifebrin** (*an-te-feb'-rin*) [ἀντί, against; febris, a fever],  $C_6H_5 \cdot C_2H_5O \cdot NH$ . Phenyl-acetamid acetanilid. A white, crystalline powder insoluble in water, freely soluble in alcohol. An antipyretic more powerful than quinin. Its effects are manifest in one hour, passing away in 3-10 hours. It is efficacious in fevers characterized by high temperature, and also is a valuable analgesic and antispasmodic. Dose gr. iv-xv. Unof. **A.**, **Bromated**. See *Antisepsin*.

**Antiferment** (*an-te-fer'-ment*) [ἀντί, against; fermentum, leaven]. An agent that prevents fermentation.

**Antigalactagogue** (*an-te-gal-ak'-ta-gog*) [ἀντί, against; γάλα, milk; ἀγωγός, leading]. Same as *Antigalactic*.

**Antigalactic** (*an-te-gal-ak'-tik*) [ἀντί, against; γάλα, milk]. 1. Lessening the secretion of milk. 2. A drug that lessens the secretion of milk.

**Antigeny** (*an-tij'-en-e*) [ἀντί, against; γένος, race]. In biology, existing in two distinct sexual forms.

**Antigugger** (*an-te-gug'-ler*) [ἀντί, against; gurgle]. A tube inserted into the mouth of a bottle to prevent the splashing or gurgling of liquid that is poured out.

**Antihectic** (*an-te-hek'-tik*) [ἀντί, against; ἑκτικός, consumptive]. A remedy preventing or overcoming a hectic condition.

**Antihelix** (*an-te-he'-lik*). See *Anthelix*.

**Antitherpetic** (*an-te-her-pet'-ik*) [ἀντί, against; ἑρπης, herpes]. Preventing herpes.

**Antihidrotic** (*an-te-hi-drot'-ik*) [ἀντί, against; ιδρώς, sweat]. 1. Diminishing the excretion of sweat. 2. An agent lessening the secretion of sweat.

**Antihydropic** (*an-te-hi-drop'-ik*). See *Anthydropic*.

**Antihydropin** (*an-te-hi'-dro-pin*) [ἀντί, against; ἵδωσις, water]. A crystalline principle obtainable from the common cockroach, *Blatta* (*Periplaneta*) *orientalis*, said to be a good diuretic. Formerly used in dropsy.

**Anti-icteric** (*an-te-ik-ter'-ik*) [ἀντί, against; ἰκτερός, jaundice]. Serviceable against jaundice.

**Antikamnia** (*an-te-kam'-ne-ah*) [ἀντί, against; κάμνειν, to suffer pain]. A proprietary remedy said to be composed of sodium bicarbonate, antifebrin, and calcin. Used as a nervin in doses of gr. v-x. Unof.

**Antikol** (*an'-tik-ol*). A proprietary antipyretic mixture said to contain acetanilid, soda bicarbonate and tartaric acid.

**Antilemic, or Antilemic** (*an-te-le'-mik*), or **Antiloimic** (*an-te-loi'-mik*) [ἀντί, against; λοιμός, the plague]. Efficacious against the plague or other pestilence.

**Antilepsis** (*an-til-ep'-sis*) [ἀντίληψις, a receiving in return]. The treatment of disease by the application of the remedy to a healthy part; revulsive treatment.

**Antileptic** (*an-til-ep'-tik*) [ἀντίληψις, a receiving in return]. Revulsive.

**Antilithic** (*an-te-lith'-ik*) [ἀντί, against; λίθος, a stone]. 1. Efficacious against calculus. 2. An agent preventing the deposit of urinary calculi or sediment.

**Antilobium** (*an-te-lo'-be-um*) [ἀντί, against; λοβός, the lobe of the ear]. The tragus or part of the ear opposite the lobe.

**Antilemic**. See *Antilemic*.

**Antiluetic** (*an-te-lu-et'-ik*) [ἀντί, against; lues, the plague; syphilis]. Efficacious against syphilis.

**Antilyssic** (*an-te-lis'-ik*) [ἀντί, against; λύσσα, rabies]. 1. Tending to cure rabies. 2. A remedy for rabies.

**Antilytic** (*an-te-lit'-ik*) [ἀντί, against; λύειν, to loosen]. Antiparalytic.

**Antimaniacal** (*an-te-ma-ni'-ak-al*) [ἀντί, against; μανία, madness]. Overcoming insanity.

**Antimephitic** (*an-te-mef-it'-ik*) [ἀντί, against; mephitis, a pestilential exhalation]. Efficacious against foul exhalations or their effects.

**Antimere** (*an'-te-mèr*) [ἀντί, against; μέρος, a part]. Any one of the segments of the body that are bounded by planes typically at right angles to the long axis of the body.

**Antimiasmatic** (*an-te-mi-as-mat'-ik*) [ἀντί, against; μίασμα, exhalation]. Preventive of malaria.

**Antimicrophyte** (*an-te-mik'-ro-fit*) [ἀντί, against; μικρός, small; φυτόν, plant]. A germicide.

**Antimonial** (*an-te-mo'-ne-al*) [*antimonium*, antimony]. Containing antimony.

**Antimonic** (*an-te-mon'-ik*) [*antimonium*, antimony]. A term applied to those compounds of antimony that correspond to its higher oxid.

**Antimonii** (*an-te-mo'-ne-i*). Genitive of *Antimonium, q.v.*

**Antimonious** (*an-te-mo'-ne-us*) [*antimonium*, antimony]. A term noting those compounds of antimony that correspond to its lower oxid.

**Antimonium** (*an-te-mo'-ne-um*) [L., *gen.*, *Antimonii*]. Sb = 122; quantivalence 1, III, v. A non-metal, having a metallic luster. Only the combinations are used in medicine. Antimonial salts are cardiac depressants and promote rapid excretion of waste products of the body; in large doses they produce vomiting and purging, with symptoms similar to those of cholera. They are valuable in inflammatory ailments of the respiratory organs, puerperal peritonitis and muscular rheumatism. **A. chlorid.**,  $SbCl_3$ , the "but-ter" of antimony; a strong caustic. Unof. **A. Comp., Pil.**, Plummer's pills, contain calomel and antimony sulphuratum, aa gr. ss. **A. oxid.**,  $Sb_2O_3$ ; soluble in hydrochloric and tartaric acids. Dose gr. j-ij. **A. oxychlorid.**, the "powder of algaroth"; now little used. Unof. **A. et Potass. tartras**, (*A. tartaratum*) (B. P.),  $2KSBOC_4H_4O_6 \cdot H_2O$ , tartrate of antimony and potassium, "tartar emetic."<sup>1</sup> Dose gr.  $\frac{1}{8}$ - $\frac{1}{4}$ . **A. pulvis**, powder of antimony, James' powder, consists of antimonious oxid 33, and calcium phosphate, 67 parts. A prompt diaphoretic. Dose gr. iij-vij. In larger doses, emetic and cathartic.

**A. sulphid**,  $\text{Sb}_2\text{S}_3$ , black sulphid of antimony. Dose gr.  $\frac{1}{4}$ –j. **A. sulphuratum**, the sulphid with a small but indefinite amount of the oxid. Dose gr. j–v. **A. sulph. purificatum**. Dose gr.  $\frac{1}{4}$ –j. **Syr. Scillæ Comp.**, Cox's hive mixture, hive syrup. Each  $\overline{5}$ j contains gr.  $\frac{3}{4}$  of tartar emetic. Dose  $\overline{\text{m}}\text{v}$ – $\overline{5}$ j cautiously. **A. tartarato**, Ung. (B. P.), one part of tartar emetic to five of simple ointment. **A. vinum**, wine of antimony, boiling water 60, tartar emetic 4, stronger white wine 1000 parts. A good expectorant. Dose  $\overline{\text{m}}\text{v}$ –xv.

**Antimycotic** (*an-te-mi-kol'-ik*) [*ἀντι*, against; *μύκης*, a fungus]. Destructive of fungal microorganisms.

**Antinarcotic** (*an-te-nar-kol'-ik*) [*ἀντι*, against; *νάρκωσις*, a benumbing]. Preventing narcosis.

**Antinephritic** (*an-te-nef-rit'-ik*) [*ἀντι*, against; *νεφρός*, the kidney; *ιτις*, inflammation]. Preventing or curative of renal disease.

**Antinervin** (*an-te-ner'-vin*) [*ἀντι*, against; *nervus*, a tendon or nerve]. Salbromalid, a mixture of brom-acetanilid and salicylanilid; used for the relief of neuralgia. Unof.

**Antineuralgic** (*an-te-nu-rall'-jik*) [*ἀντι*, against; *νέυρον*, a nerve; *ἄλγος*, pain]. Overcoming neuralgia.

**Antineurotic** (*an-te-nu-rol'-ik*) [*ἀντι*, against; *νέυρον*, a nerve]. A remedy of service in nervous diseases.

**Antiniad** (*an-tin'-e-ad*) [*ἀντι*, against; *ινίον*, the nape of the neck]. Toward the antinion; glabellad.

**Antinial** (*an-tin'-e-al*) [*ἀντι*, against; *ινίον*, the nape of the neck]. Pertaining to the antinion.

**Antinien** (*an-tin'-e-en*) [*ἀντι*, against; *ινίον*, the nape of the neck]. Belonging to the antinion in itself.

**Antinion** (*an-tin'-e-on*) [*ἀντι*, against; *ινίον*, the nape of the neck]. See *Craniometrical Points*.

**Antiodont** (*an'-te-o-dont*) [*ἀντι*, opposite to; *ὀδούς*, tooth]. A form of dentition in which the crown ridges of the molar teeth are opposite, instead of alternate as in amebodont dentition.

**Antiodontalgic** (*an-te-o-don-tall'-jik*) [*ἀντι*, against; *ὀδούς*, tooth; *ἄλγος*, pain]. Curative of toothache.

**Antiorgastic** (*an-te-or-gas'-tik*) [*ἀντι*, against; *ὀργασμός*, swelling, excitement]. Anaphrodisiac.

**Antioelmous** (*an-te-o-pel'-mus*) [*ἀντιος*, set against; *ἔλμα*, the sole]. In biology, characterized by having the *flexor perforans* supply the third toe only and the *flexor hallucis* the first, second and fourth toes. Cf. *Sympelmous*, *Heteropelmous*.

**Antiparasitic** (*an-te-par-as-il'-ik*) [*ἀντι*, against; *παράσιτος*, a parasite]. 1. Destroying parasites. 2. An agent destroying or preventing increase of parasites. Insecticide.

**Antiparastatitis** (*an-te-par-as-lat-i'-tis*) [*ἀντι*, over against; *παραστάτης*, a testicle]. Inflammation of Cowper's glands.

**Antipathetic** (*an-te-path-el'-ik*) [*ἀντι*, against; *πάθος*, feeling, i. e., antipathy or constitutional aversion]. In biology, applied to plants not easily grafted.

**Antipathic** (*an-te-path'-ik*) [*ἀντι*, against; *πάθος*, disease]. A synonym of *allopathic*, both terms alike being rejected by the advocates of rational medicine.

**Antipathy** (*an-tip'-a-the*) [*ἀντι*, against; *πάθος*, affection]. Aversion; an opposing property or quality.

**Antipeduncular** (*an-te-pe-dung'-ku-lar*) [*ἀντι*, against; *pedunculus*, a little foot]. In biology, placed opposite a peduncle.

**Anti-peptone** (*an-te-pep'-ton*) [*ἀντι*, against; *πέπτιον*, to cook, digest]. A variety of peptone formed in the pancreatic digestion, and incapable of further peptonic change.

**Antiperiodic** (*an-te-pe-re-od'-ik*) [*ἀντι*, against; *περίοδος*, a paroxysm]. 1. Efficacious against periodic attacks

of disease. 2. A remedy against periodic disease, especially intermittent fever. Quinin is the best known. **A. Tincture**. See *Warburg's Tincture*.

**Antiperistalsis** (*an-te-per-is-tal'-sis*) [*ἀντι*, against; *περι*, around; *στάσις*, compression]. Reversed peristalsis; inverted or upward peristaltic action.

**Antiperistaltic** (*an-te-per-is-tal'-tik*) [*ἀντι*, against; *περι*, around; *στάσις*, compression]. Relating to antiperistalsis.

**Antipestilential** (*an-te-pes-til-en'-shal*) [*ἀντι*, against; *pestilentia*, the plague]. Counteracting the influence of the plague.

**Antipetalous** (*an-te-pet'-al-us*) [*ἀντι*, against; *πέταλον*, a leaf]. In biology, inserted opposite to, instead of alternate with, the petals.

**Antipharmic** (*an-te-fur'-mik*). See *Alexipharmac*.

**Antiphlogistic** (*an-te-flo-jis'-tik*) [*ἀντι*, against; *φλόγωσις*, inflammatory heat]. 1. Counteracting or directed against fever. 2. An agent subduing or reducing inflammation or fever. **A. Treatment**, consists in bloodletting, the application of cold, administration of antipyretics, etc.

**Antiphysic** (*an-te-fiz'-ik*) [*ἀντι*, against; *φῖσα*, wind]. Carminative; overcoming flatulence.

**Antiplastic** (*an-te-plas'-tik*) [*ἀντι*, against; *πλάσσειν*, to form]. 1. Unfavorable to granulation or the healing process. 2. An agent impoverishing the blood.

**Antipleuritic** (*an-te-plu-rit'-ik*) [*ἀντι*, against; *πλευριτις*, pleurisy]. Overcoming pleurisy.

**Antipneumonic** (*an-te-nu-mon'-ik*) [*ἀντι*, against; *πνευμονία*, pneumonia]. Of value in treating pneumonia.

**Antipneumotoxin** (*an-te-nu-mo-toks'-in*). See *Pneumotoxin*.

**Antipodagric** (*an-te-po-dag'-rik*) [*ἀντι*, against; *ποδάγρα*, gout in the feet]. Efficacious against gout.

**Antipodal Cells** (*an-tip'-o-dal*) [*ἀντι*, opposite; *πῶς*, foot]. A term applied to a group of four cells formed in the lower end of the embryo-sac opposite to the cells constituting the egg-apparatus.

**Antipoison** (*an'-te-poi-zon*) [*ἀντι*, against; ME., *poison*, a potion]. A counter poison.

**Antipraxis** (*an-te-praks'-e-ah*) [*ἀντι*, against; *πράσσειν*, to do]. Antagonism of functions or of symptoms.

**Antiprstate** (*an-te-pros'-tat*). See *Anteprostate*.

**Antipruritic** (*an-te-pru-rit'-ik*) [*ἀντι*, against; *pruritus*, itching]. 1. Relieving the sensation of itching. 2. A drug that relieves the sensation of itching.

**Antipsoric** (*an-tip'-so'-rik*) [*ἀντι*, against; *ψώρα*, the itch]. Effective against the itch.

**Antiputrefactive** (*an-te-pu-tre-fak'-tiv*). See *Antiseptic*.

**Antipytic** (*an-te-pi'-ik*) [*ἀντι*, against; *πῦον*, pus]. Checking or restraining suppuration.

**Antipyresis** (*an-te-pi-re'-sis*) [*ἀντι*, against; *πυρίσσειν*, to be feverish]. The employment of antipyretics in fever.

**Antipyretic** (*an-te-pi-ret'-ik*) [*ἀντι*, against; *πυρετός*, fever]. 1. Cooling; lowering the temperature. 2. An agent reducing the temperature of fever; any antifebrile medicine, or febrifuge. Most such also reduce the normal bodily temperature slightly. They act either by preventing oxidation processes, or encouraging the radiation of heat.

**Antipyrin** (*an-te-pi'-rin*) [*ἀντι*, against; *πυρετός*, fever],  $\text{C}_{10}\text{H}_{11}\text{N}_3\text{O}_2$ . Phenazon. Dimethyl-oxy-chinidin. An alkaloidal product of the destructive distillation of coal-tar. It may be produced by heating acetoacetic ester with methyl-phenyl hydrazin. It is a grayish or reddish-white crystalline powder, slightly bitter, soluble in water, alcohol, and chloroform, and crystallizes from ether in shining leaflets, melting at  $113^\circ$ . Adult dose gr. v–xv every hour for two or three hours. It

- reduces the temperature three to five degrees in fevers, causes sweating, at times vomiting, but no serious result. Antipyrin is incompatible with nitrous compounds. It is a powerful antipyretic, a local anesthetic, and a general analgesic. It is efficient in hyperpyrexia from any cause, and in rheumatism. **Injectio antipyrin hypodermica**, gr. j in m.j. Dose m.viii-xxx.
- Antipyrotic** (*an-te-pi-rot'-ik*) [*ἀντι*, against; *πύρωσις*, a burning]. 1. Efficacious against burns. 2. An agent curative of burns.
- Antirabic** (*an-te-rab'-ik*) [*ἀντι*, against; *rabies*, madness]. Effective against rabies; antagonistic to rabies.
- Antirhachitic** (*an-te-rak-il'-ik*) [*ἀντι*, against; *ῥάχις*, the spine]. Serviceable against rickets.
- Antirheumatic** (*an-te-ru-mat'-ik*) [*ἀντι*, against; *ρευματικός*, of or pertaining to a flux]. Relieving or curing rheumatism.
- Antirrhinum** (*an-te-ri'-num*) [L.]. A genus of scrophulariaceous plants. *A. linaria*. Called also *Linaria vulgaris*, Toad-flax, Ramsted, Butter-and-Eggs; a herbaceous plant of Europe and North America; diuretic, cathartic, and irritant; used as a poultice and fomentation. Unof.
- Antiscolic** (*an-te-skol'-ik*) [*ἀντι*, against; *σκώληξ*, a worm]. Vermifuge. See *Anthelmintic*.
- Antiscorbutic** (*an-te-skor-but'-tik*) [*ἀντι*, against; *scorbutus*, scurvy]. 1. Effective against scurvy. 2. A remedy for or preventive of scurvy; such are mainly vegetable acids.
- Antisecosis** (*an-te-sek-o'-sis*) [*ἀντι*, against; *σηκῶν*, to weigh, balance]. 1. A restoration to health, strength, etc. 2. Regulation of the food.
- Antisepalous** (*an-te-sep'-al-us*) [*ἀντι*, against; Fr., *sépale*]. In biology, placed opposite the sepals.
- Antiseptin** (*an-te-sep'-sin*) [*ἀντι*, against; *σήψις*, putrefaction],  $C_6H_4BrNHCl_2H_3O$ . Asepsin; bromated antifebrin; soluble in alcohol and ether. Recommended for use as an antipyretic and analgesic but is dangerous as a febrifuge. It has antiseptic properties. Dose gr. j, four times daily.
- Antisepsis** (*an-te-sep'-sis*) [*ἀντι*, against; *σήψις*, putrefaction]. Exclusion of the germs that cause putrefaction; the totality of measures taken to prevent septic poisoning.
- Antiseptic** (*an-te-sep'-tic*) [*ἀντι*, against; *σήψις*, putrefaction]. 1. Having power to prevent or destroy putrefaction, or, what is the same thing, the bacteria upon which putrefaction depends. 2. A remedy or agent that prevents a septic process. The principal in use are corrosive sublimate, creolin, carbolic acid, iodoform, thymol, salicylic acid, boric acid, etc. **A. Gauze**, open cotton cloth charged with carbolic acid, resin, and paraffin. **A. Ligature**, catgut or other material rendered aseptic by soaking in antiseptic solutions. The antiseptic treatment of wounds looks to thorough asepsis and antisepsis as regards the wound, the instruments, the operator's hands, the dressings, etc. See, also, *Listerian Method*.
- Antisepticism** (*an-te-sep'-tis-izm*) [*ἀντι*, against; *σήψις*, putrefaction]. The theory or systematic employment of antiseptic methods.
- Antisepticize** (*an-te-sep'-tis-iz*) [*ἀντι*, against; *σήψις*, putrefaction]. To render antiseptic; to treat with antiseptics.
- Antiseptin** (*an-te-sep'-tin*) [*ἀντι*, against; *σήψις*, putrefaction]. Zinc boro-thynate iodid. Consists of 85 parts zinc sulphate, 2.5 parts each of zinc iodid and thymol, and ten parts boric acid. An antiseptic. Unof.
- Antiseption** (*an-te-sep'-shun*) [*ἀντι*, against; *σήψις*, putrefaction]. Same as *Antisepsis*.
- Antiseptol** (*an-te-sep'-tol*) [*ἀντι*, against; *σήψις*, putrefaction]. Cinchonin iodosulphate. An odorless and fairly effective substitute for iodoform.
- Antisialagogue** (*an-te-si-al'-a-gog*) [*ἀντι*, against; *σialor*, spittle; *ἄγωγος*, leading]. 1. Acting against ptyalism. 2. A remedy or a medicine that is effective against salivation.
- Antisialic** (*an-te-si-al'-ik*) [*ἀντι*, against; *σialor*, saliva]. 1. Checking the flow of saliva. 2. An agent that checks the secretion of saliva.
- Antispadix** (*an-te-spa'-diks*) [*ἀντι*, against; *σπάδιξ*, a palm branch]. In biology, a group of four tentacles on the right side of the male Nautilus, the *spadix*, an organ analogous to the hectocolylised arm, being on the left side.
- Antispasis** (*an tis'-pas-is*) [*ἀντι*, against; *σπάειν*, to draw]. Revulsion; revulsive treatment.
- Antispasmodic** (*an-te-spas-mod'-ik*) [*ἀντι*, against; *σπασμός*, a spasm]. 1. Tending to relieve spasm. 2. An agent allaying or relieving convulsions or spasmodic pains, as the narcotics, the nitrites, etc.
- Antispastic** (*an-te-spas'-tik*) [*ἀντι*, against; *σπαστικός*, drawing]. 1. Revulsive; counter-irritant. 2. Antispasmodic. 3. A revulsive agent. 4. That which counteracts spasm. An antispasmodic.
- Antisplenic** (*an-te-splen-et' ik*) [*ἀντι*, against; *splen*, the spleen]. Remedial in diseases of the spleen.
- Antistasis** (*an-tis'-tas-is*) [*ἀντι*, against; *στάσις*, a standing]. Opposition; opposing effect.
- Antistrumatic** (*an-te-stru-mat'-ik*). Same as *Antistrumous*.
- Antistrumous** (*an-te-stru'-mus*) [*ἀντι*, against; *struma*, a scrofulous tumor]. Effective against struma or scrofula.
- Antisudorific** (*an-te-su-dor-if'-ik*) [*ἀντι*, against; *sudor*, sweat; *facere*, to make]. Checking the excretion of sweat.
- Antisyphilitic** (*an-te-sif-il-it'-ik*) [*ἀντι*, against; *Syphilis*, a Latin proper name]. 1. Effective against syphilis. 2. A remedy directed against, or used for the relief of, syphilis. Usually an alternative.
- Antithenar** (*an-tith'-en-ar*) [*ἀντι*, against; *θέναρ*, the hollow of the hand or foot]. 1. Opposite to the thenar. 2. A muscle that extends the thumb, or opposes it to the hand; an antithenar muscle. **A. Eminence**, the border of the palm of the hand from the base of the little finger to the wrist. **A. Muscles**, of the toe and of the thumb: the abductor pollicis pedis, and the flexor brevis pollicis manus; also, the first dorsal interosseous muscle. See *Muscles*, Table of.
- Antithermic** (*an-te-ther'-mik*) [*ἀντι*, against; *θερμη*, heat]. Cooling; antipyretic.
- Antithermin** (*an-te-ther'-min*) [*ἀντι*, against; *θερμη*, heat],  $C_{11}H_{11}O_2N_2$ . Phenylhydrazin-levulinic acid, a coal-tar derivative used in four to eight grain doses as an antipyretic, analgesic, and antiseptic. It is apt to give rise to gastralgia. Unof.
- Antitoxic** (*an-te-toks'-ik*) [*ἀντι*, against; *τοξικόν*, poison]. Antidotal; counteracting poisons.
- Antitoxin** (*an-te-toks'-in*) [*ἀντι*, against; *toxin*, a toxic poison; *τοξικόν*, poison]. A substance formed in the body of animals, either naturally or in consequence of inoculation with some pathogenic bacteria, that neutralizes the toxic products of these organisms.
- Antitragic** (*an-tit-raj'-ik*) [*ἀντι*, opposite to; *τράγος*, the tragus]. Pertaining to the antitragus.
- Antitragicus** (*an-tit-raj'-ik-us*) [*ἀντι*, opposite to; *τράγος*, the tragus]. Pertaining to the antitragus. **A. Muscle**, a mere rudiment in man; it arises from the antitragus, and extends to the cauda of the helix.
- Antitragus** (*an-tit'-rag-us*) [*ἀντι*, opposite to; *τράγος*, the tragus]. An eminence of the external ear opposite the tragus.

**Antitrochanter** (*an-te-tro kan' t-r*) [*ἀντί*, opposite to; *τροχάντηρ*, the head of the hip bone]. An articulating surface on the ilium for the great trochanter.

**Antitrope** (*an'-te-trop'*) [*ἀντί*, against; *τροπεύω*, to turn]. Any organ set over against another to form a symmetric pair. Thus, the right eye is an antitrope to the left.

**Antituberculous** (*an-te-tu-b' r-ku-lot'-ik*) [*ἀντί*, against; *tuberculum*, a tubercle]. Good against tuberculosis.

**Antitype** (*an'-te-tip'*) [*ἀντί*, against, corresponding to; *τύπος*, a type]. In biology, same as *Antitrope*.

**Antivaccinationist** (*an-te-vak-sin-a'-shun-ist*) [*ἀντί*, against; *vaccinus*, of a cow.]. One who opposes vaccination.

**Antivaccinist** (*an-te-vak'-sin-ist*). Same as *Antivaccinationist*.

**Antivenene** (*an-te-ven'-en*) [*ἀντί*, against; *venenum*, poison]. A term given to the blood-serum of animals rendered immune against snake-poison, on account of its antidotal properties.

**Antiveneraeal** (*an-te-ven-e'-re-al*) [*ἀντί*, against; *venereus*, pertaining to Venus, or to sexual intercourse]. Antisymphilitic; anaphrodisiac.

**Antivivisectionist** (*an-te-viv-is-ek'-shun-ist*) [*ἀντί*, against; *vivus*, living; *sectio*, a cutting.]. One who opposes the practice of vivisection.

**Antizootic** (*an-te-zo-o'-tik*) [*ἀντί*, against; *ζῷον*, animal]. A substance poisonous or injurious to animals.

**Antizymic**, **Antizymotic** (*an-te-zī'-mik*, *an-te-zī-mot'-ik*) [*ἀντί*, against; *ζύμωσις*, fermentation]. 1. Preventing or checking fermentation. 2. An agent preventing the process of fermentation; an antiferment.

**Anthia** (*an'-le-ah*) [*ἀνά*, up; *τίσσειν*, to lift]. A syringe or pump. In biology, the flat spiral, suctorial tube or proboscis of lepidopterous insects. **A. lactea**, a pump for drawing milk from the breast. **A. mammaria**, same as *A. lactea*.

**Antodontalgic** (*an-to-don-tal'-jik*). See *Antiodontalgic*.

**Antophthalmic** (*ant-off-thal'-mik*) [*ἀντί*, against; *ὀφθαλμία*, ophthalmia]. Preventive or curative of ophthalmia.

**Antorgastic** (*ant-or-gas'-tik*). See *Antiorgastic*.

**Antozenic** (*ant-o-ze'-nik*) [*ἀντί*, against; *ὄζαινα*, a fetid nasal polypus]. Curative of ozena.

**Antozone** (*ant-o-zōn'*) [*ἀντί*, against; *ὀζειν*, to smell]. An imaginary allotropic modification of oxygen, now known to be only hydrogen peroxid.

**Antozostomatic** (*ant-o-zos-to-mat'-ik*) [*ἀντί*, against; *ὀστροστος*, having a foul breath]. Corrective of a foul breath.

**Antra** (*an'-trah*). Plural of *Antrum*, *q. v.* **A. Gastralia**, four broad perradial niches or pouches in the gastric cavity of scyphomedusæ. **A. Rhopalaria**, niches formed on the umbrella margin of most Discomedusæ for the reception of sense-clubs or rhopalhia.

**Antracèle** (*an'-tras-él*) [*antrum*, a cavity; *κίβη*, a tumor]. Dropsy of the antrum; an accumulation of fluid in the maxillary sinus.

**Antral** (*an'-tral*) [*antrum*, a cave]. Relating to an antrum.

**Antrectomy** (*an-trek'-to-me*) [*ἀντρον*, antrum; *ἐκτομή*, excision]. Surgical removal of the walls of the antrum.

**Antritis** (*an-tri'-tis*) [*ἀντρον*, a cave; *itis*, inflammation]. Inflammation of any of the cavities of the body, especially the *A. highmorianum*.

**Antrophore** (*an'-tro-for*) [*ἀντρον*, a cavity; *φέρω*, to bear]. A soluble, medicated bougie.

**Antorse** (*an-trōrs'*) [*ante*, before; *versus*, turned]. In biology, directed upward or forward.

**Antro-tympanic** (*an-tro-tim-pan'-ik*) [*ἀντρον*, a cave; *τύμπανον*, a drum]. Relating to the cavity of the tympanum as well as to the tympanic antrum.

**Antrum** (*an'-trum*) [*Λ.*]. A physiological cavity or hollow pice, especially in a bone. **A. ethmoidale**, the ethmoidal sinuses. **A. highmorianum**, Antrum of Highmore, a cavity in the superior maxillary bone. **A. highmori testis**. See *Mediastinum testis*. **A. of Malacarne**. See *Turinus*, *Space of*. **A. Mastoidal**, the hollow space beneath the roof of the mastoid process. **A. Maxillary**. See *A. highmorianum*. **A. pyloricum willisii**, the cavity of the pylorus.

**Antwerp Blue**. Same as *Mineral Blue*. **A. Brown**. See *Conspectus of Pigments*, under *Pigment*.

**Antyllus-Kuhnt's Operation**. See *Operations*, *Table of*.

**Antyllus's Operation**. See *Operations*, *Table of*.

**Anuresis** (*an-u-re'-sis*) [*ἀν* priv.; *ὀύρον*, urine]. Anuria.

**Anuretic** (*an-u-ret'-ik*) [*ἀν* priv.; *ὀύρον*, urine]. Pertaining to or affected with anuria.

**Anuria** (*an-u'-re-ah*) [*ἀν* priv.; *urina*, urine]. Absence, deficiency, or retention of the urine.

**Anuric** (*an-u'-rik*) [*ἀν* priv.; *urina*, urine]. Pertaining to anuria.

**Anurous** (*an-u'-rus*) [*ἀν* priv.; *οὐρά*, a tail]. In biology, without a tail.

**Anus** (*a'-nus*) [*ἄνυς*, the fundament]. The extremity of the rectum; the lower opening of the alimentary canal. **A., Artificial**, an artificial opening, the natural for any reason being closed. **A., Fissure of**, rupture of the skin at the side, due to passage of hardened feces. **A., Fistula of**, a sinus, or fistulous ulcer opening from the rectum into the connective tissue about the rectum, or discharging externally. **A., Imperforate**, absence of the anus, the natural opening being closed by areolar tissue or a membranous septum. **A., Prolapse of**, protrusion of the rectum or its mucous membrane. **A., Pruritus of**, persistent itching of the anal orifice.

**Anvil** (*an'-vil*). See *Incus*.

**Anxietas** (*ang-zī'-et-as*). See *Anxiety*.

**Anxiety** (*ang-zī'-et-e*) [*anxius*, anxious]. Restlessness, agitation, and general malaise, or distress, often attended with precordial pain, and a noticeable appearance of apprehension or worry visible in the features.

**Anydremia** or **Anydræmia** (*an-id-re'-me-ah*) [*ἀν* priv.; *ὕδωρ*, water; *αἷμα*, blood]. A deficiency of water in the blood.

**Anypnia** (*an-ip'-ne-ah*) [*ἀν* priv.; *ὑπνος*, sleep]. Sleeplessness.

**A. O. C.** Anodic opening contraction.

**Aochlesia** (*ah-ok-le'-ze-ah*) [*ἀ* priv.; *ὀχλήσις*, disturbance]. Rest; tranquillity; catalepsy.

**Aorta** (*a-ort'-ah*) [*ἀορτή*, aorta]. The great arterial vessel arising from the left ventricle and ending with its bifurcation into the two common iliacs at the fourth lumbar vertebra. *The arch*, that extending from the heart to the third dorsal vertebra, is divided into an *ascending*, a *transverse*, and a *descending* part. *The thoracic* portion extends to the diaphragm; the *abdominal*, to the bifurcation. The diseases of the aorta are *acute aortitis*, due to traumatism, thrombosis, etc.; and the *chronic form*, or *atheroma of the aorta*; *fatty degeneration*; *stenosis*; *aneurysm*. See *Artery*.

**Aortal** (*a-ort'-al*) [*ἀορτή*, the aorta]. Relating to the aorta.

**Aortarctia** (*a-ort-ark'-she-ah*) [*ἀορτή*, aorta; *arctare*, to constrict]. A constriction or stenosis of the aorta.

**Aortectasia** (*a-ort-ek-ta'-ze-ah*) [*ἀορτή*, aorta; *ἐκ*, out; *τάσσω*, a stretching]. Aortic dilatation.

**Aorteurysma** (*a-ort-u-ri'-mah*) [*ἀορτή*, aorta; *εἰρυσμα*, a widening; *pl.*, *Aorteurysmata*]. Aortic aneurysm or dilatation.

**Aortic** (*a-ort'-ik*) [*ἀορτή*, the aorta]. Pertaining to the aorta. **A. Arch**. See *Aorta*. **A. Foramen**. See *A.*

*Opening of Diaphragm.* **A. Murmur.** See *Murmur*.

**A. Opening of Diaphragm**, the lowest and most posterior of the three large apertures connected with this muscle. It is situated in the middle line, immediately in front of the bodies of the vertebra, and is behind the diaphragm, not in it. **A. Opening of Heart**, a small circular aperture in front and to the right side of the auriculo-ventricular opening, from which it is separated by one of the segments of the mitral valve. **A. Plexus**, the plexus of sympathetic nerves, situated on the front and sides of the aorta, between the origins of the superior and inferior mesenteric arteries. **A. Sinus**, a deep depression between each valve and the cylinder of the aorta.

**Aortitis** (*a-ort-i'tis*) [*ἀορτίτις*, the aorta; *itis*, inflammation]. Inflammation of the aorta.

**Aortomalacia**, or **Aortomalaxia** (*a-ort-o-mal-a'-se-ah*, or *-ak'-e-ah*) [*ἀορτίτις*, aorta; *μαλακία*, softening]. Softening of the aorta.

**Aortostenosis** (*a-ort-o-sten-o'-sis*) [*ἀορτίτις*, aorta; *στενός*, narrow]. Stenosis or narrowing of the aorta.

**Aosmic** (*a-oz'-mik*) [*ἀ priv.*; *ὀσμή*, smell]. Having no odor.

**Apagma** (*ap-ag'-mah*) [*ἀπό*, from; *ἀγνῶμαι*, to break; *pl.*, *Apagmata*]. 1. Separation, as of a fractured bone. 2. The part separated.

**Apandria** (*ap-an'-dre-ah*) [*ἀπό*, from; *ἀνὴρ*, a man]. Morbid dislike of the male sex.

**Apanthropia** (*ap-an-thro'-pe-ah*). See *Apanthropy*.

**Apanthropy** (*ap-an'-thro-pe*) [*ἀπό*, from; *ἀνθρωπος*, man]. Aversion to society; morbid desire for solitude.

**Aparthrosis** (*ap-ar-thro'-sis*) [*ἀπό*, from; *ἄρθρον*, a joint]. 1. Dislocation; luxation of a joint. 2. In anatomy, diarthrosis.

**Apastia** (*ap-as'-te-ah*) [*ἀπαστία*, fasting]. Abstinence from food, as a symptom of mental disorder.

**Apathetic** (*ap-ath-et'-ik*) [*ἀ priv.*; *πάθος*, feeling]. Affected with apathy; listless; without emotion.

**Apathy** (*ap'-ath-e*) [*ἀ priv.*; *πάθος*, feeling]. Insensibility; want of passion or feeling.

**Apotropin** (*ap-at'-ro-pin*) [*ἀπό*, from; *ἀτροπος*, unchangeable],  $C_{17}H_{21}NO_2$ . A compound derivable from atropin by the action of nitric acid. It is said to produce peculiar convulsions.

**Ape** (*ap*) [ME., *ape*]. A man-like monkey. **A. fissures**, those fissures of the human brain that are also found in apes. See *Fissure*. **A.-hand**, wasting of the thumb-muscles, as seen in some cases of progressive muscular atrophy.

**Apella** (*ap-el'-lah*) [*ἀ priv.*; *πέλλα*, skin]. A circumcised person; one with a short prepuce.

**Apellous** (*ap-el'-lus*) [*ἀ priv.*; *πέλλα*, skin]. Skinless; having no skin.

**Apepsia** (*ah-pep'-se-ah*) [*ἀ priv.*; *πέπειν*, to digest]. Cessation or absence of the digestive function. **A., Hysteria**, an hysterical condition with deficient nerve power, and impaired function of the stomach, and very possibly of the abdominal glands. Also called *Hysteria anorexia*. **A. nervosa**. See *Anorexia nervosa*.

**Apeptic** (*ah-pep'-tik*) [*ἀ priv.*; *πέπειν*, to digest]. Affected with apepsia.

**Aperient** (*ap-el'-re-ent*) [*aperire*, to open]. 1. Laxative; deobstruent; mildly purgative. 2. A mild purgative; a laxative, or aperitive.

**Aperinous** (*ah-per'-in-us*) [*ἀ priv.*; *πῆριν*, the scrotum]. 1. Having no scrotum. 2. Castrated.

**Aperispermic** (*ah-per-is-per'-mik*) [*ἀ priv.*; *περί*, around; *σπέρμα*, seed]. See *Exalbuminous*.

**Aperistalsis** (*ah-per-is-tal'-sis*) [*ἀ*, without; *περί*, around; *στάσις*, constriction]. Absence or cessation

of the movements of the intestine, due to lack of stimulus to Auerbach's plexus.

**Aperitive** (*ap-el'-it-iv*) [*aperire*, to open]. Aperient.

**Apertor** (*ap-el'-tor*) [*l.*, an opener or beginner]. In anatomy, anything that opens. **A. Oculi**, the levator palpebræ muscle.

**Aperture** (*ap'-er-chür*) [*apertura*, an opening]. An opening. **A., Angular**, in the microscope, the angle formed between a luminous point placed in focus and the most divergent rays that are capable of passing through the entire system of an objective. **A. antri**, the aperture of the umbrella cavity in medusæ. **A., Numerical**, the capacity of an objective for admitting rays from the object and transmitting them to the image. A common measure is obtained as proposed by Abbé, by taking the product of the half angle into the refractive index of the medium employed. It is usually expressed  $n. a. = n \sin u.$ ,  $n$  the index of refraction and  $u$  the semi-angle of the aperture. **A. of Objective**, the capacity for receiving and transmitting rays.

**Apetalous** (*ah-pet'-al-us*) [*ἀ priv.*; *πέταλον*, a leaf]. In biology, without corolla or petals.

**Apex** (*ap'-pex*) [*apex*, the extreme end of a thing]. The summit or top of anything; the point or extremity of a cone. **A. Beat**, the impulse of the heart felt in the fifth intercostal space about  $3\frac{1}{2}$  inches from the middle of the sternum. **A. Murmur**, a murmur heard over the apex of the heart. **Apices of the Lungs**, the upper extremities of the lungs behind the border of the first rib.

**Aphacia** (*ah-fa'-se-ah*). Same as *Aphakia*.

**Aphacic** (*ah-fa'-sik*) [*ἀ priv.*; *οακός*, the crystalline lens]. Relating to or affected with aphakia.

**Aphæresis** (*af-el'-es-is*). See *Apheresis*.

**Aphagia** (*ah-fa'-je-ah*) [*ἀ priv.*; *φαγεῖν*, to eat]. Inability to eat or to swallow.

**Aphakia** (*ah-fa'-ke-ah*) [*ἀ priv.*; *οακός*, a lentil, the crystalline lens]. The condition of an eye without the lens, whether the result of congenital defect, luxation, traumatism, or cataract operation.

**Aphakic** (*ah-fa'-kik*) [*ἀ priv.*; *οακός*, the lens]. Having no lens, as the eye after the removal of a cataract.

**Aphalangiasis** (*ah-fa-lan-jel'-as-is*) [*ἀ priv.*; *οἰάλαξ*, a line of battle; *phalanx*]. The loss or absence of fingers and toes, as in leprosy. Cf. *Ainhum*.

**Apharyngeal** (*ah-far-in'-je-al*) [*ἀ priv.*; *οάρυγξ*, throat]. In biology, without a pharynx.

**Aphasia** (*ah-fa'-se-ah*) [*ἀ priv.*; *οἰσις*, speech]. Partial or complete loss of the power of expression or of comprehension of the conventional signs of language, from no lesion of the peripheral organs or nerves, but from lesions of the cortical centers concerned. Aphasia may be either motor or sensory. **Motor or Ataxic Aphasia** consists in a loss of speech owing to inability to execute the various movements of the mouth necessary to speech, the muscles being not paralyzed but not coördinated, owing to disease of the cortical center. It is usually associated with *agraphia*, "aphasia of the hand," inability to write, and right-sided hemiplegia. Some aphasics can write, but are unable to articulate words or sentences; this variety is variously named *aphemia*, *alalia*, or *anarthria*, according as the impairment of speech is more or less marked. Charcot supposes the center for articulate language divided into four sub-centers, a visual center for words, an auditory center for words, a motor center of articulate language, and a motor center of written language. Lesions of one or more of these centers produce the characteristic forms of aphasia, all of which have clinical exemplifications. **Sensory Aphasia**, or **Amnesia** is the loss of memory for words, and may

exist alone or in association with the motor aphasia. Amnesia appears clinically in three distinct forms; 1. Simple loss of memory of words. 2. *Word-deafness*, or inability to understand spoken words (there is usually some paraphasia connected with this form). 3. *Word-blindness*, or inability to understand written or printed words. **Paraphasia**, a form of aphasia in which there is inability to connect ideas with the proper words to express the ideas. **Agrammatism**, a phenomenon of aphasia consisting in the inability to form words grammatically, or the suppression of certain words of a phrase. **Ataxaphasia**, inability to arrange words synthetically into sentences. **Bradyphasia**, abnormal slowness of speech, from pathological cause. **Tumultus sermonis**, a stuttering manner of reading, from pathological cause. **A., Conduction**, such as is due not to any central lesion, but to defect in some commissural connection between centers. **A., Gibberish**, aphasia in which the patient can utter many words, but uses them in such a way that they express no meaning.

**Aphasic** (*ah-fa'-ze-ah*) [*á* priv.; *φῶσις*, speech]. One who is aphasic.

**Aphasic** (*ah-fa'-zik*) [*á* priv.; *φῶσις*, speech]. Relating to, or affected with aphasia.

**Aphelexia** (*af-el-eks'-e-ah*). An incorrect form of the word *Aphelexia*, *q. v.*

**Apheliotropism** (*af-el-e-ol'-ro-pizm*) [*ἀπὸ*, from; *ἥλιος*, the sun; *τροπή*, a turn]. In biology, turning away from the sunlight; negative heliotropism.

**Aphelotic** (*af-el-ol'-ik*) [*ἀφελκεῖν*, to draw away]. Absent-minded; lost in reverie.

**Aphelia** (*af-elks'-e-ah*) [*ἀφείκειν*, to draw away]. Absence of mind; inattention to external impressions.

**Aphemia** (*ah-fe'-me-ah*) [*á* priv.; *φῶσις*, voice]. Motor aphasia; inability to articulate words or sentences, from focal and not from peripheral disease of the organs of speech (*Alalia*). This term is variously used; sometimes it is equivalent to *aphasia*; sometimes it means *loss of voice*, from local causes; sometimes hysterical or wilful refraining from speech. See *Aphasia*.

**Aphemic** (*ah-fem'-ik*) [*á* priv.; *φῶσις*, voice]. Relating to or affected with aphemia.

**Aphophobia** (*af-e-fol'-be-ah*) [*ἀφῶφ*, touch; *φόβος*, fear]. Hyperesthetic dread of contact with other persons.

**Apheresis**, or **Aphæresis** (*af-er'-es-is*) [*ἀπὸ*, away; *αἵρεσις*, to take]. Removal; amputation; abstraction, as of blood.

**Apheter** (*af'-et-er*) [*ἀφαιτῆρ*, one who lets go or sends away]. A supposed impulse-carrying, or trigger-material, probably a catastate, which communicates to the inogen the nerve impulse that causes its destruction, and the consequent muscular contraction. In a larger sense, any trigger-material that takes part in any functional process may be called an apheter.

**Aphidein** (*af-id-e'-in*) [*aphis*, a plant louse]. A respiratory pigment obtained from the aphids.

**Aphilanthropy** (*ah-fil-an'-thro-pe*) [*á* priv.; *φιλεῖν*, to love; *ἀνθρώπος*, man]. Absence of social feeling; a frequent sign of approaching melancholia.

**Aphonia** (*ah-fol'-ne-ah*) [*á* priv.; *φωνή*, voice]. 1. Dumbness, due to some peripheral lesion. 2. Hysterical, or paralytic absence of the power of speech. 3. Voicelessness.

**Aphonic** (*ah-fon'-ik*) [*á* priv.; *φωνή*, voice]. Speechless; dumb; voiceless.

**Aphoresis** (*ah-for-e'-sis*) [*á* priv.; *φάρμακ*, bearing (by error for *Aphæresis*)]. 1. Separation or ablation of a part, either by excision or amputation. 2. Lack of the power of enlurance, as of pain.

**Aphoria** (*ah-fol'-re-ah*) [*á* priv.; *φίρεω*, to bear]. Sterility; unfruitfulness.

**Aprhasia** (*ah-fra'-ze-ah*) [*á* priv.; *φραζειν*, to utter]. Absence of the power to utter connected phrases.

**Apbrodisia** (*af-ro-diz'-e-ah*) [*ἀπρῶδια*, venery]. Sexual desire, especially when morbid, or immoderate; sexual congress.

**Apbrodisiac** (*af-ro-diz'-e-ah*) [*ἀπρῶδια*, venery]. 1. Stimulating the sexual appetite; erotic. 2. An agent stimulating the sexual passion.

**Aphtha** (*af'-thah*) [*ἀφθα*, an eruption]. An eruption; an ulcer.

**Aphthæ** (*af'-the*) [*ἀφθα*, an eruption]. Also called *Aphthous stomatitis*. Small white ulcers, spots or vesicles of the mouth, chiefly occurring in children under three years of age, and generally associated with some febrile affection. It must not be confounded with thrush, in which disease the spots are smaller and are due to the pre-ence of the parasitic fungus characteristic of that disease. **A., Bednar's**, two symmetrically placed ulcers seen on the hard palate of certain cachectic infants near the velum, one on either side of the mesial line. The prognosis is exceedingly grave. **A., Cachectic**, aphthæ appearing beneath the tongue, and associated with grave constitutional symptoms; Riga's disease.

**Aphthaphyte** (*af'-thah-fit*). See *Aphthophyte*.

**Aphthenxia** (*af-thengs'-e-ah*) [*á* priv.; *φθέγγειν*, utterance]. A form of aphasia with impaired expression of articulate sounds.

**Aphthoid** (*af'-thoid*) [*ἀφθα*, an eruption]. Like or resembling aphthæ.

**Aphthongia** (*af-thong'-ge-ah*) [*á* priv.; *φθόγγος*, a sound]. A peculiar form of aphasia due to spasm of the muscles supplied by the hypoglossal nerve.

**Aphthophyte** (*af'-tho-fit*) [*ἀφθα*, aphtha; *φυτόν*, plant]. The *Oidium albicans*, or *Saccharomyces albicans*, a yeast-fungus often seen on the mucous membrane of the mouths of infants; regarded by some as the cause of true aphthæ. See *Spuræ*.

**Aphthous** (*af'-thus*) [*ἀφθα*, an eruption]. Pertaining to or affected with aphthæ or thrush.

**Aphyllon** (*ah-fil'-on*) [*á* priv.; *φύλλον*, a leaf]. A genus of orobanchaceous plants. **A. uniflorum**, a plant, the naked broom-rape or cancer-root of North America. It is astringent, and has been employed as a cure for cancer. Unof.

**Aphyllous** (*ah-fil'-us*) [*á* priv.; *φύλλον*, a leaf]. In biology, naturally leafless.

**Apical** (*a'-pik-al*) [*απεξ*, the top]. Pertaining to the apex. **A. Cell**, in biology, the cell at the apex of every branch, leaf or other organ, and from the division of which all succeeding cells are formed.

**Apices** (*a'-pis-es*) [L.]. Plural of *Apex*. Summits.

**Apiculus** (*ap-ik'-u-lus*) [*apic*, a point]. In biology, a short abrupt point formed by the mid-rib of a leaf projecting beyond the blade.

**Apinoid** (*ap'-in-oid*) [*á* priv.; *πίρος*, dirt; *ειδος*, form]. Clean; not foul. **A. Cancer**, schirrhous; so called from its cleanly section.

**Apiol** (*ap'-e-ol*) [*apium*, parsley; *oleum*, oil],  $C_{12}H_{14}O_2$ . A poisonous principle occurring in parsley seeds; it crystallizes in long white needles, with a slight parsley odor; melts at 30° C. (86° F.), and boils at 294° C. (572° F.). It is used in dysmenorrhea and in genito spinal atony. It acts upon the reflex and vasomotor centers. It is also called *parsley-camphor*. Dose mjjj-x. In doses of mxxx it is narcotic. Unof.

**Apiolin** (*ap'-e-o-lin*) [*apium*, parsley; *oleum*, oil]. A pseudo-apic alcohol, the active principle of *Apium petroelinum*, and a reliable emmenagogue. Dose m iij in capsule, night and morning.

**Apios** (*ap'-e-os*) [*ἄπιος*, a pear]. A genus of plants. **A. tuberosa**, a twining papilionaceous plant of North America, bearing tubers which when cooked are edible. It is called *ground-nut*, *wild-bean*, *Indian potato*, etc. Said to be alternative. Unof.

**Apis** (*ap'-pis*) [*ἄπῑς*, a bee]. A genus of hymenopterous insects. **A. mellifica**, the honey-bee; in homeopathy the poison of the honey-bee's sting, or a preparation thereof.

**Apium** (*ap'-pe-um*) [*ἄπῑον*]. A genus of umbelliferous plants. **A. graveolens**. See *Celery*. **A. petroselinum**, is the common garden parsley; aperient, diuretic, somewhat antiperiodic; useful in dysmenorrhea. Dose of the fld. ext (of the root) gr. xv-3j.

**Apjohn's Formula** A formula for determining the dew-point by means of the elastic tension.

**Aplocal** (*ah-plas-en'-tal*) [*ἄπῑος*; *placenta*, a cake]. Destitute of placenta.

**Aplanatic** (*ah-plan-at'-ik*) [*ἄπῑος*; *πλανάειν*, to wander]. Not wandering; rectilinear. **A. Lens**, a lens corrected for all aberration of light and color. A rectilinear lens. See *Objective*.

**Aplanogamete** (*ah-plan-o-gam'-et-e*) [*ἄπῑος*; *πλάνος*, roaming; *γαμέτη*, a wife]. In biology, the non-motile conjugating cell in certain green algae, i. e. *Conjugatae*. See *Planogamete*.

**Aplanospore** (*ah-plan'-o-spor*). Same as *Aplanogamete*.

**Aplesia** (*ah-pla'-se-ah*) [*ἄπῑος*; *πλάσσειν*, to form]. A type of incomplete structure by reason of the non-formation of a necessary cell-group during the developmental stage. Called also *Hypoplasia*. **A., Laminar**. Synonym of *Facial Hemiatrophy*.

**Aplastic** (*ah-plas'-tik*) [*ἄπῑος*; *πλάσσειν*, to form]. 1. Structureless, formless. 2. Not characterized by plasticity: preventive of plastic process within the organism. **A. Lymph**, one of the products of inflammation or disease. A non-fibrinous material incapable of coagulation or organization.

**Apleuria** (*ah-plu'-re-ah*) [*ἄπῑος*; *πλευρά*, a rib]. Congenital absence of the ribs.

**Aplotomia** (*ap-lo-tom'-e-ah*), or **Aplotomy** (*ap-lot'-o-me*). See *Haplotomy*.

**Aplysiopurpurin** (*ap-liz-e-o-per'-pu-rin*) [*ἀπλυσία*, filthiness; *πυφύρα*, a purple dye]. A reddish pigment derived from the Aplysiidae.

**Apnea** (*ap-ne'-ah*) [*ἄπῑος*; *πνέειν*, to breathe]. Formerly used as synonymous with asphyxia, meaning breathlessness; difficult respiration; partial or complete suspension of breathing. It is employed now only in the physiological sense, to denote the condition in which the blood is too highly oxygenized. The presence of an over-abundance of oxygen prevents stimulation of the medullary respiratory center, and respiration is arrested in consequence. **A. infantum**. Synonym of *Laryngismus stridulus*. **A. neonatorum**, apnea of the newborn child, caused by difficult labor, pressure upon the cord, etc.

**Apneumatic** (*ap-nu-mat'-ik*) [*ἄπῑος*; *πνέουα*, breath]. 1. Collapsed; uninflated, not inflatable: said of parts of the lung. 2. Carried on with the exclusion of air, as an apneumatic operation or process.

**Apneumatosi** (*ap-nu-mat'-o-sis*) [*ἄπῑος*; *πνευμάωσις*, inflation]. Collapse of the air cells of some parts of the lung caused by blocking of the bronchial tubules, and resulting in a condition of non-inflation whereby the lung tissue is reduced to a condition similar to that of atelectasis, or congenital apneumatosi.

**Apneumia** (*ap-m'-me-ah*) [*ἄπῑος*; *πνέμων*, lung]. Congenital absence of the lungs.

**Apneumonervia** (*ap-nu-mo-ner'-ve-ah*) [*ἄπῑος*; *πνέμων*,

lung; *nervus*, a nerve]. Deficient nerve stimulus in the lung.

**Apneumoneuria** (*ap-nu-mo-nu'-re-ah*). Same as *Apneumonervia*.

**Apneustia** (*ap-nūs'-te-ah*) [*ἄπῑος*; *πνέειν*, to breathe]. Apnea; breathlessness.

**Apnoea** (*ap-ne'-ah*). See *Apnea*.

**Apo-** (*ap'-o*) [*ἀπό*, from]. A prefix denoting *from*, *away*, *separation*.

**Apoaconitin** (*ap-o-ak-on'-it-in*) [*ἀπό*, from; *aconitum*, aconite],  $C_{33}H_{11}NO_{11}$ . An alkaloid prepared from aconitin by dehydration.

**Apoatropin** (*ap-o-at'-ro-pin*) [*ἀπό*, from; *ἄτροπος*, unchangeable],  $C_{17}H_{23}NO_2$ . An alkaloid obtained by the action of  $HNO_3$  on atropin.

**Apoblast** (*ap'-o-blast*) [*ἀπό*, away; *βλαστός*, a germ]. In biology the unimpregnated ovum; an outcast cell. See *Outcast Cell*.

**Apobolema** (*ap-o-ble'-mah*) [*ἀπόβλημα*; *ἀπό*, away; *βάλλειν*, to throw]. The product of abortion.

**Apobole** (*ap-ob'-o-le*) [*ἀποβόλη*, a throwing away]. Expulsion; abortion.

**Apocarpous** (*ap-o-kar'-pus*) [*ἀπό*, from; *καρπός*, fruit]. In biology, composed of separate or easily separable carpels.

**Apocarteresis** (*ap-o-kar-ter'-e-sis*) [*ἀποκατερησις*, lack of fortitude]. Suicide by starvation.

**Apocatastasis** (*ap-o-kat as'-tas-is*) [*ἀποκατάστασις*, restoration]. The subsidence of an abscess or tumor.

**Apocatharsis** (*ap-o-kath-ar'-sis*) [*ἀπό*, away; *καθάρσις*, purgation]. Purgation; abeacuation.

**Apocathartic** (*ap-o-kath-ar'-tik*). Same as *Cathartic*.

**Apocenosia** (*ap-o-sen'-o-sis*) [*ἀποκένωσις*, to drain]. An increased flow or evacuation of blood or other humors.

**Apocenotic** (*ap-o-sen'-ol'-ik*) [*ἀποκένωσις*, to drain]. Producing apocenosia.

**Apochromatic** (*ap-o-kro-mat'-ik*) [*ἀπό*, away; *χρῶμα*, color]. Without color. **A. Lens**, a lens for microscopic and optical purposes, with high correction of spherical and chromatic aberrations, and better "definition." **A. Objective**. See *Objective*.

**Apocodein** (*ap-o-kol'-de-in*) [*ἀπό*, from; *κώδεα*, the head],  $C_{18}H_{19}NO_2$ . An alkaloid prepared from codein by dehydration. It is emetic and expectorant, with other qualities much like those of codein, and is recommended in chronic bronchitis. Unof.

**Apocope** (*ap-ok'-o-pe*) [*ἀπό*, from; *κοπή*, a cutting]. Amputation or abscission; an operation or a wound that results in loss of substance.

**Apocrustic** (*ap-o-krus'-tik*) [*ἀποκρούειν*, to beat off]. Repellent; defensive; astringent.

**Apocynin** (*ap-os'-in-in*) [*apocynon*, dogbane]. The precipitate from a tincture of *Apocynum cannabinum*; tonic, alterative, and evacuant. Dose gr. 1/4-j. Unof.

**Apocynum** (*ap-os'-in-un*) [*apocynon*, dogbane]. Canadian Hemp. The root of *A. cannabinum*. Properties due to an alkaloid, *apocynin*. A good expectorant. In full doses an emetic and cathartic. Valuable in dropsy. Dose gr. v-xx; of the alkaloid, gr. 1/4-1/2.

**A. Ext.**, Fld. Dose m-v-xx. **A., Tinct.** Dose m-v-xl. Should not be confounded with *Cannabis indica*. Unof. Another American species, *A. androsæmifolium*, has similar properties. Unof.

**Apodemialgia** (*ap-o-de-me-al'-je-ah*) [*ἀποδημία*, journey; *ἀλγείν*, to grieve]. A morbid dislike of home-life with a desire for wandering.

**Apodia** (*ah-pod'-de-ah*) [*ἄπῑος*; *ποῖς*, a foot]. Absence of feet.

**Apodous** (*ap'-o-dus*) [*ἄπῑος*; *ποῖς*, a foot]. Footless; characterized by apodia.

**Apogamy** (*ap-og'-am-re*) [*ἀπό*, away from; *γάμος*, marriage]. In biology, 1. Asexual reproduction where

the opposite usually occurs. 2. The total and normal absence of sexual reproductive power.

**Apogeotropism** (*ap-o-jē ol'-ro-pīz-m*) [*ἀποτροπός*, from the earth; *τροπή* (trope), turning]. In biology, tending to turn upward or away from the ground.

**Aphyal** (*ap-o-hī'al*) [*ἄφυα*, from: *φυάλη*, shaped like the letter upsilon]. Relating to the anterior (styloid) cornua of the hyoid bone.

**Apokenosis** (*ap-o-ken'-o-si*). See *Aponeurosis*.

**Apokenotic** (*ap-o-ken-ol'-ik*). See *Aponeurotic*.

**Apolar** (*ah-pol'-lar*) [*ἀ priv.*; *πόλος*, the end of an axis]. Having no pole. **A. Cells**, nerve cells without processes.

**Apoplepsis** (*ap-o-lep'-si*) [*ἀπολήψις*, a leaving off]. Suppression or retention of a secretion or excretion; cessation of a function.

**Apolexis** (*ap-o-leks'-is*) [*ἀπόληξις*, a declining]. The decline of life; the stage of catabolism or decay.

**Apollinaris Water** (*ap-ol-in-a'-ris*). A German alkaline mineral water, highly charged with carbonic acid, largely used for gout, rheumatism, etc., but possessing little medicinal value. See *Mineral Water*.

**Apomorphia**, or **Apomorphin** (*ap-o-mor'-fe-ah*, or *mor'-fin*) [*ἀπό*, from; *Morpheus*, the god of sleep].  $C_{17}H_{17}O_2N$ , = *morphia* =  $H_2O$ . An artificial alkaloid, derived from morphin. The *hydrochlorate* is the salt used, and is a grayish crystalline powder. It is a systemic emetic acting directly upon the vomiting center, and is the quickest, most certain and least irritating of all emetics. Unof. Dose gr.  $\frac{1}{20}$ – $\frac{1}{10}$  hypodermatically, or gr.  $\frac{1}{10}$ – $\frac{1}{8}$  by the mouth. An expectorant in small doses. **A. injectio hypodermica** (B. P.). Dose as an expectorant by the mouth, gr. ss; as an emetic, by the mouth, gr.  $\frac{1}{4}$ ; hypodermatically, gr.  $\frac{1}{8}$ . **Syrupus apomorph. hydrochloratis**. Dose  $\tilde{5}$  ss–j.

**Apomyelin** (*ap-o-mīl'-elin*) [*ἀπό*, from; *μυέλις*, marrow]. A peculiar phosphatized principle reported to exist in the brain tissue and containing no glycerol.

**Apomyttosis** (*ap-o-mīt-ol'-sis*) [*ἀπομύσσειν*, to blow the nose]. Any disease marked by stertor; a sneezing.

**Apone** (*ap-on'*) [*Fr.*: *à priv.*; *πόνος*, pain]. An anodyne; especially the concentrated tincture of capsicum; used externally for the relief of pain, and internally in small doses, diluted, for hemorrhoids, dyspepsia, and mania. Dose gtt. iij–x. Unof.

**Aponeurography** (*ap-o-nū-rof'-ra-fē*) [*ἀπονεύρωσις*, aponeurosis; *γραφία*, a writing]. A description of the fasciæ, or aponeuroses.

**Aponeurology** (*ap-o-nū-rol'-o-jē*) [*ἀπονεύρωσις*, aponeurosis; *λόγος*, an account]. The science of the fasciæ or aponeuroses.

**Aponeurosis** (*ap-on-u-rof'-is*) [*ἀπό*, from; *νεῦρον*, a tendon]. A fibrinous membranous expansion of a tendon giving attachment to muscles or serving to enclose and bind down muscles. Remarkable for their size or importance are the *infra-spinous*, enclosing the infra-spinous muscle; that of the *arm*, of the *deltoid muscle*, of the *external oblique* or *abdominal*, of the *forearm*, of the *leg*, of the *transversalis*, of the *head*, etc., etc.

**A. of Occipito-frontalis**, the tendinous aponeurosis that separates the two slips of the occipito-frontalis muscle. **A. of Soft Palate**, a thin but firm fibrous layer, attached above to the hard palate, and becoming thinner toward the free margin of the velum. **A. of Subscapular**, a thin membrane attached to the entire circumference of the subscapular fossa, and affording attachment by its inner surface to some of the fibers of the subscapularis muscle. **A. Supra-spinous**, a thick and dense membranous layer that completes the osseo-fibrous case in which the supraspinatus muscle is contained, affording attachment by its inner surface to some of the fibers of the muscle.

**A. Vertebral**, a thin aponeurotic lamina extending along the whole length of the back part of the thoracic region, serving to bind down the erector spine, and separating it from those muscles that connect the spine to the upper extremity.

**Aponeurosisitis** (*ap-on-u-ro-sil'-tis*) [*ἀπονεύρωσις*, aponeurosis; *ιτις*, inflammation]. Inflammation of an aponeurosis.

**Aponeurotic** (*ap-on-u-rol'-ik*) [*ἀπονεύρωσις*, aponeurosis]. Pertaining to or of the nature of an aponeurosis.

**Aponeurotome** (*ap-on-u'-ro-tom*) [*ἀπονεύρωσις*, aponeurosis; *τόμη*, a cut]. An instrument for dividing fasciæ.

**Aponeurotomy** (*ap-on-u-rol'-o-me*) [*ἀπονεύρωσις*, aponeurosis; *τομή*, a cut]. The incision, dissection, or anatomy of the fasciæ; fasciotomy.

**Aponipsis** (*ap-o-nip'-sis*) [*ἀπονεύσις*, a washing]. A washing; especially an internal washing, anciently performed by copious draughts of milk whey.

**Apopetalous** (*ap-o-pet'-al-us*) [*ἀπό*, away from; *πέταλον*, leaf]. In biology, same as *Polypetalous*.

**Apophlegmatic** (*ap-o-fleg-mat'-ik*) [*ἀπό*, away; *φλέγμα*, phlegm]. Promoting the expulsion of mucus from the air passages.

**Apophyllous** (*ap-o-fīl'-us*) [*ἀπό*, from; *φύλλον*, a leaf]. In biology, having distinct calyx or perianth leaves.

**Apophysar** (*ap-off'-is-ar*). See *Apophysary*.

**Apophysary** (*ap-off'-is-a-re*) [*ἀποφύειν*, to put forth]. Pertaining to or of the nature of an apophysis.

**Apophyseal**, **Apophysial** (*ap-o-fīz'-e-al*). Same as *Apophysary*.

**Apophysis** (*ap-off'-is-is*) [*ἀπό*, from; *φύσις*, growth]. In biology, a process, outgrowth, or swelling of some part or organ, as of a bone, the internal process of the mandible of a crustacean, or some part of a plant, *e. g.* the seta of certain mosses. **A. lenticularis**, the orbicular process of the temporal bone. **A. ravniana**, the processus gracilis of the malleus.

**Apoplectic** (*ap-o-plek'-tik*) [*ἀποπληξία*, apoplexy]. Pertaining to or affected with apoplexy. **A. Equivalents**, a name given to the premonitory symptoms of apoplexy, indicating that the brain is subject to alterations in the blood pressure, a condition that may lead to serious consequences if the arterial walls are diseased.

**Apoplectiform** (*ap-o-plek'-tif-orm*) [*ἀποπληξία*, apoplexy; *forma*, form]. Sudden, like apoplexy.

**Apoplectigenous** (*ap-o-plek'-tij'-en-us*) [*ἀποπληξία*, apoplexy; *γεννᾶν*, to produce]. Producing apoplexy or cerebral hemorrhage.

**Apoplectoid** (*ap-o-plek'-loid*). Same as *Apoplectiform*.

**Apoplexia** (*ap-o-pleks'-e-ah*) [*L.*]. Apoplexy. **A. splenitis**. Synonym of *Anthrax*.

**Apoplexy** (*ap'-o-pleks-e*) [*ἀποπληξία*, a striking down]. The symptom-complex resulting from cerebral hemorrhage, effusion, or from the plugging of a cerebral vessel. Modern writers mostly describe the post-mortem appearances by other terms, as cerebral hemorrhage, effusion, thrombosis, etc. The chief symptom is sudden loss of motion, sensation and consciousness, the patient falling and lying as if dead. There is frequently a conjugate deviation of the eyes and a rotation of the head away from the paralyzed side, and toward the side on which the cerebral lesion exists. Death may result instantaneously, or shortly, or the patient may recover consciousness and then be found to be suffering from paralysis of one-half of the body (*Hemiplegia*, *q. v.*). The bursting of a vessel in the lungs, liver, etc., is sometimes called apoplexy of the lungs, liver, etc. **A. Capillary**, from rupture and effusion of capillaries. **A. Ingravescens**, a term applied to a form of apoplexy in which there is a slowly pro-

gressive loss of consciousness due to a gradual leakage of blood from a ruptured vessel. **A., Pulmonary**, escape of blood into the pulmonary parenchyma, with laceration of its substance. **A., Simple**, the name given to those cases of death from coma in which no cerebral lesion is found. **A., Spinal**. See *Hematomyelia*. **A., Splenic**. Synonym of *Anthrax*.

**Apopsychia** (*ap-op-sik'-e-ah*) [*ἀπό*, away; *ψυχή*, spirit]. Syncope; fainting; a faint.

**Apoposis** (*ap-op-sit'-sis*) [*ἀπό*, away; *πώσις*, a falling]. A falling off, as of a crust, or of the hair; loosening of a scab or crust.

**Aporetin** (*ap-o-re'-tin*) [*ἀπό*, from; *ῥητινῆ*, a resin]. A resinous substance found in rhubarb.

**Aporrhinosis** (*ap-or-in-o'-sis*) [*ἀπο*, from; *ῥίς*, nose]. A discharge from the nostril.

**Aporrhipsis** (*ap-or-ip'-sis*) [*ἀπό*, away from; *ῥίπτειν*, to throw]. The throwing off of the clothes or the bedclothes; a symptom seen in some cases of insanity and in delirium.

**Aposcythisis** (*ap-o-sith'-is-is*) [*ἀποσκιῆξιν*, to scalp in the Scythian manner]. The surgical or traumatic removal of the scalp.

**Aposematic** (*ap-o-sem'-at-ik*) [*ἀπό*, away from; *σημα*, a sign]. Applied to such colors as are used by animals as signals or warnings of some dangerous or unpleasant quality, in repelling enemies.

**Aposepalous** (*ap-o-sep'-al-us*). See *Polysepalous*.

**Aposepsis** (*ap-o-sep'-sis*) [*ἀπόσσηψις*, putrefaction; see *Septsis*]. Complete putrefaction.

**Aposia** (*ah-po'-se-ah*) [*ἀ* priv.; *πίσις*, a drinking]. Absence of thirst; adipsia.

**Apositia** (*ap-o-sit'-e-ah*) [*ἀπό*, from; *σίτος*, food]. Aversion to or loathing of food.

**Apositic** (*ap-o-sit'-ik*) [*ἀπό*, from; *σίτος*, food]. Impairing the appetite; affected with apositia.

**Aposorbic Acid** (*ap-o-sor'-ik*). See *Acid*.

**Aposphacelisis** (*ap-o-sfas-el'-is-is*) [*ἀποσφακέλισις*, a dying of gangrene]. Mortification; gangrene due to constriction.

**Apospory** (*ap-os'-po-re*) [*ἀπό*, away from; *σπόρος*, seed]. In biology, reproduction without the intervention of spores in cases where sporogenesis ordinarily occurs.

**Apostasis** (*ap-os'-tas-is*) [*ἀπόστασις*, a standing away from]. 1. An abscess. 2. The end or the crisis of an attack of disease; termination by crisis. 3. An exfoliation. In biology, the separation of organs by unusual elongation of internodes.

**Apostatic** (*ap-os-tat'-ik*) [*ἀπόστασις*, a standing away from]. Relating to or of the nature of an apostasis.

**Apostaxis** (*ap-o-staks'-is*) [*ἀπό*, from; *στάσις*, a dropping]. A discharge of fluid by drops; epistaxis.

**Apostem** (*ap'-o-stem*), or **Apostema** (*ap-o-st'-mah*) [*ἀπόστημα*, an abscess]. An abscess.

**Apostematic** (*ap-os-tem-al'-ik*) [*ἀποστημα*, an abscess]. Relating to or of the nature of an abscess.

**Apostemation** (*ap-os-tem-al'-shun*) [*apostematio*, abscess formation]. The formation of an apostem or abscess.

**Apostematoid** (*ap-os-tem'-at-oid*) [*ἀποστημα*, an abscess; *είδος*, form]. Resembling an apostem or abscess.

**Aposthia** (*ah-pos'-the-ah*) [*ἀ* priv.; *ποθῆ*, penis, prepuce]. Absence of the penis or of the prepuce.

**Apostoli's Method**. The use of strong electrolytic or chemical galvano-caustic currents in the treatment of diseases of the female generative organs, especially uterine fibroids.

**Apostrophe** (*ap-os'-tro-fe*) [*ἀπό*, away; *σπρέφω*, to turn]. The arrangement of chlorophyll bodies along the side walls of the cells as a result of excess or deficiency of light. Cf. *Epistrophe* and *Dystrophe*.

**Apostume** (*ap'-os-tūm*) [*ἀπόστημα*, an abscess]. An abscess.

**Aposyngosis** (*ap-o-sin-in-go'-sis*) [*ἀπο*, from; *σπυγξ*, pipe]. The formation of or change into a fistula.

**Apotelesm** (*ap-ot'-el-izm*) [*ἀποτελεσμα*, result]. The termination of a disease.

**Apothecaries' Weight**. A system of weights and measures used in compounding medicines. The Troy pound of 5760 grains is the standard. It is subdivided into 12 ounces. The ounce is subdivided into eight drachms, the drachm into three scruples, and the scruple into 20 grains. For fluid measure the quart of 32 fluid ounces is subdivided into pints, the pint into 16 fluid ounces, the ounce into eight fluid drachms, and the fluid drachm into 60 minims. The following abbreviations are used:—

|                                     |                                 |
|-------------------------------------|---------------------------------|
| ℥, minim.                           | ℥, uncia, an ounce (480 grains) |
| glt., gutta, a drop.                | ℔, libra, a pound.              |
| ʒ, scrupulus, a scruple (20 grains) | ℥, octarius, a pint.            |
| ʒ, drachma, a drachm (60 grains).   | gr, granum, a grain             |
|                                     | ss., semissis, one-half.        |

See *Weights and Measures*.

**Apothecary** (*ap-oth'-e-ka-re*) [*ἀποθήκη*, a storehouse]. A druggist. One who prepares and sells drugs, fills prescriptions, etc. In Great Britain the apothecary is also a physician, filling his own prescriptions. In the United States it frequently happens that an authorized practitioner is also an apothecary, but without the degree of M. D. the practice of medicine is illegal.

**Apothecium** (*ap-o-the'-se-um*) [*ἀποθήκη*, a storehouse]. In biology, the saucer-shaped fruiting organ, or ascocarp, of lichens and certain ascomycetous fungi.

**Apothem, or Apothema** (*ap'-o-them* or *ap-oth'-em-ah*) [*ἀπό*, from; *θέμα*, a deposit]. A brown powder formed by the open-air evaporation of a vegetable infusion or decoction.

**Apothesis** (*ap-oth'-es-is*) [*ἀποθέσις*, a putting back]. The reduction of a fracture or luxation.

**Apotheter** (*ap-oth'-et-er*). A navel-string repositor devised by Braun, consisting of a staff with a sling attached in which the prolapsed funis is placed and carried up into the uterine cavity.

**Apothymia** (*ap-o-th'-me-ah*) [*ἀποθήμιος*, distasteful, disagreeable]. An aversion.

**Apotrepis** (*ap-o-trep'-sis*) [*ἀποτρέψις*, a turning away]. The resolution of an abscess.

**Apozem, or Apozema** (*ap'-o-zem*, or *ip-oz'-em-ah*) [*ἀπό*, away; *ζειν*, to boil]. A decoction, especially one to which medicines are admixed.

**Apparatus** (*ap-ar-a'-tus*) [*apparatus*, prepared]. The instruments used in any science, art, or surgical operation. Anatomically the word is used to designate collectively the organs effecting any specified work or action. **A. ligamentosus colli**, the *occipito-axoid ligament*, a broad band at the front surface of the spinal canal that covers the odontoid process.

**Apparent** (*ap-a'-rent*) [*apparere*, to appear]. Seeming; appearing to be like. **A. Death**. See *Death*.

**Apparition** (*ap-ar-ish'-ion*) [*apparitio*, an appearance]. A visual delusion or hallucination.

**Apparitor** (*ap-ar'-it-or*) [*L.*, a helper]. A small coiled tube worn at the ear to assist the hearing.

**Appendage** (*ap-en'-dā*) [*appendere*, to weigh; hang]. That which is attached to an organ as a part of it. See *Appendix*. **A., Auricular**, the projecting part of the cardiac auricle. **A., Epiploic**. See *Appendix*. **A., Ovarian**, the parovarium.

**Appendectomy** (*ap'-en-dis-ek'-to-me*) [*appendix*; *ἐκτομή*, excision]. Excision of the appendix vermiformis.

**Appendicitis** (*ap-en-dis-i'-tis*) [*appendere*, to hang upon or to; *τις*, inflammation]. Inflammation of the appendix vermiformis; ecphyaditis.

- Appendicular** (*ap-en-dik'-u-lar*) [*appendiculi*, a small appendix]. Pertaining to the appendix vermiformis.
- A. Gland**, a biramous gland attached to the spermatheca of queen bees.
- Appendix** (*ap-en'-diks*) [*appendere*, to hang upon or to pl., *Appendices*]. What is accessory to or dependent upon another. An appendage. **A. auricularis**, the auricular appendage, a process of the auricles of the heart. **A. cæci vermiformis**, a worm-shaped process of the cecum. **A. cerebri**, the pituitary body. **A., Ensiform**. See *Xiphoid*. **A. epiploicæ**, pouch-like, fatty projections of the peritoneum of the large intestine. **A., Xiphoid**. See *Xiphoid*.
- Apperception** (*ap-er-sep'-shun*) [*appercepere*, to receive]. The conscious reception or perception of a sensory impression; the power of receiving and appreciating sensory impressions.
- Appert's Process**. The preservation ("canning") of meat, fruits, and vegetables by exclusion of air and germs; effected by hermetically sealing the substances in tin cans after heating the contents to 110° or more.
- Appetence** (*ap'-e-tens*) [*appetentia*, appetite]. An appetite, or desire; the attraction of a living tissue for those materials that are appropriate for its nutrition.
- Appetency** (*ap'-e-ten-se*). 1. See *Appetence*. 2. In biology, the doctrine propounded by Lamarck, in which it is maintained that new organs can be produced in animals by the simple assertion of the will called into action by new wants, and that the organs thus acquired can be transmitted by generation.
- Appetite** (*ap'-e-tit*) [*appetere*, to desire]. The desire for food; also any natural desire; lust. **A., Perverted**, that for unnatural and indigestible things, frequent in disease and pregnancy. *Anorexia*, loss of appetite; *Bulimia*, insatiable appetite; *Hunger*, the strong desire and need of food.
- Appetizer** (*ap'-e-ti-zer*) [*appetere*, to desire]. A medicine, or dose taken to stimulate the appetite.
- Applanate** (*ap'-lan-āt*) [*ad*, to; *planus*, flat]. In biology, horizontally flattened.
- Applanatio** (*ap'-lan-at'-she-o*) [L.]. A flattening. **A. corneæ**, flattening of the entire surface of the cornea from disease.
- Applanation** (*ap'-lan-at'-shun*) [*applanatio*, a flattening]. A flattening, as of the cornea.
- Apple** (*ap'-l*) [AS., *æppel*, an apple]. The fruit of the tree, *Pyrus malus*. **A., Adam's**. See *Pomum adamit*. **A.-brandy**, an alcoholic spirit distilled from cider; cider-brandy. **A. Extract**. See *Extractum ferri pomatum*. **A.-eye**, a synonym of *Exophthalmos*. **A. of the Eye**, the pupil; also, the eyeball. **A.-jack**. See *A.-brandy*. **A.-oil**, amyl valerianate; prepared from isoamyl-isovaleric ester.
- Application** (*ap'-lik-at'-shun*) [*applicatio*, an application]. The act of applying anything, as a plaster, leech, bandage, lotion, pad, or compress; the thing so applied. **A. Colors**. See *Pigments*, *Colors*, and *Dyestuffs*.
- Applicative** (*ap'-lik-a-tiv*). See *Conduplicate*.
- Applicator** (*ap'-lik-a-tor*) [L.]. An instrument used in making applications; especially, one used in uterine or urethral surgery.
- Applier** (*ap'-tli'-er*) [*applicare*, to apply]. A dental instrument for making applications to teeth.
- Appolito's Operation**. See *Operations*, *Table of*.
- Appolito's Suture**. See *Sutures*.
- Apposition** (*ap-o-zish'-un*) [*apponeere*, to apply to]. The act of fitting together; the state of being fitted together. **A. Theory**, a theory concerning the growth of the cell-wall, as held by Schmitz, Strasburger, etc., viz., that stratified and other cell-walls of plants grow in thickness by the deposition of new particles upon the inner face of the cell. Growth in surface is the result of a simple stretching of the wall by the pressure of the contents.
- Approach** (*ap-roch'*) [ME., *approche*]. A drawing near. **A. Grafting**, to inarch.
- Appropriation** (*ap-ro-pre-at'-shun*) [*appropriatio*, a setting apart]. Assimilation of nutriment.
- Approximal** (*ap-roks'-im-al*) [*ad*, to; *proximus*, next]. That which is next to; contiguous. In dentistry, pertaining to contiguous surfaces, as approximal fillings.
- Appun's Apparatus**. A device for determining the overtones of a vowel by means of reeds.
- Apraxia** (*ah-praks'-e-ah*) [*â* priv.; *πράσσειν*, to do]. Soul-blindness; mind-blindness; object-blindness; an affection in which the memory for the uses of things is lost, as well as the understanding for the signs by which the things are expressed.
- Aprication** (*ap-re-ka'-shun*) [*apricatio*, a basking in the sun]. The sun-bath; sun-stroke.
- Aproctia** (*ah-prok-to'-ah*) [*â* priv.; *πρωκτός*, anus]. Imperforation of the anus.
- Aproctosis** (*ah-prok-to'-sis*) [*â* priv.; *πρωκτός*, anus]. See *Aproctia*.
- Aproctous** (*ah-prok'-tus*) [*â* priv.; *πρωκτός*, the anus]. Having imperforation of the anus.
- Apron** (*a'-prun*) [ME., *aperu*]. 1. In surgery, a protection or covering for the body in surgical operations. 2. The omentum. **A., Hottentot**, artificially elongated labia minora; *velamen vulvae*. **A. of Succor**, a canvas appliance borne by two men, and used for the transportation of wounded persons.
- Aprosexia** (*ap-ro-seks'-e-ah*) [*â* priv.; *προσέχειν*, to give heed]. A mental disturbance consisting in inability to fix the attention upon a subject. An inability to think clearly and to readily comprehend what is read or heard, sometimes observed in the course of chronic catarrh of the nose or of the nose and pharynx.
- Aprosopa** (*ap-ros'-o-pah*). See *Aprosopia*.
- Aprosopia** (*ap-ros'-o-pe-ah*) [*â* priv.; *πρόσωπον*, the face]. A form of fetal monstrosity with partial or complete absence of face.
- Aprosopous** (*ap-ros'-o-pus*) [*â* priv.; *πρόσωπον*, the face]. Exhibiting aprosopia.
- Aprosopus** (*ap-ros'-o-pus*) [*â* priv.; *πρόσωπον*, the face]. An aprosopous fetus.
- Apselaphesia** (*ap-sel-af-e'-ze-ah*) [*â* priv.; *ψηλῆφισις*, touch]. Paralysis of the tactile sense.
- Apsithyria**, or **Apsithurea** (*ap-sith-i'-re-ah*, or *-u'-re-ah*) [*â* priv.; *ψιθυρίσσειν*, to whisper]. A term suggested by Solis-Cohen for hysterical aphonia, in which the patient not only loses the voice, but is unable even to whisper. It is generally accompanied by double paralysis of the vocal cords, but there is no paralysis of the tongue, lips, or expiratory muscles. Charcot especially advocates hypnotism in the treatment of the condition.
- Apsychia** (*ap-sik'-e-ah*) [*â* priv.; *ψυχή*, spirit]. Unconsciousness; a faint or swoon.
- Apta viro** (*ap'-tah vi'-ro*) [L.; pl., *Aptæ viris*]. A young girl who by mechanical means has been rendered available for prostitution.
- Apterium** (*ap-te'-re-um*) [*â* priv.; *πτερόν*, a feather]. In biology, a normally naked tract on a bird's skin.
- Apterous** (*ap'-ter-us*) [*â* priv.; *πτερόν*, a wing, a feather]. In biology, destitute of wings or membranous expansions.
- Aptitude** (*ap'-te-tūd*) [*aptitudo*, fitness]. Fitness, tendency. The natural proneness of an organism toward certain functions or pathological conditions.
- Aptyalia** (*ap-ti-a'-le-ah*) [*â* priv.; *πτέαλον*, saliva]. See *Aptyalism*.
- Aptyalism** (*ap-ti'-al-izm*) [*â* priv.; *πτεαλίζειν*, to spit]. Deficiency or absence of saliva.

**Aptystia** (*ap-tis'-te-ah*) [*â* priv.; *πτειν*, to spit]. See *Aptyalism*.

**Apulosis** (*ap-u-lo'-sis*) [*ἀπούλωσις*; *οὔλειν*, to cicatrize]. Cicatrization, or a cicatrix.

**Apulotic** (*ap-u-lo'-ik*) [*ἀπουλωτικός*, healing]. Promoting cicatrization, or apulosis.

**Apus** (*a'-pus*) [*â* priv., and *πούς*, foot]. 1. A monstrosity consisting in absence of the lower limbs, or feet. 2. An apodous fetus.

**Apyonin** (*ah-pi'-on-in*) [*â* priv.; *πύον*, pus]. A remedy introduced as a substitute for pyoktanin in ophthalmic practice. It is said to be identical with yellow pyoktanin. Unof.

**Apyretic** (*ah-pi-ret'-ik*) [*â* priv.; *πυρετός*, fever]. Without fever or pyrexia.

**Apyrexia** (*ah-pi-reks'-e-ah*) [*â* priv.; *πυρετός*, feverish]. The non-febrile stage of an intermittent fever; intermission or absence of fever.

**Apyrexial** (*ah-pi-reks'-e-al*) [*ἀπύρετος*, without fever]. Pertaining to, of the nature of, or characterized by, apyrexia.

**Apyrexia** (*ah'-pi-reks-e*). See *Apyrexia*.

**Aqua** (*a'-kwah*) [L.: *gen. and pl., Aquæ, a'-kwe*]. Water. An oxid of hydrogen having the composition  $H_2O$ . It is a solid below  $32^\circ$ , a liquid between  $32^\circ$  and  $212^\circ$ , vaporizes at  $212^\circ$  at the sea level (bar. 760 mm.), giving off vapor of tension equal to that of the air. It covers four-fifths of the surface of the earth, but is never pure in nature, containing from a trace of soluble matter, in rain water, to 26 per cent. of soluble mineral salts, in the Dead Sea. Water is an essential constituent of all animal and vegetable tissues. In the human body it forms two per cent. of the enamel of the teeth, 77 per cent. of the ligaments, 78 per cent. of the blood, and 93 per cent. of the urine. Externally, water has a stimulating effect upon the skin, either by direct or reactionary means. Cold water when continued too long may lower the general temperature of the body so as to produce serious depression of the circulation and muscular power. When properly used it is a valuable antipyretic. Hot water and vapor increase circulation and produce diaphoresis. Its too long-continued use debilitates. Internally, water is a diuretic. It is the most useful of all the solvents in pharmacy. The following are the official preparations and forms: **A. bulliens**, boiling water. **A. communis**, common water. **A. destillata**, distilled water. **A. fervens**, hot water. **A. fluvialis**, river-water. **A. fontana**, well- or spring-water. **A. marina**, sea-water. **A. pluvialis**, rain-water. See also *Mineral Water*. Aqua in pharmacy also designates various medicated waters: as **A. ammoniæ**, water of ammonia; **A. anethi**, dill water; **A. chlori**, chlorin water; **A. rosæ**, rose water. **A. fortis**. See *Acid, Nitric*. **A. regia**. See *A. Nitrohydrochloric*. **A. tofana**, a celebrated secret poison, prepared in the 17th century at Palermo by a woman named Toffana. It was probably arsenical. **A. Vitæ**, Brandy or Spirit, *q. v.* In anatomy. **A. labyrinthi**, the clear fluid existing in the labyrinth of the ear.

**Aquæcapsulitis** (*a-kwe-kap-su-li'-tis*) [*aqua*, water; *capsula*, a capsule; *ιτις*, inflammation]. Serous iritis.

**Aqueductus** (*a-kwe-duk'-tus*). See *Aqueduct*.

**Aquamalarial Fever** (*a-kwa-mal-a'-re-al*). Synonym of *Malarial Fever*. See *Fever*.

**Aquapuncture** (*ak-wah-pungk'-chür*) [*aqua*, water; *punctura*, a puncture]. Counter-irritation by means of a very fine jet of water impinging upon the skin; useful in neuralgia and other nerve disorders.

**Aquatic** (*a-kwa'-ik*) [*aqua*, water]. Pertaining to water. **A. Cancer**. Synonym of *Cancrum oris*.

**Aqueduct, or Aqueductus** (*ak'-we-duk't*, or *ak'-we-*

*duk'-tus*) [*aqua*, water; *ductus*, a leading]. Used of ducts or canals in various parts of the body. **A. cerebri**, the infundibulum. **A. cochleæ**, aqueduct of the cochlea. **A. of Cotunnii**, the aqueduct of the vestibule, extending from the utricle to the posterior wall of the pyramid in the brain. **A. Fallopii**, the canal of the portio dura in the petrous portion of the temporal bone. **A. Sylvii**, the aqueduct of Sylvius from the third to the fourth ventricle, the *iter a tertio ad quartum ventriculum*. **A. vestibuli**, aqueduct of the vestibule of the ear.

**Aqueous** (*a'-kwe-us*) [*aqua*, water]. Referring to water; watery. **A. Chamber of the Eye**, the space between the cornea and the lens; the iris divides it into an anterior and a posterior chamber.

**A. Extract**, a solid preparation of a drug made by evaporation of its aqueous solution. **A. Humor**, the fluid filling the anterior chamber of the eye.

**Aquiducous** (*a-kwe-du'-kus*) [*aquiducus*; *aqua*, water; *ducere*, to lead]. Hydragogue.

**Aquilaria** (*a-kwil-a'-re-ah*) [L.]. A genus of trees. **A. agallocha**, a tree of S. E. Asia producing the true aloes-wood, or eagle-wood, valued in perfumery, but no longer employed in regular pharmacy or practice. **A. ovata** and **A. secundaria** also furnish varieties of aloes-wood. Unof.

**Aquilegia** (*ak-wil-e'-je-ah*) [L.]. A genus of ranunculaceous plants of many species. **A. vulgaris** has active medicinal qualities; but none of the species are now much used in regular practice.

**Aquiparous** (*a-kwip'-ar-us*) [*aqua*, water; *parere*, to bring forth]. Producing water, or affording watery secretions; said of glands, as the lachrymal and parotid.

**Aquocapsulitis** (*a-kwo-kap-su-li'-tis*) [*aqua*, water; *capsula*, a small box]. Serous iritis, *q. v.*

**Aquosity** (*a-kwo'-it-e*) [*aquositas*, watery]. The state or condition of being watery.

**Aquila** (*ak-wu'-lah*) [L.]. A small aqueous collection. **A. cotunnii**, the perilymph, *q. v.*

**Arabic** (*ar'-ab-ik*) [*Αραβικός*, Arabic]. Of or pertaining to Arabia. **A. Acid**. See *Arabin*. **A. Gum**. See *Acacia*.

**Arabin** (*ar'-ab-in*) [*Αραβικός*, Arabic],  $(C_6H_{10}O_5)_2 + H_2O$ . Arabic Acid. A transparent, glassy, amorphous mass, an exudate from many plants, making a clear solution in water. It is the principal constituent of gum arabic. See *Carbohydrates, Table of*.

**Arabinose** (*ar'-ab-in-ös*) [*Αραβικός*, Arabic],  $C_5H_{10}O_5$ . One of the glucoses. Made from gum arabic on boiling with dilute  $H_2SO_4$ . It crystallizes in shining prisms that melt at  $100^\circ$ ; is slightly soluble in cold water, has a sweet taste, and reduces Fehling's solution, but is not fermented by yeast. See *Carbohydrates, Table of*.

**Arabis** (*ar'-ab-is*) [*Αραβικός*, Arabic]. A genus of cruciferous herbs; rock cresses, or wall cresses. **A. chinensis**, of Asia, and **A. sagittata** and **A. thaliana**, of Europe, are stimulant and stomachic. The seeds of some species yield an oil much like that of rape-seed. Unof.

**Arabite** (*ar'-ab-it*) [*Αραβικός*, Arabic],  $C_5H_{12}O_5$ . A substance formed from arabinose by the action of sodium amalgam. It crystallizes from hot alcohol in shining needles, melting at  $102^\circ$ . It has a sweet taste, but does not reduce Fehling's solution.

**Arabonic Acid** (*ar-ab-on'-ik*). See *Acid*.

**Arachis** (*ar'-ak-is*) [*ἄραχης*, a leguminous plant]. A genus of leguminous plants. **A. hypogæa**. See *Ground Nut*.

**Arachnidium** (*ar-ak-nid'-e-ton*) [*ἀράχνη*, a spider]. In biology, the secreting spinning apparatus of spiders,

consisting of five kinds of glands, over one thousand in all, producing a secretion insoluble in water and with a nitrogenous basis, forming the fine, silky threads of the web.

**Arachnitis** (*ar-ak-ni'-tis*) [*ἀράχνη*, a spider's web; *ιτις*, inflammation]. Inflammation of the arachnoid membrane of the brain.

**Arachnoid** (*ar-ak'-noi'*) [*ἀράχνη*, a spider's web; *ειδος*, form]. Resembling a web. **A. Cavity**, the space between the arachnoid membrane and the dura mater. **A. Membrane**, the delicate serous membrane of the brain and cord between the dura and pia mater. **Sub-arachnoid fluid**. See *Cerebro-spinal fluid*.

**Arachnoidal** (*ar-ak-noid'-al*) [*ἀράχνη*, a spider's web; *ειδος*, form]. Pertaining to the arachnoid.

**Arachnoiditis** (*ar-ak-noid-i'-tis*). Same as *Arachnitis*.

**Arachno-pia** (*ar-ak'-no-pi'-ah*) [*ἀράχνη*, a spider's web; *pia*, fem. of *pius*]. The arachnoid and the pia considered together.

**Arachnorrhinitis** (*ar-ak-nor-in-i'-tis*) [*ἀράχνη*, spider; *ῥις*, nose; *ιτις*, inflammation]. A disease of the nasal passages supposed to be due to the presence of a spider.

**Arachnotitis** (*ar-ak-no-ti'-tis*) [*ἀράχνη*, spider; *οις*, ear; *ιτις*, inflammation]. Inflammation said to be caused by a spider in the auditory canal.

**Arack** (*ar'-ak*) [*Ind.*]. A spirituous liquor distilled from rice, dates, palm-sap, or cocoanut juice, used in Asia, etc.

**Aræometer** (*ar-e-om'-et-er*). See *Areometer*.

**Aræotic** (*ar-e-ot'-ik*). See *Aræotic*.

**Aralia** (*ar-a'-le-ah*) [*L.*]. A genus of plants, order *Araliaceæ*, embracing several species, having aromatic, diaphoretic, and resolvent properties. Ginseng, wild sarsaparilla, petty morrel, and other plants esteemed in popular medicine belong here; few have active qualities of high value in any disease. **Unof.**

**Aran-Duchenne's Disease**. See *Diseases, Table of*.

**Aranææ Tela** (*ar-a'-ne-e te'-lah*). See *Cobweb*.

**Aranæous** (*ar-a'-ne-us*) [*aranea*, a spider's web]. Full of webs; resembling a cobweb. **A. Membrane**, the arachnoid.

**Arantius, Bodies of**. See *Corpora*. **A., Canal of**. See *Canal*. **A., Duct of**. See *Duct*. **A., Nodules of**. See *Arantius, Bodies of*. **A., Valves of**. See *Valvule arantii*. **A., Ventricle of**, a small cul-de-sac in the medulla oblongata.

**Arar** (*a'-rar*) [*Barbary*]. The tree *Callitris quadrivalvis* of N. W. Africa. It produces sandarac.

**Araroba** (*ar-ar o'-bah*) [*Brazil*]. *Goa Powder*. An oxidation product of resin found deposited in the wood of the trunk of the *A. andira* of Brazil. Its active principle is *Chrysarobin* or *Chrysophanic acid*, *q. v.* It is largely used in skin affections.

**Arasa** (*ar-a'-sah*) [*S. Am.*]. The root of a plant native to Brazil and Uruguay. The active principle of the drug is found in the tuberosities of the root, especially in the bark, which is quite thick. In taste a decoction of the drug resembles that of cascarrilla. It is an excellent remedy in metrorrhagia, acting where hydrastis is ineffectual. No unpleasant secondary effects have been noted. **Unof.**

**Arbor** (*ar'-bor*) [*L.*]. A name for the arbor vitæ of the cerebellum. **A. Vitæ**, a term applied to the arborescent appearance of a section of the cerebellum, and also to a similar appearance of the folds of the interior of the cervix uteri. See *Thuja*.

**Arborization** (*ar-bor-iz-a'-shun*) [*arbor*, a tree]. A form of nerve termination in which the nerve fibers are brought into contact with the muscle fiber by means of an expansion.

**Arbuscula** (*ar-bu'-ku-lah*) [*L.*]. A small shrub having the appearance of a diminutive tree.

**Arbutin** (*ar'-bu-tin*) [*arbutus*, the wild strawberry tree],  $C_{12}H_{16}O_7$ . A bitter glucosid obtained from *Uva ursi*, or bearberry. It is neutral, crystalline, and resolvable into glucose and hydroquinon. Arbutin is an efficient diuretic. Dose gr. xv-xxx. See *Uva ursi*.

**Arbutus** (*ar-bu'-tus*) [*L.*]. A genus of ericaceous shrubs and trees. **A. menziesii**, the madroño of California, has an astringent bark, useful in diarrheas. **Unof.** **A. unedo**, the European arbutus, is astringent and narcotic. **A., Trailing**. See *Epigæa*.

**Arc** (*ark*) [*arcus*, a bow]. In craniometry, a measurement taken on the outside of the skull, following its curves. **A., Binauricular**, a measurement from the center of one auditory meatus to the other, directly upward across the top of the head. **A., Bregmatolambdoid**, a measurement along the sagittal suture. **A., Naso-bregmatic**, from the root of the nose to the bregma. **A., Naso-occipital**, measurement from the root of the nose to the lowest occipital protuberance.

**Arcanum** (*ar-ka'-num*) [*arcanum*, a secret]. A medicine whose composition is kept secret.

**Arcate** (*ar'-kat*) [*arcatus*, bow-shaped]. Bow-shaped; curved; arcuate.

**Arch** (*arch*) [*arcus*, a bow]. A term applied to the curved shape of several various parts of the body. **A. of Aorta**. See *Aorta*. **A., Branchial**, the cartilaginous arches that support the gills (branchiæ) of fishes. In the human fetus they are also present. See *Cleft*. **A. of Colon**. See *Colon*. **A. of Corti**, the arch that the pillars of the organ of Corti make over the basilar membrane of the cochlea. **A., Crural**. See *Poupart's Ligament*. **A. of Fallopius**, a name for the arch formed by Poupart's ligament. **A. Femoral**, same as *A. Crural*. **A., Palmar**, the arch formed by the radial artery in crossing the bones of the metacarpus. **A., Plantar**, the arch made by the external plantar artery. **A., Post-oral**, arches in the fetus, five in number, that develop into the lower jaw and throat. See *A., Branchial*. **A. of Pubes**, that part of the pelvis formed by the convergence of the rami of the ischia and pubes on each side. **A., Supra-orbital**, the curved and prominent margin of the frontal bone beneath the superciliary ridge, that forms the upper boundary of the orbit. **A. of a Vertebra**, the part of a vertebra formed of two pedicles and two laminae and enclosing the spinal foramen. **A., Zygomatic**, the arch formed by the malar and temporal bones.

**Archæocyte** (*ar'-ke-o-sit*) [*ἀρχαῖος*, ancient; *κύτος*, a hollow (a cell)]. In biology, one of the irregular ameboid cells—mesameboids—imbedded in a jelly-like matrix and occurring between the two primitive epithelia of the body, in the Porifera.

**Archæostoma, Archæostome** (*ar-ke-os'-to-mah*, *ar'-ke-o-stom*). See *Archistome*.

**Archæus** (*ar-ke'-us*) [*ἀρχαῖος*, ancient]. In spagiric medicine, the invisible counterpart of the visible body; solar heat as a source of life.

**Archamœba** (*ark-am-e'-bah*) [*ἀρχή*, primitive; *αἰσθησις*, change]. Haeckel's hypothetical progenitor of all amebæ and of all higher forms of life.

**Archamphiaster, or Archiamphiaster** (*ark-am-fe-as'-ter*, or *ar-ke-am-fe-as'-ter*) [*ἀρχή*, first; *αἰσθησις*, around; *ἀστὴρ*, star]. In biology, those amphiasters concerned in the production of the polar globules.

**Archangelica** (*ark-an-jel'-ik-ah*) [*ἀρχαγγέλικός*, archangel]. A genus of umbelliferous plants; *A. abropurpurea*, *officinalis*, and *sativa* afford *Angelica Root*, *q. v.*

**Archebiology** (*ar-ke-bi-o'-je*) [*ἀρχή*, beginning; *βίος*, life; *λόγος*, discourse]. The study of the simplest or most primitive forms or beginnings of life.

**Archebiosis** (*ar-ke-bi-o'-sis*) [*ἀρχή*, the beginning; *βίωσις*, life]. The theoretical origin of living organ-

- isms from non-living matter. See *Generation*, *Spontaneous*; *Biogenesis*, and *Abiogenesis*.
- Archecptoma** (*ark-ek-to'-mah*) [*ἀρχός*, anus; *εκ*, out; *πτῶμα*, a falling]. Prolapse of the rectum.
- Archegenesis** (*ark-e-jen'-es-is*). The same as *Archebiosis*.
- Archegonium** (*ark-e-go'-ne-um*) [*ἀρχή*, first; *γόνος*, race]. The female reproductive organ of the higher cryptogams.
- Archegony** (*ark-eg'-o-ne*) [*ἀρχέγονος*, first of a race]. The doctrine of spontaneous generation.
- Archerteric** (*ark-en-ter'-ik*) [*ἀρχή*, first; *έντερον*, intestine]. Relating to the archenteron.
- Archenteron** (*ark-en'-ter-on*) [*ἀρχή*, a beginning; *έντερον*, intestine]. In biology, the embryonic alimentary cavity. The entodermal sac of the gastrula; archigaster; coelenteron.
- Archepyon** (*ark-ep'-ion*) [*ἀρκή*, a beginning; *πίον*, pus]. Pus that has become caseated, or so thick that it does not flow. A term proposed by Roswell Park.
- Archespore, Archesporium** (*ar'-ke-spōr', -e-um*) [*ἀρχή*, a beginning; *σπορά*, a seed]. In biology, the cells that give rise to the lining of the anther-cell and to the mother-cells of the pollen.
- Archesthetism** (*ark-es'-thet-izm*) [*ἀρχή*, first; *αίσθάνεσθαι*, to perceive]. The doctrine that animal movements are primitively determined by sensibility or consciousness.
- Archet** (*ar-chet' or ar-sha'*) [Fr.]. A bow formerly used to operate the drill in lithotomy.
- Archetype** (*ar'-ke-tip*) [*ἀρχή*, a beginning; *τύπος*, a type]. In comparative anatomy, an ideal type or form with which the individuals or classes may be compared. A standard type.
- Archhydra** (*ark-hi'-drah*) [*αρχή*, first; *ὕδωρ*, water]. A primitive polyp.
- Archiatr** (*ar-ke-at'-ter*) [*ἀρχιατρός*, a chief physician]. The head physician in a court, as in that of Russia.
- Archiblast** (*ar'-ke-blast*) [*ἀρχή*, first; *βλαστός*, germ]. In embryology, the granular areola surrounding the germinal vesicle. It is composed of three layers, the outer, or *epiblast*, from which the skin and its adnexa, the nervous system, and the terminal portions of the alimentary canal are formed; the middle, or *mesoblast*, from which the epithelium of the genito-urinary organs and the smooth and striated muscle-tissue is derived; and the inner, or *hypoblast*, for the development of the epithelium of the respiratory tract and of the alimentary canal.
- Archiblastic** (*ar-ke-blas'-tik*) [*ἀρχή*, first; *βλαστός*, germ]. Derived or supposed to be derived from the archiblast. The parenchymatous elements are regarded as archiblastic.
- Archiblastoma** (*ar-ke-blas-to'-mah*) [*ἀρχή*, first; *βλαστός*, germ; *ῥμα*, a tumor; *pl.*, *Archiblastomata*]. Any tumor composed of archiblastic or parenchymatous elements, such as myoma, neuroma, papilloma, epithelioma, adenoma, carcinoma, etc.
- Archiblastula** (*ar-ke-blas'-tu-lah*) [*ἀρχή*, first; *βλαστός*, a germ or bud]. In embryology, a ciliated, vesicular morula, resulting from complete and regular yelk-division and by invagination forming the archigastrula.
- Archicercal** (*ar-ke-ser'-kal*) [*ἀρχή*, chief; *κέρως*, tail]. In biology, having the tail primitive, without fin-folds.
- Archicharp** (*ar'-ke-karp*) [*ἀρχή*, first; *καρπός*, fruit]. See *Ascogonium*.
- Archicytula** (*ar-ke-sit'-u-lah*) [*ἀρχή*, a beginning; *κύτος*, a cell]. A fertilized egg cell in which the nucleus is discernible.
- Archigaster** (*ar-ke-gas'-ter*) [*ἀρχή*, first; *γαστήρ*, belly]. The primitive, perfectly simple intestine; archenteron.
- Archigastrula** (*ar-ke-gas'-tru-lah*) [*ἀρχή*, beginning;
- γαστήρ*, belly]. The gastrula as it is observed in the most primitive types of animal development; called also bell-gastrula from its shape.
- Archigenesis** (*ar-ke-jen'-es-is*). See *Archebiosis*.
- Archil** (*ar' kil*) [ME., *orchell*]. A coloring matter somewhat like litmus, chiefly obtained from the lichen, *Rocella tinctoria*; used for staining animal tissues. See *Conspectus of Pigments*, under *Pigment*.
- Archimonerula** (*ar-ke-mon-er'-u-lah*) [*ἀρχή*, first; *μονήρης*, single, solitary]. In embryology, a special name given by Haeckel to the monerula stage of an egg undergoing primitive and total cleavage.
- Archimorula** (*ar-ke-mor'-u-lah*) [*ἀρχή*, first; *μόρον*, a mulberry]. In embryology, the solid mass of cleavage cells, or mulberry mass, arising from the segmentation of an archicytula, and preceding the archiblastula and archigastrula.
- Archinephric** (*ar-ke-nef'-rik*) [*ἀρχή*, first; *νεφρός*, the kidney]. Pertaining to the archinephron.
- Archinephron** (*ar-ke-nef'-rou*) [*ἀρχή*, beginning; *νεφρός*, the kidney]. The primitive or embryonic stage of the kidney or renal apparatus.
- Archipin** (*ar-kip'-in*). See *Chibou*.
- Archipterygium** (*ar-kip-ter-ij'-e-um*) [*ἀρχή*, first; *πτερόν*, a wing]. In biology, a ground form, persisting in a few cases only, and representing the first and lowest stage of the skeleton of the anterior extremity of vertebrates.
- Archistome** (*ar'-kis-tom*) [*ἀρχή*, first; *στόμα*, mouth]. The gastrula mouth or opening to the archenteron; blastoporus.
- Architis** (*ar-ki'-tis*) [*ἀρχός*, anus]. Proctitis; inflammation of the anus.
- Architroch** (*ar'-ke-trok*) [*ἀρχή*, first; *τροχός*, a disk]. The ciliated band about the mouth of a planula.
- Archocele** (*ar'-ko-sel*, or *ar-ko-se'-le*) [*ἀρχός*, anus; *κήλη*, hernia]. Rectal hernia.
- Archocystocolposyrinx, or Archocolpocystosyrinx** (*ar-ko-sis-to-kol-po-sir'-ingks*, or *ar-ko-kol-po-sis-to-sir'-ingks*) [*ἀρχός*, anus; *κύστις*, bladder; *κόψος*, vagina; *σῆριξ*, fistula]. Recto-vesico-vaginal fistula.
- Archometer** (*ar-ko-met'-rum*) [*ἀρχός*, anus; *μετρον*, measure]. A device for ascertaining the caliber of the anus, or for dilating its sphincters.
- Archoptoma** (*ar-ko-to'-mah*) [*ἀρχός*, anus; *πτῶμα*, a fall]. A prolapse of the rectum.
- Archoptotic** (*ar-kop-to'-ik*) [*ἀρχός*, anus; *πτῶμα*, a fall]. Relating to archoptoma or archoptosis.
- Archoptosis** (*ar-kop-to'-sis*) [*ἀρχός*, anus; *πτῶσις*, a falling]. Rectal prolapse.
- Archorrhagia** (*ar-ko-ra'-p-ha*) [*ἀρχός*, anus; *ρήγνεσθαι*, to break out]. Rectal hemorrhage.
- Archorrhagic** (*ar-ko-raj'-ik*) [*ἀρχός*, anus; *ρήγνεσθαι*, to break out]. Relating to rectal hemorrhage.
- Archorrhea** (*ar-ko-re'-ah*) [*ἀρχός*, anus; *ρεῖν*, to flow]. A discharge of blood or of any pathologic fluid from the anus.
- Archos** (*ar'-kos*) [*ἀρχός*, the anus]. The anus.
- Archostegnoma** (*ar-ko-steg-no'-mah*) [*ἀρχός*, anus; *στεγναι*, to consolidate]. Archostenosis; a rectal stricture.
- Archostegnosis** (*ar-ko-steg-no'-sis*) [*ἀρχός*, anus; *στεγνσις*, a stopping]. A rectal stricture.
- Archostegnotic** (*ar-ko-ste-no'-ik*) [*ἀρχός*, anus; *στεγνσις*, a stopping]. Relating to a rectal stricture.
- Archostenosis** (*ar-ko-sten-o'-sis*) [*ἀρχός*, anus; *στενός*, narrow]. Stricture of the rectum.
- Archostenotic** (*ar-ko-sten-o'-ik*) [*ἀρχός*, anus; *στενός*, narrow]. Relating to rectal stricture.
- Archosyrinx** (*ar-ko-sir'-ingks*) [*ἀρχός*, anus; *σῆριξ*, a pipe]. 1. A syringe for the rectum. 2. Fistula in ano.

**Arciform** (*ar'-se-form*) [*arcus*, bow, arch; *forma*, form]. Bow-shaped; especially used to designate certain sets of fibers in the oblongata.

**Arctation** (*ark-ta'-shun*) [*arctatio*; *arctare*, to draw close together]. 1. Contraction or lessening of an opening or of the lumen of a canal. 2. Infibulation.

**Arctium** (*ark'-she-um*) [L.]. Burdock. See *Lappa*.

**Arctostaphylos** (*ark-to-staf'-il-os*). See *Uva ursi* and *Manzanita*.

**Arctual** (*ar'-ku-al*) [*arctualis*, arched]. Arched; bent or curved.

**Arcuate** (*ar'-ku-at*) [*arcuatio*, a bowing]. Arched; curved; bow-shaped.

**Arcuation** (*ar-ku-a'-shun*) [*arcuatio*, a bowing]. Curvature of any bone, as of the tibia or sternum; curvature of the vertebral column.

**Arcuatus** (*ar-ku-a'-tus*) [*arcus*, a bow]. Bent or curved in an arched form. **A. morbus**, a former name for jaundice.

**Arculus** (*ar'-ku-lu*) [dim. of *arcus*, a bow]. An arching support for bed-clothes.

**Arcus** (*ar'-kus*) [*arcus*, a bow]. A bow or arch. **A. dentalis**, the dental arch. **A. senilis**, in the old, the ring of fatty degeneration of the corneal tissue about the periphery. **A. zygomaticus**, the zygomatic arch. **Ardent** (*ar'-dent*) [*ardere*, *ardens*, to burn]. Burning; hery; glowing; accompanied by a sensation of burning. **A. Fever**, heat fever or thermal fever. **A. Spirits**, alcoholic liquors. See *Spiritus*.

**Ardor** (*ar'-dor*) [*ardor*, heat]. Violent heat, burning; applied to fevers and the sexual passion. **A. urinæ**, burning pain in the inflamed urethra during micturition.

**Area** (*a'-re-ah*) [*area*, an open space]. Any space with boundaries. **A. celsi**. See *Alopecia areata*. **A's.**, Cohnheim's, certain clear-cut areas seen in a transverse section of muscle-fiber. **A., Crural**, a space at the base of the brain included between the pons and chiasm. **A. germinativa**, or *embryonic spot*, the oval germinating spot of the embryo. **A. opaca**, the opaque circle about the *A. pellucida*. **A. pellucida**, the light central portion of the *A. germinativa*. **A., Postpontile**, the ventral aspect of the mesencephalon. **A. vasculosa**, the vascularization of the *A. opaca*.

**Areca Nut** (*ar'-ek-ah*). See *Betel*.

**Arecane, Arekane** (*ar'-ek-an*) [Malay]. An oily and volatile basic substance obtainable from areca nut; said to be a purgative and sialagogue, and to slow the pulse. Unof.

**Arecin** (*ar'-es-in*) [Sp., *areca*],  $C_{23}H_{26}N_2O$ . 1. An organic base isomeric with brucin, derived from cinchona bark. 2. A brown-red coloring matter, obtained from areca nuts; areca red.

**Arecolin** (*ar'-et-ko-lin*) [Sp., *areca*],  $C_8H_{13}NO_2$ . A liquid alkaloid isolated from the seeds of *Areca catechu*. It is strongly alkaline, very soluble in water, alcohol, ether, or chloroform, and boils at 220° C. It is a powerful poison affecting the heart similarly to muscarin. It has anthelmintic properties. Dose gr.  $\frac{1}{5}$ – $\frac{1}{6}$ .

**Arefaction** (*ar-e-fak'-shun*) [*arefactio*; *arefacere*, to make dry]. 1. Exsiccation or desiccation. The removal of the structural or constitutional water from a substance. 2. The drying of drugs before powdering them. 3. Dryness, as of the skin. 4. Withering, as of a paralyzed limb.

**Arena** (*ar'-e-nah*) [*arena*, sand]. 1. Brick-dust deposit from urine; gravel. 2. Sabulous matter; brain-sand.

**Arenaceous** (*ar-e-na'-se-us*) [*arenaceus*; *arena*, sand]. Of the nature of sand or gravel; sabulous.

**Arenation** (*ar-e-na'-shun*) [*arena*, sand]. A sand-bath. The application of hot sand to a limb or part of the body. See *Ammotherapy*.

**Areola** (*ar'-el-o-lah*) [dim. of *area*, an open space; *pl.*, *Areolæ*]. 1. The brownish space surrounding the nipple of the female breast. This is sometimes called *Areola papillaris*. A secondary areola, surrounding this, occurs during pregnancy. The pigmentation about the umbilicus is called the *umbilical areola*. 2. Any interstice or minute space in a tissue.

**Areolar** (*ar'-el-o-lar*) [*areola*, dim. of *area*, an open space]. Relating to or characterized by areolæ. **A. Tissue**, cellular tissue; connective tissue.

**Areolate**, or **Areolated** (*ar'-el-o-lat*, or *ar'-el-o-lat-ed*) [*areola*, dim. of *area*, an open space]. Marked or characterized by areolæ.

**Areometer** (*ar-e-om'-et-er*) [*ἀραιός*, thin, light; *μέτρον*, a measure]. An instrument for estimating the specific gravity or strength of liquids, especially alcoholic liquids.

**Areometry** (*ar-e-om'-et-re*) [*ἀραιός*, thin, light; *μέτρον*, a measure]. The use of the areometer; estimation of the specific gravity of fluids.

**Areotic** (*ar-e-ot'-ik*) [*ἀραιός*, thin]. 1. Attenuant; thinning the humors; increasing perspiration. 2. An attenuant remedy.

**Arethusa** (*ar-eth-u'-sah*) [*Ἀρέθουσα*, a fountain]. A genus of orchidaceous plants. **A. bulbosa**, of North America, has root-tubes that are popularly used as a material for poultices, and are said to form a useful application for toothache. Unof.

**Arevareva** (*ar-a-var-a'-vah*) [Tahitian]. A scaly skin-disease said to be caused by the habitual use of the drug *Kava*, *q. v.* It is accompanied by eye-disease, with dimness of vision.

**Argal** (*ar'-gal*). See *Argol*.

**Argamblyopia** (*ar-gam-ble-o'-pe-ah*) [*ἀργός*, idle, disused; *ἀμβλυopia*, dim-sightedness]. Amblyopia due to disuse of the eye.

**Argamblyopic** (*ar-gam-ble-op'-ik*) [*ἀργός*, idle; *ἀμβλυopia*, dim-sightedness]. Affected with argamblyopia.

**Argand-lamp**. A form of lamp with a tubular wick.

**Argan-oil** (*ar'-gan-oil*) [Arab., *argān*]. An oil derived from the seeds contained in the fruit of the argan-tree. It is a good substitute for olive-oil.

**Argan-tree** (*ar'-gan-tre*) [Arab., *argān*]. The *Argania sideroxylon*, an evergreen tree of the N. W. of Africa, order *Sapotaceæ*; it yields a useful oil.

**Argel** (*ar'-gel*) [Syrian]. A plant, *Solenostemma argel*, of the eastern Mediterranean region; also its leaves, which are used to adulterate senna; also the *Gomphocarpus fruticosus*, of Africa, whose leaves are similarly employed. Unof.

**Argema** (*ar'-jem-ah*) [*ἀργεμα*, an ulcer; *pl.*, *Argemata*]. A white ulcer of the margin of the cornea, following phlyctenula.

**Argemone** (*ar-jem-o'-ne*) [*ἀργεμον*, an ulcer]. A genus of plants. **A. mexicana**, the horned or prickly poppy, a plant native to North America. It is said to have hypnotic qualities, and its seeds afford a purgative oil. Unof.

**Argentation** (*ar-jen-tal'-shun*) [*argentum*, silver]. Staining with a preparation of silver.

**Argentic** (*ar-jen-tik*) [*argentum*, silver]. Pertaining to, or of the nature of silver. Containing silver as a univalent radical.

**Argentine** (*ar-jen-tin*) [*argentum*, silver]. Containing or resembling silver.

**Argentum** (*ar-jen'-tum*) [L.; *gen.*, *Argenti*]. Silver.  $Ag = 108$ ; quantitative, 1. A malleable and ductile metal of brilliant white luster. It tarnishes only in the presence of free sulphur, sulphur gases, and phosphorus. It is an excellent substance for vessels used in pharmacy and for sutures used in surgery. The following salts

are used: **A. cyanidum**,  $\text{AgCN}$ , used in the preparation of hydrocyanic acid. **A. iodidum**,  $\text{AgI}$ , sometimes used internally instead of **A. nitras**. Dose gr.  $\frac{1}{4}$ -j. **A. nitras**,  $\text{AgNO}_3$ , "nitrate of silver," argentic nitrate, "lunar caustic," a powerful astringent and an escharotic of moderate strength. It stains skin and other tissues black when applied in strength. In small doses it stimulates the heart and nerve centers. If too long continued, it leaves a slate-colored, insoluble deposit of silver under the skin (*Argyria*). Dose gr.  $\frac{1}{6}$ - $\frac{1}{2}$ . **A. nitras dilutus**, the mitigated caustic or *dilute stick* is fused with an equal weight of potassium nitrate. **A. nitras fusus**, "stick caustic." Contains four per cent. of silver chlorid. It is used locally. **A. oxidum**,  $\text{Ag}_2\text{O}$ , explosive when treated with ammonia. Dose gr.  $\frac{1}{2}$ -ij. **A. vivum**, an old name for mercury or quicksilver.

**Argiamblyopia** (*ar-ge-am-ble-o'-pe-ah*) [*ἀργία*, disuse; *αὐθιγνῶπια*, dim-sightedness]. See *Argamblyopia*.

**Argilla** (*ar-jil'-ah*) [*ἀργίλος*, potter's clay]. White or potter's clay, alumina. See *Bole*.

**Argol** (*ar'-gol'*) [*ἀργός*, white]. The impure tartar derived from wine. See *Tartar*.

**Argyll-Robertson Pupil**. See *Signs and Symptoms, Table of*, and *Pupil*.

**Argyll-Robertson's Operation**. See *Operations, Table of*.

**Argyria** (*ar-jir'-e-ah*) [*argentum*, silver]. A form of chloasma or discoloration of the skin and mucous membranes produced by the prolonged administration of nitrate of silver, the molecules of silver being deposited in much the same position as those of the natural pigment of the skin. It may be *general*, from internal administration, or *local*, from its local application.

**Argyriasis** (*ar-jir'-i'-as-is*). See *Argyria*.

**Argyrosis** (*ar-jir'-o'-sis*). Same as *Argyria*, *q. v.*

**Arhinia** (*ah-rin'-e-ah*) [*à priv.*; *ῥίς*, nose]. Congenital absence of the nose.

**Arrhythmia** (*ar-ith'-me-ah*). See *Arrhythmia*.

**Aricin** (*ar'-is-in*) [*Arica*, in Peru],  $\text{C}_{25}\text{H}_{26}\text{N}_2\text{O}_4$ . An alkaloid obtained from several varieties of cinchona bark.

**Ariditas** (*ar-id'-it-as*) [L., "dryness"]. A dried or withered condition of any part or organ.

**Aridura** (*ar-id-u'-rah*) [L.]. Dryness; a drying up, withering, or wasting of a part, or of the organism as a whole.

**Aril**, or **Arillus** (*ar'-il*, or *ar'-il-us*) [*aridus*, dry]. In biology, the accessory coat of certain seeds, growing from the funiculus, hilum, or placenta, as the mace of nutmegs.

**Arisema** (*ar-is-e'-mah*) [*ἄρον*, arum; *σηῖα*, a sign]. A genus of araceous herbs. **A. atrorubens**, the wild or Indian turnip, or Jack-in-the-Pulpit of Eastern N. America. Its corm is strongly stimulant and acrid, with emetic, expectorant, and sternutatory qualities. Other species have similar properties. Unof.

**Arista** (*ar-is'-tah*) [L.]. In biology, the awn or beard of certain flowers or animals.

**Aristate** (*ar-is'-tat*) [*arista*, the awn or beard of grain]. In biology, awned. Tipped with a bristle.

**Aristol** (*ar'-is-tol*) [*ἄριστος*, best; *oleum*, oil],  $(\text{C}_6\text{H}_5)_2\text{Cl}_2\text{O}_2$ . Annidalin; Dithymol-iodid. An iodine compound used as a substitute for iodoform as an antiseptic dressing. It has the advantage of being odorless, and is used either in the powder form or as a five to ten per cent. ointment with vaselin or lanolin.

**Aristolochia** (*ar-is-to-lo'-ke-ah*) [*ἄριστος*, best; *λοχία*, the lochia]. A genus of exogenous herbs, many species of which have active medicinal qualities. **A. clematitis**, of Europe, has been used as a tonic, stimu-

lant, and diaphoretic. **A. cymbifera**, of S. America, furnishes a part of the drug called *Guaco* (*q. v.*), and is a good tonic and stimulant. **A. serpentaria** (see *Serpentaria*) is at present more used in medicine than any other species.

**Aristolochic** (*ar-is-to-lo'-kik*) [*ἄριστος*, best; *λοχία*, the lochia]. 1. Having the property of expelling the placenta, or of exciting or promoting the lochial discharge. 2. A medicine used for expelling the secundines or for exciting the lochial flow.

**Aristolochin** (*ar-is-to-lo'-kin*) [*ἄριστος*, best; *λοχία*, the lochia]. A bitter principle found in Virginia snake-root. See *Serpentaria*.

**Aristotle's Experiment**. The double feeling experienced by the fingers when a single pebble is placed between the crossed fingers of one hand.

**Aristulate** (*ar-is'-tu-lat*) [*aristula*, dim. of *Arista*, awn or beard of grain]. In biology, having a short awn.

**Arithmomania** (*ar-ith-mo-ma'-ne-ah*) [*ἀριθμός*, a number; *μανία*, madness]. An insane anxiety with regard to the number of things that fall under the observation. Sometimes it consists in constant or uncalled-for counting, either of objects or in mere repeating of consecutive numbers.

**Arlt-Jaesche's Operation**. See *Operations, Table of*.

**Arlt's Ointment**. An ointment containing grs. viiss of belladonna to  $\mathfrak{z}\text{j}\frac{1}{4}$  of blue ointment, for use in blepharospasm.

**Arlt's Operation**. See *Operations, Table of*.

**Arm** (*arm*) [*armare*, to arm]. 1. That part of the upper extremity from the shoulder to the wrist. 2. That portion of the stand connecting the body or tube of a microscope to the pillar.

**Armadillo** (*ar-ma-dill'-o*) [Sp., dim. of *armado*, armed]. A trade-name for a proprietary arrangement of plates, straps, and buckles worn upon the person for its alleged electric effects.

**Armamentarium** (*ar-ma-men-ta'-re-um*) [L., an arsenal]. The outfit of medicines or instruments of the physician or surgeon.

**Armarium** (*ar-ma'-re-um*) [L.]. See *Armamentarium*.

**Armature** (*ar'-mat-chür*) [*armatura*, equipment]. A mass of soft iron at the extremity of a magnet. Also, the core of iron around which coils of insulated wire are wound or disposed.

**Arma urticaria** (*ar'-mah er-tik'-e-ah*) [L.]. The urticating weapons of *Calenterates*.

**Arm-chair**, **Charcot's**. See *Shaking Cure*.

**Armed Tape-worm**. See *Tenia solium*.

**Armenian** (*ar-me'-ne-an*) [*Armenia*]. Of or belonging to Armenia.

**A. Blue**. Same as *Ultramarine*. **A. Bole**, a reddish, unctuous earth or clay formerly much used in medicine, now used in tooth-powders and in veterinary practice. It is absorbent and astringent.

**Armilla** (*ar-mill'-ah*) [*armilla*, a bracelet, ring]. 1. In biology, the annular ligament of the wrist; a colored ring on the tibia of a bird or the plaited frill on the stipe of certain mushrooms. 2. The Gasserian ganglion.

**Armpit** (*arm'-pit*) [*armus*, shoulder; *puteus*, a well]. The axilla.

**Armus** (*ar'-mus*) [*armus*, *ἀνός*, the shoulder]. The arm, or the arm and shoulder.

**Army Itch** (*ar'-me itch*). A distressing chronic form of itch prevalent in the United States at the close of the civil war. The itching was intense. The eruption was seen especially on the arms, forearms, chest, abdomen, and lower extremities, particularly on the ulnar side of the forearm and inner aspect of the thigh. It resembled prurigo associated with vesicles, pustules, and eczema.

**Arnandon Green.** Same as *Mittler's Green*.

**Arnatto** (*ar-nat'-o*). See *Annotto*.

**Arnica** (*ar'-nik-ah*) [*L.*; *gen., Arnica*]. A genus of composite-flowered plants. The name in medicine denotes the plant commonly known as "Leopard's bane," *A. montana*. Both flowers and roots are used in medicine. Its properties are probably due to an alkaloid, *trimethylamin*,  $C_3H_9N$ . In small doses it is a cardiac stimulant; in larger doses a depressant. In toxic doses it frequently causes death. It is a popular remedy, when locally applied, for sprains, bruises and surface wounds, and is valuable also in typhus and typhoid fevers as an antipyretic. **A., Emplastrum**, contains ext. of root 33, resin plaster 67 parts. **A., Ext. Radicis.** Dose gr. j-ij. **A., Ext. Rad. Fld.** Dose  $\mathfrak{m}\mathfrak{v}$ -xx. **A., Infusum**, 20 parts flowers, 100 parts water. Superior to the tincture for local use. **A., Tinct.**, 20 per cent. Dose  $\mathfrak{m}\mathfrak{v}$ -xxx. **A., Tinct. Rad.**, 10 per cent. Dose  $\mathfrak{m}\mathfrak{v}$ -xxx. *Trimethylamin*, (unof.). Dose gr. ij-ij in syrup. **Arnicae flores**, arnica flowers. **Arnicae radix**, the root of arnica.

**Arnica** (*ar'-nis-in*) [*arni*],  $C_{20}H_{30}O_4$ . A brownish, bitter glucosid extracted from the flowers of *Arnica montana*.

**Arnold's Convolution.** See *Convolutions, Table of*. **A. Fold**, *valvula lachrymalis superior*, a fold of the mucous membrane seen in the lachrymal sac. **A. Ganglion.** See *Ganglia, Table of*. **A. Nerve.** See *Nerves, Table of*. **A. Plexus.** See *Plexus*.

**Arnot's Method.** See *Treatment, Methods of*. **A. Mixture.** See *Frigorific Mixture*. **A. Ventilator.** See *Ventilation*.

**Aroma** (*ar-o'-mah*) [*ἀρωμα, spice*]. The volatile fragrant or odorous emanation of certain vegetable substances.

**Aromatic** (*ar-o-mat'-ik*) [*ἀρωμα, spice*]. 1. Having a spicy odor. 2. A substance characterized by a fragrant, spicy taste and odor, as cinnamon, ginger, the essential oils, etc. A stimulant to the gastro-intestinal mucous membrane. 3. A qualification applied to a series of carbon compounds originating from a nucleus composed of six carbon-atoms,  $C_6H_6$ . Their stability is relatively great as compared to the fatty bodies. **A. Acids**, those of the benzoin-group of hydrocarbons. **A. Compound**, any benzyl-derivative. **A. Fld. Ext.**, aromatic powder 100, alcohol q. s. **A. Group**, a series of hydrocarbons having the composition  $C_{10}H_{16}$ . **A. Powder.** See *Cinnamonum*. **A. Vinegar**, any mixture of aromatic oils with vinegar. It is used as a stimulating agent. See *Acetum*.

**Aromin** (*ar-o'-min*) [*ἀρωμα, spice*]. An alkaloid obtainable from urine, after creatinin, etc., have been removed from the mother-liquor. When heated it emits a fragrant odor.

**Arquatus** (*ar-kwa'-tus*) [*L.*, a rainbow]. Showing several colors. **A. morbus**, an old name for jaundice, from the discoloration of the skin; \*rainbow disease.

**Arrack** (*ar'-ak*) [*Ind.*]. Any alcoholic liquor is called arrack in the East, but arrack proper is a liquor distilled from toddy, malted rice, or dates.

**Arrak** (*ar'-ak*). See *Arrack*.

**Arrector** (*ar-ek'-tor*) [*L.*, an erector]. A name applied to certain muscles. **A. pili Muscle**, a fan-like arrangement of a layer of smooth muscular fibers surrounding the hair follicle, whose contraction erects the follicle and produces *cutis anserina* or "goose-skin."

**Arrest** (*ar-est'*) [*ad, to; restare, to withstand*]. Stoppage, detention. **Arrested development**, is when an organ or organism fails in its normal evolution, stopping at the initial or intermediate stages of the

process. **Arrested head**, when in parturition the child's head is hindered but not impacted in the pelvic cavity.

**Arrestation** (*ar-es-ta'-shun*). Same as *Arrest*.

**Arrhea** (*ah-re'-ah*) [*à priv.; ῥοα, a flow*]. The cessation or suppression of any discharge.

**Arrhenotocia** (*ar-en-o-to'-se-ah*) [*ἀρρη, male; τόκος, a bringing forth*]. A form of parthenogenesis in which without coitus male eggs are deposited, as in bees.

**Arrhinia** (*ah-rin'-e-ah*). Same as *Arhinia*.

**Arrhizous** (*ah-ri'-zus*) [*à priv.; ῥίζα, a root*]. In biology, destitute of roots or rhizoids, as parasitic plants, certain mosses, hepaticæ, etc.

**Arrhythmia** (*ah-rith'-me-ah*) [*à priv.; ῥυθμός, rhythm*]. Absence of rhythm; chiefly used in the expression *arrhythmia cordis*, denoting irregularity or lack of rhythm in the heart's action. See *Cardiac Rhythm*.

**Arrhythmic** (*ah-rith'-mik*) [*à priv.; ῥυθμός, rhythm*]. Without rhythm; irregular.

**Arrhythmous** (*ah-rith'-mus*). See *Arrhythmic*.

**Arrhythm** (*ah-rith'-me*). Same as *Arrhythmia*.

**Arrow-poison** (*ar'-o-poi'-zun*). See *Curare and Guacamaco*.

**Arrowroot** (*ar'-o-root*) [*ME., arrow; root*]. A kind of starch derived from *Maranta arundinacea* of the West Indies, Southern States, etc. It is a popular remedy for diarrhea, and is widely used as a food. Many other starchy preparations are sold as arrow-root.

**Arsenate, or Arseniate** (*ar'-sen-āt, ar-se'-ne-āt*) [*arsenium*]. Any salt of arsenic acid. **Ferrous arseniate**, arseniate of iron, sparingly used in medicine: it is the *ferri arsenias* of the B. P. It is a tasteless, greenish powder, combining the effects of iron and arsenic; used largely in anemia and skin diseases. Dose gr.  $\frac{1}{16}$ - $\frac{1}{2}$ .

**Arseniasis** (*ar-sen'-i-as-is*). Same as *Arsenism*.

**Arsenic, Arsenicum, or Arsenum** (*ar'-sen-ik, ar-sen'-ik-um, or ar-se'-num*). As = 75; quantivalence III, v. A non-metal having a metallic luster and crystalline structure. In small doses it is a stomachic and general tonic, promoting appetite and cardiac action, and stimulating mental activity. It is of great value in irritative dyspepsia, and is sometimes used internally to blanch and clear the skin. In larger doses it creates skin-eruptions and behaves as a violent corrosive poison, acting with cumulative effect. Externally, it is a powerful escharotic, used in cancer. Only the salts and oxids are used in medicine. **A. acid.**, arsenous acid, white arsenic, "ratsbane,"  $As_2O_3$ . Dose gr.  $\frac{1}{36}$ - $\frac{1}{6}$ . **A., acid, liquor.** (*Liq. arsenici hydrochlorici*, B. P.), a 1 per cent. solution of the acid in hydrochloric acid and distilled water. Dose  $\mathfrak{m}\mathfrak{j}$ -x. **Ferri arsenas**,  $Fe_3As_2O_8$ . Dose gr.  $\frac{1}{8}$ - $\frac{1}{2}$ . **Liq. Arsenici hydrochlor.** (B. P.). Dose  $\mathfrak{m}\mathfrak{j}$ -viij. **Potassii arsenit.**, **Liq. (Liquor Arsenicalis**, B. P.). Fowler's solution, contains A. acid 1, potass. bicarbonate 1, comp. tinct. lavender 3, and distilled water q. s. *ad* 100 parts. Dose  $\mathfrak{m}\mathfrak{j}$ -x. **Sodii arsenas**,  $Na_2HAsO_4 \cdot 7H_2O$ . Dose of the dried salt gr.  $\frac{1}{24}$ - $\frac{1}{2}$ . **Sodii arsenat.**, **Liq.**, Pearson's solution. Dose,  $\mathfrak{m}\mathfrak{j}$  xv. **A. ioidid**,  $AsI_3$ . Dose gr.  $\frac{1}{24}$ - $\frac{1}{2}$ . **A. et hydrargyri ioid.**, **Liq.**, liquor of the ioidid of arsenic and mercury, Donovan's solution, contains A. ioidid 1, mercuric ioidid 1, distilled water 100 parts. Dose  $\mathfrak{m}\mathfrak{j}$ -x. **A. bromas**,  $AsBr_3$ , valuable in diabetes. Dose gr.  $\frac{1}{36}$ . **A. brom.**, **Liq.**, Clemens' solution, a one per cent. solution of the arsenite of bromin. Dose  $\mathfrak{m}\mathfrak{j}$ -iv. The tests for arsenic are Fleitmann's, Marsh's, and Reinsch's, for which see *Tests, Table of*.

**Arsenical** (*ar-sen'-ik-al*) [*arsenum, arsenic*]. Pertaining to arsenic. **A. Devitalizing Fiber**, used

in places where pastes would be dangerous, from leakage.

- R.** Absorbent cotton (cross-cut fine)  
 Arsenous oxid, gr. v  
 Acetate of morphin, gr. x  
 Oily carbolic acid, q. s., to very thin paste.  
 Saturate cotton with paste and dry.

**A. Paste** (*Pâte Arsenicale*), a French composition, used as application for destroying the pulps of decayed teeth.

- R.** Arsenous oxid, gr. v  
 Acetate of morphin, gr. x  
 Mull in mortar; moisten cotton pellet in either oil of cloves, eugenol, oily carbolic acid, or dental aconite, and dip into powder. See also *Frère Côme*.

**Arsenicalism** (*ar-sen'-ik-al-izm*). Same as *Arsenism*.

**Arsenicism** (*ar-sen'-is-izm*). Same as *Arsenism*.

**Arsenicophagy** (*ar-sen-ik-off'-a-jē*) [*arsenum*, arsenic; φαγεῖν, to eat]. The habitual eating of arsenic.

**Arsenism** (*ar'-sen-izm*) [*arsenum*, arsenic]. Chronic arsenical poisoning; arsenicalism.

**Arsenite** (*ar'-sen-it*) [*arsenum*, arsenic]. Any salt of arsenous acid.

**Arsenization** (*ar-sen-iz-a'-shun*) [*arsenum*, arsenic]. Treatment with arsenical remedies.

**Arsenoblast** (*ar-sen'-o-blast*) [ἀρσεν, male; βλαστός, germ]. In biology, the male element of the sexual cell, capable of multiplication by division; the opposite of the *thelyblast* or female element.

**Arsenous**, or **Arsenious** (*ar'-sen-us*, *ar-se'-ne-us*) [*arsenum*, arsenic]. Containing arsenic. **A. Acid**. See *Arsenic*.

**Arse-smart** (*ars'-smart*). See *Polygonum hydropiper*.

**Arsins** (*ar'-sinz*) [*arsenum*, arsenic]. Peculiar volatile arsenical bases found by Selmi to be produced by the contact of arsenous acid and albuminous substances.

**Arsonium** (*ar-so'-ne-um*) [*arsenum*, arsenic; ammonium], AsH<sub>4</sub>. A univalent radical in which arsenic replaces the nitrogen of ammonium.

**Arsura** (*ar-sul'-rah*) [L., a "burn"]. An old name for gonorrhea.

**Art** (*art*) [*ars*, *artis*, skill]. Skill; dexterity. **A.**, Dental, the application of the rules of dental surgery to the treatment of the diseases of the teeth and the replacement of the loss of those organs.

**Artanthe** (*ar-tan'-the*) [L.]. A genus of piperaceous plants. **A. elongata**, the plant that affords the drug *Matico*, q. v. It is a vine of the pepper family, a native of Peru.

**Artefact** (*ar'-te-fakt*). See *Artifact*.

**Artemisia** (*ar-tem-is'-e-ah*) [Ἀρτεμις, the goddess Diana]. A genus of plants of the order composite.

**A. abrotanum**, *southern wood*, is stimulant, tonic, and vermifuge, and is popularly used as a vulnerary. It is similar in properties to wormwood. Dose of fld. ext. ℥x-xx. Unof. **A. absinthium**. See *Absinthe*. **A. maritima** affords pure *Wormseed*, q. v. **A. vulgaris**, mugwort, is a popular remedy in various diseases.

**Arteria** (*ar-te'-re-ah*) [ἀρτερία, the trachea]. Hollow tubes. The plural was applied to the bronchial tubes. The ancients supposed these filled with vital spirit during life. See *Artery*.

**Arteriac** (*ar-te'-re-ak*) [ἀρτερία, the trachea]. 1. Pertaining to the trachea, or to the arteries. 2. A remedy used in diseases of the trachea or of the arteries.

**Arteriagra** (*ar-ter-e-a'-grah*) [ἀρτερία, trachea; ἄγρα, a seizure]. Neuralgia of an artery.

**Arterial** (*ar-te'-re-al*) [ἀρτερία, the trachea]. Pertaining to an artery.

**Arterialization** (*ar-te-re-al-iz-a'-shun*) [ἀρτερία, the trachea]. The process of making or becoming arte-

rial; the change from dark, venous blood into that which is bright red, as in the arteries.

**Arteriactia** (*ar-te-re-ark'-te-ah*) [ἀρτερία, trachea; *actus*, bound]. Constriction or stenosis of an artery.

**Arteriectasis** (*ar-te-re-ek'-tus-is*) [ἀρτερία, trachea; ἑκτασις, a stretching out]. Arterial dilatation.

**Arteriectopia** (*ar-te-re-ek-to'-pe-ah*) [ἀρτερία, trachea; ἑκτοπος, out of place]. Displacement or abnormality in the course of an artery.

**Arterin** (*ar'-ter-in*) [ἀρτερία, trachea]. Hoppe-Seyler's term for the arterial blood-pigment as contained in the corpuscles.

**Arterioarctia** (*ar-te-re-o-ark'-te-ah*). See *Arteriactia*.

**Arterio-capillary** (*ar-te-re-o-kap'-il-a-re*) [ἀρτερία, trachea; *capillus*, a hair]. Pertaining to arteries and capillaries. **A. Fibrosis**, the undue augmentation, or abnormal preponderance, of connective tissue elements in the walls of capillaries and arteries.

**Arteriodiastasis** (*ar-te-re-o-di-as'-tas-is*) [ἀρτερία, trachea; διάστασις, separation]. The retraction of the two ends of a divided artery.

**Arterio-fibrosis** (*ar-te-re-o-fi-bro'-sis*) [ἀρτερία, trachea; *fibra*, a fiber]. A term applied to the condition of the arterial capillaries in chronic interstitial disease.

**Arteriogram** (*ar-te'-re-o-gram*). See *Sphygmogram*.

**Arteriograph** (*ar-te'-re-o-graf*) [ἀρτερία, trachea; γράφειν, to record]. A form of sphygmograph.

**Arteriography** (*ar-te-re-og'-ra-fe*) [ἀρτερία, trachea; γράφω, a writing]. 1. A description of the arteries. 2. The graphic representation of the pulse-waves or of the arterial blood-current.

**Arteriola** (*ar-te-ri'-o-lah*) [L.: *pl.*, *Arteriole*]. An arteriole.

**Arteriola Rectæ** (*ar-te-re-o'-le rek'-te*) [L.]. The small blood-vessels that supply the medullary pyramids of the kidneys.

**Arteriole** (*ar-te'-re-ol*) [*arteriola*]. A very small artery.

**Arteriology** (*ar-te-re-ol'-o-jē*) [ἀρτερία, trachea; λόγος, science]. The science of the arteries; the anatomy, physiology, and pathology of the arteries.

**Arteriomalacia** (*ar-te-re-o-mal-a'-se-ah*) [ἀρτερία, trachea; μαλακία, softness]. The softening of an artery.

**Arteriopathy** (*ar-te-re-op'-a-the*) [ἀρτερία, trachea; πάθος, illness]. Any disease of an artery or of arteries.

**Arteriophlebotomy** (*ar-te-re-o-fo-bo'-o-mē*) [ἀρτερία, trachea; φλέψ, a vein; τέμνειν, to cut]. Local blood-letting.

**Arterioplasia** (*ar-te-re-o-pla'-ne-ah*) [ἀρτερία, trachea; πλανάσθαι, to wander]. Deviation or tortuousness in the course of an artery.

**Arterio-renal** (*ar-te-re-o-re'-nal*) [ἀρτερία, trachea; *ren*, the kidney]. Pertaining to the renal blood-vessels.

**A. Disease**, a pathologic condition of middle life characterized by an early stage of renal cirrhosis due primarily to vascular lesions. Its symptoms are mainly high vascular tension, albuminuria, and tendency to apoplectic seizures.

**Arteriorrhagia** (*ar-te-re-or-a'-je-ah*) [ἀρτερία, trachea; ῥήγναι, to break forth]. Arterial hemorrhage.

**Arteriorrhexis** (*ar-te-re-or-eks'-is*) [ἀρτερία, trachea; ῥήξις, a bursting]. Rupture of an artery.

**Arteriosclerosis** (*ar-te-re-o-skle-ro'-si*) [ἀρτερία, trachea; σκληρός, hard]. The hardening of the walls of an artery, and especially of the intima. See *Endarteritis*.

**Arterio-sclerotic** (*ar-te-re-o-skle-ro'-ik*) [ἀρτερία, trachea; σκληρός, hard]. Pertaining to arteriosclerosis.

**A. Kidney**. See *Bright's Disease*.

**Arteriosity** (*ar-te-re-os'-il-e*) [ἀρτερία, trachea]. The quality of being arterial, or arterial.

THE ARTERIAL SYSTEM.

Schema for Head and upper extremity.

CONTINUED ON PLATE 2

# THE ARTERIAL SYSTEM. Schema for Trunk and Thigh.

From Peters Compend of Anatomy

# THE ARTERIAL SYSTEM

Schema for Leg.

From Foster's Compend of Anatomy

**Arteriostenosis** (*ar-te-re-o-ste-no'-sis*) [*ἀρτερία*, trachea; *στενός*, narrow]. The narrowing of the caliber of an artery in any part.

**Arteriotrepsis** (*ar-te-re-o-strept'-sis*) [*ἀρτερία*, trachea; *στρέψις*, a twisting]. The twisting of an artery for the purpose of staying a hemorrhage.

**Arteriotome** (*ar-te'-re-o-tom*) [*ἀρτερία*, trachea; *τέμνειν*, to cut]. A knife for use in arteriotomy.

**Arteriotomy** (*ar-te-re-o'-o-me*) [*ἀρτερία*, trachea; *τέμνειν*, to cut]. 1. The cutting or opening of an artery, as for the purpose of letting blood. 2. Dissection or anatomy of the arteries.

**Arterious** (*ar-te'-re-us*) [*ἀρτερία*, trachea]. Relating to anatomy or to the arteries; arterial.

**Arterio-venous** (*ar-te-re-o-ve'-nus*) [*ἀρτερία*, trachea; *vena*, vein]. Both arterial and venous; involving an artery and a vein, as an arterio-venous aneurysm.

**Arterio-version** (*ar-te-re-o-ver'-shun*) [*ἀρτερία*, trachea; *vertere*, to turn]. Weber's method of arresting hemorrhage by turning vessels inside out by means of an instrument called the *arterio-verter*.

**Arterio-verter**. See *Arterioversion*.

**Arteritis** (*ar-te-rit'-tis*) [*ἀρτηρία*, trachea; *ιτις*, inflammation]. Inflammation of an artery. The *acute form*, always local, is generally consecutive to trauma, thrombosis, or embolism, and may be purulent in character, and attended with ulceration; the *chronic*, more properly *Endarteritis*, *q. v.*, arterial sclerosis, leading to *atheroma* or *atheromatous changes*, is a frequent disease of the aged. **A. deformans**, the result of atheromatous changes producing crumpling or irregularities of the walls. See *Chronic Endarteritis*.

**A. obliterans**, great inflammatory development of the endothelium of an artery, resulting in obliteration of the lumen by thrombosis. See *Endarteritis obliterans*.

**Artery** (*ar'-ter-e*) [*arteria*;

*ἀρτηρία*, trachea]. Arteries are the tube-like vessels through which the blood is propelled by the heart to the peripheral organs. They end in arterioles and capillaries. They are composed of three layers: the outer, or *tunica adventitia*; the middle, or *tunica media*, the muscular coat; the internal, or *intima*, composed of nucleated epithelial cells, connective and elastic tissue. **A. Terminal**, an artery whose branches do not form anastomoses with other arteries. A table of the arteries is appended.

**Arthragra** (*ar-thra'-grah*) [*ἄρθρον*, a joint; *ἄγρα*, seizure]. Gout.

**Arthral** (*ar'-thral*) [*ἄρθρον*, a joint]. Articular; relating to an arthron.

**Arthralgia** (*ar-thra'-je-ah*) [*ἄρθρον*, a joint; *ἄλγος*, pain]. Pain in a joint; gout; arthritis; rheumatism.

**Arthralgic** (*ar-thra'-jik*) [*ἄρθρον*, a joint; *ἄλγος*, pain]. Relating to arthralgia.

**Arthrectomy** (*ar-threk'-to-me*) [*ἄρθρον*, a joint; *ἐκτομή*, a cutting out]. Surgical excision of a joint.

**Arthrelcosis** (*ar-threl-ko'-is*) [*ἄρθρον*, a joint; *ἐλκωσις*, ulceration]. Ulceration of a joint.

COATS OF A SMALL ARTERY. *a*, endothelium; *b*, internal elastic lamina; *c*, circular muscular fibers of the middle coat; *d*, the outer coat. (Landois.)

**Arthremia** (*ar-thre'-me-ah*) [*ἄρθρον*, a joint; *αἷμα*, blood]. A congested condition of a joint.

**Arthrempyema** (*ar-threm-pi-e'-mah*) [*ἄρθρον*, a joint; *ἐμπύημα*, suppuration]. Suppuration or abscess of a joint.

**Arthrempyesis** (*ar-threm-pi-e'-sis*). See *Arthrempyema*.

**Arthritic** (*ar-thrit'-ik*) [*ἄρθρον*, a joint]. Relating to arthritis or to gout.

**Arthritis** (*ar-thrit'-tis*) [*ἄρθρον*, a joint; *ιτις*, inflammation]. Inflammation of a joint. **A. chlorotica**. Synonym of *Enteritis pseudomembranosa*. **A. deformans**, chronic inflammation of a joint with deformity; rheumatoid arthritis. **A. fungosa**, scrofulous or tubercular disease of the joints; white swelling. **A. pauperum**. Synonym of *Rheumatoid arthritis*. **A. proliferating**. See *A. deformans*. **A. rheumatic**. *Chronic rheumatoid arthritis*; *Osteo-arthritis*; *Rheumatic gout*; *Nodular rheumatism*; *Arthritis deformans*; a chronic joint-affection characterized by inflammatory overgrowth of the articular cartilages and synovial membranes, with destruction of those parts of the cartilages subject to intra-articular pressure, and progressive deformity. The disease attacks those who present the rheumatic diathesis, and is chiefly seen in advanced life, though the young are not exempt. **A.**, rheumatoid. See *A. deformans*. **A. urtica**, arthritis due to gout.

**Arthritism** (*ar'-thrit-izm*) [*ἄρθρον*, a joint]. Gout or the gouty diathesis.

**Arthritolith** (*ar-thrit'-o-lith*) [*ἄρθρον*, a joint; *λίθος*, a stone]. Gouty calcareous deposit or concretion in or around a joint.

**Arthrobranchia** (*ar-thro-bran'-ke-ah*) [*ἄρθρον*, a joint; *βράγχια*, gills]. In biology, a branchial plume attached to the membranous articulation between the coxa and the body of decapod crustaceans.

**Arthroceae** (*ar-thro'-as-e*) [*ἄρθρον*, a joint; *κακός*, ill]. Fungous, strumous, or tuberculous arthritis.

**Arthroccology** (*ar-thro-kak-ol'-o-je*) [*ἄρθρον*, joint; *κάκη*, fault; *λογία*, science]. The sum of knowledge regarding joint-diseases.

**Arthrocele** (*ar'-thro-sel*, or *ar-thro-sel'-le*) [*ἄρθρον*, a joint; *κύημα*, a tumor]. Swelling of a joint, especially of a knee-joint in gonorrheal rheumatism.

**Arthrochondritis** (*ar-thro-kon-dri'-tis*) [*ἄρθρον*, a joint; *χόνδρος*, a cartilage; *ιτις*, inflammation]. Inflammation of the cartilaginous parts of a joint.

**Arthroclasia** (*ar-thro-kla'-se-ah*) [*ἄρθρον*, a joint; *κλάω*, to break]. The breaking down of ankyloses in order to produce free movement of a joint.

**Arthroclasy** (*ar'-thro-kla-se*). Same as *Arthroclasia*.

**Arthroderm** (*ar'-thro-derm*) [*ἄρθρον*, a joint; *δερμα*, skin]. The parietes of an arthropod.

**Arthrodesis** (*ar-thrad'-es-is*) [*ἄρθρον*, joint; *δέσς*, a binding]. Surgical fixation of paralyzed joints.

**Arthrodia** (*ar-thro'-de-ah*) [*ἄρθραδια*, a kind of articulation]. A form of joint permitting a gliding movement. See *Diarthrosis*.

**Arthrodial** (*ar-thro'-de-al*) [*ἄρθραδια*, a kind of articulation]. Pertaining to or of the nature of arthrodia.

**Arthrodynia** (*ar-thro-din'-e-ah*) [*ἄρθρον*, a joint; *ὀδύνη*, pain]. See *Arthralgia*.

**Arthrodynic** (*ar-thro-din'-ik*) [*ἄρθρον*, a joint; *ὀδύνη*, pain]. Relating to or affected by arthrodynia.

**Arthroempyesis** (*ar-thro-em-pi-e'-sis*) [*ἄρθρον*, a joint; *ἐμπύημα*, suppuration]. Suppuration in a joint.

**Arthrography** (*ar-thro'-ra-fe*) [*ἄρθρον*, a joint; *γράφειν*, to write]. A description of the joints.

**Arthrogryposis** (*ar-thro-grip'-o'-sis*) [*ἄρθρον*, a joint; *γρίπσις*, flexure]. 1. Permanent flexure of a joint; ankylosis. 2. Persistent idiopathic contracture of a joint. 3. Tetany or tetanilla.

## TABLE OF ARTERIES.

| NAME.   | ORIGIN.  | DISTRIBUTION.  | BRANCHES.  |
|---|--|--|--|
| Aberrant (from brachial or axillary).                               | Connect the brachial or axillary with the radial usually, at times with the ulnar or interosseous. |  |  |
| Acromial.   | Acromio-thoracic.  | Deltoid muscle (in part), assists in the formation of the acromial rete. |  |
| Acromial.   | Suprascapular.   | Acromial rete.   |  |
| Acromio-thoracic (thoracic axis)                                    | Second branch of first part of axillary.   | Shoulder, arm, upper anterior part of chest, and mammary gland.          | Acromial, humeral, pectoral, clavicular.   |
| Adipose.  | Thoracic aorta.  | Adipose tissue of heart.   |  |
| Afferent.   | Interlobular of kidneys.   | Glomeruli.   |  |
| Alar thoracic.  | Second part of axillary.   | Lymphatic glands in axilla.  |  |
| Alveolar (gingival)   | Posterior dental.  | The gums.  |  |
| Anastomotie (of external plantar).                                  | External plantar.  | Outer border of foot.  | Anastomoses with the tarsal and metatarsal branches of the dorsalis pedis.   |
| Anastomotie of internal plantar).                                   | Internal plantar.  | Inner side of foot.  | Anastomoses with internal tarsal branch of the dorsalis pedis.   |
| Anastomotie (of middle meningeal), also called <i>perforating</i> . | Middle meningeal.  | Around greater wing of sphenoid.   | Anastomose with deep temporal.   |
| Anastomotie (of sciatic).   | Sciatic.   | External rotator muscles of thigh.                                       | Assists in the formation of the crucial anastomosis.   |
| Anastomotica magna (of brachial).                                   | Brachial.  | Elbow.   | Posterior and anterior.  |
| Anastomotica magna (of superficial femoral).                        | Superficial femoral (in Hunter's canal).   | Knee.  | Superficial and deep   |
| Angular.  | The termination of the facial.   | Lachrymal sac and lower part of orbicularis palpebrarum.                 | Anastomoses with infraorbital.   |
| Anterior (of corpora quadrigemina).                                 | Posterior cerebral   | Anterior portion of corpora quadrigemina.                                |  |
| Anterior (of receptacle)  | Internal carotid.  | Dura mater of cavernous sinus and adjacent parts.                        |  |
| Antral.   | Posterior dental.  | Antrum of Highmore.  |  |
| Aorta, abdominal.   | Thoracic aorta.  | Two common iliacs.   | Phrenic (right and left), celiac axis, suprarenal or capsular (right and left), superior mesenteric, lumbar (four pairs), renal (right and left), spermatic (right and left), inferior mesenteric, right and left common iliac, middle sacral. |
| Aorta, arch.  | Left ventricle of heart.   | Thoracic aorta.  | Two coronary, innominate, left common carotid, left subclavian.  |
| Aorta, primitive.   | That portion from the origin to the point at which the first branch is given off.                  |  |  |
| Aorta, thoracic.  | Arch of aorta.   | Abdominal aorta.   | Two or three pericardiac, three bronchial, four or five esophageal, twenty intercostal, subcostal (or twelfth dorsal), diaphragmatic, aberrans.  |
| Aortæ, primitive (2).   | Cardiac (in the embryo).   | Pass through the first visceral arch.                                    | Unite to form the dorsal.  |
| Appendicular.   | Ilio-colic.  | Mesentery of vermiform appendix  |  |
| Articular, middle (of knee).  | Popliteal  | Crucial ligaments and joint.   |  |
| Articular, superior external (of knee).                             | Popliteal.   | Crureus and knee.  |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.                                     | ORIGIN.                                    | DISTRIBUTION   | BRANCHES   |
|---|--|--|--|
| Articular, superior, internal.            | Popliteal.                                 | Knee.  |  |
| Ascending.                                | External circumflex.                       | Deep structures of gluteal region and hip-joint.           |  |
| Asternal.                                 | Internal mammary.                          | Inner surface of costal cartilages.                        |  |
| Atrabiliary. See <i>Cap-sular</i> .       |  |  |  |
| Auditory, internal.                       | Basilar.                                   | Internal ear.  |  |
| Auricular.                                | Occipital.                                 | Pinna and concha.  |  |
| Auricular, anterior, inferior.            | Superficial temporal.                      | Auricle and external auditory meatus.                      |  |
| Auricular, anterior, superior.            | Superficial temporal.                      | Auricle and external meatus.                               |  |
| Auricular, deep.                          | Internal maxillary (first part).           | Membrana tympani and skin of external auditory meatus.     |  |
| Auricular, left.                          | Left coronary artery.                      | Left auricle, pulmonary artery, and commencement of aorta. |  |
| Auricular, posterior.                     | Fifth branch of external carotid.          | Back of auricle, scalp, and part of neck.                  | Parotid, muscular, stylo-mastoid, anterior terminal or auricular, and posterior terminal or mastoid.               |
| Auricular, right.                         | Right coronary artery.                     | Right auricle, aorta, auricular septum.                    |  |
| Axillary.                                 | Subclavian.                                | Brachial and seven branches.                               | Superior thoracic, acromio-thoracic, long thoracic, alar thoracic, subscapular, anterior and posterior circumflex. |
| Azygos (articular, of external plantar).  | External plantar.                          | Articulations of tarsus.                                   |  |
| Azygos (articular, of internal plantar).  | Internal plantar.                          | Articulations on inner side of foot.                       | Anastomoses with branches of external plantar.   |
| Azygos (articular, of popliteal).         | Popliteal.                                 | Knee.  |  |
| Azygos (articular, of sciatic).           | Sciatic.                                   | Posterior part of capsule of hip-joint.                    |  |
| Azygos (articular, of superior profunda). | Superior profunda.                         | Elbow-joint, posterior part.                               | Anastomoses with anastomotica magna and interosseous recurrent.  |
| Azygos (articular, of suprascapular).     | Suprascapular.                             | The acromio-clavicular and shoulder joints.                |  |
| Azygos (articular, of temporal).          | Temporal.                                  | Temporo-maxillary joint.                                   |  |
| Basilar.                                  | By confluence of right and left vertebral. | Brain.   | Transverse (or pontile), internal auditory, anterior cerebellar, superior cerebellar, two posterior cerebral.      |
| Bicipital (or ascending).                 | Anterior circumflex.                       | Long tendon of biceps and shoulder-joint.                  |  |
| Brachial.                                 | Axillary.                                  | Arm and forearm.   | Superior and inferior profunda, anastomotica magna, nutrient, muscular, radial and ulnar.                          |
| Brachio-cephalic.                         | See <i>Innominate</i> .                    |  |  |
| Bronchial (inferior).                     | Thoracic aorta.                            | Bronchi and parenchyma of the lungs.                       |  |
| Bronchial (superior).                     | Arch of aorta.                             | Bronchi.   |  |
| Buccal.                                   | Facial.                                    | Muscles of cheek.  | Anastomoses with buccal branch of internal maxillary, the transverse facial and infraorbital.                      |
| Buccal.                                   | Internal maxillary.                        | Buccinator muscle and mucous membrane of mouth.            | Anastomoses with the buccal branch of the facial, the transverse facial and infraorbital.                          |
| Buccal.                                   | Posterior dental.                          | Buccinator muscle.   |  |
| Of the bulb.                              | First part of internal pudic.              | Erectile tissue of the bulb and the corpus spongiosum.     |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION.  | BRANCHES.  |
|---|--|--|--|
| Calcanean, external and internal.                       | Peroneal.  | Over the os calcis and surrounding soft parts.                         |  |
| Calcanean, inferior (of external plantar).              | External plantar.  | Over inner surface of os calcis.                                       | Anastomoses with internal calcanean of peroneal.   |
| Calcanean, middle.                                      | Posterior tibial.  | Os calcis.   |  |
| Callosal.   | See <i>Calloso-marginal</i> .                            |  |  |
| Calloso-marginal.                                       | Anterior cerebral.                                       | Callosal and upper part of marginal convolutions.                      |  |
| Capsular (or atrabiliary).                              | Abdominal aorta.   | Suprarenal capsule.  |  |
| Capsular.   | See <i>Perirenal</i> .                                   |  |  |
| Cardiac.  | Gastric.   | Cardiac end of stomach.  |  |
| Cardiac, right. See <i>Coronary, right (of heart)</i> . |  |  |  |
| Carotid, common.  | <i>Right side</i> , innominate; <i>left side</i> , arch. | External and internal carotid.   | External and internal carotid.   |
| Carotid, external.                                      | Common carotid.  | Anterior part of neck, face, side of head, integuments and dura mater. | Ascending pharyngeal, superior thyroid, lingual, facial, occipital, posterior auricular, temporal, internal maxillary.   |
| Carotid, internal.                                      | Common carotid.  | Greater part of brain, the orbit, internal ear, forehead, and nose.    | Tympanic, vidian, arteria receptaculi, pituitary, gasserian, meningeal, ophthalmic, posterior communicating, anterior choroid, anterior cerebral, middle cerebral. |
| Carotid, primitive. See <i>Carotid, common</i> .        |  |  |  |
| Carotid, superficial. See <i>Carotid, external</i> .    |  |  |  |
| Carpal.   | Radial.  | Branches to lower end of radius, wrist, and carpal-joints.             | Enters into formation of anterior carpal rete.   |
| Carpal.   | Ulnar.   | Carpus.  | Enters into formation of the posterior carpal rete.  |
| Caudate.  | Middle cerebral.   | Head of caudate nucleus.   |  |
| Caval.  | Right phrenic.   | Vena cava.   |  |
| Cecal, anterior.  | Inferior mesenteric.                                     | Anterior surface of cecum.   |  |
| Cecal, posterior.                                       | Posterior mesenteric.                                    | Posterior part of cecum.   |  |
| Celiac.   | Abdominal aorta.   | Stomach, duodenum, spleen, pancreas, liver and gall-bladder.           | Gastric, hepatic, splenic.   |
| Central (of retina).                                    | Ophthalmic.  | Retina.  |  |
| Central, of Zinn. See <i>Central (of retina)</i> .      |  |  |  |
| Cerebellar, anterior.                                   | Basilar.   | Anterior inferior surface of cerebellum.                               |  |
| Cerebellar, inferior.                                   | Vertebral.   | Vermiform process, and cortex of cerebellum.                           | Inferior vermiform and the hemispherical.  |
| Cerebellar, superior.                                   | Basilar.   | Superior vermiform process and circumference of cerebellum.            | Superior vermiform and hemispherical.  |
| Cerebral, anterior.                                     | Internal carotid.  | Anterior portion of cerebrum.  | Anterior communicating, ganglionic (or central), commissural, hemispherical (or cortical).   |
| Cerebral, inferior.                                     | See <i>Cerebral, posterior</i> .                         |  |  |
| Cerebral, middle.                                       | Internal carotid.  | Middle portion of cerebrum.  | Ganglionic (or central), hemispherical (or cortical).  |
| Cerebral, posterior.                                    | Basilar.   | Temporo-sphenoidal and occipital lobes.                                | Ganglionic (or central), and hemispherical (or cortical).  |
| Cervical.   | Uterine.   | Cervix uteri.  |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                                    | DISTRIBUTION.   | BRANCHES.  |
|--|--|---|--|
| Cervical, anterior. See <i>Thyroid, anterior.</i>  |  |   |  |
| Cervical, ascending.                               | Inferior thyroid.                          | Deep muscles of neck and spinal canal.  | Muscular, spinal and phrenic.                    |
| Cervical, deep.                                    | Superior intercostal.                      | Deep muscles of neck and spinal canal.  | Muscular, anastomotic, vertebral (or spinal).    |
| Cervical, descending.                              | Deep cervical.                             | Tissues of neck.  |  |
| Cervical, superficial.                             | Transverse cervical.                       | Trapezius, levator anguli scapulae, splenius muscles and posterior chain of lymphatic glands. |  |
| Cervical, transverse (transversalis colli).        | Thyroid axis.                              | Posterior cervical and scapular regions.  | Posterior scapular and superficial cervical.     |
| Chiasmic.  | Anterior cerebral.                         | First portion of optic nerve.   |  |
| Choroid, anterior.                                 | Internal carotid.                          | Hippocampus major and corpus fibriatum.   |  |
| Choroid, posterior.                                | Posterior cerebral.                        | Velum interpositum and joins the choroid plexus.  |  |
| Ciliary, short and long, posterior and anterior.   | Ophthalmic.                                | The eye.  |  |
| Circular, of uterus.                               | Uterine.                                   | Cervix uteri.   |  |
| Circumflex, anterior (of axillary).                | Axillary.                                  | Pectoralis major, biceps, and shoulder-joint.   | Bicipital and pectoral.                          |
| Circumflex, external.                              | Profunda femoris.                          | Muscles of thigh.   | Ascending, transverse, and descending.           |
| Circumflex iliac, deep.                            | External iliac.                            | Upper part of thigh and lower part of abdomen.  | Muscular and cutaneous.                          |
| Circumflex iliac, superficial.                     | Common femoral.                            | Iliacus and sartorius muscles, inguinal glands, and skin of thigh.                            |  |
| Circumflex, internal.                              | Profunda femoris.                          | Muscles of thigh.   |  |
| Circumflex, posterior (of axillary).               | Axillary.                                  | Deltoid, teres minor, triceps, and shoulder-joint.  | Nutrient, articular, acromial, muscular.         |
| Clavicular.  | Acromio-thoracic.                          | Subclavius muscle.  |  |
| Of the clitoris, cavernous.                        | Internal pudic (in the female).            | Corpus cavernosum of clitoris.  |  |
| Of the clitoris, profunda.                         | See <i>A., of the clitoris (cavernous)</i> |   |  |
| Coccygeal.   | Sciatic.                                   | Integument over lower part of sacrum and coccyx.  |  |
| Cochlear.  | Internal auditory.                         | Cochlea.  |  |
| Colic, left.                                       | Inferior mesenteric.                       | Colon, descending.  |  |
| Colic, middle.                                     | Superior mesenteric.                       | Transverse colon.   |  |
| Colic, right.                                      | Superior mesenteric.                       | Colon, ascending.   |  |
| Colic, transverse.                                 | Colic, middle.                             | Transverse colon.   |  |
| Comes nervi phrenici. See <i>Phrenic, superior</i> |  |   |  |
| Commissural.                                       | Anterior cerebral.                         | Callosum.   |  |
| Communicating.                                     | Dorsalis pedis.                            | Enters into formation of plantar arch.  | The fifth plantar digital, or princeps hallucis. |
| Communicating.                                     | Occipital.                                 | Muscles of posterior part of neck.  | Anastomoses with branches of the vertebral.      |
| Communicating (or perforating).                    | Deep palmar arch.                          | Join proximal ends of metacarpal and second and third dorsal interosseous arteries.           |  |
| Communicating.                                     | Peroneal.                                  | Anastomoses with communicating branch of posterior tibial.                                    |  |
| Communicating.                                     | Posterior tibial.                          | Anastomoses with communicating of peroneal.   |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION  | BRANCHES.   |
|---|--|---|---|
| Communicating, anterior.  | Anterior cerebral.   | Assists in formation of anterior boundary of circle of Willis; sends branches to caudate nucleus. |   |
| Communicating, posterior.   | Posterior carotid.   | Enters into formation of circle of Willis; uncinate convolution and optic thalamus.               | Uncinate, middle thalamic.  |
| Coronary. See <i>Gastric</i> .  |  |   |   |
| Coronary, inferior.   | Facial.  | Lower lip.  |   |
| Coronary, left.   | Left anterior sinus of Valsalva.                                       | Heart.  | Left auricular, anterior interventricular, left marginal, terminal.                           |
| Coronary, right.  | Right anterior sinus of Valsalva.                                      | Heart.  | Right auricular, preinterventricular, right marginal, posterior interventricular, transverse. |
| Coronary, right, of stomach. See <i>Pyloric</i> .                     |  |   |   |
| Coronary, superior.   | Facial.  | Upper lip.  | Arteria septum narium.  |
| Of the corpus cavernosum.   | Dorsal artery of the penis.  | Corpus cavernosum.  |   |
| Costo-cervical.   | That part of superior intercostal between its origin and first branch. |   |   |
| Cremasteric.  | Deep epigastric.   | Cremaster muscle.   |   |
| Cremasteric.  | Spermatic.   | Cremaster muscle.   | Anastomoses with cremasteric from deep epigastric.  |
| Cremasteric. See <i>Spermatic, external</i> .                         |  |   |   |
| Crico-thyroid.  | See <i>Laryngeal, inferior</i>   |   |   |
| Crural, see <i>Femoral</i> .  |  |   |   |
| Cubital, see <i>Ulnar</i> .   |  |   |   |
| Cubital recurrent, anterior. See <i>Ulnar recurrent, anterior</i> .   |  |   |   |
| Cubital recurrent, posterior. See <i>Ulnar recurrent, posterior</i> . |  |   |   |
| Cystic.   | Hepatic.   | Gall-bladder.   |   |
| Deferential.  | Superior vesical.  | Vas deferens.   |   |
| Dental, anterior.   | Infraorbital.  | Incisor and canine teeth, and mucous membrane of antrum.  |   |
| Dental, inferior.   | See <i>Mandibular</i> .  |   |   |
| Dental, posterior (or alveolar).                                      | Internal maxillary.  | Antrum, teeth, gums, and cheek.   | Antral, dental, alveolar, buccal.   |
| Dental, superior.   | Posterior dental.  | Molar and bicuspid teeth of superior maxilla.   |   |
| Descending.   | External circumflex.   | Muscles of thigh.   |   |
| Descending, superficial.  | External carotid.  | Neck.   |   |
| Diaphragmatic.  | Thoracic aorta.  | Diaphragm.  |   |
| Digital.  | External plantar.  | Outer side of the 2d and 3d, 4th and 5th toes.  |   |
| Digital, palmar.  | Superficial palmar arch.   | Both sides of little, ring, and middle finger and ulnar side of index finger.                     |   |
| Digital, plantar. See <i>Communicating, of dorsalis pedis</i> .       |  |   |   |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                          | DISTRIBUTION.  | BRANCHES.   |
|--|----------------------------------|--|---|
| Digital, superficial.  | Internal plantar.                | Toes.  |   |
| Diploic.   | Supraorbital.                    | Diploë of frontal sinuses.   |   |
| Dorsal.  | Intercostal.                     | Spine and muscles of throat.   | Spinal and muscular.  |
| Dorsal.  | Lumbar.                          | Muscles of back.   |   |
| Dorsal, interosseous.  | Radial.                          | Contiguous of 2d, 3d, 4th, and 5th toes.                                   |   |
| Dorsal (of penis).   | Termination of pudic.            | Penis.   |   |
| Dorsal (scapular).   | Subscapular.                     | Muscles of scapula and shoulder-joint.                                     | Infrascapular.  |
| Dorsal of tongue.  | Lingual.                         | Dorsum of tongue, tonsils, and epiglottis.                                 |   |
| Dorsal (12th). See <i>Subcostal</i> .                                  |                                  |  |   |
| Dorsalis hallucis.   | Continuation of dorsalis pedis   | Great and second toe.  |   |
| Dorsalis indicis.  | Radial.                          | Index finger.  |   |
| Dorsalis linguæ.   | Lingual.                         | Mucous membrane of tongue, pillars of fauces and tonsils.                  |   |
| Dorsalis pedis.  | Continuation of anterior tibial. | Assists to form plantar arch.  | Tarsal, metatarsal, dorsalis hallucis, communicating.   |
| Dorsalis pollicis.   | Radial.                          | Thumb.   |   |
| Dorso-scapular.  | See <i>Scapular, superior</i> .  |  |   |
| Duodenal, superior, right. See <i>Pancreatico-duodenal, superior</i> . |                                  |  |   |
| Duodeno-gastric.   | See <i>Gastro-duodenal</i> .     |  |   |
| Dural.   | See <i>Meningeal</i> .           |  |   |
| Emulgent.  | See <i>Renal</i> .               |  |   |
| Epicondyloid. See <i>Ulnar</i> .                                       |                                  |  |   |
| Epididymal.  | Spermatic.                       | Epididymis.  |   |
| Epigastric, deep (or inferior).  | External iliac.                  | Abdominal wall.  | Cremasteric, pubic, muscular, cutaneous, terminal.  |
| Epigastric, superficial.   | Common femoral.                  | Inguinal glands, skin, superficial fascia, and abdominal wall.             |   |
| Epigastric, superior.  | Internal mammary.                | Abdominal wall and diaphragm, liver and peritoneum.                        | Phrenic, xiphoid, cutaneous, muscular, hepatic and peritoneal.  |
| Epiplœic.  | Right and left gastro-epiploic.  | Omentum.   |   |
| Epiplœic. See <i>Omental</i> .   |                                  |  |   |
| Esophageal.  | Gastric.                         | Esophagus.   |   |
| Esophageal.  | Inferior thyroid.                | Esophagus.   |   |
| Esophageal.  | Left phrenic.                    | Esophagus.   |   |
| Esophageal (4 or 5).   | Thoracic aorta.                  | Esophagus.   |   |
| Esophageal, inferior.  | Coronary (of stomach).           | Esophagus.   |   |
| Ethmoidal, anterior.   | Ophthalmic.                      | Part of anterior portion of brain, nose, frontal sinuses and skin of face. | Ethmoidal, meningeal, nasal, frontal, cutaneous.  |
| Ethmoidal, posterior.  | Ophthalmic.                      | Posterior ethmoidal cells, dura mater, nose.                               | Ethmoidal, meningeal, nasal.  |
| Eustachian.  | Pterygo-palatine.                | Eustachian tube.   |   |
| Facial.  | Third branch external carotid.   | Pharynx and face.  | Ascending, or inferior palatine, tonsillar, glandular, muscular, submental, masseteric, buccal, inferior labial, inferior and superior coronary, lateralis nasi, angular. |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                                    | DISTRIBUTION.  | BRANCHES.  |
|--|--|--|--|
| Facial, transverse.                                | Temporal.                                  | Parotid gland, masseter muscle, skin of face.                    |  |
| Fallopian.   | Ovarian.                                   | Isthmus, ampulla and fimbriated extremity of fallopian tube.     |  |
| Femoral, common.                                   | Continuation of external iliac.            | Lower part of abdominal wall, upper part of thigh and genitalia. | Superficial epigastric, superficial circumflex iliac, superficial external pudic, deep external pudic, profunda. |
| Femoral, deep. See <i>Femoral, profunda.</i>       |  |  |  |
| Femoral, profunda.                                 | Common femoral.                            | Muscles of thigh.  | External circumflex, internal circumflex and three perforating.  |
| Femoral, superficial.                              | Continuation of common femoral.            | Muscles of thigh and knee-joint.                                 | Muscular, saphenous, anastomotica magna.   |
| Fibular, superior.                                 | Anterior or posterior tibial or popliteal. | Soleus and peroneus tertius muscles and integument.              |  |
| Of the frenum linguæ.                              | Sublingual.                                | Frenum of tongue.  |  |
| Frontal, anterior.                                 | Anterior cerebral.                         | Inferior frontal convolutions.                                   |  |
| Frontal, ascending.                                | Middle cerebral.                           | Lower part of ascending frontal convolution.                     |  |
| Frontal, internal.                                 | Anterior cerebral.                         | Inferior frontal convolutions.                                   |  |
| Frontal, middle.                                   | See <i>Medifrontal.</i>                    |  |  |
| Funicular.   | Superior vesical.                          | Round ligament.  |  |
| Gasserian.   | Internal carotid.                          | Gasserian ganglion.  |  |
| Gasserian.   | Middle meningeal.                          | Gasserian ganglion, and Meckel's space.                          |  |
| Gastric (or coronary).                             | Celiac axis.                               | Stomach, liver, and esophagus.                                   | Esophageal, cardiac, gastric, and hepatic.   |
| Gastric, right. See <i>Gastro-epiploic, right.</i> |  |  |  |
| Gastro-duodenal.                                   | Hepatic.                                   | Stomach and duodenum.  | Right gastro-epiploic and superior pancreatico-duodenal.   |
| Gastro-epiploic, left.                             | Splenic.                                   | Stomach and omentum.   |  |
| Gastro-epiploic, right                             | Gastro-duodenal.                           | Stomach and omentum.   |  |
| Gastro-hepatic.                                    | See <i>Coronary, of stomach.</i>           |  |  |
| Geniculate.  | Posterior cerebral.                        | Geniculate convolution.  |  |
| Genital.   | See <i>Pudic, internal.</i>                |  |  |
| Gingival. See <i>Alveolar.</i>                     |  |  |  |
| Glandular.   | Facial.                                    | Submaxillary gland.  |  |
| Glaserian (or tympanic).                           | Internal maxillary.                        | Lining membrane of tympanum and laxator tympani muscle.          |  |
| Gluteal.   | Internal iliac, posterior division.        | Pelvic and glutei muscles, etc.                                  | Muscular, superficial and deep.  |
| Gluteal, deep.                                     | Gluteal.                                   | Deep muscles of posterior gluteal region.                        |  |
| Gluteal, inferior.                                 | Sciatic.                                   | Glutens maximus.   |  |
| Gluteal, superficial.                              | Gluteal.                                   | Gluteus maximus and integument over sacrum.                      |  |
| Gluteal, superior.                                 | Deep gluteal.                              | Muscles adjacent.  |  |
| Gustatory (or lingual).                            | Inferior dental.                           | Lingual nerve.   |  |
| Guttural, superior. See <i>Thyroid, superior.</i>  |  |  |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.  | DISTRIBUTION.   | BRANCHES.  |
|--|--|---|--|
| Gutturo-maxillary. See <i>Maxillary, internal.</i>             |  |   |  |
| Helicine.  |  | The arteries found in cavernous tissue, as in the uterus, ovary, etc.                 |  |
| Hemispherical.   | Inferior cerebellar.                               | Cortex of cerebellum.   |  |
| Hemispherical.   | Superior cerebellar.                               | Cortex of cerebellum.   |  |
| Hemorrhoidal, inferior (or external).                          | Pudic.   | Sphincter muscle, levator ani.  |  |
| Hemorrhoidal, internal. See <i>Hemorrhoidal, superior.</i>     |  |   |  |
| Hemorrhoidal, middle (rectal, middle).                         | Internal iliac, anterior division.                 | Middle part of rectum.  |  |
| Hemorrhoidal, superior.  | Inferior mesenteric.                               | Upper part of rectum.   |  |
| Hepatic.   | Celiac axis.                                       | Liver, pancreas, part of duodenum, and stomach.                                       | Pancreatic, sub-pyloric, gastro-duodenal, right and left terminal.   |
| Hepatic.   | Gastric.   | Left lobe of liver.   |  |
| Hepatic.   | Right phrenic.                                     | Liver.  |  |
| Hepatic.   | Superior epigastric.                               | Liver.  |  |
| Hepatic, right.  | Hepatic.   | Liver substance.  | Cystic.  |
| Humeral. See <i>Brachial.</i>                                  |  |   |  |
| Humeral, thoracic.   | Acromio-thoracic.                                  | Pectoralis major, deltoid and adjacent integuments.                                   | Anastomoses with anterior and posterior circumflex.  |
| Humeral, transverse. See <i>Suprascapular.</i>                 |  |   |  |
| Hyaloid. Central artery of retina.                             | Crystalline lens.                                  |   |  |
| Hyoid. See <i>Infra-hyoid</i> and <i>Supra-hyoid.</i>          |  |   |  |
| Hypogastric.   | Continuation of anterior branch of internal iliac. | Vesical branches, impervious in the adult.  |  |
| Ileo-colic.  | Superior mesenteric.                               | Cecum and adjacent bowel.   |  |
| Iliac.   | Ilio-lumbar.                                       | Iliac fossa and ilium.  |  |
| Iliac.   | Obturator.   | Ilium.  |  |
| Iliac, circumflex deep. See <i>Circumflex iliac, deep.</i>     |  |   |  |
| Iliac, circumflex, superficial.                                | See <i>Circumflex iliac, superficial.</i>          |   |  |
| Iliac, common.   | Terminal branch of abdominal aorta.                | Peritoneum, subperitoneal fat, ureter, and terminates in external and internal iliac. | Peritoneal, subperitoneal, ureteric, external and internal iliac.  |
| Iliac, external.   | Common iliac.                                      | Lower limb  | Deep epigastric, deep circumflex iliac, muscular, and continues as femoral.  |
| Iliac, external, small. See <i>Circumflex iliac, external.</i> |  |   |  |
| Iliac, internal.   | Common iliac.                                      | Pelvic and generative organs, and inner side of thigh.                                | Anterior and posterior trunk.  |
| Iliac, internal, anterior trunk.                               | Internal iliac.                                    | Pelvic and generative organs and thigh.   | Hypogastric, superior middle and vesical, middle hemorrhoidal, uterine, vaginal, obturator, sciatic, internal pudic. |
| Iliac, internal, posterior trunk.                              | Internal iliac.                                    | Muscles of hip and sacrum.  | Ilio-lumbar, lateral sacral and gluteal.   |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                          | DISTRIBUTION.   | BRANCHES.  |
|--|----------------------------------|---|--|
| Iliac, primary. See<br><i>Iliac, common.</i>                                   |                                  |   |  |
| Iliac, primitive. See<br><i>Iliac, common.</i>                                 |                                  |   |  |
| Ilio-lumbar.   | Internal iliac, posterior trunk. | Muscles of pelvis and pelvic bones.                             | Iliac and lumbar.  |
| Incisive.  | Mandibular.                      | Incisor teeth.  |  |
| Infracostal, labial.   | Internal mammary.                | Ribs.   |  |
| Infrathyoid  | Superior thyroid.                | Infrathyoid bursa and thyro-hyoid muscle.                       |  |
| Infraorbital.  | Internal maxillary.              | Upper lip, lower eye-lid, lachrymal sac, side of nose.          | Orbital, anterior dental, nasal.   |
| Infrascapular.   | Dorsal scapular.                 | Subscapularis, scapula, and shoulder-joint.                     |  |
| Infraspinous.  | Posterior scapular.              | Infraspinous fossa.   |  |
| Intraspinous.  | Suprascapular.                   | Infraspinous fossa.   |  |
| Innominate.  | Arch of aorta.                   | Right side of head and right arm.                               | Right common carotid, right subclavian, occasionally thyroidea ima.                      |
| Intercostal, anterior.   | Internal mammary.                | Intercostal muscles, ribs (upper 5 or 6), and pectoralis major. |  |
| Intercostal, anterior.   | Musculo-phrenic.                 | Lower 5 or 6 intercostal spaces.                                |  |
| Intercostal, aortic. to pairs.   | Thoracic aorta.                  | Lower intercostal spaces.                                       | Dorsal, intercostal collateral, pleural, muscular, lateral cutaneous, mammary glandular. |
| Intercostal, first.  | Superior intercostal.            | First intercostal space.  |  |
| Intercostal, superior.   | Subclavian.                      | Neck and upper part of thorax.                                  | Deep cervical, first intercostal, arteria aberrans.                                      |
| Interlobular (of kidney).  | Renal.                           | Malpighian bodies and uriniferous tubules.                      |  |
| Interosseous, anterior   | Interosseous (common).           | Muscles of forearm.   |  |
| Interosseous, common.  | Ulnar.                           | Interosseous membrane and deep muscles of the forearm.          | Anterior and posterior interosseous.   |
| Interosseous, dorsal (3).  | Metatarsal.                      | Contiguous sides of 2d and 3d, and 4th and 5th toes.            |  |
| Interosseous, dorsal.  | Posterior radial carpal.         | Dorsal aspect of fingers.                                       |  |
| Interosseous, palmar (3).  | Deep palmar arch.                | Interosseous muscles, bones, and 2d, 3d, and 4th lumbricales.   |  |
| Interosseous, plantar.   | Plantar arch.                    | Toes.   |  |
| Interosseous, posterior (forearm).   | Common interosseous.             | Muscles, back of forearm.                                       | Posterior interosseous recurrent.  |
| Interosseous, posterior, recurrent. See<br><i>Radial recurrent, posterior.</i> |                                  |   |  |
| Interosseous, recurrent.   | Interosseous, posterior.         | Elbow-joint.  |  |
| Interpeduncular.   | Posterior cerebral.              | Posterior perforated space and lower part of peduncles.         |  |
| Interventricular, anterior.  | Left coronary.                   | Both ventricles and interventricular septum.                    |  |
| Interventricular, posterior.   | Right coronary.                  | Both ventricles and interventricular septum.                    |  |
| Intestinal (vasa intestinali tenuis), 12 to 16.                                | Superior mesenteric.             | Mesentery.  |  |
| Ischiadic. See <i>Gluteal, inferior.</i>                                       |                                  |   |  |
| Labial, inferior.  | Facial.                          | Muscles and integuments of lower lip.                           |  |

| NAME.   | ORIGIN.                              | DISTRIBUTION.  | BRANCHES.  |
|---|--------------------------------------|--|--|
| Labial, superior.                                       | See <i>Coronary, superior.</i>       |  |  |
| Lachrymal (or orbital).                                 | Middle meningeal.                    | Orbit.   |  |
| Lachrymal.  | Nasal.                               | Lachrymal sac.   |  |
| Lachrymal.  | Ophthalmic.                          | Lachrymal gland, muscles of eye and cheek, and upper and lower eyelids.    | Recurrent lachrymal, muscular, palpebral, malar, ciliary.  |
| Lachrymal, recurrent.                                   | Lachrymal.                           | Lachrymal sac.   |  |
| Laryngeal, inferior.                                    | Inferior thyroid                     | Larynx.  |  |
| Laryngeal, inferior (or crico-thyroid).                 | Superior thyroid.                    | Crico-thyroid membrane and larynx.   |  |
| Laryngeal, internal.<br>See <i>Laryngeal, superior.</i> |                                      |  |  |
| Laryngeal, superior.                                    | Superior thyroid.                    | Intrinsic muscles and mucous membrane of larynx                            |  |
| Lenticular.   | Middle cerebral.                     | Lenticular nucleus.  |  |
| Lenticulo-optic.  | Middle cerebral.                     | Posterior part internal capsule and anterior part of optic thalamus.       |  |
| Lenticulo-striate.                                      | Middle cerebral.                     | Lenticular and caudate nuclei.   |  |
| Lenticulo-thalamic.                                     | Posterior cerebral.                  | Posterior extremity of lenticular nucleus and the thalamus.                |  |
| Ligamentous.  | Ovarian.                             | Round ligament.  |  |
| Lingual. See <i>Gustatory.</i>                          |                                      |  |  |
| Lingual.  | External carotid.                    | Tongue.  | Hyoid, dorsalis linguæ, sublingual, ranine.  |
| Lingual.  | Mandibular.                          | Lingual nerve.   |  |
| Lumbar (4 pairs).                                       | Abdominal aorta.                     | Bodies and ligaments of vertebræ, lumbar muscles, and capsules of kidneys. | Vertebral, muscular, dorsal, renal.  |
| Lumbar.   | Ilio-lumbar.                         | Psoas muscle, quadratus lumborum, and spinal canal.                        |  |
| Malar.  | Lachrymal.                           | Temporal fossa.  |  |
| Malleolar, external.                                    | Anterior tibial.                     | External portion of ankle.   |  |
| Malleolar, internal.                                    | Anterior tibial.                     | Internal portion of ankle.   |  |
| Malleolar, internal.                                    | Posterior tibial.                    | Internal malleolus.  |  |
| Mammary, external.<br>See <i>Thoracic, long.</i>        |                                      |  |  |
| Mammary glandular.                                      | Dorsal branch of aortic intercostal. | Mammary gland.   |  |
| Mammary, internal.                                      | Subclavian.                          | Structures of thorax.  | Superior phrenic, mediastinal (or thymic), pericardiac, sternal, anterior intercostals, perforating, lateral infracostal, superior epigastric, internal mammary. |
| Mandibular.   | Internal maxillary.                  | Teeth of lower jaw.  | Incisive and mental.   |
| Marginal.   | Left coronary.                       | Walls of ventricle.  |  |
| Marginal.   | Right coronary.                      | Right ventricle.   |  |
| Margino-frontal.  | Anterior cerebral.                   | Marginal and frontal convolutions.   |  |
| Masseteric.   | Facial.                              | Masseter.  |  |
| Masseteric.   | Internal maxillary.                  | Masseter.  |  |
| Masseteric.   | Temporal.                            | Masseter.  |  |
| Mastoid.  | Occipital.                           | Dura, diploë, walls of lateral sinus, mastoid cells.                       |  |

TABLE OF ARTERIES.—*Continued.*

| NAME   | ORIGIN.  | DISTRIBUTION.   | BRANCHES.   |
|--|--|---|---|
| Mastoid  | Posterior auricular.                             | Occipito-frontalis muscle (posterior belly).  |   |
| Mastoid.   | Stylo-mastoid.                                   | Mastoid cells and mastoid antrum.   |   |
| Mastoid, middle. See <i>Sterno-mastoid.</i>                          |  |   |   |
| Maxillary, external. See <i>Facial.</i>                              |  |   |   |
| Maxillary, inferior. See <i>Dental, inferior.</i>                    |  |   |   |
| Maxillary, internal (maxillary group).                               | External carotid.                                | Structures indicated by names of branches.  | Deep auricular, tympanic, middle meningeal, mandibular, small meningeal.  |
| Maxillary, internal (pterygoid group).                               | External carotid.                                | Structures indicated by names of branches.  | Masseteric, posterior deep temporal, internal and external pterygoid, buccal, anterior deep temporal.                                 |
| Maxillary, internal (sphenomaxillary group).                         | External carotid.                                | Structures indicated by names of branches.  | Posterior dental (or alveolar), infraorbital, posterior (or descending) palatine, vidian, pterygo-palatine, nasal, or sphenopalatine. |
| Meatal.  | Stylo-mastoid.                                   | External auditory meatus.   |   |
| Median (arteria comes nervi mediani).                                | Anterior interosseous.                           | Median nerve and superficial palmar arch.   |   |
| Median anterior (of spinal cord).                                    | Formed by union of the anterior spinal arteries. | Spinal cord.  |   |
| Mediastinal, anterior (or thymic).                                   | Internal mammary.                                | Connective tissue, fat and lymphatics, in superior and anterior mediastina, thymus gland. |   |
| Mediastinal, posterior (several).                                    | Thoracic aorta.                                  | Glands and loose areolar tissue in mediastinum.   |   |
| Medicerebellar.  | Cerebellar, anterior, inferior.                  | Middle cerebellar crus.   |   |
| Medicerebral. See <i>Cerebral, middle.</i>                           |  |   |   |
| Medichoroid.   | See <i>Choroid, posterior</i>                    |   |   |
| Medidural. See <i>Meningeal, middle.</i>                             |  |   |   |
| Medifrontal.   | Anterior cerebral.                               | Callosal convolution and paracentral lobule.  |   |
| Medioptic (or median quadrigeminal)                                  | Posterior cerebral.                              | Crus cerebri and optic lobes.   |   |
| Medullary.   | Peroneal.  | Fibula.   |   |
| Medullary.   | Posterior tibial.                                | Tibia   | Ascending and descending.   |
| Medullary.   | Renal.   | Malpighian pyramids.  |   |
| Meningeal.   | Ascending pharyngeal.                            | Membranes of brain.   |   |
| Meningeal.   | Posterior ethmoidal.                             | Dura mater.   |   |
| Meningeal, anterior.   | Internal carotid.                                | Dura mater.   |   |
| Meningeal, inferior. See <i>Meningeal (of ascending pharyngeal).</i> |  |   |   |
| Meningeal, middle or great.  | Internal maxillary.                              | Cranium and dura mater.   | Anterior and posterior.   |
| Meningeal, posterior.  | Occipital.                                       | Dura mater.   |   |
| Meningeal, posterior.  | Vertebral.                                       | Dura mater.   |   |
| Meningeal, small.  | Internal maxillary.                              | Gasserian ganglion, walls of cavernous sinus and dura mater.                              |   |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION.   | BRANCHES   |
|---|--|---|--|
| Mental.   | Facial.  | Muscles of chin and lower lip.  |  |
| Mental.   | Mandibular.                                    | Muscles of chin and under lip.  | Lingual and mylo-hyoidean.   |
| Mesenteric accedens, præcipua. See <i>Mesenteric, superior.</i> |  |   |  |
| Mesenteric, inferior.   | Abdominal aorta.                               | Lower half of large intestine.  | Left colic, sigmoid, superior hemorrhoidal.  |
| Mesenteric, middle.   | Common iliac (occasional branch).              | Transverse and descending colon.  |  |
| Mesenteric, superior.   | Abdominal aorta.                               | Whole of small intestine and upper half of large.   | Inferior pancreatico-duodenal, middle right and ilio-colic, vasa intestina tenuis. |
| Meso-lobar. See <i>Cerebral, anterior.</i>                      |  |   |  |
| Metacarpal (1st dorsal interosseous).                           | Radial.  | Sides of fingers on dorsal aspect.  |  |
| Metatarsal.   | Dorsalis pedis.                                | Toes.   | Third dorsal interosseous.   |
| Middle (of corpora quadrigemina).                               | Posterior cerebral.                            | Space between the corpora quadrigemina.   |  |
| Muscular, deep. See <i>Femoral, deep.</i>                       |  |   |  |
| Musculo-phrenic.  | Internal mammary.                              | Diaphragm, fifth or sixth lower intercostal spaces, oblique muscles of abdomen.                       | Phrenic, anterior intercostals, muscular.  |
| Mylo-hyoidean.  | Mental.  | Mylo-hyoid muscle.  |  |
| Nasal.  | Infraorbital.                                  | Nose.   |  |
| Nasal.  | Ophthalmic.                                    | Lachrymal sac and integuments of nose.  | Lachrymal, and transverse nasal.   |
| Nasal.  | Spheno-palatine.                               | Turbinated bones, lateral walls of nose, ethmoidal and frontal sinuses and lining membrane of antrum. |  |
| Nasal, anterior.  | Anterior ethmoidal.                            | Nose.   |  |
| Nasal, lateral.   | Facial.  | Integuments, muscles and cartilage of nose.   |  |
| Nasal, middle. See <i>Nasal, anterior.</i>                      |  |   |  |
| Nasal, transverse.  | Nasal.   | Integuments of nose.  |  |
| Naso-palatine. See <i>Spheno-palatine.</i>                      |  |   |  |
| Navel. See <i>Umbilical</i>                                     |  |   |  |
| Neubauer's.   | See <i>Thyroid, deep.</i>                      |   |  |
| Nutrient.   | Brachial.                                      | Humerus.  |  |
| Nutrient.   | Interosseous, anterior                         | Radius.   |  |
| Nutrient.   | Interosseous, anterior.                        | Ulna.   |  |
| Nutrient.   | Middle perforating branch of profunda femoris. | Femur.  |  |
| Nutrient.   | Obturator.                                     | Ilium.  |  |
| Nutrient (of peroneal). See <i>Medullary.</i>                   |  |   |  |
| Nutrient.   | Posterior tibial.                              | Tibia.  |  |
| Nutrient.   | Suprascapular.                                 | Clavicle.   |  |
| Obturator.  | Anterior division, internal iliac.             | Pelvis and thigh.   | Iliac (or nutrient), vesical, pubic, external and internal pelvic                  |
| Obturator, external.  | Obturator.                                     | Muscles about obturator foramen.  |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION.   | BRANCHES.  |
|---|--|---|--|
| Obturator, internal.                                    | Obturator.                                     | Muscles about obturator foramen.                            |  |
| Occipital.  | Fourth branch of external carotid.             | Muscles of neck, and scalp.                                 | Sterno-mastoid, posterior meningeal, auricular, mastoid, princeps cervicis, communicating, muscular, terminal.                     |
| Occipito-meningeal.                                     | Vertebral.                                     | Dura mater.   |  |
| Omental (or epiploic).                                  | Hepatic.                                       | Omentum.  |  |
| Omphalo-mesenteric.                                     | Primitive aorta.                               | Subsequently becomes the umbilical.                         |  |
| Ophthalmic.   | Internal carotid.                              | The eye, adjacent structures, portion of face.              | Lachrymal, supraorbital, central artery of retina, muscular, ciliary, posterior and anterior ethmoidal, palpebral, frontal, nasal. |
| Optic, internal and anterior.                           | Posterior communicating.                       | Optic thalamus.   |  |
| Optic, posterior, internal.                             | Posterior communicating or posterior cerebral. | Optic thalamus.   |  |
| Orbital. See <i>Lachrymal</i> .                         |  |   |  |
| Orbital (three or four).                                | Anterior cerebral.                             | First frontal convolution and olfactory bulb.               |  |
| Orbital.  | Infraorbital.                                  | Fat of orbit; inferior rectus and inferior oblique muscles. |  |
| Orbital.  | Temporal.                                      | Orbicularis palpebrarum and orbit.                          |  |
| Orbito-frontal.   | Middle cerebral.                               | Inferior frontal convolutions.                              |  |
| Ovarian.  | Abdominal aorta.                               | Ovary, ureter, fallopian tube, uterus.                      | Ureteral, fallopian, uterine, ligamentous.   |
| Palatine.   | Ascending pharyngeal.                          | Soft palate and its muscles.                                |  |
| Palatine, ascending (or inferior).                      | First branch of facial.                        | Upper part of pharynx, palate and tonsils.                  | Palatine, tonsillar.   |
| Palatine, descending.                                   | Internal maxillary.                            | To soft and hard palate.                                    | Anterior and posterior   |
| Palatine, inferior. See <i>Palatine, ascending</i> .    |  |   |  |
| Palatine, posterior or descending.                      | Internal maxillary.                            | Hard palate.  | Anterior and posterior.  |
| Palatine, superior. See <i>Palatine descending</i> .    |  |   |  |
| Palato-maxillary.                                       | See <i>Palatine, descending</i> .              |   |  |
| Palmar, digital. See <i>Digital, palmar</i> .           |  |   |  |
| Palmar, interosseous. See <i>Interosseous, palmar</i> . |  |   |  |
| Palmar arch, deep.                                      | Radial and communicating of ulna.              | Palm and fingers.   | Princeps pollicis, radialis indicis, palmar interosseous (3), recurrent carpal, posterior perforating.                             |
| Palmar arch, superficial.                               | Ulnar and superficial volæ.                    | Palm and fingers.   | Digital (4), muscular, cutaneous.  |
| Palpebral.  | Lachrymal.                                     | Eye-lids and conjunctivæ.                                   |  |
| Palpebral.  | Supraorbital.                                  | Upper eye-lid.  |  |
| Palpebral, external.                                    | Ophthalmic.                                    | Eye-lid.  |  |
| Palpebral, inferior.                                    | Ophthalmic.                                    | Conjunctiva, lachrymal sac, caruncle and lower lid.         |  |
| Palpebral, superior.                                    | Ophthalmic.                                    | Upper eye-lid.  |  |
| Pancreatic.   | Hepatic.                                       | Pancreas.   |  |
| Pancreatic.   | Splenic.                                       | Pancreas.   |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.                   | DISTRIBUTION.   | BRANCHES.                            |
|---|---------------------------|---|--------------------------------------|
| Pancreatico-duodenal, inferior.                                     | Superior mesenteric.      | Pancreas and duodenum.  |                                      |
| Pancreatico-duodenal, superior.                                     | Gastro-duodenal.          | Duodenum and pancreas.  |                                      |
| Parietal.   | Middle cerebral.          | Inferior and ascending parietal convolutions.                       |                                      |
| Parietal, anterior.   | Middle cerebral.          | Second frontal convolution.   |                                      |
| Parietal, ascending.  | Middle cerebral.          | Ascending parietal convolution and superior parietal lobule.        |                                      |
| Parieto-sphenoidal.   | Middle cerebral.          | Inferior parietal lobule, angular gyrus, cortex of sphenoidal lobe. |                                      |
| Parieto-temporal.   | Middle cerebral.          | Convolutions around posterior limb of fissure of Sylvius.           |                                      |
| Parotid.  | Posterior auricular.      | Parotid gland.  |                                      |
| Parotid.  | Temporal.                 | Parotid gland.  |                                      |
| Parvidural. See <i>Meningeal, small.</i>                            |                           |   |                                      |
| Pectoral.   | Acromio-thoracic.         | Pectoral muscles and mammary gland.                                 |                                      |
| Pectoral.   | Anterior circumflex.      | Pectoralis major.   |                                      |
| Pedal. See <i>Dorsal of foot.</i>                                   |                           |   |                                      |
| Peduncular, anterior.   | Posterior cerebral.       | Internal surface of peduncle.                                       |                                      |
| Peduncular, external.   | Posterior, communicating. | Peduncles of the cerebellum.  |                                      |
| Peduncular, internal.   | Posterior cerebral.       | Internal surface of peduncle.                                       |                                      |
| Of the penis, perforating. See <i>A., of the corpus cavernosum.</i> |                           |   |                                      |
| Perforans stapedis (branch of internal carotid or stylo-mastoid).   | Tympanum.                 | No branches.  |                                      |
| Perforating (or posterior communicating), (3).                      | Deep palmar arch.         | Interosseous spaces.  |                                      |
| Perforating.  | Middle meningeal.         | Sphenoid.   |                                      |
| Perforating.  | Profunda femoris.         | Hamstring muscles.  |                                      |
| Perforating.  | Spheno-palatine.          | Ethmoidal cells.  | Anastomoses with ethmoidal arteries. |
| Perforating.  | Submental.                | Mylo-hyoid.   |                                      |
| Perforating, anterior (5 or 6).                                     | Internal mammary.         | Pectoralis major and integument, and mammary gland.                 |                                      |
| Perforating, posterior.   | External plantar.         | Dorsal interosseous muscles.  |                                      |
| Pericardiac.  | Internal mammary.         | Anterior surface of pericardium.                                    |                                      |
| Pericardiac.  | Right and left phrenic.   | Pericardium.  |                                      |
| Pericardiac.  | Thoracic aorta.           | Pericardium.  |                                      |
| Pericephalic. See <i>Carotid, external.</i>                         |                           |   |                                      |
| Perineal, superficial.  | Pudic.                    | Muscles of perineum and integuments of scrotum.                     | Transverse perineal.                 |
| Perineal, transverse.   | Perineal, superficial.    | Muscles and integuments of perineum.                                |                                      |
| Perirenal (or capsular).  | Renal.                    | Capsule of kidney and perirenal fat.                                |                                      |
| Peritoneal.   | Iliac, common.            | Peritoneum.   |                                      |
| Peritoneal.   | Superior epigastric.      | Peritoneum.   |                                      |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.                               | DISTRIBUTION.   | BRANCHES.   |
|---|---------------------------------------|---|---|
| Peroneal.   | Posterior tibial.                     | Muscles and integument of leg and foot.   | Anterior peroneal, muscular, medullary, communicating, cutaneous, external calcaneum, terminal (or posterior peroneal).   |
| Peroneal, anterior.   | Peroneal.                             | Peroneus tertius and inferior tibio-fibular joint.                              |   |
| Peroneal, posterior.  | Peroneal.                             | External malleolus and heel.  |   |
| Petrosal.   | Middle meningeal.                     | Tympanum.   |   |
| Pharyngeal.   | Pterygo-palatine.                     | Roof of pharynx.  |   |
| Pharyngeal.   | Spheno-palatine.                      | Roof and contiguous portions of pharynx.  |   |
| Pharyngeal.   | Vidian.                               | Roof of pharynx.  |   |
| Pharyngeal, ascending.                                      | First branch external carotid.        | Pharynx, soft palate, tympanum, posterior part of neck, and membranes of brain. | Prevertebral, pharyngeal, palatine, tympanic, meningeal.  |
| Pharyngeal, descending.                                     | Spheno-palatine.                      | Roof of mouth and of pharynx.   |   |
| Pharyngeal, inferior.<br><i>See Pharyngeal, ascending.</i>  |                                       |   |   |
| Pharyngeal, superior.<br><i>See Pterygo-palatine.</i>       |                                       |   |   |
| Phrenic.  | Ascending cervical.                   | Phrenic nerve.  |   |
| Phrenic.  | Musculo-phrenic.                      | Diaphragm.  |   |
| Phrenic.  | Superior epigastric.                  | Diaphragm.  |   |
| Phrenic, inferior, left.                                    | Aorta, abdominal.                     | Diaphragm and structures indicated by names of branches.                        | Esophageal, left superior suprarenal, splenic, pericardiac, terminal.   |
| Phrenic, inferior, right.                                   | Aorta, abdominal.                     | Diaphragm and structures indicated by names of branches.                        | Right superior suprarenal, caval, hepatic, pericardiac, and terminal.   |
| Phrenic, superior (or comes nervi phrenici).                | Internal mammary.                     | Pleura, pericardium and diaphragm.  |   |
| Pituitary.  | Internal carotid.                     | Pituitary body.   |   |
| Plantar arch.   | External plantar artery.              | Anterior part of foot and toes.   | Articular and plantar digital.  |
| Plantar, deep.  | Metatarsal.                           | Assists in formation of plantar arch.   |   |
| Plantar, digital (4).                                       | Plantar arch.                         | Third, fourth, and fifth toes, and outer side of second.                        |   |
| Plantar, external.  | External, tibial.                     | Sole and toes.  | Muscular, calcaneal, cutaneous, anastomotic, posterior perforating, plantar arch.   |
| Plantar, internal.  | Posterior tibial.                     | Inner side of foot.   | Muscular, cutaneous, articular, anastomotic, superficial digital.   |
| Plantar, interosseous.<br><i>See Interosseous, plantar.</i> |                                       |   |   |
| Plantar, metatarsal.<br><i>See Interosseous, plantar.</i>   |                                       |   |   |
| Plantar, pollicar.  | Anterior tibial, or external plantar. | Great toe.  |   |
| Pleural.  | Intercostal.                          | Pleura.   |   |
| Pontal.   | Basilar                               | Pons.   |   |
| Popliteal.  | Continuation of femoral.              | Knee and leg.   | Cutaneous, muscular (superior and inferior) or sural, articular, superior and inferior external, superior and inferior internal and azygos, terminal (anterior and posterior tibial). |

| Pterygo-pharyngeal.<br>See <i>Pterygo-palatine</i> . |  |   |   |
| Pubic.   | Epigastric, deep.                            | Pubic region.   |   |
| Pubic.   | Obturator.                                   | Pubic region.   |   |
| Pubic, accessory.                                    | Inferior vesical.                            | When large, supplies the parts normally supplied by the internal pudic, prostate. |   |
| Pubic, external, deep, (or inferior).                | Femoral, common.                             | Skin of scrotum (or labia in female).   |   |
| Pubic, external, superficial (or superior).          | Common, femoral.                             | Integument above pubes and external genitalia.                                    |   |
| Pubic, internal.                                     | Iliac, anterior division of internal branch. | Generative organs   | External (or inferior) hemorrhoidal, superficial perineal, muscular, arteries of bulb, crus, and dorsal of penis.                                       |
| Pulmonary.   | Right ventricle.                             | Lungs.  | Right and left.   |
| Pyloric, inferior.                                   | Gastro-duodenal or right gastro-epiploic.    | Pyloric end of stomach.   |   |
| Pyloric, superior.                                   | Hepatic                                      | Pyloric end of stomach.   |   |
| Quadrate.  | Anterior cerebral.                           | Quadrate convolution of brain.  |   |
| Quadrigeminal, anterior. See <i>Preoptic</i> .       |  |   |   |
| Quadrigeminal, median. See <i>Medioptic</i> .        |  |   |   |
| Radial.  | Brachial.                                    | Forearm, wrist, hand.   | Radial recurrent, muscular, anterior and posterior radial carpal, superficial volar, metacarpal, dorsalis pollicis, dorsalis indicis, deep palmar arch. |
| Radial carpal, anterior and posterior.               | Radial.                                      | Wrist and carpal joints.  |   |
| Radial, profunda.                                    | Superior profunda of arm.                    | Back of elbow.  |   |
| Radial recurrent, anterior.                          | Radial.                                      | Elbow-joint and muscles of forearm.   |   |
| Radial recurrent, posterior.                         | Posterior interosseous (forearm).            | Elbow.  |   |
| Radialis indicis.                                    | Radial.                                      | Index finger.   |   |
| Radio-carpal, palmar transverse.                     | See <i>Radial carpal, anterior</i> .         |   |   |
| Radio-palmar. See <i>Volar, superficial</i> .        |  |   |   |
| Ranine.  | Lingual.                                     | Tongue and mucous membrane of mouth.  |   |
| Rectal.  | Lateral sacral.                              | Rectum.   |   |
| Rectal.  | Middle sacral.                               | Rectum.   |   |
| Rectal, middle. See <i>Hemorrhoidal, middle</i> .    |  |   |   |
| Recurrent.   | Deep palmar arch.                            | Carpal joints.  |   |
| Recurrent, posterior interosseous                    | Posterior interosseous.                      | Elbow.  |   |
| Recurrent, radial. See <i>Radial, recurrent</i> .    |  |   |   |
| Recurrent, tibial, anterior and posterior            | Anterior tibial.                             | Popliteus and ligaments of knee   |   |
| Recurrent, ulnar, anterior and posterior.            | Ulna.  | Elbow-joint and contiguous structures.  |   |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.                             | DISTRIBUTION.                                     | BRANCHES.  |
|---|-------------------------------------|---|--|
| Renal.  | Abdominal aorta.                    | Kidney.   | Inferior suprarenal, capsular (or perirenal), ureteral.  |
| Rhachidian. See <i>Spinal.</i>                    |                                     |   |  |
| Sacra media. See <i>Sacral, middle.</i>           |                                     |   |  |
| Sacral, lateral (1 or 2).                         | Internal iliac, posterior division. | Structures about sacrum.                          | Spinal, rectal, muscular.  |
| Sacral, middle.                                   | Continuation of aorta               | Sacrum and coccyx.                                |  |
| Saphenous (occasional branch of common femoral).  | Accompanies saphenous vein.         |   |  |
| Saphenous, small.                                 | Popliteal (occasional).             | External malleolus.                               |  |
| Scapular, dorsal.                                 | Subscapular.                        | Muscles of infraspinous fossa.                    | Infrascapular.   |
| Scapular, external. See <i>Acromial.</i>          |                                     |   |  |
| Scapular, inferior. See <i>Subscapular.</i>       |                                     |   |  |
| Scapular, internal. See <i>Subscapular.</i>       |                                     |   |  |
| Scapular, posterior.                              | Continuation of transverse cervical | Muscles of scapular region.                       | Supra-spinous and infra-spinous, subscapular, muscular.  |
| Scapular, superficial. See <i>Suprascapular.</i>  |                                     |   |  |
| Scapular, superior. See <i>Suprascapular.</i>     |                                     |   |  |
| Scapular, transverse. See <i>Suprascapular.</i>   |                                     |   |  |
| Scapulo-humeral. See <i>Circumflex, posterior</i> |                                     |   |  |
| Sciatic.  | Internal iliac, anterior division.  | Pelvic muscles and viscera, and branches.         | Coccygeal, inferior gluteal, muscular, anastomotic, articular, cutaneous, comes nervi ischiadici, vesical, rectal, prostatic, etc. |
| Scrotal, anterior.                                | Inferior external pudic.            | Anterior portion of scrotum.                      |  |
| Scrotal, posterior.                               | Internal pudic.                     | Posterior part of scrotum.                        |  |
| Septal, ascending.                                | Spheno-palatine.                    | Upper part of mucous membrane of nasal septum.    |  |
| Sigmoid.  | Inferior mesenteric.                | Sigmoid flexure.                                  |  |
| Spermatic.  | Abdominal aorta.                    | Scrotum and testis.                               | Ureteral, cremasteric, epididymal, testicular.   |
| Spermatic, external.                              | Deep epigastric.                    | Cremaster muscle, and spermatic cord.             |  |
| Sphenoidal.                                       | Middle cerebral.                    | Sphenoidal lobe, lower part of cortex.            |  |
| Sphenoidal.                                       | Pterygo-palatine.                   | Sphenoidal cells.                                 |  |
| Sphenoidal.                                       | Spheno-palatine.                    | Sphenoidal cells.                                 |  |
| Spheno-palatine (or naso-palatine).               | Internal maxillary.                 | Pharynx, nose, and sphenoidal cells.              | Pharyngeal, sphenoidal, nasal, ascending septal.   |
| Spheno-spinous. See <i>Meningeal, middle.</i>     |                                     |   |  |
| Spinal.   | Ascending cervical.                 | Spinal canal                                      |  |
| Spinal.   | Intercostals.                       | Spinal canal and spine.                           |  |
| Spinal.   | Lateral sacral.                     | Spinal membranes and muscles and skin over sacrum |  |
| Spinal, anterior.                                 | Vertebral.                          | Spinal cord.                                      |  |
| Spinal, lateral.                                  | Vertebral.                          | Vertebree and spinal canal.                       |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                                    | DISTRIBUTION.   | BRANCHES.  |
|--|--|---|--|
| Spinal, posterior.   | Vertebral.                                 | Spine.  |  |
| Splenic.   | Celiac axis                                | Spleen, pancreas, part of stomach, omentum.                                     | Small and large pancreatic, left gastro-epiploic, vasa brevia, terminal. |
| Splenic  | Left phrenic.                              | Spleen  |  |
| Splenico-pancreatic  | Splenic.                                   | Spleen.   |  |
| Stapedius  | Stylo-mastoid                              | Stapedius muscle.   |  |
| Staphylinic  | See <i>Palatine, posterior.</i>            |   |  |
| Sternal  | Internal mammary.                          | Sternum and triangularis sterni.  |  |
| Sterno-mastoid   | Occipital.                                 | Sterno-mastoid muscle.  |  |
| Sterno-mastoid (or middle mastoid).                          | Superior thyroid.                          | Sterno-mastoid, and other muscles of neck.                                      |  |
| Sterno-mastoid, inferior.                                    | Suprascapular.                             | Sterno-mastoid muscle.  |  |
| Stylo-mastoid.   | Posterior auricular.                       | Mastoid cells, tympanic cavity, etc.  | Meatal, mastoid, stapedic, tympanic, vestibular, terminal.               |
| Subcerebellar.   | Basilar.                                   | Inferior and anterior portion of cerebellum.                                    |  |
| Subclavian.  | Right, innominate.<br>Left, arch of aorta. | Neck, thorax, arms, brain, meninges, etc.                                       | Vertebral, thyroid axis, internal mammary, superior intercostal.         |
| Subclavian.  | Suprascapular.                             | Subclavius muscle.  |  |
| Subclavian, right. A term sometimes given to the innominate. |  |   |  |
| Subcostal (or 12th dorsal)                                   | Thoracic aorta.                            | Intercostal space.  |  |
| Subdural. See <i>Meningeal (of ascending pharyngeal).</i>    |  |   |  |
| Subfrontal.  | Anterior cerebral.                         | Olfactory groove.   |  |
| Sublingual.  | Lingual.                                   | Sublingual gland, side of tongue, and floor of mouth.                           | Artery of frenum.  |
| Submaxillary. See <i>Glandular.</i>                          |  |   |  |
| Submental  | Facial.                                    | Tissues under jaw.  | Muscular, perforating, cutaneous, mental.                                |
| Suborbital. See <i>Infra-orbital.</i>                        |  |   |  |
| Subsacral. See <i>Sacral, lateral.</i>                       |  |   |  |
| Subscapular.   | Axillary.                                  | Subscapularis, teres major, latissimus dorsi, serratus magnus, axillary glands. | Dorsal and infrascapular.  |
| Subscapular.   | Posterior scapular.                        | Subscapular fossa.  |  |
| Subscapular.   | Suprascapular.                             | Subscapular fossa.  |  |
| Super-cerebellar. See <i>Cerebellar, superior.</i>           |  |   |  |
| Supermaxillodental. See <i>Dental, superior.</i>             |  |   |  |
| Superscapular. See <i>Suprascapular.</i>                     |  |   |  |
| Supra-acromial.  | Suprascapular.                             | Acromial region.  |  |
| Supra-dural.   | External carotid.                          | Meninges.   |  |
| Supra-hyoid (or hyoid)                                       | Lingual.                                   | Muscles above hyoid bone.   |  |
| Supramaxillary. See <i>Dental, superior.</i>                 |  |   |  |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                                | DISTRIBUTION.  | BRANCHES.   |
|--|--|--|---|
| Supraorbital.  | Ophthalmic.                            | Orbit, frontal sinuses, diploë and upper eye-lid.            | Periosteal, muscular, diploic, trochlear, palpebral.  |
| Supra-renal, inferior.   | Renal.                                 | Supra-renal body.  |   |
| Supra-renal, middle (or supra-renal).                          | Aorta.                                 | Supra-renal bodies.  |   |
| Supra-renal, superior.   | Phrenic.                               | Supra-renal bodies.  |   |
| Suprascapular (or transversalis humeri).                       | Thyroid axis.                          | Muscles of shoulder.   | Inferior sterno-mastoid, subclavian, nutrient, supra-sternal, acromial, articular, subscapular, supra-spinous and infraspinous. |
| Supraspinous.  | Posterior scapular.                    | Supraspinous muscles and trapezius.                          |   |
| Supraspinous.  | Suprascapular.                         | Supraspinatus muscle.  |   |
| Suprasternal.  | Suprascapular.                         | Skin of upper part of chest.                                 |   |
| Sural (or muscular).   | Popliteal.                             | Muscles of popliteal space and calf.                         |   |
| Tarsal, external and internal.                                 | Dorsalis pedis.                        | Skin and joints, etc., of foot.                              |   |
| Temporal.  | External carotid.                      | Forehead, parotid gland, masseter, ear.                      | Parotid, articular, masseteric, anterior auricular, transverse facial, middle, temporal, and anterior and posterior terminal.   |
| Temporal.  | Posterior cerebral.                    | Inferior part of temporal lobe of brain.                     |   |
| Temporal, deep, anterior.                                      | Internal maxillary.                    | Anterior part of temporal fossa.                             |   |
| Temporal, deep, external. See <i>Temporal, deep, anterior.</i> |  |  |   |
| Temporal, deep, internal.                                      | See <i>Temporal, deep, posterior.</i>  |  |   |
| Temporal, deep, posterior.                                     | Internal maxillary, pterygoid portion. | Temporal fossa.  |   |
| Temporal, frontal. See <i>Temporal, anterior.</i>              |  |  |   |
| Temporal, middle.  | Temporal.                              | Squamous portion temporal lobe.                              |   |
| Temporal, posterior.   | Superficial temporal.                  | Side of head and vertex.                                     |   |
| Temporal, superficial.   | See <i>Temporal.</i>                   |  |   |
| Temporo-occipital.   | Posterior cerebral.                    | Cuneus, lingual, convolution and exterior of occipital lobe. |   |
| Termatic.  | Anterior communicating.                | Cinerea and callosum.  |   |
| Testicular.  | Spermatic                              | Testicle.  |   |
| Testicular, great. See <i>Spermatic, internal.</i>             |  |  |   |
| Testicular, small. See <i>Spermatic, external.</i>             |  |  |   |
| Thalamic, middle.  | Posterior communicating.               | Optic thalamus.  |   |
| Thoracic, acromial (thoracic axis).                            | Axillary.                              | Muscles of shoulder, arm, and chest.                         | Acromial, humeral, pectoral, clavicular.  |
| Thoracic, alar.  | Axillary.                              | Axillary glands.   |   |
| Thoracic axis. See <i>Thoracic, acromial.</i>                  |  |  |   |
| Thoracic, external. See <i>Mammary, external.</i>              |  |  |   |
| Thoracic, inferior. See <i>Mammary, external.</i>              |  |  |   |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION.   | BRANCHES.   |
|---|--|---|---|
| Thoracic, internal.<br>See <i>Mammary, internal.</i>  |  |   |   |
| Thoracic, long (external mammary).                    | Axillary.                                      | Pectoral muscles, serratus magnus, mammary and axillary glands.   |   |
| Thoracic, short (or Axillary superior).               |  | Intercostal muscles, serratus magnus                              |   |
| Thoracic twelfth. See <i>Subcostal.</i>               |  |   |   |
| Thymic.   | Internal mammary.                              | Connective tissue, fat and lymphatics, or mediastinum and thymus. |   |
| Thymic. See <i>Mediastinal.</i>                       |  |   |   |
| Thyroid, ascending<br>See <i>Thyroid, inferior.</i>   |  |   |   |
| Thyroid axis.   | Subclavian.                                    | Shoulder, neck, thorax, spine, cord.                              | Inferior thyroid, suprascapular and transverse cervical.  |
| Thyroid, deep.  | Arch of aorta, innominate (occasional branch). | Same as inferior thyroid.   |   |
| Thyroid, descending.<br>See <i>Thyroid, superior.</i> |  |   |   |
| Thyroid, inferior.                                    | Thyroid axis.                                  | Larynx, esophagus and muscles of neck.                            | Muscular, ascending cervical, esophageal, tracheal and inferior laryngeal.                                    |
| Thyroid, middle. See <i>Thyroidea ima</i>             |  |   |   |
| Thyroid, superior.                                    | External carotid.                              | Omo-hyoid, sterno-hyoid, sterno-thyroid, thyroid gland.           | Hyoid, sterno-mastoid, superior laryngeal, crico-thyroid.   |
| Thyroidea ima   | Innominate (usually).                          | Thyroid body.   |   |
| Thyro-laryngeal.                                      | Thyroid superior.                              | Larynx and thyroid body.  |   |
| Tibial, anterior.                                     | Popliteal.                                     | Leg.  | Posterior and anterior tibial recurrent, muscular, internal and external malleolar.                           |
| Tibial, anterior, recurrent.                          | Anterior tibial.                               | Tibialis anticus muscle.  |   |
| Tibial, posterior.                                    | Popliteal.                                     | Leg, heel and foot.   | Peroneal, muscular, medullary, cutaneous, communicating, malleolar, calcanean, internal and external plantar. |
| Tibial, profunda (of foot).                           | Internal plantar, (innermost branch).          | Abductor pollicis muscle  | Unites with the plantar pollicar.   |
| Tibial, recurrent, posterior.                         | Anterior tibial.                               | Back of knee joint.   | Anastomoses with the inferior articular arteries of knee.   |
| Tonsillar.  | Ascending palatine.                            | Tonsil and Eustachian tube.                                       |   |
| Tonsillar.  | Facial.  | Tonsil and root of tongue.  |   |
| Tracheal.   | Inferior thyroid.                              | Trachea.  |   |
| Trachelo-muscular.<br>See <i>Cervical, inferior.</i>  |  |   |   |
| Transversalis colli.                                  | Thyroid axis                                   | Neck and scapular region.   | Superficial cervical and posterior scapular.  |
| Transversalis humeri<br>See <i>Suprascapular.</i>     |  |   |   |
| Transverse.   | External circumflex.                           | Muscles of upper part of thigh.                                   |   |
| Transverse. See <i>Pontal.</i>                        |  |   |   |
| Transverse.   | Right coronary.                                | Heart muscle.   |   |

TABLE OF ARTERIES.—*Continued.*

| NAME.   | ORIGIN.  | DISTRIBUTION.                                  | BRANCHES.   |
|---|--|--|---|
| Transverse humeral.<br>See <i>Suprascapular</i> . |  |  |   |
| Transverse nasal.                                 | Nasal (of ophthalmic)                            | Root of nose.                                  |   |
| Transverse perineal.                              | Superficial perineal.                            | Muscles and integuments of perineum.           |   |
| Tricipital.                                       | Posterior circumflex.                            | Triceps muscle (of arm).                       |   |
| Tympanic. See <i>Gla-serian</i> .                 |  |  |   |
| Tympanic.   | Ascending pharyngeal.                            | Tympanum.                                      |   |
| Tympanic.   | Middle meningeal.                                | Tensor tympani.                                |   |
| Tympanic.   | Stylo-mastoid.                                   | Membrana tympani.                              |   |
| Tympanic.   | Vidian.  | Tympanum.                                      |   |
| Tubal.  | Ovarian.   | Fallopian tube.                                |   |
| Ulnar.  | Brachial.  | Forearm, wrist, and hand.                      | Anterior and posterior ulnar recur-<br>rent, common interosseous, muscu-<br>lar, nutrient, anterior and posterior<br>ulnar carpal, palmar arch. |
| Ulnar carpal, anterior<br>and posterior.          | Ulnar.   | Carpal region.                                 |   |
| Ulnar, recurrent, ante-<br>rior and posterior.    | Ulnar.   | Muscles of arm and elbow-joint.                |   |
| Ulnar-carpal, anterior.                           | Ulnar.   | Muscles of hand.                               |   |
| Umbilical.  | Hypogastric.                                     | Chorionic villi.                               |   |
| Uncinate.   | Posterior cerebral.                              | Uncinate convolution                           |   |
| Urachic.  | Superior vesical.                                | Urachus  |   |
| Ureteral.   | Ovarian.   | Ureter.  |   |
| Ureteral.   | Renal.   | Ureter.  |   |
| Ureteral.   | Spermatic.                                       | Ureter.  |   |
| Ureteric.   | Common iliac.                                    | Ureter.  |   |
| Ureteric, inferior.                               | Superior vesical (or<br>uterine).                | Ureter and bladder.                            |   |
| Ureteric, middle.                                 | Of aorta, common iliac,<br>or internal spermatic | Middle part of ureter.                         |   |
| Ureteric, superior.                               | Renal.   | Upper part of ureter.                          |   |
| Urethro-bulbar.                                   | See <i>Perineal, trans-verse</i>                 |  |   |
| Uterine.  | Internal iliac, anterior<br>branch.              | Uterus.  | Cervical, vaginal, azygos.  |
| Uterine.  | Ovarian.   | Uterus.  |   |
| Utero-placental.                                  | Uterine.   | Gravid uterus and placenta.                    |   |
| Uveal. See <i>Ciliary, posterior and short</i> .  |  |  |   |
| Vaginal (2 or 3).                                 | Internal iliac, anterior<br>division.            | Vagina.  |   |
| Vaginal azygos.                                   | Uterine.   | Vagina.  |   |
| Vasa brevia.                                      | Splenic.   | Stomach.                                       |   |
| Vermiform, inferior.                              | Cerebellar, posterior in-<br>ferior.             | Vermiform process of cerebellum.               |   |
| Vermiform, superior.                              | Superior cerebellar.                             | Superior vermiform process of cerebel-<br>lum. |   |
| Vertebral.  | Subclavian.                                      | Neck of cerebrum.                              | Lateral spinal, muscular, anastomotic,<br>posterior meningeal, posterior and<br>anterior spinal, posterior cerebellar.                          |

TABLE OF ARTERIES.—*Continued.*

| NAME.  | ORIGIN.                            | DISTRIBUTION.  | BRANCHES.  |
|--|------------------------------------|--|--|
| Vertebral, posterior.<br><i>See aorta, primitive</i>     |                                    |  |  |
| Vesical, inferior.                                       | Internal iliac, anterior division. | Bladder, prostate, seminal vesicles, and vagina (in female). |  |
| Vesical, middle  | Superior vesical.                  | Bladder.   |  |
| Vesical, superior.                                       | Internal iliac, anterior division. | Bladder.   | Deferential, urachic, ureteric, middle vesical (occasionally). |
| Vesico-prostatic.  | Middle hemorrhoidal.               | Prostate and seminal vesicles.                               |  |
| Vesico-vaginal. <i>See Vaginal</i>                       |                                    |  |  |
| Vestibular.  | Internal auditory.                 | Membranous labyrinth.  |  |
| Vestibular.  | Stylo-mastoid.                     | Vestibule and semicircular canals.                           |  |
| Vidian.  | Internal maxillary.                | Roof of pharynx, Eustachian tube, and tympanum.              | Pharyngeal, Eustachian, tympanic.                              |
| Vitelline. <i>See Omphalo-mesenteric.</i>                |                                    |  |  |
| Volar, superficial.                                      | Radial.                            | Ball of thumb.   | Enters into formation of superficial palmar arch.              |
| Volar, superior. <i>See Volar, superficial.</i>          |                                    |  |  |
| Xiphoid.   | Superior epigastric.               | Ensiform cartilage.  |  |
| Zygomatico-orbital.<br><i>See Orbital (of temporal).</i> |                                    |  |  |

**Arthromeningitis** (*ar-thro-men-in-jit-tis*) [*ἄρθρον*, a joint; *μνινίτις*, membrane]. Synovitis.

**Arthromere** (*ar'-thro-mēr*) [*ἄρθρον*, a joint; *μέρος*, a part]. In biology, one of the rings or somites characteristic of the articulated invertebrates.

**Arthron** (*ar'-thron*) [*ἄρθρον*, a joint]. A joint; especially a movable joint.

**Arthralgia** (*ar-thron-al'-je-ah*). *See Arthralgia*.

**Arthroncus** (*ar-thron'-kus*) [*ἄρθρον*, a joint; *ὄγκος*, a swelling]. 1. A cartilaginous body such as occasionally forms within the knee-joint. 2. Swelling of a joint.

**Arthropathia** (*ar-thro-path'-e-ah*). *See Arthropathy*.

**A. Tabidorum.** *See Charcot's Disease*.

**Arthropathics** (*ar-thro-path'-iks*) [*ἄρθρον*, a joint; *πάθος*, disease]. Disease of the joints.

**Arthropathy** (*ar-thro-path'-e-ah*) [*ἄρθρον*, a joint; *πάθος*, disease]. 1. Any joint disease. 2. A peculiar disease of the joints similar to rheumatoid arthritis, but, according to Charcot, a distinct disease. It belongs to the prodromal stage of tabes, rapidly destroys the joint, is painless, without fever or inflammation, prefers the large joints, and is connected with hydrarthrosis and swelling of the joints.

**Arthrophlogosis** (*ar-thro-flo-gō'-sis*) [*ἄρθρον*, joint; *ὄλεθρον*, to burn]. Inflammation of a joint.

**Arthrophragm** (*ar'-thro-fram*) [*ἄρθρον*, a joint; *φράγμα*, a fence]. Partitions between the articulations of arthropods.

**Arthroplasty** (*ar'-thro-plas-te*) [*ἄρθρον*, a joint; *πλάσσειν*, to form]. The making of an artificial joint.

**Arthropleure** (*ar'-thro-plūr*) [*ἄρθρον*, a joint; *πλευρά*, the side]. One of the pleurites or lateral pieces composing a somite of an arthropod.

**Arthropodus** (*ar-thro-pō'-o-dus*) [*ἄρθρον*, a joint; *ποῖς*, a foot]. In biology, having jointed legs.

**Arthropoyosis** (*ar-thro-pi-o'-sis*) [*ἄρθρον*, a joint; *πίωσις*, suppuration]. Pus-formation in a joint.

**Arthrosia** (*ar-thro'-ze-ah*) [*ἄρθρον*, a joint]. Painful inflammatory or other affection of a joint.

**Arthrosis** (*ar-thro'-sis*) [*ἄρθρῶσις*, to fasten by a joint]. Articulation or jointing.

**Arthrospore** (*ar'-thro-spōr*) [*ἄρθρον*, a joint; *σπορος*, a seed]. In biology, a spore formed by fission, as opposed to an *endospore*.

**Arthrosterigma** (*ar-thro-ster-ig'-mah*) [*ἄρθρον*, a joint; *στρίγμα*, a support: *pl., Arthrosterigmata*]. In biology, a jointed sterigma, as in many lichens.

**Arthrostome** (*ar'-thro-stōm*) [*ἄρθρον*, a joint; *στόμα*, a mouth]. 1. Agassiz's name for the mouth of articulates. Compare *Actinostome*.

**Arthrosyrinx** (*ar-thro-sir'-ingks*) [*ἄρθρον*, a joint; *σῦριγξ*, a pipe]. A fistulous opening into a joint.

**Arthrotome** (*ar'-thro-tōm*) [*ἄρθρον*, joint; *τομή*, a cutting]. A stout knife used in the surgery of the joints.

**Arthrotomy** (*ar-thro'-o-me*) [*ἄρθρον*, a joint; *τέμνειν*, to cut]. Incision of a joint.

**Arthrous** (*ar'-thrus*) [*ἄρθρον*, a joint]. Pertaining to a joint or joints; jointed.

**Arthroxesis** (*ar-throks'-es-is*) [*ἄρθρον*, joint; *ξύσις*, a scraping]. The surgical treatment of an articular surface by scraping.

**Artiad** (*ar'-te-ad*) [*ἄρτιος*, even]. In chemistry, a term used to designate atoms having an even valence, as oxygen, which is bivalent, iron quadrivalent, and sulphur hexavalent.

**Articular** (*ar-tik'-u-lar*) [*articularis*, of the joints]. Pertaining to an articulation or joint.

**Articulate** (*ar-tik'-u-lat*) [*articulare* to divide in joints]. Divided into joints, distinct. **A. Speech**, the communication of ideas by spoken words.

**Articulation** (*ar-tik-u-lā'-shun*) [*articulus*, a joint]. 1. A joint or arthrosis; a connection between two or more bones, whether allowing movement between them or not. The articulations are divided into: (1) *Synarthroses*, immovable, subdivided into *schindyleses*, or grooved joints, *gomphoses*, in sockets, as the teeth, and *sutures*, as in the bones of the skull; (2) *Diarthroses*, or movable joints, subdivided into the *arthrodia*, or gliding joints, the *ginglymus*, or hinge-like, the *enarthroses*, or ball-and-socket joints; (3) *Amphiarthroses*, or those of a mixed type. 2. The enunciation of spoken speech. **A. of Artificial Teeth**, the adjustment and arrangement of one or more artificial teeth, so that it, or they, when placed in the mouth, shall sustain the same relationship to the organs with which they antagonize, when the jaws are closed, as the natural teeth did previous to their loss. **A., Confluent**, the clipping of words, or running together of syllables—a symptom of certain cerebral diseases. **A. of Models**. See *Models for Artificial Teeth, Antagonizing*. **A. Positions**. See *Consonants*. **A. of the Teeth**. See *Teeth, Articulation of*.

**Articulator** (*ar-tik'-u-la-tor*) [*articulus*, a joint]. An instrument used in mechanical dentistry for holding the models in position while the artificial teeth are being arranged and antagonized upon the plates.

**Articuli** (*ar-tik'-u-lī*). See *Lenticula*.

**Articulo mortis**, In (*ar-tik'-u-lo mor'-tis*) [L.]. At the moment of death. In the act of dying.

**Artifact** (*ar'-te-fact*) [*arte*, by art; *factum*, made]. In microscopy and histology, a structure that has been produced by mechanical, chemical, or other artificial means; a structure or tissue that has been changed from its natural state.

**Artificial** (*ar-te-fish'-al*) [*artificialis*]. Made or imitated by art. **A. Anus**, an opening in the abdomen to give exit to the feces; an opening made in case of *imperforate anus*. **A. Crowns**, porcelain crowns of teeth designed to be united to the roots of natural teeth; what is commonly called by the misnomer "pivot tooth." **A. Dentine**, a preparation composed of pure gutta-percha, while in a softened state, mixed with mineral substances, and used for temporary fillings. See *Temporary Stopping*. **A. Eye**, a film of glass, celluloid, rubber, etc., made in imitation of the front part of the globe of the eye and worn in the socket or over a blind eye for cosmetic reasons. **A. Feeding**, the feeding of an infant by other means than mother's milk. Various mixtures and foods are to be had, such as *Meigs's*, *Retch's*, *Biedert's Mixtures*, etc., *q. v.* See *Table at end of this article*. **A. Joint**, or *false joint*, the non-united ends of a broken bone. **A. Leech**. See *Leech*. **A. Palate**, a mechanical contrivance for supplying the loss of the whole or a portion of the hard or soft palate, or both. **A. Pupil**, removal of a piece of the iris (*iridectomy*, *iridodialysis*, etc.), to allow the light to pass through the opening. **A. Respiration**, the aëration of the blood by artificial means. A method of inducing the normal function of respiration when from any cause it is temporarily in abeyance, as in asphyxia neonatorum, drowning, etc. *Bain's Method*, a modification of Sylvester's method, the axilla itself being seized so that the traction is made directly upon the pectoral muscles. *Byrd's (H. L.) Method*; the physician's hands are placed under the middle portion of the child's back with their ulnar borders in contact and at right angles to the spine. With the thumbs extended, the two extremities of the trunk are carried forward by gentle but firm pressure, so that they form an angle of 45 degrees with each other in the diaphragmatic region. Then the angle is reversed by carrying backward the

shoulders and the nates. *Dew's Method*; the infant is grasped in the left hand, allowing the neck to rest between the thumb and forefinger, the head falling far over backward. The upper portion of the back and scapulae rest in the palm of the hand, the other three fingers being inserted in the axilla of the babe's left arm, raising it upward and outward. The right hand grasps the babe's knees, and the lower portion of the body is depressed to favor inspiration. The movement is reversed to favor expiration, the head, shoulders, and chest being brought forward and the thighs pressed upon the abdomen. *Forest's Method*; the child is placed on its face and quick, violent pressure is made on the back; then it is placed in a pail of hot water, and the hands carried upward until the child is suspended by its arms, and mouth-to-mouth insufflation is practised; the arms are then lowered and the body doubled forward; these movements are repeated at the rate of 40 per minute. *Hall's Method*; by turning the body alternately upon the side or face to compress the chest, and then upon the back to allow the lungs to expand. *Howard's Method*; by pressure upon the lower ribs every few seconds. *Pacini's Method*; for resuscitating asphyxiated infants. The child lying on its back, the operator stands at its head, and grasps the axillæ, pulling the shoulders forward and upward to compress the thorax, and allowing them to fall in order to expand the chest. *Satterthwaite's Method*; pressure upon the abdomen alternating with relaxation to allow descent of the diaphragm. *Schröder's Method*; the babe while in a bath is supported by the operator on the back, its head, arms, and pelvis being allowed to fall backward; a forceful expiration is then effected by bending up the babe over its belly, thereby compressing the thorax. *Schultze's Method*; the child is seized from behind with both hands, by the shoulders, in such a way that the right index finger of the operator is in the right axilla of the child from behind forward, and the left index finger in the left axilla, the thumbs hanging loosely over the clavicles. The other three fingers hang diagonally downward along the back of the thorax. The operator stands with his feet apart and holds the child as above, practically hanging on the index fingers in the first position, with the feet downward, the whole weight resting on the index fingers in the axillæ, the head being supported by the ulnar borders of the hands. This is the first inspiratory position. At once the operator swings the child gently forward and upward. When the operator's hands are somewhat above the horizontal the child is moved gently, so that the lower end of the body falls forward toward its head. The body is not flung over, but moved gently until the lower end rests on the chest. In this position the chest and upper end of the abdomen are compressed tightly. The child's thorax rests on the tips of the thumbs of the operator. As a result of this forcible expiration the fluids usually pour out of the nose and mouth of the infant. The child is allowed to rest in this position (the first expiratory position) about one or two seconds. The operator gradually lowers his arms, the child's body bends back, and he again holds the infant hanging on his index fingers with its feet downward; this is the second inspiratory position. These movements are repeated 15 to 20 times in the minute. *Sylvester's Method*, chiefly by movements of the arms. This method is valueless in asphyxia neonatorum, owing to non-development of the pectoral muscles. **A. Urticaria**, a condition much resembling that seen in the *autographic skin q. v.* **A. Vitreous**. See *Evisceration*.

## ARTIFICIAL FEEDING OF INFANTS.

TABLE OF QUANTITY REQUIRED

| AGE                       | INTERVAL. | NUMBER OF FEEDINGS IN 24 HOURS | AMOUNT OF FOOD AT EACH FEEDING. | TOTAL AMOUNT IN 24 HOURS |
|---------------------------|-----------|--------------------------------|---------------------------------|--------------------------|
| 1st week, . . . . .       | 2 hours.  | 10                             | 1 oz.                           | 10 ozs.                  |
| 2d to 4th week, . . . .   | 2 "       | 9                              | 1½ ozs.                         | 13½ "                    |
| 2d to 3d month, . . . .   | 3 "       | 6                              | 3 "                             | 18 "                     |
| 3d to 4th month, . . . .  | 3 "       | 6                              | 4 "                             | 24 "                     |
| 4th to 5th month, . . . . | 3 "       | 6                              | 4-4½ "                          | 24-27 "                  |
| 6th month . . . . .       | 3 "       | 6                              | 5 "                             | 30 "                     |
| 8th month, . . . . .      | 3 "       | 6                              | 6 "                             | 36 "                     |
| 1st month, . . . . .      | 3 "       | 5                              | 8 "                             | 40 "                     |

**Artus** (*ar'-tus*) [L.; *pl.*, *Artus*]. A joint; a limb; the joints collectively.

**Aryepiglottic** (*ar-e-ep-e-glot'-ik*). Same as *Arytenoepiglottic*.

**Arytenoepiglottic** (*ar-i'-ten-o-ep-e-glot'-ik*) [ἀρίταινα, a pitcher; εἶδος, likeness; ἐπὶ, upon; γλωττίς, glottis]. Relating to an arytenoid cartilage and to the epiglottis; as the aryteno-epiglottic fold (or folds), consisting of a fold of mucous membrane that extends from either arytenoid cartilage to the epiglottis.

**Arytenoid** (*ar-i-te'-noid*) [ἀρίταινα, a pitcher; εἶδος, likeness]. Resembling the mouth of a pitcher. **A. cartilages**, two cartilages of the larynx regulating, by the means of the attached muscles, the tension of the vocal cords. **A. Glands**, muciparous glands found in large numbers along the posterior margin of the aryteno-epiglottidean fold in front of the arytenoid cartilages. **A. Muscle**, arises from the posterior surface of one arytenoid cartilage and is inserted into the corresponding parts of the other. It is composed of three planes of fibers, two *oblique* and one *transverse*. It draws the arytenoid cartilages together.

**Arythmia** (*ar-ith'-me-ah*). See *Arrhythmia*.

**Arythmic** (*ar-ith'-mik*). See *Arrhythmic*.

**Asa** (*a'-sah*) [Pers., *āsā*, mastic]. A gum. **A. dulcis**, benzoin; also the drug called *laser*.

**Asafetida** (*as-a-fet'-id-ah*) [*asa*, gum; *fetida*, stinking]. A resinous gum obtained from the root of *Ferula fetida* and *F. scordosoma*. It is somewhat soluble in alcohol and forms an emulsion with water. Its properties are due to *allyl sulphid*,  $C_6H_{10}S$ . It is a powerful antispasmodic, stimulant, and expectorant, and is very serviceable in hysteria and bronchial affections. Dose gr. v-xx. **A. tinct.**, strength 20 per cent. Dose ʒss-ij. **A. emplastrum**, asafetida 35, lead plaster 35, galbanum 15, yellow wax 15, alcohol 120 parts. **A. Enema** (B. P.), asafetida and distilled water. **A., Emulsum**, a 4 per cent. emulsion. Dose ʒss-ʒij. **A. et magnesia mist.**, Dewees's carminative, magnesium carb. 5, tinct. asafetida 7, tinct. opii 1, sugar 10, aq. dest. ad 100 parts. Dose ʒss-ʒss. **A. pilulæ**, contain each gr. iij of asafetida and gr. j of soap. Dose j-iv. **A. et Aloes pil.**, have gr. 1½ of each ingredient. **A. pil. comp.** (B. P.), *Galbani pil. comp.*. See *Galbanum*. *Ammonia fetidus spl.*, contains asafetida 1½, liq. ammonie fort. 2, spirit 20 parts. Dose ʒss-j. Unof.

**Asagraea**, or **Asagræa** (*as-a-græ'-ah*) [Asa Gray, an American botanist]. A genus of melanthaceous herbs. **A. officinalis**. See *Cebadilla*.

**Asak** (*as'-ak*). See *Saraca indica*.

**Asaphatum** (*as-af'-at-um*) [Arab.]. An old name for comedones.

**Asaphia** (*as-af-i'-ah*) [ἀσάφεια, indistinctness]. Indistinctness of utterance, especially that due to cleft palate.

**Asaprol** (*as'-ap-rol*),  $Ca(OH.C_{10}H_6SO_3)_2.3Aq$ . Calcium-β-naphthol-α-mono-sulphonate, a substance readily soluble in water and alcohol, and recommended as an antiseptic in 5 per cent. solution. It is also used in acute articular rheumatism in doses of from 15 to 60 grains.

**Asarabacca** (*as-ar-ab-ak'-ah*) [ἀ priv.; σείπα, a band; bacca, a berry]. The plant *Asarum europæum*, an errhin, aperient, and emetic. Unof.

**Asarcia** (*ah-sar'-se-ah*) [ἀ priv.; σαρξ, flesh]. Emaciation; leanness.

**Asarin** (*as'-ar-in*). Same as *Asarone*.

**Asarkia** (*ah-sar'-ke-ah*). See *Asarcia*.

**Asarol** (*as'-ar-ol*) [ἀσάρον, asarabacca; oleum, oil],  $C_{10}H_{16}O$ . A camphor-like body derived from asarum.

**Asarone** (*as'-ar-on*) [ἀσάρον, asarabacca],  $C_{20}H_{26}O_3$ . Asarin. The solid component of the oil from *Asarum europæum*. It forms monoclinic prisms, melting at 61°, and boils at 295°. It has an aromatic taste, and smells like camphor.

**Asarum** (*as'-ar-um*) [ἀσάρον, asarabacca]. A genus of aristolochiaceae plants. **A. europæum** has diaphoretic, emetic, purgative, and diuretic qualities, but is now little used except in veterinary practice. **A. canadense**, called wild ginger, Canada snakeroot, with other N. American species, are used chiefly in domestic practice. *A. canadense* is a fragrant, aromatic stimulant. Dose of fld. ext. ℥ xv-ʒss. Unof.

**Asbestos** (*as-bes'-tos*) [ἀσβεστος, unquenchable]. A mineral more or less flexible and fibrous. It is used in mechanical dentistry, mixed with plaster, as a substitute for sand, to form the investment preparatory to soldering. In surgery, it has also a limited use.

**Ascariasis** (*as-kar-i'-as-is*) [ἀσκαρίζεν, to jump]. The symptoms produced by the presence of ascarides in the gastro-intestinal canal.

**Ascaricide** (*as-kar'-is-id*) [ascaris, a mite; cadere, to kill]. A medicine that kills ascarides.

**Ascarides** (*as-kar'-id-iz*). See *Thread-worms*.

**Ascariasis** (*as-kar-id-i'-as-is*) [ἀσκαρίζεν, to jump]. The presence of ascarides in the intestine.

**Ascaris** (*as'-kar-is*) [ἀσκαρίζεν to jump; *pl.*, *Ascarides*]. A genus of the family *Ascaride*. Parasitical worms inhabiting the bodies, and especially the intestines, of most animals. **A. lumbricis**, is found in the ox, hog and man. It inhabits the small intestine, especially of children. **A. mystax**, the round-worm of the cat, and **A. alata** have rarely been found in man. **A. vermicularis**, a synonym of *Oxyuris vermicularis*. See *Parasites, Table of*.

**Ascending** (*as-end'-ing*) [ascendere, to rise]. Taking an upward course (as parts of the aorta, and colon, and as one of the venæ cavæ). **A. Current**, in electricity, one going from the periphery to a nerve-center. **A. Metamorphosis**. Same as *Anabolism*. **A. Paralysis**. See *Paralysis*.

**Ascherson's Vesicles**. The peculiar small globules formed when oil and an albuminous fluid are agitated together. Formerly thought to be cells.

**Ascheturesis** (*as-ket-u-re'-sis*) [ἀσχετος, restless; οὐρησις, urination]. An uncontrollable desire to urinate; irrepressible urination.

**Aschistodactylism** (*as-kis-to-dak'-til-izm*) [ἀσχιστος, uncloven; δάκτυλος, a finger]. A synonym of *Syndactylism*.

**Ascia** (*as'-se-ah* or *as'-ke-ah*) [*à* priv.; *σκιά*, shadow]. *Fascia spiralis*; *dolabra currens*; a spiral bandage applied without reverses, each turn of which overlaps the preceding for about a third of its width. *Dolabra repens*, is the same as the preceding, in which, however, the spirals are formed more obliquely, and do not overlap each other, but are separated by a greater or less interval.

**Ascidium** (*as-id'-e-um*) [*ἀσκιδιον*, dim. of *ἄσκος*, a wine-skin]. In biology, a pitcher, or a pitcher-shaped organ, as in the pitcher plant or bladder wort.

**Asciferous** (*as-ij'-er-us*) [*ἄσκος*, a bladder (spec., a spore case); *φέρω*, to bear]. Producing asci.

**Ascigerous** (*as-ij'-er-us*) [*ascus*, a spore case; *gerere*, to bear]. Ascus-bearing.

**Ascites** (*as i'-tes*) [*ἀσκιτις*, a kind of dropsy; from *ἄσκος*, a bag]. An abnormal collection of serous fluid in the peritoneal cavity; dropsy of the peritoneum. It is either local in origin or a part of a general dropsy. The *ascitic fluid* is usually clear, yellow, coagulating on standing, and if renal in origin contains urea. It may be turbid, blood-stained, and contain lymph-particles or shreds. There is a uniform enlargement of the abdomen, fluctuation, percussion-dulness, etc. **A. adiposus**. A milky appearance of ascitic fluid due to the presence in it of numerous cells that have undergone fatty degeneration and solution. It is seen in certain cases of cancer, tuberculosis, or chronic inflammation of the peritoneum. **A. chylosus**. The presence of chyle in a greater or less degree of purity in ascitic fluid. It follows rupture of the chyle duct.

**Ascitic, Ascitical** (*as-i'-ik*, *as-i'-ik-al*) [*ἀσκιτικός*, a kind of dropsy]. Pertaining to or affected with ascites.

**Asclepiad** (*as-ke'-pe-ad*) [*Ἀσκληπιάδης*, a Greek poet]. In ancient Greece, any priest of Asclepias (Æsculapius), of the family or class that claimed descent from that hero or demigod. The Asclepiads were also physicians, at least in some period of their history.

**Asclepiadin** (*as-kle-pi'-ad-in*) [*ἀσκληπιδίν*]. A bitter glucoside obtainable from various species of *Asclepias*. It is poisonous, with emetic, purgative, and sudorific effects. Unof.

**Asclepias** (*as-kle'-pe-as*) [*ἀσκληπιός*]. Pleurisy Root. The root of *Asclepias tuberosa*. A popular remedy in the Southern States for pleurisy. A powerful diaphoretic and a moderate emetic and cathartic. The infusion recommended has a strength of  $\frac{\text{ʒj}}$  of the powdered root to  $\frac{\text{ʒ}}$  xxxij of water. Dose, a teacupful every 3 or 4 hours. Also, **A. curassavica**, Blood-flower, an herb common to tropical America; astrin-gent, styptic, and antihelmintic against the tapeworm. A popular remedy for checking capillary hemorrhage. Dose of fld. ext.  $\frac{\text{ʒj}}$ -ij; of the drug, gr. xx-xl. Unof. Many other species of this genus have active medicinal qualities, at present but little understood. **A., Ext., Fld.**, the fluid extract. Dose  $\frac{\text{ʒ}}$ i-ij.

**Asclepin** (*as-kle'-pin*) [*ἀσκληπιδίν*]. 1. A poisonous principle obtainable from asclepiadin by the separation of glucose from the latter. It is a heart paralyzant, with reputed alterative, purgative, and diaphoretic effects. It is offensive to the taste and smell. Unof. 2. The precipitate from a tincture of *Asclepias tuberosa*; alterative, evacuant, tonic, sedative. Dose grs. ij-iv. Unof.

**Ascocarp** (*as'-ko-karp*) [*ἄσκος*, a bag; *καρπός*, fruit]. In biology, the organ that in Ascomycetes and Lichenes produces ascospores.

**Ascococcus** (*as-ko-kok'-us*) [*ἄσκος*, a leather bag; *κόκκος*, a kernel]. A genus of the family of Schizomycetes. The ascococci are microorganisms made up of round or ovoid cells; with elements united in massive colonies, surrounded by tough, thick, gelatin-

ous envelops. **A. Billrothii**, found in putrefied meat; its natural habitat is the air; zymogenic, probably not pathogenic. See *Bacteria*, Table of.

**Ascogenous** (*as-kof'-en-us*) [*ἄσκος*, a bag; *γενέω*, producing]. In biology, producing asci.

**Ascogonium** (*as-kog'-o-nium*) [*ἄσκος*, a bag; *γονος*, producing]. In biology, the corkscrew-shaped female organ of the mould-fungi. It is formed by several fine branches given off from a mycelium; an archicarp, or, generally, an imperfectly developed carpogonium.

**Ascomyceter** (*as-ko-mi'-se-ter*) [*ἄσκος*, a bag; *μύκης*, mushroom]. In biology, a group of fungi including morchella, helvella, leotia, etc., which have cup-shaped depressions, lacunae, and sinuosities. *Aspergillus*, *penicillium*, and *oidium* belong here.

**Ascophora** (*as-koff'-o-rah*) [*ἄσκος*, a bag; *σχεῖν*, to bear]. A genus of fungi. **A. elegans**, a vegetable growth occasionally found in the ear; bread-mould. **A. mucedo**, a microscopic fungus, of which the mould of bread is an example.

**Ascophore** (*as'-ko-for*) [*ἄσκος*, a bag; *σχεῖν*, to bear]. The spore-bearing stage, surface, or hyphæ of a fungus.

**Ascospore** (*as'-ko-spor*) [*ἄσκος*, a bag; *σπῆρος*, seed]. In biology a spore produced by or in an ascus.

**Ascus** (*as'-kus*) [*ἄσκος*, a bag, or bladder]. In biology, the characteristic spore case of some fungi and lichens, usually consisting of a single terminal cell containing eight spores.

**Ascyphous** (*as'-ij'-us*) [*à* priv.; *σκιος*, a cup]. In botany, without *scyphi* or cup-shaped fruiting organs, as some lichens.

**Asecretory** (*ah-se'-kret-o-re*) [*à* priv.; *secretus*, separate]. Dry; without secretion.

**Asellus** (*as-ell'-us*) [L.]. An old name for the cod. *Oleum jecinoris aselli*, cod-liver oil.

**Asemasia** (*as-em'-a-ze-ah*) [*à* priv.; *σημασία*, a signaling]. Absence of the power to communicate either by signs or language.

**Asemia** (*ah-se'-me-ah*) [*à* priv.; *σημα*, a sign]. In ability to form, express, or understand any sign, token, or symbol of thought or feeling, whether speech, writing or gesture.

**Asepsable** (*ah-sep'-sa-bl*) [*à* priv.; *σήψις*, putrefaction]. A less correct form of the word Aseptizable.

**Asepsin** (*ah-sep'-sin*). See *Antisepsin*.

**Asepsis** (*ah-sep'-sis*) [*à* priv.; *σητείν*, to putrefy]. The condition of non-putrefaction; absence of all septic material or pathogenic microorganisms.

**Aseptic** (*ah-sep'-tik*) [*à* priv.; *σήψις*, putrefaction]. Free from pathogenic bacteria, or septic matter. The antiseptic treatment of wounds, including aseptic and antiseptic dressings, renders the wound aseptic.

**Asepticism** (*ah-sep'-tis-izm*) [*à* priv.; *σηπτικός*, septic]. The doctrine or principles of aseptic surgery.

**Asepticity** (*ah-sep'-tis-it-ē*) [*à* priv.; *σηπτικός*, septic]. Quality of being aseptic.

**Aseptize** (*ah-sep'-tis-iz*) [*à* priv.; *σηπτικός*, septic]. To render aseptic; to free from the power of conveying septic poison.

**Aseptin** (*ah-sep'-tîn*) [*à* priv.; *σηπτικός*, septic]. A secret preparation containing boric acid, used for preserving articles of food.

**Aseptizable** (*ah-sep'-tiz-a-bl*) [*à* priv.; *σηπτικός*, septic]. Susceptible of being rendered aseptic.

**Aseptol** (*ah-sep'-tol*) [*à* priv.; *σηπτικός*, septic].  $\text{C}_6\text{H}_6\text{SO}_4$ . Sulphocarboic acid; sozolic acid. A reddish liquid, with an odor of carboic acid, recommended as a disinfectant and antiseptic. It is used externally (1:1000), and internally in about the same dose as carboic acid.

**Asexual** (*ah-seks'-u-al*) [*à* priv.; *sexus*, sex]. Without sex; non-sexual.

**Ash** (*ash*) [ME. *asch*]. See *Fraxinus*. **A. manna**. See *Fraxinus*. **A., Poison**. See *Chionanthus*. **A., Prickly**. See *Xanthoxylum*.

**Asialia** (*as-e-ah'-le-ah*) [*â* priv.; *σπίλον*, spittle]. Defect or failure of the secretion of saliva.

**Asialorrhoea** (*as-e-ah'-le-ah*). Same as *Asialia*.

**Asiatic** (*as-ze-at'-ik*) [*Asia*]. Pertaining or belonging to Asia. **A. Cholera**. See *Cholera*. **A. Pill**, a method of administering arsenic in skin diseases. The formula is, arsenious acid gr. ij; black pepper, powdered licorice, each gr. xxxij; mucilage q. s. M. et ft. pil. no. xxxij. S. One to be taken t. d. after meals.

**Asimina** (*as-im-e'-mah*) [*L.*]. A genus of trees. **A. triloba**. The pawaw or pawpaw tree of North America, bearing an edible fruit.

**Asiminin** (*as-im'-in-in*) [*asimina*]. An alkaloid derived from the seeds of *Asimina triloba*. It has active medicinal properties but is not much used. Unof.

**Asitia** (*ah-sish'-e-ah*) [*â* priv.; *σιστος*, food]. The want of food. Also a loathing for food.

**Asmegmatia** (*ah-smeg-mat'-she-ah*) [*â* priv.; *σμήγμα*, an unguent]. Deficiency or lack of smegma.

**Asomata** (*ah-se'-mat-ah*) [*â* priv.; *σῶμα*, body]. A species of omphalositic monster characterized by an absence of the trunk. The head is never well formed, and the vessels run from it to the placenta in the membranes. Beneath the head is a sac in which rudiments of body organs may be found. This is the rarest form of omphalositic. Also called *Acardiacus acormus*.

**Asomia** (*ah-so'-me-ah*). See *Acormus*.

**Aspalasoma** (*as-pal-as'-mah*) [*ἀσπλάζω*, mole; *σῶμα*, body]. A variety of single autositic monsters of the species celosoma, in which there is a lateral or median eventration occupying principally the lower portion of the abdomen, with the urinary apparatus, the genital apparatus, and the rectum opening externally by three distinct orifices.

**Asparagin** (*as-par'-ag-in*) [*ἀσπράγος*, asparagus],  $C_4H_8N_2O_5 \cdot H_2O$ . An alkaloid isomeric with malamid. It is found in the seeds of many plants, in asparagus, beet root, peas and beans. It forms shining, four-sided, rhombic prisms, readily soluble in hot water, but not in alcohol or ether. It is an amid of aspartic acid, and forms compounds with both acids and bases. It is diuretic and sedative to the circulation. Dose gr. j-vj.

**Asparagus** (*as-par'-ag-us*) [*ἀσπράγος*, asparagus]. The green root of *Asparagus officinalis*, a mild diuretic. Dose of fld. ext.  $\tilde{3}$ ss-j. Unof.

**Aspartic Acid** (*as-par'-tik*). See *Acid*.

**Asper-artery** (*as'-per-ar'-ter-e*) [*arteria aspera*, rough artery]. The trachea.

**Aspergilliform** (*as-per-jill'-if-orm*) [*aspergere*, to sprinkle; *forma*, shape]. In biology, shaped like the brush used to sprinkle holy water; as the stigmas of many grasses.

**Aspergillus** (*as-per-jill'-u*) [*aspergere*, to scatter]. A nominal genus of fungi, probably containing only the conidial forms of *Eurotium*. **A. auricularis**, a fungus found in the wax of the ear. **A. fumigatus**, found in the ear, nose, and lungs. **A. glaucus**, the bluish mould found, e.g., upon dried fruit. **A. mucoroides**, a species found in tuberculous or gangrenous lung tissue.

**Aspergillusmycosis** (*as-per-jill' u'-mi-ko'-sis*). See *Otomycosis*.

**Asperifoliate** (*as-per-if'-le-ât*) [*asper*, rough; *folium*, a leaf]. With leaves producing a sensation of roughness when handled.

**Aspermatia** (*ah-sper-mat'-she-ah*), [*â* priv.; *σπέρμα*, seed]. Aspermatism.

**Aspermatic** (*ah-sper-mat'-ik*) [*â* priv.; *σπέρμα*, seed]. Affected with or relating to aspermatism.

**Aspermatism** (*ah-sper'-mat-izm*) [*â* priv.; *σπέρμα*, seed]. Non-emission of semen, whether owing to non-secretion or non-ejaculation.

**Aspermous** (*ah-sper'-mus*) [*â* priv.; *σπέρμα*, seed]. Without seed.

**Aspersio** (*as-per'-shun*) [*aspersio*, *aspergere*, to sprinkle]. Treatment of disease by sprinkling with a medicinal agent, or by dropping a medicine slowly upon the body or part affected.

**Asperula** (*as-per'-u-lah*) [*L.*]. A genus of rubiaceous plants, of which the European woodruff (*A. odorata*) is an example. This plant is a fragrant aromatic, rich in coumarin, and has diaphoretic and astringent qualities. The *Maitrank* or *Maitwein* of the Germans is flavored with this herb. Unof.

**Asphalt** (*as'-falt*) [*ἀσφαλτος*, bitumen]. Bitumen (*q. v.*). Asphalt is now scarcely used in medicine, but a varnish prepared with it is employed in making cells for use in microscopy.

**Asphyctic** (*as-fik'-tik*), or **Asphyctous** (*as-fik'-tus*) [*â* priv.; *σφίξις*, pulsation]. Affected with asphyxia.

**Asphyxia** (*as-fiks'-e-ah*) [*â* priv.; *σφίξις*, the pulse]. The effect upon the body of the non-oxygenation of the blood; the suspension of vital phenomena when the lungs are deprived of air. The excess of carbon dioxide in the blood at first stimulates, then paralyzes the respiratory center of the medulla. Artificial respiration is therefore required in cases of sudden asphyxia. Asphyxia is characterized by extreme lividity of the features, and prominence of the eyeballs, with obstruction to respiration. It is the cause of death in suffocation, drowning, obstruction of the larynx, etc. **A. neonatorum**, the inability of new-born infants to begin respiration spontaneously, or to continue it.

**Asphyxiant** (*as-fiks'-e-ant*) [*ἀσφύκτωρ*, pulseless]. 1. Producing asphyxia. 2. An agent capable of producing asphyxia.

**Asphyxiate** (*as-fiks'-e-at*) [*â* priv.; *σφίξιν*, to pulsate]. To produce or cause asphyxia; to suffocate, or to nearly suffocate.

**Aspic** (*as'-pik*) [*a* and *spic*, lavender spike]. The great lavender, or spike lavender, *Lavandula spica*. Its oil is at present used in veterinary practice and occasionally in liniments. Unof.

**Aspidium** (*as-pid'-e-um*) [*L.: gen. Aspidii*]. A genus of ferns, known as shield-ferns. There are many recognized species. The rhizome of *Dryopteris filix mas*, and of *D. marginalis* or male fern. Its properties are due to a resin containing folic acid. It is valuable chiefly as a vermicide against tapeworm. Dose  $\tilde{3}$ ss- $\tilde{3}$ ss. **A., Oleoresina**, an ethereal extract. Dose  $\tilde{3}$ ss-j. **Ext., filicis Liq.**, (B. P.). Dose  $\mathfrak{m}$ xxv- $\tilde{3}$ j.

**Aspidosamin** (*as-pid-os'-am-in*) [*ἀσπίς*, a shield; *σπέρμα*, a seed].  $C_{22}H_{32}N_2O_2$ . A basic principle, from quebracho bark. Emetic. Unof.

**Aspidosperma** (*as-pid-o'-sper'-mah*) [*ἀσπίς*, a shield; *σπέρμα*, seed]. The bark of *Aspidosperma quebracho-blanco*. **A., Ext.**, Fld., an alcoholic preparation. Dose  $\tilde{3}$ j.

**Aspidospermatin** (*as-pid-o'-sper'-mat-in*) [*ἀσπίς*, a shield; *σπέρμα*, seed]. A basic substance, from quebracho bark, said to be isomeric with aspidosamin and to depress the temperature when administered. Unof.

**Aspidospermin** (*as-pid-o'-sper'-min*) [*ἀσπίς*, shield; *σπέρμα*, seed].  $C_{22}H_{30}N_2O_2$ . An alkaloid extracted from *Quebracho*, *q. v.* (*Aspidosperma quebracho*). It has the general effects of quebracho. Unof.

**Aspirate** (*as'-pir-at*) [*ad. to; spirare*, to breathe]. Any consonant sound that is aspirated or pronounced with a rough breathing. See *Consonants*.

**Aspiration** (*as-pir-a'-shun*) [*ad*, to; *spirare*, to breathe]. Used as a synonym of inspiration, also of imbibition. The act of using the aspirator. A method of withdrawing the fluids and gases from a wound, organ or cavity. **A. of Cataract Extraction.** See *Extraction of Cataract, Suction Method*. **A. Theory** (of Weber and Hasner), the theory that accounts for the transmission of tears into the nose by suction into the lachrymal sac through the rarefaction of the air in the nose during inspiration.

**Aspirator** (*as'-pir-a-tor*) [*ad*, to; *spirare*, to breathe]. An instrument for withdrawing the contents of an abscess, tumor, etc., without the admission of air.

**Asplenium** (*ah-splē'-ne-um*) [*ā* priv.; *σπλήν*, spleen; a plant of this name was once thought to destroy the spleen]. A genus of ferns called spleen-worts, or miltwastes. **A. ceterach** and **A. filix-femina** formerly had a great repute as medicines, but are now little used. Unof.

**Asporogenic** (*ah-spōr-o-jeŋ'-ik*) [*ā* priv.; *σπορα*, seed; *γενής*, producing]. Not reproducing by means of spores; not producing spores.

**Assafetida** (*as-a-fet'-id-ah*). See *Asafetida*.

**Assalini's Operation.** See *Operations, Table of*.

**Assault** (*as-awt'*) [*assalire*, to assail]. An attack. **A., Criminal**, in medical jurisprudence, the touching or attempting to touch, on the part of a male, any of the sexual organs (the breasts included) of a female, against her will, even though they be covered by clothing.

**Assibilation** (*as-ib-il-a'-shun*) [*assibilare*, to whisper to]. The utterance of sounds with a sibilant or hissing quality.

**Assideration** (*as-id-er-a'-shun*) [*ad*, intensive; *sideratio*, an evil influence]. In forensic medicine, infanticide by immersing in ice-water.

**Assimilable** (*as-im-il-a-bl*) [*assimulare*, to make like]. Capable of being assimilated; nutritious.

**Assimilation** (*as-im-il-a'-shun*) [*assimulare*, to make like]. The process of transforming food into such a nutrient condition that it is taken up by the circulatory system, to form an integral part of the economy; synthetic or constructive metabolism; anabolism. In biology, the formation of carbohydrate from water and carbon dioxide by the agency of chlorophyll. **A., Mental**, the mental reception of impressions and their assignment by the consciousness to their proper place. **A., Primary**, that concerned in the conversion of food into chyle and blood. **A., Secondary**, that relating to the formation of the organized tissues of the body.

**Associated** (*as-o'-se-a-ted*) [*associatus*, united]. Joined. **A. Antagonist.** See *Antagonist*. **A. Movements**, coincident or consensual movements of other muscles than the leading one, and which by habit or unity of purpose are involuntarily connected with its action. Both eyeballs move alike in reading, though one be a blind eye. Movement of the normal arm will sometimes produce slight motion of the opposite paralyzed arm. Uniformity of innervation is usually the cause of these movements. **A. Paralysis**, a common paralysis of associated muscles.

**Assurgent** (*as-er'-jeŋt*). See *Ascending*.

**Assurin** (*as'-u-rin*),  $C_{16}H_{14}N_2P_2O_6$ . A name given by Thudichum to a complex substance occurring in brain tissue, classed as a di-nitrogenized diphosphatid.

**Astacoloth** (*as-tak'-o-lith*) [*αστακος*, a lobster; *λίθος*, a stone]. A concretion obtainable from the stomach of a European craw-fish, *Astacus fluviatilis*, and often gathered from brooks. These are called *Crabs' Eyes*, and *Eye-stones*, *q. v.*

**Astasia** (*as-ta'-se-ah*) [*ā* priv.; *στάσις*, standing]. Motor incoordination for standing. See *Abasia*. **A.**

**Abasia**, a symptom consisting in inability to stand or walk in a normal manner.

**Asteatodes** (*as-te-at-o'-dez*) [*ā* priv.; *στέαρ*, tallow; *ώδης*, fullness]. Deficient in the secretion of the sebaceous glands.

**Asteatosis** (*as-te-at-o'-sis*) [*ā* priv.; *στέαρ*, tallow; *ώδης*, fullness]. 1. A deficiency or absence of the sebaceous secretion. 2. Any skin disease (as xeroderma) characterized by scantiness or lack of the sebaceous secretion. **A. cutis**, a condition of diminished sebaceous secretion, as the result of which the skin becomes dry, scaly, and often fissured.

**Aster** (*as'-ter*) [*aster*, a star]. 1. An extensive genus of composite flowered plants, mainly N. American. **A. cordifolius** is a nervin and antispasmodic. **A. pumiceus** is stimulant and diuretic. Unof. 2. See *Karyokinesis*, *Mother-star*, *Dyaster*, *Amphiaster*, and *Cytaster*.

**Asterion** (*as-te'-re-on*). See *Cranimetrical Point*.

**Asternal** (*ah-ster'-nal*) [*ā* priv.; *στέρνον*, the breast bone]. Not connected with the sternum. **A. Ribs**, the five lower pairs, because not joined directly to the sternum.

**Asternia** (*ah-ster'-ne-ah*) [*ā* priv.; *στέρνον*, the breast bone]. Absence of the sternum.

**Asteroid** (*as'-ter-oid*) [*αστηρ*, a star; *ειδος*, resemblance]. 1. Shaped like a star. 2. In biology, with radiate lobes.

**Asthenia** (*as-the'-ne-ah*, or *as-then-i'-ah*) [*ἀσθενεία*; *ā* priv.; *σθένος*, strength]. General loss or absence of strength; adynamia.

**Asthenic** (*as-then'-ik*) [*ā* priv.; *σθένος*, strength]. Characterized by asthenia.

**Asthenometer** (*as-then-om'-et-er*) [*ἀσθηνεία*, want of strength; *μέτρον*, a measure]. An instrument for detecting and measuring asthenia; especially, a device for measuring muscular asthenopia.

**Asthenopia** (*as-then-o'-p-ah*) [*ā* priv.; *σθένος*, strength; *ὤψ*, eye]. Weakness, speedy fatigue of the ocular muscles or visual powers, due to errors of refraction, insufficiency, over-use, anemia, etc. **A., Accommodative**, due to hyperopia, astigmatism, or a combination of the two, producing strain of the ciliary muscle. **A., Muscular**, due to weakness, incoordination (heterophoria), or strain of the external ocular muscles. **A., Retinal**, or **Nervous**, a rare variety, caused by retinal hyperesthesia, anesthesia, or other abnormality, or by general nervous affections.

**Asthenopic** (*as-then-op'-ik*) [*ā* priv.; *σθένος*, strength; *ὤψ*, eye]. Characterized by asthenopia.

**Asthma** (*az'-mah*) [*ἀσθμα*, panting]. Paroxysmal or intermittent dyspnea, generally accompanied by cough, bronchial secretion, and a feeling of constriction and suffocation. The etiology is obscure, being ascribed to heredity, nasal disease, gout, exhalations of plants and atmospheric impurities, colds, etc. It is undoubtedly a neurosis, the spasm of the muscular tissue of the bronchial tubes being due either to central or to peripheral nervous irritation. The duration of a paroxysm may be from two to six hours to four or five nights. When dependent upon disease of the heart, the kidneys, stomach, thymus, etc., it has been designated, *cardiac*, *renal*, *peptic*, *thymic*, etc. **A. convulsivum**. Synonym of *Bronchial Asthma*. **A. Crystals**, acicular crystals contained in the sputum of asthmatic patients. **A. dyspepticum**, is due to nervous reflexes through the vagus. **A., Grinders'**. Same as *Fibroid Phthisis*. **A., Hay**. See *Hay Fever*. **A., Heberden's**, angina pectoris. **A., Köpp's**, spasm of the glottis. **A., Marine**. See *Beriberi*. **A., Millar's**. See *Laryngismus stridulus*. **A., Miner's**. See *Anthraxosis*. **A. nervosum**

Synonym of *Bronchial Asthma*. **A., Thymic.** Synonym of *Laryngismus stridulus*. **A. uteri.** Synonym of *Hysteria*.

**Asthmatic** (*az-mat'-ik*) [*ástma*, panting]. Relating to or affected with asthma.

**Astigmagraph** (*as-tig'-ma graf*) [*à* priv.; *στίγμα*, a point; *γράφω*, to write]. An instrument for illustrating the phenomena of astigmatism.

**Astigmatic** (*a-tig-mat'-ik*) [*à* priv.; *στίγμα*, a point]. Pertaining to or affected with astigmatism.

**Astigmatism** (*as-tig'-mat-izm*) [*a* priv.; *στίγμα*, a point, because rays of light from a point are never brought to a point by the refractive media of the eye]. That condition of the eye wherein homocentric rays of light are not brought to a focus by the media. It is usually due to inequality of curvature of the different meridians of the cornea (**corneal A.**), but may be caused by imperfections of the lens (**lenticular**), unequal con-

DIAGRAM ILLUSTRATING THE FORMATION OF ASTIGMATIC IMAGES.

The figures below give the images corresponding to the positions of the perpendicular lines above. The vertical rays are brought to a focus anterior to the horizontal. V. = vertical rays; H = horizontal

traction of the ciliary muscle, or may perhaps be due to retinal imperfection. It may be **acquired** or **congenital**, and may complicate hypermetropia or myopia, producing either **simple hypermetropic A.**, in which one principal meridian is emmetropic, the other hypermetropic; or **compound hypermetropic A.**, in which both meridians are hypermetropic, but one more so than the other. Complicating myopia, we may in the same way have **simple myopic** or **compound myopic A.** In mixed **A.**, one principal meridian is myopic, the other hypermetropic. **Regular A.** is when the two principal meridians are at right angles to each other. **Irregular A.**, when different parts of a meridian have different refracting powers.

**Astigmatometer** (*as-tig-mat-om'-et-er*) [*à* priv.; *στίγμα*, a point; *μέτρον*, a measure]. An instrument for measuring the degree of astigmatism.

**Astigmometer** (*as-tig-mom'-et-er*). See *Astigmatometer*.

**Astigmometry** (*as-tig-mom'-et-re*) [*à* priv.; *στίγμα*, a point; *μέτρον*, a measure]. The measurement of astigmatism.

**Astomous** (*ah-sto'-mus*) [*à* priv.; *στόμα*, mouth]. In biology, without a mouth or aperture.

**Astragalectomy** (*as-tra'-gal-ek'-to-me*) [*ἀσπράγαλος*, astragalus; *ἐκτομή*, excision]. Surgical excision of the astragalus.

**Astragaloscaphoid** (*as-tra'-gal-o-ska'-oid*) [*ἀσπράγαλος*, astragalus; *σκαφοειδής*, like a boat]. Relating to the astragalus and the scaphoid bone.

**Astragalotibial** (*as-tra'-gal-o-tib'-e-al*) [*ἀσπράγαλος*, astragalus; *τίβια*, the shin-bone]. Relating to the astragalus and the tibia.

**Astragalus** (*as-tra'-gal-us*) [*ἀσπράγαλος*, a dice; the analogous bones of the sheep were used by the ancients as dice]. The ankle-bone, upon which the tibia rests. Also, a genus of leguminous plants from some varieties of which gum tragacanth is derived. **A. mollissimus**, Loco Plant. The active principle of this plant has mydiatic properties. Unof.

**Astraphobia** (*as-tra'-af-o'-be-ah*) [*ἀσπρᾶφι*, lightning; *φόβος*, fear]. Morbid and unreasonable fear of lightning.

**Astraphobia** (*as-tra'-fo'-be-ah*). See *Astraphobia*.

**Astriction** (*as-trik'-shun*) [*astrictio*; *ad*, to; *stringere*, to bind]. Constipation or any condition resulting from the use of astringents.

**Astringency** (*as-trin'-jen-se*) [*ad*, to; *stringere*, to bind]. The quality of being astringent.

**Astringent** (*as-trin'-jent*) [*ad*, to; *stringere*, to bind]. 1. Causing contraction; binding. 2. An agent producing contraction of organic tissues, or that arrests hemorrhages, diarrheas, etc. Tannin, alum, opium, alcohol, the salts of silver, lead, etc., are examples.

**Astrokinetic** (*as-tro-kin-et'-ik*) [*ἀστρον*, a star; *κινεῖν*, to move]. In biology, applied by Ryder to the phenomena of motion as exhibited by the centrosomes of cells.

**Astrostatic** (*as-tro-stal'-ik*) [*ἀστρον*, a star; *ἵστασθαι*, to stand]. In biology, applied by Ryder to the resting condition of the centrosomes of cells.

**Asylum** (*as-i'-lum*) [*asylum*, a place of refuge]. An institution for the support, safe-keeping, cure, or education of those incapable of caring for themselves, such as the insane, the blind, etc. **A. Ear.** See *Hematoma auris*, and *Ear Deformities*.

**Asymbolia** (*ah-sim-bo'-le-ah*) [*à* priv.; *σμβολή*, symbol]. The loss of all power of communication, even by signs or symbols.

**Asymmetry** (*ah-sim'-le-re*) [*à* priv.; *συμμετρία*, symmetry]. 1. Unlikeness of corresponding organs or parts of opposite sides of the body that are normally of the same size, etc., as *e.g.*, asymmetry of the two halves of the skull or brain. 2. The linking of carbon atoms to four different groups; the combination of carbon atoms with different atoms or atomic groups.

**Asynergia** (*ah-sin-er'-je-ah*) [*à* priv.; *συνεργία*, co-operation]. Faulty coördination of the different organs or muscles normally acting in unison.

**Asynesia** (*as-in'-e-ze-ah*) [*ἀσυνεσία*, stupidity]. Stupidity; loss or disorder of mental power.

**Asynodia** (*ah-sin-o'-de-ah*) [*à* priv.; *συνόδα*, a traveling together]. Impotence.

**Asystematic** (*ah-sis-tem-at'-ik*) [*à* priv.; *σίστημα*, system]. Diffuse; not restricted to any one or several systems of nerve fibers; applied to nervous diseases that are general.

**Asystole** (*ah-sis'-to-le*) [*à* priv.; *συστολή*, a shortening]. Absence or imperfection of the cardiac systole, due to feebleness, dilatation, etc., of the heart.

**Asystolic** (*ah-sis-tol'-ik*) [*à* priv.; *συστολή*, a shortening]. Marked by, due to, or suffering from asystole.

**Asystolism** (*ah-sis'-tol-izm*) [*à* priv.; *συστολή*, a shortening]. Inability of the right ventricle of the heart to empty itself of its contents, a condition encountered in the last stages of mitral incompetence. See *Asystole*.

**Asystoly** (*ah-sis'-to-le*). Same as *Asystole*.

**Atactic** (*at-ak'-ti*) [*ἀτακτος*, irregular]. Irregular, incoördinate. Pertaining to muscular incoördination, especially in aphasia. Also applied to atypical fevers.

**Atavic** (*at-av'-ik*) [*atarvus*, a forefather]. Relating to or characterized by atavism.

**Atavism** (*at'-av-izm*) [*atarvus*, a forefather]. The re-appearance of an anomaly, physical, mental, or pathologic, in an individual whose more or less remote

progenitors were similarly affected, but in whose immediate ancestors it had not been shown.

**Atavistic** (*at-av-ist'-tik*). Same as *Atavic*.

**Ataxaphasia** (*at-aks-af'-a'-ze-ah*). See *Aphasia*.

**Ataxia** (*at-aks'-e-ah*) [*ἀταξία*, want of order]. The word means primarily irregularity or want of order, but it is most commonly used to express incoördination of muscular action; an excess or deficiency in contraction of the various muscles concerned in a given action. Both static and locomotor ataxia are prominent symptoms of tabes or disease of the posterior columns of the cord, but it is absurd to speak of ataxia as if it were a disease itself, instead of being only one of many symptoms of many diseases. **A.**, **Briquet's**, a hysterical state marked by loss of sensation in the skin and in the leg muscles. **A. cordis**. See *Delirium cordis*. **A. of Drunkards**. See *Polynceritis potatorum*. **A.**, **Family**. See *A.*, **Inherited**. **A.**, **Hereditary**, Friedreich's ataxia, a family disease of children and the young. See *Friedreich's Disease*. **A.**, **Locomotor**, the failure of muscular coördination as regards movements, and especially in walking. **A.**, **Motor**, inability to coördinate the muscles in walking.

**A.**, **Signs of**. 1. *Romberg* (or *Brach-Romberg sign*), swaying of the body with closed eyes. 2. *Signe de cloche-pied*: standing on one leg with open eyes, and with closed eyes. The ataxic finds difficulty in standing upon one foot while the other is raised from the ground, particularly when the eyes are closed. 3. *Sign of crossing the legs*: in crossing the legs a normal person raises the one leg to the level of the other knee and deposits the former upon the latter. The ataxic raises the one leg a considerable distance above the other knee, and in depositing the former upon the latter makes the arc of a large circle. 4. *Sign "de l'escalier"*: sign of descending stairs; difficulty in descending stairs experienced by the ataxic. 5. *Marching at command*; *a. march!* *b. halt!* *c. about face!* *a.* When an ataxic that has been seated is told to walk, he manifests uncertainty or hesitation in his effort, first on rising, to gain his equilibrium. *b.* The marching ataxic finds great difficulty and is likely not to succeed in halting with precision when commanded to do so. *c.* The ataxic patient cannot turn about face with the same promptitude and the same certainty as the normal individual. 6. *Westphal's sign*: abolition of the knee-jerk. **A.**, **Static**, the failure of muscular coördination in standing still, or in fixed positions of the limbs. **A.**, **Thermal**, peculiar large and irregular fluctuations of the body temperature, due to a condition of incoördination, or a disordered or weakened thermotaxic mechanism. This may give rise to the so-called *paradoxic* or *hysterical temperatures*, rising occasionally to 108° or 110° F., without grave or permanent injury.

**Ataxiagram** (*at-aks'-e-a-gram*) [*ἀταξία*, want of order; *γράφω*, a marking]. A line drawn by a patient suffering with an ataxial disease. The patient's eyes are open or closed and he attempts to make a straight line. The character of the deviations from a straight line that result are conceived to have a certain diagnostic value.

**Ataxiamnesia** (*at-aks-e-am-ne'-ze-ah*) [*ἀταξία*, want of order; *ἀμνησία*, forgetfulness]. Muscular ataxia with loss of or impairment of memory.

**Ataxic** (*at-aks'-ik*) [*ἀταξία*, want of order]. 1. Pertaining to or affected with ataxia. 2. A person affected with ataxia. **A. Aphasia**. See *Aphasia*. **A. Fever**. Synonym of *Typhus Fever*, *q. v.*

**Ataxophemia** (*at-aks-o-fe'-me-ah*) [*ἀταξία*, want of order; *φῆμι*, to speak]. Lack of coördination in speech.

**Ataxy** (*at-aks' e*). See *Ataxia*.

**Atelectasis** (*at-el-ek'-le-ta-sis*) [*ἀτελής*, imperfect; *εκτασις*, expansion]. Pulmonary collapse, with failure of the air to enter the vesicles. It may be either *acquired* (apneumatosi), or *fetal*. The condition is due not to disease of the lungs, but to nerve injuries, weakness, etc. In fetal cases the lung has never been inflated, whilst in *apneumatosi* it has been inflated.

**Atelectatic** (*at-el-ek-tat'-ik*) [*ἀτελής*, imperfect; *εκτασις*, expansion]. Relating to or characterized by atelectasis.

**Atelecephalous** (*at-el-e-o-sef'-al-u*) [*ἀτελής*, imperfect; *κεφαλή*, head]. Having the skull or head more or less incomplete.

**Atelia** (*at-el'-i'-ah*) [*ἀτέλεια*, imperfection]. A teratologic term for imperfection or failure of development of some part of the fetus. The word is compounded with others to designate the member wanting, as *atelocardia*, etc., expressing such a defect of the heart, etc.

**Atelocardia** (*at-el-o-kar'-de-ah*) [*ἀτελής*, imperfect; *καρδία*, heart]. An imperfect or undeveloped state of the heart; cardiatalia.

**Atelocheilia** (*at-el-o-ki'-le-ah*) [*ἀτέλής*, imperfect; *χείλος*, lip]. Defective development of a lip.

**Atelochiria** (*at-el-o-ki'-re-ah*) [*ἀτέλής*, imperfect; *χείρ*, hand]. Deficiency in the development of the hand.

**Ateloencephalia** (*at-el-o-en-sef'-al-le-ah*) [*ἀτέλής*, incomplete; *ἐγκέφαλον*, brain]. Incomplete development of the brain.

**Ateloglossia** (*at-el-o-glos'-e-ah*) [*ἀτέλής*, imperfect; *γλῶσσα*, tongue]. Congenital defect in the tongue.

**Atelognathia** (*at-el-o-g-na'-the-ah*) [*ἀτέλής*, imperfect; *γνάθος*, jaw]. Imperfect development of a jaw, especially of the lower jaw.

**Atelomyelia** (*at-el-o-mi-e'-le-ah*) [*ἀτέλής*, imperfect; *μυελός*, marrow]. Congenital defect or incompleteness of the spinal cord.

**Atelopodia** (*at-el-o-po'-de-ah*) [*ἀτέλής*, imperfect; *πούς*, foot]. Defective development of the foot.

**Ateloprosopia** (*at-el-o-pro-so'-pe-ah*) [*ἀτέλής*, incomplete; *πρόσωπον*, face]. Incomplete facial development.

**Atelorrhachidia** (*at-el-o-rak-id'-e-ah*) [*ἀτέλής*, imperfect; *ράχις*, spine]. Imperfect development of the spinal column, as in *spina bifida*.

**Atelostomia** (*at-el-o-sto'-me-ah*) [*ἀτέλής*, incomplete; *στόμα*, mouth]. Incomplete development of the mouth.

**Athalamous** (*ah-thal'-am-us*) [*ἀ priv.*; *θάλαμος*, a bed]. Absence of the optic thalamus. In biology, without apothecia, as certain lichens.

**Athalline** (*ah-thal'-in*) [*ἀ priv.*; *θαλλός*, a frond]. In biology, destitute of a thallus.

**Athelasmus** (*ah-thel-as'-mus*) [*ἀ priv.*; *θηλαστός*, a suckling]. Inability to give suck, from defect or want of the nipples.

**Athelia** (*ah-thel'-le-ah*) [*ἀ priv.*; *θήλη*, a nipple]. Absence of the nipple.

**Athermasia** (*ah-ther-ma'-ze-ah*) [*ἀ priv.*; *θερμασία*, heat]. Lack or deficiency of heat.

**Atheroma** (*ah-er-o'-mah*) [*ἀθήρη*, gruel; *δύα*, tumor]. Primarily, a soft encysted tumor; more commonly, the fatty degeneration of the walls of the arteries in consequence of chronic arteritis, and called *atheromatous degeneration*. *Atheromatous abscess*, resulting from chronic arteritis, is a collection of soft matter beneath the intima, while an *atheromatous ulcer* is formed by the abscess breaking through the intima.

**Atheromasia** (*ah-er-o-ma'-ze-ah*) [*ἀθήρωμα*, an atheromatous tumor]. Atheromatous degeneration; the condition of atheroma.

**Atheromatous** (*ath-er-o' mat-us*) [*ἀθηρωμα*, an atheromatous tumor]. Characterized by or affected with atheroma.

**Atherosperma** (*ath-er-o-sper'-mah*) [*ἄθηρ*, beard; *σπέρμα*, seed]. A genus of trees. **A. moschatum**, *Australi in saffras*, a diaphoretic and diuretic sometimes used in pulmonary affections and asthma. Dose of the tincture, 5ss-j. Unof.

**Athetoid** (*ath'-et-oid*) [*ἄθητος*, unfixed]. Pertaining to or affected with athetosis. **A. Spasm**, a symptom of hemiplegia and some cerebral lesions.

**Athetosis** (*ath-et-oi'-sis*) [*ἄθητος*, unfixed; changeable]. A symptom most frequently occurring in children, and characterized by continual change of position of the fingers and toes, and inability to keep them still, save in sleep. It is due to some lesion or derangement of the brain or cord. It is also called "post-hemiplegic chorea," from its occurrence after hemiplegia, in adults. **A., Double Congenital**. See *Paraplegia*, *Infantile Spasmodic*; also *Double Athetosis*.

**Athlete** (*ath-let'*) [*ἄθλη*, to contend with]. Robust; vigorous. **A.'s Heart**, incompetency of the aortic valves, a condition frequently found in athletes.

**Athletics** (*ath-let'-iks*) [*ἄθλη*, to contend]. The art of physical exercise for development or for health.

**Athrepsia** (*ah-threps'-e-ah*) [*ἄθρις*; *τρέφειν*, to nourish]. The symptom-complex resulting from imperfect nutrition in children.

**Athrosisemia** (*ath-roi-se'-me-ah*) [*ἄθροισμα*, accumulation; *αἷμα*, blood]. Congestion or accumulation of blood.

**Athymia** (*ah-thi'-me-ah*) [*ἄθρις*; *θῦμος*, mind]. 1. Despondency. 2. Loss of consciousness. 3. Insanity. **Athymic** (*ah-thi'-mik*) [*ἄθρις*; *θῦμος*, mind]. Affected with athymia.

**Atlantad** (*at-lan'-lad*) [*Ἀτλας*, a Greek hero]. Toward the atlas in situation or direction.

**Atlantal** (*at-lan'-tal*) [*Ἀτλας*, a Greek hero]. Relating to the atlas.

**Atlanten** (*at-lan'-ten*) [*Ἀτλας*, a Greek hero]. Belonging to the atlas in itself.

**Atlanti-obliquus** (*at-lan'-ti-ob-li'-kwus*) [L.]. The obliquus capitis superior muscle.

**Atlanti-rectus** (*at-lan'-ti-rek'-tus*) [L.]. The muscle called rectus capitis posticus minor.

**Atlanto-** (*at-lan'-to*) [*Ἀτλας*, a Greek hero]. A prefix signifying relation to the atlas; seen in the words *Atlanto-axial*, (relating to the atlas and the axis) *Atlanto-occipital*, *Atlanto-odontoid*, etc.

**Atlas** (*at'-lus*) [*ἄτλας*, able]. The uppermost of the cervical vertebrae. It articulates with the occipital bone of the skull. **A. Silk**. See *Silk*.

**Atlee's Operation**. See *Operations*, Table of.

**Atlodidymus** (*at-lo-did'-im-us*). Same as *Atlodymus*.

**Atlodymus** (*at-lod'-im-us*) [*ἄτλας*, able; *διδῦμος*, double]. A monosomic dual monstrosity; with two heads and a single body.

**Atloldo-** (*at-loi'-do*) [*ἄτλας*, able]. In composition, the same as *atlanto*; seen in such examples as *atloldo-axoid*, *atloldo-odontoid*, etc.

**Atmiatry** (*at-mi'-at-re*) [*ἀτμία*, vapor; *ιατρεία*, medical treatment]. Treatment of diseases of the lungs or mucous membranes, by inhalation, fumigation, or by directing a current of vapor or gas upon the part.

**Atmid-albumose** (*at-mid-al'-bu-mos*) [*ἀτμία*, vapor; *albumen*]. Neumeister's term for the albumose formed by the action of superheated steam.

**Atmidometer** (*at-mid-om'-et-er*). See *Atmometer*.

**Atmidoscope** (*at-mid'-o-skop*) [*ἀτμία*, vapor; *σκοπεῖν*, to view]. See *Atmometer*.

**Atmograph** (*at'-mo-graf*) [*ἀτμός*, breath; *γράφειν*, to record]. A form of self registering respirometer.

**Atmometer**, or **Atmidometer** (*at-mom'-et-er*; *at-mid-om'-et-er*) [*ἀτμός*, vapor; *μέτρον*, a measure]. An instrument to measure the amount of water exhaled from a given surface in a given time, in order to determine the humidity of the atmosphere.

**Atmosphere** (*at'-mos-fer*) [*ἄτμος*, vapor; *σφαῖρα*, a sphere]. The mixture of gases, vapor of water, and other suspended matters, surrounding the earth, as an elastic fluid envelop, to the height of about 200 miles.

**Atmospheric** (*at-mos-fer'-ik*) [*ἀτμός*, vapor; *σφαῖρα*, a sphere]. Pertaining to the atmosphere. **A. Moisture**, the vapor of water mingled with the atmosphere. It varies in quantity according to the temperature. **A. Pressure Cavity**, a cavity formed on the palatine surface of a set of artificial teeth to retain them in the mouth. **A. Tension**, the pressure of the air per square inch on the surface of a body. Normally, at the sea level it is about 14.7 lbs. per square inch, or equal to that of a column of mercury about 30 in. in height. It decreases about  $\frac{1}{10}$  in., or  $\frac{1}{20}$  lb. per square inch for every 90 feet of altitude. Above 10,000 feet, the rarity of the atmosphere is usually noticeable in quickened breathing and pulse rate.

**Atocia** (*at-o'-se-ah*) [*ἀτοκος*, barren]. Sterility of the female.

**Atom** (*at'-um*) [*ἄθρις*; *τέμνειν*, to cut]. The ultimate unit of an element; that part of a substance incapable of further division, or the smallest part capable of entering a chemical compound, or uniting with another to form a **Molecule**—which last is the smallest quantity of a substance that can exist free or uncombined. See *Elements*, Table of.

**Atomic** (*at-om'-ik*) [*ἄθρις*; *τέμνειν*, to cut]. Of or pertaining to atoms. **A. Heat** of an atom is its specific heat multiplied by its atomic weight. **A. Theory**, the theory of Dalton, that all matter is composed of atoms, the weight of each atom differing for the different substances. **A. Valence, Equivalence**, or the **Atomicity** of an element, is the saturating power of its atom as compared with that of hydrogen. **A. Weight**, the weight of an atom of an element as compared with the weight of an atom of hydrogen.

**Atomicity** (*at-om-is'-it-e*) [*ἄθρις*; *τέμνειν*, to cut]. Chemical valence; quantivalence.

**Atomization** (*at-om-iz-a'-shun*) [*ἄθρις*; *τέμνειν*, to cut]. The mechanical process of breaking up a liquid into fine spray.

**Atomizer** (*at'-om-i-zer*) [*ἄθρις*; *τέμνειν*, to cut]. An instrument for transforming a liquid into a spray or mist.

**Atonia** (*at-o'-ne-ah*) [*ἀτονία*, want of tone]. Atony.

**Atonic** (*at-on'-ik*) [*ἀτονία*, want of tone]. Relating to, or characterized by, atony.

**Atony** (*at'-o-ne*) [*ἄθρις*; *τόνος*, tone]. Want of tone. Debility. Loss or diminution of muscular or vital energy.

**Atopomenorrhea** (*at-o-po-men-or-e'-ah*) [*ἄτοπος*, out of place; *μην*, month; *ρεῖν*, to flow]. Vicarious menstruation.

**Atoxic** (*ah-toks'-ik*) [*ἄθρις*; *τοξικόν*, poison]. Not venomous; not poisonous.

**Atrabiliary** (*at-rah-bil'-e-a-re*) [*ater*, black; *bilis*, bile]. An obsolescent term relating to melancholy and hypochondriasis; also referring to the renal and supra-renal glands, once believed to produce black bile, or atrabilis, the cause of the gloomy disposition. **A., Capsules**, an old name for the supra-renal capsules.

**Atractylis** (*at-rak'-til-is*) [*ἀτρακτύλις*]. A genus of composite-flowered plants, nearly related to the safflower (*Carthamus*). **A. gummiifera**, of the Mediterranean region, affords *acanthamastin*. **A. lancea**, of

China and Japan, is stomachic and tonic. **A. ovata**, of the same regions, is tonic, diuretic, sudorific, and stimulant.

**Atramental** (*at-ram-en-tal*) [*atramentum*, ink]. Of an inky-black color.

**Atremia** (*ah-tre'-me-ah*) [*á priv.*; *τρέμειν*, to tremble]. 1. An absence of tremor. 2. An hysterical condition in which there is an imaginary inability to walk, stand, sit, or read.

**Atreselytria** (*at-res-el-i'-tre-ah*). See *Atretelytria*.

**Atresenteria** (*at-res-en-te'-re-ah*). See *Atretenteria*.

**Atresia** (*ah-tre'-ze-ah*) [*á priv.*; *τρήσις*, perforation]. Imperforation, either congenital or acquired, of a normal opening or canal, as of the anus, vagina, meatus auditorius, pupil, etc. The word is often compounded with the name of the organ affected; e.g., *atretocystia*, *atretenteria*, etc., denoting, respectively, imperforation of the bladder, intestine, etc.

**Atresic** (*ah-tre'-zik*) [*á, priv.*; *τρήσις*, perforation]. Marked by atresia or imperforation. See *Teratism*.

**Atresoblepharea** (*at-res-o-blef-a'-re-ah*). See *Atretoblepharea*.

**Atresocystia** (*at-res-o-sis'-e-ah*). See *Atretoysia*.

**Atresocystia** (*at-res-o-sis'-te-ah*). See *Atretocystia*.

**Atresogastria** (*at-res-o-gas'-tre-ah*). See *Atretogastria*.

**Atresometria** (*at-res-o-me'-tre-ah*). See *Atretometria*.

**Atresopia** (*ah-tres-o'-pe-ah*). See *Atretopsia*.

**Atretelytria** (*at-ret-el-i'-tre-ah*) [*ἀτρητος*, imperforate; *ἐλκτρον*, sheath]. Atresia of the vagina.

**Atretenteria** (*at-ret-en-te'-re-ah*) [*ἀτρητος*, imperforate; *ἐντέρον*, intestine]. Atresia, or imperforation of the intestinal canal.

**Atreto-** (*at-ret'-o*). As a prefix, represents the Gr. *ἀτρητος*, imperforated.

**Atretoblepharia** (*at-ret-o-blef-a'-re-ah*) [*ἀτρητος*, imperforate; *βλεφάρων*, lid]. Symblepharon, *q. v.*

**Atretocystia** (*at-ret-o-sis'-te-ah*) [*ἀτρητος*, imperforate; *κύστις*, anus]. Atresia of the anus.

**Atretocystia** (*at-ret-o-sis'-te-ah*) [*ἀτρητος*, imperforate; *κύστις*, bladder]. Atresia of the bladder.

**Atretometria** (*at-ret-o-me'-tre-ah*) [*ἀτρητος*, imperforate; *μήτρα*, womb]. Atresia of the uterus.

**Atretopsia** (*at-ret-op'-se-ah*) [*ἀτρητος*, imperforate; *ὤψ*, eye]. Imperforation of the pupil.

**Atrial** (*a'-tre-at*) [*atrium*, the fore-court, or hall]. Relating to an atrium.

**Atrichia** (*ah-trik'-e-ah*) [*á priv.*; *τριχίς*, hair]. Loss or absence of the hair.

**Atrichosis** (*ah-trik'-o'-sis*) [*ἀτριχος*, hairless]. Failure of the hair to grow; a condition characterized by absence of hair.

**Atrioventricular** (*a-tre-o-ven-trik'-u-lar*) [*atrium*, the hall; *ventriculus*, ventricle]. Relating both to the atrium (or auricle) and to the ventricle of the heart.

**Atrium** (*a'-tre-um*) [*atrium*, the fore-court, or hall]. 1. That part of the auricle of the heart into which the venous blood is poured. 2. The principal part of the tympanic cavity of the ear, exclusive of the attic. **A. cordis**, the auricle of the heart. **A. vaginæ**, the vestibule of the vulva.

**Atrocha** (*ah-tro'-kah*) [*á priv.*; *τροχός*, a wheel]. In biology, wheelless, as certain annelid embryos, rotifers, etc.; destitute of cilia.

**Atrolactic Acid** (*at-ro-lak-tin'-ik*). See *Acid*.

**Atropa** (*at'-ro-pah*) [*Ἀτροπος*, "she who turns not," undeviating; one of the three Fates, who cut the thread of life, in allusion to the poisonous effects of the plant]. A genus of the natural order *Solanaceæ*. **A. belladonna**, the deadly nightshade, whence is obtained *atropin*. See *Belladonna*.

**Atropal**, or **Atropous** (*at'-ro-pal*; *at'-ro-pus*). See *Orthotropous*.

**Atrophia** (*at-ro'-fe-ah*) [*á priv.*; *τροφή*, nourishment]. Atrophy, *q. v.* A term applied to a condition marked by wasting or innutrition. **A. cordis**, atrophy of the heart, following senile changes, or occurring in cachectic conditions, or as a result of pressure exerted by mediastinal tumors, etc. **A. cutis**, Atrophoderma; a term applied to various changes in the skin characterized by the diminution or disappearance of certain of its elements, especially seen in advanced age. The skin becomes thin, loose, wrinkled, and discolored. **A. cutis senilis**, Senile Atrophoderma; an atrophy of the skin usually associated with general signs of senile degeneration. The whole skin may be affected, together with its appendages and the subcutaneous tissues. The skin is in folds, slightly shrunken, wrinkled, and dry. It feels thin, and is transparent and shining. Pruritus is sometimes present, and there is usually an increased pigmentation, with warty developments. **A. infantum**, Synonym of *Tabes mesenterica*. **A. mesenterica**, Synonym of *Tabes mesenterica*. **A. pilorum propria**, atrophy of the hair, either symptomatic or of idiopathic origin. It may be local or generalized. The hair becomes lusterless, brittle, fibrillated, readily cleft, and readily fractured. **A. unguis**, atrophy of the nails; marked by pitting, brittleness, furrowing, thinning, crumbling, etc. It may be symptomatic of such disorders as lepra and syphilis, or it may be idiopathic.

**Atrophic** (*at-ro'-fik*) [*á priv.*; *τροφή*, nourishment]. Pertaining to, affected with, due to, characterized by, or causing atrophy. **A. Catarrh**, a chronic form of rhinitis in children characterized by marked atrophy and anemia of the pituitary membrane, with the formation of crusts in the nasal and naso-pharyngeal cavities and a peculiar and offensive odor. **A. Forms**, the name suggested by Hs for those malformations that are characterized by want of general development, and, in some instances, by subsequent atrophy, whereby all resemblance to the human embryo is lost.

**Atrophicum melanosis progressiva** (*at-ro'-fik-um mel-an-o'-sis pro-gres'-iv-ah*). See *Atrophoderma*.

**Atrophied** (*at'-ro-fid*) [*á priv.*; *τροφή*, nourishment]. Wasted; affected with atrophy.

**Atrophoderma** (*at-ro-fō-ler'-mah*) [*á priv.*; *τροφή*, nourishment; *δερμα*, the skin]. Atrophia cutis, atrophy of the skin, a wasting of the skin due to innutrition. See *Atrophia cutis*. **A. albidum**, a type of xeroderma in which the skin from the middle of the thigh to the sole, more rarely from the upper arm to the palm, is in places very white, stretched, and difficult to pick up, with the epidermis extremely thinned, faintly glistening, wrinkled, and peeling off in thin, shining flakes. There is extreme sensibility on the finger-tips, palms, and soles. The condition remains stationary from the earliest childhood. **A. neuriticum**, Glossy Skin; an atrophy of the skin in the area of a nerve affected by disease or injury. It chiefly attacks the extremities. The skin of the affected part becomes very dry, smooth, and glossy, like a thin scar; the fingers are tapering, hairless, and almost void of wrinkles and of a pink or deep-red color. A severe and persistent burning pain precedes and accompanies this condition. The nails become curved both longitudinally and transversely, and there is some thickening of the cutis beneath the free end. **A. pigmentosum**. See *Xeroderma pigmentosum*. **A., Senile**. See *Atrophia cutis senilis*. **A. striatum et maculatum**, an atrophic condition of the skin of adults characterized by streaks of a pearly or bluish-white color, glistening, scar-like, from one inch to several inches long and a quarter of an inch or more wide, and which follow the natural cleavage of the

skin, and are situated chiefly about the buttocks, anterior border of the ilium, trochanters, and thighs. The "spots" are less common, small, usually isolated, and are seen mostly on the trunk and neck.

**Atrophy** (*at-ro-fe'*) [*ἀτροφία*, want of nourishment]. A retrogressive change in parts originally well-formed and well-nourished, consisting in loss of weight, size, and function of an organ or tissue, owing to some disorder of nutrition, disuse, continuous pressure, or a diminished blood-supply to the part. **A.**, **Active**, due to the inherent inability of the cells of a tissue to assimilate the nutriment brought to them. **A.**, **Acute Yellow**. See *Icterus gravis*. **A.**, **Brown**, a form of atrophy in which the normal pigment of the organ is retained, and in which there is also frequently the addition of new pigment from the blood and disintegrated albuminates. It occurs most frequently in the heart, muscles, and liver, and is caused by chronic congestion; also called *Pigmented Atrophy*. **A.** of the **Bulb**, progressive shrinking of the eyeball. **A.**, **Correlated**, an atrophy of certain portions of the body following the removal or destruction of other portions. Thus amputation of an arm will be followed by an atrophy of the scapula; of a leg, of the corresponding os innominatum, together with a diminution in the size of the heart and large blood-vessels. **A.**, **Cruveilhier's**. See *Diseases, Table of*. **A.**, **Gray**, a degenerative change in the optic disc in which the latter assumes a grayish color. **A.** of **Hair**, a wasting or deficient growth of the hair. **A.**, **Idiopathic Muscular**, primary muscular dystrophy; muscular wasting, with or without an initial hypertrophy, beginning in various groups of muscles, usually progressive in character, and dependent on primary changes in the muscles themselves. There is a strong hereditary predisposition to the disease. **A.**, **Muscular**, affects the muscles and may be hereditary or acquired, idiopathic, myelopathic, myopathic, neuropathic, primary, secondary, simple, or progressive. **A.**, **Passive**, caused by diminished nutrition supplied to the part. **A.**, **Pigmentary**, so called from a deposit of pigment (yellow or yellowish-brown) in the atrophied fat-cells. **A.**, **Pigmented**. See *A.*, *Brown*. **A.**, **Progressive Muscular**; Chronic Anterior Poliomyelitis; Wasting Palsy. A chronic disease characterized by progressive wasting of individual muscles or physiologic groups of muscles, and by an associated and proportional amount of paralysis. It is due to a degeneration and atrophy of the multipolar cells in the anterior gray matter of the cord, with consecutive degeneration of the anterior nerve-roots and muscles. The right hand is usually the part first attacked, and it takes on a peculiar claw-like form (*main en griffe*). The disease is most frequent in males of adult life, and follows excessive muscular exertion. **A.**, **Progressive Unilateral Facial**, a disease characterized by progressive wasting of the skin, connective tissue, fat, bone, and more rarely the muscles of one side of the face. It is most common in females; its course is slow and generally progressive. Opinions vary as to whether the disease is central or peripheral in origin. **A.**, **Red**, a form of cirrhosis of the liver due to chronic congestion, as seen in mitral and tricuspid valvular lesions. It is also seen in emphysema and chronic pleurisy with contraction. The cut surface of the liver presents a nutmeg appearance, and is therefore called the *nutmeg liver*. **A.**, **Serous**, that characterized by a transudation of serum into the tissue after the fat has gone, giving it a gelatinous appearance. **A.** **Senile**, the physiological variety of *Simple Atrophy*. **A.**, **Simple**, the retrogressive processes and shrinking due to patho-

logic causes, allied to the physiologic retrogression of senility, but occurring, as it were, prematurely. **A.** of the **Teeth**, a name formerly used to designate erosion of the teeth, an affection characterized either by perforations in, or discolored spots of a shriveled, yellowish, or brownish aspect, on the enamel, of two, four, or more teeth in each jaw. **A.**, **Trophoneurotic**, that dependent upon abnormality of the nervous supply or control of an organ or tissue, best illustrated in muscular atrophy from injury of the proper nerves of the muscle, or in disease of the anterior horns of gray matter of the cord.

**Atropina**, or **Atropin** (*at-ro-pi'-nuth*; *at'-ro-pin*) [*Ἀτροπίνη*, one of the Fates who cut the thread of life; *gen.*, *Atropine*],  $C_{17}H_{23}NO_3$ . A crystalline alkaloid derived from *Atropa belladonna*. The sulphate is a white powder of bitter taste, neutral reaction, soluble in water. *Homatropin*,  $C_{16}H_{21}NO_3$ , is a derivative alkaloid, the hydrobromate being used by ophthalmologists as a mydriatic, principally because its effects pass off more quickly than those of atropin. *Homatropin* slows the heart, atropin quickens it. Atropin is an irritant narcotic, a mydriatic, antispasmodic, and anodyne; in small doses a cardiac, respiratory, and spinal stimulant, in large doses a paralyzant of the cardiac and respiratory centers, the spinal cord, motor nerves, and voluntary muscles. It produces congestion and dryness of the mucous membrane of the mouth, nose, pharynx, and larynx, at first lessening the gastric and intestinal secretion, to be followed by an increase of the same. It is extensively used in ophthalmic practice to dilate the pupil, paralyze accommodation, and also in various corneal, iritic, and other ocular diseases. Its therapeutic use in general medicine is also manifold; *e.g.*, in inflammatory affections and the pain of cerebral and spinal hyperemia, atonic constipation, cardiac failure, hypersecretions, etc., and as a physiologic antagonist in opium poisoning. Dose of atropin sulphate gr.  $\frac{1}{12}$  to  $\frac{1}{8}$ . **Injectio Homatropina Hypodermica**, 1 in 120. Dose gr.  $\frac{1}{12}$  to  $\frac{1}{8}$ . **A.**-**catarrh**. See *Conjunctivitis*, *Atropin*. **A.**-**conjunctivitis**. See *Conjunctivitis*.

**Atropinism** (*at'-ro-pin-izm*). See *Atropism*.

**Atropinize** (*at'-ro-pin-iz*) [*Ἀτροποιεῖν*]. To bring under the influence of, or treat with atropin.

**Atropism** (*at'-ro-pizm*) [*Ἀτροπισμός*]. Poisoning with, or the morbid condition induced by, atropin.

**Attachement** (*at-tash'-mon-gr*) [*Fr.*]. In massage, concentric curves eccentric; starting from a point taken as a center, one describes, by circular movements, circumferences wider and wider till the outside of the part is reached; return is then made by circles smaller and smaller till the starting point is reached.

**Attack** (*at-tak'*) [*Fr.*, *attaque*]. The onset of a seizure or of a disease.

**Attar** (*at'-ar*) [*Pers.*, *âtar*]. A general name for any of the volatile oils. **A.** of **Rose**, Oil of Rose. The volatile oil distilled from the fresh flowers of the Damascene rose. It comes mainly from E. Roumelia and is generally adulterated with other volatile oils. It is used only as a perfume.

**Attendant** (*at-ten'-dant*) [*attender*, to attend]. A non-professional attaché of an asylum or hospital, especially of an insane asylum.

**Attention** (*at-ten'-shun*) [*attentio*, a giving heed to]. The direction of the will or thought upon an object or to a particular sensation. **A.** **Time**. See *Time*.

**Attenuant** (*at-ten'-u-ant*) [*attenuare*, to make thin]. A medicine or agent increasing the fluidity or thinness of the blood or other secretion.

**Attenuating** (*at-ten'-u-a-ting*) [*attenuare*, to make thin]. Making thin. **A.** **Medium**. See *Fractional Cultivation*.

**Attenuation** (*at-ten-u-a'-shun*) [*attenuare*, to make thin].

A thinning, narrowing, or reduction of the strength or size of a substance. **A. of Microbes**, weakening the pathogenic virulence of microbes by successive cultures and other methods, so that they may be used as a vaccine to confer immunity from future attacks of the disease. **A., Sanderson's Method of**, by passing the virus through the system of another animal (e.g., the guinea pig, in anthrax), so that it becomes modified in virulence. Toussaint and Chauveau have shown that heat is a valuable means of attenuation; oxygen, chemical reagents, exposure to sunlight, etc., have also been used.

**Attermental** (*at-er'-min-al*). See *Adterminal*.

**Attic** (*at'-ik*) [*Atticus*, Attic]. Part of the tympanic cavity situated above the atrium. **A. Disease**, chronic suppurative inflammation of the attic of the tympanum.

**Attitude** (*at'-e-ti-tud'*) [*aptitudo*, aptitude]. See *Posture*.

**A., Crucifixion**, in hystero-epilepsy, a rigid state of the body, the arms stretched out at right angles. **A., Frozen**, a peculiar stiffness of the gait characteristic of disease of the spinal cord, especially of amyotrophic lateral sclerosis. **A., Passionate**, the assumption of a dramatic or theatrical expression, a position assumed by some hysterical patients.

**Attollens** (*at-ol'-enz*) [*attollere*, to rise up]. Applied to muscles raising or elevating the part, as the **A. Auris**, a muscle raising the external ear. See *Muscles, Table of*.

**Attraction** (*at-rak'-shun*) [*attrahere*, to draw to]. The tendency of one particle of matter to approach another. **Affinity**. As existing between celestial bodies it is termed *gravitation*, while *molecular attraction* or *cohesion* expresses the force aggregating molecules into masses. **A., Chemical**, the attraction of affinity, relates to the attraction of atoms of one element to those of others, resulting in chemical compounds. **A., Capillary**, the tendency of a curved surface or a tube to exert traction on a liquid. **A., Electrical**, the tendency of bodies toward each other when charged with opposite electricities. **A., Magnetic**, the influence of a magnet upon certain metallic substances, chiefly iron.

**Attrahens** (*at'-rah-enz*) [*attrahens*, drawing]. Applied to muscles as **Attrahens aurem**, a muscle drawing the ear forward and upward. See *Muscles, Table of*. Also applied to medicines attracting fluids to a part, as stimulants, epispastics, etc.

**Attrahent** (*at'-rah-ent*) [*attrahens*, drawing]. 1. Drawing to; adductent. 2. A drawing application; an epispastic or rubefacient.

**Attrition** (*at-rish'-un*) [*atterere*, to rub against]. An abrasion or chafing of the skin. In physics, any rubbing or friction that breaks or wears the surface.

**Attypic** (*at-ip'-ik*) [*at*, to; *τύπος*, a type]. In biology, possessing by acquisition or specialization the characters of a prototype.

**Atypic** (*ah-tip'-ik*) [*à priv.*; *τύπος*, a type]. Irregular; not conformable to the type. **A. Fever**, an intermittent fever with irregularity of the paroxysm.

**Atypical** (*ah-tip'-ik-al*). See *Atypic*.

**Auante** (*aw-an'-te*) [*ἀνὰ πῖ; ἀνάλειν*, to dry]. A wasting or atrophy.

**Auantic** (*aw-an'-tik*) [*ἀνὰ τικός*, wasted]. Characterized by wasting; atrophic.

**Aubernage** (*o-bär-nahzh'*) [Fr.]. A contagious disease of the vine, called by the Italians the *Black Disease*. It is doubtful whether it is due to a fungus or a bacterium. Cf. *Bacterium gummiis, comes*, under *Bacteria, Synonymatic Table of*.

**Aurn System**. See *Ventilation*.

**Auctioneers' Cramp**. See *Cramp*.

**Audimeter** (*aw-dim'-et-er*). See *Audiometer*.

**Audiometer** (*aw-de-om'-et-er*) [*audire*, to hear; *μετρον*, a measure]. An instrument for measuring the acuteness of hearing.

**Audiometric** (*aw-de-o-met'-rik*) [*audire*, to hear; *μετρον*, a measure]. Relating to audiometry.

**Audiometry** (*aw-de-om'-et-er*) [*audire*, to hear; *μετρον*, a measure]. The measurement, or testing, of the sense of hearing.

**Audiphone** (*aw-dif-on*) [*audire*, to hear; *φωνή*, a sound]. An instrument for improving the power of hearing by conveying sounds through the bones of the head to the labyrinth.

**Audition** (*aw-dish'-un*) [*audire*, to hear]. The act of hearing. **A. colorée**, a peculiar association between the auditory and optic nerves, by which a certain sound or musical note will give rise to a subjective sensation of color, the same note in the same person being always associated with the same color.

**Auditory** (*aw'-dit-o-re*) [*audire*, to hear]. Pertaining to the act or the organs of hearing. **A. After-Sensations**, the sensations of sounds continuing or occurring after the cessation of the stimulus. **A. Amnesia**. See *Mind-deafness*. **A. Area**, the cerebral center for hearing; its location is not definitely determined. **A. Aura**, auditory sensation preceding an attack of epilepsy. **A. Center**, same as *A. Area*. **A. Hairs**, the processes of the crista acustica, at present of indeterminate function. **A. Meatus** (external and internal), the external and internal canals or openings of the ear. **A. Nerve**, the *portio mollis* of the seventh pair of cranial nerves. **A. Ossicles**, the chain of small bones of the middle ear. **A. Sac**, the labyrinth, pit, or depression in the epiblast on both sides of the embryologic after-brain. When cut off from the epiblast it is called the vesicle of the labyrinth, or **Primary Auditory Vesicle**. **A. Teeth**. See *Teeth*. **A. Vertigo**, dizziness due to pathologic conditions of the ear. See *Vertigo* and *Mènière's Disease*.

**Auditus** (*aw-dit'-tus*) [L.]. Hearing; the sense or power of hearing.

**Auerbach's Ganglia**. See *Ganglia, Table of*.

**Auerbach's Plexus**. See *Plexuses, Table of*.

**Augment** (*avg'-ment*) [*augmentum*, increase]. The increasing stage of a fever or other acute disease.

**Augmentation** (*avg-men-ta'-shun*) [*augmentatio*, an increasing]. 1. Same as *Augment*. 2. Increase in the violence of symptoms.

**Augnathus** (*avg-na'-thus*) [*av', besides*; *γυθος*, the jaw]. A monster with two lower jaws. See *Diprosopus*.

**Aula** (*aw'-lah*) [*αὐλή*, a hall or open court]. 1. The common mesal cavity of the cerebrum, it being also the anterior portion of the third ventricle. 2. In biology, a space or cavity formed by a colony of infusorians.

**Aulatela** (*aw-lat-e' lah*) [*aula*, a hall; *tela*, a web]. The roof or covering membrane of the aula.

**Aulic** (*aw'-lik*) [*αὐλή*, a hall]. Belonging or pertaining to the aula. **A. Recess**, a triangular depression between the precommissure and the two fornicolumns of the brain.

**Auliplexus** (*aw-le-pleks'-us*) [*aula*, hall; *plexus*, a network]. The choroid plexus of the aula.

**Aulix** (*aw'-liks*) [*αὐλίξ*, a furrow]. The sulcus of Monro, a groove on the mesal surface of the thalamus just ventrad of the mediodorsal commissure.

**Aulophyte** (*aw'-lo-fit*) [*αὐλός*, a pipe or tube; *φυτόν*, a plant]. In biology, a symbiotic plant; one that lives within another, but not as a parasite.

**Aura** (*aw'-rah*) [*αἶψα*, a breath]. A breath of wind; a soft vapor. A sensation sometimes like a gentle

- current of air rising from the limbs or body to the head; a frequent forerunner of an epileptic attack,—*aura epileptica*. Also applied to any slight symptom preceding an attack of any disease or paroxysm, as the *aura hysterica*, *aura vertiginosa*, etc. **A. seminalis theory**, a theory of Swammerdam, who, observing a strong odor from drone bees, supposed that this, permeating the body of the queen, fertilized the eggs.
- Aural** (*aw'-ral*) [*auris*, the ear]. Relating to the ear or to hearing. **A. Vertigo**. See *Ménière's Disease*.
- Aurally** (*aw'-ral-e*) [*auris*, the ear]. By means of the ear.
- Auramin** (*aw'-ram-in*) [*aurum*, gold; *amin*]. Yellow Pyoktanin, *q. v.*: a yellow anilin color used to some extent as a bactericide and preventive of suppuration. Unof.. See *Conspectus of Pigments*, under *Pigment*.
- Aurantia** (*aw'-ran'-she-ah*) [*aurantium*, an orange]. An orange coal-tar dye; an ammonium salt of hexanitro-diphenyl-amin. The use of this dye has been said to produce skin-diseases. See *Conspectus of Pigments*, under *Pigment*.
- Aurantium** (*aw'-ran'-she-um*) [*L.*: *gen.*, *Aurantii*]. Orange. The fruit of *Citrus vulgaris* and *C. aurantium*. Both the flowers and the rind of the fruit are employed in medicine. The volatile oil from the rind is aromatic and a mild tonic but is used mainly as a flavor. **A. amara**, Ext. Fld., bitter orange peel, alcohol, and water. Used as a flavor. Dose  $\frac{ss-j}$ . **A. amara**, Tinct., bitter orange peel 20, dilute alcohol, *q. s.* ad 100. Dose  $\frac{3-j-i}$ . **A. corticis**, Ol., the volatile oil expressed from the rind of the orange. Dose *gtt. j-v*. **A. dulcis**, Tinct., sweet orange peel 20, dilute alcohol, *q. s.* ad 100. Dose  $\frac{3-j-i}$ . **A.**, Elixir, oil of orange 1, sugar 100, alcohol and water, *q. s.* ad 30. **A. flores**, Aq., fresh orange flowers 40, water 200. Distil to 100 parts. **A. florum**, Ol., "oil of neroli," a volatile oil distilled from fresh orange flowers. Dose *gtt. j-v*. **A. florum**, Syr., sugar 85, orange-flower water *q. s.* A flavoring-agent. **A.**, Infus. (B. P.). Dose  $\frac{3-j-i}$ . **A.**, Infus., Comp. (B. P.). Dose  $\frac{3-j-i}$ . **A.**, Spt., oil of orange 6, alcohol 94. Dose according to quantity of alcohol desired. **A.**, Spt., Comp., oil of orange-peel, 20, oil of lemon 5, oil of coriander 2, oil of anise 5, deodorized alcohol *q. s.* **A.**, Syr., sweet-orange peel, precipitated calcium phosphate, each 5, sugar 70, alcohol and water *q. s.* **A.**, Tinct. (B. P.). Dose  $\frac{3-j-i}$ . **A.**, Tinct. Recentis (B. P.), tinct. of fresh orange-peel. Dose  $\frac{3-j-i}$ . **A.**, Vinum (B. P.), 12 per cent of alcohol.
- Auricle** (*aw'-rik'-l*) [*auricula*, the outer ear]. The pinna and external meatus of the ear. The auricles of the heart are the two cavities between the veins and the ventricles. See *Circulation*, and *Heart*.
- Auricular** (*aw'-rik'-u-lar*) [*auricula*, the outer ear]. Relating to the auricle, or to the ear; as the auricular nerve, arteries, veins, etc. The *Auricular arteries*, anterior and posterior, are branches of the temporal and external carotid, supplying the auricle of the ear. **A. Finger**, the little finger. **A. Fissure**. See *Fissure*. **A. Foramen**, the outlet of the meatus of the ear. **A. Lymphatics**, small lymphatic glands near the upper end of the sterno-mastoid muscle. **A. Point**, the central point of the auricular foramen. See *Cranimetric Points*.
- Auriculars** (*aw'-rik'-u-lar-z*) [*auricula*, the ear]. In biology, the feathered area that conceals the ears in most birds; regio-auricularis.
- Auriculo-bregmatic** (*aw'-rik'-u lo-breg-mat'-ik*) [*auricula*, the ear; *βρεγμα*, a soft spot]. Relating to the auricle and to the bregma.
- Auriculo-occipital** (*aw'-rik'-u lo-ok-sip'-it-al*) [*auricula*, the ear; *occiput*, the back of the head]. Pertaining both to the ear and the back of the head. **A. Triangle**. See *Triangle*.
- Auriculo-parotidic** (*aw'-rik'-u lo-par-ot-id'-e-an*) [*auricula*, the ear; *παροτις*, the parotid gland]. Relating to the auricle and to the parotid gland.
- Auriculo-temporal** (*aw'-rik'-u lo-tem'-po-ral*) [*auricula*, the ear; *tempora*, the temples]. Relating to the auricle and to the temporal region. **A. nerve**, a branch of the inferior maxillary, supplying superficial parts about the auricle.
- Auriculo-ventricular** (*aw'-rik'-u lo-ven-trik'-u-lar*) [*auricula*, the ear; *ventriculus*, the ventricle]. Relating to an auricle and a ventricle of the heart. **A. opening**, the opening between the auricles and the ventricles of the heart.
- Auriform** (*aw'-rif-orm*) [*auris*, the ear; *ferma*, shape]. Ear-shaped.
- Aurigo** (*aw'-ri'-go*) [*L.*]. An incorrect form of the word *aurugo*.
- Aurilave** (*aw'-ril-av*) [*auris*, the ear; *lavare*, to wash]. An ear-brush or ear-sponge mounted upon a handle.
- Aurin** (*aw'-rin*) [*aurum*, gold],  $C_{19}H_{11}O_8$ . Pararosanilic acid; a body produced on boiling the diazo-hydrochlorid of para-roanilin with water. It dissolves in glacial acetic acid and alcohol, crystallizes in dark-red needles or prisms with metallic luster, and decomposes when heated above 220°. It is a dye-stuff used in printing calicoes and woollens and for pigments, and produces orange-red colors. See *Conspectus of Pigments*, under *Pigment*.
- Auripigment** (*aw'-rip'-ig'-ment*) [*auripigmentum*, golden pigment]. See *Orpiment*.
- Auripuncture** (*aw'-re-punkt-chūr*) [*auris*, the ear; *punctura*, puncture]. Surgical or traumatic puncture of the membrana tympani.
- Auris** (*aw'-ris*) [*L.*]. The ear.
- Auriscalp** (*aw'-ris-kalp*) [*auris*, the ear; *scalpare*, to scrape]. An ear-pick or probe for the ear.
- Auriscopes** (*aw'-ris-kop*) [*auris*, the ear; *σκοπεῖν*, to examine]. An instrument for examining the ear, and especially the Eustachian passage; an otoscope.
- Aurist** (*aw'-rist*) [*auris*, the ear]. A specialist in diseases of the ear.
- Aurugo** (*aw'-ru'-go*) [*L.*]. Yellowness; jaundice; icterus.
- Aurum** (*aw'-rum*) [*L.*: *gen.*, *Auri*]. Gold. Au = 196.7; quantitative, III. One of the metals characterized as "noble" by the ancients, because of its weight and luster. It has a brilliant yellow color and will not tarnish. The metal is sometimes used as a plate on which artificial teeth are set. The chlorid locally is an escharotic. Internally its action resembles that of mercuric chlorid. In small doses it promotes digestion and stimulates the functions of the brain; in large doses it is a violent poison. It is useful in certain forms of dyspepsia, hypochondriasis, amenorrhea, and functional impotence. Poisoning is treated by albumen (eggs) or flour, and evacuation of the stomach. **A. brom.**,  $AuBr_3$ , is used in epilepsy and migraine. Dose *gr.  $\frac{1}{30}$ - $\frac{1}{15}$* . **A. et sodii chlor.**, soluble in water. Dose *gr.  $\frac{1}{30}$ - $\frac{1}{15}$* . **A. chloridum** (unof.). Soluble. Dose *gr.  $\frac{1}{30}$ - $\frac{1}{15}$* . Gold chlorid is also valued as a stain for sections of brain-tissue and of nerve-ganglia; it has been vaunted as a cure for the alcoholic habit.
- Auscult**, or **Auscultate** (*aw'-kul'-t*; *aw'-kul-tāt*) [*auscultare*, to listen to]. To perform or practise auscultation; to examine by auscultation.
- Auscultation** (*aw'-kul-tā'-shun*) [*auscultare*, to listen to]. A method of investigation of the functions and condition of the respiratory, circulatory, digestive, and other organs by the sounds they themselves give out, or

that are elicited by percussion. It is called *immediate*, when the ear is directly applied to the part, and *mediate*, if by the aid of the stethoscope. *Obstetric auscultation* is practised in pregnancy to detect or study the fetal heart-sounds or the placental murmur. See *Murmur*, *Respiration*, *Râles*, *Rhouschus*, *Bronchophony*, *Pectoriloquy*, *Egophony*, *Bruit*, *Souffle*, etc. **A.-tube**, in otology, an instrument for listening to the forced passage of air through the ear of another.

**Auscultatory** (*aws-kul'-tat-or-e*) [*auscultare*, to listen to]. Relating to auscultation. **A. Percussion**, the practise of auscultation by one person, while another practises percussion.

**Australian** (*aws-träl'-yan*) [*Australia*]. Of or belonging to Australia. **A. Blight**. See *Angio-neurotic Edema*. **A. Sassafras**. See *Atherosperma moschata*.

**Autacanthid** (*aw-tak-an'-thid*) [*αὐτόας*, self; *ἀκανθα*, a spine]. In biology, applied to a star-fish having many of the spines on special plates.

**Autachoscope** (*aw-tekt'-o-sköp*) [*αὐτός*, self; *ἵστος*, sound; *σκοπεῖν*, to inspect]. A device for enabling a person to listen to sounds produced within his own body.

**Autecious, or Autæcious** (*aw-te'-shus*) [*αὐτός*, self; *οἶκος*, dwelling]. In biology, same as *Monæcious*; also applied to parasitic fungi that pass through all the stages of their existence on the same host.

**Autenrieth and Hinsberg's Test**. See *Tests*, *Table of*.

**Autocarpous** (*aw-to-kar'-pus*) [*αὐτός*, self; *καρπός*, fruit]. In biology, said of a fruit consisting of a superior and free ovary.

**Autocatheterism** (*aw-to-kath'-et-er-izm*) [*αὐτός*, self; *καθετήρ*, a catheter]. The passage of a catheter by a person upon himself.

**Autocatheterist** (*aw-to-kath'-et-er-ist*) [*αὐτός*, self; *καθετήρ*, a catheter]. One who practises autocatheterism.

**Autocatheterization** (*aw-to-kath-et-er-iz-a'-shun*). The process of catheterizing one's self.

**Autochthon** (*aw-tok'-thun*) [*αὐτόχθων*, sprung from the land]. An aboriginal inhabitant.

**Autochthonous** (*aw-tok'-thon-us*) [*αὐτόχθων*, sprung from the land]. Aboriginal; formed (as a clot) in the place where it is found.

**Autocinesis** (*aw-to-sin'-el-sis*) [*αὐτός*, self; *κίνησις*, motion]. Motion that is voluntary, or apparently so.

**Autocinetic** (*aw-to-sin'-el-ik*) [*αὐτός*, self; *κίνησις*, motion]. Possessed of the power of spontaneous motion.

**Autoclave** (*aw'-to-klāv*) [*αὐτός*, self; *clavis*, a key]. 1. Self-fastening; closing itself. 2. An instrument for sterilizing or killing germ-life by steam-heat, the gauge indicating automatically the pressure, and therefore the degree of heat, to which the microörganism is subjected.

**Autodiagnosis** (*aw-to-di-ag-no'-sis*) [*αὐτός*, self; *διάγνωσις*, a discovering]. Self-diagnosis; the morbid impression sometimes possessed by a patient that he is affected with some particular disease. This impression may amount to a fixed and dominant idea.

**Autodidact** (*aw'-to-di-dakt*) [*αὐτός*, self; *διδάκτορας*, taught]. One who is self-taught in his profession.

**Autodigestion** (*aw-to-di-jis'-chun*) [*αὐτός*, self; *digere*, to digest]. Digestion of the walls of the stomach by the gastric juice consequent upon loss of the epithelium, or upon other gastric disease. *Autopepsia*.

**Autogamous** (*aw-to-g'-am-us*) [*αὐτός*, self; *γάμος*, marriage]. In botany, a name applied to flowers that are habitually self-fertilizing.

**Autogenesis** (*aw-to-jen'-es-is*) [*αὐτός*, self; *γένεσις*, production]. Spontaneous generation; self-production.

**Autogenetic** (*aw-to-jen'-el-ik*) [*αὐτός*, self; *γενεσις*, production]. Developed by or due to autogenesis; produced, as disease, within the organism; not enthetic.

**Autogenous** (*aw-toj'-en-us*) [*αὐτός*, self; *γενεσις*, production]. Pertaining to diseases or conditions self-producing within the body and not derived from external or objective sources; applied to poisons generated in the body by its inherent processes,—e. g., puerperal fever has been falsely supposed to be due to self-generation of the septic material.

**Autographic** (*aw-to-graf'-ik*) [*αὐτός*, self; *γράφειν*, to write]. Self-registering. **A. Skin**, a condition of vaso-motor paralysis, usually in hysterical patients, in which markings made upon the skin form quite persistent and intensely red traces. **A. Woman**, one with an *Autographic Skin*.

**Autographism** (*aw'-to-graf-izm*) [*αὐτός*, self; *γράφειν*, to write]. The condition observed in the so-called autographic skin; dermatographism. See *Urticaria factitia*.

**Autographist** (*aw'-to-graf-ist*) [*αὐτός*, self; *γράφειν*, to write]. One who has an autographic skin.

**Autohypnotism** (*aw-to-hip'-not-izm*) [*αὐτός*, self; *ἵπνωσις*, sleep]. Mental stupor induced by dwelling intensely upon some all-absorbing delusion. See also *Staturvolence*.

**Autoinoculation** (*aw-to-in-ok-u-la'-shun*) [*αὐτός*, self; *inoculare*, to implant]. Reinoculation by virus obtained from the same person.

**Autointoxication** (*aw-to-in-toks-ik-a'-shun*). See *Autotoxic*.

**Autokinesis** (*aw-to-kin'-el-sis*) [*αὐτός*, self; *κίνησις*, movement]. 1. Voluntary movement; movement not reflex or allokinetic. 2. Movement that is apparently not volitional, but that arises from causes within the organism.

**Autokinetic** (*aw-to-kin'-el-ik*) [*αὐτός*, self; *κίνησις*, movement]. Pertaining to, or of the nature of, autokinesis.

**Autolaryngoscopy** (*aw-to-lar-ing-gos'-ko-pe*) [*αὐτός*, self; *λάρυξ*, the larynx; *σκοπεῖν*, to examine]. The examination of one's larynx by himself.

**Auto-massage** (*aw-to-mas-sahzh'*) [*αὐτός*, self; *μάσσειν*, to knead]. Self-massage; therapeutic manipulations of the body performed by the patient himself.

**Automatic** (*aw-to-mat'-ik*) [*αὐτοματιζέειν*, to act spontaneously]. Performed without the influence of the will. **A. Plugger**, an instrument adapted for pounding gold foil in the cavities of teeth.

**Automatism** (*aw-tom'-at-izm*) [*αὐτοματιζέειν*, to act spontaneously]. The performance of acts without apparent volition, as seen in certain somnambulists and in some hysterical and epileptic patients.

**Automatograph** (*aw-to-mat'-o-graf*) [*αὐτοματιζέειν*, to act spontaneously; *γράφειν*, to record]. An instrument for registering involuntary movements of the hand.

**Automaton** (*aw-tom'-at-u*) [*αὐτοματός*, spontaneous]. One who acts in an involuntary or mechanical manner. **A. Blowpipe**. See *Blowpipe*.

**Automysophobia** (*aw-to-mis-o-fö'-be-ah*) [*αὐτός*, self; *μίσις*, filth; *ὄφθος*, fear]. Insane dread of personal uncleanness.

**Autonomy** (*aw-ton'-o-me*) [*αὐτός*, self; *νόμος*, law]. The independent existence of a disease or of a *malæcus morbi* within the organism.

**Autonyctobatesis** (*aw-to-nik-to-bal'-el-sis*) [*αὐτός*, self; *νύξ*, night; *βαίνειν*, to walk]. Somnambulism.

**Autopathic** (*aw-to-path'-ik*) [*αὐτός*, self; *πάθος*, suffering]. The same as *Endopathic*.

**Autopepsia** (*aw-to-pep'-se-ah*) [*αὐτός*, self; *πέπειν*, to digest]. Autodigestion.

**Autophagia** (*aw-to-fha'-je-ah*) [*αὐτός*, self; *φαγεῖν*, to eat]. Self-consumption; emaciation.

**Autophagous** (*aw-toff'-ag-us*) [*αὐτὸν*, self; *φαγῶν*, to eat]. In biology, self-feeding as soon as hatched.

**Autophagy** (*aw-toff'-a-jē*) [*αὐτὸν*, self; *φαγῶν*, to eat]. In starvation the absorption of the tissues themselves for nutrition. Life may be thus continued until about half the body-weight has been consumed.

**Autophilia** (*aw-to-fil'-ah*) [*αὐτὸν*, self; *φιλέω*, to love]. Morbid self esteem.

**Autophobia** (*aw-to-fil'-o-ah*) [*αὐτὸς*, self; *φοβός*, fear]. A morbid dread of one's self, or of solitude.

**Autophonia** (*aw-to-fil'-n-ah*). See *Autophony*.

**Autophonomania** (*aw-to-fil'-no-ma'-ne-ah*) [*αὐτοφονία*, suicide; *μανία*, madness]. Suicidal mania.

**Autophonous** (*aw-toff'-on-us*) [*αὐτός*, self; *φωνή*, voice]. Having the character of autophony.

**Autophony** (*aw-toff'-ē-nē*) [*αὐτός*, self; *φωνή*, voice]. In auscultation, the peculiar quality of the physician's own voice while listening to the patient's chest-sounds.

**Autophthalmoscope** (*aw-toff'-thal'-mo-skop*). See *Ophthalmoscope*.

**Autophyllogeny** (*aw-to-fil'-ōj'-en-ē*) [*αὐτός*, self; *φύλλον*, leaf; *γενεσις*, production]. In biology, the production of leaves by leaves.

**Autoplast** (*aw'-to-plast*) [*αὐτός*, self; *πλάσσειν*, to form]. In biology: 1. The chlorophyll body. 2. A cell of independent spontaneous origin.

**Autoplasty** (*aw'-to-plas-te*) [*αὐτός*, self; *πλάσσειν*, to form]. A method of repairing the effects of a wound or lesion involving loss of tissue by grafting or implanting fresh parts taken from other portions of the patient's body.

**Autopsic** (*aw-top'-sik*) [*αὐτός*, self; *ὄψις*, a seeing]. Relating to an autopsy.

**Autopsy** (*aw'-top-se*) [*αὐτός*, self; *ὄψις*, a seeing]. 1. Examination, or seeing one's own self; self-inspection. 2. The post-mortem study of the body of another. The use of the word in this sense, however, is etymologically absurd. See *Necropsy*.

**Autoscope** (*aw'-to-skōp*) [*αὐτός*, self; *σκοπεῖν*, to see]. An instrument, e. g., the ophthalmoscope, arranged for the examination of an organ by oneself.

**Autoscopy** (*aw-tos'-kō-pē*) [*αὐτός*, self; *σκοπεῖν*, to see]. The examination of one's own organs or disease by means of an autoscope.

**Autosite** (*aw'-to-sit*) [*αὐτός*, self; *σῖτος*, food]. 1. A monster capable of an independent existence after birth. 2. That member of a double fetal monstrosity that nourishes itself by its own organs as well as the other member, which is called the parasite.

**Autositic** (*aw-to-sit'-ik*) [*αὐτός*, self; *σῖτος*, food]. Of the nature of an autosite.

**Autostethoscope** (*aw-to-steth'-o-skōp*) [*αὐτός*, self; *στήθος*, the breast; *σκοπεῖν*, to examine]. A stethoscope so arranged that by it one may listen to his own chest-sounds.

**Autosuggestion** (*aw-to-sug-jes'-chun*) [*αὐτός*, self; *suggestio*, an intimation]. A term suggested by Page for that peculiar mental condition, often developing after railway accidents; it is intimately associated with the hypnotic state. In both of these conditions the mental spontaneity, the will, or the judgment, is more or less suppressed or obscured, and suggestions become easy. Thus the slightest traumatic action directed to any member may become the occasion of a paralysis, of a contracture, or of an arthralgia. It is also called *traumatic suggestion*.

**Autotemnon** (*aw-to-tem'-non*) [*αὐτός*, self; *τέμνειν*, cut]. In biology, the self-dividing unicellular organism.

**Autotherapy** (*aw-to-ther'-a-pē*) [*αὐτός*, self; *ἰατρικία*, a waiting on]. The spontaneous or self-cure of a disease.

**Autotoxemia** (*aw-to-toks-el'-mē-ah*) [*αὐτός*, self; *τοξικαί*, a poison; *αἷμα*, blood]. Toxemia from poisons derived from the organism itself.

**Autotoxic** (*aw-to-toks'-ik*) [*αὐτός*, self; *τοξικόν*, poison]. Self-empoisonment through the absorption of noxious products of katabolism, as in *uremia*. Cf. *Autointoxication*.

**Autotoxin** (*aw-to-toks'-in*) [*αὐτός*, self; *τοξικόν*, a poison]. Any product of tissue metamorphosis within the organism that has a toxic effect upon that organism.

**Autotransfusion** (*aw-to-trans-fu'-zhun*) [*αὐτός*, self; *transfusio*, a pouring from one vessel into another]. The transfer of the blood to the brain and other central organs by elevating the hips and legs, and by the use of elastic bandages.

**Autovaccination** (*aw-to-vaks-in-a'-shun*) [*αὐτός*, self; *vaccinatio*, to vaccinate]. The reinsertion of fresh vaccine-lymph upon the same person from whom it is taken, either by the vaccinated person himself or by some other person, whether intentionally or by accident.

**Autumn** (*aw'-tum*) [*autumnus*, autumn]. The fall of the year. **A. Catarrh**. Synonym of Hay-fever, occurring in August and the fall of the year.

**Autumnal** (*aw-tum'-nal*) [*autumnus*, autumn]. Pertaining to the fall of the year. **A. Fever**. Synonym of Typhoid Fever, *q. v.*

**Auxanometer** (*awks-an-om'-et-er*) [*αὐξανειν*, to grow; *μέτρον*, measure]. An instrument used in biologic study for measuring the growth of young organisms.

**Auxe** (*awks'-ē*) [*αὔξειν*, increase]. Enlargement in bulk or volume.

**Auxesis** (*awks-el'-sis*) [*αὐξίσις*, enlargement]. Increase in size or bulk. Hypertrophy is a word often incorrectly used where Auxesis is meant.

**Auxetic** (*awks-el'-ik*) [*αὐξητικός*, enlargement]. Characterized by auxesis.

**Auxiliary** (*awks-il'-e-a-re*) [*auxilium*, a helper]. Aiding.

**Auxilium** (*awks-il'-e-um*) [L., "help"]. A wheeled vehicle or ambulance with couch and mattresses, for use in the service of field military hospitals.

**Auxocardia** (*awks-o-kar'-de-ah*) [*αὔξη*, an increase; *καρδία*, the heart]. The normal increase of the volume of the heart during diastole, in distinction from meiocardia, the diminution during systole.

**Auxospore** (*awks'-o-spōr*) [*αὔξειν*, to grow; *σπόρος*, seed, offspring]. A large spore produced, either asexually, or by conjugation, in the Diatomaceæ.

**Auxotonic** (*awks-o-tōn'-ik*) [*αὔξειν*, to grow; *τόνος*, tension]. Determined by growth. **A. Movements**, in biology, movements due to growth rather than to stimulation.

**Ava Kava** (*ah'-kah kah' vah*). See *Kava-Kava*.

**Avalanche Theory**. Pflüger's opinion that nerve energy gathers intensity as it passes toward the muscles.

**Aveling's Apparatus**. An apparatus employed in the immediate transfusion of blood. **A. Curve**. The S-shaped curve of the handles of obstetric forceps. **A. Operation**. See *Operations*, *Table of*.

**Avena** (*av'-ē-nah*) [L.]. A genus of plants. Oat. **A. farina**, oatmeal. **A. sativa**, the embryo of the seed of the common oat plant. It contains starch, gluten, a ferment called diastase, and a small amount of alkaline phosphates, and is a nutritious food. Dose of the concentrated tinct. or fld. ext. ℞-5 ij. The pericarp contains an alkaloid possessed of slight narcotic powers. Unof.

**Avenin** (*av'-ē-nin*) [*avena*, the oat]. 1. A precipitate made from a tincture of *avena sativa*, or the oat. It is a nerve-stimulant and tonic. Unof. 2. A

nitrogenous principle obtained from the oat, and nearly identical with legumin; the gluten casein of oats.

**Avens** (*av'-enz*) [Welsh, *afans*]. A name given to several plants of the genus *Geum*. **A. Root**, the root of *Geum rivale*, a tonic and astringent. It contains gallic and tannic acids. Dose of fld. ext.  $\frac{3}{4}$  ss-j. Unof.

**Avery's Operation**. See *Operations*, *Table of*.

**Aviation** (*a-ve-al'-shun*) [*avis*, a bird]. Artificial flight.

**Avidity** (*av-id'-it-e*) [*avidus*, greedy]. In chemistry, the tendency of certain weak acids, in suitable conditions, to dispossess even the strongest acids and to unite with their bases.

**Avocado Pear** (*av-o-ka'-do*). See *Alligator Pear*.

**Avogadro, Law of**. See *Law and Ampère*.

**Avoirdupois Weight** (*av-or-du-poi's wät*) [Fr., *avoir*, to have; *du poids*, of weight]. The common English weight used for all commodities except precious metals, gems and medicines. The pound is equal to 7000 grains Troy, or 453.54 grams, or 16 ounces. The ounce is divided into 16 drams, each of 437.5 grains. See *Weights and Measures*.

**Avulsion** (*av-ul'-shun*) [*avul'sio*; *avellere*, to tear away]. A traumatic or surgical tearing or wrenching away of a part, as a polypus, a limb, etc.

**Awn** (*aw'en*) [*ἄχνα*, chaff]. The bristle or beard of barley, oats, etc.; or any other similar appendage.

**Axial** (*aks'-e-al*) [*axis*, axis]. Pertaining to or situated in an axis. **A. Current**. Same as *A. Stream*. **A. Hypermetropia**. See *Hypermetropia*. **A. Stream**. The name given to the red column in a vessel at the seat of inflammation. The blood-corpuscles are separated, the red being packed together in the center of the vessel, while between this and the walls of the vessel is a clear layer of serum in which the white corpuscles roll along. See *Poisseuille's Space*.

**Axiferous** (*aks-if'-er-us*) [*axis*, axis; *ferre*, to bear]. In biology, producing a stem-like, leafless axis, as certain fungi and algae.

**Axilemma** (*aks'-il-em-ah*) [*axis*, axis; *λέμμα*, husk, skin]. In histology, an elastic sheath composed of neurokeratin enclosing the axis cylinder of medullated nerve-fibers.

**Axilla** (*aks-il'-ah*) [L.: *pl.*, *Axilla*]. The armpit.

**Axillar** (*aks'-il-ar*) [*axilla*, axil]. In biology, one of the tufts of soft feathers growing from the axilla, and forming part of the under wing-coverts of a bird.

**Axillary** (*aks'-il-a-re*) [*axilla*, axil]. Pertaining to the axilla. **A. Artery**, the continuation of the subclavian artery, extending from the lower border of the first rib to the insertion of the pectoralis major muscle, where it becomes the brachial. See *Arteries*, *Table of*. **A. Glands**, the lymphatic glands in the axilla. **A. Plexus**, the brachial plexus, formed by the last three cervical and the first dorsal nerves. **A. Space**, the irregular conical space of the axilla. **A. Vein**, a continuation of the brachial, corresponding with the artery and terminating in the subclavian vein.

**Axin** (*aks'-in*) [*axinus*]. A fatty and varnish-like substance produced in Mexico by an insect, *Coccus axinus*. It is used in the arts and locally in medicine, being regarded as a good vulnerary and resolvent.

**Axis** (*aks'-is*) [L. for axletree]. 1. An imaginary line passing through the center of a body. 2. The second cervical vertebra. **A. Basicranial**, in craniometry, a line drawn from the basion to the middle of the anterior border of the cerebral surface of the sphenoid bone. **A. Basifacial**, in craniometry, a line drawn from the anterior border of the cerebral surface of the sphenoid to the alveolar point. **A. Binauricular**, in craniometry, the imaginary line joining the two auricular points. **A. Cerebrospinal**, the central nervous

system. **A. Cylinder** (of a nerve), the conducting or essential part of a nerve lying in the center and surrounded by the sheath of Schwann. It is also called the axis-cylinder of Purkinje. **A. Frontal** (of the eye), an imaginary line running through the eyeball from right to left, and corresponding with the movements of elevation and depression of the eyeball. **A. Optic**, the line from the corneal apex to the macula lutea. **A. Optical**, an imaginary line passing from the center of the eye-piece of a microscope through the body, objective, stage and sub-stage, to the mirror. **A. Sagittal** (of the eye), an imaginary line running through the eyeball from before backward, and coinciding with the line of vision. **A. Visual**, the line from the object through the nodal point to the macula.

**Axle Teeth** (*aks'-l-teth*). See *Axle Teeth*.

**Axogaster** (*aks'-o-gas-ter*) [*ἄζωρ*, axis; *γαστήρ*, stomach]. In biology the principal intestine, the *gaster principalis*.

**Axon** (*aks'-on*) [*ἄζωρ*, an axis]. The axis of the body; especially the bony axis of the neuro-skeleton.

**Axospermous** (*aks-o-sperm'-us*) [*ἄζωρ*, axis; *σπέρμα*, seed]. In biology, applied to fruits the seeds of which are attached to an axial placenta.

**Axungia** (*aks-un'-je-ah*) [L.: *gen.*, *Axungia*]. Fat; lard; adeps.

**Ayres's Operation**. See *Operations*, *Table of*.

**Azale** (*az'-äl'*). See *Conspectus of Pigments*, under *Pigment*.

**Azalein** (*az-a'-le-in*). Same as *Rosanilin*. See also *Conspectus of Pigments*, under *Pigment*.

**Azarin** (*az'-ar-in*). See *Conspectus of Pigments*, under *Pigment*.

**Azedarach** (*az-ed'-ar-ak*) [Pers. *âzâd*, free; *dirakht*, a tree]. Pride of China, the bark of *Melia azedarach*, an Asiatic tree naturalized in the southern U. S. It occurs in curved pieces or quills, having a sweetish taste. The decoction,  $\frac{3}{4}$  ij to 0j, is a gastro-intestinal irritant and anthelmintic against the round-worm. Dose  $\frac{3}{4}$  ss-j. **A. Ext. Fld.** Dose  $\frac{5}{8}$  j. **A. Tinctura**, 1 to 8. Dose  $\frac{3}{4}$  ss-ij. Unof.

**Azerin** (*az'-er-in*) [badly formed from *â priv.*; *ἔνρος*, dry]. A ferment analogous to ptyalin and found in the digestive secretions of *Drosera*, *Nepenthes*, and probably all other insectivorous plants. It is actively antiseptic and strongly deliquescent, and hastens rapidly the wetting of flies that fall into its solution.

**Azobenzene** (*az-o-ben'-zên*) [*â priv.*; *ζωός*, living; *benzoin*],  $C_{12}H_{10}N_2$ . A compound formed by the action of sodium amalgam upon the alcoholic solution of nitro-benzene. It forms orange-red, rhombic crystals, readily soluble in alcohol and ether, but sparingly soluble in water. It melts at 68°, and distils at 203°.

**Azo-compounds**. In chemistry, compounds intermediate between the nitro-compounds and the amido-compounds, and made from the former by partial reduction, or from the latter by partial oxidation.

**Azodiphenyl Blue**. Same as *Coupler's Blue*.

**Azo-dyes**. A well defined group of the coal-tar colors, all containing the diatomic group  $-N=N-$ , bound on either side to a benzene radical. They may be prepared by reduction of the nitro-compounds in alkaline solutions, or by acting on diazo-compounds with phenols or amines of the aromatic series. The azo-dyes are the amido-derivatives of simple azo-compounds, and are to be distinguished as amidoazo-dyes and oxyazo-dyes. See *Conspectus of Pigments*, under *Pigment*.

**Azoic** (*az-o'-ik*) [*â priv.*; *ζωή*, life]. In biology, destitute of living organisms.

**Azolitmin** (*az-o-lit'-min*) [*â* priv.; ζωή, life; Dan. *lak*, lac; *moes*, pulp],  $C_7H_7NO_4$ . A deep blood-red coloring matter obtained from litmus. See *Conspectus of Pigments*, under *Pigment*.

**Azoospermia** (*ah-zo-o-sper'-me-ah*) [*â* priv.; ζωή, life; σπέρμα, seed]. Want of, or deficient vitality of, the spermatozooids.

**Azoospermism** (*ah-zo-o-sper'm'-izm*) [*â* priv.; ζωή, life; σπέρμα, seed]. Absence of the spermatogenic elements from the seminal fluid.

**Azorella** (*az-o-rel'-ah*) [*l.*]. A genus of umbelliferous plants. A. *glebaria*. See *Balsam Bog*.

**Azoresorcin** (*az-o-rez-or'-sin*) [*â* priv.; ζωός, living; Fr., *resorcine*],  $C_{12}H_9NO_4$ . A derivative of resorcin, occurring as dark-red and greenish crystals.

**Azote** (*az'-ot*) [*â* priv.; ζωή, life]. A synonym of nitrogen; *Azotic acid*, nitric acid.

**Azotemia** (*az-o-té'-me-ah*) [*azotum*, nitrogen; αἷμα, blood]. The presence of nitrogenous compounds in the blood; uremia.

**Azotemesis** (*az-o-ten-e'-sis*) [*azotum*, nitrogen]. Any one of a class of diseases said to be due to a superabundance of nitrogen in the system, such as carcinoma, scurvy, gangrene, etc.

**Azotometer** (*az-o-lom'-et-er*) [*azotum*, nitrogen; μέτρον, a measure]. A device for the measurement of nitrogen.

**Azoturia** (*az-o-tu'-re-ah*) [*azotum*, nitrogen; *urina*, the urine]. An increase of the urea and urates in the urine.

**Azoxybenzene** (*az-oks-e-ben'-zēn*) [*azotum*, nitrogen; ὀξύς, sharp; *benzene*],  $C_{12}H_{10}N_2O$ . A compound

obtained by the reduction of nitrobenzene. It forms long yellow needles, easily soluble in alcohol and ether, but not in water. It melts at  $30^\circ$ .

**Azulene** (*az'-u-len*). Same as *Cerulein*.

**Azulin** (*az'-u-lin*). See *Conspectus of Pigments*, under *Pigment*.

**Azure** (*az'-ür*) [ME., *azure*, blue]. Sky-blue. A. *Blue*. Same as *Cobalt Blue*, and *Ultramarine*. A. *Malachite*. See *Azurite* in *Conspectus of Pigments*, under *Pigment*.

**Azurin** (*az'-ür-in*). Same as *Azulin*.

**Azurite** (*az'-ür-it*). See *Conspectus of Pigments*, under *Pigment*.

**Azygomatous** (*ah-zi-gom'-at-us*) [*â* priv.; ζῖγμα, the zygomatic arch]. Destitute of zygomatic arches, as the shrews.

**Azygos** (*az'-ig-os*) [*â* priv.; ζυγός, a yoke]. Applied to parts that are single, not in pairs. A. *uvulæ*, a small muscle of the uvula. A. *Vein*, a vein connecting the superior and inferior vena cavae.

**Azygospore** (*az-i'-go-spör*) [*â* priv.; ζυγόν, yoke; σπορά, seed]. An asexually produced spore, but resembling the sexual spore or zygospore.

**Azygous** (*az'-ig-us*) [*â* priv.; ζυγός, a yoke]. Not paired; or, if paired, so blended as to seem one organ.

**Azymia** (*ah-zim'-e-ah*) [*â* priv.; ζῖμη, a ferment]. Absence or lack of ferment.

**Azymic** (*ah-zim'-ik*) [*â* priv.; ζῖμη, a ferment]. Not giving rise to fermentation.

**Azzle Teeth** (*az'-l-tēth*) [E. dial., *assal teeth*]. A name given to the molar teeth.

## B

**B.** In chemical terminology the symbol of *Boron*.

**Ba.** The chemical symbol of *Barium*.

**B. A.** A contraction of *Balneum aquæ*, a water-bath; also, of *Balneum arenæ*, a sand-bath, and of *Artium Baccalaureus*, Bachelor of Arts.

**B. M.** A contraction of *Balneum maris* a sea-water bath; also of *Medicinæ Baccalaureus*, Bachelor of Medicine.

**B. V.** A contraction of *Balneum vaporis*, a vapor-bath.

**Babbitt Metal**, a compound of metals used in prosthetic dentistry for dies in swaging plates.

**Babe** (*bāb*) [ME., *babe*]. An infant.

**Babes' Method**. See *Stains*, *Table of*. **B. Oven**. See *Oven*.

**Babul Gum** (*ba-bool'*) [Bengal]. The gum of the tree *Acacia arabica*, or babul; an inferior sort of gum arabic.

**Baby** (*ba'-be*). Same as *Babe*. **B.-farm**. An institution for raising orphan and pauper infants. **B.-farming**, the business of receiving and caring for the infants of those who, for any reason, may be unable or unwilling to bring up their own children.

**Baccaceous** (*bak-a'-she-us*) [*bacca*, a berry]. Like a berry; baccate.

**Baccate** (*bak'-ät*) [*bacca*, a berry]. Berry-like, or bearing berries.

**Bacelli's Method**. A method of treating aneurysm by passing a wire thread into the sac. See *Treatment*. **B. Sign**. See *Signs and Symptoms*, *Table of*.

**Baccharis** (*bak'-ar-is*) [βάκχαρις, a fragrant herb]. A genus of composite trees. **B. halimifolia**, the ground-

sel tree, a composite-flowered shrub of N. America; a decoction of the leaves and bark is a popular demulcent and pectoral medicine. Unof.

**Bacchia** (*bak'-e-ah*, or *bak-i'-ah*) [*Bacchus*, the god of wine]. A synonym of *Aene rosacea*, a condition often found in drunkards. **B. rosacea**. Synonym of *Aene rosacea*.

**Bacillar**, or **Bacillary** (*bas'-il-ar*: *bas'-il-a-re*) [*bacillum*, a rod; *bacillus*]. 1. Relating to bacilli or to a bacillus. 2. Consisting of or containing rods.

**Bacilli** (*bas-il'-i*) [*bacillum*, a rod]. 1. Plural of *Bacillus*, *q. v.* 2. In pharmacy, cylindrical lozenges made by cutting the lozenge mass, and rolling it into a soft cylinder, on a pill-machine.

**Bacillicidal** (*bas-il-is-id'-al*) [*bacillum*, a rod; *cædere*, to kill]. Destructive to bacilli.

**Bacillicide** (*bas-il'-is-id*) [*bacillum*, a rod; *cædere*, to kill]. 1. Destructive to bacilli. 2. An agent that destroys bacilli.

**Bacilliculture** (*bas-il'-e-kul'-chūr*) [*bacillum*, a rod; *cultura*, cultivation]. The artificial culture of bacilli for the purpose of studying their nature and life.

**Bacilliform** (*bas-il'-i-f-orm*) [*bacillum*, rod; *forma*, form]. Having the shape or appearance of a bacillus.

**Bacillum** (*bas-il'-um*) [*l.*, a rod, a stick]. A stick; a cylindrical troche; an instrument for carrying a sponge; any one of the rods in the layer of rods and cones of the retina.

**Bacilluria** (*bas-il'-u-re-ah*) [*bacillum*, a rod; οὔρον, urine]. The presence of bacilli in the urine.

# TYPES OF BACILLI, SHOWING MORPHOLOGIC CHARACTERS AND ARRANGEMENT.

B. acidiformans ( $\times 1000$ ).B. capsulatus ( $\times 1200$ ).B. erysipelatos suis ( $\times 1000$ ).B. acidi lactici ( $\times 1000$ ).B. cavicida havaniensis ( $\times 1000$ ).B. gracilis cadaveris ( $\times 1200$ ).B. cedematis maligni ( $\times 1000$ ).B. circulans ( $\times 1200$ ).B. granulosis ( $\times 800$ ).

**Bacillus** (*bas-il'-us*) [dim. of *baculum*; *bacillum*, a small staff; *pl.*, *Bacilli*]. (a) A genus of the *Schizomycetes* established by Cohn; synonym, *Bacteridium*, Davaine; *Bacterium*, Delafond; *Vibrio*, Cohn; and including all the elongated forms except such as are spiral and have a gyratory motion, which are classed in the genus *Spirillum*. The bacilli are rigid or flexible, motile or non-motile, and reproduce either by direct fission or by endogenous spore-formation. See *Bacteria*, *Synonymatic Table of*. (b) An individual of the genus *Bacillus*. (c) A medicated rod or bougie. (d) Any rod-like body, or specifically, one of the retinal rods. (e) In botany, the term applied to the cotyledon of certain plants, e.g., the hyacinth; or to the basal portion of some flower-clusters.

**Back** (*bak*) [ME., *bak*]. Dorsum; posterior aspect. **B. Combination.** See *Combination*. **B. Draught** (*bak' draft*), the inspiration of whooping-cough. **B. Posture.** See *Postures*. **B. Stroke of the Heart.** See *Diastole*.

**Backache** (*bak'-āk*) [ME., *bak*; *aken*]. Pain in the back.

**Backbone** (*bak'-bōn*) [ME., *bak*; *boon*]. The vertebral column.

**Back-cut of Salmon.** See *Salmon*, and *Operations*, *Table of*.

**Bacony Infiltration** (*ba'-kon-e in-fil-tra'-shun*). Same as *Albuminoid Infiltration*.

**Bacteremia** (*bak-ter-e'-me-ah*) [*bacterium*, rod; *aiua*, blood]. The presence of bacteria in the blood.

**Bacterium** (*bak-te'-re-um*) [*βακτηριον*, a little stick; *pl.*, *Bacteria*]. 1. A genus of schizomycetous fungi established by Ehrenberg (1838) and Dujardin (1841); characterized by short, linear, inflexible, rod-like forms, without tendency to unite into chains or filaments. 2. The distinction between the genus *Bacterium* (Dujardin), and the genus *Bacillus* (Cohn) is not well founded, and all straight, elongated forms should be referred to the latter genus. The word bacteria as now employed is practically synonymous with *Schizomycetes*, *Microorganisms*, or *Microbes*, and includes those minute Thallophtyes, with or without chlorophyll, related on the one hand to the *Nostocaceae*, and on the other to the *Flagellata*. Morphologically, bacteria are either spherical (*cocci*); in the form of straight rods (*bacilli*); or of twisted rods (*spirilli*). They occur either free, as filaments in layers, or in cube-like packets. Frequently large gelatinous masses called *Zooglyea* are formed. As regards growth they are grouped either as *Endosporous bacteria*, including those that form spores endogenously; or as *Arthrosporous bacteria*, including those that multiply by fission. Bacteria are either *aërobic*, i.e., dependent upon the presence of free oxygen for the purpose of vegetation, or *anaërobic*, in which free oxygen is not essential, as they possess the power of appropriating the oxygen of unstable organic combinations, thus acting as disorganizing, fermentative, or putrefactive agents. Again, certain forms appear to possess the ability to flourish in either condition, and are known as *facultative anaërobic*. Bacteria are either motile or non-motile; they may exist as *saprophytes*, *facultative parasites*, *strict, obligate*, or *true parasites*. Those that produce pigment are known as *chromogenic*; those that produce fermentation as *zymogenic*; those that affect adversely the health of plants or animals as *pathogenic*. See *Bacteria*, *Synonymatic Table of*, and special terms under appropriate headings.

## SYNONYMATIC TABLE OF BACTERIA.\*

**Actinobacter du lait visqueux**, Duclaux. Found inropy milk. *aër.*, *nlifg.*, *npg.* **Actinobacter polymorphus.** See *Bacillus butyricus*, Prazmowski. **Actinomyces bovis**, Harz. Syn. *Cladothrix bovis*, *Cladothrix canis*, Rabe (?). Found in Actinomycosis and in sputum of tuberculous patients. Discovered by Langenbeck (1845); first correctly described by Israel (1878). Bollinger first to recognize it in cattle. Considered by Paltauf, Israel, and Wolf as a pleomorphic schizophyte. Occurs in grains the size of a poppy-seed; composed of radiating threads. Stains with anilin dyes; is not decolorized by Gram's method. Grows on egg albumin, gelatin, potato, and bouillon. *lifg.*, *pg.*, *chg.* (Sulphur-yellow.) **Æthylbacillus de Fitz.** See *Bacillus subtilis*, Ehrenberg, etc. **Amylobacter clostridium**, Trecul. See *Bacillus butyricus*, Prazmowski. **A New Bacillus of Malignant Edema**, Klein. See *Bacillus adematidis aërobicus*, Klein. **Anthrax bacillus.** See *Bacillus anthracis*, Pollender and Davaine. **Arthrobacterium aceti**, De Bary. See *Bacillus aceti*, Kützing. **Arthrobacterium chlorinum**, De Bary. See *Bacillus chlorinum*, Engelmann. **Arthrobacterium merismopædioides**, De Bary. See *Bacillus merismopædioides*, Zopf. **Arthrobacterium pastorianum**, De Bary. See *Bacillus pasteurianus*, Hansen. **Arthrobacterium viride**, De Bary. See *Bacillus viridis*, Van Tieghem. **Arthrobacterium zopfii.** See *Bacillus zopfii*. **Arthro-kokkaceen**, Ger. **Arthrospore bacteria** forming only cocci and cocci-chains. **Ascobacillus citreus**, Unna and Tommasoli. Syn. *Ascococcus citreus*. On the skin, in cases of eczema seborrhœicum. *aër.*, *lifg.*, *mot.*, *chg.* (lemon-yellow), *npg.* **Ascobacterium ulvina**, Van Tieghem. Short rods occurring in liquids containing decaying leguminous seeds. **Ascococcus billrothii**, Cohn. Lobulated masses, producing a viscous fermentation of saccharine fluids and evolving butyric acid in solution of ammonium tartrate. **Ascococcus citreus**, Unna and Tommasoli. See *Ascobacillus citreus*. **Ascococcus johnei**, Cohn. See *Micrococcus botryogenus*, Rabe. **Ascococcus mesenteroides**, Cienkowski. See *Leuconostoc mesenteroides*, Cienkowski. **Ascococcus vibrans**, Van Tieghem. Upon water containing *Beggiatoæ*; distinguished from *A. billrothii* by the whirling and oscillating of the cells. **Aussatzbacillus**, Ger. See *Bacillus lepræ*, Hansen. **Bacille aërogène**, Fr. See *Bacillus lactis aërogenes*, Miller. **Bacille aërophile**, Fr. See *Bacillus aërophilus*, Liborius. **Bacille brun de la pomme de terre**, Fr. See *Bacillus mesentericus fuscus*, Flügge. **Bacille butylique**, Fr. See *Bacillus butylicus*, Fitz. **Bacille butyrique**, Fr. See *Bacillus butyricus*, Pasteur. **Bacille commune de la pomme de terre**, Fr. See *Bacillus mesentericus vulgaris*, Flügge. **Bacille coprogene fétide**, Fr. See *Bacillus coprogenes fatidus*, Schottelius. **Bacille cyanogène**, Fr. See *Bacillus cyanogenus*, Hueppe. **Bacille de Bienstock**, I, II, Fr. See *Bacillus subtilis simulans*, Bienstock. **Bacille de Brieger**, Fr. See *Bacillus carvicidus*, Brieger. **Bacille de Denecke**, Fr. See *Spirillum tyrogenum*, Denecke. **Bacille de Finkler et Prior**, Fr. See *Spirillum* of Finkler and Prior. **Bacille de Hauser.** See *Proteus mirabilis*, *Proteus vulgaris*, *Proteus zenkeri*, Hauser. **Bacille de Koch.** See *Bacillus tuberculosis*, Koch. **Bacille de la chylurie**, Fr. See *Bacillus* of chyluria, Wilson.

\* **Abbreviations.**—*aër.* = aërobic *anaër.* = anaërobic. *chg.* = chromogenic *facanaër.* = facultative anaërobic. *lifg.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlifg.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic *phos* = phosphorescent *pleom* = pleomorphic. *sap* = saprophytic.

Bacille de la coqueluche, Fr. See *Bacillus tussis convulsivæ*, Manassiew. Bacille de la décomposition de l'albumine, Fr. See *Bacillus putrificus coli*, Bienstock. Microbes of the smegma. **Bacilles zymogènes**, Fr. Zymogenic microbes. **Bacilli zymogeni**, L. Zymogenic microbes. **Bacilli of Butyric Acid Fermentation**, Syn., Bacilles de la fermentation butyrique, Fr.; Bacillen der Buttersäuregärung, Ger. See *Bacillus butyricus*, Hueppe and Prazmowski. *Bacillus butylicus*, Fitz. **Bacilli of Fermentation of Carbohydrates**, Syn., Bacilles de la fermentation des carbohydrates, Fr.; Bacillen der Vergärung von Kohlenhydraten, Ger. See *Bacillus acidi laetici*, Hueppe. *Bacillus butyricus*, Hueppe and Prazmowski. *Bacillus butylicus*, Fitz. *Bacillus dysodes*, Zopf. *Bacillus polymixus*, Prazmowski. **Bacilli of Guillebeau** (a, b, c), obtained from milk of cows with mastitis; give rise to a peculiar fermentation of cheese. (a) *aër.*, *facanaër.*, *mot.*, *nlqf.*; (b) *aër.*, *facanaër.*, *liqf.*, *mot.*; (c) *aër.*, *nlqf.* **Bacilli of Ice**, Syn., Eisbacillen. Microbes of ice. **Bacilli of Pus**, Syn., *Bacilles du pus*, Fr.; Eiterbacillen, Ger. Microbes of pus. **Bacilli of Putrefaction**, Syn., Fäulnisserregende Bacillen, Ger. Microbes of putrefaction. **Bacilli of Sputum**, Microbes of the mouth. **Bacilli of the Air**, Syn., Bacilles de l'air, Fr.; Luftbacillen, Ger. Microbes of the air. **Bacilli of the Feces**, Syn., Bacilles des selles, Fr.; Kotbacillen, Bacillen aus Faeces, Ger. Microbes of the feces. **Bacilli of the Intestine**, Syn., Bacilles de l'intestine, Fr.; Darmbacillen, Ger. Microbes of the intestine. **Bacilli of the Mouth**, Syn., Bacilles de la bouche, Fr.; Mundhöhlenbacillen, Ger. Microbes of the mouth. **Bacilli of the Soil**, Syn., Bacilles de la terre, Fr.; Erdbacillen, Bodenbacillen, Ger. Microbes of the soil. **Bacilli of the Urine**, Syn., Bacilles de l'urine, Fr.; Bacillen des Harns, Ger. Microbes of the urine. **Bacilli of Water**, Syn., Bacilles de l'eau, Fr.; Wasserbacillen, Ger. Microbes of water. **Bacillo a virgola**, Ital. See *Spirillum cholerae asiaticae*, Koch. **Bacillo buterico**, Ital. See *Bacillus butyricus*, Prazmowski. **Bacillo del carbonchio**, Ital. See *Bacillus anthracis*, Pollender. **Bacillo del carbonchio sintomatico**, Ital. See *Bacillus chauvæi*, Bollinger and Feser. **Bacillo del fieno**, Ital. See *Bacillus subtilis*, Cohn. **Bacillo della malaria**, Ital. See *Bacillus malariae*, Klebs and Tommasi-Crudeli. **Bacillo del mollusco contagioso**, Ital. See *Bacillus mollusci*, Dominico. **Bacillo del sifilide**, Ital. See *Bacillus syphilidis*, Lustgarten. **Bacillo della tubercolosi**, Ital. See *Bacillus tuberculosis*, Koch. **Bacillo tifo**, Ital. See *Bacillus typhi abdominalis*, Eberth. **Bacillo tuberculare**, Ital. See *Bacillus tuberculosis*, Koch. **Bacillo virgolato**, Ital. See *Spirillum cholerae asiaticae*, Koch. **Bacillus a**, Vignal. See *Bacillus buccalis*, Vignal. **Bacillus aceti**, Kützing, Sommer. Syn., *Arthrobacterium aceti*, De Bary. *Bacillus aceticus*, Flügge; Bactérie du vinaigre; *Bacterium aceti*, Lanzi. Bacterium der Essiggärung; Essigferment; Essigpilz; *Micrococcus aceti*; *Mycoderma aceti*, Pasteur. Mycoderme du vinaigre. *Uvina aceti*, Kützing. Found in air and vinegar; common. Large cylindrical cells of varying size. Absorbs oxygen from air and oxidizes alcohol to acetic acid; produces vinegar; may, by further oxidation, convert this into carbonic acid and water. *aër.*, *nlqf.*, *mot.*, *npg.*, *pleom.* Cf. *Bacillus pasteurianus*, Hansen; *Bacterium xylinum*, A. J. Brown. **Bacillus aceticus**,

Flügge. See *Bacillus aceti*, Kützing. **Bacillus acidiformans**, Sternberg. Obtained from the liver of a yellow fever cadaver. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* **Bacillus acidi lactici**, Hueppe. Syn., *Bacterium lactis*, Lister. Bactérie ou Bacille de la fermentation lactique, Fr.; Bacterium der Milch säuregärung, Ger. Found in the air and in sour milk. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *npg.* **Bacillus actinobacter**, Duclaux. Syn., *Actinobacter polymorphus*. A minute capsulated bacillus, rendering milk gelatinous and ropy. *aër.*, *nmot.* See *Bacillus butyricus*, Prazmowski. **Bacillus aërogenes**, I, II, III, Miller. Syn., *Bacterium aërogenes*, Miller. *Helicobacterium aërogenes*, Miller. Three small bacilli from the alimentary tract of healthy persons. *aër.*, *nlqf.*, *mot.*, *npg.* See *Bacillus lactis aërogenes*, Escherich. **Bacillus aërogenes capsulatus**, Welch and Nuttall. Found in the blood-vessels in a case of thoracic aneurysm. *anaër.*, *nlqf.*, *nmot.*, *npg.* **Bacillus aërophilus**, Liborius. Obtained from the air. *aër.*, *liqf.*, *nmot.*, *npg.* Syn., *Bacille aërophile*, Fr. *Bacillus aëroginosus*. See *Bacillus pyocyaneus*, Gessard. **Bacillus aluminis**, Bienstock. Found abundantly in feces. Decomposes albumin, hence its name. *aër.*, *mot.*, *npg.* **Bacillus albus**, Becker, Eisenberg. The white bacillus of water. Weisser Bacillus aus Wasser, Ger. *aër.*, *nlqf.*, *mot.*, *npg.* **Bacillus albus anaërobiescens**, Vaughan. Found in water. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *npg.* **Bacillus albus cadaveris**, Strassmann and Stricker. Found in blood of cadaver. *aër.*, *liqf.*, *mot.*, *pg.* **Bacillus albus putridis**, De Bary. Found in water. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus allantoides**, Klein. Obtained from the air. *aër.*, *mot.*, *npg.* Not sufficiently studied. **Bacillus allii**, Griffiths. Syn., *Bacterium allii*. Found on surface of decaying onions. *aër.*, *chg.* (green), *npg.* **Bacillus alvei**, Cheshire and Cheyne. Syn., *Bacillus prussii*, Ciesielski. *Bacillus melittorhorus*, Cohn. Bacillus of foul brood. Bacillus der Faulbrut, Ger. Obtained from bee larvae infected with "foul brood." *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* Also pathogenic for mice and guinea pigs. Cf. Bacillus of Canestrini. **Bacillus amylobacter**, Van Tieghem. See *Bacillus butyricus*, Prazmowski. *Bacillus amylovorus*, Burrill. See *Bacillus butyricus*, Botkin, Prazmowski. **Bacillus amylozyma**, Perdriz. Found in hydrant water (Paris). *anaër.*, *nlqf.*, *mot.* Pathogenesis not determined. **Bacillus anaërobicus liquefaciens**, Sternberg. Obtained from contents of intestine of yellow fever cadaver. *anaër.*, *liqf.*, *nmot.* Pathogenesis not determined. **Bacillus anthracis**, Pollender and Davaine. Syn., *Bacterium anthracicum*, Bollinger. *Bacterium anthracis*, Zopf. *Bacterium carbunculare*, Pollender, Brauell, Delafond, Davaine. *Metallibacter anthracis*, Trevisan. Bacille du charbon, Fr.; Bactérie du charbonneuse, Fr.; Bactériidie du charbon, Fr.; Bacillus anthracis e carbonchio, Bacillo del carbonchio, It.; Milzbrand-bacillus, Ger. Bacillus of Braxy. Found in the blood of animals and persons infected with anthrax. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *pg.* **Bacillus aquaticus liquefaciens**, Pokrowsky. Found in river water (Kura), and hydrant water (Tiflis). **Bacillus aquatilis**, Frankland. Found in well-water in the chalk-formations of Kent, Eng. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus aquatilis sulcatus**, I, II, III, IV, V, Weichselbaum. Found in hydrant water (Vienna). *aër.*, *facanaër.*, *nlqf.*, *mot.*, *npg.* **Bacillus arborescens**, Frankland. Found in hydrant water (Lon-

**Abbreviations.**—*aër.*=aërobic. *anaër.*=anaërobic. *chg.*=chromogenic. *facanaër.*=facultative anaërobic. *liqf.*=liquefactive. *monom.*=monomorphous. *mot.*=motile. *nlqf.*=non-liquefactive. *nmot.*=non-motile. *npg.*=non-pathogenic. *obl.*=obligate. *oscl.*=oscillating. *pg.*=pathogenic. *phos.*=phosphorescent. *pleom.*=pleomorphic. *sap.*=saprophytic

don). *aër.*, *liqf.*, *oscl.*, *chg.* (orange red), *nps.* *Bacillus argenteo-phosphorescens*, I, II, III, Katz. Obtained respectively from sea-water, phosphorescent pieces of fish, and cuttle-fish (Sydney, N. S. W.). *aër.*, *nlqf.*, *mot.* (except II), *phos.*, *npg.* *Bacillus argenteo-phosphorescens liquefaciens*, Katz. Obtained from sea-water, near Sydney, N. S. W. *aër.*, *facanaër.*, *liqf.*, *mot.*, *phos.*, *npg.* *Bacillus aurantiacus*, Frankland. Found in well-water. *aër.*, *nlqf.*, *mot.*, *chg.* (orange), *nps.* *Bacillus aureus*, Adametz. Found in water; also on the skin in cases of eczema seborrhœicum, Unna and Tommasoli. *aër.*, *nlqf.*, *mot.*, *hg.* (golden yellow). *Bacillus b.* Vignal. See *Bacillus buccalis*, Vignal. *Bacillus B.*, Hofmann. Found in the larvae of *Liparis monacha*. The cause of Flacherie, or Schlafsucht. *Bacillus bei Diphtherie des Menschen*, Ger. See *Bacillus diphtheriæ*, Klebs and Löffler. *Bacillus bei Erysipel am Kaninchen*, *Bacillus bei Erysipel am Kaninchenohr*, Ger. See *Bacillus erysipelatosus leporis*, Koch. *Bacillus bei Lichen ruber*, Ger. See *Bacillus* of *Lichen ruber*, Laser. *Bacillus bei Keuchhusten*, Ger. See *Bacillus tussis convulsivæ*, Manassiew. *Bacillus beri-bericus*, Lacerda. Syn., *Micrococcus of beri-beri*, Lacerda, Neisseria, Winkleri. *Bacille du beri-beri*, Fr. *Bacillus of Beri-beri*, Eykman. Found by Lacerda, Pekelharing, and Winkler, in the blood of persons affected with beri-beri. Negative results were obtained by Eykman and Sternberg. The disease is now held to be identical with dochmiasis, produced by the nematode worm *Dochmius duodenalis*, Leuckart. See *Beri-beri*. *Bacillus berolinensis indicus*, Cläßen. Found in water of the Spree. *aër.*, *nlqf.*, *mot.*, *chg.* (indigo-blue), *npg.* *Bacillus bienstockii*, Bienstock. Found in human feces. *mot.*, *pg.* *Bacillus brassicæ*, Pommer. Found in infusions of cabbage-leaves. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *npg.* *Bacillus brunneus*, Adametz and Weichmann. Found in water. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *npg.* *Bacillus buccalis*, Vignal. Syn., *Bacillus ulna*, Vignal. *Bacillus a.*, Vignal; *Bacillus b.*, Vignal; *Bacillus f.*, Vignal; *Bacillus g.*, Vignal; *Bacillus j.*, Vignal. *Bacillus buccalis fortuitus*, Vignal. *Bacillus buccalis minutus*, Vignal. *Leptothrix buccalis*, Vignal. From the salivary secretions of healthy persons. *aër.*, *liqf.*, *npg.*, *chg.* (golden yellow). *Bacillus buccalis maximus*, Miller. Found in the mouth of man. Common. Biologic characters undetermined. *Bacillus buccalis minutus*, Vignal. See *Bacillus buccalis*, Vignal. *Bacillus butylicus*, Fitz. Syn., *Bacille butylique*, Fr. See *Bacillus butyricus*, Hueppe. *Bacillus butyricus*, Botkin, Hueppe, Prazmowski. Obtained from milk, hydrant water and well-water, old cheese, garden earth, dust, etc. Syn., *Actinobacter polymorphus*, Duclaux. *Amylobacter clostridium*, Trecul. *Bacillus actinobacter*, Duclaux. *Bacillus amylobacter*, Van Tieghem. *Bacillus butylicus*, Fitz. *Bacterium navicula*, Reinke and Berthold. *Clostridium butyricum*, Prazmowski. *Micrococcus amyloccoccus*, Burrill. *Vibrione butyrique*, Pasteur. *Bacille de la fermentation butyrique*, *Bacille de Liborius*, *Bacille de Prazmowski*, *Bactérie de la fermentation butyrique*, Fr.; *Bacillo buterico*, Ital. *Bacterium der Buttersäuregährung*, *Butterbacillus*, *Buttersäurebacillus*, *Fetthbacillus*, *Liborius' Buttersäure bildender Bacillus*, *Kartoffelfäulebacillus*, Ger. *Butylbacillus*; *Bacillus of butyric acid fermentation*; *Bacillus of fire-blight*; *Bacillus of pear-blight*; *Micrococcus of apple-blight*; *Micrococcus of pear-blight*. One of the most widely diffused forms, exceedingly important and varied in

its powers of decomposition. It is typically anaërobic and the chief of all the ferments giving rise to butyric acid as a primary product. It plays an important part in the human economy and in the destruction of plant cellulose. Botkin regards the form observed by him as distinct. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.*, *pleom.* *Bacillus butyri fluorescens*, Lafar. Occurring in every sample of natural butter examined. See *Bacterium butyri colloidum*, Lafar. *Bacillus mel-chloros*, Winkler and Schröter. *Bacillus butyri viscosus*, Lafar. Found in butter. *aër.*, *nlqf.*, *npg.* *Bacillus cadaveris*, Sternberg; obtained from yellow fever cadavers. *obl.*, *anaër.* (strict), *nmot.*, *pg.* *Bacillus canalis capsulatus*, Mori. Found in sewer water. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* (for mice; guinea pigs, and rabbits immune). *Bacillus canalis parvus*, Mori. Found in sewer water. *aër.*, *nlqf.*, *nmot.*, *pg.* (for mice and guinea pigs). *Bacillus candicans*, Frankland. Found in soil. *aër.*, *nlqf.*, *nmot.*, *npg.* *Bacillus capsulatus*, Pfeiffer. Obtained from the blood of a guinea pig. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* (for white mice and house mice, guinea pigs, rabbits and pigeons (septicemia). Cf. *Capsule bacillus* of Loeb. *Bacillus capsulatus mucosus*, Pasching. Found in the nasal secretions of man in cases of influenza. *aër.*, *facanaër.*, *nmot.*, *nlqf.*, *pg.* (for white mice and field mice), *npg.* (for rabbits and pigeons). *Bacillus capsulatus smithii*, a, b, c, Theobald Smith. Syn., *Capsule bacillus* of Smith. Found in the intestines of swine. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *npg.* According to Smith, possibly identical with *Bacillus lactis aërogenes*, Escherich. *Bacillus carabiformis*, Kaczynsky. Found in the stomach of meat-fed dogs. *aër.*, *liqf.*, *mot.*, *npg.* *Bacillus carotarium*, A. Koch. Obtained from cooked carrots and sugar beets. *aër.*, *liqf.*, *nmot.*, *npg.* *Bacillus catenula*, Duclaux. Syn., *Tyrophix catenula*. Found in cheese. *anaër.* (will however grow in air), *nmot.*, *npg.* *Bacillus causicus*, Kern. Syn., *Bacterium causicum*. *Dispora caucasica*, Kern. Grains de Kefir, Fr.; Kefirbacillus, Kefirferment, Kefirpilz-glomerat, Hirse des Propheten, Ger. Used in the preparation of the peculiar milk-wine, "Kefir." *aër.*, *facanaër.*, *nmot.*, *npg.* *Bacillus cavida*, Brieger. See *Bacillus cavicidus*, Brieger. *Bacillus cavida havaniensis*, Sternberg. Obtained from intestine of yellow fever cadaver. *aër.*, *facanaër.*, *nlqf.*, *mot.* *Bacillus cavicidus*, Brieger. Syn., *Bacillus cavida*. Brieger's bacillus. *Bacillus de Brieger*, bacterie de la fermentation propionique, Fr. Obtained from human feces. *aër.*, *facanaër.*, *nlqf.*, *pg.* (not for rabbits or mice). Perhaps identical with *Bacillus neapolitanus*, Emmerich. *Bacillus cavie fortuitus*, Sternberg. Found in exudates of guinea pig inoculated with liver from yellow fever cadaver. *aër.*, *facanaër.*, *nlqf.*, *mot.*, *npg.* *Bacillus chauvæi*, Bollinger and Feser, Arloing, Cornevin, and Thomas. Syn., *Bacillus of symptomatic anthrax*. *Bacille du charbon symptomatique*, *Bactérie du charbon symptomatique*, Fr.; *Rauschbrandbacillus*, *Bacillus des Rauschbrandes*, Ger.; *Bacillo del carbonchio sintomatico*, Ital. *Clostridium of symptomatic anthrax*, Neelsen and Ehlers. Found in tissues of cattle suffering from symptomatic anthrax, "black leg," or "quarter evil." *anaër.*, *liqf.*, *mot.*, *pg.* *Bacillus chlorinus*, Engelmann. Syn., *Arthrobacterium chlorinum*, De Bary. *Bacterium chlorinum*, Engelmann. Found in infusions of decaying vegetable matter. *aër.*, *sap.*, *chg.* (green), *npg.*

**Abbreviations.**—*aër.* = aerobic *anaër.* = anaërobic, *chg.* = chromogenic, *facanaër.* = facultative anaërobic *liqf.* = liquefactive, *monom.* = monomorphie, *mot.* = motile, *nlqf.* = non-liquefactive, *nmot.* = non-motile, *npg.* = non-pathogenic, *obl.* = obligate, *oscl.* = oscillating, *pg.* = pathogenic, *phos.* = phosphorescent, *pleom.* = pieomorphic, *sap.* = saprophytic.

*Bacillus cholerae asiaticae*, Koch. See *Spirillum cholerae asiaticae*, Koch. *Bacillus cholerae gallinarum*, Flüge. See *Bacillus septicaemiae haemorrhagicae*, Sternberg. *Bacillus chromo-aromaticus*, Galtier. Obtained from the carcass of a diseased pig. *aër., facanaër., liqf., mot., pg.* (for rabbits). *Bacillus circulans*, Jordan. Found in the water of Merrimac River. *aër., facanaër., liqf., mot., npg.* *Bacillus citreus*. See *Ascobacillus citreus*, Unna and Tommasoli. *Bacillus citreus cadaveris*, Strassmann. Found in cadaver. *aër., liqf., nmot., chg.* (yellow). *Bacillus claviformis*, Duclaux. Syn., *Tyrophrix claviformis*, Duclaux. Found in fermenting casein. *anaër., pg.* *Bacillus cloacae*, Jordan. One of the most common microbes in sewage. *aër., facanaër., liqf., mot., npg.* *Bacillus coeruleus*, Smith. Found in river water (Schuylkill). *aër., liqf., chg.* (blue), *npg.* *Bacillus coli communis*. See *Bacillus neapolitanus*, Emmerich. *Bacillus coli similis*, Sternberg. Obtained from human liver. *aër., facanaër., nliqf., nmot., npg.* *Bacillus constrictus*, Zimmermann. Found in water. *aër., facanaër., nliqf., mot., chg.* (cadmium yellow), *npg.* *Bacillus coprogenes foetidus*, Schottelius. Syn., Darmbacillus von Schottelius, Ger.; Bactille coprogène fetide, Fr. Obtained from intestinal contents of pigs dead of malignant erysipelas. *aër., nliqf., nmot., pg.* *Bacillus coprogenes parvus*. Syn., Mäuseseptikämieähnlicher Bacillus, Eisenberg. Obtained from human feces. *aër., nliqf., nmot., pg.* *Bacillus crassus*, Van Tieghem. The broadest known bacterium, 4  $\mu$ . *mot., npg.* *Bacillus crassus sputigenus*, Kreibohm. Syn., *Bacillus sputigenus crassus*. From the sputum and tongue of man. *aër., nliqf., nmot., pg.* *Bacillus crystallosus*. *Bacillus cuneatus*. Syn., *Bacterium cuneatum*, Rivolta. Found in the blood and viscera of horses, cattle, and dogs dead of septic processes. *pg.* *Bacillus cuniculicida*, Flüge. *Bacillus cuniculicidus*, Koch. See *Bacillus septicaemiae haemorrhagicae*, Sternberg. *Bacillus cuniculicida havaniensis*, Sternberg. Found in viscera of yellow fever cadavers. *aër., facanaër., nliqf., pg.* *Bacillus cuticularis*, Tils. Found in water. *aër., liqf., mot., chg.* (yellow), *npg.* *Bacillus cyaneo phosphorescens*, Katz. Obtained from sea water (Australia). *aër., facanaër., liqf., mot., phos., chg.* (greenish), *npg.* *Bacillus cyanofuscus*, Beyerinck. Obtained from glue and Edam cheese. *aër., chg.* (green, changing to blue, brown, black), *liqf., mot., npg.* *Bacillus cyanogenus*, Fuchs. Hueppe, Neelsen. Syn., *Bacillus lactis cyanogenus*. *Bacillus syncyanum*. *Bacterium cyanogenum*, Fuchs, *Bacterium syncyanum*, Ehrenberg, Schröter. *Vibrio cyanogenus*, Fuchs. *Vibrio syncyanus*, Ehrenberg. Bactille du lait blue, Bactille cyanogène, Microbe du lait blue, Fr. Pilz der blauen Milch, Ger. *Bacillus* of blue milk. Found in milk. *aër., nliqf., mot., chg.* (grayish blue), *npg.* *Bacillus cystiformis*, Clado. Found in urine of patient with cystitis. *aër., nliqf., mot., npg.* *Bacillus delicatulus*, Jordan. Found in hydrant water (Lawrence, Mass.). *aër., liqf., mot., npg.* *Bacillus dentalis viridans*, Miller. Syn., Miller's bacillus. Found in carious dentine. *aër., facanaër., nliqf., pg.* *Bacillus denitrificans*, Giltay and Aberson. Obtained from the soil, air, and sewage. *aër., nliqf., mot., npg.* Cf. *Bacterium denitrificans*, Gayon and Dupetit. *Bacillus* der Akne contagiosa des Pferdes. See *Bacillus* of horse pox. *Bacillus* der amerikanischen

Syn., Bacille de la dysenterie epidémique; Microbe de la dysenterie epidémique, Fr.** Found in the intestinal contents and viscera of dysentery cadavers. *aër., nliqf., pg.* **Bacillus dysodes, Zopf. Syn., Bacterium dysodes.** Found in yeast, inducing fermentative changes in bread, causing it to smell disagreeably and to become greasy and unfit for use. **Bacillus Emmerich.** See *Bacillus neapolitanus*, Emmerich. **Bacillus endocarditidis capsulatus, Weichselbaum.** From viscera of man who died of endocarditis with thrombi. *aër., nliqf., pg.* **Bacillus endocarditidis griseus, Weichselbaum.** From the heart in a case of endocarditis recurrens ulcerosa. *aër., nliqf., mot., pg.* **Bacillus enteritidis, Gärtner.** Obtained from the tissues of a cow killed on account of sickness attended with mucous diarrhea, and from the spleen of a man who died shortly after eating of the flesh of this cow. *aër., nliqf., mot., pg.* **Dogs, cats, chickens, and sparrows are immune.** **Bacillus epidermidis, Bizzozero. Syn., Leptothrix epidermidis. Microsporon minutissimum, Burchart.** From the epidermis between the toes. *aër., nliqf., nfg.* **Bacillus epidermidis, Bordoni-Uffreduzzi.** See *Bacillus* of Scheuren. **Bacillus Epsilon, von Miller.** See *Spirillum*, Finkler-Prior. **Bacillus erysipelatos suis, Koch, Löffler, Schütz, Pasteur. Syn., Bacillus erysipelas malignum, Bacillus minimus, Bacillus muriepticus, Flügge. Bacillus septicus, Koch.** **Bacille de la septicémie de la souris, Bacille du érysipèle du porc, Bacille du mal rouge,**

**Bacille du rouge du porc, Pasteur, Bacille muriseptique, Fr. Bacillus der Mäuseseptikämie, Koch.** **Bacillus des Rotlaufs, Bacillus des Schweinerotlaufs, Löffler, Schütz. Rotlaufbacillus, Ger.** **Bacillus of mouse septicemia. Bacillus of hog erysipelas.** First obtained by Koch by injecting putrefying flesh beneath the skin of mice, afterward by Löffler and Schütz from carcasses of swine dead of "Rotlauf." *aër., facanaër., nliqf., pg.* **Bacillus erysipelatos leporis, Koch. Syn., Bacillus bei Erysipel am Kaninchen, Bacillus bei Erysipel am Kaninchenohr, Ger. Bacille de l'érysipèle du lapin, Fr. Bacillus of erysipelas in the rabbit.** Found in the erysipelatos inflammation in a rabbit's ear caused by the injection of mouse's dung. **Bacillus erythrosporus, Eidam, Cohn, and Miflet. Syn., Bacille érythrospore, Fr.** Found in putrefying albuminous fluids, water, etc. *aër., nliqf., mot., chg.* (greenish yellow, fluorescent), *nfg.* **Bacillus ethaceticus, Frankland.** Cause of fermentation of arabinose. **Bacillus ex pneumo-enteritidis suis, E. Klein, Schütz, Salmon, Cornil, Chantemesse, Selandier. Syn., Microbe der Schweinspocken, Ger.; Bacille de la pneumo-entérite du porc, Fr.** **Bacillus of hog cholera.** Found in the intestinal contents, blood, and viscera of swine dead of hog cholera. *aër., facanaër., nliqf., mot., pg.* **Bacillus f, Vignal. See Bacillus buccalis, Vignal.** **Bacillus facultatus, Sadebeck and E. Fränkel.** Found in non-malignant pharyngeal mycosis. **Bacillus figurans, Crookshank. See Bacillus mesentericus vulgaris.** **Bacillus figurans, Vaughan.** Found in water. *aër., liqf., mot., nfg.* **Bacillus filiformis, Duclaux. Syn., Tyrothrix filiformis.** Found in cheese and milk. *aër., mot., nfg.* **Bacillus filiformis, Tils.** Found in water. *aër., liqf., osc., nfg.* **Bacillus filiformis havaniensis, Sternberg.** From the liver of a yellow fever cadaver. *anaër., facanaër., nliqf., nmot., nfg.* **Bacillus fitzianus, Zopf. See Bacillus subtilis, Cohn.** **Bacillus flavescens, Pohl.** Found in swamp water. *aër., nliqf., chg.* (yellow). **Bacillus foetidus, Liborius. Syn., Bacterium foetidum. Clostridium foetidus, Liborius.** Corpuscles brillants, Micrococci of S. Le. M. Moore. Obtained from soil. *anaër., liqf., mot.* **Bacillus foetidus lactis, Jensen.** From milk. *aër., nliqf., nfg.* **Bacillus foetidus ozonæ, Hajek.** Obtained from nasal secretions of patients with ozæna. *aër., facanaër., liqf., mot., pg.* **Bacillus flavocoriaceus, Eisenberg. Syn., Sulphur yellow bacillus (Adametz).** Found in water. *aër., nliqf., nmot., chg.* (sulphur yellow), *nfg.* **Bacillus flavus, Macé.** Found in drinking water. *aër., liqf., chg.* (golden yellow), *nmot.* **Bacillus fluorescens aureus, Zimmermann.** Found in hydrant water (Chemnitz). *aër., nliqf., mot., chg.* (ocher yellow), *nfg.* **Bacillus fluorescens longus, Zimmermann.** Found in hydrant water (Chemnitz). *aër., nliqf., mot., chg.* (grayish yellow), *nfg.* **Bacillus fluorescens liquefaciens, Flügge.** Common in water and putrefying infusions. *aër., liqf., mot., chg.* (greenish yellow), *nfg.* Cf. *Bacillus viscosus*, Frankland. **Bacillus fluorescens liquefaciens minutissimus, Unna and Tommasoli.** Found upon skin in cases of eczema scabrorrhæicum. *aër., facanaër., liqf., mot., chg.*, (greenish yellow), *nfg.* Possibly identical with the preceding species. **Bacillus fluorescens nivalis, Schmöle. Syn., Bacillus nivalis, Gletscher bacillus, Glacier bacillus.** Found in snow and ice water from Norwegian glaciers. *aër., liqf., mot., chg.* (bluish green), *nfg.* **Bacillus fluorescens non-liquefaciens, Schiller.**

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *nfg.* = non-pathogenic. *obl.* = obligate. *osc.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Found in water. *aër.*, *nlif.*, *nmot.*, *chg.* (greenish yellow), *npg.* According to Baumgarten identical with the *Bacillus* of Lesage. *Bacillus fluorescens putidus*, Flügge. Found in water. *aër.*, *nlif.*, *mot.*, *chg.* (greenish), *npg.* *Bacillus fluorescens tenuis*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nlif.*, *nmot.*, *chg.* (greenish yellow), *npg.* *Bacillus foetidus*, Passet. Syn., *Bacterium foetidum*, Thin. *Clostridium foetidum*, Liborius. Corpuscles brillants. Found in cases of fetid sweating feet, in the exudations of mice inoculated with garden earth, and in cases of malignant edema. *anaër.*, *lif.*, *mot.*, *npg.* *Bacillus foetidus lactis*, Jensen. Found in milk. *aër.*, *nlif.*, *npg.* Resembles *Bacillus neapolitanus*, Emmerich. *Bacillus fulvus*, Zimmermann. Found in hydrant water, (Chemnitz). *aër.*, *lif.*, *nmot.*, *chg.* (gamboge yellow), *npg.* *Bacillus fuscus*. Obtained from a putrefying infusion of maize, from the air, etc. Cf. *Bacterium brunneum*, Schröter. *Bacillus fuscus limbatus*, Scheibenzuber. Obtained from rotten eggs. *aër.*, *facanaër.*, *nlif.*, *mot.*, *chg.* (brown), *npg.* *Bacillus galinarum*, Klein. Found in blood of chickens dead of a disease resembling chicken cholera. *aër.*, *nlif.*, *nmot.*, *pg.* *Bacillus gasoformans*, Eisenberg. Found in water. *aër.*, *facanaër.*, *lif.*, *mot.*, *npg.* *Bacillus gaytoni*, Cheshire. The cause of a disease of honey-bees. Cf. *Bacillus alvei*, Cheshire and Cheyne. *Bacillus geniculatus*, De Bary. Syn., *Tyrophrix geniculatus*, Duclaux, *Bacterium en zigzag*, Fr. Found in the contents of the stomach. *aër.*, *nlif.*, *mot.*, *npg.* *Bacillus gingivæ*, Miller. *Bacillus gingivæ pyogenes*, Miller. See *Bacterium gingivæ pyogenes*, Miller. Found in a filthy mouth, and in purulent dental pulp. *aër.*, *facanaër.*, *lif.*, *pg.* (for white mice, guinea pigs, and rabbits). *Bacillus glaucus*, Maschek. Found in water. *aër.*, *lif.*, *nmot.*, *chg.* (gray), *npg.* *Bacillus gliscrogenum*. See *Bacterium gliscrogenum*, Malerba. *Bacillus glycerinæ*, Buchner. See *Bacillus subtilis*, Cohn. *Bacillus gracilis*, Zimmermann. Found in hydrant water, (Chemnitz). *aër.*, *facanaër.*, *lif.*, *oscl.*, *npg.* *Bacillus gracilis anarobiescens*, Vaughan. Found in water. *aër.*, *facanaër.*, *nlif.*, *mot.*, *npg.* *Bacillus gracilis cadaveris*, Sternberg. Obtained in human liver. *aër.*, *facanaër.*, *nmot.*, *nlif.*, *pg.* *Bacillus granulosis*, Russel. Found in mud (Bay of Naples). *aër.*, *facanaër.*, *lif.*, *nmot.* Pathogenesis not determined. *Bacillus graveolens*, Bordoni Uffreduzzi. Syn., *Bacille de la sueur des pieds*, Fr. Compare *Bacillus saprogenes*, II, Rosenbach, and *Bacillus foetidus*, Passet. Found on epidermis between the toes of man. *aër.*, *lif.*, *npg.* *Bacillus guttatus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *facanaër.*, *lif.*, *mot.*, *npg.* *Bacillus halophilus*, Russel. Obtained from water and mud (Bay of Naples). *aër.*, *lif.*, *mot.* Pathogenesis not determined. *Bacillus hansenii*, Rasmussen. Found in various nutrient liquids. *aër.*, *mot.*, *chg.* (chrome yellow to yellowish brown). *Bacillus havaniensis*, Sternberg. Syn., *Micrococcus havaniensis*, (?) Sternberg. *Bacillus havaniensis liquefaciens*, Sternberg. Obtained from the surface of the body of patients in the hospital at Havana. *aër.*, *nlif.*, *chg.* (blood-red). *Bacillus helvolus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *lif.*, *mot.* (rotary only), *chg.* (Naples yellow), *npg.* *Bacillus heminecrobiophilus*, Arloing. Found in a caseous lymphatic gland of a guinea pig. *aër.*, *facanaër.*, *nlif.*, *mot.*, *pg.* *Bacillus*

*hepaticus fortuitus*, Sternberg. Obtained from the exudations of a guinea pig inoculated with liver from a yellow fever patient. *aër.*, *nlif.*, *mot.*, *npg.* *Bacillus hessii*, Guillebeau. Found in cow's milk. *aër.*, *lif.*, *mot.* Pathogenesis not determined. *Bacillus hominis capsulatus*, Bordoni Uffreduzzi. Syn., *Protus capsulatus septicus*, Banti. *Protus hominis capsulatus*, Bordoni Uffreduzzi. *Bacillus der Haderkrankheit*, *Bacillus* of rag-picker's disease. Obtained from persons dead from rag-picker's disease. *aër.*, *nlif.*, *nmot.*, *pg.* *Bacillus hyacinthi septicus*, Heinze. Found in diseased hyacinth. *aër.*, *facanaër.*, *nlif.*, *mot.*, *npg.* Cf. *Bacterium hyacinthi*, Wakker. *Bacillus hyalinus*, Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *facanaër.*, *lif.*, *mot.*, *npg.* Reduces nitrates rapidly. *Bacillus hydrophilus fuscus*, Sanerelli. Syn., *Bacille de la septiciémie granuleuse de la grenouille*, Légrain. From the lymph of diseased frogs. *aër.*, *lif.*, *mot.*, *pg.* *Bacillus implexus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *lif.*, *mot.*, *npg.* *Bacillus incanus*, Pohl. Found in swamp water. *aër.*, *lif.*, *mot.* Not sufficiently studied. *Bacillus indicus*, Koch. Syn., *Bacillus indiens ruber*, Koch. *Micrococcus indicus*, Koch. Found in the intestinal contents of a monkey. *aër.*, *facanaër.*, *lif.*, *mot.*, *chg.* (brick-red), *pg.* (for rabbits). *Bacillus indigoferus*, Classen. Found in river water (Spree). *aër.*, *nlif.*, *mot.*, *chg.* (deep indigo blue), *npg.* *Bacillus indigogenus*, Alvarez. Found in an infusion of the leaves of the indigo plant. (*Indigofera tinctoria*, L.). *aër.*, *mot.*, *chg.* (indigo blue), *pg.* *Bacillus inflatus*, A. Koch. Obtained from the air. *aër.*, *lif.*, *mot.*, *npg.* *Bacillus intestinus motilis*, Sternberg. From the intestinal contents of yellow fever cadavers. *aër.*, *facanaër.*, *nlif.*, *mot.*, *npg.* *Bacillus inunctus*, Pohl. Found in swamp water. *aër.*, *facanaër.*, *lif.*, *mot.* Pathogenesis not determined. *Bacillus invisibilis*, Vaughan. Found in water. *aër.*, *facanaër.*, *nlif.*, *mot.*, *npg.* *Bacillus iodicoccus vaginatus*, Miller. See *Iodooccus vaginatus*. *Bacillus iris*, Frick. *aër.*, *nlif.*, *nmot.* (green), *npg.* *Bacillus janthinus*, Zopf. Syn., *Bacterium janthinus*, Zopf. Violet bacillus, found in sewage (Lawrence, Mass.). *aër.*, *lif.*, *mot.*, *chg.* (bluish violet), *npg.* *Bacillus kaukasicus*, Ger. See *Bacillus caucasicus*, Kern. *Bacillus klebsii*. See *Bacillus syphilidis*, Lustgarten. *Bacillus lactis*, Pasteur. See *Bacillus acidi lactici*, Hueppe. *Bacillus lactis aërogenes*, Escherich and Abelous. Syn., *Bacillus aërogenes*, *Bacillus capsulatus*, Smith. *Bacterium lactis aërogenes*, Escherich. *Bacille aërogène*, Fr.; *Bacillus des Milchkotes*, *Bacillus des Milchfaeces*, Ger. Found in the stomach and intestine of healthy adults. *aër.*, *facanaër.*, *nlif.*, *npg.* *Bacillus lactis albus*, Löffler. Found in milk. *aër.*, *lif.*, *mot.*, *npg.* *Bacillus lactis cyanogenus*. See *Bacillus cyanogenus*, Hueppe. *Bacillus lactis erythrogenes*, Hueppe and Baginsky. Syn., *Bacillus* of red milk. Found in milk and the feces of a child. *aër.*, *lif.*, *nmot.*, *chg.* (yellow and red), *npg.* *Bacillus lactis pituitosi*, Löffler. Syn., *Bacillus lactis viscosus*, Adametz. Löffler's *Bacillus* der schleimigen Milch. Found in milk. *aër.*, *nlif.*, *npg.* *Bacillus lactis viscosus*, Adametz. Found inropy milk. *aër.*, *nlif.*, *nmot.*, *npg.* Capsulated. *Bacillus latericeus*, Eisenberg. Syn., *Ziegelroter bacillus*, Adametz. Found in water. *aër.*, *nlif.*, *nmot.*, *chg.* (brick red), *npg.* *Bacillus leioderemos*, Löffler. Syn., *Bacillus lioderemos*, Flügge.

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *lif.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Glatthautbildender Kartoffelbacillus, Gummibacillus. Found in milk. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus leporis lethalis**, Giblier and Sternberg. From the intestinal contents of yellow fever patients. *aër.*, *liqf.*, *mot.*, *pg.* **Bacillus lepræ**, Armauer and Hansen. Syn., Aussatzbacillus, Bacillus der Lepra, Bacillus des Aussatzes, Ger.; Bacille de la lèpre, Fr.; Bacillo della lebbra, It. Found in leprous tubercles. Cannot be cultivated in ordinary media. Specific pathogenesis settled by inoculation of a condemned criminal. **Bacillus leptosporus**, L. Klein. Obtained from the air. *aër.*, *mot.*, *npg.* **Bacillus lethalis**, Babes. Syn., *Proteus lethalis*. *Proteus* bei Lungengangrâne des Menschen. Obtained from spleen and lung of patient dead of septicemia. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* **Bacillus limbatus acidilactici**, Marpmann. Found in cow's milk. *aër.*, *uliqf.*, *nmot.*, *npg.* **Bacillus limosus**, Russel. Obtained from mud (Bay of Naples). *aër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus lineola**. See *Bacterium lineola*, Cohn. **Bacillus liodermos**, Flügge. See *Bacillus liodermos*, Löffler. **Bacillus liquefaciens**, Eisenberg. Found in water. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens bovis**, Arloing. Syn., *Pneumobacillus liqefaciens bovis*. From the lungs of a diseased ox. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *pg.* **Bacillus liquefaciens communis**, Sternberg. Obtained from the feces of yellow fever patients. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens magnus**, Lüderitz. Found in the exudates of mice inoculated with garden earth. *anaër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens parvus**, Lüderitz. Source same as last. *anaër.*, *liqf.*, *nmot.*, *npg.* **Bacillus liquidus**, Frankland. Found in river water (Thames). Common. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus litoralis**, Russel. Obtained from mud (Bay of Naples). *aër.*, *facanaër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus lividus**, Plagge and Proskauer. Found in hydrant water (Berlin). *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.* (brick red), *npg.* **Bacillus lucens**, Van Tieghem. Syn., *Bacterium lucens*, Van Tieghem. Found on the surface of water. *aër.*, *nmot.* Brilliant. **Bacillus luteus**, Flügge. Syn., *Bacterium luteum*, List. Gelber Bacillus, Ger. Found in superficial layers of gelatin plate culture. *aër.*, *nmot.*, *uliqf.*, *chg.* (yellow), *npg.* **Bacillus luteus suis**, Salmon and Smith. Found in the perivisceral fluids of swine. *aër.*, *liqf.*, *mot.*, *chg.* (yellow red). Smells like glue. **Bacillus lyssæ**, Pasteur. Syn., *Coccobacterium lyssæ*, Rivolta. *Lissophyton suspectum*, Hallier. Micrococci della rabbia, Ital. Bacille de la rage, Fr.; Hundswut-bacillus, Ger. Cf. *Bacterium septicum sputigenum*, Fraenkel. Found in saliva of hydrophobic patients and animals. Cf. *Bacillus septicus sputigenus*, Flügge. **Bacillus maidis**, Cuboni. From macerated corn and the feces of pellagra patients. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus malaniriæ**, Israel. See *Bacillus mallei*, Löffler. **Bacillus malarie**, Klebs and Tommasi-Crudeli. Syn., Bacille de la malaria, Bacille du sang, Fr.; Bacillus der Malaria, Bacillus des Blutes, Blut-bacillus, Ger.; Bacillo della malaria, It. Bacillus of the blood. Obtained from the soil and air of the Campagna, from swamps, from the blood of malarial patients, etc. Pathogenesis disputed. **Bacillus mallei**, Löffler. Syn., *Bacillus malandriæ*, Israel; Rotzbacillus, Bacillus des Rotzes, Ger.; Bacille de la morve, Fr. Found in the nasal discharges, nodules, etc., of animals with glanders. *aër.*, *facanaër.*, *nmot.* (strictly parasitic), *pg.* (proven by inoculation).

**Bacillus martinez**, Sternberg. Obtained from the liver of a yellow fever cadaver. *aër.*, *facanaër.*, *uliqf.*, *nmot.*, *npg.* **Bacillus maydis**. See *Bacillus maidis*, Cuboni. Syn., *Bacterium maydis*, Cuboni; Batterio della pellagra, It. **Bacillus megaterium**, De Bary. Found on the leaves of boiled cabbage. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus melanosporus**, Eidam. Obtained from the air. *aër.*, *facanaër.*, *chg.* (black), *npg.* **Bacillus melitophorus**. See *Bacillus aketi*, Cheshire and Cheyne. **Bacillus melo-chloros**, Winkler and Schrötter. Syn., *Bacillus butyri fluorescens*, Lafar. Obtained from the dejections of the larva in a wormy apple. *aër.*, *liqf.*, *mot.*, *chg.* (emerald green), *pg.* (for rabbits). **Bacillus membranaceus amethystinus**, Eisenberg. Found in well water (Spalato). *aër.*, *liqf.*, *nmot.*, *chg.* (dark violet), *npg.* **Bacillus meningitidis purulentæ**, Naumann and Schäffer. Obtained from pus taken from beneath the pia mater in a person dead of purulent meningitis. *aër.*, *facanaër.*, *uliqf.*, *mot.*, *pg.* **Bacillus merismopædioides**, Zopf. Syn., *Arthrobacterium* or *Bacterium merismopædioides*, De Bary. Obtained from sewage mud; the type of the so-called "tablet cocci." **Bacillus mesentericus fuscus**, Flügge. Syn., Kartoffelbacillus, Ger.; Bacille brun de la pomme de terre, Fr. Potato bacillus. Obtained from the air, hay dust, water, etc. Common. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus mesentericus ruber**, Globig. Syn., Kartoffelbacillus; Roter Kartoffelbacillus, Ger.; Bacille rouge de la pomme de terre, Bacille rouge de Globig, Fr. Potato bacillus. Found upon potatoes. *aër.*, *liqf.*, *mot.*, *chg.* (reddish yellow or pink), *npg.* **Bacillus mesentericus vulgaris**, Flügge. Syn., *Bacillus figurans*, Crookshank. *Proteus vulgaris*. Bacille commun de la pomme de terre, Bacille des pommes de terre, Fr.; Kartoffelbacillus, Ger. Potato bacillus. Common. Found in potatoes, water, milk, intestinal contents of man, etc. *aër.*, *liqf.*, *npg.* **Bacillus miniaceus**, Zimmermann. See *Bacillus ruber*, Frank and Cohn. **Bacillus minimus**, Klebs. See *Bacillus erysipelatos suis*, Koch, etc. **Bacillus mirabilis**, Hauser. Syn., *Proteus mirabilis*. Bacille de Hauser, Fr. Obtained from decaying animal matter. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* **Bacillus molluscii**, Domenico. Syn., Bacillo del mollusco contagioso, Dominico, Ital. Found in molluscum contagiosum, resembles somewhat *Bacillus lipra* and *Bacillus malarie*. Pathogenesis disputed, the disease being attributed by some to psorosperms. **Bacillus multipediculosus**, Flügge. Syn., *Bacillus multipediculus*. Found in air and water. *aër.*, *uliqf.*, *nmot.*, *npg.* **Bacillus murisepticus**, Flügge. See *Bacillus erysipelatos suis*, Koch. **Bacillus murisepticus pleomorphicus**, Karlinski. Found in purulent uterine discharges. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* Probably identical with *Proteus vulgaris*, Hauser. **Bacillus muscoides**, Liborius. Found in soil, old cheese, cow dung, etc. *anaër.*, *uliqf.*, *mot.*, *npg.* **Bacillus mycoides**, Flügge. Syn., Erdbacillus, Ger.; Bacille mycoïde, Fr. Common in soil and water. *aër.*, *uliqf.*, *mot.*, *npg.* **Bacillus mycoides roseus**, Scholl. Found in the soil. *aër.*, *liqf.*, *chg.* (red), *npg.* **Bacillus neapolitanus**, Emmerich. Syn., *Bacillus coli communis*, *Bacterium coli commune*, Escherich, *Bacterium neapolitanum*, Colon bacillus of Escherich, Emmerich's Bacillus, Emmerich's Neaplerbacillus; Bacille neapolitaine, Fr.; Bacillus des Milchfäces, Ger.; Bacillus of Booker, a to n.

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *uliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Found in the air, in putrefying infusions and constantly in the alvine discharges of healthy and unhealthy human beings, also in those of many animals. From the blood, various organs and feces of cholera patients at Naples, hence the name. *aër., facanaër., nliqf., pg.* **Bacillus necrophorus**, Löffler. Obtained from rabbits after inoculation in the anterior chamber of the eye with portions of condyloma. *aër., facanaër., nliqf., pleom., pg.* **Bacillus nivalis**, Schmolck. See *Bacillus fluorescens nivalis*, Schmolck. **Bacillus nodosus parvus**, Lustgarten. From the healthy urethra of man. *aër., facanaër., nliqf., nmot., npg.* **Bacillus nubilus**, Frankland. From hydrant water (London). *aër., facanaër., liqf., npg.* **Bacillus ochraceus**, Zimmermann. From hydrant water (Chemnitz). *aër., liqf., mot., chg.* (ocher-yellow), *npg.* **Bacillus oedematis aërobicus**. A new bacillus of malignant edema, Klein. Found in the exudates of guinea pigs after inoculating with garden earth. *aër., facanaër., nliqf., mot., pg.* **Bacillus oedematis maligni**, Koch. Syn., *Bacillus oedematis*, Koch; *Bacillus septicus*, Pasteur; *Vibrio septique*, *Vibrio pyogenique*, Pasteur; *Bacille de l'œdème*, *Bacille de l'œdème malin*, *Bacille de la gangrène emphysemateuse progressive*, *Bacille de la gangrène gazeuse*, Fr.; *Microben der gasigen Gangrène*, Ger. *Bacillus* of gangrene, *Bacillus* of gangrenous septicemia. Pink bacillus of spreading edema, A. B. Harris. A widely scattered species, obtained from surface soil, dust, putrefying matter, foul water, etc., and from the exudates produced by inoculating animals with garden earth. *anaër., liqf., mot., pg.* **Bacillus of Acne Contagiosa of Horses**. See *Bacillus* of horse pox. **Bacillus of Afanassiew**. See *Bacillus tussis convulsiva*, Afanassiew. **Bacillus of Albuminous Decomposition**. See *Bacillus putrificus coli*, Bienstock. **Bacillus of Allantiasis**, Müller, Hoppe-Seyler. See also *Sarcina botulina*, Van den Corput. Cf. *Bacillus* of choleraic diarrhea from meat poisoning, Klein. Found in poisonous sausages, particularly in "Blunzen." *aër., liqf., pg.* **Bacillus of Alopecia areata**, Kasauli. Found attached to the hairs from the diseased patches; easily cultivated. See *Micrococcus* of *Alopecia areata*, Robinson, and *Bacterium decalvans*, Thin. **Bacillus of Babes and Oprescu**. Obtained from a case presenting symptoms of typhus fever. *aër., facanaër., nliqf., mot., pg.* **Bacillus of Belfanti and Pascarella**. Syn., *Impfetanus bacillus*, Ger. From the pus of wounds in a person dead of tetanus. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Beri-beri**, Eykman. See *Bacillus beribericus*, Lacerda. **Bacillus of Blue Milk**. See *Bacillus cyanogenus*, Hueppe. **Bacillus of Blue or Green Pus**. See *Bacillus pyocyaneus*, Gessard. **Bacillus of Booker, a to n**. Found in alvine discharges of children suffering from cholera infantum; probably varieties of *Bacillus neapolitanus*, Emmerich. **Bacillus of Bovet**. Obtained from the intestines of a woman dead of acute choleraic enteritis. *aër., nliqf., mot., pg.* **Bacillus of Braxy**. See *Bacillus anthracis*, Pollender and Davaine. **Bacillus of Bronchitis**, Lummitzer. Syn., *Bacillus* of Lummitzer. From the bronchial secretions in cases of putrid bronchitis. *aër., mot.* Cf. *Micrococcus* of bronchitis, Piechini. **Bacillus of Butyric Acid Fermentation**. See *Bacillus butyricus*, Prazmowski. **Bacillus of Carcinoma**, Rappin and Scheurlen and Domingo-Freire. Syn., *Bacille du cancer*, Fr. See *Bacillus* of Scheurlen. **Bacillus of Canestrini**.

Found in larvae and bees suffering from a malady common among bees in certain parts of Italy. *aër., liqf., mot., chg.* (pink), *pg.* **Bacillus of Canon and Pielicke**. See *Bacillus* of measles. **Bacillus of Cattle Plague**, Metschnikoff. See *Bacillus septicaemie hemorrhagicae*, Sternberg. **Bacillus of Cazal and Vaillard**. Obtained from cheesy nodules upon the peritoneum and in the pancreas. *aër., facanaër., liqf., mot., pg.* **Bacillus of Chancroid**, Ducrey. Found in pustules developed upon the arm from the inoculation of chancroidal virus; does not grow in artificial cultures. Cf. *Micrococcus ulceris mollis*. **Bacillus of Cheese**. See *Spirillum tyrogenum*, Denecke. **Bacillus of Chicken Cholera**. See *Bacillus septicaemie hemorrhagicae*, Sternberg. **Bacillus of Cholera**. See *Spirillum cholerae asiatica*, Koch. **Bacillus of Choleraic Diarrhea from Meat Poisoning**, Klein. Found in the blood and feces of persons poisoned with tainted meat. Cf. *Bacillus* of allantiasis, Müller and Hoppe-Seyler. **Bacillus of Cholera in Ducks**, Cornil and Toupet. Obtained from the blood of ducks that had died of an epidemic disease characterized by choleraic symptoms. *aër., nliqf., nmot., pg.* (for ducks, but not for chickens or pigeons). **Bacillus of Chyluria**, Wilson. Syn., *Bacillus der Chyluria*, Ger.; *Bacille de la chylurie*, Fr.; Found in the coagulum of chylous urine. *aër., facanaër., mot.* **Bacillus of Colomiatti**. Obtained from cases of conjunctivitis and xerotic masses in the eye. *aër., nliqf., nmot., npg.* Cf. *Bacillus* of xerosis epithelialis conjunctivæ, Leber. **Bacillus of Conjunctival Catarrh**, Koch. Syn., *Bacille du catarrhe conjonctival*, Fr.; *Bacillus des Bindehautcatarrhs*, Ger.; *Bacillus* of conjunctivitis, *Bacillus* of pink eye, Weeks. *aër., nliqf., pg.* Resembles *Bacillus xerosis*. **Bacillus of Dantec**. Syn., *Bacille du rouge de morue*, Fr. Obtained from salted codfish to which it gives a red color. *aër., liqf., mot., chg.* (red), *npg.* **Bacillus of Davaine's septicemia**. See *Bacillus septicaemie hemorrhagicae*, Sternberg. **Bacillus of Demme**. Obtained from the contents of tumors and pustules and from the blood of patients suffering from erythema nodosum. *aër., facanaër., (?) nliqf., pg.* (to guinea pigs; rabbits, dogs and goats refractory). **Bacillus of Diphtheria in Calves**. See *Bacillus diphtherie vitulorum*, Löffler. **Bacillus of Diphtheria in Doves**. See *Bacillus diphtherie columbarum*, Löffler. **Bacillus of Diphtheria in Man**. See *Bacillus diphtherie*, Klebs and Löffler. **Bacillus of Döderlein**. See *Bacillus vaginalis*, Döderlein. **Bacillus of Endocarditis**. See *Bacillus pyogenes fetidus*, Fränkel and Saenger. **Bacillus of Egyptian Catarrhal Conjunctivitis**. See *Bacillus* of Kartulis. **Bacillus of Erysipelas in the Rabbit**, Koch. See *Bacillus erysipelatos leporis*, Koch. **Bacillus of False Hog Cholera**. See *Bacillus parvus ovatus*, Löffler. **Bacillus of False Tuberculosis in Rabbits**. See *Bacillus* of pseudo-tuberculosis in rabbits, Malassez and Vignal. **Bacillus of Fiocca**. Found in the saliva of cats and dogs. *aër., facanaër., nliqf., nmot., pg.* (for rabbits, guinea pigs, rats, mice). **Bacillus of Foot Sweat**. Syn., *Fusschweißbacillus*, Ger.; *Bacille de la sueur des pieds*, Fr. See *Bacillus fetidus*, *Bacillus saprogenes No. II*, and *Bacterium graveolens*. **Bacillus of Foul Brood of Bees**. See *Bacillus alvei*, Cheshire and Cheyne. **Bacillus of Fowl Cholera**. See *Bacillus septicaemie hemorrhagicae*, Sternberg. **Bacillus of Friedländer**. See *Bacillus pneumonie friedländeri*. **Bacillus of Fulles**, III.

**Abbreviations.**—*aër.*=aërobic. *anaër.*=anaërobic. *chg.*=chromogenic. *facanaër.*=facultative anaërobic. *liqf.*=liquefactive. *monom.*=monomorphic. *mot.*=motile. *nliqf.*=non-liquefactive. *nmot.*=non-motile. *npg.*=non-pathogenic. *obl.*=obligate. *oscl.*=oscillating. *pg.*=pathogenic. *phos.*=phosphorescent. *pleom.*=pleomorphic. *sap.*=saprophytic.

Found in the soil. *aër.*, *nlqf.*, *mot.*, *np.* **Bacillus of Gangrene.** See *Bacillus edematis maligni*, Koch. *Bacillus saprogenes*, III, Rosenbach, and *Bacillus* of senile gangrene. **Bacillus of Gangrenous Septicemia.** Syn., *Bacille de la gangrène gazeuse*. See *Bacillus edematis maligni*, Koch. **Bacillus of Gessner.** See *Bacterium tholoidum*, Gessner. **Bacillus of Glanders.** See *Bacillus mallei*, Löffler. **Bacillus of Green Diarrhea in Children.** Lesage. See *Bacillus* of Lesage. **Bacillus of Green Pus.** See *Bacillus pyocyaneus*, Gessard. **Bacillus of Grouse Disease.** Klein. Obtained from the lungs and liver of grouse that had died of an epidemic disease. *aër.*, *nlqf.*, *nmot.*, *pg.* (for mice, guinea pigs, linnets, green finches, sparrows; chickens, pigeons and rabbits immune). **Bacillus of Hay Infusions.** See *Bacillus subtilis*, Ehrenberg. **Bacillus of Heminecrobiphilus.** Arloing. Obtained from the callous lymphatic glands of a guinea pig. *aër.*, *facanaër.*, *nlqf.*, *mot.*, *pleom.*, *pg.* **Bacillus of Hog Cholera.** Salmon and Smith. See *Bacillus ex pneumo-enteritide suis*, Klein. **Bacillus of Hog Erysipelas.** See *Bacillus erysipelatos suis*, Koch, etc. **Bacillus of Horse Pox.** Dieckerhoff and Grawitz. Syn., *Bacillus of acne contagiosa* of horses. **Bacillus der Akne contagiosa des Pferdes.** Ger. Obtained from the pustules of horses suffering from acne contagiosa. *aër.*, *nlqf.*, *pg.* **Bacillus of Hydrophobia.** See *Bacillus lyssa*, Pasteur. **Bacillus of Icterus.** Karlinsky and Ducamp. Found in the blood during an attack of infectious icterus. Did not thrive on ordinary culture media. **Bacillus of Influenza.** Pfeiffer, Kitasato and Canon. Syn., *Bacille de Pfeiffer*, *Bacille de l'influenza*, *Influenza bacillus*. Found in the purulent bronchial secretions and in the blood of persons suffering from epidemic influenza. *aër.*, *nmot.*, *pg.* Cf. *Micrococcus influenzae*, Letzerich. **Bacillus of Intestinal Diphtheria in Rabbits.** Ribbert. Syn., *Bacille de la diphthérie intestinale chez les lapins*, Fr. Obtained from the viscera of rabbits dead of a disease characterized by a diphtheritic inflammation of the intestinal mucous membrane. *aër.*, *nlqf.*, *nmot.* (?) *pg.* **Bacillus of Jeffries.** A group (A, G, J, K, P, S, Z.) of bacilli, resembling *Bacillus neapolitanus*, Emmerich, and *Bacillus lactis aërogenes*, Escherich. Found in the alvine discharges of children suffering from summer diarrhea. *anaër.*, *np.* **Bacillus of Jequirity Ophthalmia.** DeWecker and Sattler. Syn., *Bacille du jequirity*, Fr.; *Jequiritypilz*, Ger. Found in cases of jequirity ophthalmia and in infusions of jequirity seeds (*Abrus precatorius*), the supposed source of Abrin. *aër.*, *liqf.*, *mot.*, *np.* The disease is now held to be caused by a soluble poison, *jequiritin*. **Bacillus of Karlinski.** See *Bacillus murisepticus pleomorphus*, Karlinski. **Bacillus of Kartulis.** Koch and Kartulis. Obtained from the conjunctiva in cases of Egyptian catarrhal conjunctivitis. *aër.* Pathogenesis not well determined. **Bacillus of Koubasoff.** Obtained from carcinomatous growth in the human stomach. *aër.*, *facanaër.*, *nlqf.*, *mot.*, *pg.* (for guinea pigs and rabbits). Cf. *Bacillus* of Scheuerlen. **Bacillus of Lactic Acid Fermentation.** See *Bacillus acidilactici*, Hueppe. **Bacillus of Laser.** Obtained from mice infected with an epidemic disease. *aër.*, *facanaër.*, *nlqf.*, *mot.*, *pg.* (for field mice, guinea pigs, rabbits and pigeons). **Bacillus of Leprosy.** See *Bacillus lepræ*, Hansen. **Bacillus of Lesage.** Syn., *Bacille de la diarrhée verte infantile*, Fr. *Bacillus* of green diarrhea in children. Obtained in the green alvine discharges of

infants suffering from green diarrhea. *aër.*, *nlqf.*, *mot.*, *pg.* According to Baumgarten identical with *Bacillus fluorescens non-liquefaciens*, Schiller. **Bacillus of Letzerich.** Obtained from the urine of children suffering from nephritis interstitialis primaria. *aër.*, *liqf.*, *pg.* **Bacillus of Liborius.** See *Bacillus amylobacter*, Prazmowski. **Bacillus of Lichen Ruber.** Lasek. Syn., *Bacillus bei Lichen ruber*, Ger. Found in the lymph passages in cases of lichen ruber. **Bacillus of Lucet.** Syn., *Bacille de la dysenterie epizoötique des poules et des dindes*, Fr. Obtained from chickens and turkeys suffering from an infectious form of septicemia characterized by dysenteric discharges. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* **Bacillus of Lumtitz.** See *Bacillus* of Bronchitis. **Bacillus of Lupus.** See *Bacillus tuberculosis*, Koch. **Bacillus of Lustgarten.** See *Bacillus syphilidis*, Lustgarten. **Bacillus of Lymph in Fishes.** Oliver and Richet. Observed in the lymph of certain fishes. *aër.*, *mot.*, *np.* **Bacillus of Malaria.** See *Bacillus malarie*, Klebs and Tommasi-Crudeli. **Bacillus of Malignant Edema.** See *Bacillus edematis maligni*, Koch. **Bacillus of Measles.** Canon and Pielicke. Syn., *Bacillus* of Canon and Pielicke. Found in the blood and in the secretions of the nose and conjunctiva of persons with measles. Cf. *Micrococcus* of measles, Klebs and Keating. **Bacillus of Mouse Septicemia.** See *Bacillus erysipelatos suis*, Pasteur. **Bacillus of Necrosis of the Liver in Badgers.** Eberth. Found in the necrotic liver of a badger. **Bacillus of Necrosis of the Liver in Guinea Pigs.** Eberth. Found in the necrotic liver of a guinea pig. **Bacillus of Nephritis.** Letzerich. See *Bacillus* of Letzerich. **Bacillus of Nocard.** Syn., *Bacille du farcin du bœuf*, Fr.; *Bacillus der Wurmkrankheit*, Ger. Found in the superficial abscesses of cattle suffering from farcy. *aër.*, *nmot.*, *pg.* **Bacillus of Okada.** Obtained from the dust between the boards of a floor. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* **Bacillus of Osteomyelitis.** Kraske and Becker. Found in cases of osteomyelitis. *aër.*, *liqf.* (or in some forms *nlqf.*), *mot.*, *pleom.*, *pg.* Held by Pasteur as identical with the micrococcus of furuncle, q. v. **Bacillus of Phthisis.** See *Bacillus tuberculosis* Koch. **Bacillus of Pink Eye.** Weeks. See *Bacillus* of conjunctival catarrh, Koch. **Bacillus of Potato Rot.** Kramer. Syn., *Nassfäulebacillus*. Obtained from potatoes affected with wet rot. *aër.*, *liqf.*, *mot.*, *np.* Putrefies the albuminous substances of potatoes. **Bacillus of Pseudo-tuberculosis in Rabbits.** Eberth, Malassez, and Vignal. Syn., *Bacille de la tuberculose zoogléique*, *Bacille de la pseudo-tuberculose du lapin*, Fr.; *Bacillus der Pseudo-tuberculose der Kaninchen*, Ger. Found in the nodular deposits characteristic of this disease. **Bacillus of Puerperal Fever.** See *Bacillus puerperalis*, Engel and Spillmann. **Bacillus of Purpura Hæmorrhagica of Babes.** Obtained from the viscera of a patient dead of purpura hæmorrhagica. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *pg.* Resembles the next two forms. **Bacillus of Purpura Hæmorrhagica of Kolb.** Obtained from the viscera of patients dead of purpura. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* **Bacillus of Purpura Hæmorrhagica of Tizzoni and Giovannini.** Obtained from the blood of two children dead of purpura hæmorrhagica. *aër.*, *facanaër.*, *nlqf.*, *nmot.*, *pg.* **Bacillus of Pyæmia.** Beltzow. Syn., *Bacille de la pyémie*, Fr.; *Bacillus der Pyämie*, Ger. Two forms found in pyæmia, one of which resembles *Bacillus edematis*

Abbreviations.—*aër.* = aerobic, *anaër.* = anaerobic, *chg.* = chromogenic, *facanaër.* = facultative anaerobic, *liqf.* = liquefactive, *monom.* = monomorphic, *mot.* = motile, *nlqf.* = non-liquefactive, *nmot.* = non-motile, *np.* = non-pathogenic, *obl.* = obligate, *oscl.* = oscillating, *pg.* = pathogenic, *phos.* = phosphorescent, *pleom.* = pleomorphic, *sap.* = saprophytic.

*maligni*, Koch. *Bacillus* of Rabbit Septicemia. See *Bacillus septicæmiæ hæmorrhagica*, Sternberg. *Bacillus* of Rabies. See *Bacillus lyssa*, Pasteur. *Bacillus* of Rag Pickers' Disease. See *Bacillus hominis capsulatus*, Bordoni-Uffreduzzi. *Bacillus* of Red Bread. See *Bacillus prodigiosus*, Ehrenberg. *Bacillus* of Red Milk. See *Bacillus lactis erythrogenes*, Hueppe; and *Bacillus prodigiosus*, Ehrenberg. *Bacillus* of Rheumatism. See *Bacillus rheumathritidis*, Kussmaul. *Bacillus* of Rhinoscleroma. See *Bacillus rhinoscleromatis*, Cornil and Alvarez. *Bacillus* of Roth, I, II. Obtained from old rags. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *pg.* Resembles *Bacillus neapolitanus*, Emmerich; and *Bacillus cavicidus*, Burger. *Bacillus* of Rouget. See *Bacillus erysipelas suis*, Koch, etc. *Bacillus* of Scarlet Fever, Crooke. *Syn.*, *Bacille* de la scarlatine, Fr. Found in the nasal mucus and tissues of the throat in a case of anginose scarlet fever. *mot.* Resembles *Bacillus adematidis maligni*, Koch, and the Proteus of Hauser. According to Doehle the parasite of this disease is a protozoön. Cf. *Micrococcus Scarlatinae*. *Bacillus* of Scheuflen, Scheuflen, Rapin, and Domingo-Freire. *Syn.*, *Bacillus epidermidis*, Bordoni-Uffreduzzi. From cancerous tissues and from mammary epithelia of healthy persons. According to Macé possibly identical with a variety of *Bacillus mesentericus vulgaris*, Flügge. *aër.*, *lif.*, *mot.*, *npg.* *Bacillus* of Schimmelbusch. Obtained from the necrotic tissues of a case of cancrum oris or noma. *aër.*, *nlif.*, *pg.* *Bacillus* of Schou. See *Bacillus pneumonicus agilis*, Schou. *Bacillus* of Senile Gangrene, Tricomi. *Syn.*, *Bacille* de la gangrene sénile, Fr. *Bacillus* of gangrene, *Bacillus* of Tricomi. Found in the blood, in the tissues along the line of demarcation, in the subcutaneous tissue and the lymph spaces of the skin, and in the ichorous discharge. *aër.*, *lif.*, *nmot.*, *pg.* Cf. *Bacillus adematidis maligni*, Koch, and *Bacillus saprogenes*, III, Rosenbach. *Bacillus* of Septicemia in Man, Klein. *Syn.*, *Bacille* de la septicémie, Fr. *Bacillus* of Southern Cattle Plague, F. S. Billings. *Syn.*, *Bacillus* of Texas fever in cattle. *Bacillus* der amerikanischen Rinderseuche, Canerva. Found in the blood, viscera, and manure of cattle infected with cattle plague or Texas fever; also in the ticks (*Boophilus bovis*, Curtice) infecting the cattle, and in their discharges. The spread of the disease is largely due to the manure of the cattle and also indirectly to the ticks. *aër.*, *nlif.*, *mot.*, *pleom.*, *pg.* Smith and Kilborn now attribute this disease to the psorosperm *Pyrosoma bigeminum*. *Bacillus* of Spontaneous Rabbit Septicemia, Eberth. See *Bacillus* of swine plague, Marseilles. *Bacillus* of Symptomatic Anthrax. See *Bacillus chauvæi*, Bollinger and Feser. *Bacillus* of Swine Pest, Selander. See *Bacillus ex pneumo-enteritide suis*, Klein. *Bacillus* of Swine Plague, Marseilles, Reitsch, and Jobert. *Syn.*, *Bacillus suis*, Detmers. *Bacillus* der Schweineseuche, Marseilles; *Bacillus* der Fretchenseuche (ferret disease), Eberth and Schimmelbusch; *Bacille* de la pest porcine, Fr.; *Bacillus* of spontaneous rabbit septicemia; *Bacillus* of swine plague, Detmers and Billings; Swine plague, Schizophyte, Detmers. First obtained from swine attacked by a fatal epidemic disease in Marseilles. *aër.*, *nlif.*, *mot.*, *pg.* Canerva and others identify this with the *Bacillus* of ferret disease and with that of American swine plague; also with the *Bacillus* of Southern cattle plague, Billings; but this latter seems to be a distinct

species. See *Bacillus tardigradus*. *Bacillus* of Syphilis. See *Bacillus syphilidis*, Lustgarten. *Bacillus* of Tetanus. See *Bacillus tetani*, Nicolaier. *Bacillus* of Texas Cattle Fever, F. S. Billings. See *Bacillus* of Southern cattle plague. *Bacillus* of the Blood. *Syn.*, *Bacille* du sang, Fr.; *Blutbacillus*, *Bacillus* des Blutes, Hoffmann, Ger. *Bacillus* of the Lungs of Cattle, Lüstig. Found in the lungs of healthy and diseased cattle. *aër.*, *lif.* *Bacillus* of the Meconium, Escherich. Found in the meconium. *Bacillus* of the Pneumo-enteritis of the Pig. See *Bacillus ex pneumo-enteritide suis*, Klein. *Bacillus* of the Smeigma. *Syn.*, *Bacille* du smegma préputial, Fr.; *Smegmabacillus*, Ger. Found in the smegma of the male and female genitals. *Bacillus* of Tommasoli. See *Bacillus sycosiferus fufidus*, Tommasoli. *Bacillus* of Tricomi. See *Bacillus* of senile gangrene. *Bacillus* of Tuberculosis of Vines. *Syn.*, *Bacille* de la tuberculosis des vignes, Corvo, Fr. Regarded by Corvo as the cause of the diseased condition of vines usually attributed to *Phylloxera vastatrix*, Planchon. *Bacillus* of Ulcerative Stomatitis of Cattle, Lingard and Batt. Found on the skin, the mucous membranes, and in the lungs of young cattle. Cf. *Streptococcus* of eczema epizootica, Schottelius. *Bacillus* of Ulcus Molle, Kröfting. Identical with that described by Ducrey as the *Bacillus* of Chancroid. *Bacillus* of Utpadel, Utpadel and Gessner. Obtained from the stuffing of the bed quilts in a military hospital (Augsburg), and from the intestinal contents of man. *aër.*, *nlif.*, *mot.*, *pg.* *Bacillus* of Vagus Pneumonia. See *Bacillus pneumonicus agilis*, Schou. *Bacillus* of Verruga Peruana, Izquierdo. Found in the intercellular spaces and blood-vessels in the nodules characteristic of Peruvian wart. *Bacillus* of Vignal. See *Bacillus buccalis minutus*, Vignal. *Bacillus* of Whooping Cough. See *Bacillus tussis convulsiva*, Afanassiew. *Bacillus* of Xerosis Epithelialis Conjunctivæ, Leber, Kuschbert, Fränkel, and Neisser. *Syn.*, *Bacillus xerosis*, Fränkel; *Bacillus* of Colomiatti, *Bacillus* of xerosis, Schreiber; *Xerosebacillus*, *Bacillus* der Xerosis epithelialis conjunctivæ, Ger.; *Bacille* du xerosis conjunctivæ, Fr. Found in the white, fatty scales of the conjunctivæ in cases of Xerophthalmia. *nmot.* Does not grow on gelatin or potato. Pathogenesis not fully determined. *Bacillus oxytocus perniciosus*, Wyssokowitsch. Found in milk left standing a long time. *aër.*, *nlif.*, *pg.* *Bacillus ovatus minutissimus*, Unna. Found upon the skin in cases of eczema seborrhæicum. *aër.*, *facanaër.*, *nlif.*, *npg.* *Bacillus* of Yellow Fever. *Bacille* de la fièvre jaune, Fr.; *Bacillus* des gelben Fiebers, Ger. Found in the mucous membrane of the small intestine in two cases of yellow fever. Sternberg has found many forms in the intestinal contents and viscera of yellow fever cadavers, the most frequent and abundant being the *Bacillus neapolitanus*, Emmerich; *Bacillus cadaveris*, Sternberg; and *Bacillus* V. Sternberg. This latter is held by Sternberg as being possibly concerned in the etiology of yellow fever. Cf. *Microbe* de la fièvre jaune, Freire et Rebougeon. *Bacillus* of Yellow Milk. See *Bacillus synxanthus*, Ehrenberg and Schröter. *Bacillus panificans*, Laurent. Claimed as the active agent in the raising of bread. Found especially in black bread. Dünneberger considers it a mere impurity and not concerned in the leavening processes. *Bacillus parvus ovatus*, Löffler. *Syn.*, *Pseudorotlaufbacillus*, Ger. *Bacillus* of false hog

**Abbreviations.**—*aër.*=aerobic. *anaër.*=anaerobic. *chg.*=chromogenic. *facanaër.*=facultative anaerobic. *lif.*=liquefactive. *monom.*=monomorphic. *mot.*=motile. *nlif.*=non-liquefactive. *nmot.*=non-motile. *npg.*=non-pathogenic. *obl.*=obligate. *oscl.*=oscillating. *pg.*=pathogenic. *phos.*=phosphorescent. *pleom.*=pleomorphic. *sap.*=saprophytic.

cholera. Found in the carcass of a pig dead of a disease resembling rouget. It resembles *Bacillus septicaemia haemorrhagica*, Sternberg. *Bacillus pasteurianus*, Hansen. Syn., *Bacterium pasteurianum*, *Arthrobacterium pasteurianum*, *Micrococcus pasteurianus*. Found in beer-wort and beer, especially that poor in alcohol. Resembles *Bacillus acetii*, Kützing and Sommer. *Bacillus pestifer*, Frankland. Found in the air. *aër.*, *liqf.*, *mot.*, *nfg.* *Bacillus phosphorescens*, Fischer. Syn., *Bacillus phosphorescens indicus*, Fischer; *Photobacterium indicum*, Fischer; Indischer Leuchtbacillus, Ger. Found in sea water (Gulf of Mexico). *aër.*, *liqf.*, *mot.*, *phos.*, *nfg.* *Bacillus phosphorescens gelidus*, Forster. See *Bacillus phosphoreus*, Cohn. *Bacillus phosphorescens indicus*, Fischer. See *Bacillus phosphorescens*, Fischer. *Bacillus phosphorescens indigenus*, Fischer. Syn., Einheimischer Leuchtbacillus, Ger. Found in sea water (Harbor of Kiel) and upon herring. *aër.*, *liqf.*, *mot.*, *phos.*, *nfg.* *Bacillus phosphoreus*, Cohn. Syn., *Micrococcus phosphoreus*, Cohn; *Bacterium phosphorescens*, Hermes; *Bacillus phosphorescens gelidus*, Forster. Found on sea fish, raw and cooked (cooked salmon, Cohn). *aër.*, *liqf.*, *phos.*, *nfg.* *Bacillus plicatus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *liqf.*, *nmot.*, *chg.* (grayish yellow), *nfg.* *Bacillus pneumoniae*, Flügge. See *Bacillus pneumoniae friedländeri*. *Bacillus pneumoniae friedländeri*. Syn., *Bacillus pneumoniae*, Flügge; *Diplococcus pneumoniae fibrinosa*, Friedländer; *Micrococcus pneumoniae infectiosa*, Friedländer; *Bacille de pneumonie*, Fr.; *Bacillus of Friedländer*; *Microbe of Friedländer*. Occasionally obtained from the exudates in the pulmonary alveoli in cases of croupous pneumonia. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *pg.* *Bacillus pneumonicus agilis*, Schou. Syn., *Bacillus of Schou*; *Bacillus of Vagus pneumonia*; *Bacille pneumonique*, Fr. Obtained from rabbits suffering from pneumonia induced by section of the vagi. *aër.*, *liqf.*, *mot.*, *pg.* *Bacillus pneumosepticus*, Babes. Obtained from the blood and tissues of a person dead of septic pneumonia. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *pg.* *Bacillus polymyxa*, Prazmowski. Syn., *Clastridium polymyxa*, Prazmowski. Found in infusion of potatoes, lupin seeds, etc. *aër.*, *facanaër.*, *nfg.* *Bacillus polytipiformis*, Liborius. Found in cow dung and in the exudates of mice inoculated with garden earth. *anaër.*, *nlif.*, *mot.*, *nfg.* *Bacillus preussii*, Ciesielski. See *Bacillus alvei*, Cheshire and Cheyne. *Bacillus prodigiosus*, Ehrenberg. Syn., *Bacteridium prodigiosum*, Schröter; *Bacterium prodigium*, *Micrococcus prodigiosus*, Cohn; *Micrococcus imitrophus*, Trevisan; *Monas prodigiosa*, Ehrenberg; *Palumella prodigiosa*, Mont; *Zoogalactina imitropa*, Sette; *Bacille du lait rouge*, *Bacille du pain rouge*, Fr.; *Bacillus der roten Milch*, *Bacillus des roten Brotes*, *Hostienblut*, *Wunderblut*, *Blutpils*, Ger. Frequently found upon food-stuffs, boiled potatoes, hard-boiled eggs, moist bread, etc. *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.* (red), *nfg.* Acts as a protective to rabbits against anthrax. *Bacillus pseudœdema*, Liborius. Syn., *Bacillus pseudosepticus*, Macé; *Pseudo-œdem-bacillus*, Ger. Obtained from the exudates of mice, after inoculation with garden earth. *anaër.*, *liqf.*, *pg.* Resembles *Bacillus œdematis maligni*, Koch. *Bacillus pseudopneumonicus*, Passet. Syn., *Bacterium pseudo-pneumonicum*. Found in pus. *aër.*, *nlif.*, *nmot.*, *pg.* Resembles *Micrococcus pneumoniae cruposa*, Fränkel. *Bacillus pseudosepticus*, Macé.

See *Bacillus pseudœdema*, Liborius. *Bacillus pseudosepticus* of Mice, Bienstock. Syn., *Bacillus of pseudosepticemia* of mice. Found in feces. *aër.*, *nlif.*, *nmot.*, *pg.* Found after inoculation, mostly in the edematous fluid and not in the blood. *Bacillus pseudo-tuberculosis*, Pfeiffer. Obtained from the viscera of a horse killed on suspicion of having glanders. *aër.*, *nlif.*, *nmot.*, *pg.* *Bacillus puerperalis*, Engel and Spillmann. Syn., *Leptothrix puerperalis*, Fetz; *Bacillus des Puerperal-Fiebers*, Ger.; *Bacille puerpérale*, Fr.; *Leptothrix of puerperal fever*; *Bacillus of puerperal fever*. Found in two cases of puerperal sepsis. *pg.* (for mice and rabbits). Considered by Pasteur to be identical with *Bacillus anthracis*. *Bacillus pulpæ pyogenes*, Miller. Obtained from gangrenous tooth-pulp. *aër.*, *facanaër.*, *liqf.*, *pg.* *Bacillus punctatus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *liqf.*, *nfg.* *Bacillus putrificus coli*, Bienstock. Syn., *Bienstock's putrefactive bacillus* from the feces; *Bienstock's putrefactive bacillus*; *Bacillus of albuminous decomposition*; *Drumstick bacillus*; *Trommelschlägelbacillus*; *Bienstock's Bacillus aus Faeces*; *Bacillus der Eiweisszersetzung*, Ger.; *Bacille de la decomposition de l'albumine*, Fr. Found in human feces. *aër.*, *facanaër.*, *nlif.*, *mot.*, *nfg.* *Bacillus pyocyaneus* α, Gessard. Syn., *Bacillus aeruginosus*, *Bacterium aeruginosum*, Schröter; *Micrococcus pyocyaneus*, Gessard. *Bacillus of blue or green pus*. *Bacille*, *Bactérie* ou *Microbe du pus bleu*, *Bacille du pus vert*, *Bacille pyocyanique*, Fr.; *Bacillus des grünblauen Eiters*. A widely distributed form, found in purulent and serous wounds, in perspiration, and in the viscera of human cadavers. *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.*, *pg.* Two pigments, one fluorescent green, the other blue, pyocyanin. *Bacillus pyocyaneus* β, Ernst. Found in pus from bandages stained green. *aër.*, *liqf.*, *mot.*, *chg.* (yellowish green), *nfg.* *Bacillus pyogenes fetidus*, Passet. Syn., *bacille pyogène fétide*, Fr. Obtained from an ischio-rectal abscess. *aër.*, *nlif.*, *mot.*, *pg.* *Bacillus pyogenes soli*, Bolton. Obtained from the exudates of a rat after inoculation with garden earth. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *nfg.* *Bacillus radiatus*, Läderitz. Obtained from the exudates of mice and guinea-pigs after inoculation with garden earth. *anaër.*, *liqf.*, *mot.*, *nfg.* *Bacillus radiatus aquatilis*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *liqf.*, *mot.*, *nfg.* *Bacillus ramosus*, Eisenberg. Syn., *Wurzelbacillus*. Common in soil and water. *aër.*, *liqf.*, *nfg.* *Bacillus ramosus liquefaciens*. Obtained from the air. *aër.*, *liqf.*, *mot.*, *nfg.* *Bacillus reticularis*, Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *liqf.*, *mot.*, *nfg.* *Bacillus rheumarthritidis*, Kussmaul. Syn., *Bacillus rheumarthritidis*, *Micrococcus rheumarthritidis*, Leyden. *Bacillus of rheumatism*. *Bacille du rhumatisme*, Fr. *Gelenkrheumatismus Mikro-organismen*, *Mikrokokken bei Gelenkrheumatismus*, Ger. Found in the effusions in the joints in articular rheumatism. *Bacillus rhinoscleromatis*, Cornil and Alvarez, Von Frisch, Paltauf, Von Eiselsberg, Dittrich, Stepanow, etc. Syn., *Bacille du rhinosclérome*, Fr. Found in the newly formed tubercles of rhinoscleroma. *aër.*, *facanaër.*, *nlif.*, usually *nmot.* (becomes motile on cultivation), *pg.* Etiologic relations not established. Considered by many as identical with *Bacillus pneumoniae friedländeri*. It is less virulent, gelatin cultures more transparent and the capsules more persistent. *Bacillus rosaceum metalloides*, Dowdeswell.

Abbreviations.—*aër.*=aerobic. *anaër.*=anaerobic. *chg.*=chromogenic. *facanaër.*=facultative anaerobic. *liqf.*=liquefactive. *monom.*=monomorphic. *mot.*=motile. *nlif.*=non-liquefactive. *nmot.*=non-motile. *nfg.*=non-pathogenic. *obl.*=obligate. *oscl.*=oscillating. *pg.*=pathogenic. *phos.*=phosphorescent. *pleom.*=pleomorphic. *sap.*=saprophytic.

See *Bacillus ruber*, Frank and Cohn. *Bacillus rubefaciens*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nlif.*, *mot.*, *chg.* (pale pink), *nfg.* *Bacillus rubellus*, Okada. Found in the exudates of guinea-pigs after inoculation with street dust. *anaër.*, *liqf.*, *mot.*, *chg.* (red), *nfg.* *Bacillus ruber*, Frank, Cohn, and Becker. Syn., *Bacillus miniacens*, Zimmermann. *Bacillus* (or *Bacterium*) *rosaceum metalloides*, Dowdeswell. The red bacillus of water. Found in water and on boiled rice. *aër.*, *liqf.*, *mot.*, *chg.* (magenta red), *nfg.* *Bacillus ruber indicus*. See *Bacillus indicus*, Koch. *Bacillus rubescens*, Jordan. Found in sewage (Lawrence, Mass.). *aër.*, *nlif.*, *mot.*, *chg.* (pale pink), *nfg.* *Bacillus rubidus*, Eisenberg. Found in water. *aër.*, *liqf.*, *mot.*, *chg.* (brownish red), *nfg.* (Lustig describes a red bacillus from river water which he claims to be different from this). *Bacillus salivarius septicus*, Biondi. See *Bacillus septicus sputigenus*, Flügge. *Bacillus sanguinis typhi*, Brannan and Cheesman. Obtained from the blood of typhus-fever patients. *aër.*, *facanaër.*, *nmot.* *Bacillus saprogenes*, I, II, III, Rosenbach. Syn., *Bacille saprogène*, Bacille de la sueur des pieds, Fr. Fäulnisbacillus, Ger. Found in putrefying matter on fetid feet, the white plugs of the pharyngeal follicles, etc. *aër.*, *facanaër.*, *pg.* *Bacillus scaber*, Duclaux. Syn., *Tyrophthrix scaber*. Found in cheese. *aër.*, *nlif.*, *mot.* (in early stages becoming non-motile), *nfg.* *Bacillus schäfferi*, Freudenreich. Obtained from cheese and fermenting potato infusion. *aër.*, *facanaër.*, *nlif.*, *mot.*, *nfg.* Closely resembles *Bacillus neopolitani*, Emmerich. *Bacillus scissus*, Frankland. Found in the soil. *aër.*, *nlif.*, *nmot.*, *nfg.* *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. *Bacillus cholerae gallinarum*, Flügge. *Bacillus cuniculicida*, Flügge. *Bacillus cuniculicidus*, Koch. *Bacterium septicæmiæ*, Koch. *Bacterium morbilli*, Lanzi. *Cocobacteria septica*, Billroth. *Micrococcus septicus*, Cohn. *Micrococcus cholerae gallinarum*, *Micrococcus gallicidus*, *Microsporion septicus*, Klebs. *Bacillus* der Hühnercholera, *Bacillus* der Kaninchenseptikämie (Koch). *Bacterium* der Septikämie bei Kaninchen, *Bacillus* der Rinderseuche, Kitt. *Bacillus* der Schweineseuche, Löffler and Schütz. *Bacillus* der Wildseuche, Hueppe. *Bacillus* der Büffelseuche, Oreste-Armanni. *Rinderpestbacillus*, Ger. *Bacille* de la septicémie du lapin. *Bacille* du choléra des poules. *Microbe* du choléra des poules, Pasteur, Fr. *Bacillus septicus*, Koch. See *Bacillus erysipelatos suis*, Koch. *Bacillus septicus*, Pasteur. See *Bacillus ædematis maligni*, Koch. Cf. *Proteus septicus*. *Bacillus septicus acuminatus*, Babes. Obtained from the umbilical stump, blood and viscera of a five days old child, dead of septic infection. *aër.* (no growth on gelatin), *pg.* (for rabbits and guinea-pigs, not for mice). *Bacillus septicus agrigenus*, Nicolaïer. Obtained from manured garden soil. *aër.*, *nlif.* (?) Resembles *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. *Bacillus septicus aus Speichel*. See *Bacillus septicus sputi*, I, II, Kriebohm. *Bacillus septicus keratomalaciæ*, Babes. Obtained from the corneal tissues and viscera of a child that died of septicemia following keratomalacia. *aër.*, *facanaër.*, *nlif.*, *pg.* (for rabbits and mice, slightly for birds, not for guinea-pigs). *Bacillus septicus sputi*, I, II, Kriebohm. Syn., *Bacillus septicus aus Speichel*, Ger. Obtained from human buccal secretions. Does not grow in any known culture-medium. Resembles *Bacillus septicæmiæ hæmorrhagicæ*, Stern-

berg. *Bacillus septicus sputigenus*, Flügge. Syn., *Bacillus salivarius septicus*, Biondi. *Bacterium septicum sputigenum*, Fränkel. *Micrococcus pneumoniae croupose*, Fränkel. *Micrococcus pasteurii*, Sternberg. *Diplococcus pneumoniae*, Weichselbaum. *Streptococcus lanceolatus pasteurii*, Carnaleia. *Microbe* of Pasteur. *Micrococcus* of Salvioli. *Micrococcus* of sputum septicæmiæ, Fränkel. Fränkel'scher *Diplococcus*. Fränkel'scher *Pneumobacillus*. Fränkel'scher *Pneumonie-Diplococcus*. Lancet-shaped micrococcus, Talamon. *Lanceolatococcus*, Talamon. Found both in healthy and in pneumonic sputum, in the fibrinous exudates of croupous pneumonia, and in the pus of meningitis. *aër.*, *facanaër.*, *nmot.*, *nlif.*, *pg.* Held to be the cause of croupous pneumonia in man, and by some to be identical with *Bacillus lysææ*, Pasteur. *Bacillus septicus ulceris gangrænosæ*, Babes. Found in the blood and viscera of a boy dead of septicæmia following gangrene of the skin. *aër.*, *liqf.*, *mot.*, *pg.* *Bacillus septicus vesicæ*, Clado. Found in the urine of a patient with cystitis. *aër.*, *facanaër.*, *nlif.*, *mot.*, *pg.* *Bacillus sessilis*, L. Klein. Found in the blood of a cow supposed to have died of anthrax. *aër.*, *mot.* (convulsive jerking), *nfg.* *Bacillus similis*, Bienstock. See *Bacillus subtilis similans*, I, II, Bienstock. *Bacillus smaragdinus foetidus*, Keimann. Found in the nasal secretions in a case of ozena. *aër.*, *facanaër.*, *liqf.*, *pg.* *Bacillus smaragdino phosphorescens*, Katz. Obtained from a herring in fish market (Sidney, N. S. W.). *aër.*, *nlif.*, *nmot.* *phos.* (emerald green), *nfg.* Resembles *Photobacterium phosphorescens*, Cohn, and *Photobacterium pflügeri*, Ludwig. *Bacillus solidus*, Lüderitz. Found in the exudates of mice inoculated with garden earth. *aër.*, *nlif.*, *mot.*, *nfg.* *Bacillus spiniferus*, Unna. Found upon the skin in cases of eczema seborrhœicum. *aër.*, *nlif.*, *chg.* (grayish yellow), *nfg.* *Bacillus sputigenus crassus*. See *Bacillus crassus sputigenus*, Kriebohm. *Bacillus stolonatus*, Adametz. Found in water. *aër.*, *nlif.*, *mot.*, *nfg.* *Bacillus stoloniferus*, Pohl. Found in swamp water. *aër.*, *liqf.*, *mot.* Pathogenesis not determined. *Bacillus striatus albus*, Von Besser. Found in the nasal secretions of healthy persons. *aër.*, *nlif.*, *nfg.* *Bacillus striatus flavus*, Von Besser. Occasionally found in nasal mucus. *aër.*, *nlif.*, *chg.* (sulphur yellow), *nfg.* *Bacillus subflavus*, Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nlif.*, *mot.*, *chg.* (pale yellow), *nfg.* *Bacillus subtilis*, Ehrenberg, Cohn, Brefeld, Prazmowski, and Fitz. Syn. *Bacillus glycerinæ*, Fitz; *Bacillus fitzianus*, Zopf; *Bacterium subtile*, Zopf; *Metallactar subtile*, Pertz; *Vibrio subtilis*, Ehrenberg; *Bacille* du foin, Fr.; *Bacillo* del fieno, Ital.; Heubacillus; Fitz'scher *Aethylbacillus*, Ger. DeBary confines *B. subtilis* to the form described by Brefeld and Prazmowski. The relation of the starch fermentation species of Fitz remains doubtful. An abundant form obtained from the air, water, soil, and on plants. *aër.*, *liqf.*, *oscl.*, *nfg.* *Bacillus subtiliformis*, Bienstock. See *Bacillus subtilis similans*, I, II, Bienstock. *Bacillus subtilis similans*, I, II, Bienstock. Syn., *Bacillus similis*, Bienstock. Heubacillusähnlicher *Bacillus*, Ger. *Bacille* de Bienstock, I, II, Fr. Found in human feces. *aër.*, *nlif.*, *nmot.*, *nfg.* *Bacillus suis*, Detmers. See *Bacillus tardigradus*. *Bacillus sulf-hydrogenus*, Miquel. Found in water. *aër.*, *mot.* Decomposes albumin with evolution of H<sub>2</sub>S. *Bacillus sulfureum*, Holschewnikoff and Rosenheim. Two forms found in urine and in mud.

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *nfg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

(1) *aër.*, *facanaër.*, *nlif.*, (2) *lif.*, *mot.*, *chg.* (reddish brown). *uſg.* Syn., *Proteus sulfureus*, Lindénborn. Found in water. **Bacillus superficialis**, Jordan. Common in sewage (Lawrence, Mass.). *aër.*, *lif.*, *mot.*, *uſg.* **Bacillus sycoſiferus** *foetidus*, Tommaſoli. Syn., *Bacillus sycoſiferus*. *Bacillus* of Tommaſoli. Found on the hairs of the head of a patient affected with ſycoſis. *aër.*, *nlif.*, *umot.*, *ſg.* **Bacillus ſyncyanum**. See *Bacillus cyanogenus*, Hueppe. **Bacillus ſynxanthus**, Ehrenberg and Schroter. Syn., *Bacillus xanthogenus*, Fuchs and Ehrenberg. *Bacterium xanthinum*, Schröter. *Vibrio ſynxanthus*, Ehrenberg. *Vibrio xanthogenus*, Fuchs. *Bacillus* of yellow milk. *Bacille* du lait jaune, Fr. Found in milk that has been boiled. *aër.*, *mot.*, *chg.*, (golden yellow). *uſg.* Precipitates the caſein, renders the milk alkaline. **Bacillus ſyphilitidis**, Lustgarten. Syn., *Bacillus ſyphilis*, Lustgarten. *Bacille* de la ſyphilis, *Bacille* de Luſtgarten, Fr.; *Syphilis bacillus*, Luësbacillus, Ger.; *Bacillo del ſifilide*, Ital.; *Bacillus* of Luſtgarten. Found in ſyphilitic new growths and ſecretions; does not develop in ordinary culture media. In ſtaining, reaction ſeems to be identical with that of the *Bacillus* of the Smegma. Doehle deſcribes paraſitic infuſoria as the cauſative agents of ſyphilis. Cf. *Helicomonas*, Klebs, and *Syphilis* of bacillus of Eve and Lingard. **Bacillus tardigradus**. Syn., *Bacillus suis*, Detmers. *Micrococcus suis*, Burrill. Found in dew, water, and in the fluids of pigs affected with ſwine plague. *aër.*, *mot.*, *uſg.* Cf. *Bacillus* of Swine plague, Marseilles, Rietsch and Jobert. **Bacillus tenuis**, Duclaux. Syn., *Tyrophrix tenuis*, Duclaux. Found in decompoſing albuminoid matter, cheeſe, etc. *aër.*, *facanaër.*, (?) *mot.*, *uſg.* Used in ripening certain French cheeſes. **Bacillus tenuis sputigenus**, Pansini. Obtained from ſputum. *aër.*, *nlif.*, *umot.*, *ſg.* **Bacillus termo**, Dujardin and Ehrenberg. See *Bacterium termo*, Cohn. **Bacillus tetani**, Nicolaier. Syn., *Bacillus tetani traumatici*, Roſenbach; *Bacille* du tétaſus, *Bacille* de la tétaſie, Fr.; *Tetanusbacillus*, *Bacillus* des Wundſtarrkrampfes, Ger.; *Bacillus* of tetanus. Found in garden earth and in the wounds of perſons dead of tetanus. *anaër.*, *lif.*, *mot.*, *ſg.* Specific etiology relations determined by Carle and Rattome. **Bacillus tetani traumatici**, Roſenbach. See next preceding. **Bacillus thalassophilus**, Ruſſel. Obtained from mud (Bay of Naples). *anaër.*, *lif.*, *mot.* Pathogenesis not determined. **Bacillus thermophilus**, Miquel. Found in the inſtinal tract of man and animals, in ſewage and in the ſoil. *aër.*, *umot.*, *uſg.* **Bacillus tremelloides**, Schottelius. Found in hydrant water (Freiburg). *aër.*, *lif.*, *chg.* (golden yellow), *uſg.* **Bacillus tremulus**, Koch. Syn., *Metallacter tremulus*, Treviſan. Found as a ſurface pellicle on decompoſing plant infuſions. Reſembles *Bacillus subtilis*, Ehrenberg. **Bacillus tuberculosis**, Koch. Syn., *Bacterium tuberculosis*, Zopf; *Bacterium tuberculoſum*, *Bacillus tuberculi*, *Bacillus tuberculosis*, *Bacille* de la tuberculeux. *Bacille* de la tuberculose; *Bacille* de Koch, Fr.; *Tuberkelbacillus*, *Bacillus* der Tuberculose, Ger.; *Bacillo tubercolare*, *Bacillo della tuberculose*, Ital.; *Bacillo de la tuberculosis*, Sp. Found in the ſputum, in tuberculoſous organs, and elſewhere in perſons and animals affected with tuberculosis. Paraſitic. *aër.*, *facanaër.*, *umot.*, *ſg.* **Bacillus tuberculosis gallinarum**, Maſtucci. Obtained from caſes of ſpontaneous tuberculosis in fowls. This ſeems to be

a diſtinct ſpecies, characterized by its ſtaining reactions, etc., its growth in pure cultures, and its pathogenic qualities, Koch. **Bacillus tumescens**, Zopf. Syn., *Bacterium tumescens*, Zopf. Found upon beetſe. *aër.*, *lif.*, *mot.*, *uſg.* **Bacillus turgidus**, Duclaux. Syn., *Tyrophrix turgidus*, Duclaux. Found in cheeſe. *aër.* Produces alkaline reaction (carbonate and butyrate of ammonia) in milk. **Bacillus tussis convulsivæ**, Aſanaſſiew. Syn., *Bacillus* of Aſanaſſiew, *Bacille* de la coqueluche, Fr.; *Keuchhustenpilz*, Ger.; *Burger*. Found in the ſputum of perſons affected with pertuſſis. *aër.*, *nlif.*, *mot.*, *ſg.* **Bacillus typhi abdominalis**, Eberth, Gaſſky, Klebs, Eppinger, Brautlecht. Syn., *Bacillus typhosus*, *Bacterium typhosum*, *Bacille* typhique, *Bacille* de la fièvre typhoïde, *Microbe* de la fièvre typhoïde, Fr.; *Typhusbacillus*, Ger.; *Bacillo tifoſo*, Ital. Found in water and in milk, and in the feces and organs in typhoid fever. *aër.*, *nlif.*, *facanaër.* **Bacillus typhimurium**, Löſſler. Obtained from mice affected with an epidemic diſeaſe. *aër.*, *facanaër.*, *nlif.*, *mot.* **Bacillus typhosus**. See *Bacillus typhi abdominalis*, Eberth, etc. **Bacillus ubiquitus**, Jordan. Found in air, water, ſewage (Lawrence, Mass.). *aër.*, *facanaër.*, *nlif.*, *umot.*, *uſg.* Reſembles *Bacillus candicans*, Frankland. **Bacillus ulna**, Cohn, and Prazmowski. Syn., *Vibrio b*, Ehrenberg. *Bacterium ulna*, Miller. *Vibrio bacillus*, Müller, Ehrenberg. Found in egg albumin. *aër.*, *mot.*, *uſg.* **Bacillus ulna** of Vignal. Found in ſaliva of healthy perſons; perhaps identical with the preceding form. *aër.*, *lif.*, *uſg.* **Bacillus ureæ**, Miquel. Found in the air. *aër.*, *facanaër.*, *nlif.*, *uſg.* Perhaps identical with the preceding form. **Bacillus ureæ**, Leube. Found in old urine, three varieties. *aër.*, *nlif.*, *uſg.* Converts urea into ammonium carbonate. **Bacillus urocephalus**, Duclaux. Syn., *Tyrophrix urocephalus*, Duclaux. One of the commonest forms aſſociated with putrefaction of animal matter. *aër.*, *facanaër.*, *uſg.* **Bacillus vasculosis**, Sternberg. Obtained from the inſtine and ſtomach of yellow-fever cadavers. *aër.*, *lif.*, *mot.*, *uſg.* **Bacillus vaginalis**, Döderlein. Syn., Döderlein'scher Scheidenbacillus, Döderleins Bacillus, Scheidenbacillus, Ger. Conſtantly found in the normal vaginal ſecretions of adults. *aër.*, *facanaër.*, *umot.* (no growth in gelatin), *uſg.* **Bacillus varicosus conjunctivæ**, Gombert. Found in the healthy conjunctival ſac of man. *aër.*, *facanaër.*, *nlif.*, *mot.*, *ſg.* **Bacillus venenosus**, Vaughan. Found in water. *aër.*, *facanaër.*, *nlif.*, *mot.*, *ſg.* **Bacillus venenosus brevis**, Vaughan. Found in water. *aër.*, *facanaër.*, *nlif.*, *mot.*, *ſg.* **Bacillus venenosus invisibilis**, Vaughan. Found in water. *aër.*, *facanaër.*, *nlif.*, *mot.*, *ſg.* **Bacillus venenosus liquefaciens**, Vaughan. Found in water. *aër.*, *facanaër.*, *lif.*, *mot.*, *ſg.* **Bacillus ventriculi**, Raczynsky. Obtained from the ſtomach of meat-fed dogs. *aër.*, *facanaër.*, *nlif.*, *mot.*, *uſg.* **Bacillus vermicularis**, Frankland. Found in river water. *aër.*, *lif.*, *oscl.*, *uſg.* **Bacillus vermiculosus**, Zimmermann. Found in water. *aër.*, *lif.*, *oscl.*, *uſg.* **Bacillus violaceus**, Becker. Found in river water. *aër.*, *facanaër.*, *lif.*, *mot.*, *chg.* (dark violet). **Bacillus violaceus laurentius**, Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *facanaër.*, *lif.*, *mot.*, *uſg.* **Bacillus virens**, Van Tieghem. Syn., *Sporonema gracile*. Found in ſtagnant water. *aër.*, *mot.*, *chg.* (green, held by ſome to be chlorophyll,

**Abbreviations.**—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *lif.* = liquefactive. *monom.* = monomorph. *mot.* = motile. *nlif.* = non-liquefactive. *umot.* = non-motile. *uſg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *ſg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

but not sufficiently studied), *nfg.* *Bacillus virescens*, Frick. Found in green sputum. *aër.*, *ulqf.*, *mot.*, *chg.* (green), *nfg.* *Bacillus virgula*, Duclaux. Syn., *Tyrophrix virgula*, Duclaux. Found in albuminous solutions. *aër.*, *nmot.*, *nfg.* *Bacillus virgula*. See *Spirillum cholerae asiaticæ*, Koch. *Bacillus viridis flavus*, Frick. Syn., *Bacillus viridis pallescens*, Frick. *aër.*, *ulqf.*, *mot.*, *chg.* (yellowish green), *nfg.* Resembles *Bacillus virescens*, Frick. *Bacillus viridis*, Van Tieghem. Syn. *Bacterium viride*, Van Tieghem. *Arthrobacterium viride*, De Bary. Found in water collected in the hollow of a polyporous fungus. *aër.*, *chg.* (green). Not thoroughly investigated. *Bacillus viridis pallescens*, Frick. See *Bacillus viridis flavus*, Frick. *Bacillus viscosus*, Frankland. Found in river water. *aër.* *liqf.* *mot.* *chg.* (fluorescent green). Perhaps identical with *Bacillus fluorescens*, Flügge. *Bacillus viscosus*, I, II, Van Laer. Found inropy milk. *aër.*, *ulqf.*, *nfg.* *Bacillus viscosus cerevisiæ*, Van Laer. Found in viscous beer and in milk. *aër.*, *liqf.*, *nfg.* *Bacillus viscosus sacchari*, Kramer. Found in viscous saccharine fluids. *aër.*, *liqf.*, *nfg.* *Bacillus von Denecke*. See *Spirillum tyrogenum*, Denecke. *Bacillus von Finkler-Prior*. See *Spirillum Finkler-Prior*. *Bacillus vulgaris*, Hauser; Syn., *Proteus vulgaris*. *Proteus sulfureus*, Holschenkoff. *Proteus* of Hauser. Commonly associated with putrefaction. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* This species is probably one of those formerly included under *Bacterium termo*. *Bacillus X*, Sternberg. Found in yellow-fever cadavers. Sternberg thinks it possible that this form is concerned in the etiology of yellow fever. *pg.* (for rabbits). *Bacillus xanthogenus*, Fuchs and Ehrenberg. See *Bacillus synxanthus*, Ehrenberg. *Bacillus xerosis*, Fränkel. Syn., *Xerose bacillus*. See *Bacillus* of xerosis epithelialis conjunctivæ, Leber. *Bacillus zenkeri*, Hauser. Syn., *Proteus zenkeri*. *Bacille de Hauser*, Fr. Found in putrefying animal matter. *aër.*, *facanaër.*, *ulqf.*, *mot.*, *pg.* *Bacillus zopfii*. Syn., *Bacterium zopfii*, Kurth. *Arthrobacterium zopfii*, De Bary. Knäuelbildender *Bacillus*, Ger. Found in the intestinal tract of fowls. *aër.*, *ulqf.*, *mot.*, *nfg.* *Bacillus zurnianum*, List. Found in water. *aër.*, *ulqf.*, *nmot.*, *nfg.* *Bacilo virgula*, *Bacilo virgulado*, Sp. See *Spirillum cholerae asiaticæ*, Koch. **Bacteria of pus.** Syn., Eitermicroben, Ger. **Bacteria of putrefaction.** Syn., Bactéries de la putrefaction, Fr.; Fäulnisbakterien, Ger. **Bacteria of sea water.** Syn., Bactéries de l'eau de mer, Fr.; Bacterien des Meerwassers, Ger. **Bacteria of the air.** Syn., Bactéries de l'air, Fr.; Luftbacterien, Ger.; micrococci of the air. **Bacteria of the mouth.** Syn., Bactéries de la bouche, Fr. Bacterien der Mundhöhle. **Bacteria of the soil.** Syn., Bactéries de la terre, Fr.; Erdebakterien, Ger. **Bacteria of urine.** Syn., Bactéries de l'urine, Fr.; Bacterien des Harns, Ger. **Bacteria of water.** Bactéries de l'eau, Fr.; Wasserbakterien, Ger. **Bactéridie charbonneuse.** See *Bacillus anthracis*, Pollender and Davaine. **Bactéridie du charbon.** See *Bacillus anthracis*, Pollender and Davaine. **Bactéridie du charbon symptomatique.** See *Bacillus chauvvi*, Arloing, Cornevin, Thomas. **Bacteridium prodigiosum**, Schröter. See *Bacillus prodigiosus*, Ehrenberg. **Bactérie chainette.** See *Bacterium catenula*, Dujardin. **Bactérie chromogène.** Chromogenic bacteria. **Bactérie commune**, Miquel. See *Bacil-*

*lus termo*, Dujardin. Bactéries de la bouche. Bacteria of the mouth. Bactéries de la diphthérie, Emmerich. See *Bacillus diphtherie*, Klebs. Bactérie de la fermentation butyrique. See *Bacillus butyricus*, Prazmowski. Bactérie de la fermentation lactique. See *Bacillus acidi lactici*, Hueppe. Bactérie de la fermentation propionique. See *Bacillus carvicidus*, Briege. Bactéries de l'eau. Microbes of water. Bactéries de la putrefaction. Microbes of putrefaction. *Bacterium der Brustseuche des Pferdes*. See *Streptococcus Coryæ contagiosæ equorum*, Schütz. **Bacterium der Buttersäuregährung.** See *Bacillus butyricus*, Prazmowski. **Bacterium der Diphtherie**, Emmerich. See *Bacillus diphtherie*, Klebs. **Bacterium der Milchsäuregährung.** See *Bacillus acidi lactici*, Hueppe. **Bactérie du pus bleu.** See *Bacillus pyocyaneus*, Gessard. **Bactérie point.** *Bacterium lineola*, Cohn. **Bacterium des Sauerteigs.** See *Bacterium farinaceum*, Wigand. **Bactérie du vinaigre.** See *Bacillus aceti*, Kützing. **Bactérie lumineuse de la mer du Nord.** See *Photobacterium luminosum*, Beyerinck. **Bactéries de la terre.** Microbes of the soil. Bacterien der Mundhöhle. Microbes of the mouth. Bacterien des Meerwassers. Microbes of sea water. *Bacterium aceti*, Lanzi. See *Bacillus aceti*, Kützing. *Bacterium aërogenes*, Miller. See *Bacillus aërogenes*, II, Miller. *Bacterium aërogenosum*, Schröter. See *Bacillus pyocyaneus*, Gessard. *Bacterium allii*. See *Bacillus alii*, Griffiths. *Bacterium anthracis*, Zopf. See *Bacillus anthracis*, Pollender and Davaine. *Bacterium articulatum*, Ehrenberg. See *Bacterium lineola*, Cohn. *Bacterium aurantiacum*, Trelease; a chromogenic form. *Bacterium bacillus*, Pasteur. See *Bacillus termo*, Davaine. *Bacterium aus Diphtherie bei Menschen*. See *Bacillus diphtherie*, Klebs. *Bacterium aus der Diphtherie bei Tauben*. See *Bacillus diphtherie columbarum*, Löffler. *Bacterium brunneum*, Schröter. Found in a putrid infusion of Indian corn. *chg.* (brown). Perhaps identical with *Bacillus fuscus*, Zimmermann. *Bacterium butyri colloideum*, Lafar. Found in every sample of natural butter examined. Cf. *Bacillus butyri fluorescens*, Lafar. *Bacterium candidum*, Trelease. A chromogenous form, identical with *Bacillus mesentericus fuscus*, Flügge. *Bacterium capitatum*, Davaine. Found in an infusion of albuminous matter. *aër.*, *mot.* *Bacterium carbuncolare*, Pollender, Brauell, Delafond, and Davaine. See *Bacillus anthracis*, Pollender and Davaine. *Bacterium carlsbergense*, Hansen. Found in the air. Cf. *Bacterium kochii*, Hansen. *Bacterium catenula*, Dujardin. Syn., *Bacterium chainette*. Bactérie chainette, Fr. Observed especially in putrid wine or putrefying blood, generally in albuminous liquids in contact with air. Coze and Feltz found it in typhoid fever in man and rabbits. It resembles *Bacillus acidi lactici*, Davaine, Hueppe. *Bacterium caucasicum*. See *Bacillus caucasicus*, Kern. *Bacterium chainette*. See *Bacterium catenula*, Dujardin. *Bacterium chlorinum*, Engelmann. Found in water. *aër.*, *chg.* (green). Engelmann holds this to be chlorophyll, as a small amount of oxygen is given off, indicating the assimilation of carbon. *Bacterium coli commune*, Escherich. See *Bacillus neapolitanus*. *Bacterium commune*, Pasteur. See *Bacterium termo*, Dujardin. *Bacterium cuneatum*, Rivolta. See *Bacillus cuneatus*. *Bacterium cyanogenum*, Fuchs. See *Bacillus cyanogenus*, Hueppe. *Bacterium*

decalvans, Thin. See *Micrococcus area celsii*, Buchner and Schlen. **Bactérie de la pourriture.** See *Bacterium putredinis*. **Bacterium denitrificans**, a  $\beta$ , Gayon and Dupetit. See *Bacillus denitrificans*, Giltay and Aberson. **Bacterium der Brustseuche des Pferdes.** See *Streptococcus coryae contagiosa equorum*, Schütz. **Bacterium der Essiggährung.** See *Bacillus aceti*, Kützing. **Bacterium der Milchsäuregährung.** See *Bacillus acidi lactici*, Davaine and Hueppe. **Bacterium der Septikämie bei Kaninchen.** See *Bacillus septicæmiæ hæmorrhagicae*, Sternberg. **Bacterium dysodes**, Zopf. See *Bacillus dysodes*, Zopf. **Bacterium enchelys**, Ehrenberg. Found in river water. Thought by Ehrenberg to be an infusorian. **Bactérie en zigzag**, Fr. See *Bacillus geniculatus*, De Bary. **Bacterium farinaceum**, Wigand. Syn., *Bacterium des Sauerteigs*. Found in sour sponge or dough. **Bacterium fitzianum**, Zopf. See *Bacillus subtilis*, Ehrenberg. **Bacterium fœtidum**, Thin. See *Bacillus fœtidus*, Passet. **Bacterium fusiforme**, Warming. Found in sea water. **Bacterium gingivæ pyogenes**, Miller. See *Bacillus gingivæ pyogenes*. **Bacterium gliscrogenum**, Malarba. See *Bacillus gliscrogenus*. Found in viscid acid urine. *aër.*, *nlif.*, *mot.*, *npg.* **Bacterium griseum**, Warming. Syn., *Micrococcus griseus*, Winter, a doubtful form. **Bacterium gummiis**, Combes. Syn., *Microbe de la mal nero*, Ital. The cause of the gummy disease of the fig, almond, and orange trees, and the mal nero of vines. Cf. *Bacterium putredinis*, Davaine. **Bacterium gummosum**, Ritsert. Found to produce the viscosity of infusions of Digitalis. *aër.*, *ligf.*, *pleom.* **Bacterium hessii**, Guillebeau. One of the two forms found by Gillebeau to cause milk to become ropy. Thrives best in Pasteurized milk. *aër.*, *ligf.*, *mot.*, *npg.* Cf. *Micrococcus freudenreichii*. **Bacterium hyacinthi**, Wakker. Found in the bulbs and leaves of the hyacinth and causing the yellows of hyacinths. Cf. *Bacterium hyacinthi septicus*, Heinz. **Bacterium janthinum**, Zopf. See *Bacillus janthinus*, Zopf. **Bacterium kochii**, Hansen. Found in the air of Carlsberg. Cf. *Bacterium carlsbergense*, Hansen. **Bacterium lactis**, Lister. See *Bacillus acidi lactici*, Hueppe. **Bacterium lactis aërogenes**, Escherich. See *Bacillus lactis aërogenes*, Abelson. **Bacterium lineola**, Müller, Cohn. Syn., *Bacterium punctum*, Rivolta. **Bacterium tremulans**, Trevisan. *Bacterium trilobulari*, Ehrenberg. *Bacterium articulatum*, Ehrenberg. *Vibrio lineola* (Müller), Ehrenberg. *Vibrio tremulans*, Ehrenberg. *Bacillus lineola*, Bactérie point, Fr. Found in well and other water, in infusions, soil on vegetables, etc. *aër.*, *mot.*, (trembling and darting back and forth), *pleom.*, *npg.* Probably represents several species, or a developmental form of a spirillum. **Bacterium litoreum**, Warming. Found only in sea water. *aër.*, *mot.*, *npg.* **Bacterium lucens**, Van Tieghem. See *Bacillus lucens*, Van T. **Bacterium luteum**, Trelease. See *Bacillus luteus*, Flügge. **Bacterium maidis**, Cuboni. See *Bacillus maidis*, Cuboni. **Bacterium merismopædioides**, Zopf. See *Bacillus merismopædioides*, Zopf. **Bacterium morbilli**, Lanzi. Syn., *Microbe di morbillo*. Found in the urine of persons with measles. Cf. *Bacillus septicæmiæ hæmorrhagicae*, Sternberg. **Bacterium navicula**, Reinke and Berthold. See *Bacillus butyricus*, Prazmowski. **Bacterium neapolitanum**. See *Bacillus neapolitanus*, Emmerich. **Bacterium oblongum**, Boutroux. Syn., *Micrococcus oblongus*, Boutroux. Found in beer; the agent of gluconic fermentation. **Bacterium of Bu-**

tyric Acid Fermentation. See *Bacillus butyricus*, Prazmowski. **Bacterium of Diphtheria**, Emmerich. Syn., *Bactérie de la diphthérie*, Fr. *Bacterium der Diphtherie*, Ger. Found in cases of diphtheria in man and doves. **Bacterium of Fire Blight.** See *Bacillus butyricus*, Prazmowski. **Bacterium of Infectious Pneumonia in the Horse.** See *Streptococcus coryae contagiosa equorum*, Schütz. **Bacterium of Kefir.** See *Bacillus caucasicus*, Kern. **Bacterium of Pear Blight.** Cf. *Bacillus butyricus*, Prazmowski, and *Micrococcus amylovorus*, Burrill. **Bacterium of Sheep Pox.** Syn., *Microbe de la clavelée*. Found in cases of sheep pox, or "Schafblattern." **Bacterium of variola**, Cose and Feltz. Syn., *Bactérie de la petite variole*, Fr. *Bacterium der Variola* (oder der Blattern). Found in the vesicles of smallpox; pathogenic for rabbits. **Bacterium oleæ**, Arcangeli. Said to cause the so-called tuberculosis ("Maladie de la loupe;" "Rogner") of olives. **Bacterium ovatum**, Lebert. See *Nosema bombycis*, Nägeli. **Bacterium pasteurianum**, or **Bacterium pastorianum**. See *Bacillus pasteurianus*, Hansen. **Bacterium periplanetæ**, Tichomirov. Found in the common cockroach (*Periplaneta orientalis*), and producing in it a specific disease. **Bacterium pflügeri**, Ludwig. See *Photobacterium pflügeri*, Ludwig. **Bacterium phosphorescens**, Hernes. See *Bacillus phosphoreus*, Cohn. **Bacterium Phosphorescens**, Cohn. See *Photobacterium phosphorescens*. **Bacterium photometricum**, Engelmann. Found in water; motion dependent on light; possibly not a bacterium at all. **Bacterium pneumoniæ**, **Bacterium pneumoniæ crouposæ**, Friedländer. See *Bacillus pneumoniæ friedländeri*. **Bacterium porri**, Tommasi-Crudeli. Found in warts. **Bacterium prodigiosum**. See *Bacillus prodigiosus*, Ehrenberg. **Bacterium pseudopneumonicum**. See *Bacillus pseudopneumonicus*, Flügge. **Bacterium punctum**, Rivolta. See *Bacterium lineola* (Müller), Cohn. **Bacterium putredinis**, Davaine. Syn., *Bactérie de la pourriture*. Found in rapidly-decaying plants. Cf. *Bacterium gummiis*, Combes. **Bacterium pyriforme**, Hansen. Found in the air. **Bacterium radicolæ**, Prazmowski. Syn., *Bacillus radicolæ*, Beyerinck; *Rhizobium leguminosarum*, Frank. Found in the soil, particularly in the roots of the *Leguminosæ*, where they are held to stimulate the cells to unusual growth, affect nitrification, constitute the "bacteroids" of Woronin, and form the so-called "bacteroid tissue." **Bacterium rosaceum metalloides**, Dowdeswell. See *Bacillus ruber*, Frank, Cohn. **Bacterium rubescens**, Lankester. See *Beggiatoa rosco-persicina*, Zopf. **Bacterium septicæmiæ**, Koch. See *Bacillus septicæmiæ hæmorrhagicae*, Sternberg. **Bacterium septicum sputigenum**. See *Bacillus septicus sputigenus*, Flügge. **Bacterium subtile**, Buchner. See *Bacillus subtilis*, Ehrenberg. **Bacterium sulfuratum**; **Bacterium sulphuratum**, Warming. See *Beggiatoa rosco-persicina*, Zopf. **Bacterium sulfureum**, Rosenheim. Found in wine. *nlif.* Evolves H<sub>2</sub>S. **Bacterium syncyanum**, Ehrenberg, Schröter. See *Bacillus cyanogenus*, Hueppe. **Bacterium synxanthum**, Schröter. See *Bacillus synxanthus*. **Bacterium termo**, Dujardin and Ehrenberg. Syn., *Bacillus termo*, Davaine. *Bactérie* (*Bacterium*) *commune*, Pasteur. *Bacterium bacillus*, Pasteur. *Cryptococcus natans*, Kützing. *Cryptococcus nebulosus*, Kützing. *Micrococcus crepusculum*, Cohn. *Zoogloea termo* (Müller), Cohn. *Monas*

**Abbreviations.**—*aër.* = aërobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *ligf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

*termo*, Müller. *Palmella infusionum*, Ehrenberg. Long considered the most characteristic microbe of filth and putrefaction; but shown by Hauser to be a collective species. The name is now reserved for Vignal's species, while *Bacillus termo* may perhaps be reserved for the flagellate forms studied by Dallinger and Drysdale, or discarded entirely. **Bacterium termo**, Vignal. Found in the saliva of healthy persons. *aër.*, *liqf.*, *mot.*, *chg.* (yellowish gray), *nfg.* **Bacterium tholoideum**, Gessner. Syn., *Bacillus* of Gessner. Found in the intestinal contents of healthy persons. Resembles *Bacillus lactis aërogenes*, Escherich. *fg.* (for mice and guinea-pigs). **Bacterium tremulans**, Trevisan. See *Bacterium lineola*, Cohn. **Bacterium triloculare**, Ehrenberg. See *Bacterium lineola*, Cohn. **Bacterium tuberculosis**, Zopf. **Bacterium tuberculosis**, Koch. See *Bacillus tuberculosis*, Koch. **Bacterium tumescens**, Zopf. See *Bacillus tumescens*, Zopf. **Bacterium typhosum**. See *Bacillus typhi abdominalis*, Eberth and Gaffky. **Bacterium ulna**. See *Bacillus ulna*, Cohn. **Bacterium ulna**, Cohn. See *Micrococcus ureæ*. **Bacterium ureæ**, Jaksch. Found in ammoniacal urine. *aër.*, *facanaër.*, *nlif.* Not sufficiently investigated. **Bacterium vermiforme**, Ward. Found in fermented ginger beer. **Bacterium viride**, See *Bacillus viridis*, Van Tieghem. **Bacterium violaceum**, Bergonzini. Syn., *Chromobacterium violaceum*, Bergonzini. Found in putrefying solutions of egg albumen. *chg.* (violet). **Bacterium xanthinum**. See *Bacillus xanthanthus*, Ehrenberg and Schröter. **Bacterium xylinum**, A. J. Brown. Found in solutions of carbohydrates, giving rise to acetic acid, and converting dextrose into gluconic acid, and mannitol into levulose. **Bacterium zoffii**, Kurth. See *Bacillus zoffii*. **Bacteroides**, Woronin. Microorganisms forming tubercles in the roots of leguminous plants, and assisting in the fixing of nitrogen. **Bacteria chromogène**, Ital. Chromogenic microbes. **Batterio della pellagra**, Ital. See *Bacillus maidis*, Cuboni. **Beggiatoa alba**, Vaucher. Syn., *Beggiatoa punctata*, Trevisan. *Beggiatoa leptomitiformis*, Meneghi. *Oscillaria alba*, Vaucher. *Ihyrocrocis vandellii*, Meneghi. Next to *Cladotrix* the most common bacterium of water, forming a superficial layer in the mud called *barégine* or *glairine*, *q. v.* **Beggiatoa alba**, var. *marina*, Cohn. Syn., *Beggiatoa arstedtii*, Rabenhorst. See *Beggiatoa marina*, Cohn. **Beggiatoa arachnoidæ**, Agardh. Syn., *Oscillaria arachnoidea*, Agardh. *Oscillaria versatilis*, Kütz. Found in swamps and sulphur springs. **Beggiatoa leptomitiformis**, Meneghi and Trevisan. Syn., *Oscillaria leptomitiformis*, Meneghi. Found in sulphur springs. **Beggiatoa marina**, Cohn. Syn., *Beggiatoa alba*, var. *marina*, Cohn. *Beggiatoa arstedtii*, Rabenhorst. Found in a salt water aquarium, forming a whitish slimy layer on dead fish. **Beggiatoa minima**, Warming. Found in sea water; gray. **Beggiatoa mirabilis**, Cohn. Found in a salt water aquarium; snow white. **Beggiatoa multisepta**. See *Pragmidiothrix multisepta*, Engler. Held by Zopf to be identical with *Beggiatoa alba*, Vaucher. **Beggiatoa nivea**, Rabenhorst. Syn., *Leptonema niveum*, *Symphiothrix nivea*, Brugger. Found in sulphur springs. **Beggiatoa nodosa**, Van Tieghem. A doubtful form characterized by nodes in the filaments, which differ from other members of the genus in the absence of sulphur grains and of motion. **Beggiatoa arstedtii**, Rabenhorst. See *Beggiatoa alba*, var. *marina*, Cohn.

**Beggiatoa pellucida**, Cohn. Found in a marine aquarium; sulphur grains few. **Beggiatoa punctata**, Trevisan. See *Beggiatoa alba*, Cohn. **Beggiatoa roseo-persicina**, Zopf. Syn., *Bacterium rubescens*, Lankester. *Bacterium sulphuratum* or *Bacterium sulphuratum*, Warming. *Clathrocystis roseo-persicina*, Cohn. *Cohnia roseo-persicina*, Winter, Kützing. *Microhaloa rosea*, Kütz. *Ophidiomonas sanguinea*, Ehrenberg. *Pleurococcus roseo-persicina*, Rabenhorst. Peach-colored bacterium. Morphologically identical with *Beggiatoa alba*, Vaucher. Forms rose-colored to violet pellicles on putrid matter. Produces bacterio-purpurin. **Beggiatoa tigrina**, Rabenhorst. Syn., *Oscillaria tigrina*, Reimer. Found in swamps on submerged wood. Forms a thin white layer. **Bienenfaulbrutbacillus**. See *Bacillus alvei*, Ches-hire and Cheyne. **Bienstock's Bacillus**. **Bienstock's Bacillus** aus Fæces. **Bienstock's Putrefactive Bacillus**. **Bienstock's Putrefactive Bacillus** from the Fæces. See *Bacillus putreficus coli*, *Bienstock*. **Blutbacillus**. Microbe of the blood. **Blutpilz**. See *Bacillus prodigiosus*, Ehrenberg. **Bodenbacillus**. Microbe of the soil. **Bollingeri equi**, Saccardo. See *Micrococcus botryogenes*, Rabe. **Brauner Kartoffelbacillus**, Ger. See *Bacillus mesentericus fuscus*, Flügge. **Brieger's Bacillus**. See *Bacillus carvicidis*, Brieger. **Brunnenfaden**. See *Crenothrix kühniiana*, Rabenhorst. **Buff Bacillus** of Spreading Edema, A. B. Harris. *nlif.*, *aër.*, *chg.* (buff), *pleom.* **Butterbacillus**, Ger., **Buttersäurebacillus**, **Butylbacillus**, Ger. See *Bacillus butyricus*, Prazmowski. **Capsule Bacillus** of Loeb. Obtained from a case of keratomalacia infantum. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *fg.* Resembles *Bacillus capsulatus*, Pfeiffer. **Capsule Bacillus** of Ozena, Marano. Found in the nasal secretions in ten cases of ozena. Resembles *Bacillus pneumoniae friedländerii*. Cf. *Micrococcus lawenbergii*. **Capsule Bacillus** of Smith. See *Bacillus capsulatus smithii*. **Champignon du tube digestif du lapin et autres herbivores**, Remack. See *Saccharomyces gutturalis*, Robin. **Cheese Spirillum**. See *Spirillum tyroenum*, Denecke. **Chromobacterium violaceum**, Bergonzini. See *Bacterium violaceum*, Bergonzini. **Chromogene Bacterien**, Ger. Syn., *Bactéries chromogènes*, Fr. *Bacteria chromogeni*, It. *Chromogenic bacteria*. **Chromogenic Micrococci**. **Chromogenous Micrococci**. *Microcoque chromogène*, Fr. *Chromogenic micrococci*. **Chromogenous Bacteria**. *Bactéries chromogènes*, Fr. *Bacteria cromogeni*, Ital. *Chromogenic bacteria*. **Cladotrix bovis**. See *Actinomyces bovis*, Harz. **Cladotrix canis**. Held by Rabe to be very like *Actinomyces bovis*. **Cladotrix dichotoma**, Cohn and Zopf. See *Leptothrix ochracea*, Kützing. *Myconostoc gregarium*, Cohn. **Cladotrix fœrsteri**, Cohn. Syn., *Crenothrix fœrsteri*, *Streptothrix fœrsteri*, Cohn. *Leptothrix* der Thänenröhren, Graef, Ger. Forms yellowish or grayish concretions in the human lachrymal ducts. **Cladotrix intricata**, Russel. Obtained from sea mud (bay of Naples). *aër.*, *liqf.*, *mot.* **Clathrocystis roseo-persicina**, Cohn. See *Beggiatoa roseo-persicina*, Zopf. **Clostridium butyricum**, Prazmowski. See *Bacillus butyricus*, Prazmowski. **Clostridium fetidum**, Liborius. See *Bacillus fetidus*, Passet. **Clostridium of Symptomatic Anthrax** (or **Charbon**), Neelsen and Ehlers. See *Bacillus chauvæi*, Bollinger and Feser. **Clostridium polymyxa**, Prazmowski. See *Bacillus polymyxa*, Prazmowski. **Coccobacillus pyogenes ureæ**, Rör-

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *nfg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

sing. See *Diplococcus pyogenes ureæ*, Rösing. *Coccobacteria septica*, Billroth. The single term under which Billroth includes all putrefactive bacteria. See *Bacillus septicæ hæmorrhagice*, Sternberg. *Coccobacteria ureæ*, Rösing. See *Diplococcus pyogenes ureæ*, Rösing. *Coccobacterium lyssæ*, Rivolta. See *Bacillus lyssæ*, Pasteur. *Cohnia roseo-persicina*, Winter and Kützing. See *Beggiatoa roseo-persicina*, Zopf. Colon *Bacillus* of Escherich. See *Bacillus neapolitanus*. Comma *Bacillus*, Comma *bacillus* of Koch, Comma-shaped *Bacillus*, Waten. *Bacillo en virgule*, *bacille virgule*, Fr. *Komma-bacillus*, Ger. *Bacillo virgola*, *bacillo virgolato*, Ital. *Bacillo vergula*, *bacillo virgulato*, Sp. See *Spirillum cholera asiaticæ*, Koch. Cornalian *Corpuscles*. See *Microbe de la pèbrine*. *Corpuscles brillants*. See *Bacillus fastidius*, Passet. *Corpuscles du ver du soie*. See *Micrococcus ovatus*. *Coryza diplococci*. See *Micrococcus cereus aureus*, Schröter and Winckler. *Crème-farbig* *Micrococcus*, List, Ger. See *Micrococcus citreus*, List. *Crenothrix fæsteri*, Cohn. See *Cladithrix fæsteri*. *Crenothrix kühniana*, Saccardo and Rabenhorst. Syn., *Crenothrix polyspora*, Cohn. *Hydrothrix kühniana*, *Leptothrix kühniana*, Brunnensfaden. Found in drinking water, to which they impart a disagreeable taste. *Crenothrix polyspora*, Cohn. See *Crenothrix kühniana*, Saccardo and Rabenhorst. *Cryptococcus alveareus*. See *Bacillus alvei*. Cheshire and Cheyne. *Cryptococcus clava*, Wedl. Found in the stomachs of ruminants. *Cryptococcus cerevisiæ*, Robin. *Cryptococcus fermentatum*, Kützing. See *Saccharomyces cerevisiæ*, Reess and Robin. *Cryptococcus glutinis*, Persen. See *Saccharomyces glutinis*. *Cryptococcus guttulatus*, Robin. See *Saccharomyces guttulatus*. *Cryptococcus natans*, *cryptococcus nebulosus*, Kützing. See *Bacterium termo*, Dujardin and Davaine. *Cryptococcus of Yellow Fever*. See *C. xanthogenicus*, Freire. *Cryptococcus xanthogenicus*, Domingo-Freire. Considered by D. Freire to be the cause of yellow fever. Cf. *Bacillus* of yellow fever. *Darmbacillen*. *Bacilli* of the intestine. *Darmbacillen von Schottelius*. See *Bacillus coprogenes fastidius*, Schottelius. *Denecke's Cheese Bacillus*. See *Spirillum tyrogenum*. *Dengue Micrococci*. See *Scheutzi* *laughlini*. *Detionella ochracea*, Saccardo. See *Leptothrix ochracea*, Kützing. *Diplococcus albicans amplus*, Bumm; Grayish white micrococcus. Found in mucus from the healthy vagina. *aër.*, *facanaër.*, *liqf.*, *npg.* *Diplococcus albicans tardus*, Unna and Tommasoli. Found in eczema. *aër.*, *nlqf.*, *nmot.* *Diplococcus albicans tardissimus*. Morphologically identical with the *Gonococcus*; but more adherent, forming small masses. *aër.*, *nlqf.*, *npg.* *Diplococcus citreus conglomeratus*, Bumm. Obtained from the air, in dust, and from gonorrheal pus. *aër.*, *facanaër.*, *liqf.*, *chg.* (lemon-yellow), *npg.* *Diplococcus citreus liquefaciens*, Unna and Tommasoli. Found on the skin in cases of eczema scaberrhœicum. *aër.*, *liqf.*, *nmot.*, *chg.* (lemon-yellow), *npg.* *Diplococcus coryzæ*, Klebs and Hajek. Obtained from the nasal secretions in cases of acute nasal catarrh. *aër.*, *nlqf.*, *npg.* *Diplococcus der Pferdepneumonie*. See *Diplococcus* of pneumonia in horses, Schütz. *Diplococcus des Pemphigus acutus*, Demme. See *Diplococcus* of pemphigus acutus, Demme. *Diplococcus flavus liquefaciens tardus*, Unna and Tommasoli. Found on the skin in cases of

eczema scaberrhœicum. *aër.*, *facanaër.*, *liqf.*, *chg.* (chrome-yellow), *npg.* *Diplococcus fluorescens fœtidus*, Klamann. Obtained from the posterior nares. *aër.*, *facanaër.*, *liqf.*, *chg.* (grass-green to violet), *npg.* *Diplococcus intercellularis meningitidis*, Goldschmidt and Weichselbaum. Found within the cells of the exudates in cerebro-spinal meningitis. *aër.*, *nlqf.*, *pg.* *Diplococcus jaune blanc*. See *Micrococcus subflavus*, Bumm. *Diplococcus lacteus favi-formis*, Bumm. Found frequently in the vaginal secretions. *aër.*, *nlqf.*, *npg.* *Diplococcus luteus*, Adametz. Found in water. *aër.*, *liqf.*, *mot.*, *chg.* (yellow), *npg.* *Diplococcus of Gonorrhœa*. See *Micrococcus gonorrhœæ*, Neisser. *Diplococcus of Orchitis*, Hugoumeng and Eraud. Syn., *Orchiococcus*. Frequently found in gonorrheal pus during the first few days. *aër.*, *nlqf.*, *pg.* The specific microbe of blennorrhagic epididymitis. *Diplococcus of Ozena*, Loewenberg. Found in the secretions in cases of ozena. *Diplococcus of Pemphigus*, *Diplococcus of Pemphigus Acutus*, Demme. Syn., *Micrococcus of Demme*. *Diplococcus des Pemphigus acutus*, Ger. Found in the bullæ of pemphigus. *aër.*, *nlqf.*, *pg.* Resembles the *Gonococcus*. *Diplococcus of Pneumonia in Horses*, Schütz. Syn., *Diplococcus der Pferdepneumonie*. Obtained from the lungs of a horse affected with acute pneumonia. *aër.*, *nlqf.*, *pg.* *Diplococcus pneumoniæ fibrinosæ*, Friedländer. See *Bacillus pneumoniæ friedländeri*. *Diplococcus pneumoniæ*, Weichselbaum. See *Bacillus septicus sputigenus*, Flüggé. *Diplococcus pyogenes ureæ*, Rösing. Syn., *Diplococcus ureæ*, Rösing. *Coccobacillus pyogenes ureæ*, Rösing. *Coccobacterium ureæ*, Rösing. Found in purulent urine. Cf. *Diplococcus ureæ trifoliatus*, Rösing. *Micrococcus pyogenes ureæ flavus*, Rösing. *Diplococcus roseus*, Bumm. Found in the air. *aër.*, *facanaër.*, *liqf.*, *chg.* (pink), *npg.* *Diplococcus ureæ*, Rösing. See *Diplococcus pyogenes ureæ*, Rösing. *Diplococcus ureæ trifoliatus*, Rösing. Found in purulent urine. Cf. *Diplococcus pyogenes ureæ*, Rösing. *Micrococcus pyogenes ureæ flavus*, Rösing. *Dispora caucasica*, Kern. See *Bacillus caucasicus*, Kern. *Drumstick Bacillus*. See *Bacillus putrificus coli*, Biestock. *Einheimischer Leuchtbacillus*. See *Bacillus phosphorescens indigenus*, Fisher. *Eisbacillen*. *Bacilli* of ice. *Eiterbacillen*, *Eiterkokken*, *Eitermikroben*. *Microbes of pus*. *Eiterkettenkokkus*. See *Micrococcus pyogenes*, Rosenbach. *Emmerich's Bacillus*, *Emmerich's Neapler Bacillus*. See *Bacillus neapolitanus*. *Endosporeous bacteria*. Syn., *Bactéries endospores*, Fr. *Endosporenbakterien*, Ger. *Bacteria* that produce by endogenous spore formation. *Epsilon Bacillus*, Miller. See *Spirillum finkleri*. *Erdbacillus*. See *Beggiatoa nivea*, Rabenhorst. **Leptothrix buccalis**, Robin. *Pilz der Zahncaries*, Ger. Syn. *Leptothrix gigantea*, Miller. *Leptothrix pulmonalis*, *Rasmussenia buccalis*, Saccardo. Found in the mouth of man and animals. Falsely considered the cause of dental caries. **Leptothrix buccalis of Vignal**. See *Bacillus buccalis (a)*, Vignal. **Leptothrix epidermidis**. Syn., *Bacillus epidermidis*, Bizozero. *Microsporon minutissimum*, Burchart. Found on the epidermis between the toes, and held by Bizozero to be non-pathogenic, but by Boeck as the cause of erythrasma. **Leptothrix der Thränenröhrchen**. See *Cladotrix fœrsteri*, Cohn. **Leptothrix gigantea**, Miller. Found on the teeth of dogs, sheep, cattle and other animals affected with *Pyorrhœa alveolaris*. Some consider it identical with *Leptothrix buccalis*, Robin. **Leptothrix hyalina**, Reinsch. Found on marine algae. **Leptothrix innominata**, Miller. See, *Leptothrix buccalis*, Robin. **Leptothrix kühniana**. See *Crenothrix kühniana* Saccardo. **Leptothrix lacrimalis**. Syn. *Leptothrix der Thränenröhrchen*. See *Cladotrix fœrsteri*, Cohn. **Leptothrix lanugo**, Kützing. Found on marine algae near Heligoland. **Leptothrix maxima buccalis**, Miller. See *Bacillus buccalis maximus*, Miller. **Leptothrix muralis**, Kützing. See *Leptothrix parasitica*. **Leptothrix natans**. See *Sphaerotilus natans*, Saccardo. **Leptothrix ochracea**, Kützing. Syn. *Detonella ochracea*, Saccardo. *Cladotrix dichotoma*, Zopf. According to Zopf, this represents filaments of *Cladotrix* stained with oxid of iron. **Leptothrix of Puerperal Fever**, *Leptothrix puerperalis*, Fetz. See *Bacillus puerperalis*, Engel and Spillman. **Leptothrix parasitica**, Kützing. *Parasitic on fresh*

**Abbreviations.**—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic

water algae. This and *Leptothrix muralis* are genetically connected with *Drilosiphon julianus*, Kützing, the ordinary hormogones of which produce filaments known as *Nostoc partitum*, Rabenhorst; the cells of these Nostoc filaments eventually separate and produce slender filaments constituting *Leptothrix parvifila* and *muralis*, Kützing (Bennet and Murray). *Leptothrix pulmonalis*. See *Leptothrix buccalis*, Robin. *Leptothrix pusilla*, Rabenhorst. Found on fresh water algae, also in the mouth, Klebs. *Leptothrix symplocoides*, Dickie. Found on marine algae. *Leptothrix vaginalis*. Found in the vagina of animals and women. *Leptothrix variabilis*, Saccardo. Found in saliva of healthy persons. *Leuconostoc mesenteroides*, Van Tieghem. Syn., *Aspergillus me enteroides*, Cienkowski. Gomme de Suererie, Fr. Froischlauch, Froischlauchpilz, Pilz der Dexträngährung, Ger. Frog spawn bacterium of sugar factories, Frog spawn fungus. A source of great loss to the manufacturers of beet sugar, frequently and rapidly converting large quantities of the beet juice into a mucilagino-gelatinous mass. *Liborius's Bacillus of Butyric Acid Fermentation*, Liborius. Buttersäurebildender Bacillus, Ger. See *Bacillus butyricus*, Prazmowski. *Lissophyton suspectum*, Hallier. See *Bacillus lysse*, Pasteur. *Luësbacillus*. See *Bacillus syphilides*, Lustgarten. *Luftbacillen*. Syn., Bacilli of the air. Bacilles de l'air. *Luftbacterien*. Bacteria of the air. *Lungenseuchemicrococcus*. Found in milk; resembles in its action *Bacillus acidilactici*, Hueppe. *aër.*, *nlif.*, *nmot.*, *nfg.* Cf. *Spherooccus acidilactici*, Marpmann. *Micrococcus acidilactici liquefaciens*, Krüger. Found in butter and cheese. *aër.*, *facanaër.*, *lif.*, *nmot.* *Micrococcus aërogenes*, Miller. Found in the intestinal tract of man. *aër.*, *lif.*, *nmot.*, *nfg.* *Micrococcus agilis*, Ali-Cohen. Found in drinking water. *aër.*, *lif.*, *mot.*, *nfg.* A motile coccus, provided with a flagellum; described by Menge. *Micrococcus agilis citreus*, Menge. *Micrococcus (Diplococcus) albicans amplus*, Bumm. Syn., *Neisseria albicans*. Frequently found in the vaginal secretions. *aër.*, *lif.*, *nfg.* *Micrococcus (diplococcus) albicans tardus*, Unna and Tommasoli. Found in eczema. *aër.*, *nlif.*, *nmot.* *Micrococcus albicans tardissimus*, Eisenberg, Bumm. Found in the vaginal secretions of puerperal women. *aër.*, *facanaër.*, *nlif.*, *nfg.* *Micrococcus liquefaciens*, Von Besser. Found in the nasal secretions of healthy persons. *aër.*, *facanaër.*, *lif.*, *nfg.* *Micrococcus albus urinæ*. See *Micrococcus urinæ*. *Micrococcus amylovorus*, Burdill and Arthur. Syn., *Micrococcus* of apple blight. *Bacterium* of pear blight. Produces fermentation in saccharine fluids. *aër.*, *nlif.*, *mot.*, *pg.* (for apple and pear trees). Cf. *Bacillus butyricus*, Prazmowski. *Micrococcus aquatilis*, Bolton. Found frequently in water. *aër.*, *nlif.*, *nfg.* *Micrococcus aquatilis*

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *lif.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *osc.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

*invisibilis*, Vaughan. Found in water. *aër.*, *nlif.*, *npg.* **Micrococcus arei celsii**, Buchner and Sehlen. Syn., *Bacterium decalvans*, Thin. Found on the diseased hairs in *Alopecia areata*. Cf. *Bacillus of alopecia areata*, Kasauli, and *Micrococcus of alopecia areata*, Robinson. **Micrococcus ascoformans**, Johne. See *Micrococcus botryococcus*, Rabe. **Micrococcus aurantiacus**, Cohn. Syn., *Pediococcus aurantiacus*. Found in water. *aër.*, *nlif.*, *chg.* (orange-yellow), *npg.* **Micrococcus bei hepatitis enzootica porcellorum**. See *Micrococcus porcellorum*. **Micrococcus biskræ**. See *Micrococcus* of Heydenreich. **Micrococcus blennorrhæus**. See *Micrococcus gonorrhæe*, Neisser. **Micrococcus bombycis**, Cohn, Bechamp. Syn., *Streptococcus bombycis*, Bechamp. *Micrococcus* of the maladie des morts plat, Fr. *Microbe* de la flacherie, Fr. *Micrococcus* der Schlafsucht der Seidenraupen, Ger. Found in the intestinal tract of silkworms and other Lepidoptera dead of the epidemic disease known in France as *la flacherie*; etiologic relation demonstrated by Pasteur. **Micrococcus botryogenes**, Bollinger, Rabe. Syn., *Bollingeria equi*, Saccardo; *Ascooccus johnei*, Cohn; *Micrococcus ascoformans*, Johne; *Micrococcus* of myko-desmoids of the horse. Found in colonies in the connective tissue of horses affected with "myko-desmoids." *aër.*, *lif.*, *pg.* **Micrococcus candicans**, Flügge. Found abundantly in air and water. *aër.*, *nlif.*, *npg.* **Micrococcus candidus**, Cohn. Found in water. *aër.*, *nlif.*, *npg.* **Micrococcus capillorum**. Found on the scalp and said to alter the color of the hair. *aër.*, *chg.* (reddish-yellow). **Micrococcus carneus**, Zimmermann. Found in water. *aër.*, *nlif.*, *chg.* (red to violet), *npg.* **Micrococcus cerasinus siccus**, List. *aër.*, *nlif.*, *chg.* (cherry red), *npg.* **Micrococcus cereus albus**, Passet. Syn., *Staphylococcus cereus albus*, Passet. Found in the pus of acute abscesses, and by Tils, in hydrant water (Freiburg). *aër.*, *nlif.*, *npg.* **Micrococcus cereus aureus**, Schröter and Winkler. Syn., *Staphylococcus cereus aureus*, S. and W. Found in the thin secretions of coryza. *aër.*, *nlif.*, *chg.* (orange-red), *npg.* **Micrococcus cereus flavus**, Passet. Syn., *Staphylococcus cereus flavus*, Passet. *Staphylococcus passetii*. Found in an acute abscess. *aër.*, *nlif.*, *chg.* (lemon-yellow), *npg.* **Micrococcus chlorinus**. Occurs in zooglyca masses. *aër.*, *chg.* (greenish-yellow), *npg.* **Micrococcus cholerae gallinarum**, Pasteur. See *Bacillus septicaemie hemorrhagica*, Sternberg. **Micrococcus cinnabareus**, Flügge. Syn., *Streptococcus cinnabareus*, Flügge. Found in air and water. *aër.*, *nlif.*, *chg.* (reddish-brown), *npg.* **Micrococcus citreus**, List. Syn., *Staphylococcus citreus*, List. *Micrococcus couleur crème*, Fr. *Crème*farbiger *Micrococcus*, Ger. Found in water, also by Lannelongue and Achard in the seat of an old osteomyelitis. *aër.*, *nlif.*, *chg.* (pale-yellow), *npg.* **Micrococcus citreus conglomeratus**, Bunum. See *Diplococcus citreus conglomeratus*, Bunum; **Micrococcus concentricus**, Zimmermann. Found in water. *aër.*, *nlif.*, *sap.*, *npg.* **Micrococcus conglomeratus**, Weichselbaum. Syn., *Neisseria conglomerata*, W. **Micrococcus coronatus**, Flügge. Syn., *Streptococcus coronatus*, Flügge. Found in the air. *aër.*, *lif.*, *npg.* **Micrococcus couleur crème**, List. See *Micrococcus citreus*, List. **Micrococcus cremoides**, Zimmermann. Found in water. *aër.*, *lif.*, *chg.* (yellowish-white), *npg.* **Micrococcus crepusculum**, Cohn. See *Bacillus termo*, Ehrenberg and Dujardin. **Micrococcus cumulatus**

*tenuis*, Von Besser. Found in abundance in the nasal mucus of man. *aër.*, *facanaër.*, *nlif.*, *npg.* **Micrococcus cyaneus**, Schröter. Obtained from the air, on boiled potatoes. *aër.*, *chg.* (cobalt blue, altered to carmine by acids, restored by alkalis). **Micrococcus decalvans**, Schröter. Syn., *Bacterium decalvans*, Saccardo. Cf. *Bacillus of Alopecia areata*, Kasauli, *Micrococcus arei celsii*, Buchner and Sehlen; *Micrococcus of Alopecia areata*, Robinson. **Micrococcus de la mammitte gangréneuse de la brebis**, *Micrococcus de la mammitte contagieuse de la vache*, Fr. See *Micrococcus mastobius*, Nocard and Mollereau. **Micrococcus de la nécrose progressive du tissu connective de la souris**, Fr. See *Micrococcus* of progressive tissue necrosis of mice, Koch. **Micrococcus de la pyémie du lapin**, Fr. See *Micrococcus* of pyemia in rabbits, Koch. **Micrococcus de le rage**, Fr. See *Micrococcus lyssæ*, Neisser. **Micrococcus de la septicémie consecutive du charbon**, Charrin. Found in the blood and tissues of a rabbit inoculated with blood from another rabbit dead of anthrax. *aër.*, *mot.*, *pg.* **Micrococcus de la septicémie du lapin**, Fr. See *Micrococcus* of septicemia of rabbits, Koch. **Micrococcus de la suppuration progressive du lapin**, Fr. See *Micrococcus flavus desidens*, Flügge. **Micrococcus des roten Schweisses**. See *Micrococcus humatodes*, Babes. **Micrococcus diffuens**, Schröter. Found in the air, dust, and in excrement; common. *aër.*, *nlif.*, *chg.* (yellow, with a greenish fluorescence; not modified by acids). Resembles *Bacillus fluorescens putidus*, Flügge. **Micrococcus diphtheriticus**, Oertel, Cohn, Löffler. Syn., *Streptococcus articularum*, Löffler. *Micrococcus en chaînes*, Fr. Kettenbildender *Bacillus*, Ger., Löffler. Found in the false membranes, and in the tissues of diphtheria patients; Cornil identifies this with *Micrococcus pyogenes*, Rosenbach. *aër.*, *nlif.*, *pg.* **Micrococcus doyenii**. See *Micrococcus urinae albus olearius*, Doyen. **Micrococcus en chaînes**, Löffler. See *Micrococcus diphtheriticus*, Oertel, Cohn. **Micrococcus endocarditicus**. Syn., *Streptococcus endocarditicus*. **Micrococcus endocarditidis rugatus**, Weichselbaum. Found in a case of ulcerative endocarditis. *aër.*, *nlif.*, *pg.* **Micrococcus erysipelatis**, **Micrococcus erysipelatos**, **Micrococcus erysipelatosus**, Fehleisen. See *Micrococcus pyogenes*, Rosenbach. **Micrococcus fermenti**. See *Micrococcus viniperda*. **Micrococcus fervidosus**, Adametz. Found in water. *aër.*, *nlif.*, *npg.* **Micrococcus fickii**. Found in healthy and diseased eyes. **Micrococcus finlayensis**, Sternberg. Obtained from the viscera of a yellow-fever cadaver. *aër.*, *lif.*, *chg.* (pale-yellow), *npg.* **Micrococcus flavus**. See *Micrococcus flavus liquefaciens*, Flügge. **Micrococcus flavus desidens**, Flügge. Found in air and water. *aër.*, *lif.*, *chg.* (yellowish-brown), *npg.* **Micrococcus flavus liquefaciens**, Flügge. Syn., *Micrococcus flavus*, *Micrococcus*

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *lif.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

*cus liquefaciens*. Found in air and water. *aër.*, *liqf.*, *chg.* (yellow), *npg.* **Micrococcus flavus tardigradus**, Flüge. Syn., *Micrococcus tardigradus*. Found in the air and water. *aër.*, *nlqf.*, *chg.* (dark olive-green), *npg.* **Micrococcus fœtidus**, Klamann, Rosenbach. Found in the posterior nares of man. *aër.*, *liqf.*, *npg.* **Micrococcus fervidus**, Adametz. Found in water. *aër.*, *nlqf.*, *npg.* **Micrococcus freudenreichii**, Guillebeau. One of the two forms found by Guillebeau to produce ropiness in milk. *aër.*, *liqf.*, *npg.* Cf. *Bacterium hessii*, Guillebeau. **Micrococcus friedländerii**. See *Bacillus pneumoniae friedländerii*. **Micrococcus fulvus**, Cohn. Syn., *Staphylococcus fulvus*. Found in horse and rabbit dung. *aër.*, *nmot.*, *nlqf.*, *chg.* (rose), *npg.* **Micrococcus fuscus**, Maschek. Found in water. *aër.*, *nmot.*, *liqf.*, *chg.* (sepia-brown), *npg.* **Micrococcus gallicidus**. See *Bacillus septiciemise hæmorrhagice*, Sternberg. **Micrococcus gelatinosus**. Found in milk, which it causes to coagulate at about 22° C. **Micrococcus gingivæ pyogenes**, Miller. Found in the mouth of a man affected with alveolar abscess. *aër.*, *facanaër.*, *nlqf.*, *pg.* **Micrococcus gonorrhææ**, Neisser. **Micrococcus blennorrhæus**, Neissera gonorrhææ, *Micrococcus gonococcus*, Microbe du pus blennorrhagique, Weiss, Fr. Tripperococcus, Gonorrhœococcus, Ger. Found in gonorrheal pus. *aër.* No growth on gelatin; an obligate parasite. *pg.* **Micrococcus griseus**, Winter. See *Bacterium griseum*, Warming. **Micrococcus hæmatodes**, Babes. Syn., *Micrococcus* of red sweat. *Micrococque* de la sueur rouge, Fr. *Micrococcus* des roten Schweisses, Ger. Found in foul sweat from the axilla, *aër.*, *chg.* (red), *npg.* **Micrococcus hawaiiensis**, Sternberg. Syn., *Bacillus hawaiiensis*, Sternberg. Obtained by Sternberg in his investigation of yellow fever. *aër.*, *nlqf.*, *chg.* (blood-red). Only found in the presence of free oxygen. **Micrococcus imetrophus**, Trevisan. See *Bacillus prodigiosus*, Ehrenberg. **Micrococcus indicus**, Koch. See *Bacillus indicus*, Koch. **Micrococcus influenzae**, Letzerich. Syn., *Streptococcus seiferti*, *Micrococcus* of influenza, Seifert. See *Bacillus* of influenza, Pfeiffer. **Micrococcus insectorum**, Burrill, *Streptococcus insectorum*. Found in the cecal appendages or pancreatic organs in the Chinch bug (*Blissus leucopterus*, Say) and the higher Hemiptera. Especially recommended as a remedy for the Chinch bug and for *Halticus minutus*, so damaging to the peanut. **Micrococcus intercellularis meningitidis**, Neumann and Schäffer. Syn., *Micrococcus meningitidis*, Neumann. *Neisseria Weichselbaumii*. Found in the tissues of the brain and spinal cord in cases of cerebro-spinal meningitis. **Micrococcus lacteus faviformis**, Bumm. Syn., *Neisseria lactea*. Frequently found in normal vaginal mucus. *aër.*, *nlqf.*, *npg.* **Micrococcus lactis viscosus**, Conn. Syn., *Micrococcus* of bitter milk, Conn. The cause of the bitter taste of milk and cream. *aër.*, *liqf.*, *nmot.*, *npg.* **Micrococcus liquefaciens**. See *Micrococcus flavus liquefaciens*, Flüge. **Micrococcus læwenbergii**. Syn., *Micrococcus* of ozena, *Micrococque* de l'ozène, Fr. Found in the secretions, in cases of ozena. *aër.*, *liqf.*, *pg.* **Micrococcus luteus**, Cohn. Found in water, the superficial soil, dust of bed rooms, moist foods, etc. *aër.*, *nlqf.*, *chg.* (yellow), *npg.* **Micrococcus lyssæ**, Neisser. Syn., *Neisseria lyssæ*, *Micrococcus* of hydrophobia, *Micrococcus* of rabies, Fol. *Micrococcus* de la rage, Fr. Found in the spinal cord of rabid animals. Cornil

and Babes throw doubt on the culture experiments of Fol. **Micrococcus major**, Doyen. See *Micrococcus urinae major*, Doyen. **Micrococcus manfredii**. Syn., *Streptococcus manfredii*. *Micrococcus* of progressive granuloma formation. Found in the sputum of two cases of pneumonia following measles; *aër.*, *nlqf.*, *pg.* **Micrococcus mastobius**, Nocard, Mollereau and Kitt. Syn., *Streptococcus nocardii*. *Micrococcus* of bovine mastitis, Kitt. *Micrococcus* of mastitis in cows. *Streptococcus* of mastitis in cows. *Micrococcus* of contagious mammitis. *Micrococcus* of gangrenous mastitis in sheep, Nocard. *Microbe* de la mal de pis, *Microbe* de l'araignée, *Micrococcus* de la mammitte contagieuse de la vache, Nocard and Mollereau, Fr. *Micrococcus* der Mastitis der Kühe, Ger. (Obtained from the milk of cows and sheep affected with mastitis. *aër.*, *facanaër.* The form found in cattle is said to be non-liquefactive; that of sheep liquefies both gelatin and blood serum. Sternberg recognizes three distinct forms producing mastitis. **Micrococcus meningitidis**, Neumann. See *Micrococcus intercellularis meningitidis*, Neumann and Schäffer. **Micrococcus meningitidis purulentæ**, Heydenreich. **Micrococcus morbillosus**. Syn., *Streptococcus morbillosus*. **Micrococcus nasalis**, Hack. Found in the cavum pharyngonasale. *aër.*, *nmot.*, *nlqf.*, *npg.* **Micrococcus nitrificans**, Van Tieghem. Syn., *Micrococque* de la fermentation de l'ammoniaque. Found in water. *aër.*, *npg.* *Micrococcus*, II, of Fischel. Found in the blood of two cases of influenza. *aër.*, *facanaër.*, *liqf.*, *pg.* **Micrococcus oblongus**. See *Bacterium oblongum*, Boutroux. **Micrococcus ochroleucus**, Prove and Legrain. Syn., *Streptococcus ochroleucus*. Found in urine. *aër.*, *nlqf.*, *chg.* (sulphur yellow), *npg.* **Micrococcus of Acute Infectious Osteomyelitis**. See *Micrococcus pyogenes aureus*, Rosenbach. **Micrococcus of Alopecia areata**, Von Sehlen, Robinson, Vaillard and Vincent. Found on the hairs from the diseased patches. *aër.*, *liqf.*, *pg.* Cf. *Bacillus* of Alopecia areata, and *Micrococcus decalvans*, Schröter. **Micrococcus of Ammoniacal Urine**. See *Micrococcus ureæ*, Cohn, and *Micrococcus ureæ liquefaciens*, Flüge. **Micrococcus of Apple Blight**. See *Bacillus butyricus*, Botkin, Prazmowski, etc. **Micrococcus of Beri-beri**, Lacerda. See *Bacillus beribericus*, Lacerda. **Micrococcus of Biskra Buton**. See *Micrococcus* of Heydenreich. **Micrococcus of Bitter Milk**. See *Micrococcus lactis viscosus*, Conn. **Micrococcus of Bronchitis**, Picchini. Three distinct forms. *aër.*, *nlqf.* Cf. *Bacillus* of Lumtitz. **Micrococcus of Bovine Mastitis**, Kitt. See *Micrococcus mastobius*, Nocard, Mollereau and Kitt. **Micrococcus of Bovine Pneumonia**, Poels and Nolen. Syn., *Lungenseuchemicococcus*, *Micrococcus* of cattle pneumonia. Found in the lungs of cattle suffering from infectious pleuro-pneumonia. *aër.*, *nlqf.*, *pg.* **Micrococcus of Cerebro-spinal Meningitis**. See *Micrococcus intercellularis Meningitidis*. Neumann and Schäffer. **Micrococcus of Chicken Pox**. See *Staphylococcus viridis flavescens*, Guttman. **Micrococcus of Contagious Mammitis**. See *Micrococcus mastobius*, Nocard, Mollereau, and Kitt. **Micrococcus of Cow Pox**. See *Micrococcus variolæ et vaccinae*, Cohn. **Micrococcus of Dantec**. (Obtained from salted codfish which had turned red. *aër.*, *nlqf.*, *chg.* (yellow, changing to deep red), *npg.* **Micrococcus of Demme**. See *Diplococ-*

**Abbreviations.**—*aër.*=aërobic. *anaër.*=anaërobic. *chg.*=chromogenic. *facanaër.*=facultative anaërobic. *liqf.*=liquefactive. *monom.*=monomorphic. *nmot.*=non-liquefactive. *nmot.*=non-motile. *nlqf.*=non-liquefactive. *npg.*=non-pathogenic. *obl.*=obligate. *oscl.*=oscillating. *pg.*=pathogenic. *phos.*=phosphorescent. *pleom.*=pleomorphic. *sap.*=saprophytic.

cus of pemphigus acutus, Demme. *Micrococcus* of Dental Caries. See *Bacillus pneumoniae friedländerii*. *Micrococcus* porcellorum. Syn., *Micrococcus* bei Hepatitis enzoötica porcellorum. Ger. Found in hogs affected with hepatitis (Russia). *aër.*, *liqf.*, *pg.* *Micrococcus prodigiosus*, Cohn. See *Bacillus prodigiosus*, Ehrenberg. *Micrococcus pseudo-cyanus*, Cohn. Found in boiled potatoes exposed to air. *aër.*, *chg.* (verdigris green), *nfg.*

Abbreviations.—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facianaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *osc.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Not sufficiently known. *Micrococcus psittaci*, Wolf. Syn., *Str. Micrococcus perniciosus psittacorum*, Eberth and Wolf. *Micrococcus* of gray parrot disease. *Micrococcus der Papagemyeose*, Ger. The cause of a disease of parrots resembling fowl cholera; fatal to many of the parrots imported from Guinea into Europe. *Micrococcus putridus*. A form emitting a fetid gas from gelatin when mixed with iodoform. *Micrococcus pyocyaneus*, Gessard. See *Bacillus pyocyaneus* a, Gessard. *Micrococcus pyogenes*, Rosenbach. Syn., *Streptococcus pyogenes*, *Streptococcus erysipelas*, *Streptococcus longus*, Von Lingelsheim. *Micrococcus erysipelatis* (tos) (tosus), *Streptococcus* of pus. *Streptococcus pyogenes*, Vrai *Streptococcus de l'erysipèle*, Fr., Eiterkettenkokkus, Ger., *Micrococcus* of erysipelas, Fehleisen. Found in the pus of acute abscesses, and in the skin in cases of erysipelas. *aër.*, *facanaër.*, *nlif.*, *pg.* *Micrococcus pyogenes albus*, Rosenbach. Syn., *Staphylococcus pyogenes albus*, Passet. *Staphylococcus epidermidis albus*, Welch. Frequently found in company with *Micrococcus pyogenes aureus*. The cause of "stitch abscesses." *aër.*, *liqf.*, *pg.* *Micrococcus pyogenes aureus*, Rosenbach. Syn., *Staphylococcus pyogenes aureus*, *Staphylococcus piogeno aureo*, Ital. *Staphylococcus doré*, Fr. Gelber Traubencoccus, Ger. *Micrococcus* of infectious osteomyelitis. The species most frequently found in pus. Obtained from various suppurations, boils, anthrax, osteomyelitis, ulcerative endocarditis, phlegmon, etc. *aër.*, *facanaër.*, *liqf.*, *chg.* (brilliant golden yellow), *pg.* *Micrococcus pyogenes citreus*, Passet. Syn., *Staphylococcus citreus*, Passet. *Micrococcus pyogenes flavus*. Found associated with the forms first described in acute abscesses and with *Bacillus tuberculosis*, Koch. *aër.*, *facanaër.*, *liqf.*, *chg.* (lemon yellow), *pg.* Held by some to be but a variety of *Micrococcus pyogenes aureus*. *Micrococcus pyogenes tenuis*, Rosenbach. Syn., *Micrococcus rosenbachii*. Found in pus. Culture thin, varnish-like; pathogenesis not settled. Cf. *Micrococcus septicus*, Flügge. *Micrococcus pyogenes ureæ flavus*, Rösing. Found in purulent urine. Cf. *Diplococcus pyogenes ureæ*, Rösing; *Diplococcus ureæ trifolius*, Rösing. *Micrococcus pyosepticus*, Richet. Syn., *Staphylococcus pyosepticus*, Hericourt and Richet. Obtained from a carcinomatous tumor in a dog. *aër.*, *liqf.*, *pg.* Resembles *Micrococcus pyogenes albus*, Rosenbach. *Micrococcus radiatus*, Flügge. Syn., *Streptococcus radiatus*, Flügge. Found in air and water. *aër.*, *liqf.*, *npg.* *Micrococcus rheumathritidis*, Küssmaul. See *Bacillus rheumathritidis*, Küssmaul. *Micrococcus rosenbachii*. See *Micrococcus pyogenes tenuis*, Rosenbach. *Micrococcus rosettaceus*, Zimmermann. Found in water. *aër.*, *nlif.*, *npg.* *Micrococcus roseus*, Eisenberg. Found in the sputum of a person suffering from influenza. *aër.*, *facanaër.*, *liqf.*, *chg.* (pink), *npg.* *Micrococcus roseus*, Bumm. See *Diplococcus roseus*, Bumm. *Micrococcus roseus*, Maggiora, Flügge. Syn., *Neisseria rosea*. Found on the skin. *aër.*, *npg.* *Micrococcus salivarius pyogenes*, Biondi. Syn., *Staphylococcus varius pyogenes*, Biondi. Found in an abscess produced in a guinea-pig by inoculation with saliva from a child affected with anginose scarlatina. *aër.*, *liqf.*, *pg.* *Micrococcus salivarius septicus*, Biondi. Obtained from animals after inoculation with saliva from a person with puerperal septicemia. *aër.*, *nlif.*, *pg.* Cf. *Micrococcus sialosepticus*. *Micrococcus scarlatinæ*, *Micrococcus scarlatinus*, Coze

and Feltz. Syn., *Perroncitoa scarlatinosa*. *Micrococcus* of scarlet fever, Pohl and Pincus. Found in the blood on the desquamating skin, and on the palate of scarlet fever patients; resembles *Micrococcus septicus*, Flügge. Cf. *Streptococcus rubiginosus*, Edington, and *Bacillus* of scarlet fever, Crooke. *Micrococcus septicus*, Cohn. See *Bacillus septiciemii hemorrhagiae*, Sternberg. *Micrococcus septicus*, Flügge. Syn., *Streptococcus septicus*, Flügge, and *Streptococcus pyogenes*, Saccardo, *Streptococcus pneumoniae*, Weichselbaum. Found in soil. *aër.*, *nlif.*, *pg.* *Micrococcus septopyæmicus*. Syn., *Streptococcus septopyæmicus*. Obtained from cases of phlegmonous angina and erysipelas of the larynx. *aër.*, *nlif.*, *pg.* Resembles *Micrococcus septicus*, Flügge. *Micrococcus sialosepticus*. Found in the saliva in a case of puerperal septicemia. *aër.*, *nlif.*, *pg.* Cf. *Micrococcus salivarius septicus*, Biondi. *Micrococcus subflavus*, Flügge, Neisser. Syn., *Neisseria subflava*. Yellowish-white micrococcus or diplococcus, Bumm. *Diplococcus jaune blanc*, Fr. Obtained from the lochla of puerperal women, and from vaginal mucus. *aër.*, *liqf.*, *pg.* *Micrococcus suis*, Burrill. See *Bacillus tardigradus*. *Micrococcus tardigradus*. See *Micrococcus flavus tardigradus*, Flügge. *Micrococcus tetragenus*, *Micrococcus tetragenus*, Gaffky. Syn., *Gaffkyia tetragenus*, Saccardo. Obtained from a cavity in the lung of a person with pulmonary tuberculosis. *aër.*, *facanaër.*, *nlif.*, *pg.* *Micrococcus tetragenus*, Marotta. Constantly found in small-pox vesicles and pustules. *aër.*, *liqf.*, *pg.* Produces vaccinia in calves. *Micrococcus tetragenus febris flavæ*, Finlay. Syn., *Micrococcus tetragenus versatilis*, Sternberg. Obtained from the excrements of mosquitoes which had drawn blood from yellow fever patients; also from the surface of the body in the same disease, (Sternberg). *aër.*, *liqf.*, *chg.* (lemon-yellow), *npg.* *Micrococcus tetragenus subflavus*, Von Besser. Found in nasal mucus. *aër.*, *facanaër.* (no growth in gelatin), *npg.* *Micrococcus tetragenus mobilis ventriculi*, Mendosa. Found in the contents of the stomach of man. *aër.*, *nlif.*, *mot.*, *npg.* *Micrococcus tetragenus versatilis*, Sternberg. See *Micrococcus tetragenus febris flavæ*, Finlay. *Micrococcus toxicatus*, Burrill. Syn., *Micrococcus variolæ et vaccinae*, Cohn. *Streptococcus toxicatus*, Burrill. Found in the poison of the poison ivy, *Rhus toxicodendron*. *Micrococcus ulceris mollis*. See *Bacillus* of chancroid, Ducrey. *Micrococcus ureæ*, Cohn. Syn., *Bacterium ureæ*, Cohn. *Streptococcus ureæ*. *Torula ureæ*, Pasteur. Found in urine, in which it produces ammoniacal fermentation. *Micrococcus ureæ*, Pasteur and Van Tieghem. Found in the air and in ammoniacal urine. *aër.*, *facanaër.*, *nlif.*, *npg.* Possibly the last two forms and the *Bacterium ureæ*, Jaksch, are identical. *Micrococcus ureæ liquefaciens*, Flügge. Syn., *Streptococcus athebicus*. Found in ammoniacal urine. *aër.*, *facanaër.*, *liqf.*, *npg.* *Micrococcus urinæ*. Syn., *Micrococcus albus urinæ*. Found in the urine in cases of pyelonephritis and cystitis. *Micrococcus urinæ albus olearius*, Doyen. Syn., *Micrococcus doyenii*. Found under the same circumstances as the last form. *aër.*, *liqf.* *Micrococcus urinæ flavus olearius*, Doyen. Syn., *Micrococcus olearius*. Found in the urine of cystitis, with the two preceding forms. *aër.*, *liqf.*, *chg.* (golden-yellow). *Micrococcus urinæ major*, Doyen. Syn., *Micrococcus maior*. Found in same circumstances as the three preceding forms. *Micrococcus variolæ*, *Micrococcus variolæ et vaccinae*,

Abbreviations.—*aër.* = aerobic, *anaër.* = anaerobic, *chg.* = chromogenic, *facanaër.* = facultative anaerobic, *liqf.* = liquefactive, *monom.* = monomorphic, *mot.* = motile, *nlif.* = non-liquefactive, *nmot.* = non-motile, *npg.* = non-pathogenic, *obl.* = obligate, *osc.* = oscillating, *pg.* = pathogenic, *phos.* = phosphorescent, *pleom.* = pleomorphic, *sap.* = saprophytic.

Cohn. Syn., *Streptococcus variolæ*, Micrococcus of smallpox, Micrococcus of vaccinia. Obtained by Cohn, Guttman, Marotta, Hlava and others from the lymph of vaccine pustules in man and animals; by Coze and Feltz from the blood of persons affected with variola; by Cornil and Babes, in the lacune of the mucous bodies of variola papules; by Quist and Voigt from vaccine; (Pfeiffer and Loeffl find certain ameboid or coccidian protozoans which they regard as specific; also a ferment). Cf. *Saccharomyces vaccine*. *Micrococcus viridis flavescens*, Guttman. **Micrococcus versatilis**. Found on the skin of healthy persons, also in the liver, spleen and kidneys after death by yellow fever. Not sufficiently studied. **Micrococcus versicolor**, Flügge. Found in water. *aër.*, *nlif.*, *chg.* (yellow), *nfg.* **Micrococcus vini perda**. Syn., *Streptococcus fermenti*, *Micrococcus fermenti*. Found in spoiled wine. **Micrococcus violaceus**, Cohn. Found in water. *aër.*, *nlif.*, *chg.* (violet), *nfg.* **Micrococcus viridis flavescens**, Guttman. Found in the lymph of a varicella pustule. *aër.*, *nlif.*, *nfg.* **Micrococcus viscosus**, Pasteur. Found in the disease of wine known as *la graise*. **Micrococcus viticulosus**, Flügge, Katz. Found in air and water. *aër.*, *facanaër.*, *nlif.*, *nfg.* **Micrococcus xanthogenicus**. *Cryptococcus xanthogenicus*, Freire. Found in cases of yellow fever. Cf. *erysipelatos suis*, Koch and Löffler. **Rotzbacillus**. See *Bacillus mallei*, Löffler. **Saccharomyces albicans**, Robin. Syn., *Oidium albicans*, Robin. **Saccharomyces apiculatus**, Reess. Occurs in fermented wine and beer, and, in the hot seasons, on sweet succulent fruits; in winter, in the soil beneath the trees that bear these fruits; a bottom yeast. **Saccharomyces cerevisiæ**, Reess and Robin. Syn., *Cryptococcus cerevisiæ*, Kützing, *Cryptococcus fermentatum*, *torula cerevisiæ*, yeast plant. Under this heading are included a series of different over and under yeasts. **Saccharomyces conglomeratus**, Reess. As the result of Hansen's investigations this species has been dropped by recent writers. **Saccharomyces ellipsoideus** I, II, Hansen, a "wild" species of wine ferment, II; gives rise to the muddiness of beer. **Saccharomyces exiguus**, Hansen. Found in German yeast; acts toward sugar exactly as does *Saccharomyces marxianus*. **Saccharomyces glutinis**, Syn., *Cryptococcus glutinis*, Fersen. A pullulating yeast that forms beautiful rose-colored patches on cooked potatoes. **Saccharomyces guttulatus**, Robin. Syn., *Cryptococcus guttulatus*, Robin, Winter. Champignon du tube digestif du lapin et autres herbivores, Remack. Found in the esophagus, stomach and intestines of mammals, birds, and reptiles. The feces of patients suffering from tunnel anemia, or anchylostomiasis, frequently contain this species of saccharomyces. **Saccharomyces inequalis**, a doubtful species. **Saccharomyces lactis**, Adametz. Syn., Milk-yeast. Found in milk, of which it ferments the milk-sugar. **Saccharomyces marxianus**. Found in wine; acts vigorously on saccharose, inverting and fermenting it with great activity; it also acts on dextrose. **Saccharomyces membranificiens**. Forms a bright yellow, tough scum on beer-wort; liquefies gelatin; has no fermentative action on ordinary carbohydrates, and does not invert cane-sugar. **Saccharomyces minor**, Engel. According to Engel this is the cause of fermentation in bread. **Saccharomyces mycoderma**, Reess. Syn., *Mycoderma mesentericum*, Pers. *Mycoderma cerevisiæ et vini*, Desm. *Hormiscium vini et cerevisiæ*, Bonard. *Mycoderma vini*, Pasteur. *Mycoderma cerevisiæ*, Trecul. Fiore del vino e della birra, Ital. Found on the surface of wine and beer, forming the so-called "flowers of wine." **Saccharomycetes nebulosus**, a doubtful species. **Saccharomyces pasteurianus**, Reess. According to Hansen, this represents a group of three forms that cause disease in beer and wine. **Saccharomyces pyriformis**, Ward. Found in the fermentation of ginger-beer. A bottom yeast which develops much CO<sub>2</sub> but little alcohol; it inverts cane-sugar and ferments the products; does not ferment milk-sugar. *aër.*, *facanær.* **Saccharomyces ruber**, Demme. Found in milk and cheese, forming red spots in the latter, and a red sediment in the former. *nlqf.* **Saccharomyces vaccinæ**, Pfeiffer. Found in the lymph of a vaccinia pustule; nothing known of its action. **Saprogenic bacillus**. Syn., *Bacille saprogène*, Fr. Any bacillus which produces putrefaction, e. g., *Bacillus saprogenes*, Rosenbach, *q. v.* **Sarcina alba**, Eisenberg. Found in air and water. *aër.*, *liqf.*, *npg.* **Sarcina aurantiaca**. Syn., Orange Sarcina, Koch. Found in air and water. *aër.*, *liqf.*, *hçg.* (orange yellow), *npg.* **Sarcina aurea**, Macé. Found in the pulmonary exudates of a person dead of a bastard pneumonia complicated with purulent pleurisy. *aër.*, *liqf.*, *hçg.* (brilliant

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *hçg.* = chromogenic. *facanær.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

golden yellow). *Sarcina botulina*, Van den Corput. Found in cases of poisoning with tainted sausage, (*botulismus*) and believed to be the active agent. Cf. *Bacillus* of allantiasis. *Sarcina candida*, Reinke. Found in the air of breweries. *aër.*, *liqf.*, *npg.* *Sarcina cerevisiæ*, Ländner. Syn., *Pediococcus cerevisiæ*, Balcke. Found in beer and the air of breweries. *aër.*, *facanaër.*, *nlif.*, *npg.* *Sarcine de l'estomac*. See *Sarcina ventriculi*, Goodsir. *Sarcina flava*, De Bary. Found in beer. *aër.*, *liqf.*, *chg.* (yellow), *npg.* *Sarcina fuscenscens*, Falkenheim. Found in the human stomach. *Sarcina hyalina*, Kützing. Syn., *Merismopedia hyalina*, Kützing. Found in swamps. *Sarcina intestinalis*, Zopf. Found in the intestines of chickens and turkeys, principally in the cecum. *Sarcina in the Mouth and Lungs*, Fischer. According to De Bary the original description is not sufficiently clear for comparison. *Sarcina litoralis*, (Erstedt. Syn., *Merismopedia litoralis*, Rabenhorst, *Erythroconis*, (Erstedt. Found in sea water; forms a thin reddish layer between decomposing algae on the shore. *Sarcina lutea*, Schröter. Found in the air, and in fungus cultures. *aër.*, *liqf.*, *chg.* (yellow), *npg.* *Sarcina minuta*, De Bary. Occurred spontaneously in a culture of sour milk on a microscopic slide; resembles *Sarcina welckeri*. *Sarcina mobilis*, Maurea. Found in old ascitic fluid. *aër.*, *liqf.*, *mot.*, *chg.* (brick-red). *Sarcina morrhuae*. Obtained from codfish. *Sarcina of the Lungs*. See *Sarcina pulmonum*, Hauser. *Sarcina of the Urine*. See *Sarcina urinae*, Welcker. *Sarcine paludosa*, Schröter. Found in bog water. *Sarcina pulmonum*, Hauser. Syn., *Sarcina of the lungs*. *Lungen-sarcine*, Ger. Found in sputum. *aër.*, *nlif.*, *npg.* *Sarcina reitenbachii*, Caspary. Syn., *Merismopedia reitenbachii*, Caspary—(also misprinted *Reichenbachii*). Found in fresh water on decaying plants. *Sarcina renis*, Hepworth. Found in the lungs of persons dead of pulmonary tuberculosis. *Sarcina rosea*, Menge. Found in milk and other food-stuffs. Held to be distinct from the form described by Schröter. *aër.*, *liqf.*, *chg.* (rose-red), *npg.* *Sarcina rosea*, Schröter. Found in the air. *aër.*, *liqf.*, *chg.* (intense red, giving same reaction as the pigment of *Sarcina aurantiaca*), *npg.* *Sarcina urinæ*, Welcker. Syn., *Merismopedia urinæ*, Rabenhorst. *Sarcina of the urine*; *sarcine de la urine*, Fr., Hartzel. Found in the bladder; appears to be destitute of zymotic action. *Sarcina ventriculi*, Goodsir. Syn., *Sarcine de l'estomac*, Fr. *Harn-sarcine*, Ger. Common in the stomach of man and animals. De Bary finds two forms side by side, but offers no information as to their genetic relations. *aër.*, *nlif.*, *npg.* *Sarcina welckeri*, Rossmann. Repeatedly found in the human bladder and voided for months at a time in the urine, which is usually abnormally rich in phosphates, the patient retaining good health. *Scheidenbacillus*. See *Bacillus vaginalis*, Döderlein. *Scheutzia laughlini*. Syn., *Micrococcus of Dengue*, *Staphylococcus of Dengue*, *Dengue Micrococcus*. Found in the blood of patients suffering from dengue. Pathogenetic relations not determined. *Schweinerotlaufbacillus*. See *Bacillus erysipelas suis*, Koch. *Septischer Erdbacillus*. See *Bacillus septicus agrigenus*, Nicolaïer. *Septischer Spuntumbacillus*. See *Bacillus septicus spuligenus*, Flügge. *Smegma bacillus*. See *Bacillus of the Smegma*. *Sphærococcus acidi lactici*, Marpmann. Found in fresh cow's milk. *aër.*, *nlif.*, *npg.* *Sphærotilus*

*natans*, Kützing, Saccardo. Syn., *Leptothrix natans*. Found in running and stagnant water. Old portions yellowish, younger portions colorless. *Spirille du cholera*. See *Spirillum cholerae asiaticæ*, Koch. *Spirille du mucus nasal*. See *Spirillum nasale*, Weibel. *Spirillo colerogeno di Koch*, Ital. See *Spirillum cholerae asiaticæ*, Koch; *Spirillum amyli-formum*, Van Tieghem. Found in water. Forms granu-lose at certain developmental stages; gives the blue reaction with iodine. Cf. *Bacillus butyricus*, Prazmowski. *Spirillum anserum*. Syn., *Spirochæta anserina*, Sakharoff. Found in the blood of geese affected with a fatal form of septicemia due to this microbe. A disease prevalent in the swampy regions of Caucasia. *aër.*, *mot.*, *pg.* (not for chickens). *Spirillum a* of Weibel. See *Spirillum saprophiles a*, Weibel. *Spirillum attenuatum*, Warming. Found in sea water. *Spirillum aureum*. Syn., *Vibrio aureus*, Weibel. Found in the air and the slime of sewers. *aër.*, *nlif.*, *nmot.*, *chg.* (golden yellow), *npg.* *Spirillum b* of Weibel. See *Spirillum saprophiles b*, Weibel. *Spirillum cholerae asiaticæ*, Koch. Syn., *Spirillum cholerae*. *Spirillum of cholera*, *Bacillus of cholera*, *Comma bacillus of Koch*, *Spirille du cholera*, *Bacille du cholera*, *Bacille en virgule*, *Bacille virgula cholérégène*, Fr. *Bacillo a virgola*, *Bacillo virgulato*, Ital. Found in the discharges of cholera patients and in the intestines of cholera cadavers. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* *Spirillum concentricum*, Kitasato. Found in putrefying blood. *aër.*, *nlif.*, *mot.*, *npg.* *Spirillum denticola*, Miller; or, *Spirillum dentium*, Arnt. Syn., *Spirochæta denticola*, *Spirochæta dentium*. Found under the margins of the gums in the mouths of healthy persons; biologic characters unknown, as it does not thrive in culture fluids. *Spirillum endoparagogenicum*, Sorokin. Found in a glairy liquid exuding from a poplar tree. *Spirillum finkleri*, *Spirillum Finkler-Prior*. Syn., *Vibrio proteus*. *Bacillus von Finkler-Prior*, *Bacillus Epsilon von Miller*. Found in the feces of persons affected with cholera nostras, after allowing the discharge to stand for some time. *aër.*, *facanaër.*, *liqf.*, *mot.* Pathogenetic relation not confirmed. *Spirillum flavescens*. Syn., *Vibrio flavescens*, Weibel. Found in the slime of sewers. *aër.*, *nlif.*, *nmot.*, *chg.* (yellowish-green), *npg.* *Spirillum flavum*. Syn., *Vibrio flavescens*, Weibel. Found in the slime of sewers. *aër.*, *nlif.*, *nmot.*, *chg.* (ocher yellow), *npg.* *Spirillum jenensis*, Ehrenberg. Syn., *Ophidomonas jenensis*, Ehrenberg. A doubtful species. *Spirillum leucomelænum*, Perty. Found in water containing decaying algae. *Spirillum linguæ*. Syn., *Vibrio lingualis*, *Zungenbelagvibrio*, Weibel. Found in the deposit on the tongue of a mouse, after inoculation. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *npg.* (for mice). *Spirillum litorale*, Warming. Syn., *Vibrio spirillum*, Müller; *Mehnella spirillum*, Borg. Found in bog water. *Spirillum metschnikovi*. Syn., *Vibrio metschnikovi*, Gamaleia. Found in the intestinal contents of chickens affected, in Russia, with an epidemic infectious disease resembling fowl cholera. *aër.*, *facanaër.*, (*nlif.*), *mot.*, *pg.* *Spirillum nasale*. Syn., *Vibrio nasale*, Weibel. *Nasenschleimvibrio*, Ger. *Spirille du mucus nasale*, Fr. Found in nasal mucus. *aër.*, *facanaër.*, *nlif.*, *nmot.*, *npg.* *Spirillum obermeieri*, Cohn. Syn., *Spirochæta obermeieri*. *Spirillum of relapsing fever*. *Recurranspirochæte*, *Obermeier'scher Recurrensfaden*, Weigert, *Obermeier'scher Recurrensspirillum*, Engel. Found in the blood

**Abbreviations.**—*aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlif.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *osc.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

of persons affected with relapsing fever. *aër.*, *mot.* (efforts to cultivate thus far unsuccessful), *pg.* *Spirillum of Asiatic cholera.* *Spirillum* of cholera. See *Spirillum dysenteriae asiaticae*, Koch. *Spirillum* of Denecke. See *Spirillum tyrogenum*, Denecke. *Spirillum* of Finkler and Prior. See *Spirillum finkleri*. *Spirillum* of Miller. Syn., Miller's bacillus. Found in carious teeth. *aër.*, *facianaër.*, *liqf.*, *mot.*, *npg.* *Spirillum of Relapsing Fever.* See *Spirillum obermeieri*, Cohn. *Spirillum* of Smith. Found in the intestines of swine. *aër.*, *uligf.*, *mot.*, *npg.* *Spirillum plicatile*, Dujardin. Syn., *Spirochæte plicatilis*, Ehrenberg; *Spirulina plicatilis*, Cohn. Found in water containing decomposing algae. Biologic characters undetermined. *Spirillum roseaceum*. Observed upon excrement in water. *aër.*, *chg.* (red), *npg.* *Spirillum rosenbergii*, Warming. Found in brackish water. Contains refractive sulphur grains. *aër.*, *mot.* *Spirillum roseum*, Macé. Found in a tube culture of blennorrhagic pus. *aër.*, *uligf.*, *mot.*, *chg.* (rose-red), *npg.* *Spirillum rubrum*, von Esmarch. Obtained from the putrefying body of a mouse. *aër.*, *facianaër.*, *uligf.*, *mot.*, *chg.* (pink), *npg.* *Spirillum rufum*, Perty. Found in cistern water. *aër.*, *mot.*, *chg.* (rose-red), *npg.* *Spirillum rugula*, Müller. Syn., *Vibrio rugula*. Found in swamp water and frequently in the alimentary canal, on the teeth, etc. *aër.*, *facianaër.*, *mot.*, *npg.* According to Prazmowski this species gives rise to decomposition of cellulose. *Spirillum sanguineum*. See *Beggiatoa roseo-pericini*, Zopf. *Spirillum saprophiles*  $\alpha$  of Weibel. Syn., *Vibrio saprophiles*  $\alpha$  of Weibel. Found in rotting hay infusion and in the slime of sewers. *aër.*, *uligf.*, *mot.*, *npg.* *Spirillum saprophiles*  $\beta$  of Weibel. Syn., *Vibrio saprophiles*  $\beta$ , Weibel. Found in rotting hay infusion. *aër.*, *uligf.*, *mot.*, *npg.* *Spirillum saprophiles*  $\gamma$  of Weibel. Syn., *Vibrio saprophiles*  $\gamma$ , Weibel. Found in the slime of sewers. *aër.*, *uligf.*, *mot.*, *npg.* *Spirillum serpens*, Müller. Syn., *Vibrio serpens*, Müller. Found in stagnant water containing decaying plants, etc. Biologic characters not determined. *Spirillum sputigenum*, Miller. Common in the neglected mouths of healthy persons. Does not grow on culture media. *Spirillum tenue*, Ehrenberg. Found in putrefying plant infusions. Biologic characters undetermined. *Spirillum tyrogenum*, Denecke. Syn., *Bacille de Denecke*, Fr. *Bacillus* von Denecke, Käse-spirillum, Ger. *Spirillum* of Denecke, *Bacillus* of cheese, Denecke's cheese-spirillum. Found in old cheese. *aër.*, *facianaër.*, *liqf.*, *mot.*, *pg.* (for guinea pigs). *Spirillum undula*, Cohn, Müller. Syn., *Vibrio undula*, Müller; *Vibrio prolifer*, Ehrenberg. Found in zoöglea masses in swamp water, vegetable infusions, etc. *aër.*, *mot.*, *npg.* *Spirillum violaceum*, Warming. Found in brackish water; cell contents violet, with a few sulphur grains. *Spirillum volutans*, Ehrenberg. Syn., *Vibrio spirillum*, Müller; *Melunella spirillum*, Borg. Found in infusions and in bog water. Biologic characters undetermined. *Spirochæte anserina*, Sakharoff. See *Spirillum anserum*. *Spirochæte denticola*, Miller. *Spirochæte dentium*, Arnt. See *Spirillum dentium*. *Spirochæte obermeieri*. See *Spirillum obermeieri*, Cohn. *Spirochæte plicatilis*, Ehrenberg. See *Spirillum plicatile*, Dujardin. *Spiromonas cohnii*, Warming. Found in foul water. *Spiromonas volubilis*, Pertz. Found in putrefy-

ing infusions and in bog water. *Sporonema gracile*. See *Bacillus citreus*, Van Tieghem. *Sputumbacillus*, Ger. See *Bacillus septicus sputigenus*, Flügge. *Stafilococco piogeno aureo*, Ital. See *Micrococcus pyogenes aureus*, Rosenbach. *Staphylococcus albus liquefaciens*, Escherich. Syn., White liquefying staphylococcus. Found in the alvine discharges of healthy infants. *aër.*, *liqf.*, *npg.* *Staphylococcus biskraë*. See *Micrococcus* of Heydenreich. *Staphylococcus cereus albus*, Passet. See *Micrococcus cereus albus*, Passet. *Staphylococcus cereus aureus*, Schröter and Winkler. See *Micrococcus cereus aureus*, S. and W. *Staphylococcus cereus flavus*, Passet. See *Micrococcus cereus flavus*, Passet. *Staphylococcus citreus*. See *Micrococcus citreus*, List. *Staphylococcus epidermidis albus*, Welch. See *Micrococcus pyogenes albus*, Rosenbach. *Staphylococcus pulvis*. See *Micrococcus pulvis*, Cohn. *Staphylococcus of Dengue*, McLaughlin. See *Scheutisia lumbglini*. *Staphylococcus of pemphigus*, De Michele. Obtained from the skin, kidney and spleen of a case of pemphigus chronica. *Staphylococcus passetti*. See *Micrococcus cereus flavus*, Passet. *Staphylococcus pyogenes albus*, Rosenbach. See *Micrococcus pyogenes albus*, Rosenbach. *Staphylococcus pyogenes aureus*, Ogston, Becker. Syn., *Staphylococco pyogeno aureo*, Ital. See *Micrococcus pyogenes aureus*, Rosenbach. *Staphylococcus pyogenes citreus*, Passet. See *Micrococcus pyogenes citreus*, Passet. *Staphylococcus pyosepticus*, Hericourt and Richet. See *Micrococcus pyosepticus*, Richet. *Staphylococcus salivarius pyogenes*, Biondi. See *Micrococcus salivarius pyogenes*, Biondi. *Staphylococcus viridis flavescens*, Guttman. Syn., *Micrococcus* of chicken-pox. Found in the vesicles of varicella. *aër.*, *uligf.*, *chg.* (greenish yellow), *npg.* *Streptococcus acidi lactici*, Grotenfeldt. Found in coagulated milk in Finland. *anaër.* (not strictly), *uligf.*, *npg.* *Streptococcus aethiobius*. See *Micrococcus ureæ liquefaciens*, Flügge. *Streptococcus albus*, Maschek. Syn., *Weisser Streptococcus*, Ger. Found in hydrant water (Freiburg). *aër.*, *liqf.*, *npg.* *Streptococcus aphtholus*, Hallier. See *Streptococcus of eczema epizootica*, Schottelius. *Streptococcus articularum*, Löffler. Syn., *Micrococcus* of diphtheria. Obtained from the affected mucous membrane in cases of diphtheria. Possibly a variety of *Micrococcus pyogenes*. *pg.* (for mice). *Streptococcus bombycis*. See *Micrococcus bombycis*, Cohn. *Streptococcus brevis*, Von Lingelsheim. Obtained from normal human saliva. *aër.*, *facianaër.*, *uligf.*, *npg.* *Streptococcus cadaveris*, Sternberg. Found in the liver of a yellow-fever cadaver. *aër.*, *facianaër.*, *uligf.*, *npg.* Probably identical with the preceding species. *Streptococcus cinnabareus*. See *Micrococcus cinnabareus*, Flügge. *Streptococcus coli gracilis*, Escherich. Found in the feces of healthy children living on a meat diet. *aër.*, *facianaër.*, *liqf.*, *npg.* *Streptococcus conglomeratus*, Kurth. Obtained from cases of scarlet fever. *pg.* (for mice). *Streptococcus coronatus*, Flügge. See *Micrococcus coronatus*, Flügge. *Streptococcus coryzæ contagiosæ equorum*, Schütz. Syn., *Streptococcus der Drüse des Pferdes*. *Bacterium der Brustseuche des Pferdes*, Ger. *Bacterium* of infectious pneumonia in the horse. Found in the pus from diseased lymphatic glands in horses suffering with infectious pneumonia, the disease being known in Germany as *Drüse des Pferdes*. *aër.*, *facianaër.*, *pg.* (for horses and mice),

Abbreviations. *aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facianaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

*npg.* (for rabbits, guinea pigs and pigeons). *Streptococcus des Gelenkrheumatismus*, Leyden. See *Bacillus rheumarthritidis*, Kussmaul. *Streptococcus endocarditicus*. See *Micrococcus endocarditis rugatus*, Weichselbaum. *Streptococcus erysipelatis (erysipelatos)*, Fehleisen. See *Micrococcus pyogenes*, Rosenbach. *Streptococcus fermenti*. See *Micrococcus viniferda*. *Streptococcus giganteus urethræ*, Lustgarten and Manneberg. Found in the healthy human urethra. *aër., npg.* *Streptococcus havaniensis*, Sternberg. Found in the acid vomit of a yellow-fever patient. Biologic characters undetermined. *Streptococcus insectorum*, Burrill. See *Micrococcus insectorum*, Burrill. *Streptococcus kochii*. See *Micrococcus* of septicæmia in rabbits, Koch. *Streptococcus lanceolatus pasteurii*, Gamaléia. See *Bacillus septicus sputigenus*, Flügge. *Streptococcus liquefaciens*, Sternberg. Obtained from the intestines and livers of yellow-fever cadavers. *aër., facanaër., liqf., npg.* *Streptococcus longus*, von Lingelsheim. See *Micrococcus pyogenes*, Rosenbach. *Streptococcus lucæ*. See *Micrococcus ulceris mollis*. *Streptococcus manfredii*. See *Micrococcus manfredii*. *Streptococcus meningitidis*. See *Micrococcus intercellularis meningitidis*, Naumann and Schäffer. *Streptococcus monomorphus*, Bujwid, Heryng. Found in benign pharyngeal ulcers. *npg.* *Streptococcus morbillosus*. See *Micrococcus* of measles. *Streptococcus nocardii*. See *Micrococcus mastobius*, Nocard. *Streptococcus ochroleucus*. See *Micrococcus ochroleucus*, Prove and Legrain. *Streptococcus of Bonome*. Obtained from the exudations in the cerebro-spinal meninges and from hemorrhagic extravasations in the lungs, in cases of epidemic cerebro-spinal meningitis. *pg.* (for white mice and rabbits). *Streptococcus of granuloma fungoides*, Rindfleisch and Auspetz. See *Streptococcus* of mycosis fungoides. *Streptococcus of Manneberg*. Obtained from the urine in cases of acute nephritis. *aër., facanaër., nliqf., pg.* (for dogs and rabbits). *Streptococcus of mastitis in cows*. See *Micrococcus mastobius*, Nocard and Mollereau. *Streptococcus of mycosis fungoides*. *Streptococcus of granuloma fungoides*, Rindfleisch and Auspetz. Found in the capillaries and subcutaneous tissue in the parts affected by this disease. Not sufficiently investigated. *Streptococcus of pus*. See *Micrococcus septicus*, Flügge. *Streptococcus perniciosus psittacorum*, Eberth and Wolf. See *Micrococcus psittaci*, Wolf. *Streptococcus pneumoniae*, Weichselbaum. See *Micrococcus pyogenes*, Flügge. *Streptococcus putrefaciens*. *Micrococcus* of putrefaction. Refers to any one of the many micrococci found in putrefying substances. *Streptococcus pyogenes*, Rosenbach. See *Micrococcus pyogenes*, Rosenbach. *Streptococcus pyogenes*, Saccardo. See *Micrococcus septicus*, Flügge. *Streptococcus pyogenes maligni*, Krause and Flügge. Found in necrotic masses in a leukemic spleen. *pg.* (for mice and rabbits). *Streptococcus pyogenes ureæ*, Rösing. Found in purulent urine. Cf. *Micrococcus pyogenes ureæ flavus*, Rösing. *Streptococcus radiatus*. See *Micrococcus radiatus*, Flügge. *Streptococcus rubiginosus*, Edington. Found in cases of scarlatina. *npg.* Does not appear till late in the disease. *Streptococcus seiferti*. See *Micrococcus influenzae*, Letzerich. *Streptococcus septicus*, Flügge. See *Micrococcus septicus*, Flügge. *Streptococcus septicus liquefaciens*, Babes. Obtained from the blood and viscera of a child who died of septicæmia

following scarlatina. *aër., liqf., pg.* (for mice and rabbits). *Streptococcus septopyæmicus*. See *Micrococcus septopyæmicus*, Biondi. *Streptococcus toxicatus*. See *Micrococcus toxicatus*, Burrill. *Streptococcus ureæ*. See *Micrococcus ureæ*, Cohn. *Streptococcus ureæ rugosus*, Rösing. Found in urine. *Streptococcus variolæ*. See *Micrococcus variolæ et vaccinae*, Cohn. *Streptococcus vermiformis*, Maschek. Syn., wurmförmiger Streptococcus, Ger. Found in hydrant water (Freiburg). *aër., liqf., npg.* *Streptococcus de l'érysipèle*, *Streptococcus pyogène vrai*. See *Micrococcus septicus*, Flügge. *Streptococcus puerpéral*, Doléris. See *Bacillus puerpéralis*, Engel and Spillman. *Streptococcus of Eczema epizootica*, Schottelius. Syn., *Streptococcus apthicola*, Hallier. *Micrococcus* of foot-and-mouth disease. *Micrococcus* der Maul- und Klauenseuche, Ger., *Micrococcus del afta epizootica*, Ital. Found in vesicular eruptions about the mouth and feet of cattle, pigs and sheep. Communicable to man. *aër., facanaër.* Pathogenesis not fully settled. Cf. *Bacillus* of ulcerative stomatitis of calves. *Streptothrix fæsterii*, Cohn. See *Cladothrix fæsterii*, Cohn. Swine Plague Schizophyte, Detmers. See *Bacillus* of swine plague, Marseilles, Rietsch and Jobert. Syphilis *Bacillus*. See *Bacillus syphilidis*, Lustgarten. Syphilis *Bacillus* of Eve and Lingard. Obtained in cultures from the blood and diseased tissues of syphilitics who have not undergone mercurial treatment. *aër., chg* (pale yellow or brown). Pathogenetic relations not settled. Not stained by Lustgarten's method; capable of development on blood-serum. Tetanus *Bacillus*. See *Bacillus tetani*, Nicolaier. *Thiothrix nivea*. See *Beggiatoa nivea*, Rabenhorst. *Thiothrix tenuis*, Winogradsky. Found in sulphur springs. *Thiothrix tenuissima*, Winogradsky. Found in sulphur springs. *Torula cerevisia*. See *Saccharomyces cerevisia*, Reess and Robin. *Torula ureæ*, Pasteur. See *Micrococcus ureæ*, Cohn. *Trachomococcus*, Ger. See *Micrococcus* of Trachoma, Sattler and Michel. *Trippercoccus*, Ger. See *Micrococcus gonorrhææ*, Neisser. *Trommelschlägerbacillus*, Ger. See *Bacillus putrificus coli*, Bienenstock. *Tubercle-bacillus*. See *Bacillus tuberculosis*, Koch. *Typhus bacillus*. **Bacteriaceæ** (*bak-te-re-ä'-se-e*) [βακτηρίων, a little stick]. A group or order of microscopic fungi; the same as *Schizomycetes*.

**Bacterial** (*bak-te'-re-al*) [βακτηρίων, a little stick]. Resembling or of the nature of bacteria.

**Bactericidal** (*bak-te-ris-id'-al*) [βακτηρίων, a little stick; *cadere*, to kill]. Destructive to bacteria.

**Bactericide** (*bak-te-ris-id*) [βακτηρίων, a little stick; *cadere*, to slay]. 1. Destructive to bacteria. 2. An agent that destroys bacteria.

**Abbreviations.** *aër.* = aerobic. *anaër.* = anaerobic. *chg.* = chromogenic. *facanaër.* = facultative anaerobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nlqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

**Bacteridium** (*bak-ter-id'-e-um*) [βακτηρίων, a little stick; *pl.*, *Bacteridia*]. According to Davaine, a genus of Bacteriaceæ characterized by immobility of the elements at all periods of their existence. The distinction does not now obtain.

**Bacteriemia** (*bak-te-re-e'-mè-ah*) [βακτηρίων, a little stick; *αἷμα*, blood]. The presence of bacteria in the blood.

**Bacterioid** (*bak-te'-re-oid*) [βακτηρίων, a little stick; *εἶδος*, form]. Applied to certain microorganisms flourishing in and around the roots of leguminous plants, assisting in the accumulation of nitrogen, and giving rise to tubercles. They may be cultivated in artificial media like ordinary bacteria. (Brunchoist, Nobbe, etc.)

**Bacteriologist** (*bak-te-re-ol'-o-jist*) [βακτηρίων, a little stick; *λόγος*, science]. One who makes a special study of bacteriology.

**Bacteriology** (*bak-te-re-ol'-o-jé*) [βακτηρίων, a little stick; *λόγος*, science]. That department of science that is concerned with the study of bacteria.

**Bacterio-protein** (*bak-te-re-o-prò'-te-in*) [βακτηρίων, a little stick; *πρώτος*, first]. A protein contained in bacteria.

**Bacterio-purpurin** (*bak-te-re-o-per'-pu-rin*) [βακτηρίων, a little stick; *purpura*, purple]. A peach-colored pigment found by Lankester in the protoplasm of *Beggiatoa roseo-persicina*. It is insoluble in water, alcohol, chloroform, ammonia, acetic and sulphuric acids, etc.

**Bacterioscopic** (*bak-te-re-o-skop'-ik*) [βακτηρίων, a little stick; *σκοπεῖν*, to view]. Pertaining to bacterioscopy.

**Bacterioscopy** (*bak-te-re-os'-ko-pe*) [βακτηρίων, a little stick; *σκοπεῖν*, to inspect]. The microscopic study of bacteria.

**Bacterio-therapeutic** (*bak-te-re-o-ther-ap-u'-tik*) [βακτηρίων, a little stick; *θεραπεία*, treatment]. Relating to bacterio-therapy.

**Bacteriotherapy** (*bak-te-re-o-ther-ap-e*) [βακτηρίων, a little stick; *θεραπεία*, treatment]. The treatment of disease by the introduction of bacteria into the system.

**Bacterious** (*bak-te'-re-us*) [βακτηρίων, a little stick]. Bacterial.

**Bacterium** (*bak-te'-re-um*) [βακτηρίων, a little stick; dim. of βακτηρία, a stick, staff; *pl.*, *Bacteria*]. 1. A term used to distinguish in a general way some of the simplest microscopic fungi, the *Bacteriaceæ*, Fission-fungi, or Schizomycetes, and other closely allied microbes. 2. A genus of short, cylindrical, motile Fission-fungi.

**Bacteriuria** (*bak-te-re-u'-re-ah*) [βακτηρίων, a little stick; *οὔρον*, urine]. The presence of bacteria in the urine.

**Bacteroid** (*bak'-ter-oid*) [βακτηρίων, a little stick; *εἶδος*, form]. Resembling bacteria.

**Bad Disorder**. Synonym of *Syphilis*.

**Badal's Operation**. See *Operations*, Table of.

**Bader's Operations**. See *Operations*, Table of.

**Badiaga** (*bah-de-ah'-gah*) [Rus., *badyaga*]. A Russian fresh-water sponge, *Spongia lacustris*, valued as a discutient and as a remover of the marks of bruises. Unof.

**Badian** (*ba'-de-an*) [*badius*, bay]. The Star-anise. See *Illicium*.

**Baer's Law**. See *Law*. **B. Operations**. See *Operations*, Table of. **B. Plane**. See *Plane*.

**Bag** (*bag*) [AS., *bælg*]. 1. A sac. 2. The scrotum. **B., Barnes's**. See *Barnes's Dilators*. **B., Politzer's**, a soft rubber bag for inflating the internal ear. **B. of**

**Waters**, the fetal membranes enclosing the liquor amnii, projecting through the *os uteri* early in labor. The sac usually ruptures when the cervix is dilated.

**Bagnio** (*bant'-yo*) [*It., bagno*]. 1. A house of prostitution. 2. A bath-house.

**Bailey's Flask**. In dentistry, an apparatus for making metal dies. It consists of two semi-elliptic rings of iron—one nearly straight, the other a truncated cone with four keys—jointed so as to fit together. The straight ring is used as a casting-box for the sand as well as a form for the lead; the other gives the proper shape to the zinc.

**Baillarger's Lines**. See *Lines, Table of*. **B. Streak**. Same as *Baillarger's Lines*.

**Bain-Marie** (*bān-mah-re'*) [*Fr.*]. An instrument for immersing solutions, microorganisms, etc., in water or chemical solutions, thus keeping them at a desired temperature.

**Bain's Method**. See *Treatment, Methods of*; also *Artificial Respiration*.

**Bakers' Itch**. An eczematous affection of the hands, caused by the irritation of the yeast. **B. Salt**, a synonym of smelling salts, or the subcarbonate of ammonia; it is sometimes used by bakers in leavening cakes.

**Baker's Leg**, knock-knee, or *genu valgum*. **B. Operations**. See *Operations, Table of*. **B. Pins**, heavy pins used to hold bone surfaces in apposition after resection of a joint.

**Balance** (*bal'-ans*) [*bilanx*, a balance]. 1. A device or apparatus for weighing; an indispensable adjunct of the art of pharmacy. 2. The harmonious adjustment of corresponding parts.

**Balanic** (*bal'-an-ik*) [*βάλανος*, the glans penis]. Pertaining to the gland of the penis or of the clitoris.

**Balanism** (*bal'-an-izm*) [*βαλανός*, acorn; pessary; the glans penis]. The application of a pessary or suppository.

**Balanitis** (*bal-an-i'-tis*) [*βάλανος*, the glans penis; *ιτις*, inflammation]. Inflammation of the glans penis, sometimes called *Balano-posthitis*. Phimosis is a frequent complication. See *Posthitis*.

**Balanoblennorrhoea** (*bal-an-o-blēn-o-re'-ah*) [*βάλανος*, the glans; *βλέννος*, mucus; *ροία*, a flow]. Gonorrheal balanitis.

**Balano-chlamyditis** (*bal-an-o-klam-id-i'-tis*) [*βάλανος*, the glans penis; *χλωμής*, cloak; *ιτις*, inflammation]. Inflammation of the glans and prepuce of the clitoris.

**Balanoplasty** (*bal'-an-o-plas-te*) [*βάλανος*, the glans penis; *πλάσσειν*, to form]. Plastic surgery of the glans penis.

**Balanoposthitis** (*bal-an-o-pos-thi'-tis*) [*βάλανος*, the glans penis; *πρόθη*, prepuce; *ιτις*, inflammation]. Inflammation of the glans penis and of the prepuce.

**Balanorrhagia** (*bal-an-or-a'-je-ah*) [*βάλανος*, the glans penis; *ρήγνυσθαι*, to burst out]. Gonorrheal balanitis, with copious discharge of pus.

**Balanorrhoea** (*bal-an-or-e'-ah*) [*βάλανος*, the glans penis; *ροία*, a flow]. Balanitis.

**Balantidium** (*bal-an-tid'-e-um*) [*βαλαντίδιον*, dim. of *βαλάντιον*, a bag]. A genus of Protozoa. **B. coli**, a protozoan parasite that inhabits the pig, and has been found in the human intestine. See *Parasites, Animal, Table of*.

**Balanus** (*bal'-an-us*) [*βάλανος*, an acorn]. 1. The glans of the prepuce or of the clitoris. 2. A pledget, suppository, or pessary.

**Balata** (*bal'-at-ah*) [Native Guiana]. The dried, milky juice of the bully-tree (*Sapota milleri*) of Guiana. In its properties it is intermediate between caoutchouc and gutta-percha, and is used chiefly in England as a substitute for these materials.

**Balaustine** (*bal-aw'-tin*) [*βαλαίστιον*, the flower of the wild pomegranate]. The flower of the *Pomegranate*, *g. r.*, formerly used in medicine.

**Balbuties** (*bal-bu'-she-ez*). [*balbutire*, to stammer]. Stammering.

**Bald** (*bauld*) [*ME., balde*, bald]. Wanting hair. A term applied to one who has lost the hair of the scalp. **B. Ringworm**. See *Tinea tonsurans*.

**Baldness** (*bauld'-nes*) [*ME., balde*, bald]. Alopecia, whether congenital or acquired. When the loss of hair is circumscribed it is called *tinea decalvans*; when general, it is called *alopecia*. Senile baldness is called *calvities*. Premature baldness is caused by disease. See *Alopecia*.

**Bale Blue**. See *Pigments, Conspectus of*. **B. Green**. Same as *Schweinfurt Green*.

**Balfour's Test**. See *Death, Signs of*. **B.'s Treatment**. See *Treatment, Methods of*.

**Ball** (*baul*) [*ME., bal*]. 1. In veterinary medicine, a pill or bolus. 2. Vulgarly, a testicle. **B.-blue**. Same as *Prussian Blue*. **B.-and-Socket Joint**. See *Diarthrosis* and *Enarthrosis*. **B. Thrombus**. See *Thrombus*.

**Ballast Fever** (*bal'-ast fe'-ver*). See *Fever*.

**Ballet-dancer's Cramp**. See *Cramp*.

**Balling's Saccharometric Beer-test**. As by fermentation, 100 parts of malt-extract yield 50 parts of alcohol, twice the quantity of alcohol found will indicate the quantity of malt-extract necessary for its formation. This quantity of malt-extract added to that still existing in the beer indicates the whole of the malt-extract existing in the wort before fermentation.

**Ballingall's Operation**. See *Operations, Table of*.

**Ballismus** (*bal-iz'-mus*) [*βαλίζμός*, a leaping]. 1. Chorea. 2. Paralysis agitans.

**Balloonement** (*bal-ton-mon(g)*) [*Fr.*]. The ballooning or distending of a part for operative or diagnostic purposes.

**Balloon** (*bal-oon'*) [*Mod. E., baloon*, a large bag]. In chemistry, a spherical glass receiver with a short neck. **B. Sickness**. See *Anoxyemia* and *Hyponosus*.

**Ballooning** (*bal-oon'-ing*) [*Mod. E. balloon*, a large bag]. Surgical distention of the vagina by air-bags or water-bags.

**Ballota** (*bal-o'-tah*) [*βαλτώτη*, black hoarhound]. A genus of labiate plants. **B. nigra**, or black hoarhound, was formerly much used in medicine. **B. (or Hyptis) suaveolens**, of the E. and W. Indies, has been lately introduced into general practice as a powerful and yet safe nervin, antilithic, diuretic, evacuant, and laxative remedy. Unof. **B. lanata**, of N. Asia, has similar uses. Unof.

**Ballottement** (*bal-o'-mon(g)*) [*Fr., from ballotte*, a ball]. A method of diagnosing pregnancy from the fourth to the eighth month. A push is given the uterus by the finger inserted into the vagina, and if the fetus be present, it will rise and fall again like a heavy body in water.

**Ball's Operations**. See *Operations, Table of*.

**Balm** (*bahm*) [*balsamum*, a balsam]. A popular synonym of *balsamum*. Any soothing application or ointment. **B. of Gilead**. See *Balsam, Abies*, and *Melissa*.

**Balmony** (*bal'-mo-ne*) [origin uncertain]. The herb *Chelone glabra*; cathartic and anthelmintic. Dose of the fld. ext. ʒ ss-j. *Chelonin*, the concentrated ext. Dose gr. j-iv. Unof.

**Balneography** (*bal-ne-og'-ra-fe*) [*balneum*, a bath; *γραφον*, a writing]. A treatise on bathing.

**Balneology** (*bal-ne-ol'-o-je*) [*balneum*, a bath; *λόγος*, science]. The science of baths and their effects upon the system.

**Balneotherapeutics** (*bal-ne-o ther-ap-u'-tik-s*). See *Balneotherapy*.

**Balneotherapy** (*bal-ne-o-ther'-ap-e*) [*balneum*, a bath; *therapeia*, healing]. Systematic bathing for therapeutic purposes, or the treatment of disease by baths or bathing.

**Balneum** (*bal'-ne-um*) [L.]. A bath. See *Bath*.  
**B. arenae**, a sand bath. See *Ammotherapy*.  
**B. lacteum**, a milk bath. **B. luteum**, a mud-bath. See *Illutatio*.  
**B. pneumaticum**, an *Air-bath*, *q. v.*

**Balanea** (*bal-o'-ne-ah*). See *Valonia*.

**Balsam** (*basol'-sam*) [*βάλσαμον*, the resin of the balsam tree]. The resinous, volatile, aromatic substance, liquid or concrete, obtained from certain trees by natural exudation or by artificial extraction. Balsams are divided into two classes, those with, and those without, benzoic and cinnamic acids. In general they are mixtures of various essential oils, resins, and acids.  
**B. Apple**, the plant *Momordica balsamina*, and its warty, gourd-like fruit. It is purgative, but its tincture is chiefly used in domestic medicine as a vulnerary. Unof.  
**B. Bog**, a singular stone-like, woody, umbelliferous plant, *Bolax* or *Azorella glebaria*, of the Falkland Islands and Patagonia. Its aromatic gum is locally prized as a vulnerary, desiccative, and anti-gonorrheal remedy. Unof.  
**B., Canada**, a turpentine gathered from the natural blisters of the bark of *Abies balsamum*. It is much used as a mounting medium by microscopists.  
**B. of Copaiba**. See *Copaiba*.  
**B. of Fir**. Same as *Canada Balsam*. See *Abies*.  
**B., Friar's**. See *Benzoïn*.  
**B. of Gilead**, the balm of the Old Testament; an oleo-resin obtained from the *Balsamodendron gileadense*.  
**B. of Peru**, the balsam obtained from *Toluifera pereirae*; antiseptic, stimulant to the circulation, and sedative to the nervous system; generally a tonic, and expectorant in bronchitis. Applied locally it is useful in chronic inflammatory skin-diseases. Dose of the emulsion  $\mathfrak{m}\chi$ -xxv.  
**B.-root**, a popular name for certain composite-flowered plants of the genus *Balsamorhiza*. *B. hookeri*, *B. macrophylla*, *B. sagittata* are common in the Pacific States and are rich in a resinous balsam. Unof.  
**B. of Tolutan**, or of *Tolu*, obtained from *Toluifera balsamum*. Its properties are due to a volatile oil, *toluene*. It possesses an agreeable odor, and is a basis for many cough-mixtures. It is a fair expectorant. *T. Tinct.* contains ten per cent. of the balsam in 90 per cent. of alcohol. Dose  $\mathfrak{m}\chi$ -xxx. *T. Syr.*, balsam four parts; simple syrup 96. Dose  $\mathfrak{z}\mathfrak{j}$ -ij.

**Balsamation** (*basol'-sam-o'-shun*) [*βάλσαμον*, the resin of the balsam tree]. Embalment with balsamic or aromatic spices.

**Balsamic** (*basol'-sam-ik*) [*βάλσαμον*, the resin of the balsam tree]. Having the nature or qualities of a balsam.

**Balsamine** (*basol'-sam-in*) [*βάλσαμον*, balsam]. Any plant of the genus *Impatiens*, *q. v.*

**Balsamito** (*basol'-sam-e'-to*) [Sp.]. A tincture of balsam of Peru in rum; anthelmintic, diuretic, and tonic; it is used externally as a cosmetic and a stimulant wash for sores. Unof.

**Balsamodendron** (*basol'-sam-o-den'-dron*). See *Myrrh* and *Bdellium*.

**Balsams** (*basol'-sam-s*) [*βάλσαμον*, the resin of the balsam tree]. The natural, thick solutions of the gum resins in the essential oils and turpentine. See *Resins*.

**Balsamum** (*bal'-sam-um*) [*βάλσαμον*, balsam; *gen., Balsami*]. A balsam, *q. v.* **B. dipteroearpi**. See *Gurjun Balsam*.

**Balser's Fatty Necrosis**. See *Diseases, Table of*.

**Bambalia** (*bam-ba'-le-ah*) [L.]. Stammering; thick-ness of speech, or other impediment to utterance.

**Bamberger's Fluid**. An albuminous mercuric compound used in the treatment of syphilis. It is made as follows: To 100 c.c. of a filtered solution of white of egg (containing 40 c.c. of albumin and 60 c.c. of water) there are added 60 c.c. of a solution of mercuric chlorid (containing 5 per cent., or 3 grams, of bichlorid of mercury) and 60 c.c. of a solution of sodium chlorid (containing 20 per cent.); finally, 80 grams of distilled water are added, which brings the bulk of the solution up to 300, containing 0.010 mercuric chlorid in every cubic centimeter.

**Bamboo** (*bam-boo'*) [E. Ind., *bambu*]. A popular name for many tree-like, woody-stemmed grasses, especially those of the genus *Bambusa*. Apart from a limited use in surgery, none of the bamboos is employed in regular medicine. Locally, *B. arundinacea* is employed as an alternative, anthelmintic, and depurative. Unof. See also *Tafasheer*. **B. Brier**, the root of *Smilax sarsaparilla*, habitat, Southern United States. Its properties are identical with those of sarsaparilla. Dose of the fld. ext.  $\mathfrak{z}$  ss-ij. Unof.

**Banana** (*ban an'-ah*) [Sp.]. The root of the common banana, *Musa sapientum*, said to be a valuable alternative, and useful in strumous affections. Dose of the fld. ext.  $\mathfrak{m}\chi$ -xxx. Unof.

**Band** (*band*) [ME., *bande*]. That which binds. A stripe. **A.** ligament. **B., Axis**, Baer's primitive streak. **B., Belly**, a band to pass around the abdomen. **B., Head**, a strap for securing a mirror to the forehead. **B., Horny**, of *Tarinus*, the fore part of the tenia semicircularis. **B., Moderator**. See *B., Reil's*. **B., Reil's**, a fibrous muscular fillet that frequently extends across the right ventricle of the heart; it is called also the *moderator band*. **B. of Remak**. See *Fiber, axial*; also *Purkinje, Axis Cylinder of*. **B. of Tarinus**. See *B., Horny*.

**Bandage** (*ban'-dāj*) [Fr., *bande*, a strip]. Bandages are usually strips of muslin or other material, of varying widths and lengths, used in surgery for the purpose of protecting, compressing, etc., a part, or for the retention of dressings and applications. A *simple bandage* or *roller* consists of one piece; a *compound*, of two or more pieces. *Starch, plaster-of-Paris, silica, dextrin, tripolth*, etc., etc., are used or recommended for making stiff and *immovable dressings or bandages*. According to their direction bandages are classed as: 1. *Circular*, circular turns about the part. 2. *Figure-of-8*, the turns crossing each other like that figure. 3. *Oblique*, covering the part by oblique turns. 4. *Recurrent*, the turns returning successively to the point of origin. 5. *Spica*, the turns resembling the arrangement of the husks of an ear of corn. 6. *Spiral*, each turn covering one-half of the preceding. 7. *Spiral reverse*, the bandage is reversed in order to better adapt it to the part. Bandages are also classed according to the part to which they are applied. Of **Bandages of the head** we have: 1. *Circular, of the forehead*, to retain dressings upon the head. 2. *Circular, of the eyes*. 3. *Crossed, of the eyes*, to hold dressings upon one or both eyes. 4. *T., of the eye*, a small piece of muslin cut in the shape of a right-angled triangle, and sufficiently large to cover the eye, is sewn by its base, with the perpendicular toward the ear, to a horizontal strip of a length to encircle the head. The apex of the triangle is sewn to a vertical strip long enough to pass under the jaw and meet the horizontal strip on the opposite side. 5. *Crossed, of the angle of the jaw*, to support the parts in fracture of the angle of the jaw. 6. *Knotted, of the head*, a double headed roller with compress, to make compression in wound of the temporal artery. 7. *Recurrent, of the head*, a single headed or double headed roller, to

Spiral Bandage of the Finger.

Spica of the Foot.

retain dressings upon the head. 8. *Four-tailed, of the head*, a piece of cloth eight inches wide and long enough to pass over the head and under the chin, is torn from either end to within three or four inches of the middle. The body of the bandage is placed on the top of the head, the posterior ends are tied under the chin, and the two anterior ends carried backward and tied at the nape of the neck. 9. *Gibson's, for the body of the lower jaw*, to support the parts in fracture. 10. *Rhea Barton's*, for the same purpose. 11. *Capeline or Mitra Hippocratis*: made by a double-headed roller (one which is rolled from each end, the two heads lying on the same side of the bandage and being of equal size). One roll being taken in each hand, the intervening strip is applied low down over the center of the forehead, and the bandage unrolled on either side until the two heads meet posteriorly below the occipital protuberance. From this point the two rollers are applied in different directions, one passing continuously around the head in a circle, the other forward and backward over the cranium until the latter is entirely covered. 12. *Galen's six-tailed bandage*: the bandage is so arranged that it has three strips at each end. The middle portion is placed on the crown of the head, the anterior ends are tied at the back of the neck, the middle under the chin, and the posterior at the forehead. 13. *Garretson's*, a bandage for the lower jaw, passing above the forehead and back again to cross under the occiput, and finally ending in front of the chin. 14. *Pressure-bandage*, an eye-bandage applied with a considerable degree of firmness in order to afford pressure. 15. *Protective-bandage*, a bandage for the eye, lightly applied. 16. *Hamilton's*, a form of compound bandage for the lower jaw, consisting mainly of a firm leather strap to support the jaw. 17. *Liebreich's*, a variety of bandage for the eye, made from a knitted-cotton band. 18. *Thillaye's*, a compound bandage for joining the edges of the wounds in hare-lip operation. Of **Bandages of the trunk** there are: 1. *Circular, of the neck*. 2. *Figure-of-8, of the neck and axilla*, to retain dressings upon the shoulder or in the axilla. 3. *Anterior figure-of-8, of chest*, to draw the shoulder forward and to retain dressings on the anterior surface of the chest. 4. *Posterior figure-of-8, of chest*, to draw the shoulders back in fractured clavicle, or to retain dressings on the posterior surface of the chest. 5. *Crossed, of one or both breasts*, to support the breasts in excessive lactation or in mammary disease. 6. *Spica, of shoulder*, to retain the head of the humerus in place after dislocation. 7. *Spiral, of the chest*, to make compression in fracture of the sternum or ribs. 8. *Circular, of the abdomen*, to support the abdominal walls. 9. *Spiral, of the abdomen*, to compress the abdominal walls or to retain dressings. 10. *Spica, of one or both groins*, to compress groin or retain dressings. 11. *Spiral reverse, of the penis*, to retain dressings upon this organ. The **Bandages of the arm** are: 1. *Circular, of the wrist*. 2. *Figure-of-8, of wrist*, to compress the joint or retain dressings. 3. *Figure-of-8, of elbow*. 4. *Circular, of arm or forearm*. 5. *Oblique, of arm or forearm*. 6. *Spiral, of arm*, to retain dressings. 7. *Spiral reverse, of upper extremity*, to support the arm in dislocations, fractures, etc. 8. *Volpeau's*, used to support the arm in fracture of the clavicle, the neck, or acromial process of the scapula. The hand of the injured side being placed on the sound shoulder, an oblique turn is made from the axilla of the sound side, across the back of the chest to the opposite shoulder, covering the fracture, down under the elbow in front to axilla of the sound side, then across the back over the outside of the point of the elbow to the axilla of

the sound side, thus continuing the oblique and circular turns alternately and advancing over the arm till it is held firmly. 9. *Desault's Apparatus*, consists of an axillary pad held by tapes about the neck, a sling for the hand, and two single-headed rollers. The forearm is placed at right angles with the humerus, held in place by many circular and oblique turns about the shoulder and body. 10. *Boyer's*, a form of apparatus consisting of a chest-belt, an arm-belt, and an axillary pad. It is used in treating fractured clavicles. The **Bandages of the hand** are: 1. *Spiral, of the finger*. 2. *Spiral, of all the fingers, or gauntlet*. 3. *Spiral, of palm, or demi-gauntlet*. 4. *Spica, of thumb*. All the bandages of the hand are used in cases of fracture or to retain dressings. The **Bandages of the lower extremity** are: 1. *Figure-of-8, of ankle*, to cover the part or retain dressings. 2. *Figure-of-8, of knee*, to cover the part or compress it. 3. *Figure-of-8, of thighs*, to compress the part after wounds or operations. 4. *Spica, of instep*, to compress the parts. 5. *Spiral reverse, of whole lower extremity*, to support the limb after fracture, etc. 6. *Baynton's*, a series of straps of adhesive plaster used in the treatment of chronic leg ulcers. 7. *Ribbail's*, a spica bandage of the foot. **B., Genga's**. See **B., Theden's**. **B., Heliodorus's**. The T-bandage. **B., Hippocrates's**. See **B., Capeline**. **B., Hueter's**, a spica bandage for the perineum. **B., Langier's**, a many-tailed paper bandage. **B., Larrey's**, a form of many-tailed bandage, the edges being glued together. **B., Maisonneuve's**, a variety of Plaster-of-Paris bandage, formed from cloths folded, these being supported by other bandages. **B. of the Poor**. See **Galen's Bandage**. **B., Recurrent, for stumps**, is used after amputations, to support the flaps. **B., Richet's**, a form of Plaster-of-Paris bandage to which a small amount of gelatin has been added. **B. of Scultetus**, a compound bandage, similar to a spiral reverse in appearance and action, used in compound fractures, so that the short pieces of which it is composed may be removed without motion of the limb. **T-Bandages** are compound, and resemble that letter; the menstrual napkin is an example. **B., Theden's**, a form of roller bandage applied from below upward over a graduated compress, to control hemorrhage from a limb. See *Handkerchief Dressing*.

**Bandager** (*ban'-da-jer*) [*Fr., bande, a strip*]. One skilled in the application of bandages. See *Dresser*.

**Bandagist** (*ban'-da-jist*) [*Fr., bande a strip*]. A maker of trusses, bandages, and other surgical appliances to be worn upon the person.

**Banded Hair** (*ban'-ded har*). See *Ringed Hair*.

**Bandl, Operation of**. See *Operations, Table of*. **B., Ring of**, the superior limit of the cervical canal, in pregnancy at a level with the pelvic inlet, marking the boundary between the lower uterine segment and the rest of the uterus. It is about six inches above the os externum.

**Bandolin** (*ban'-do-lin*) [origin uncertain]. A mucilage made usually of quince-seeds, or of gum-tragacanth, used mainly as a paste for confining the hair and making it lustrous; it is called also *fixature*. See *Cydonium*.

**Bandy Leg** (*ban'-de leg*). Bow-leg, *q. v.*

**Baneberry** (*ban'-ber-é*). See *Actea*.

**Bang, Bhang, or Bangu** (*bang*). See *Cannabis indica*.

**Banian** (*ban'-yan*) [*Ar., banyan, a trader*]. A South Asiatic fig-tree, *Ficus bengalensis*, remarkable for the development of roots and secondary trunks from its branches. Its juice is antidontalgic; the bark and seeds tonic, diuretic, and antipyretic. Unof.

**Banks's Operations**. See *Operations, Table of*.

**Banting Treatment**. See *Treatment, Methods of*.

**Bantingism** (*ban'-ting-izm*) [From *Banting*, the name of the inventor]. A method proposed for the reduction of corpulence, by abstinence from saccharine and farinaceous foods. See *Treatment, Methods of*.

**Banyan** (*ban'-yan*). See *Baniam*.

**Baobab Tree**. See *Adansonia digitata*.

**Baptin** (*hap'-tin*) [*βαπτισιν*, a dipping]. A moderately purgative glucosid, obtainable from *Baptisia tinctoria*.

**Baptisia** (*hap-tis'-c-ah*) [*βαπτισιας*, a dipping]. Wild Indigo. The root bark of *B. tinctoria* with properties due to an impure glucosid, the so-called *Baptisin*. It is laxative and stimulant in moderate doses; emetic and cathartic in large doses, and is valuable in amenorrhea, typhus and typhoid fevers. It is excellent for local application to indolent ulcers and gangrenous sores. **B.**, **Extract**. Dose gr. j-x. **B.**, **Ext. Fld.** Dose m-jj-xx. **B.**, **Tinct.** Dose m-v-xxx. Dose of the resin gr. j-v. All unof.

**Baptisin** (*hap'-tis-in*) [*βαπτισιν*, a dipping]. 1. A precipitate from the tincture of *Baptisia tinctoria*; antiseptic, evacuant, eccholic, resolvent. Dose one to three grains. Unof. 2. A bitter glucosid obtainable from the plant, *Baptisia tinctoria*; it has little medicinal activity.

**Baptitoxin** (*hap-tit-oks'-in*) [*βαπτισιν*, a dipping; *τοξικόν*, a poison]. A poisonous alkaloid obtained from *Baptisia tinctoria*. It hastens respiration and exaggerates vasomotor activity.

**Baptorrhœa** (*hap-tor-e'-ah*) [*βαπτορ*, infected; *ῥέω*, to flow]. Any infectious discharge from a mucous surface, as gonorrhœa.

**Baptothecorrhœa** (*hap-to-the-kor-e'-ah*) [*βάπτορ*, infected; *θηκη*, vagina; *ῥέω*, to flow]. Gonorrhœa in women.

**Bapturethorrhœa** (*hap-tu-rêth-ro-re'-ah*) [*βάπτορ*, infected; *ὀυφίθρα*, urethra; *ῥέω*, to flow]. Urethral gonorrhœa; gonorrhœa of men.

**Baranilin** (*bar-an'-il-in*) [*βαρίς*, heavy; *anilin*]. Heavy anilin oil. See *Heavy Oil* and *Creosote Oil*.

**Baraquet** (*bar-ah-kwet'*) [Fr.]. Synonym of *Influenza*.

**Barb** (*barb*) [*barba*, a beard]. 1. In biology, the retrorse tooth of an awn or prickle. 2. One of the narrow acute plates diverging from the rachis and going to form the vane of a feather.

**Barba** (*bar-bah*) [L.]. The beard.

**Barbadoes Leg** (*bar-bal'-doz leg*). See *Elephantiasis Arabum*. **B. Nut**. See *Purging Nut*. **B. Tar**, a form of bitumen (q. v.) formerly employed in medicine.

**Barbaloin** (*bar-bal'-o-in*) [*Barbadoes*; *ἀλόη*, aloë],  $C_{17}H_{20}O_7$ . The aloin derived from Barbadoes aloes.

**Barbarossa's Pills**. A mercurial preparation containing in addition rhubarb, scammony, musk, etc.

**Barbasco** (*bar-bas'-ko*) [*verbascum*, mullein]. A composite-flowered plant of tropical America, the *Clibadium biocarpum*. The stalks are used in preparing hair-washes, and are said to restore gray hair to its natural color. The plant is also used in eye-troubles. It is said to be very poisonous. Unof.

**Barbellate** (*bar-bel'-ät*) [*barbella*, dim. of *barba*, a beard]. In biology, applied to the bristles of the pappus of some composite when beset with short, stiff hairs, longer than when denticulate, but shorter than when plumose.

**Barben Cholera** (*bar-ben kol'-er-ah*). A form of poisoning resulting, in Central Europe, from the eating of the barb.

**Barber's Itch** (*bar'-berz ich*). The disease called *Tinea barbae*, *Sycosis parasituria*, or *Tinea syci*, q. v.

**Barberry** (*bar'-ber-e*). See *Berberis*. **B. Gum**, a commercial name of certain varieties of gum-arabic.

**Barber-Surgeon** (*bar'-ber ser'-jun*) [*barba*, a beard; *M.E.*, *surgeon*]. Formerly, a barber who also practised surgery.

**Barbicel** (*bar'-bis-el*) [*barbicella*, dim. of *barba*, a beard]. In biology, one of the fringes of a barbule of a feather.

**Barbiers** (*bar'-berz*) [E. Ind.]. A paralytic affection common in India, and probably a myelitis. It is often confounded with beriberi.

**Barbigerous** (*bar-bij'-er-us*) [*barba*, a beard; *gerere*, to carry]. In biology, bearded; hirsute; coarsely pubescent; applied to petals.

**Barbotine** (*bar-bo-teen'*) [Fr., wormwood]. Levant worm-seed.

**Barbule** (*bar'-bul*) [*barbula*, dim. of *barba*, beard]. In biology, one of the fringes of the barb in a feather, going to make up the vane of the barb, as the barbs make the vane of the feather.

**Barclay's Angles**. See *Angle*. **B.'s Plane**. See *Plane*.

**Barcoo** (*bar'-koo*) [Australian]. A peculiar disease, marked by nausea and vomiting, common in Australia. Its cause is unknown. It is also called "Fly-sickness."

**Bardana** (*bar-da'-nah*) [L.]. The burdock. See *Lappa*.

**Bardeleben's Operation**. See *Operations, Table of*.

**Bardenheuer's Operations**. See *Operations, Table of*.

**Barden's Operation**. See *Operations, Table of*.

**Baregin** (*bar-a'-zhin*). See *Glaisin*.

**Baresthesiometer** (*bar-es-the-ze-om'-et-er*) [*βάρος*, weight; *αἰσθησις*, perception; *μέτρον*, a measure]. An instrument for estimating the weight-sense in disturbances of sensibility.

**Baresthesiometric** (*bar-es-the-ze-o-met'-rik*) [*βάρος*, weight; *αἰσθησις*, perception; *μέτρον*, a measure]. Relating to the baresthesiometer.

**Bareswill's Solution**. A solution for the detection of sugar in the urine. It consists of sulphate of copper, acid potassium tartrate and sodic hydrate. See *Tests, Table of*.

**Barford's Test**. See *Tests, Table of*.

**Baric** (*ba'-rik*) [*βάρος*, heavy]. Pertaining to or containing barium.

**Barilla** (*bar-il'-ah*) [Fr., *barille*, impure soda]. Impure sodium carbonate; being the ashes obtained by burning various chenopodiaceous plants of the genera *Salicornia* and *Salsola*.

**Barium** (*ba'-re-um*) [*βάρος*, heavy].  $Ba = 136.8$ ; quantivalence II. A metal of the alkaline group, of pale yellow color, characterized by a strong affinity for oxygen. Neither the metal nor its salts are much employed in medicine; all are poisonous. **B. Carbonate**,  $BaCO_3$ , used in the preparation of the chlorid. **B. Chlorid**,  $BaCl_2 \cdot 2H_2O$ , soluble, used as a reagent, and also as a cardiac and vasomotor stimulant in the treatment of aneurysm. Dose gr. ss-v. **B. Chlorid Test**. See *Tests, Table of*. **B. dioxid**,  $BaO_2$ , used for making aqua hydrogenii dioxid. **B. iodid**, formerly used as an alternative. Dose gr.  $\frac{1}{4}$ . Mainly employed in ointments. Unof. **B. monohydrate**, caustic baryta; reagent. **B. oxid**,  $BaO$ , baryta. **B. sulphate**,  $BaSO_4$ , used as a pigment; formerly used in the treatment of skin diseases, and in lotions.

**Bark** (*bark*) [M.E., *barke*]. The cortex or covering surrounding the wood of exogens. It is sometimes used as a synonym of cinchona or calisaya bark. **B. Peruvian**. See *Cinchona*. (For other barks, see the names of the plants or trees that produce them.)

**Barker's Operations**. See *Operations, Table of*.

**Barking** (*bar'-king*). [M.E., *barken*, to bark.] The uttering of a peculiar sharp, short cry, as a dog. See

- Aboiement.* **B. Disease**, a guttural, barking cough, with nervous disorder and impairment of the will; cynobex hebetis.
- Barleria** (*bar-le'-re-ah*) [L.]. A genus of acanthaceous plants. **B. buxifolia** and **B. ciliata**, of India, are aperient. **B. prionitis**, of S. Asia, is employed as a polychrest. Unof.
- Barley** (*bar'-le*) [ME., *barly*]. A cereal belonging to the order *Gramineæ*; the most common variety, *Hordeum distichon*, is much used as a food, and also in the preparation of malt. **B. Decoct.** (B. P.). Dose  $\frac{5}{8}$ –iv. **B. Pearl**, is the decorticated grain, rounded and polished. **B. Water**, *decoctum hordei*, a decoction consisting of two ozs. of Pearl B. boiled in one and one-half pints of water and afterward strained. See *Ptisan*. **B. Sugar**, *saccharum hordeatum*; practically a glucose. Applied also to an amorphous mass obtained by melting cane-sugar.
- Barnes's Curve.** In obstetrics, the segment of a circle, having for its center the sacral promontory, its concavity looking backward. **B.'s Dilators**, graduated rubber bags used for dilating the cervix uteri in the induction of abortion or premature labor. **B.'s Method.** See *Treatment, Methods of*.
- Barograph** (*bar'-o-graf*) [*βάρος*, weight; *γράφειν*, to record]. A self-registering barometer.
- Baromacrometer** (*bar-o-mak-rom'-et-er*) [*βάρος*, weight; *μακρός*, long; *μέτρον*, measure]. An apparatus for ascertaining the weight and length of new-born infants.
- Barometer** (*bar-om'-et-er*) [*βάρος*, weight; *μέτρον*, a measure]. An instrument for determining the weight and tension of the atmosphere. It consists essentially of a glass tube about 36 inches long, closed at one end, filled with mercury, and inverted in a basin of mercury. The mercury will sink in the tube until it rests at a height of about 30 inches at the sea-level, the height varying as the atmospheric pressure increases or diminishes. **B., Aneroid**, a metallic box from which the air has been exhausted, the tension being indicated by the collapsing or bulging of the thin corrugated cover, which is connected with a movable index. **B.-maker's Disease**, a form of chronic mercurial poisoning among the workmen who make barometers. It is due to the inhalation of the fumes of mercury.
- Barometrograph** (*bar-o-met'-ro-graf*). See *Barograph*.
- Baroscope** (*bar'-o-skop*) [*βάρος*, weight; *σκοπεῖν*, to observe]. An instrument used for determining the loss of weight of a body in air, compared with its weight in a vacuum. A form of baroscope has been invented by Esbach for the quantitative determination of urea.
- Barosma** (*bar-oz'-mah*) [*βάρος*, heavy; *ὀσμή*, smell]. A plant of the order *Rutaceæ*, native to the Cape of Good Hope and vicinity; several species of which yield the Buchu of commerce.
- Barosmin** (*bar-oz'-min*) [*βάρος*, heavy; *ὀσμή*, smell]. A precipitate from the tincture of *Barosma crenata*. Dose grs. ij–ijj. Unof.
- Barras** (*bar'-as*) [Fr.]. Turpentine obtained in the S. of France, chiefly from *Pinus pinaster*.
- Barrel-shaped Chest.** See *Emphysema*.
- Barrenness** (*bar'-en-nes*) [ME., *bareyn-esse*]. Sterility in the female.
- Barrier's Method.** See *Treatment, Methods of*.
- Barruel's Apparatus.** An arrangement for charging water with carbonic acid.
- Barsac** (*bar-sahk'*) [Fr.]. A white French wine, often with a bitter-sweet, resinous flavor.
- Bartholin, Canal of.** See *Duct*. **B., Duct of.** See *Duct*. **B., Foramen of.** See *Foramina, Tab'le of*. **B., Glands of.** See *Gland*.
- Bartholinitis** (*bar-tho-lin-i'-tis*) [*Bartholin*, a Danish physician; *ιτις*, inflammation]. Inflammation of the vulvo-vaginal gland.
- Bartisch's Operation.** See *Operations, Table of*.
- Bartlett's Apparatus.** A splint or dressing for fracture of the clavicle with dislocation.
- Barton's Bandage.** See *Bandage*. **B. Fracture.** See *Fracture and Diseases, Table of*. **B. Handkerchief,** a form of temporary dressing for a wound. See *Handkerchief Dressing*. **B. Operations.** See *Operations, Table of*.
- Baruria** (*bar-ur'-e-ah*) [*βάρος*, heavy; *οὔρον*, urine]. Abnormally high specific gravity of the urine; also the condition of the body associated therewith.
- Barwell's Apparatus.** An apparatus for the treatment of talipes by means of continuous traction on the foot.
- B. Operations.** See *Operations, Table of*.
- Barwood Red.** See *Pigments, Conspectus of*.
- Baryacoia** (*bar-e-ak-oi'-ah*). See *Baryecoia*.
- Baryecoia** (*bar-e-ek-oi'-ah*) [*βαρυκοῖα*, hardness of hearing]. Hardness of hearing; partial deafness.
- Baryencephalia** (*bar-e-en-sef-a'-le-ah*) [*βάρης*, heavy; *ἐγκέφαλος*, brain]. Dulness of intellect.
- Baryglossia** (*bar-e-glos'-e-ah*) [*βάρης*, heavy; *γλῶσσα*, a tongue]. Thick, slow utterance.
- Barylalia** (*bar-e-lal'-le-ah*) [*βάρης*, heavy; *ῥαλῶν*, speech]. Thickness and dulness of speech; baryphonia.
- Barymastia** (*bar-e-mas'-te-ah*) [*βάρης*, heavy; *μαστός*, breast]. Same as *Barymazia*.
- Barymazia** (*bar-e-ma'-ze-ah*) [*βάρης*, heavy; *μαστός*, breast]. Heaviness or large size of the mamme.
- Baryodmia** (*bar-e-ad'-me-ah*) [*βάρης*, heavy; *ὀσμή*, odor]. A heavy, disagreeable odor; also a subjective sensation as of a disagreeable smell.
- Baryodynia** (*bar-e-a-din'-e-ah*) [*βάρης*, heavy; *ὀδὴν*, pain]. Severe pain.
- Baryphonia** (*bar-e-fo'-ne-ah*) [*βάρης*, heavy; *φωνή*, a voice]. A difficulty of speech.
- Baryphonic** (*bar-e-fon'-ik*) [*βάρης*, heavy; *φωνή*, voice]. Affected with baryphonia.
- Barysomatia** (*bar-e-so-ma'-she-ah*) [*βάρης*, heavy; *σῶμα*, body]. Excess in the weight of the body.
- Baryta**, or **Barytes** (*bar-i'-tah*, or *bar-i'-tes*) [*βάρης*, heavy]. Oxid of barium. See *Barium*. **B. Green.** Same as *Manganese Green*.
- Barythymia** (*bar-e-thim'-e-ah*) [*βάρης*, heavy; *θυμός*, mind]. A melancholy, gloomy, or sullen state of mind.
- Basaal** (*ba'-sa-al*) [Malay]. An East Indian tree, *Embelia basal*; its fruit is a vermifuge; its leaves are soothing and demulcent. Unof.
- Basad** (*ba'-sad*) [*βάσις*, a foundation]. Toward the basal aspect.
- Basal** (*ba'-sal*) [*βάσις*, a foundation]. Pertaining to or located at the base. See *Basilar*. **B. Ganglia.** See *Ganglion*.
- Basanastragala** (*bas-an-as-trag'-al-ah*) [*βάσανος*, torture; *ἀστραγάλος*, heel, ankle]. Gout in the heel or ankle.
- Basculation** (*bas-ku-la'-shun*) [Fr., *basculer*, to swing]. The movement by which retroversion of the uterus is corrected when the fundus is pressed upward and the cervix drawn downward.
- Bascule Movement** (*bas'-kul moov'-ment*) [Fr., *bascule*, a swing]. The recoil of the heart in its systolic motion.
- Base** (*bās*) [*βάσις*, a foundation]. The lower part, as, the base of the brain. In chemistry, an element or radical that combines with an acid to form a salt. The electro-positive molecule or radical of a compound. In dentistry, the plate upon which artificial teeth are held. In pharmacy, the most important part of the prescription.

In microscopy, the portion of the stand of a microscope upon which it rests. It is important for steadiness. In electro-therapeutics, the part of a battery upon which are fastened the coil-posts and switches. **B.**, for **Artificial Teeth**; in the construction of a base for artificial teeth, a transfer or model of plaster-of-Paris is first obtained. Then a metallic die and counter-die, if the base is to be of metal, are procured, and between these a plate of suitable size and thickness is swaged. See *Metallic Base* and *Vulcanite Base*. **B.**, **Organic**, a term including a large number of organic compounds, especially nitrogen compounds, which, like ammonium, unite with acids to form salts. They are commonly called *alkaloids*.

**Base-ball Pitcher's Arm**, a peculiar condition of the arm arising from over-use, characterized by loss of strength, tenderness, neuralgic pains, and inflammation and hypertrophy of the bone.

**Basecephysis** (*bas-ek'-fiz-is*) [*βάσις*, a base, a foot; *ἐκρῖσις*, a growing out, a shoot]. In biology, a branch springing from the basal joint, as in the limbs of crustacea. Synonyms *Exognathite*, *Exopodite*.

**Basedow's Disease**. An exophthalmic bronchocele; called also, Exophthalmic Goiter, and Graves' Disease. See *Goiter and Diseases*, *Table of*.

**Basement** (*bās'-ment*) [Fr., *basement*]. The fundamental portion. **B. Membrane**. See *Membrane*. **B. Tissue**. See *Tissue*.

**Bas Fond** (*bah fon(g)*) [Fr.]. The floor of the urinary bladder.

**Basham's Mixture**. *Mistura ferri et ammonii acetatis*. **B. Test**. See *Tests*, *Table of*.

**Basial** (*bā'-ze-al*) [*βάσις*, a foundation]. Relating to a base, as to the basion.

**Basi-alveolar** (*ba-se-al-ve'-o-lar*) [*βάσις*, foundation; *alveolus*, a little trough]. Relating to the basion and the alveolar point.

**Basiarachnitis** (*ba-se-ar-ak-ni'-tis*) [*βάσις*, foundation; *ἀράχνη*, a spider; *ιτις*, inflammation]. Inflammation of that part of the arachnoid that corresponds to the base of the skull.

**Basiator** (*ba-ze-a'-tor*) [*basiare*, to kiss]. The orbicularis oris muscle. See *Muscles*, *Table of*.

**Basibracteolate** (*ba-se-brak'-te-o-lat*) [*basis*, a base; *bracteola*, a little bract]. In biology, having the base surrounded by bracts, as the dandelion.

**Basibranchial** (*ba-se-brang'-ke-al*) [*basis*, a base; *branchia*, gills]. In biology, applied to the one or more skeletal pieces forming the base of gills or branchiae.

**Basic** (*bā'-sik*) [*βάσις*, a foundation]. Having properties the opposite of those of acids. An acid capable of uniting with a single monad atom or radical is called *monobasic*. One that will unite with two monad or one dyad atom or radical, etc., is said to be *dibasic*. This measure of the power of an acid is called its *basicity*. **B. Blue**. Same as *Spirit Blue*.

**Basicerite** (*bas-is'-er-it*) [*βάσις*, base; *κέρας*, horn]. The second joint of the antenna in a crustacean.

**Basicity** (*bas-is'-it-e*) [*βάσις*, foundation]. 1. The quality of being basic. 2. The combining power of an acid.

**Basicranial** (*ba-se-kra'-ne-al*) [*βάσις*, foundation; *κρανιον*, the skull]. Relating to the base of the skull.

**B. Axis**, a line running from a point midway between the occipital condyles through the median plane to the junction of the ethmoid and presphenoid.

**Basidigital** (*ba-se-dij'-it-al*) [*βάσις*, foundation; *digitus*, a finger]. Pertaining to the bases of the digits. **B. Bone**, any metacarpal, or metatarsal bone.

**Basidiogenetic** (*bas-id-e-o-je-n-el'-ik*) [*basidium*, a spore-producing cell; *γενεσις*, origin]. In biology, produced on a basidium.

**Basidiospore** (*bas-id'-e-o-spōr*) [*basidium*, a spore-producing cell; *σπορά*, seed]. One of the spores produced upon a basidium.

**Basidium** (*bas-id'-e-um*) [dim. of *βάσις*, a base: *pl.*, *Basidia*]. In biology, a large cell in the higher fungi, borne on the hymenium and producing spores at its free end.

**Basifacial** (*bas-e-fa'-shal*) [*basis*, foundation; *facies*, face]. Pertaining to the lower portion of the face.

**B. Axis**, in craniometry, a line from the anterior point of the premaxilla to the anterior point of the basiscranial axis.

**Basifixed** (*ba'-se-fikst*) [*basis*, base; *fixus*, fixed]. In biology, attached by the base.

**Basifugal** (*bas-ij'-u-gal*) [*basis*, a base; *fugere*, to flee]. In biology, derived from, or proceeding away from the base; acropetal; centrifugal.

**Basigynium** (*bas-ij-in'-e-um*) [*βάσις*, a base; *γυνή*, a female: *pl.*, *Basigynia*]. See *Gynophore*.

**Basihyal** (*bas-e-hil'-al*) [*basis*, base; *ὑποθήκη*, shaped like the letter upilon]. Either one of the two bones, one on each side, that form the principal part of the body of the hyoid arch.

**Basihyoid** (*bas-e-hil'-oid*). See *Basihyal*.

**Basil** (*bā'-sil*) [*βασίλικός*, royal]. A kind of mint, *Ocimum basilicum*; aromatic and carminative. The name is given to other related plants. Unof.

**Basilad** (*bā'-il-ad*) [*βάσις*, foundation]. Toward or to the base or basilar aspect.

**Basilar** (*bā'-il-ar*) [*βάσις*, base]. Pertaining to the base, usually of the skull. **B. Artery**, the artery extending between the borders of the Pons Varolii; through its branches it supplies the substance of the pons. See *Arteries*, *Table of*. **B. Aspect**, the view of the head looking toward the base of the skull. **B. Membrane**, a membranous division-wall separating the scala vestibuli from the scala tympani, extending from the base to the apex of the cochlea, and supporting the organ of Corti. **B. Process**, a strong quadrilateral plate of bone in front of the foramen magnum. **B. Suture**, the suture formed by the junction of the basilar surface of the occipital bone with the posterior surface of the body of the sphenoid.

**Basilary** (*bā'-il-a-re*). See *Basilar*.

**Basilateral** (*bas-e-lat'-er-al*) [*basis*, base; *latus*, side]. Both basilar and lateral.

**Basilen** (*bā'-il-en*) [*basis*, base]. Belonging to the basilar portion in itself.

**Basilic** (*bas-il'-ik*) [*basilicus*; *βασίλικός*, royal]. Any structure or medicine of importance (obsolescent). **B. Vein**, a large vein of the arm on the inner side of the biceps. See *Vein*.

**Basilicon Ointment** (*bas-il'-ik-on oin'-ment*). An ointment composed of yellow wax, yellow resin, and Burgundy pitch aa 1 lb., olive oil fl. 5 xvj, to which, when melted, turpentine 5 iij are added. It is called also the "four drug" ointment. There are several other ointments bearing this name. See *Resina*.

**Basilo-bregmatic** (*bas-il-o-breg-mat'-ik*) [*βάσις*, foundation; *βρεγμα*, the sinciput]. Pertaining to the base of the skull and the bregma.

**Basilo-mental** (*bas-il-o-men'-tal*) [*basis*, base; *mentum*, the chin]. Pertaining to the base of the skull and to the chin.

**Basil-thyme** (*bā'-sil-tim*) [*βασίλικόν*, royal; *θύμον*, thyme]. A European species of mint, *Calamintha acinos*; aromatic and calmative. Unof.

**Basilysis** (*bas-il'-is-is*) [*βάσις*, base; *λύσις*, a loosening]. The breaking up of the fetal skull in craniotomy.

**Basilyst** (*bā'-il-ist*) [*βάσις*, a base; *λύσις*, a loosening]. An instrument for use in craniotomy, designed

to perforate the cranial vault and break up the base of the skull.

**Basin** (*ba'-sin*) [ME., *basin*]. 1. The third ventricle of the brain. 2. The pelvis. **B.-Trap.** A trap or seat in the outlet of the basin of a water-closet, placed there to prevent the entrance into the apartment of noxious and offensive vapors and gases.

**Basinasal** (*bas-e-na'-sal*) [*basis*, base; *nasus*, the nose]. Relating to the nasion and the nasion.

**Basinerved** (*bas'-in-er-ved*) [*basis*, a base; *nervus*, nerve]. In biology, applied to a leaf having all the veins or nerves springing from the base.

**Basi-occipital** (*bas-e-ok-sip'-it-al*) [*basis*, base; *occiput*, the back of the head]. A bone, separate in many of the lower vertebrate animals, forming the central axis of the skull. In adult human life, it is the basilar process of the occipital bone.

**Basiocestrum** (*bas-e-o-ses'-trum*) [*basis*, base; *κέστρον*, a point]. A perforator for use in opening the fetal head in craniotomy.

**Basio-glossus** (*bas-e-o-glos'-us*) [*basis*, base; *γλῶσσα*, the tongue]. That part of the hyoglossus muscle that is attached to the base of the hyoid bone.

**Basion** (*ba'-se-on*) [*basis*, base]. In biology, a point of measurement in craniometry, located at the middle of the anterior margin of the foramen magnum. See *Cranimetric Points*.

**Basioophthalmite** (*bas-e-off-thal'-mit*) [*basis*, a base; *ὀφθαλμός*, eye]. In biology, the basal joint of the eye-stalk in a stalk-eyed crustacean.

**Basiotic** (*bas-e-ot'-ik*) [*basis*, base; *οὖς*, ear]. Relating to the base of the ear.

**Basiotribe** (*bas'-e-o-trib*) [*basis*, base; *τρίβειν*, to grind or crush]. An instrument used in craniotomy for perforating or crushing the fetal head.

**Basiotripsy** (*bas-e-ot'-rip-se*) [*basis*, base; *τρίβειν*, to grind or crush]. The operation of crushing the fetal head.

**Basipetal** (*bas-ip'-it-al*) [*basis*, a base; *petere*, to seek]. In biology, applied to growth in plants from the apex toward the base.

**Basipodite** (*bas-ip'-o-dit*) [*basis*, base; *πούς* (*ποδ*), foot]. The basal joint of an arthropod limb, or the joint between the first and third.

**Basipterygial** (*bas-ip-ter-ij'-e-al*) [*basis*, a base; *πτερίγιον*, a little wing, a fin]. At the base of the fin.

**Basipterygoid** (*bas-ip-ter'-ig-oid*) [*basis*, base; *πτερίγιον*, a little wing]. Relating to the base of the alisphenoid bone.

**Basistroal** (*bas-e-ros'-tral*) [*basis*, a base; *rostrum*, a beak]. In biology, having to do with the base of a bird's beak.

**Basirrhinal** (*bas-ir-i'-nal*) [*basis*, base; *ῥίς*, nose]. Relating to the base of the brain and to the nose. Applied to a cerebral fissure located at the base of the olfactory lobe.

**Basis** (*bi'-sis*) [*basis*, base]. Base, *q. v.* The Latin form is used to designate the lower or fundamental part of any organ, as *B. cerebri*, *B. cordis*, etc.

**Basiscopic** (*bas-is-kop'-ic*) [*basis*, base; *σκοπεῖν*, to see]. Looking toward or on the side of the base.

**Basio-sphenoid** (*bas-e-sfi'-noid*) [*basis*, base; *σφῆν*, wedge; *εἶδος*, form]. The lower part of the sphenoid bone.

**Basosylvian** (*bas-e-sil'-ve-an*) [*basis*, base; *Sylvius*, an anatomist]. Applied by Wilder to the transverse basilar portion or stem of the Sylvian fissure. See *Fissure, Table* (and *Diagram*).

**Basitemporal** (*bas-e-tem'-po-ral*) [*basis*, base; *tempora*, the temples]. Relating to the base or lower part of the temporal bone.

**Basivertebral** (*bas-e-ver'-te-bral*) [*basis*, base; *verte-*

*bra*, a joint]. Relating to the basis or centrum of a vertebra.

**Basophile** (*bas'-o-fil*). See *Basophilous*.

**Basophilic** (*bas-o-fil'-ie*) [*βάσις*, base; *φιλεῖν*, to love]. Combining readily with bases; stainable by means of basic dyes.

**Basophilous** (*bas-off'-il-us*) [*βάσις*, base; *φιλεῖν*, to love]. Stained by basic rather than by acid dyes (applied to certain cells and tissue-elements).

**Bassalia** (*bas-a'-le-ah*) [*βάσσων-βάθος*, very deep; *ἅ α*, an assemblage]. In biology, a deep-sea realm distinguished by a characteristic fauna.

**Bass-deafness** (*bas-deff'-nes*) [OF., *basse*, low; ME., *deffen*]. Deafness to certain bass-notes, the perception of the higher notes being retained.

**Bassia** (*bas'-e-ah*) [*Bassi*, an Italian botanist]. A genus of E. Indian and African sapotaceous trees. The mahua, *B. latifolia*, is cultivated in India for its edible flowers, which afford on distillation an alcoholic drink. *B. longifolia* and *B. butyracea* afford a sort of vegetable butter. The bark and leaves of these three species are used in rheumatism. Unof.

**Bassini's Operation.** See *Operations, Table of*.

**Bassora Gum** (*bas'-o-rah-gum*). An inferior gum, much used in adulterating tragacanth.

**Bassorin** (*bas'-o-rin*) [*Bassora*, an Asiatic city],  $C_6H_{10}O_5$ , or  $2C_6H_{10}O_5$ . A tasteless, odorless vegetable mucilage, insoluble in cold water, but rendered soluble by alkalis; it is found in gum tragacanth (of Bassora) and in cherry and plum gums. See *Carbohydrates, Table of*.

**Bast** (*bast*) [AS., *bast*, a lime-tree]. The inner bark of exogenous plants. The fibrous parts of the bark are used in making cordage, and have a limited use in surgery.

**Bastard** (*bas'-tard*) [*bastardus*, a bastard]. 1. Illegitimate. 2. In biology, having the appearance of being genuine.

**Bastards** (*bas'-turdz*) [*bastardus*, a bastard]. The name given to an impure sugar procured by concentrating molasses and allowing it to crystallize slowly in moulds.

**Bastelaer's Test.** See *Tests, Table of*.

**Bastose** (*bas'-tös*) [AS., *bast*, a lime-tree]. A combination of cellulose and lignin, comprising a complete bundle of fibers, as in jute, or merely a covering upon the unaltered cellulose.

**Basyl** (*ba'-sil*) [*βάσις*, base; *ἵγη*, principle]. The electro-positive constituent of any compound.

**Bat** (*bat*) [ME., *bat*]. An instrument of great delicacy employed by Dr. Marshall Hall for the detection of minute air-currents issuing from the lungs of those apparently dead.

**Bateman's Drops.** The *tinctura pectoralis*, N. F.; a weak tincture of opium, camphor, and catechu; a popular remedy in coughs.

**Bates's Operation.** See *Operations, Table of*.

**Bath** (*bath*) [AS.,  *bath*, a bath]. A bathing place or room. The medium in which the body is wholly or partly immersed. As therapeutic agents, baths are classified according as water, vapor, air, etc., is used; according to the temperature, as hot, temperate, cold, etc.; according to the end desired, as nutritional, medicinal, stimulant, etc. Special forms of bath are the moor, peat, mud-slime, pine-leaf, herb (hay, gentian, camomile, juniper, marjoram, etc.), urine, sand, tan, bran, malt, glue, soup, milk, whey, blood, wine, guano, starch, soap, acid, iron, sulphur, carbonic acid, compressed air, mustard, electric, etc. **B., Acid**, add 1½ ounces of nitric acid and 1 to 3 ounces of HCl to 30 gallons of warm water in a wooden or earthenware vessel, and immerse the patient in this for about 10 to

20 minutes. For a foot bath, add  $\frac{1}{2}$  ounce of nitric acid and 1 ounce of HCl to 4 gallons of warm water. This is said to be useful in cases of dyspepsia with sluggish liver and constipation. **B., Air**, a bath in which but little water is employed, the body being exposed freely to the air. It is employed in those cases in which there is a tendency to catch cold from undue facility to perspire. **B., Alcohol**, one in dilute alcohol, used to reduce temperature in fever. **B., Alkaline**, add 3 ounces of potassium carbonate, or 6 of sodium carbonate, to 25 or 30 gallons of hot water. It is used in chronic squamous skin diseases, chronic rheumatism, and lithemia. It should be taken in a wooden, earthenware, or enamelled bath. **B., Arsenical**, baths at a temperature of from 90° to 97° F., containing a small quantity of arsenic. They are used occasionally in the treatment of rheumatoid arthritis. **B., Blanket**, a method employed in chronic nephritis to stimulate the diaphoretic action of the skin. The patient is placed in bed and closely wrapped in blankets, a hot poultice being applied at the same time to the loins, and renewed as often as it becomes cool. **B., Blood**, one consisting of the blood of an animal, freshly shed. **B., Bog**, a bath formed by mixing bog-earth (generated by the decomposition of plants in the presence of water and found at iron and sulphur springs) with warm water to form a pulpy or mushy consistence. This is used as a mud bath. **B., Borax**, borax, 4 ounces; glycerin, three ounces; water, thirty gallons. It is used in the same class of cases as the bran bath. **B., Bran**, boil one pound of bran in one gallon of water, strain, and add thirty gallons of water. This is a soothing and emollient bath, and is of service in squamous and irritable conditions of the skin. **B., Brand**; Cold bath. The tub is filled with water of 68°. The patient is given a stimulant of one-half to two ounces of brandy, the face and chest are laved with ice-water, and then he is gently placed in the water. The attendants should gently pass the flattened out-stretched hands over successive parts of the body to dilate the superficial cutaneous vessels. Remove the patient as soon as the teeth begin to chatter, or if cyanosis of the lips or face appears. Usually the bath should be continued fifteen minutes. Then the patient is laid wet on a sheet and quickly wrapped from head to foot, then dried in five minutes and hot water applied to the feet. See *Treatment, Methods of*. **B., Chemical**, in chemistry, an apparatus for regulating the temperature of chemical processes by surrounding the substance with water, sand, oil, or mercury, through which the heat is communicated. **B., Cold**. See *B., Brand*. **B., Corrosive-sublimate**, made by adding mercuric chlorid three drams, and HCl one dram, to 30 gallons of water. It is sometimes of service in secondary syphilis and in certain skin-diseases. **B., Creasote**, composed of creasote three drams, glycerin four ounces, and water 30 gallons. It is used in squamous skin diseases. **B., Electro-therapeutic**, a bath furnished with suitable electrodes and used in the application of electricity for curative purposes. **B., Foot**, a bath for the feet only. This is used as a derivative agent in cases of cold, etc. **B., Full**, this consists of a tub about two-thirds full of water, the duration and temperature being adapted to the purpose in view. The patient's body may be entirely covered by water, so that his chin just clears it. **B., Gelatin**, dissolve one pound of common glue in hot water, and add the solution to the plain bath, or to the bran bath, and use in the same class of cases as the latter. **B., Graduated Full**, a modification of the Brand bath.

The tub is filled with sufficient warm water to cover two-thirds of the recumbent body. The patient is then laid in and the temperature gradually lowered by the addition of cold or ice-water, while warm water is being removed. Friction is practised, as in the Brand bath. This bath lasts half an hour, and the water should be reduced to 68° as rapidly as possible. **B., Half**, the patient is seated in a tub containing eight or ten inches of water of a temperature suited to the case. A wet towel is tied around the head, and the bath water is poured and dashed over the back, head, and shoulders with the attendant's right hand, while friction is practised with the left, and the patient does the same on the anterior portion of the body. The temperature of the water may be lowered if a more decided impression is desired. The bath is continued for from five to twenty minutes with active friction. It is indicated in all fevers involving a depressed nervous system, as shown by ataxia, delirium, or coma. **B., Herb**, made by using the extract of pine-needles, or of some aromatic herbs. The bath is used as a tonic. **B., Hip**. See *B., Sitz*. **B., Hot**, the temperature ranges from 104° to 110° F. It acts upon the skin, producing free perspiration, and accelerates the pulse and respiration. **B., Hot-air**; Turkish bath; the patient is placed in a box (French method), his head being outside, and the box is filled with hot air furnished by a lamp. In the ordinary Turkish bath the patient is compelled to inhale the air within a closed compartment. Hot-air baths can be borne of a much higher temperature than vapor baths. They provoke more profuse sweating, and raise the temperature of the body to a greater extent. They are useful as a diaphoretic, and in catarrhal, neuralgic, and rheumatic conditions. They are contraindicated, as is also the vapor bath, in fatty degeneration of the heart. **B., Iron**, half an ounce of sulphate of iron to four gallons of water. Use in an earthenware or wooden vessel. This is valuable for strumous or rachitic children. **B., Medicated**, a bath in which medicinal substances, as mineral salt, sulphur, etc., are dissolved or held in suspension. **B., Mercurial**, for the treatment of syphilis. Calomel, 20 to 60 grains, or a mixture of 15 grains of calomel and 20 grains of cinnabar are fused over a water bath. The patient is stripped and enveloped in one or more blankets, or a mackintosh or India-rubber blanket lined with flannel. The lamp and mercury are placed under his chair, and the former lighted. In a few minutes perspiration is induced and the sublimed calomel is deposited upon the body. Twenty to thirty minutes are sufficient for a bath, after which the patient is allowed to cool off slowly. This is best taken before retiring. **B., Milk**, a bath in milk, for nutritive purposes. **B., Moor**, a bath in water mixed with the earth of moors. **B., Mud**, a bath prepared by mixing well-seasoned earths, containing more or less mineral matter, with water containing the same substances. The body is surrounded with this mixture at various temperatures from 70° to 100°. The patient is then rinsed with warm water. This is of value in some uterine diseases, and in obstinate rheumatism. **B., Mustard**, made by enclosing two to four ounces of ordinary mustard in a piece of muslin or thin linen and hanging it in about four gallons of hot water until the latter becomes yellow. It is used as a general bath for infants in collapse, convulsions, or severe bronchitis, the child being left in until the skin becomes distinctly reddened. It is also used as a foot or sitz-bath in amenorrhœa. **B., Pack**, or *Sheet*, one in which the body is wrapped in cloths. **B., Permanent**. See *B., Warm*. **B., Pine**, prepared by adding a decoction

of pine-needles, or some pine extract, to hot water. It is mildly stimulating, and is employed in hysteria, gout, and rheumatism. **B., Rain**, consists of from four to six three-fourths circles of pipes secured together at a distance of two to three inches. Each pipe has three lines of fine perforations, from which the stream issues under pressure, striking the body of the patient at all points with considerable force. This may be used as a substitute for the dripping sheet. **B., Russian**, one in which the air of the room is saturated with steam by throwing water upon heated mineral or metallic substances, after which the bather is rubbed down, finishing with a cold douche. See *B., Vapor*. **B., Sand**, the body of the patient is surrounded in a tub with a layer of dry, warm sand that has been naturally or artificially heated, the temperature ranging from 95° to 120°. The duration of the bath is from one to one and a half hours. The head is wrapped in a wet towel and permitted to lie outside of the sand. The after-treatment is the same as that after a hot-air bath. This is of value as an emollient procedure. In chemistry, the immersion of a crucible, etc., containing a chemic compound in a vessel containing fine sand, the latter being heated gradually to a high temperature. **B., Sea-water**, more stimulating and tonic in its effects than fresh water. It may be given cold, tepid, or hot. It may be made away from the seashore by dissolving bay-salt or rock-salt in fresh water, four to nine pounds of salt to 30 gallons of water. It is useful in convalescence, chlorosis, and strumous diseases. **B., Sheet**, the application of cold water to the body through the medium of a sheet or towel of fine or coarse texture, placed upon the skin. The patient is wrapped in a linen sheet, wrung not quite dry out of water at a temperature of from 65° to 70°. A rubber cloth and a blanket are spread over the bed to protect it. As the sheet dries small quantities of water are poured with one hand from a vessel or sponge upon a limited part of the body, beginning with the chest. With the other extended hand rapid passes are made over this spot until it becomes a little warmer. Successive parts of the body are thus treated except the forearms, hands, feet, and legs. The patient is then dried and made comfortable. This is applicable in all febrile affections with high temperatures, except in chest or abdominal diseases. **B., Shower**, a familiar form of the douche. The water is delivered from a nozzle with numerous perforations, that may be attached to a hose, striking the body in a divided stream. **B., Sitz**, the patient sits in the tub with the feet outside upon a raised surface and blanket, so that the popliteal spaces are not encroached upon by the edge of the tub. The water should reach the umbilicus. It is useful in obstinate diarrhea, menorrhagia, subinvolution of the uterus, and pelvic inflammations. **B., Slime**, a bath in water mixed with the slimy deposit of organic matter found in rivers or ponds. **B., Sponge**, one in which the patient's body is rubbed with a sponge and water. It is used to reduce temperature. **B., Starch**, starch, one pound; water, 30 gallons. This is used as the bran bath. **B., Sulphur**, potassium sulphid four to eight ounces in 30 gallons of water; a little sulphuric acid may be added. It is used in certain skin diseases, scabies, lead colic, and lead palsy. **B., Sulphurous-acid**, a means of applying the fumes of burning sulphur to the body. The patient is seated on a cane-bottomed chair, and a blanket or oil-cloth is thrown round him, the head remaining uncovered. On the floor beneath the chair is a pan containing a little water, and in this is placed a smaller vessel containing small pieces of sulphur. A little spirit of

wine is poured over this, and ignited, and sulphurous-acid gas is evolved. **B., Sun**, the therapeutic exposure of the naked body to the sun's rays. **B., Surprise**, an ancient and obsolete form of bath for insane and hysterical patients, who were unexpectedly plunged into cold water. **B., Tepid**, the temperature of the water ranges from 85° to 95° F. It acts mainly upon the skin as a sedative, cleansing, and detergent agent; the pulse, respiration, excretion, secretion, and temperature are practically unaffected. **B., Turkish**, one in which the bather is placed successively in rooms of higher temperature, then shampooed or rubbed, and finally stimulated by a douche of cold water. See *Bath, Hot-air*. **B., Vapor**; Russian bath; this may be given, as the Turkish bath, in a box, by permitting steam from a pipe to permeate it, providing for its escape, or the patient may inhale the vapor within a closed compartment, the whole surface being at the same time exposed to its influence. A higher temperature can be borne than in the hot-water bath, though for a shorter time. It is useful to provoke profuse perspiration. It should be followed by brisk frictions. **B., Warm**, the tub is filled with water at any temperature near that of the body, say 90° to 104°. The patient lies quietly in it, and obtains the effect of warmth, moisture, and water-pressure. It is used to calm the nervous system, produce sleep, and allay reflex instability. The *continuous warm bath*, called by Hebra the *permanent bath*, is made by suspending a sheet in the tub as a hammock. The patient lies upon this surrounded by water that is kept at an equable temperature (warm) by a proper arrangement of in-and-out-flow. It is used in the treatment of extensive burns and wounds. **B., Water**, a bath of water. It may be cold (60°-75°) or tepid (85°-95°), or hot. In chemistry, a bath of water for immersing vessels containing substances that must not be heated above the boiling-point of water. See *B., Mind*; *B., Sand*; *B., Sun*.

**Bathmic** (*bath'-mik*) [*βαθμός*, a threshold]. Relating to bathmism.

**Bathmis** (*bath'-mis*). See *Bathmos*.

**Bathmism** (*bath'-mizm*) [*βαθμός*, a threshold]. That supposed modification of chemical force which is active in the processes of nutrition.

**Bathmos** (*bath'-mos*) [*βαθμός*, *βαθμός*, a little fossa]. A shallow depression or fosset.

**Bathwort** (*bath'-wert*) [Corruption of *birthwort*]. The plant *Trillium erectum*; also *T. pendulum*; esteemed in domestic practice as deobstruent. Unof.

**Bathybius** (*bath-ib'-e-us*) [*βαθίς*, deep; *βίος*, life]. A name applied by Huxley to a sticky form of deep-sea ooze, formerly supposed by him to be a widely-extending sheet of living, primitive protoplasm.

**Bathycentesis** (*bath-e-sen-te'-sis*) [*βαθίς*, deep; *κεντρίσις*, puncture]. A deep surgical puncture; deep acupuncture.

**Bathystixis** (*bath-e-stiks'-is*) [*βαθίς*, deep; *στίξις*, puncture]. Deep acupuncture.

**Batiator** (*bat-e-a'-tor*). See *Vernonia nigritiana*.

**Batoir** (*bah-t'-var'*) [Fr., beater]. See *Percutor*.

**Batophobia** (*bat-o-fo'-be-ah*) [*βαθος*, a height; *φοβος*, fear]. 1. Acrophobia; dread of being at a great height. 2. Dread of high objects; fear of passing near a high building, or of going through a deep valley.

**Batrachoid** (*bat'-rak-oid*) [*βατραχος*, a frog; *ειδος*, form]. Frog-like.

**Batrachophagous** (*bat-rak-off'-ag-us*) [*βατραχος*, a frog; *φαγειν*, to eat]. In biology, frog-eating.

**Batrachophobia** (*bat-rak-o-fo'-be-ah*) [*βατραχος*, a frog; *φοβος*, fear]. Morbid dread of toads and frogs.

**Batrachoplasty** (*bat'-rak-ə-plas'te*) [*βατραχία*, a frog; *πλαστική*, to mold]. Plastic surgical operation for the cure of ranula.

**Batrachostomous** (*at' rak-əs'-tə-mus*) [*βατραχίος*, a frog; *στόμα*, mouth]. In biology, frog mouthed.

**Batrachus** (*bat'-rak-us*) [*βατραχίος*, a frog]. Ranula.

**Battalism** (*bat'-al-izm*). See *Battarism*.

**Battarism** (*bat'-ar-izm*) [*βαταρισμός*, a stuttering]. Stuttering or stammering.

**Battery** (*bat'-er-ē*) [*batteria*, a beating; battery]. A series of two or more pieces of apparatus arranged to produce increased or multiple effect, as battery of boilers, prisms, lenses, galvanic cells. Usually applied to a series of cells producing electricity (voltaic or galvanic battery); also, frequently to a single cell. **B.**, **Primary**, the combination of a number of primary cells so as to form a single battery. **B.**, **Secondary**, the combination of a number of storage cells to form a single electric source. The following table shows the materials used in the more important batteries, and the electro-motive force (E. M. F.) in volts. Storage or secondary batteries are not included in the table. The common form of these is a series of lead plates carrying masses of lead oxid.

GRENET CELL FOR THERAPEUTIC APPARATUS.

## NAMES, ELEMENTS, FLUIDS, ETC., OF THE PRINCIPAL BATTERIES.

| NAME OF CELL.                  | POSITIVE ELEMENT.                 | NEGATIVE ELEMENT.       | EXCITING AGENT.                          | DEPOLARIZING AGENT.                         | E. M. F. IN VOLTS. |
|--------------------------------|-----------------------------------|-------------------------|--|---|--------------------|
| Bunsen.                        | Zinc.                             | Carbon.                 | Sulphuric acid, dilute.                  | Nitric acid.                                | 1.75 to 1.96       |
| Beetz.                         | Zinc.                             | Copper.                 | Zinc sulphate in plaster of Paris.       | Copper sulphate, in plaster of Paris.       | 1.04               |
| Callaud.                       | Zinc.                             | Copper.                 | Solution of zinc sulphate.               | Cupric sulphate.                            | 1.0 to 1.14        |
| Daniel.                        | Zinc.                             | Copper.                 | Zinc sulphate.                           | Cupric sulphate.                            | 1. to 1.14         |
| Edison-Lalande.                | Zinc.                             | Cupric oxid and carbon. | Potassium hydroxid.                      | Cupric oxid.                                | 0.75               |
| Fuller.                        | Zinc.                             | Carbon.                 | Zinc chlorid.                            | Potassium dichromate and hydrochloric acid. | 1.5                |
| Gravity. See <i>Cull and</i> . |                                   |                         |  |   |                    |
| Gaiffe.                        | Zinc.                             | Silver.                 | Zinc chlorid.                            | Silver chlorid.                             | 1.02               |
| Grenet.                        | Zinc.                             | Carbon.                 | Sulphuric acid and potassium dichromate. | Chromic acid.                               | 2.0                |
| Grove.                         | Zinc.                             | Platinum.               | Sulphuric acid, dilute.                  | Nitric acid.                                | 1.94 to 1.97       |
| Latimer Clark.                 | Zinc.                             | Mercury.                | Mercuric sulphate.                       | Mercuric sulphate.                          | 1.436              |
| Leclanché.                     | Zinc.                             | Carbon.                 | Ammonium chlorid.                        | Manganese dioxid.                           | 1.42               |
| Lelande<br>Chaperone           | Zinc.                             | Copper or iron.         | Potassium hydroxid.                      | Cupric oxid                                 | 0.98               |
| Maische.                       | Zinc scraps in a bath of mercury. | Platinized carbon.      | Common salt solution.                    | None separate.                              | 1.25               |
| Marié Davy.                    | Zinc.                             | Carbon.                 | Sulphuric acid, dilute.                  | Mercuric sulphate.                          | 1.52               |
| Maynooth.                      | Zinc.                             | Iron.                   | Sulphuric acid, dilute.                  | Nitric acid (strong).                       |                    |
| Niaudet.                       | Zinc.                             | Carbon.                 | Common salt solution.                    | Chlorated lime.                             | 1.63               |
| Poggendorf.                    | Zinc.                             | Carbon.                 | Potassium dichromate and sulphuric acid. | Chromic acid.                               | 1.98               |
| Schanschieff.                  | Zinc.                             | Carbon.                 | Mercurial solution.                      | None separate.                              | 1.56               |
| Scrivanoff.                    | Zinc.                             | Silver.                 | Potassium hydroxid.                      | Silver chlorid.                             | 1.5                |
| Smee.                          | Zinc.                             | Platinized silver.      | Sulphuric acid, dilute.                  | None.                                       | 0.5 to 1.0         |
| Walker.                        | Zinc.                             | Platinized carbon.      | Sulphuric acid, dilute.                  | None.                                       | 0.66               |
| Warren de la Rue.              | Zinc.                             | Silver.                 | Ammonium chlorid.                        | Silver chlorid.                             | 1.05               |

**Battey's Operation.** See *Operations, Table of*.

**Battledore** (*bat'-l-dor*) [ME., *batyldore*]. An instrument shaped like a racket. **B. Hands.** See *Acromegaly*. **B. Placenta**, one in which there is a marginal insertion of the cord.

**Battology** (*bat-ol'-o-je*) [*βαττολογία*, a vain repetition]. The idle or meaningless repetition of words.

**Baudelocque's Diameter.** In obstetrics, the external conjugate diameter of the pelvis. **B. Method.** See *Treatment, Methods of*.

**Bauden's Apparatus.** See *Seutin's Apparatus*. **B. Law.** See *Law*. **B. Operations.** See *Operations, Table of*.

**Bauer's Apparatus**, an apparatus for extending the leg in hip-disease. The extension may be varied by means of a rack-and-pinion arrangement.

**Bauhin, Valve of.** The ileo-cecal valve.

**Bauhin's Glands.** See *Gland*.

**Baum's Operation.** See *Operations, Table of*.

**Baunscheidt's Method.** See *Treatment, Methods of*.

**Baunscheidtism** (*baw'n'-shit-izm*). [Named from *Baunscheidt*, the inventor]. A mode of treating rheumatism or other chronic neuralgias by counter-irritation, the latter being produced by pricking the exterior of the part affected with fine needles dipped in oil of mustard, formic acid or other irritant.

**Bavarian** (*bav'-a'-re-an*) [*Bavaria*]. Pertaining to Bavaria. **B. Blue.** See *Pigments, Conspectus of*. **B. Splint**, a variety of immovable dressing in which the plaster is applied between two flannel cloths.

**Bay-berry** (*bay'-ber-e*) [ME., *bay*; *bery*]. 1. The berry of the *Laurus nobilis*, bay, or noble laurel. 2. The wax-myrtle, *Myrica cerifera*, and its fruit. See *Myrica*. 3. The pimento, or allspice. **B. Rum** and **B. Oil of.** See *Myrica*. **B. Tree**, the *Laurus nobilis*; also *Prunus laurocerasus*; commonly called the laurel and the cherry laurel. **B. Aqua Laurocerasi.** See *Acid Hydrocyanic, Dilute*.

**Baycuru** (*bi-koo'-roo*) [native S. A.]. The root of a S. American plant, *Statice braziliensis*, one of the most powerful astringents known. It is used for ulcers of the mouth and for glandular enlargements. Dose of the fld. ext., ℥v-xxx. Unof.

**Bayer's Test.** See *Tests, Table of*.

**Baynton's Bandage.** See *Bandage*.

**Bazin** (*ba'-zin*). Synonym of *Molluscum contagiosum*.

**Bazin's Disease.** See *Diseases, Table of*.

**Bdella** (*del'-ah*) [*βδέλλα*, a leech]. A leech. See *Hirudo*.

**Bdellatomy** (*del-at'-o-me*). See *Bdellotomy*.

**Bdellium** (*del'-e-um*) [Heb., *b'dolach*]. A resinous gum exuding from various species of *balsamodendron*. **B., Indian**, somewhat valuable as an emmenagogue.

**Bdellometer** (*del-om'-et-er*) [*βδέλλα*, a leech; *μέτρον*, a measure]. A mechanical substitute for the leech, consisting of cupping glass, scarificator, and exhausting syringe.

**Bdellotomy** (*del-ot'-o-me*) [*βδέλλα*, a leech; *τομή*, a cut]. The opening with the knife of the body of a leech that is drawing blood; by this means the activity of the leech may be considerably prolonged.

**Bdelygmia** (*del-ig'-me-ah*) [*βδέλγμια*, disgust]. Abnormal disgust for food. That which is abhorrent or repulsive.

**Beaded Hair.** Synonym of *Monilethrix*.

**Beads, Rhachitic.** "Rhachitic rosary;" the so-called "beading of the ribs" in rickets; a succession of visible and palpable swellings at the points where the ribs join their cartilages.

**Beak** (*bek*) [ME., *becke*]. 1. The mandibular portion of a forceps. 2. The lower end of the calamus scriptorius. 3. The pad or splenium of the callosum. 4.

In biology, the rostrum, snout, or some corresponding part of an animal. The apex of a bivalve, or the cannular lips of a univalve shell.

**Beaker** (*be'-ker*) [ME., *biker*]. A wide-mouthed glass vessel much used in chemic laboratories. **B. Cells.** See *Cell*.

**Beale's Cold-flowing Fluids.** For injecting tissues.

(a) *Blue*: Dissolve 0.777 gm. of potassium ferrocyanid in 30 c. c. of glycerin; mix 3.6 c. c. of tinct. ferri chlor. with 30 c. c. of glycerin; add the iron mixture, drop by drop, to the potassium ferrocyanid solution. Then add to this mixture 5.5 c. c. of methylic alcohol, 30 c. c. of alcohol, and 88 c. c. of water, shaking strongly. (b) *Acid Glycerin Fluid*: Dissolve 0.194 gm. of potassium ferrocyanid in 30 c. c. of strong glycerin; to 30 c. c. of strong glycerin add 10 drops of tincture ferri chlor. Add the latter, drop by drop, to the former, with constant shaking. Then add 30 c. c. of water, to which 3 drops of HCl have been added. This fluid flows well and does not exude from the capillaries. (c) *Carmin*: Mix 1 gm. of pulverized carmin with a little water and sufficient ammonia to dissolve the carmin; add 50 c. c. of glycerin and shake well. Then add gradually, with constant shaking, 100 c. c. of glycerin, acidulated with 25 to 30 drops of HCl or acetic acid. Test the fluid with litmus paper, and if not decidedly acid add a few more drops of acid. Then add 25 c. c. of alcohol and 75 c. c. of water. See *Stains, Table of*. **B. Solution**, for staining histologic preparations. It consists of carmin, 1 gm.; ammonia, 3 c. c.; glycerin, 96 c. c.; distilled water, 96 c. c.; alcohol, 95 per cent., 24 c. c. Dissolve the carmin in the ammonia with the aid of heat, boil for a few moments, and allow to cool. After the odor of ammonia has disappeared add the glycerin, water, and alcohol, and filter. If, after standing for some time, the carmin precipitates, add a few more drops of ammonia.

**Bean** (*bên*) [ME., *bene*]. The seeds of several plants, mostly *Leguminosae*, especially that of the common bean, *Faba vulgaris*. In biology, the rounded, white, fleshy, saccular termination of the *ductus ejaculatorius* in the drone bee. **B. of St. Ignatius.** See *Ignatia*. See also *Tonka, Vanilla, Castor oil*, etc.

**Bearberry** (*bâr'-ber-e*). See *Uva ursi*.

**Beard** (*berd*) [ME., *berde*]. The hair on the lips, cheeks and chin of adult men. On women, a beard is of rare occurrence, and is sometimes accompanied by other characteristics proper to the male sex.

**Bearing-down.** The feeling of weight or pressure in the pelvis in certain diseases. **B.-d. Pains**, uterine pains in labor. **Bearing-seat**, a variety of the *Apron of Succor*, q. v.

**Bear's-foot.** Leaf cup. A composite-flowered plant, *Polymnia uedalia* of N. America. A popular remedy for enlargement of the spleen, or the "ague-cake" of malarial regions. **B. Ext.** Dose gr. ss-j. **B. Fld. Ext.** Dose ℥ij-x. **B. Infus.**, ʒj of an ʒj to Oj. Unof.

**Beat** (*bêt*) [ME., *beten*]. The pulsations of the blood in the arteries, or the impulse of the heart. See *Pulse*.

**Beaten Woman's Herb.** The European plant, *Tamus communis*; so called from its vulnerary qualities. See *Tamus*.

**Beating** (*bêt'-ing*). See *Tapotement*.

**Beaufils's Operation.** See *Operations, Table of*.

**Beauperthuy's Method.** A method of treating leprosy by bathing with olive oil, the internal administration of mercuric chlorid, abstinence from salted meats, and good hygiene.

**Bebeerin** (*be-be'-rin*). See *Nectandra* and *Barine*.

**Bebeeru Bark** (*be-be'-ru*). See *Nectandra*.

**Beccabunga** (*hek-ah-bun-j'ah*). A plant of Europe, *Veronica beccabunga*, formerly much prized in medicine. See *Veronica*.

**Beccaria, Test of.** See *Tests, Table of*.

**Bêche-de-mer** (*bash'-de-mar*) [Port. *bicho-do-mar*, sea-worm]. The smoked and dried bodies of *Holothuria argus*, a sea-slug; valued by the Chinese as a culinary delicacy, and as an aphrodisiac. Unof.

**Bechesthesis** (*hek-es'-thes-is*) [*βήξ*, cough; *αἰσθησις*, sensation]. The sensation in the throat or air-passages that prompts one to cough.

**Bechic** (*hek'-ik*) [*βήχικος*, from *βήξ*, a cough]. A remedy for a cough; an antibecheic.

**Bechorthopnea** (*hek-orth-op-ne'-ah*) [*βήξ*, cough; *ὀρθος*, straight; *πνεῖν*, to breathe]. Cough associated with orthopnea. A synonym of *Whooping-cough*.

**Bechous** (*hek'-us*) [*βήξ*, a cough]. Pertaining to or affected with cough.

**Bechterew's Nucleus.** The accessory auditory nucleus.

**Becker's Test.** A test for astigmatism, made by means of a set of parallel lines in triplets placed in various meridians.

**Beckmann, Method of.** A method for the determination of the depression of the freezing-point. A hard glass tube, from 2 to 3 cm. in diameter, with a lateral projection, is filled with from 15 to 20 grams of the solvent (weighed out accurately in centigrams), and closed with a cork in which are placed an accurate thermometer and a stout platinum wire serving as a stirring-rod. The lower part of the tube is attached by means of a cork to a somewhat larger, wider tube, which serves as an air-jacket. The entire apparatus projects into a beaker-glass filled with a freezing-mixture. Cold water will answer for glacial acetic acid and ice-water for benzene. The congealing-point of the solvent is determined by cooling this to from 1° to 2° below its freezing-point; then by agitation with the platinum rod (after addition of platinum dippings) the formation of crystals is induced. The thermometer rises. When the mercury becomes stationary, the reading indicates the freezing-point of the solvent. The mass is allowed to melt and an accurately weighed amount of substance is introduced through the lateral projection. When this has dissolved, the freezing-point is determined as before.

**Béclard's Hernia.** See *Diseases, Table of*. **B. Operation.** See *Operations, Table of*. **B. Suture.** See *Suture*.

**Becorthopnea** (*hek-orth-op-ne'-ah*). See *Bechorthopnea*.

**Becquerel's Pills.** Pills containing quinin, extract of digitalis and colchicum seeds, for use in gout.

**Becuiba** (*hek-we'-bah*) [native Brazilian name]. The tree *Myristica ficuhyba* of Brazil. Its nuts afford a "tallow," or balsam, useful in rheumatism and piles. Unof.

**Bed** (*bed*) [AS., *bedd*]. The couch or support on which the body may rest in sleep; usually a mattress of straw, hair, or similar substance. **B., Air,** a mattress of rubber or leather that can be inflated with air. **B.-bug** an apterous insect, *Cimex lectularius*, that infests filthy bedsteads, and at times is parasitic upon the human body. See *Cimex*. **B.-case**, a form of hysteria or hypochondriasis in which the patient, without cause, persistently remains in bed. **B.-pan**, a large shallow vessel for receiving the alvine discharges from bedridden patients. **B.-rest**, an apparatus for propping up patients in bed. **B.-ridden**, confined to bed. **B.-sore**, a sore produced on any projecting part of the body by prolonged pressure against the bed, and by nutritive changes in

paralyzed parts. **B., Water**, a rubber mattress containing water; it is used to prevent the formation of bed-sores.

**Bedegar, Bedeguar** (*bed'-e-gar*) [Ar., Pers., *bādāwar*, a white thorn]. An insect-made gall found on rose-bushes of various species. It is astringent, but is not now used in regular medicine.

**Bedlam** (*bed'-lam*) [ME., *bedlem*, a corruption of Beth-lehem]. A mad-house.

**Bedlamism** (*bed'-lam-izm*) [see *Bedlam*]. Insanity.

**Bedlamite** (*bed'-lam-it*) [see *Bedlam*]. A madman; an insane person.

**Bednar's Aphthæ.** See *Aphthæ*, and *Diseases, Table of*.

**Bedouin Itch.** A synonym of the vesicular variety of *Lichen tropicus*.

**Bee** (*be*) [AS., *br*]. A genus of insects belonging to the *Hymenoptera*, commonly used to designate the common Honey Bee, *Apis mellifica* (q. v.). **B.-bread**, a preparation of pollen with which bees fill certain cells. (The propolis, or hive-resin, is also incorrectly called bee-bread.) **B.-poison**, the irritating secretion discharged through the sting of the bee. See *Formic Acid*.

**Beech** (*bēch*). See *Fagus*.

**Beech-drop** (*bēch'-drop*). See *Cancer Root*.

**Beef** (*bēf*) [ME., *bēfc*]. The flesh of domestic cattle.

Good beef should be of red color, possess firm texture, and be free from unpleasant smell. Beef consists mainly of water 73, fibrin 15, gelatin 4, albumen, 3, fat and other substances 5 per cent. **B.-extract**, the soluble fibrin of lean meat partly desiccated. **B.-measles.** See *Cysticercus bovis*. **B.-tea**, the soluble extractive matter of beef, made by steeping finely-cut lean beef with its weight of water, and straining.

**Beer** (*ber*). See *Malt Liquors*. **B.-vinegar.** See *Vinegar*.

**Beer's Cataract Knife.** A knife with a triangular-shaped blade, for making section of the cornea in the removal of the crystalline lens. **B. Operations.** See *Operations, Table of*.

**Beeswax** (*bēz'-waks*). *Cera flava*: wax secreted by bees, of which their cells are constructed; ordinarily it is a mixture of cerotic acid, myricyl palmitic ester, heptacosane, hentriacontane, and several alcohols. The crude melted wax is a tough, compact mass of yellow or brownish color, granular structure, faint taste, and honey-like odor. When bleached it becomes white. Its specific gravity is .959 to .969; its melting-point 62° to 64° C. It is used in making candles, ointments, and pomades.

**Beet** (*bēt*). See *Beta*.

**Begbie's Disease.** See *Diseases, Table of*.

**Beggiatoa** (*bed'-je-at-o'-ah*) [after the Italian botanist, J. Beggiato]. A genus of arthrosporous bacteria founded by Trevisan (1833), consisting of swinging or gliding, milk-white, gray, rosy to violet threads. They decompose sulphur compounds, and store up sulphur granules in their protoplasm. They are found in stagnant, fresh, or salt water, particularly that contaminated by sewage or factory waste. See *Bacteria, Synonymatic Table of*.

**Begin's Operation.** See *Operations, Table of*.

**Begma** (*beg'-mah*) [*βήγμα*, a cough; *pl.*, *Begmata*]. A cough; the matter expectorated by coughing.

**Begonia** (*be-go'-n'-ah*) [after *Bégon*, a French savant]. An extensive genus of flowering-plants, mostly natives of warm regions. *B. octopetala* and *tomentosa*, of Peru, are astringent. *B. balsamiana*, of Mexico, and various other species are locally prized as alternatives. Unof.

**Beguan** (*beg'-wan*) [native S. America]. A bezoar obtained from the iguana, a large species of lizard.

**Behen-Nut** (*be'-hen nut*). The seed of *Moringa pterygosperma*, and *M. aptera*, trees of tropical countries. They afford Oil of Behen, or Oil of Ben.

**Behenolic Acid** (*be-hen-ol'-ik*). See *Acid*.

**Beindorff's Apparatus**. A furnace for boiling water, in use in pharmacies.

**Bela** (*be'-lah*) [Hind.]. The dried, half ripe fruit of *Aegle marmelos*, or Bengal quince. It is a valuable remedy for chronic diarrhea and dysentery. The ripe fruit is slightly laxative. Dose  $\frac{3}{4}$  ss-j. **B.**, **Ext.** Liq. (B. P.). Dose  $\frac{3}{4}$  j-ij. Unof.

**Belching** (*belch'-ing*) [ME., *belchen*]. The expulsion or throwing up of gas from the stomach. Eructation.

**Belemnoid** (*bel-em'-noid*) [*βελεινον*, a dart]. 1. Dart-shaped; styloid. 2. The styloid process of the ulna or of the temporal bone.

**Belenoid** (*bel'-en-od*). See *Belonoid*.

**Bell** (*bel*) [ME., *bel*]. A hollow, metal sounding-instrument. **B. gastrula**. See *Archigastula*. **B. Metal**, an alloy of copper, zinc, tin, and antimony. **B., Nerves of**. The external and internal respiratory nerves, etc. **B. Sound**, the sound produced in pneumothorax by striking a coin, placed flat upon the chest, by another coin. It can be heard through the stethoscope placed over the affected side.

**Bell's Disease**. See *Periencephalitis and Diseases*, Table of. **B. Law**. See *Law*. **B. Mania**. See *Periencephalitis and Diseases*, Table of. **B. Operations**. See *Operations*, Table of. **B. Palsy or Paralysis**. See *Diseases*, Table of.

**Belladonna** (*bel-ah-don'-ah*) [It., *belladonna*, beautiful lady]. Deadly Night-shade. A perennial plant of the order *Solanaceae*, indigenous to Southern Europe and Asia, and cultivated in the U. S. Its properties are due to two alkaloids, *atropin* and *belladonnin*, the latter thought to be identical with hyoscyamin. Both leaves and root are employed. It is a mild narcotic and anodyne and a powerful mydriatic; also an antispasmodic, and in small doses a cardiac, respiratory and spinal stimulant. It is valuable in the inflammation of rheumatism, in gout, and in neuralgia. Dose of the root and leaves gr. j. **B., Folia**, the leaves of belladonna. **B., Radix**, the root of belladonna. The preparations of the leaves are: **B., Extractum Alcoholicum**. Dose gr.  $\frac{1}{10}$ -j. **B., Tinct.**, 15 per cent. Dose  $\frac{1}{10}$  j-xxx. **B., Unguent.**, contains extract 10, dilute alcohol 6, benzoated lard 84 parts. From the root are prepared: **B., Abstracum**. Dose gr.  $\frac{1}{10}$ -j. Unof. **B., Emplastrum**, alcoholic ext. of leaves 20, resin-plaster 40, soap-plaster, 40. **B., Extractum Fluidum**. Dose  $\frac{1}{10}$  j-v. **B., Linimentum**, fluid extract 95, camphor 5. **B., Succus** (B. P.). Dose  $\frac{1}{10}$  v-xv. **B., Japanese**. See *Scopolia*. **Atropin sulphate**, an excellent antidote in opium-poisoning. **Lamellæ atropinæ** (B. P.), each containing of atropin  $\frac{1}{1000}$  grain. Liq. atropinæ sulphatis (B. P.). Dose  $\frac{1}{10}$  j-vj. **Unguentum atropinæ** (B. P.), grs. viij to the ounce. See *Atropin*. Dose gr.  $\frac{1}{1000}$ - $\frac{1}{10}$ . **Homatropin**. See *Atropin*.

**Belladonnin** (*bel-ah-don'-in*) [see *Belladonna*],  $C_{17}H_{23}NO_3$ . An alkaloid found in Belladonna. It resembles atropin, hyoscyamin, and hyoscin. It occurs with atropin, and is likewise decomposed into tropic acid and oxytropin ( $C_8H_{15}NO_3$ ). See *Belladonna*.

**Belleric** (*bel-er'-ik*) [Pers., *bahlah*]. A variety of myrobalan (*q. v.*); the fruit of *Terminalia fellerica*.

**Bellini, Ducts of**. See *Ducts*.

**Bellocq's Canula**. An instrument used in plugging the nares.

**Bellon** (*bel'-on*) [origin unknown]. Painter's (or lead) colic. See *Colic*.

**Bellows** (*bel'-oz*) [ME., *belowes*]. An instrument for

propelling air through a tube or small orifice. **B. and Blow-Pipe**, a circular bellows nine or ten inches in diameter, with a small gum-elastic tube, three or four feet in length, terminating in a tapering metallic tube, to be attached to a blow-pipe leading from it. The bellows is worked by the foot, while with the blow-pipe held in the hand, a jet of flame from a lamp may be projected on the object designed to be heated. **B. Murmur**, the *Bruit-de soufflé*, *q. v.*; also the funic or placental souffle.

**Belly** (*bel'-e*) [ME., *bely*]. See *Abdomen*. **B.-ache**. See *Colic*. **B.-bound**, vulgar for constipated. **B.-button**, the navel.

**Belmas's Operation**. See *Operations*, Table of.

**Beloid** (*be'-loid*) [*βελος*, an arrow]. Arrow-shaped or styloid.

**Belonephobia** (*bel-o-ne-fo'-be-ah*) [*βελωνη*, a pin; *φόβος*, fear]. A morbid dread of pins and needles.

**Belonoid** (*bel'-on-oid*) [*βελωνη*, a needle, bodkin]. Styloid; needle-shaped.

**Belt** (*belt*) [ME., *belt*]. A girdle about the waist. **B., Abdominal**, a broad, elastic belt worn about the abdomen as a support during pregnancy. **B., Magnetic**, a belt consisting of plates of metal fastened upon a strip of felt moistened with dilute acid. It is a cure-all largely sold by empirics.

**Ben**, or **Benne Oil** (*ben*, or *ben'-e*). Oleum balatinum, is obtained by expression from the seeds of the several species of *Moringia*. It is a colorless, odorless oil, not readily turning rancid. It is used by perfumers for extracting odors, and for lubricating clocks and light machinery. See *Behen-nut* and *Sesame*.

**Bence Jones's Albumin**. See *Albumin*.

**Bendas's Method**. See *Stains*, Table of.

**Bending** (*bend'-ing*) [ME., *bend*]. Active Swedish movements in which the body is bent or inclined in various directions in order to develop certain portions of the muscular system.

**Benedictine** (*ben-e-dik'-in*) [*benedicere*, to bless]. A liquor or cordial originally prepared by Benedictine monks, and distilled at Fécamp, in France. It much resembles chartreuse and trappistine.

**Benedikt, Syndrome of**. Paralysis of the muscles supplied by the oculo-motor nerves of one side and tremor and paresis of the upper extremity of the other side.

**Beng** (*beng*). See *Cannabis Indica*.

**Bengal** (*ben'-gal*) [Hind., *Bengāl*]. A province of India. **B. Quince**. See *Bela*. **B. Red**. Same as *Rose Bengale*.

**Bengalin** (*ben'-gal-in*) [Hind., *Bengāl*]. Same as *Couffier's Blue*.

**Benger's Food**. Partially digested and solidified beef-tea, used as a food for invalids.

**Benham, Gland of**. See *Gland*.

**Benham's Operation**. See *Operations*, Table of.

**Benign** (*be-nin'*), or **Benignant** (*be-nig'-nant*) [*benignus*, kind]. A term applied to medicines that are characterized by mildness. It is used chiefly to distinguish tumors that are not malignant (*q. v.*) or carcinomatous.

**Benjamin**, or **Gum Benjamin** (*ben'-jam-in*). See *Benzoin*.

**Bennett's Operation**. See *Operations*, Table of.

**Benson's Operation**. See *Operations*, Table of.

**Bent's Operation**. See *Operations*, Table of.

**Benzal** (*ben'-zal*). See *Benzylidene*. **B. Green**. Same as *Malachite Green*.

**Benzaldehyd** (*ben-zal'-de-hid*) [*benzoin*; *aldehyd*],  $C_7H_6O$ . Bitter-almond oil; a compound that results from the oxidation of benzyl alcohol; it is a colorless liquid with a pleasant odor, and boils at  $170^\circ$ ; its specific gravity is 1.050 at  $15^\circ$ . It is soluble in 30

- parts water, and is miscible with alcohol and ether. It is used in making benzoic acid as well as various pigments. **B. Green.** Same as *Malachite Green*.
- Benzaldoxin** (*ben-zal-doks'-in*),  $C_7H_5NO$ . A thick oil formed by the action of hydroxylamin upon benzaldehyd.
- Benzamid** (*ben'-zam-id*) [*benzoin*; *amid*],  $C_7H_7NO$ . A compound that results when benzoyl chlorid acts upon alcoholic ammonia. It is best obtained by heating benzoic acid and ammonium thiocyanate to  $170^\circ C$ . It crystallizes in pearly leaflets, melts at  $130^\circ$ , and boils near  $288^\circ$ ; it is readily soluble in hot water, alcohol, and ether. It may be regarded as the amid of benzoyl.
- Benzanilid** (*ben'-an'-il-id*) [*benzoin*; *anilin*],  $C_{13}H_{11}NO$ . Benzoyl-anilid, prepared by the action of benzoyl chlorid on anilin. It is used as an antifebrile in children, in doses of gr. iij-viii. Unof.
- Benzene** (*ben'-zen*) [*benzoin*],  $C_6H_6$ . A hydrocarbon contained in coal tar. It is formed by the dry distillation of all benzene acids. It is a mobile, ethereal-smelling liquid, of specific gravity 0.899 at  $0^\circ$ . It solidifies about  $0^\circ$ , melts at  $+6^\circ$ , and boils at  $80.5^\circ$ . It burns with a luminous flame. It readily dissolves resins, fats, sulphur, iodine, and phosphorus. It is the material from which anilin and the anilin colors are derived. **B.-sulphonic Acid**,  $C_6H_5SO_3H$ , is prepared by boiling together equal parts of benzene and  $H_2SO_4$ . It occurs in small plates, readily soluble in alcohol and water, and which deliquesce in the air. In its dry distillation the acid yields benzene phenylsulphone, and when fused with caustic potash phenol is produced.
- Benzidin** (*ben'-zid-in*) [*benzoin*],  $C_{12}H_{12}N_2$ . Diamidodiphenyl; a compound obtained by the action of tin and HCl upon the alcoholic solution of azo-benzene. Benzidin dissolves easily in hot water and alcohol, and crystallizes in silvery leaflets, melting at  $122^\circ$ .
- Benzil** (*ben'-zil*) [*benzoin*],  $C_{14}H_{10}O_2$ . A compound produced in the oxidation of benzoin with chlorin. It crystallizes from ether in large, six-sided prisms, melting at  $90^\circ$  and boiling at  $347^\circ$ .
- Benzimid** (*ben'-zim-id*) [*benzoin*; *amid*],  $C_{23}H_{18}N_2O_3$ . A compound formed by the action of hydrocyanic acid on hydrid of benzoyl. It occurs also in the resinous residue of the rectification of the oil of bitter almonds.
- Benzine** (*ben'-zin*). See *Benzinum*.
- Benzinum** (*ben'-zi'-num*) [*L.*; *gen.*, *Benzini*]. Benzene, Petroleum Ether. A purified distillate from American petroleum, having a specific gravity of .77 to .79, boiling at  $80^\circ$  to  $90^\circ C$ ., colorless, of ethereal odor, and a slightly peppermint-like taste. It is a valuable solvent for oils, fats, resins, caoutchouc, and some alkaloids. It is a vermicide against tapeworm. It should be distinguished from *Benzol*, which is called *Benzene* by English chemists. Dose gtt. v-x, on sugar or in mucilage.
- Benzoate** (*ben'-zo-at*) [*benzoin*]. Any salt of benzoic acid. **B. of Naphthol.** See *Benzo-naphthol*.
- Benzoated** (*ben'-zo-at-ed*) [*benzoin*]. Impregnated with benzoin or with benzoic acid.
- Benzoic** (*ben'-zo'-ik*) [*benzoin*]. Pertaining to or derived from benzoin. **B. Acid.** See *Acid*.
- Benzoin** (*ben'-zo-in* or *-zoin*) [origin obscure]. A resin obtained from *Styrax benzoin*, a tree native to Sumatra and Siam. It is also a ketone alcohol,  $C_{14}H_{12}O_2$ , and may be produced by oxidizing hydrobenzoin with concentrated  $HNO_3$ . It is sparingly soluble in water, cold alcohol, and ether, and crystallizes in shining prisms, melting at  $134^\circ$ . It is used as a remedy for bronchitis and in making court plaster. It occurs in tears consisting of several resins agglutinated by a balsam. It yields benzoic and cinnamic acids, is antiseptic and disinfectant, and is used mainly as a stimulant expectorant in chronic bronchitis. Sodium and potassium compounds are sometimes used in place of like salicylic acid compounds. **Adeps benzoïnatus**, benzoïnated lard, contains 2 per cent. of benzoin. **B., Tinct.**, 20 per cent. of the resin in alcohol. Dose 5 ss-j. **B., Tinct. Comp.**, Friar's Balsam, benzoin 12, aloes 2, styrax 8, balsam of Tolu 4, alcohol, q. s. ad 100 parts. Dose 5 ss-ij. **Benzoic Acid**,  $C_6H_5O_2$ , alcohol the best solvent. A constituent of opii, tinct. camphorat. Dose gr. x-xxv. *Trochisci Acidi Benzoici* (B. P.). *Unguentum Cetacei* (B. P.). See *Cetaceum*. **Ammonium Benzoate**, water the best solvent. Dose gr. v-xxx. **Bismuth Benzoate**, an antiseptic dressing for chancroid. **Lithium Benzoate**. Dose gr. v-xxx. **Sodium Benzoate**, water the best solvent. Dose gr. v-5 j.
- Benzol** (*ben'-zol*) [*benzoin*],  $C_6H_6$ . A hydrocarbon formed by the dry distillation of organic substances, but derived chiefly from coal-tar. It is inflammable and very volatile, and is an excellent solvent for grease. It is used internally to destroy epizoa. Its vapor is used in whooping-cough. Dose gtt. v-x. See, also, *Stains, Table of*. **B. Balsam.** See *Stains, Table of*. **B. Colors.** See *Conspectus of Pigments*, under *Pigment*.
- Benzo-naphthol** (*ben-zo-naf'-thol*) [*benzoin*; *vaïtha*, a kind of asphalt],  $C_{10}H_7O(C_6H_5O)$ . The benzoate of beta-naphthol, used as an intestinal antiseptic in typhoid fever and other intestinal diseases. Dose gr. ij to viij.
- Benzonitrile** (*ben-zo-ni'-tril*) [*benzoin*; *nitrum*, niter],  $C_6H_5N$ . Cyanbenzene; a compound isomeric with phenyl carbylamin. It is obtained from benzene sulphonic acid by distillation with potassium cyanid. It is an oil with an odor resembling that of oil of bitter almonds, and boils at  $191^\circ$ ; its specific gravity is 1.023 at  $0^\circ$ .
- Benzophenone** (*ben-zo-fe'-nôn*) [*benzoin*; *φοινξ*, purple-red],  $C_{13}H_{10}O$ . Diphenyl ketone; a compound obtained by distilling calcium benzoate. It is dimorphous, but generally crystallizes in large, rhombic prisms, melting at  $48-49^\circ$ , sometimes in rhombohedra, that melt at  $27^\circ$ . It has an aromatic odor and boils at  $295^\circ$ .
- Benzophenoneid** (*ben-zo-fe-no'-ne-id*) [*benzoin*; *φοινξ*, purple-red]. Tetramethyl-diapsido-benzo-phenoid; an anilin dye. A solution of one part in 200 parts of water has been pronounced a valuable bactericide, neither caustic nor irritant, and very serviceable in eye-diseases. Unof.
- Benzopurpurin.** See *Pigments, Conspectus of*.
- Benzoquinone** (*ben-zo'-quin-on*). See *Quinone*.
- Benzosalinone** (*ben-zo-sal'-is-in*). See *Populin*.
- Benzosol** (*ben-zo'-sol*) [*benzoin*],  $C_{15}H_{12}O_2$ . Benzoyl-guaiacol, an agreeable and harmless substitute for creasote in tuberculous affections. It also has antipyretic properties. Dose gr. iv-x.
- Benzoyl** (*ben'-zo-il*, or *-zoi*) [*benzoin*],  $C_7H_5O$ . The radical of benzoic acid, of oil of bitter almonds, and of an extensive series of compounds derived from this oil, or connected with it by certain relations. **B.-ecgonin**,  $C_{16}H_{18}NO_2$ , a substance intermediate in composition between cocaine and ecgonin. **B.-Glycocoll.** See *Acid, Hippuric*. **B. Green.** Same as *Malachite Green*. **B.-Pseudo-tropein.** See *Tropacocain*.
- Benzyl** (*ben'-zil*) [*benzoin*],  $C_7H_7$ . An organic radical that does not exist in the free state, but in combination forms a considerable number of compounds. **B. Alcohol.** See *Alcohol*. **B. Violet.** See *Pigments, Conspectus of*.

**Benzylidene** (*ben-zil'-id-en*) [*benzoin*],  $C_7H_6$ . A bivalent radical derived from benzoic compounds.

**Beral's Apparatus.** In pharmacy, an apparatus for effecting lixiviation.

**Bérard's Aneurysm.** See *Aneurysm and Diseases, Table of*. **B.'s Operation.** See *Operations, Table of*.

**Béraud, Ligament of.** The ligament that suspends the pericardium. **B., Valve of,** a valve supposed to exist at the bottom of the lachrymal sac over the entrance to the nasal duct.

**Berberin** (*ber'-ber-in*) [*berberina*; *gen.*, *Berberine*],  $C_{20}H_{17}NO_4$ . An alkaloid found in the bark of *Berberis*, and in many other plants of exceedingly various botanic character. It is a tonic to the capillary vessels and increases the blood-pressure. It is recommended as a tonic and antiperiodic, and is an ingredient of various lotions for the mucous membranes; it is useful in nasal catarrh, etc. Dose gr. j-x. Unof.

**Berberis** (*ber'-ber-is*) [L.]. Barberry. The root of *Berberis vulgaris*, or common barberry. Its properties are due to an alkaloid, *berberin*,  $C_{20}H_{17}NO_4$ . It is an astringent, bitter tonic; in large doses a cathartic. It is used locally in conjunctivitis, and internally in malarial and typhoid fevers. **B., Ext. Fld.** Dose  $\mathfrak{m}$  v-xxx. **B., Tinct.,** contains 20 per cent. of the root. Dose  $\mathfrak{m}$  x- $\mathfrak{z}$ j. **Berberin**, the alkaloid. Dose gr. j-x. **B., Hydrochl.,** an efficient injection in gonorrhea. All unof. *B. asiatica*, *B. aquifolium* (or Oregon grape), and *B. lycium* are all medicinally active, and have similar properties to those of the common barberry.

**Bergamii, Oleum** (*ber-ga'-me-i o'-le-um*). Oil of Bergamot. See *Bergamot*.

**Bergamot, Oil of** (*ber'-gam-ot*) [*Bergamo*, a town in Italy],  $C_{10}H_{16}$ . A volatile oil derived from the rind of the *Citrus bergamia*. It is used mainly as a perfume, and as a clearing-agent in histologic work.

**Bergeron's Disease.** See *Diseases, Table of*. **B. Method.** See *Treatment, Methods of*.

**Bergkrankheit** (*bärg'-kra(h)nk-hit*). See *Mountain Sickness*.

**Bergmann's (von) Operations.** See *Operations, Table of*.

**Beri-beri** (*ber'-e-ber'-e*) [Singalese, *beri*, weakness]. A dropsical ailment, occurring in an acute and chronic form, and characterized by the appearance of pleuritic or pericardial effusions, with general anasarca, anemia, extreme weakness, and paraplegia. The acute form is generally fatal; recovery frequently takes place in the chronic form. It is prevalent in India, Japan, and Ceylon, and is most common among men. Its cause is not known, but possibly it is of microbic origin. Improper diet also has some influence upon the production of the disease.

**Berlier System of Sewage.** See *Sewage, Disposal of*.

**Berlin Blue.** See *Pigments, Conspectus of*.

**Berlin's Operation.** See *Operations, Table of*.

**Berlinghieri's Operation.** See *Operations, Table of*.

**Bernard, Canal of.** See *Canals, Table of*. **B.'s Granular Layer**, the inner zone of the cells lining the acini of the pancreas. It is granular in appearance and stains but slightly with carmin.

**Bernay's Operation.** See *Operations, Table of*.

**Bernheim's Operation.** See *Operations, Table of*.

**Bernstein's Theory of Muscular Contraction.** He claims that the seat of the contraction is in the interstitial material surrounding the system of inotagmata, and that it consists in the migration of that labile material from pole to equator, this being synchronous with explosive chemic change, sudden disengagement of heat, and change in the electric state of the living substance.

**Berried Tea** (*ber'-ed te*). A popular name for *Gaultharia procumbens*.

**Berry** (*ber'-e*) [ME., *bery*]. An indehiscent fruit with a pericarp that is succulent throughout, as the grape and gooseberry.

**Bert's Experiment.** Bert removed the skin from the tip of the tail of a rat, stitched it into the skin of the back of the animal, and after union had taken place the tail was divided at its base. Sensation was preserved. Nerve-fibers were thus proved capable of transmitting impulses in both directions. **B.'s Method.** See *Anesthetic*.

**Berthold's Method.** See *Myringo-plastic Method*.

**Bertillonage** (*ber-til-lon-a(h)*) [*Bertillon*, a French criminologist]. A system of carefully-recorded measurements and descriptions of criminals, for the purpose of future identification, introduced into France by M. Bertillon and adopted by the police of many large cities.

**Bertin, Bones of.** The sphenoidal turbinated bones, partly closing the sphenoidal sinuses. **B., Column of,** a cortical column of the kidney; the part separating the sides of any two pyramids. **B., Ligament of,** the ilio-femoral ligament. See *Ligament*.

**Bertrandi's Suture.** See *Suture*.

**Beryllium** (*ber-il'-e-um*) [*βήρυλλος*, beryl]. A bivalent metal obtainable from the beryl, whence its name; it is called also glucinum. See *Elements, Table of*.

**Besnier's Lotion.** A wash used in treating acne. It consists of precipitated sulphur,  $1\frac{1}{2}$  ounces; glycerin, 4 to 6 drams; to which are added after mixing, spirits of camphor, 6 drams, rose-water, a sufficient quantity.

**Besoïn** (*bes-zon(g')*) [Fr.]. A desire; an impulse. *Besoïn de respirer*, the sense of the need of air experienced when respiration is impeded.

**Bestiality** (*bes-che-äl'-it-e*) [*bestia*, a beast]. Unnatural intercourse with an animal.

**Bestiarian** (*bes-te-ä'-re-an*) [*bestia*, a beast]. An antivivisectionist, contemptuously so called as being a professed friend of the beasts.

**Bestucheff's Mixture or Tincture.** The ethereal tincture of chlorid of iron, used in erysipelas. It is made as follows: **R.** Tinct. ferri sesquichloridi,  $\mathfrak{i}$  part; spt. ether. nit., 4 parts. Mix and expose to the rays of the sun in well-closed bottles until the brownish color disappears. The dose is one to two teaspoonfuls every three hours.

**Beta** (*be'-tä(h)*) [L.].  $\mathfrak{i}$ . The beet. See *Betin*.  $\mathfrak{2}$ . The second letter of the Greek alphabet, used in chemic nomenclature. **B. Angle.** See *Angle*. **B.-naphthol.** See *Naphthol*.

**Betacism** (*ba'-tas-izm*) [*beta*, βῆτα, the second letter of the Greek alphabet]. The too-frequent use of the *b*-sound in speech, or the conversion of other sounds into it.

**Betain** (*be-tä'-in*) [*beta*, a beet],  $C_5H_{11}NO_2$ , or  $C_{10}H_{22}N_2O_4$ . Called also Oxyncurin and Lycin. A basic substance obtained by the careful oxidation of cholin. It occurs already formed in the sugar-beet (*Beta vulgaris*) and crystallizes from alcohol with one molecule of water in shining crystals that deliquesce in the air; it has an alkaline reaction and a sweetish taste.

**Betel** (*be'-tel*) [E. Ind.]. A masticatory used in the East. A few grains of the nut of the Catechu palm, *Areca C.*, are rolled up with a small amount of quicklime in a leaf of *Piper betel*, and chewed. It is tonic, astringent, stimulant, and aphrodisiac, and increases the powers of endurance. Dose of fld. ext.  $\mathfrak{z}$ j- $\mathfrak{ii}$ j. Unof.

**Beth Root** (*beth root*). The rhizome of *Trillium erecta*, astringent and tonic. Dose of fld. ext.  $\mathfrak{m}$ xxx- $\mathfrak{z}$ j. *Trillin*, a concentrated ext. Dose gr.  $\mathfrak{ij}$ -iv. Unof.

- Betin** (*be'-tin*) [*bēta*, a beet]. A precipitate prepared from a tincture of the common beet. It has been proposed as a substitute for ergot. Unof.
- Betol** (*be'-tol*),  $C_{10}H_7O.C_2H_5O_2$ . Salinaphthol. Naphthalol. A salicylic ether of naphthol, of alleged value in rheumatism and cystitis. It resembles salicylic acid in its properties. Dose gr. x-xv. Unof.
- Betony** (*bet'-o-ne*) [*bētonica*, a corrupt form of *zeltonica*]. Any labiate plant of the genus *Betonica*, especially *B. officinalis*, of Europe, formerly highly prized for its medicinal virtues, which are, however, unimportant. Unof.
- Bettmann's Method.** See *Cataract, Artificial Maturation of*.
- Betula** (*be'-u-luh*). See *Birch*.
- Betulin** (*bet'-u-lin*) [*bētula*, birch],  $C_{36}H_{60}O_3$  (Haussmann). Birch resin, or birch camphor, derived from the bark of the white birch.
- Between-brain.** The interbrain; also the midbrain.
- Betz's Cells.** See *Cell*.
- Bex** (*beks*) [*βῆξ*, a cough]. A cough, or disease characterized by coughing. **B. convulsiva**, whooping-cough. **B. theriodes**. Synonym of *Whooping-cough*.
- Bezet or Bezette** (*be-zet'*). See *Pigments, Conspectus of*.
- Bezoar** (*be'-zo-ar*) [Ar., *bāzahr*, the bezoar-stone]. A name for certain calculi or concretions found in the stomach or intestines of some animals (especially ruminants), formerly supposed to be efficacious in preventing the fatal effects of poison. **B., Vegetable.** See *Calapite*.
- Bezoardic** (*be-zo-ar'-dik*) [Ar., *bāzahr*, the bezoar-stone]. 1. Acting as a bezoar; antidotal. 2. Any alexipharmic agent.
- Bezold's (von) Ganglion.** See *Ganglia, Table of*.
- Bhang** (*bang*). See *Cannabis indica*.
- Bhel** (*bel*). See *Bela*.
- Bi-** (*bi*, twice). A prefix signifying "twice" or "two;" as *bicuspid*, with two cusps; *bilobed*, twice lobed; *bivalved*, with two valves; *bilateral*, two-sided, etc. In chemistry, the prefix *di* is commonly employed.
- Biacid** (*bi-as'-id*) [*bi*, two; *acidum*, an acid]. In chemistry, a term applied to a base that may combine in two proportions with an acid.
- Biauricular** (*bi-aw-rik'-u-lar*) [*bis*, twice; *auricula*, the ear]. Relating to two auricles, or to two corresponding auricular points.
- Bibirin** (*bi-bir'-in*). See *Buxin*.
- Bibiru** (*bi-be'-ru*). Same as *Bebeuru*.
- Bibitorius** (*bib-it-o'-re-us*) [*bibere*, to drink]. The rectus internus muscle of the eye; so called because it turns the eye inward in the act of drinking.
- Bibliography** (*bib-le-og'-ra-fe*) [*βιβλίον*, a book; *γράφειν*, to write]. A classified list of references, books, or authorities on any subject.
- Bibliophobia** (*bib-le-o-fō'-be-ah*) [*βιβλίον*, a book; *φοβία*, dread]. Morbid dislike of books.
- Bibron's Antidote.** Formerly quite a famous remedy for rattlesnake bite. It consists of bromin,  $\frac{3}{4}$  iiss; potassium iodid, gr. ij; corrosive chlorid of mercury, gr. j; dilute alcohol,  $\frac{3}{4}$  xxx. Of this a teaspoonful is given in wine or brandy, p. r. n.
- Bibulous** (*bib'-u-lus*) [*bibere*, to drink]. Having the property of absorbing moisture or liquids. **B. lapis**, pumice stone. **B. Paper**, used in dentistry for drying cavities preparatory to introducing the filling. Blotting paper.
- Bicarbonate** (*bi kar' bon-āt*) [*bis*, twice; *carbo*, a coal]. Any supercarbonate that has two carbonic acid equivalents for one of the base.
- Bicarinate** (*bi-kar'-in at*) [*bi*, two; *carinatus*, keel-shaped] In biology, having two keel-like projections, as certain grasses.
- Bicaudal** (*bi-kar'-dal*) [*bicaudalis*, two-tailed]. Having two tails or appendages. **B. Muscle**, the *abductor auris*. See *Muscles, Table of*.
- Bicephalium** (*bi-sef'-a'-le-um*) [*bi*, two; *κεφαλή*, head]. A tumor of the scalp so large that it gives the patient the appearance of having two heads.
- Biceps** (*bi'-seps*) [*bis*, twice; *caput*, the head]. A term applied to several muscles, as *B. brachii*, *B. extensor*, *B. flexor cruris*. They are so called from their double origin. See *Muscles, Table of*. **B. Reflex.** See *Reflexes, Table of*.
- Bichat, Canal of.** See *Canal*. **B., Fissure of.** See *Fissure*. **B., Foramen of.** See *Foramina, Table of*. **B., Tunic of,** the intima of the blood-vessels.
- Bichlorid** (*bi-klo'-rid*) [*bi*, two; *chlorin*]. In chemistry, a basic compound containing two equivalents of chlorin. **B. of Gold.** See *Gold*. **B. of Mercury.** See *Hydrargyrum*.
- Bicho do mar** (*be'-cho-do-mar*). See *Bèche de mer*.
- Bichromate** (*bi-kro'-mat*) [*bi*, two; *chromium*]. In chemistry, a basic compound containing two equivalents of chromium. **B. of Potash.** See *Potassium*.
- Bicipital** (*bi-sip'-it-al*) [*bi*, two; *caput*, the head]. Pertaining to the biceps muscle.
- Bi-concave** (*bi-kon'-kāv*). See *Lens*.
- Biconvex** (*bi-kon'-veks*). See *Lens*.
- Bicornute** (*bi-kor'-nūt*) [*bicornutus*, with two horns]. Having two horns, as a *bicornute* uterus.
- Bicuspid** (*bi-kus'-pid*) [*bi*, two; *cusps*, the point of a spear]. Having two cusps, as **B. Teeth**, the fourth and fifth teeth. **B. Valve**, the mitral valve of the heart.
- Bidder and Schmidt's Method.** A method of estimating the amount of acids in the stomach. It consists in performing an ultimate analysis, apportioning the chlorin to the metals and ammonium present, and calculating the remainder as HCl.
- Bidder's Ganglia.** See *Ganglia, Table of*. **B.'s Organ**, a singular structure found in male toads and sometimes in male frogs, between the testis and fat-body; it is a rudimentary ovary, and in conjunction with the testis forms an ovotestis; the development of the Müllerian duct, or oviduct, being in direct proportion to the size of "Bidder's Organ." These functionless ducts frequently become cystic (in ten per cent. of male frogs, and in fifteen per cent. of male toads).
- Bidens** (*bi'-denz*) [*bidens*, having two teeth]. A genus of herbaceous composite plants. **B. bipennata**, Spanish needles, an herbaceous composite-flowered plant. The seeds and roots are said to be emmenagogue and antiechic. Dose of fld. ext. gr. xv- $\frac{3}{4}$  j. Unof.
- Bidet** (*be-del'*, or *-da*) [Fr. for pony]. A tub or basin with fixed attachments for the administering of injections; also for use as a sitz-bath or hip-bath.
- Biebrich Scarlet.** See *Pigments, Conspectus of*.
- Biedert's Cream Mixture.** An infant's food made by mixing 4 oz. of cream with 12 oz. of warm water, and adding  $\frac{1}{2}$  oz. of milk-sugar. It contains 1 per cent. of casein, 2.5 per cent. of fat, and 3.8 per cent. of sugar. As the child grows older a larger proportion of milk is added.
- Bi-electrolysis** (*bi-e-lek-trol'-is is*) [*bi*, two; *ἡλεκτρον*, amber; *λύσις*, resolution]. The electrolysis of two substances at the same time.
- Biennial** (*bi-en'-e-al*) [*bi*, two; *annus*, a year]. Every two years. In botany, plants that produce foliage and a root stalk the first year, flowering and maturing the second.

**Biermer's Change of Note.** See *Signs and Symptoms, Table of*.

**Bifenestrate** (*bi-fen-es'trat*). Same as *Biperforate*.

**Bifid** (*bi'-fid*) [*bis*, twice; *findere*, to cleave]. Divided in two; cleft, as the *spina bifida*.

**Bifocal** (*bi-fō'-kal*) [*bi*, two; *focus*, a point]. With a double focus. Applied to a system of lenses or spectacle-glasses with two foci, chiefly used for the correction of presbyopia, when there is at the same time an error of refraction for distant vision. The distance lens is above that for near work. These are sometimes

BIFOCAL LENS.

B. Distance Lens. A. Reading Lens, cemented to the Distance lens.

called *Pantoscopic lenses*, and also *Franklin spectacles*, because the device was first made by Benjamin Franklin. They are also called *Cement lenses*, because now made by cementing the lower segment to the distance lens.

**Biforate** (*bi-fō'-rat*) [*bi*, two; *foratus*, perforated]. Having two foramina.

**Biforin** (*bi'-for-in*) [*biforis*, having two doors]. In biology, the name applied by Turpin to raphides-bearing cells in which the raphides are discharged from both ends of the cell.

**Bifurcate** (*bi-fer'-kat*) [*bi*, two; *furca*, a fork]. Divided into two, like a fork.

**Bifurcation** (*bi-fer'-ka'-shun*) [*bifurcatio*; from *bi*, two; *furca*, a fork]. Division into two branches, as of a tooth into two roots; of the trachea and of the aorta into two branches.

**Big** (*big*) [ME., *big*, large]. Great with young; pregnant. B., jaw, actinomyositis in the ox.

**Bigarade** (*be-gah-ra(h)d'*) [Fr.]. The bitter orange. Its volatile oil (*essence* or *huile de bigarade*) is used in pharmacy and in perfumery.

**Bigelovia** (*big-to'-ve-ah*) [*Bigelow*, an American botanist]. A genus of composite-flowered plants. See *Damiana*.

**Bigelow's Ligament.** The Y-ligament; ilio-femoral ligament. B.'s Method. See *Treatment, Methods of*. B.'s Operation. See *Operations, Table of*. B.'s Septum, in anatomy, a layer of hard bony tissue in the neck of the thigh-bone.

**Bigeminate** (*bi-jem'-in-āt*) [*bigeminus*, doubled]. In biology, forked, doubled.

**Bigeminum** (*bi-jem'-in-um*) [*bi*, two; *geminus*, a twin]. One of the corpora bigemina of the brain; one of the optic lobes of the brain.

**Biglenoid** (*bi-glē'-noid*) [*bi*, two; *γλήνη*, a socket; *ridge*, form]. Relating to both of any pair of glenoid cavities.

**Bignonia** (*big-no'-ne-ah*) [*Bignon*, a French savant]. A genus of climbing-plants, often woody. B. alliance, of the W. Indies, and B. *capreolata*, of N. America, are regarded as antisyphilitic. Several other species are reputed to be actively medicinal. Unof.

**Bignoniac** (*bi-go'-ne-ak*) [*bi*, two; *γωνία*, an angle]. Relating to the two gonions.

**Bijugular** (*bi-ju'-gu-lar*) [*bi*, two; *jugulum*, the collar-bone]. Relating to the two jugular points.

**Bikh** (*bik*) [native Nepalese]. The Nepalese poison, bish; it is derived from the roots of *Aconitum ferox*. See *Aconite*.

**Bilabe** (*bi'-lah*, or *be-la(hyb')*) [Fr.; *bi*, two; *labium* lip]. A surgical instrument for removing foreign bodies from the bladder through the urethra.

**Bilateral** (*bi-lat'-er-al*) [*bi*, two; *latus*, a side]. Relating to two sides; sinistrodextral. B. Symmetry, the symmetry of right and left halves. B. Operation. See *Lithotomy*.

**Bilateralism** (*bi-lat'-er-al-izm*) [*bi*, two; *latus* a side]. Bilateral symmetry.

**Bile** (*bil*) [*bilis*; *χολή*, the bile]. The substance secreted by the liver. It is mucilaginous, golden-brown in man, golden-red in *carnivora*, brownish-green in *herbivora*, and green in birds. It is composed of biliary salts, cholesterin, mucus, and certain pigments. The principal acids are *taurocholic* ( $C_{26}H_{45}NSO_7$ ) and *glycocholic* ( $C_{26}H_{43}NO_6$ ), both commonly combined with sodium. The taste of bile is intensely bitter; its reaction feebly alkaline, and its density from 1026 to 1032. It exercises a diastatic action on starch, emulsifies fats, and precipitates soluble peptone. Its composition varies, but according to Hoppe-Seyler, in 100 parts bile there are of

|                                   |              |
|-----------------------------------|--------------|
| Water, . . . . .                  | 91.68 Parts. |
| Inorganic matter, . . . . .       | 5.32 "       |
| Organic matter, . . . . .         | 1.29 "       |
| Mucus, . . . . .                  | 0.87 "       |
| Taurocholate of sodium, . . . . . | 3.03 "       |
| Glycocholate of sodium, . . . . . | 1.39 "       |
| Saponified fat, . . . . .         | 0.35 "       |
| Cholesterin, . . . . .            | 0.53 "       |
| Lecithin, . . . . .               | 0.73 "       |
| Fat, . . . . .                    |              |

B. Pigments, the coloring-matters of the bile. B. P., Tests for. See *Tests, Table of*.

**Bilharzia** (*bil-har'-ze-ak*) [named after Theodor Bilharz, an helminthologist]. A genus of trematode helminths, established by Cobbold, characterized by having the sexes separate. See *Gynecophorus* and *Parasites (Animal), Table of*. B. *hæmatobia*. See *Distoma*.

**Bilharziosis** (*bil-har-ze-o'-sis*) [*Bilharzia*]. The ensemble of symptoms produced by the presence in the intestine of worms of the genus *Bilharzia*.

**Biliary** (*bil'-e-a-re*) [*bilis*, bile]. Pertaining to the bile.

B. Acids, glycocholic and taurocholic acids formed in the liver. For tests for B. A. in the urine, see *Tests, Table of*. B. Colic, colic produced by the passage of gall-stones. See *Gall-stones*. B. Ducts, the hepatic, the cystic and the ductus communis choledochus. The first leads from the liver, the second from the gall-bladder. The third is a common excretory duct. See *Liver*.

**Bilicyanin** (*bil-e-si'-an-in*) [*bilis*, bile; *κράνεος*, blue]. Cholecyanin, choleverdin. A blue pigment obtained from bilirubin.

**Biliflavin** (*bil-e-fla'-vin*) [*bilis*, bile; *flavus*, yellow]. A yellow coloring-matter derivable from biliverdin.

**Bilifulvin** (*bil-e-ful'-vin*) [*bilis*, bile; *fulvus*, fulvous]. An impure form of bilirubin; also a yellow bile-color from ox-gall, not normally present in human bile.

**Bilifuscin** (*bil-e-fus'-in*) [*bilis*, bile; *fuscus*, brown].  $C_{46}H_{76}N_2O_4$ . A pigmentary matter occurring in bile, and in human gall-stones.

**Bilihumin** (*bil-e-hu'-min*) [*bilis*, bile; *humus*, earth]. An insoluble residue left after treating gall-stones with various solvents.

**Bilin** (*bi'-lin*) [*bilis*, bile]. A mixture of the taurocholate and glycocholate of sodium, forming a copious resinoid constituent of the bile.

**Bilineurin** (*bil-e-nu'-rin*). See *Cholin*.

**Bilious** (*bil'-yus*) [*biliosus*, full of bile]. A term popularly applied to disorders supposed to arise from a too free secretion of bile. **B. Fever**, a term loosely applied to certain enteric and malarial fevers.

**Biliphein** (*bil-e-fe'-in*) [*bilis*, bile; *φαιος*, gray]. A supposed bile-color, now regarded as an impure bilirubin; called also *cholephein*.

**Biliprasin** (*bil-e-pra'-sin*) [*bilis*, bile; *πρασιν*, leek; *πρασινος*, leek-green].  $C_{16}H_{22}N_2O_6$ . A pigmentary substance occurring in gall-stones, icteric urine and bile.

**Bilipurpin**, or **Bilipurpurin** (*bil-e-per'-pin*, *bil-e-per'-pu-rin*) [*bilis*, bile; *purpura*, purple]. A purple coloring-matter derivable from biliverdin.

**Bilipyrrohin** (*bil-e-pir'-in*). See *Cholepyrrohin*.

**Bilirubin** (*bil-e-ru'-bin*) [*bilis*, bile; *ruber*, red].  $C_{42}H_{58}N_2O_6$ . A red coloring-matter, the chief pigment of the bile. It is found also in the urine in jaundice. It is insoluble in water, and almost so in ether and alcohol, but it is readily soluble in alkaline solutions. It crystallizes in rhombic plates or prisms. **B. Icterus**, icterus or jaundice with discoloration of the skin and urine from the presence of an abnormally large percentage of bilirubin.

**Biliverdin** (*bil-e-ver'-din*) [*bilis*, bile; *viridis*, green].  $C_{42}H_{58}N_2O_6$ , or  $C_4H_9NO_2$ . A green pigment, the first product of the oxidation of bilirubin. It gives the characteristic color to the bile of herbivora, and occurs in the urine of jaundice and in traces in gall-stones.

**Billroth's Mixture**. See *Anesthetic*. **B.'s Operations**. See *Operations*, *Table of*.

**Bilsted**, or **Bilsterd** (*bil'-sted*, or *bil'-sterd*). See *Liquidamber*.

**Bimana** (*bi-m'an-an-ah*) [*bi*, two; *manus*, a hand]. An order of the division of *mammalia* including man only.

**Bimanual** (*bi-man'-u-al*) [*bi*, two; *manus*, a hand]. Two-handed. Ambidextrous.

**Bimastoid** (*bi-mas'-toid*) [*bi*, two; *μαστός*, the breast; *ειδος*, form]. Relating to the two mastoid eminences.

**Binary** (*bi' nar-e*) [*binus*, a couple]. In chemistry, compounded of two elements. In anatomy, separating into two branches. **B. Theory**, in chemistry, the theory that considers all salts as double compounds.

**Binate** (*bin'-at*) [*binus*, two by two]. In biology, bifoliate; bidigitate; occurring in pairs.

**Binaural** (*bin-aw'-ral*) [*bis*, twice; *auris*, ear]. Pertaining to or having two ears.

**Binauricular** (*bin-aw-rik'-u-lar*) [*bis*, twice; *auricula*, the ear]. Pertaining or belonging to both ears. **B. Arc**. See *Arc*.

**Binder** (*bind'-er*) [ME., *byndere*]. A wide bandage about the abdomen, worn by women during or after labor, or celiotomy, to support the abdominal walls. **B.**, **Mammary**, a sling or suspensory for the mamma.

**Binder's Board**. A thick, strong variety of paste-board for bookbinders' use; it has a limited use in surgery.

**Binding Posts**. Clamps for connecting conducting wires with the electric apparatus.

**Bindschedler's Green**. Same as *Dimethylphenylene Green*.

**Bindweb** (*bin-i'-web*) [ME., *binden*; *webbe*]. The neuroglia.

**Binelli's Styptic**. A nostrum formerly famous as a styptic. It is supposed to have contained creasote.

**Biniodid** (*bin-i'-o-did*). See *Iodid*.

**Binocular** (*bin-ok'-u-lar*) [*bi*, two; *oculus*, an eye]. In anatomy, having or pertaining to two eyes. In optics, an instrument with two eye-pieces for use with both eyes at once. **B. Vision**, the faculty of using both eyes synchronously and without diplopia.

**Binoculus** (*bin-ok'-u-lus*) [L., two-eyed]. A figure-of-eight bandage for both eyes.

**Binoxid** (*bin-ok's'-id*) [*bi*, two; *oxid*]. Same as *Dioxid*.

**Binuclear** (*bi-nu'-kle-ar*) [*bi*, two; *nucleus*, a kernel]. Having two nuclei.

**Binucleolate** (*bi-nu'-kle'-o-lat*) [*bi*, two; *nucleolus*, a little kernel]. Having two nucleoli.

**Bioblast** (*bi'-o-blast*) [*βίος*, life; *βλαστός*, a germ]. A plastidule or formative cell; a corpuscle that has not yet become a cell.

**Biocellate** (*bi-o-sel'-at*) [*bi*, two; *ocellus*, a little eye]. In biology, having two spots resembling eyes.

**Biochemics** (*bi-o-kem'-iks*) [*βίος*, life; *χημεία*, chemistry]. The chemistry of life. See *Biochemistry*.

**Bio-chemistry** (*bi-o-kem'-is-tre*) [*βίος*, life; *χημεία*, chemistry]. The chemistry of the living body, or of life.

**Biochemistry** (*bi'-o-kem-e*) [*βίος*, life; *χημεία*, chemistry]. Chemic force as exhibited in living organisms.

**Biochyme** (*bi'-o-kim*) [*βίος*, life; *χυμός*, juice]. In biology, the sap or cell-juice of plants.

**Biodynamics** (*bi-o-di-nam'-iks*) [*βίος*, life; *δύναμις*, power]. The dynamics of life; dynamic biology.

**Biogamia** (*bi-o-ga'-me-ah*) [*βίος*, life; *γάμος*, marriage]. The hypothetical union of opposing vital forces (as of contractility and sensibility), resulting in reproduction.

**Biogenesis** (*bi-o-jen'-es-is*) [*βίος*, life; *γένεσις*, origin]. 1. The doctrine that living things are produced only from living things—the reverse of *abiogenesis*. 2. Reproduction from living parents.

**Biogeny** (*bi-oj'-en-e*) [*βίος*, life; *γένεσις*, generation]. In biology, the evolution of organic forms, either considered individually (*ontogeny*) or tribally (*phylogeny*).

**Biognosis** (*bi-og-no'-sis*) [*βίος*, life; *γνώσις*, knowledge]. The study of life and its phenomena; biology.

**Biokinematics** (*bi-o-kin-em-at'-iks*) [*βίος*, life; *κίνησις*, motion]. The kinematics of life; the science of the motions or movements that are essential to life.

**Biokinesigenesis** (*bi-o-kin-es-ij-en'-es-is*) [*βίος*, life; *κίνησις*, movement; *γένεσις*, production]. The origination of the movements of living matter.

**Biokinetics** (*bi-o-kin-et'-iks*) [*βίος*, life; *κίνησις*, motion]. The kinetics of life: the science of the movements that are necessary parts of the process of development. See *Karyokinesis*.

**Biologic**, or **Biological** (*bi-o-loj'-ik*, *bi-o-loj'-ik-al*) [*βίος*, life; *λόγος*, science]. Pertaining or belonging to biology. **B. Law**. See *Phylogeny* and *Haeckel*.

**Biologist** (*bi-ol'-o-jist*) [*βίος*, life; *λόγος*, science]. One who is a student of biology.

**Biologos** (*bi-o-log'-os*) [*βίος*, life; *λόγος*, a word]. A designation proposed for the intelligent living power displayed in cellular and organic action and reaction.

**Biology** (*bi-ol'-o-je*) [*βίος*, life; *λόγος*, science]. The science embracing the structure, function, and organization of life-forms.

**Biolysis** (*bi-ol'-is-is*) [*βίος*, life; *λύειν*, to loosen]. The destruction of life. The devitalization of living tissue.

**Biolytic** (*bi-o-lit'-ik*) [*βίος*, life; *λύειν*, to loosen]. Destructive to life; relating to biolysis.

**Biomagnetism** (*bi-o-mag'-net-izm*) [*βίος*, life; *μάγνης*, a magnet]. So-called animal magnetism.

**Biometer** (*bi-om'-et-er*) [*βίος*, life; *μετρον*, measure]. Dr. Farr speaks of the Life-Table as a biometer, and of equal importance in all inquiries connected with human life or sanitary improvements with the barometer or thermometer, etc., in physical research; and the keystone or pivot on which the whole science of life-assurance rests.

**Biometry** (*bi-on'-et-re*) [*βίος*, life; *μέτρον*, a measure]. Life-measurement; the estimation of the probable duration of any given life-form—in the past or future.

**Biomorphic** (*bi-o-mor'-fol'-ik*) [*βίος*, life; *μορφωτικός*, fit for shaping]. In biology, having an active pupa.

**Biondi's Fluid**. A staining-medium used in histologic laboratories. It is a mixture of orange-G., methyl-green, and acid fuchsin. See *Stains*, *Table of*.

**Bionergy** (*bi-on'-er-je*) [*βίος*, life; *ἐργον*, work]. Life-force; force exercised in the living organism.

**Bionomy** (*bi-on'-o-me*) [*βίος*, life; *νόμος*, a law]. Dynamic biology; biodynamics; the science of the laws of life.

**Biontology** (*bi-on-tol'-o-je*) [*βίος*, life; *ὄντων*, being; *λέγειν*, to speak]. In biology, the physiology of the species or genus, embracing the transcendental or strictly philosophic in physiology (J. Aitken Meigs.).

**Biophagous** (*bi-oph'-ag-us*) [*βίος*, life; *φαγεῖν*, to eat]. Feeding upon living organisms, or upon living tissue, as insectivorous plants.

**Biophore** (*bi'-o-for*) [*βίος*, life; *φέρειν*, to bear]. One of Weismann's hypothetic "bearers of vitality," corresponding to the "plasomes" of Wiesner and Brücke and to the "pangenes" of de Vries, the smallest units that exhibit the primary vital forces, the bearers of the cell-qualities.

**Biophysiography** (*bi-o-fiz-e-og'-ra-fe*) [*βίος*, life; *φύσις*, nature; *γράφειν*, to write]. Descriptive or structural biology; organography, as distinguished from biophysiology.

**Biophysiology** (*bi-o-fiz-e-ol'-o-je*) [*βίος*, life; *φύσις*, nature; *λόγος*, science]. That branch of biology that includes organogeny, morphology and general physiology.

**Bioplasm** (*bi'-o-plazm*) [*βίος*, life; *πλάσμα*, form]. Any living matter, but especially germinal or forming matter; matter possessing reproductive vitality. See *Protoplasm*.

**Bioplasmic** (*bi-o-plaz'-mik*) [*βίος*, life; *πλάσμα*, form]. Relating to or of the nature of bioplasm.

**Bioplasmon** (*bi-o-plas'-on*) [*βίος*, life; *πλάσμων*, forming]. Elsberg's term for living matter. A synonym of protoplasm or bioplasm.

**Bioplast** (*bi'-o-pla-t*) [*βίος*, life; *πλαστός*, formed]. A mass or cell of bioplasm which is a unit of living matter.

**Bioplastic** (*bi-o-plas'-tik*) [*βίος*, life; *πλαστός*, formed]. Relating to or of the nature of a bioplast or of bioplasm.

**Biopsis** (*bi'-op-sik*) [*βίος*, life; *ὄψις*, vision]. Pertaining to biopsy.

**Biopsy** (*bi'-op-se*) [*βίος*, life; *ὄψις*, vision]. Observation of the living subject; opposed to necropsy.

**Biorbital** (*bi-orb'-it-al*) [*βί*, two; *ὄρβιτα*, a path]. Relating to both orbits.

**Bioscope** (*bi'-o-skōp*) [*βίος*, life; *σκοπεῖν*, to view]. An instrument used in bioscopy.

**Bioscopy** (*bi-ōs'-ko-pe*) [*βίος*, life; *σκοπεῖν*, to examine]. Examination of the body to ascertain if life be extinct. **B.**, **Electro-**, examination by the aid of the electric current. The muscular reaction is lost to faradic stimulation in about two hours after death in the tongue; after three or four hours in the extremities; after five or six hours in the trunk. The reaction to galvanism persists somewhat longer.

**Biosis** (*bi-ō'-sis*) [*βίος*, life]. Life; vitality.

**Biostatics** (*bi-o-stat'-iks*) [*βίος*, life; *στατικός*, causing to stand]. Static biology; the science of the determinate parts of biology, including anatomy, and the physics of the living body.

**Biot's Respiration**. See *Respiration*.

**Biotaxis** (*bi-o-taks'-is*) [*βίος*, life; *τάξις*, arrangement].

1. The selective and arranging function or activity of life, or of living cells. 2. Systematic biology; the classification of living organisms.

**Biotaxy** (*bi'-o-taks-e*). See *Biotaxis*.

**Biothally** (*bi'-o-thal-me*) [*βιόθαλμος*, vigorous; *βίος*, life; *θάλειν*, to be vigorous]. The art of living long and well.

**Biotic** (*bi-ōt'-ik*) [*βιωτικός*]. Pertaining to life or to the laws of animal and vegetable progress and evolution.

**Biotome** (*bi'-o-tōm*) [*βίος*, life; *τομή*, a cutting]. A term applied by Cobbold to a stage in the development of certain entozoa.

**Biotomy** (*bi-ōt'-o-me*) [*βίος*, life; *τέμνειν*, to cut]. Vivisection.

**Biparasitic** (*bi-par-as-it'-ik*) [*βί*, two; *παράσιτος*, a parasite]. Parasitic upon a parasite.

**Biparietal** (*bi-par'-it'-el-al*) [*βί*, two; *parietes*, a wall]. Relating to both parietal bones. **B.** **Diameter**, the distance from one parietal eminence of the cranium to the other.

**Biparus** (*bi'-ar-us*) [*βί*, double; *parere*, to bring forth]. Producing two at a birth.

**Bipartite** (*bi-par'-it*) [*βί*, two; *pars*, a part]. In biology, composed of two parts or divisions.

**Biped** (*bi'-ped*) [*βί*, two; *pes*, a foot]. With or having two feet.

**Biperforate** (*bi-per'-fo-rāt*) [*βί*, two; *perforatus*, bored through]. Having two perforations; as a biperforate hymen.

**Bipetalous** (*bi-pet'-al-us*) [*βί*, two; *πέταλον*, a petal]. In biology, having two petals.

**Biphosphate** (*bi-fos'-fat*) [*βί*, two; *phosphorus*]. In chemistry, an acid phosphate.

**Biphosphid** (*bi-fos'-fid*) [*βί*, two; *phosphorus*]. In chemistry, a phosphid containing twice as much phosphorus as the lower member of the phosphid series.

**Biphosphite** (*bi-fos'-fit*) [*βί*, two; *phosphorus*]. In chemistry, an acid phosphite.

**Bipinnate** (*bi-pin'-āt*) [*βί*, two; *pinnatus*, feathered]. In biology, doubly pinnate, as a leaf.

**Bipolar** (*bi-po'-lar*) [*βί*, two; *polus*, a pole]. Having two poles. **B.** **Nerve-cells**, nerve-cells that have two prolongations of the cell-matter. They are found chiefly in the ganglia of the gray matter of the brain.

**Bipubiotomy** (*bi-fu-be-ol'-o-me*) [*βί*, double; *pubes*, pubes; *τέμνειν*, to cut]. An obsolete operation (in the place of the Cesarean section) in which the pubic bones were both divided. See *Galbati's* and *Fara-beuf's Operations*.

**Birch** (*berch*) [*AS.*, *birce*]. Any tree of the genus *Betula*. Birch tar, or the tarry oil of *B. alba*, is useful in certain skin diseases. The bark of *B. luntz*, the American black birch, yields a fragrant volatile oil, identical with that of *Gaultheria procumbens*, for which it is often substituted. **B.** **Camphor**. Same as *B. Resin*. **B.** **Resin**. See *Betulin*. *Oleum betulae* volatile, volatile oil of betula, oil of sweet birch.

**Bird-lime** (*bird'-lim*). A viscous vegetable substance used in Japan as a local dressing for wounds.

**Bird's Formula**. The last two figures of the specific gravity of urine nearly represent the number of grains of solids to the ounce contained in the urine. The same two figures multiplied by 2 (**Trapp's Factor**) give the parts per 1000. **Hæser's Factor** is 2.33. **B.** **Operations**. See *Operations*, *Table of*.

**Bird's-nest Bodies, or Cells**. The cells of certain forms of carcinoma, distinguished by the concentric arrangement of their cell-walls. See also *Cancer Nests*. **B.** **Edible**, the nest of certain species of swift, used by the Chinese as food. It consists of marine algæ, *Gelidium*, cemented by the salivary

mucus of the bird. **B. Sternum**, a deformity of the sternum found in lateral curvature of the spine.

**Birhinia** (*bi rin'-e-ah*) [*bi*, two; *rhin*, the nose]. A congenital defect in which there is the formation of two noses.

**Birth** (*berth*) [ME., *byrth*]. 1. The delivery of a child; parturition. 2. That which is brought forth in parturition. **B.-mark**. See *Vaccus pigmentosus*. **B.-palsy**, any paralytic affection due to an injury received at birth; less correctly, a congenital paralytic affection due to a lesion that existed in the fetal state. See *Pakaplegia*, *Infantile Spasmodia*. **B., Partial**, the incomplete expulsion of a child in labor; of legal value in lawsuits for property. **B., Plural**, the birth of more than a single child. **B., Posthumous**, the birth of a child after the death of its father. **B., Precocious**, the occurrence of natural labor after a shorter pregnancy than is usual. **B., Premature**. See *Labur*. **B.-rate**, the proportion of births per thousand. **B.-root**. See *Both Root*. **B.-wort**, the plant *Aristolochia climatis* (see *Aristolochia*), so called from its former employment as a depurant after childbirth. Unof. **B., Still**. See *Still-born*. Some of the *Tests* of live birth are appended: *Breslau Test*. If the intestines and stomach of the infant float in water on removal from the body it was thought to be proof that the child was born alive. This test is of no value. *Hydrostatic Test*. Suggested by Raygat. It consists in placing the lungs in water and noting their specific gravity. If inflation has occurred they will float. This test is valuable. *Plouquet's Test*. This consists in estimating the ratio of the weight of the lungs to the weight of the body of the child. Plouquet laid down this rule, that *before respiration* the weight of the lungs compared to the weight of the body was in the ratio of 1 to 70, and that *after respiration* it was in the ratio of 1 to 35. The test is of but slight value. *Static test*. Also called *Foderé's* or *Schmidt's Test*. This consists in ascertaining the *absolute* weight of the lungs, and comparing this weight with the average lung-weights of stillborn children, and of children who have died soon after birth. Foderé fixes the weight of the lungs of stillborn children born at term at 480 grains (1 oz.), and 900 grains (2 oz.) as the weight of the lungs soon after breathing has been established. This test is also of but slight value.

**Bisacromial** (*bi'-ak ro'-me-ah*) [*his*, two; *akromia*, the point of the shoulder-blade]. Relating to the two acromia.

**Biscara Button** (*bi'-kar-ah but'-un*). See *Furunculus orientalis*.

**Bischoff's Operation**. See *Operations*, *Table of*.

**Biscuit** (*bi'-kit*) [Fr., "twice baked"]. A kind of cake; properly, a small, hard cake. In French pharmacy, medicated biscuits of various kinds are known. **B., Camplin's**, biscuits made of bran for the use of diabetics. They are made as follows: Take one quart of wheat-bran and boil in two successive waters for fifteen minutes, straining the mixture through a sieve until the water comes through clear; after each washing squeeze in a cloth until perfectly dry; spread thinly on a dish and place in a slow oven. If put in at night, let it remain in until morning, when, if dry and crisp, it is fit for grinding. The mass so obtained must be ground in a fine mill and passed through a wire sieve so fine that a brush will be required to push the flour through. Grind again that which remains in the sieve until quite soft and fine. Take three ounces of the powder, three new-laid eggs, from one and a half to two ounces of butter and about half a pint of milk. Mix the eggs with a little of the milk, and warm the

butter with the other portion. Stir the whole well together, adding a little nutmeg and ginger or other spices. Bake in small well-buttered tins in a rather quick oven for about half an hour. Make the cake a little thicker than a captain's biscuit.

**Biscuiting** (*bi'-kit-ing*). See *Block Teeth*.

**Bisection** (*bi-sek'-shun*) [*bi*, two; *sectio*, a cutting].

In obstetrics, embryotomy.

**Bisexual** (*bi-seks'-u-al*) [*bi*, two; *sexus*, sex]. Having the reproductive organs of both sexes. Hermaphrodite.

**Bish** (*bish*). Same as *Bikkh*.

**Bishop's (Stanmore) Operation**. See *Operations*, *Table of*. **B.'s Weed**. See *Ajowan*.

**Bishoping** (*bish'-op-ing*) [ME., *bischopen*]. In farriery,

filing a space between the teeth of a horse.

**Bisiliac** (*bi-il'-e-ak*) [*his*, two; *iliacus*]. Relating to the two most distant points of the two iliac crests.

**Bischiadic** (*bi-is-ke-ad'-ik*) [*his*, two; *ischia*], relating to the hip]. Relating to corresponding points on the two ischia.

**Biskra Boil**, or **Button**. See *Furunculus orientalis*.

**Bismarck Brown**. Same as *Phenylene Brown* and *Vesuvium*.

**Bismuth**, or **Bismuthum** (*bi'-muth*) [L., gen., *Bismuthi*]. Bi = 210; quantivalence 1, III, v. A pinkish-white crystalline metal, not used in medicine in its metallic form. Its commercial salts are likely to contain arsenic. The insoluble salts of bismuth are feebly astringent and are useful in disordered digestion, acne, eczema, etc. **B. et Ammonii Citras**, soluble in water. Dose gr. j-v. **B. et Ammon. Citras, Liquor** (B.P.). Dose ʒ ss-j. **B. Carbonas** (B.P.), ( $\text{Bi}_2\text{O}_3\text{CO}_3$ ),  $\text{H}_2\text{O}$ . Dose gr. v-xx. **B. Citras**,  $\text{BiC}_6\text{H}_5\text{O}_7$ , soluble in water of ammonia; used in the U. S. only for pharmaceutical purposes. Dose gr. ij-v. **B. Oxid.** (B.P.),  $\text{Bi}_2\text{O}_3$ . Dose gr. v-xv. **B. Oxychlorid**, pearl white. Unof. It is used as a cosmetic. **B. Pulvis, Comp., Ferrier's Snuff**. Contains two grains of hydrochlorate of morphin in one ounce, with bismuth and acacia. It is used for treating coryza. **B. Salicylas**,  $\text{Bi}(\text{C}_6\text{H}_5\text{O}_3)_3\text{Bi}_2\text{O}_3$ . Dose gr. v-x. **B. Subcarbonas**, ( $\text{BiO})_2\text{CO}_3\text{H}_2\text{O}$ , insoluble; it is best given in emulsion with milk. Dose gr. x-ʒ j. **B. Subgallate**. See *Dermatol*. **B. Subiodid**, BiOI, used as an antiseptic dusting-powder, like iodoform. **B. Subnitras**,  $\text{Bi}(\text{ONO}_2)_3\text{H}_2\text{O}$ , the salt chiefly used in medicine. It is also used as a cosmetic. Dose gr. x-ʒ j. **B. Test**. See *Tests*, *Table of*. **B., Trochisci** (B.P.); each contains gr. ij. **B., Unguent.**, 60 grains to one ounce. For herpes, piles, etc. **B. White**. See *Conspectus of Pigments*, under *Pigment*.

**Bissa** (*bi'-ah*) [native African]. An affection of man and sheep, common in Egypt, and characterized by the production of edema. **B. Bol**, a kind of myrrh, from *Balsanodendron Kafal*, a tree of E. Africa. It is used largely in adulterating the finer grades of myrrh, and is said to stimulate powerfully the flow of milk in cows. Unof.

**Distellate** (*bi-stell'-at*) [*bi*, two; *stella*, a star]. Shaped like a double star.

**Bistephanic** (*bi-ste-fan'-ik*) [*bi*, two; *στέφανος*, dim. of *στέφανος*, a wreath]. Relating to the stephanions.

**Bistort** (*bi'-tort*) [*his*, twice; *tortus*, twisted]. Snake-weed, *Adder's-wort*. The rhizome of *Polygonum bistorta*, an astringent. Dose of fld. ext. mxx-xl. Unof.

**Bistoury** (*bi'-to-re*) [Fr. *bistouri*]. A small (straight or curved) knife used in surgery. **B.-caché**, one that has the blade concealed for passing to the point to be incised, and by pressure on the handle the blade is exposed and the incision made.

**Bisulcate** (*bi-sul'-kat*) [*bi*, two; *sulcus*, a furrow]. Having two furrows or grooves.

**Bisulphate** (*bi-sul'-fat*) [*bi*, two; ME., *sulphur*]. Any acid sulphate having twice the amount of acid contained in the corresponding normal sulphate.

**Bisulphid** (*bi-sul'-fid*) [*bi*, two; *sulphur*]. In chemistry, a sulphur compound in which there are two atoms of sulphur to one atom of the other substance of the compound. **B. of Carbon.** See *Anesthetic*.

**Bisulphite** (*bi-sul'-fit*) [*bi*, two; *sulphur*]. An acid sulphite. The *bisulphite of lime* is used as an antiferment.

**Bitartrate** (*bi-tar'-trāt*) [*bi*, two; *τάρταρον*, tartar]. Any tartrate in which one normal hydrogen atom has been replaced by a base. See *Tartaric acid*.

**Bitemporal** (*bi-tem'-por-al*) [*bi*, two; *tempora*, the temples]. Pertaining to or belonging to the two temples. **B. Triangle.** See *Triangle*.

**Biti** (*be'-te*) [E. Ind.]. The E. Indian tree *Dalbergia latifolia*; the oil of the root is said to cure or prevent baldness. Unof.

**Bitnoben** (*bit-no'-ben*) [Hind. for "black salt"]. An East Indian polychrest remedy composed of salt, myrobalan and iron.

**Bitter** (*bit'-er*) [AS., *bitan*, to bite]. A peculiar, well-known taste, of which quinin presents an example; unpalatable. **B. Almond**, the nut of the *Amygdalum amarum*. It contains hydrocyanic acid. **B. Almond Green.** Same as *Malachite Green*. **B. Almond Oil**, oleum amygdale amaræ. See *Benzaldehyd*. **B. Apple**, the fruit of the colocynth, a purgative remedy. **B. Blain**, a West Indian herb, *Vandellia diffusa*, employed in fevers and in hepatic disorders. Unof. **B. Bloom.** The same as *American Centaury*, *q. v.* **B. Bugleweed**, the herb *Lycopus europæus*, alterative and tonic. Dose of fld. ext.  $\frac{3}{4}$  ss-j. Unof. **B. Cup**, a cup made of quassia wood. It is a tonic. **B. King**, the shrub or tree, *Soulamea amara*, intensely bitter in all parts, and reputed to be antiperiodic. Unof. **B. Purging Salt**, sulphate of magnesia. **B. Root**, the root of *Gentiana catesbei*, a tonic. **B. Tincture**, the *tinctura amara* (N.F.), prescribed also in the German pharmacy; it is a tincture of gentian, centaury, bitter orange-peel, orange-berries, and zedoary; it is known also as Stomach Drops. **B. Wine of Iron**, a solution of white wine, syrup, citrate of iron and quinin. Tonic. See *Iron*.

**Bittering** (*bit'-er-ing*) [AS., *bitan*, to bite]. A disease of wine in which it acquires a bitter flavor, due to the formation of a substance that develops as the wine ages, or if it be exposed to too high a temperature.

**Bitters** (*bit'-ers*) [AS., *bitan*, to bite]. Medicines characterized by a bitter taste. **B., Aromatic**, medicines that unite the properties of aromatics with those of simple bitters. **B., Simple**, medicines that stimulate the gastro-intestinal tract without influencing the general system. **B., Styptic**, medicines that add styptic and astringent properties to those of bitterness. See *Angustura*.

**Bittersweet** (*bit'-er-sweet*). See *Dulcamara*. **B., False.** See *Climbing Staff Tree*.

**Bitumen** (*bit-u'-men*) [L., *bitumen*]. Mineral pitch or oil composed of various hydrocarbons. In the solid form it is usually called *asphalt*; in the liquid form, *petroleum*. An intermediate form is known as mineral tar or *maltha*. By distillation, bitumen yields benzol, naphtha, paraffin, and various other hydrocarbons, liquid and gaseous.

**Bituminous** (*bit-u'-min-us*) [*bitumen*, bitumen]. Of the nature of or containing bitumen. **B. Coal.** See *Coal*.

**Biuret** (*bi'-u-ret*) [*bi*, two; *οὐρον*, urine],  $C_2H_5N_3O_2 + H_2O$ . A compound formed by exposing urica to a high temperature for a long time. It is readily soluble

in water and in alcohol; it crystallizes with one molecule of water in the form of warts and needles. When anhydrous, biuret melts at  $190^\circ$  with decomposition.

**B. Reaction, or Test.** See *Tests, Table of*.

**Bivalence** (*bi'-al-ens*) [*bi*, two; *valens*, having power]. In chemistry, a valence or saturating power that is double that of the hydrogen atom.

**Bivalent** (*bi'-al-ent*) [*bi*, two; *valens*, having power]. In chemistry, applied to an element of which an atom can replace two atoms of hydrogen or other univalent element, or to a radical that has the same valence as a bivalent atom.

**Bivalve** (*bi'-valv*) [*bi*, two; *valva*, a valve]. Having two valves or shells, as a mollusc or a speculum.

**Biventer** (*bi-vent'-ter*) [*bi*, two; *venter*, a belly]. Having two bellies, as a muscle. **B. cervicis**, the inner portion of the complexus muscle. **B. maxillæ**, the digastric muscle.

**Biventral** (*bi-vent'-tral*) [*bi*, two; *ventrum*, a stomach]. Having two stomachs; having two bellies; as a digastric muscle.

**Bixin** (*biks'-in*) [*Bixa*, a genus of plants],  $C_{16}H_{26}O_2$ . An orange-red coloring-matter found in *Annatto*. See *Pigments, Conspectus of*.

**Bizygomatic** (*bi-zi-go-mat'-ik*) [*bi*, two; *ζυγωα*, the zygomatic arch]. Relating to the most prominent points on the two zygomatic arches.

**Bizzozero's Blood-plates.** See *Blood-plates*. **B. Method**, a method of studying blood-plates: A drop of a three-quarter per cent. sodium chlorid solution with one part of a concentrated aqueous solution of methyl violet for every 5000 of salt solution, is placed on the finger, which is then punctured. The blood and solution are mixed on the finger.

**Bjeloussow's Gum Arabic and Borax Mass.** For injecting tissues. Take one part, by weight, of gum arabic and make a syrupy solution in water. Take a half part, by weight, of sodium baborate and make a solution in water. Mix the two solutions, when a mass resembling gelatin will be obtained. This mass, which is almost insoluble in water, is rubbed up with water and forcibly strained through linen. Repeat the operation, when a solution miscible in all proportions with water is obtained. This may be colored by carmin or any pigment except cadmium and cobalt.

**Black** (*blak*) [AS., *blec*]. Absence of color or light. The appearance of an object from whose surface none of the spectrum colors is reflected. **B. Alder.** See *Prinos*. **B. Antimony**, antimonium tersulphid,  $Sb_2S_3$ . **B. Ash**, the bark of *Fraxinus sambucifolia*, a mild tonic and astringent. Dose of fld. ext.  $\frac{3}{4}$  ss-j. Unof. **B. Asphaltum.** Same as *Japan Black*. **B. Birch.** See *Birch*. **B. Blood**, venous blood. **B. Cancer.** See *Melanosis*. **B. Cohosh.** See *Cimicifuga*. **B.-damp**, carbon dioxid gas, which is found in greater or less quantity in all collieries, being given off by many coals, either mixed with fire-damp, or separately, or produced in various other ways, as by the exhalations of the men, by fires, and by explosions of fire-damp. Also called *choke-damp*. **B. Death.** See *Plague*. **B. Disease**, 1. A disease of malarial origin and pernicious course, characterized by extreme darkening of the skin, which may be brown or black in color. It occurs in the Garo Hills in Assam. 2. See *Aubernage*. **B. Draught.** See *Senna*. **B. Drop.** See *Opium*. **B. Erysipelas.** Synonym of *Anthrax*. **B. Eye**, livor (or sugillatio) oculi. See *Ecchymosis*. **B. Haw.** See *Viburnum*. **B.-head.** See *Comedo*. **B. Hellebore.** See *Hellebore*. **B. Hoarhound.** See *Ballota*. **B. Induration.** See *Induration*. **B. Infiltration.** See *Miner's Phthisis*. **B. Jaundice**, an excessive jaun-

- dice arising from obstruction of the gall ducts. The color of the skin is greenish-black. **B. Lead**, a form of carbon properly known as the mineral graphite.
- B.-Leg**, 1. A febrile, generally fatal disease, chiefly affecting cattle and sheep, which is characterized by the rapid appearance of irregular nodules in the skin and muscular tissues, that are at first tense and very painful, but rapidly become painless and crepitating. There is no enlargement of the spleen. It is caused by anaërobic bacilli. It is also called *Symptomatic Anthrax*. 2. A synonym of the severe form of *Purpura*. **B. Leprosy**. See *Leprosy*. **B. Measles**, 1. The local Californian name for a disease of the grape, due to *Plasmotiphora californica* (Viala and Sanrgean). Cf. *Brunisura*. 2. *Rubeola nigra*; a grave or malignant form of measles. **B. Pepper**. See *Piper nigrum*. **B. Phthisis**. A synonym of *Miners' Asthma*. **B. Quarter**. Synonym of *Anthrax*. See also *Black Leg*. **B. Sampon**. See *Echinacea angustifolia*. **B. Snake-root**. See *Cimicifuga*. **B. Spauld**. See *Black Leg*. **B. Spit**. See *Miner's Phthisis*. **B. Sweat**. See *Chromidrosis*. **B. Tongue**, 1. See *Glossophytia*. 2. A name given to a condition characterized by the formation upon the dorsum of the tongue of a hair-like deposit that passes through various stages of coloration from yellow to brown and finally black, ultimately disappearing by desquamation as gradually as it came. Repeated recurrence is the rule. It is probably an undue proliferation of the epithelium, the result of irritation. 3. See *Nigrities*. 4. A term applied to erysipelatous glossitis. **B. Vomit**, the coffee-ground vomit of yellow fever, etc. **B. Walnut**, the leaves of *Juglans nigra*, a tonic, alterative and deobstruent. Dose of fld. ext.  $\mathfrak{m}$  xx-xxx. Unof. **B. Wash**. See *Hydrargyrum*. **B. Willow**, the buds of *Salix nigra*, a bitter tonic with aphrodisiac properties. Dose of fld. ext.  $\mathfrak{m}$  xv-3j. Unof.
- Blackberry** (*blak'-ber-e*) [AS., *blac*; *berie*, berry]. See *Rubus*. **B. Cordial**, the *cordiale rubi fructus* (N.F.). Its formula is: blackberry juice, 3 pints; cinnamon in coarse powder, 2 Tr. oz.; cloves and nutmeg, in coarse powder, each  $\frac{1}{2}$  Tr. oz.; dilute alcohol, 2 pints; syrup, 3 pints.
- Blackboy Gum**. See *Acaroid Resin*.
- Blackley Blue**. Same as *Soluble Blue*.
- Blackwater Fever** (*blak'-wat-er fel'-ver*). See *Fever*.
- Bladder** (*blad'-er*) [AS., *blædre*, a blister]. The membranous, sac-like reservoir or receptacle for the urine. **B.**, Atony of, inability to expel the urine, from deficient muscular power. **B.**, Catarrh of. See *Cystitis*. **B.**, Extrophy, or Extroversion of, absence of the anterior wall of the bladder, and more or less deficiency of the corresponding part of the abdomen. **B.**, Fasciculated, the walls thrown into ridges by chronic cystitis. **B.-green**. See *Pigment, Conspexus of*. **B.**, Hernia of. See *Cystocele*. **B.**, Inflammation of. See *Cystitis*. **B.**, Inversion of, a protrusion or an invagination of the bladder through the urethra. **B.**, Irritable, a condition characterized by constant desire to urinate. **B.**, Neck of, the constricted portion continuous with the urethra in front. **B.**, Nervous, a condition in nervous patients in which there is a frequent desire to pass water, with inability at the same time to perform the act perfectly, and consequent slight dribbling at its close. **B.**, Paralysis of, the same symptoms as in atony, but more marked and due to nervous or central disease. If affecting the neck alone, there is *incontinence*; if the body of the organ, *retention* of urine. **B.**, Sacculated, pouches formed between the hypertrophied muscular fibers. **B. Senna**, the plant *Cotula arborescens* of Europe; its leaves are used as a substitute for senna. Unof.
- B. Tetter**. See *Pemphigus*. **B.**, Trigone of, the triangular, smooth surface upon the inner surface of the base of the bladder, immediately behind the urethral orifice. **B. Worm**. See *Worm*. **B.-wort**. See *Utricularia*. **B.-wrack**. See *Fucus vesiculosus*.
- Bladdery Fever** (*blad'-er-e fever*). See *Fever*.
- Blade** (*blad*) [ME., *blad*, a leaf of grass]. In biology, the broad part of a leaf. **B.-bone**. The scapula or shoulder-blade.
- Blæsitas** (*blæ'-sit-as*). See *Blesitas*.
- Blain** (*blan*) [ME., *blane*, a blister]. 1. A blister; an elevation of the cuticle containing serum. Synonym of *Anthrax*. 2. A disease peculiar to the ox, marked by sudden swelling of the head, neck, and throat, and by the development of several large vesicles on the tongue that tend to cause suffocation.
- Blainville's Ear**. See *Diseases, Table of*, and *Ear, Deformities of*.
- Blair's Wheat Food**. A variety of farinaceous food for infants.
- Blake's Disc**. A device used in treating purulent otitis media. It is a paper disc pasted over the perforation of the tympanic membrane after the discharge has ceased.
- Blanc** (*bloh (ng)*) [Fr.]. White. **B. d'argent**. See *Pigment*. **B. fixe**. Same as *Permanent White*. **B.-mange**, a jelly-like food-preparation, having as a basis gelatin, carrageen, isinglass, starch, or arrow-root, boiled with milk and variously flavored.
- Blancard's Pills**. Pills containing the iodid of iron.
- Bland** (*bland*) [*blandus*, mild]. A term applied to mild and soothing medicines and applications.
- Blandin** (*blan'-din*). See *Glairin*.
- Blandin's Glands**. See *Gland*. **B.'s Operations**. See *Operations, Table of*.
- Blanket** (*blau'-ket*) [Fr., *blanc*, white]. A woolen covering, so called because originally of white color.
- B. Bath**. See *Bath, Sheet or Puck*.
- Blasius's Operations**. See *Operations, Table of*.
- Blastelasma** (*blas-tel-az'-mah*) [*βλαστός*, a germ; *ἐλασμα*, plate; *pl.*, *Blastelasmata*]. In embryology, any secondary germ-layer appearing from, or later than, the endoderm and ectoderm.
- Blastema** (*blas-tel'-mah*) [*βλαστημα* from *βλαστάνειν*, to germinate]. The formative lymph or pabulum of capillary exudation. A synonym of protoplasm.
- Blastemal** (*blas-tel'-mal*) [*βλαστάνειν*, to germinate]. Of the nature of a blastema; pertaining to a blastema.
- Blastematic** (*blas-tem-at'-ik*), or **Blastematous** (*blas-tem'-at-us*) [*βλαστάνειν*, to germinate]. Blastemal.
- Blastemic** (*blas-tem'-ik*) [*βλαστάνειν*, to germinate]. Relating to blastema; rudimentary; bioplastic.
- Blastide** (*blas'-tid*) [*βλαστός*, a germ]. In embryology, a very small clear spot on the fecundated ovum marking the place of the nucleus or cytoblast.
- Blasting Gelatin** (*blas'-ting jel'-at-in*). Gelatin Dynamite. A mixture of about 80 parts of nitro-glycerin with 20 of nitro-cellulose. Any non-nitrated cotton or trinitro-cellulose interferes with the solution of the nitro-glycerin. The addition of 4 per cent. of camphor renders the mixture incapable of exploding when struck by a rifle-bullet, but it can be detonated by a strong dynamite cap.
- Blastocardia** (*blas-to-kar'-de-ah*) [*βλαστός*, a germ; *καρδία*, the heart]. The germinal spot.
- Blastocarpous** (*blas-to-kar'-pus*) [*βλαστός*, a germ; *καρπός*, a fruit]. In biology, developing in the fruit.
- Blastocele** (*blas'-to-sel*) [*βλαστός*, a germ; *κοίλος*, hollow]. The central cavity of the blastula or vesicular morula.

**Blastocheme** (*blas'-to-kēm*) [*βλαστός*, a germ; *ἔχω*, to hold, to have]. In biology, a medusiform zoöid that gives origin to generative elements not immediately, but through the intervention of sexual buds. (Allman.)

**Blastochyle** (*blas'-to-kul*) [*βλαστός*, a germ; *χυλός*, juice]. In biology, the colorless fluid in the blastodermic vesicles.

**Blastocœlum, Blastocœloma** (*blas-to-sel'-lom*, *blas-to-se-lo'-mah*). Same as *Blastocœle*.

**Blastocolla** (*blas-to-col'-ah*) [*βλαστός*, a shoot; *κόλλα*, glue]. In biology, the balsam produced on buds by glandular hairs.

**Blastocolysis** (*blas-to-kol-i'-sis*) [*βλαστός*, a germ; *κόλλω*, a cutting off]. The arrest of a developmental process.

**Blastocyst** (*blas'-to-sist*) [*βλαστός*, a germ; *κύστις*, a bladder]. The germinal vesicle.

**Blastoderm** (*blas'-to-derm*) [*βλαστός*, a germ; *δέρμα*, the skin]. In embryology, the germinal membrane formed by the cells of the morula, lying on the internal surface of the vitelline membrane of the impregnated ovum. The whole hollow sphere, with its surrounding cells, is called the *blastodermic vesicle*, and is formed about the tenth day. The *ectoderm* (or *epiblast*) and the *endoderm* (*entoderm* or *hypoblast*) layers are simply due to a proliferation of the blastodermic cells about the *germinal area*, whereby the blastoderm is doubled, thus forming these outer and inner layers. The mesoblast or middle layer is developed after the latter, and probably from the hypoblast.

**Blastodermic** (*blas-to-der'-mik*) [*βλαστός*, a germ; *δέρμα*, the skin]. Relating to the blastoderm.

**Blastodisc** (*blas'-to-disk*) [*βλαστός*, a germ; *δίσκος*, disc]. A blastodermic disc; a mass or disc capping one pole of the yolk.

**Blastogenesis** (*blas-to-jen'-es-is*) [*βλαστός*, a germ; *γένεσις*, generation]. In biology, Weismann's theory of origin from *germ-plasm* (*g. v.*) in contradistinction to Darwin's theory of *Pangenesis*.

**Blastogeny** (*blas-toj'-en-e*) [*βλαστός*, a germ; *γένεσις*, generation]. Haeckel's term for the germ-history of an individual organism; a division of ontogeny.

**Blastoma** (*blas-to'-mah*) [*βλαστός*, a germ; *όμα*, a tumor; *pl.*, *Blastomata*]. A granular growth due to the presence of a germ or microorganism.

**Blastomatic** (*blas-to-mat'-ik*) [*βλαστός*, a germ; *όμα*, a tumor]. Relating to a blastoma.

**Blastomere** (*blas'-to-mēr*) [*βλαστός*, a germ; *μέρος*, a part]. Any one of the nucleated cells or segments into which the fecundated vitellus divides.

**Blastomeric** (*blas-to-mer'-ik*) [*βλαστός*, a germ; *μέρος*, a part]. Relating to or of the character of a blastomere.

**Blastoneuropore** (*blas-to-nu'-ro-por*) [*βλαστός*, a germ; *νεῦρον*, a nerve; *πόρος*, a pore]. In biology, the temporary aperture in certain embryos formed by the coalescence of the *blastopore* and *neuropore*.

**Blastophore** (*blas'-to-för*) [*βλαστός*, a germ; *φέρειν*, to bear]. That part of a sperm-cell that does not become converted into spermatozoa.

**Blastophyllum** (*blas-to-fil'-um*) [*βλαστός*, a germ; *φύλλον*, a leaf; *pl.*, *Blastophylla*]. An endoderm or an ectoderm; a primitive germ-layer.

**Blastophyly** (*blas-toff'-il-e*) [*βλαστός*, a germ; *φυλή*, a tribe]. The tribal history of individual organisms.

**Blastopore** (*blas'-to-pör*) [*βλαστός*, a germ; *πόρος*, passage, pore]. In biology, the primitive mouth or archistome, the orifice to the two-layered embryo (*blastula*). "The blastopore is the small opening which leads into the notochordal canal, or after the

canal has fused with the yolk cavity, leads into the archenteron. It is situated at the hind end of the primitive axis (head-process) and marks the anterior boundary of the anus of *Rusconi* in amphibia, or of the primitive streak, properly so-called, of *amniota*." (Minot). "Van Beneden's blastopore" is formed previously to the blastodermic cavity.

**Blastosphere** (*blas'-to-sfēr*) [*βλαστός*, a germ; *σφαῖρα*, a sphere]. In biology, the "blastula," "germinal vesicle," or "vesicular germ." A hollow sphere composed of a single, simple layer of germinal cells. A vesicular morula.

**Blastostyle** (*blas'-to-stil*) [*βλαστός*, a germ; *στῖλος*, a pillar]. In biology, a columnar zoöid devoted to the origination of sexual buds.

**Blastula** (*blas'-tu-lah*) [dim. of *βλαστός*, a germ; *pl.*, *Blastulae*]. In embryology, "The earliest form of the diadern, a simple epithelial vesicle, the cavity of which is the large segmentation cavity" (Minot). Cf. *Blastosphere*.

**Blastulation** (*blas-tu-lä'-shon*) [dim. of *βλαστός*, a germ]. In embryology, the conversion of a morula or mulberry-germ into a blastula or vesicular germ.

**Blatta** (*blat'-ah*) [L., "blood-colored"]. A genus of the *Blattidae*. **B. (Periplaneta) orientalis**, the cockroach; the powdered body of the cockroach. A popular remedy for dropsy among Russian peasants. It increases the amount of urine and diminishes the amount of albumin. Dose gr. iv-xx. Unof. See *Antihydropsin*.

**Blaud's Pill**. A pill containing sulphate of iron and carbonate of potash; for use in amenorrhea, etc. See *Pill*.

**Bleach** (*blēch*) [ME., *blechen*, to make white]. To make white or pale, to diminish the intensity of color.

**Bleached Lac**. See *Lac*. **Bleaching Powder**, chlorinated lime, a mixture of calcium chlorid and calcium hypochlorite, containing free chlorin gas. It is much used as a disinfectant. **Bleaching Fluid**, *eau de Javelle*, a similar composition obtained by passing chlorin gas into an emulsion of calcium hydrate. The most important bleaching agents are the following: **BLEACHING AGENTS**.—*Acids*: Hydrochloric, Nitric, Sulphuric; *Carbonate of Potassium* ( $K_2CO_3$ ); its value depends upon the percentage of carbonate it contains; *Caustic Soda* ( $NaOH$ ), a coarse white powder; *Chlorid of lime*, a white powder with a chlorinous odor; it is the most important of all; *Hydrogen dioxid* ( $H_2O_2$ ), a colorless, odorless liquid. It is called "Golden Hair-dye;" *Permanganate of Potassium* ( $K_2Mn_2O_8$ ); *Soaps*: Tallow, Rosin, and Olive Oil; *Soda Ash* ( $Na_2CO_3$ ); its value depends on the amount of  $Na_2O$  it contains; *Soda Crystals* ( $Na_2CO_3 \cdot 10H_2O$ ).

**Bleacher's Eczema** (*blech'-erz ek'-zem-ah*). Eczema of the hands of bleachers, due to their continuous immersion in hot water and strong lye.

**Blear Eye** (*blear'-i*). See *Blepharitis ulcerosa*.

**Bleb** (*bleb*). See *Bulla*.

**Blebb** (*bleb'-i*) [*Scotch*, *bleb*, "a blister"]. Covered with blebs.

**Blechropyra** (*blek-rof'-ir-ah*) [*βλεχροπύρα*, mild; *πύρ*, heat]. A transient fever; a febricula.

**Blechrosphygmia** (*blek-ro-sfig'-me-ah*) [*βλεχροσφύγμη*, weak; *σφύγμη*, pulse]. Weakness or slowness of the pulse.

**Bleed** (*bled*) [AS., *blēdan*, to bleed]. To shed or give vent to blood.

**Bleeders** (*ble'-derz*) [AS., *blēdan*, to bleed]. A popular term for those who are subjects of the hemorrhagic diathesis. **B.'s Disease**. See *Hemophilia*.

**Bleeding** (*ble'-din-z*). See *Bloodletting* and *Hemorrhage*.

**Blennatropes** (*blen-at-rope*) [*βλέμμα*, a glance; *τροπή*, to turn]. An apparatus for showing the various positions of the eye in its orbit.

**Blennadenitis** (*blen-ad-ni-tis*) [*βλέννος*, mucus; *ἀδην*, gland]. Inflammation of the mucous glands and follicles.

**Blennelytria** (*blen-el-tri-ah*) [*βλέννος*, mucus; *ἐνέλιον*, sheath]. Leucorrhœa.

**Blennemesis** (*blen-me-sis*) [*βλέννα*, mucus; *ἐμείν*, to vomit]. The vomiting of mucus.

**Blennemetic** (*blen-me-tik*) [*βλέννα*, mucus; *ἐμείν*, to vomit]. Relating to or of the nature of blennemesis.

**Blennenteria** (*blen-en-te-re-ah*) [*βλέννα*, mucus; *ἐντέριον*, intestine]. A mucous diarrhoea or dysentery.

**Blennenteritis** (*blen-en-ter-i-tis*) [*βλέννα*, mucus; *ἐντέριον*, intestine; *ιτις*, inflammation]. 1. Enteritis with a copious discharge of mucus. 2. Inflammation of the mucous membrane of the bowel.

**Blennentery** (*blen-en-ter-e*). Same as *Blennenteria*.

**Blennogenic**, or **Blennogenous** (*blen-o-ge-ni-ik*, or *blen-o-ge-ni-us*) [*βλέννα*, mucus; *γενεσις*, production]. Producing or secreting mucus; muciparous.

**Blennoid** (*blen-oid*) [*βλέννα*, mucus; *εἶδος*, form]. Resembling mucus; myxoid; muciform; mucoid.

**Blennoma** (*blen-o-mah*) [*βλέννα*, mucus; *ὄμα*, a tumor; *pl.*, *Blennomata*]. 1. A mucous polypus. 2. A myxoma.

**Blennometritis** (*blen-me-tri-tis*) [*βλέννα*, mucus; *μετρίτις*, womb; *ιτις*, inflammation]. Catarrh metritis.

**Blennophthalmia** (*blen-off-thall-me-ah*) [*βλέννα*, mucus; *ὀφθαλμία*, disease of the eyes]. Catarrhal conjunctivitis.

**Blennoptysis** (*blen-opti-sis*) [*βλέννα*, mucus; *πτύσις*, a spitting]. Bronchial mucous expectoration.

**Blennorrhagia** (*blen-or-al-je-ah*) [*βλέννα*, mucus; *ῥήγναι*, to burst forth]. An excessive catarrhal discharge from the urethra or vagina. See *Gonorrhœa*.

**Blennorrhagic** (*blen-or-al-jik*) [*βλέννα*, mucus; *ῥήγναι*, to burst forth]. Relating to blennorrhagia.

**Blennorrhœa** (*blen-or-el-ah*) [*βλέννα*, mucus; *ῥέειν*, to flow]. Same as *Blennorrhagia*.

**Blennorrhœal** (*blen-or-el-al*) [*βλέννα*, mucus; *ῥέειν*, to flow]. Relating to blennorrhœa.

**Blennorrhina** (*blen-or-in-el-ah*) [*βλέννα*, mucus; *ῥίς*, the nose]. Coryza; nasal catarrh.

**Blennosis** (*blen-o-sis*) [*βλέννα*, mucus; *νόσος*, disease; *pl.*, *Blennoses*]. Any disease of a mucous membrane.

**Blennostasis** (*blen-o-stas-is*) [*βλέννα*, mucus; *στάσις*, a staying]. The checking or suppression of any mucous discharge.

**Blennostatic** (*blen-os-tat-ik*) [*βλέννα*, mucus; *στάσις*, a staying]. Effecting a blennostasis; checking mucous discharges.

**Blennothorax** (*blen-o-thor-ak*) [*βλέννα*, mucus; *θώραξ*, the thorax]. Pulmonary catarrh.

**Blennorrhœa** (*blen-or-el-ah*) [*βλέννα*, mucus; *ὤς*, ear; *ῥοα*, a flow]. A mucous discharge from the ear.

**Blennozemia** (*blen-o-se-mi-ah*) [*βλέννα*, mucus; *ζημία*, loss]. Same as *Blennorrhœa*.

**Blennuria** (*blen-u-r-ah*) [*βλέννα*, mucus; *οὐραν*, urine]. The presence of mucus in the urine.

**Blennymenitis** (*blen-im-en-i-tis*) [*βλέννα*, mucus; *ἐμνυμν*, membrane]. Inflammation of any mucous surface.

**Blephara** (*blef-ar-ah*). Plural of *Blepharon*, *q. v.*

**Blepharadenitis** (*blef-ar-a-den-i-tis*) [*βλέφαρον*, the eyelid; *ἀδην*, a gland]. Inflammation of the Meibomian glands.

**Blepharal** (*blef-ar-al*) [*βλέφαρον*, the eyelid]. Relating to an eyelid or to the eyelids.

**Blepharanthracosis** (*blef-ar-an-thrak-o-sis*) [*βλέφαρον*,

the eyelid; *ἀνθράκωσις*, a charring; carbunculization]. Carbuncular inflammation of the eyelid.

**Blepharedema** (*blef-ar-e-de-mah*) [*βλέφαρον*, the eyelid; *οἰδημα*, a swelling]. Swelling or edema of the eyelids.

**Blepharelosis** (*blef-ar-el-o-sis*) [*βλέφαρον*, the eyelid; *εἰλεω*, to roll]. Synonym of *Entropion*.

**Blepharempysema** (*blef-ar-em-fis-el-mah*) [*βλέφαρον*, eyelid; *ἐμψίσημα*, an inflation]. Empysema of an eyelid.

**Blepharis** (*blef-ar-is*) [*βλέφαρις*, an eyelash]. An eyelash.

**Blepharism** (*blef-ar-izm*) [*βλέφαριζειν*, to wink]. Rapid involuntary winking; morbidly excessive nictitation.

**Blepharitic** (*blef-ar-it-ik*) [*βλέφαρον*, the eyelid; *ιτις*, inflammation]. Relating to or affected with blepharitis.

**Blepharitis** (*blef-ar-i-tis*) [*βλέφαρον*, the eyelid; *ιτις*, inflammation]. Inflammation of the eyelids.

**B. ciliaris**, tarsal ophthalmia; a pustular disease of the border of the eyelids, often the result of local irritation arising from habits of uncleanness. **B. marginalis**, inflammation seated at the marginal border of the lids. **B. ulcerosa**, an ulcerative inflammation of the eyelids.

**Blepharo-adenitis** (*blef-ar-o-ad-en-i-tis*). See *Blepharadenitis*.

**Blepharo-adenoma** (*blef-ar-o-ad-en-o-mah*) [*βλέφαρον*, the eyelid; *ἀδην*, a gland; *ὄμα*, a tumor; *pl.*, *Blepharo-adenomata*]. An adenoma on the ciliary margin of the eyelid.

**Blepharo-atheroma** (*blef-ar-o-ath-er-o-mah*) [*βλέφαρον*, an eyelid; *ἀθήρωμα*, a tumor full of gruel-like matter]. An atheromatous tumor imbedded in the tarsus of the lid; it is cystic and contains a semifluid detrital substance.

**Blepharochromidrosis** (*blef-ar-o-kro-mid-ro-sis*) [*βλέφαρον*, the eyelid; *χρῶμα*, color; *ιδρώς*, sweat]. Colored sweat of the eyelids, usually of a bluish tint.

**Blepharocleisis** (*blef-ar-o-kli-sis*) [*βλέφαρον*, the eyelid; *κλείσις*, closure]. Ankyloblepharon; abnormal closure of the eyelids.

**Blepharodyschœa** (*blef-ar-o-dis-kre-el-ah*), or **Blepharodyschroia** (*blef-ar-o-dis-kroi-el-ah*) [*βλέφαρον*, the eyelid; *δυσ*, bad; *χρῶμα*, color]. Discoloration of the eyelid from nevus or any other cause.

**Blepharodema** (*blef-ar-o-e-de-mah*). See *Blepharedema*.

**Blepharolithiasis** (*blef-ar-o-lith-i-as-is*) [*βλέφαρον*, the eyelid; *λίθος*, a stone]. The formation of marginal concretions within the eyelid.

**Blepharon** (*blef-ar-on*) [*βλέφαρον*, the eyelid; *pl.*, *Blephara*]. The eyelid; palpebra.

**Blepharoncus** (*blef-ar-on-gus*) [*βλέφαρον*, the eyelid; *ὄγκος*, an enlargement]. A swelling of the eyelid.

**Blepharopachynsis** (*blef-ar-o-pak-in-el-sis*) [*βλέφαρον*, the eyelid; *παχίς*, thick]. Morbid thickening of the eyelid.

**Blepharophimosia** (*blef-ar-o-fi-mo-sis*) [*βλέφαρον*, the eyelid; *φίμωσις*, a shutting up]. Abnormal smallness of the palpebral openings.

**Blepharophryplastic** (*blef-ar-o-frip-las-el-tik*) [*βλέφαρον*, the eyelid; *ὄφρυς*, brow; *πλαστικός*, plastic]. Pertaining to the plastic surgery of the lid and eyebrow.

**Blepharophyma** (*blef-ar-o-fi-mah*) [*βλέφαρον*, the eyelid; *φύμα*, a growth; *pl.*, *Blepharophymata*]. A tumor of, or outgrowth from, the eyelid.

**Blepharoplastic** (*blef-ar-o-plas-el-tik*) [*βλέφαρον*, the eyelid; *πλαστικός*, plastic]. Pertaining to blepharoplasty.

**Blepharoplasty** (*blef'-ar-o-plas-te*) [*βλεφαρον*, the eyelid; *πλάσσειν*, to form]. An operation for the formation of any part of the eyelid destroyed by wound or lesion, by engrafting or transplanting from a contiguous healthy part.

**Blepharoplegia** (*blef'-ar-o-plé'-je-ah*) [*βλεφαρον*, the eyelid; *πληγή*, a stroke]. Paralysis of an eyelid.

**Blepharoptosis** (*blef'-ar-op-to'-sis*) [*βλεφαρον*, the eyelid; *πτώσις*, a fall]. Ptosis of an upper eyelid. See *Ptois*.

**Blepharopyorrhea** (*blef'-ar-o-pi-or-é'-ah*) [*βλεφαρον*, the eyelid; *πιον* pus; *ρῑεν*, to flow]. A flow of pus from the eyelid.

**Blepharorrhaphy** (*blef'-ar-or'-a-fe*) [*βλεφαρον*, the eyelid; *ράσθ*, a seam]. The stitching together of a part of the blepharal slit.

**Blepharorrhea** (*blef'-ar-or-é'-ah*) [*βλεφαρον*, the eyelid; *ρῑον*, a flow]. A discharge from the eyelid.

**Blepharospasm** (*blef'-ar-o-spazm*) [*βλεφαρον*, the eyelid; *σπασμός*, a spasm]. Spasm of the orbicularis palpebrarum muscle. Excessive winking.

**Blepharospath** (*blef'-ar-o-spah*) [*βλεφαρον*, the eyelid; *σπάθ*, a blade]. A forceps for taking up or holding an artery; for use in operations on the eyelid.

**Blepharostat** (*blef'-ar-o-stat*) [*βλεφαρον*, the eyelid; *στάται*, to cause to stand]. An instrument for holding the eyelids apart or firm whilst performing operations upon the eyes or lids.

**Blepharostenosis** (*blef'-ar-o-ste-no'-sis*) [*βλεφαρον*, the eyelid; *στενός*, narrow]. Diminution of the space between the eyelids.

**Blepharosynechia** (*blef'-ar-o-sin-ek-i'-ah*) [*βλεφαρον*, the eyelid; *συνέχεια*, a holding together]. The adhesion or growing together of the eyelids.

**Blepharotomy** (*blef'-ar-ot'-o-me*) [*βλεφαρον*, the eyelid; *τέμνειν*, to cut]. Incision into the eyelid. **B.**, Oblique. Sphincterotomy, or Stellwag's operation. See *Operations*, *Table of*.

**Blesitas** (*ble'-sit-as*) [*blasus*, a lisping]. Stammering or lisping; the use of a vocalized consonant instead of a mute; as *b* for *p*. Also the condition of one with distorted limbs. Applied also to an angular curvature of the spine. The term is loosely used.

**Blessed Thistle.** (*bles'-ed this'-l*). See *Carduus*.

**Blight** (*blit*) [origin unknown]. A partial paralysis of certain facial nerves, arising from sudden or extreme cold. **B. of the Eye**, an extravasation of blood within the conjunctiva.

**Blind** (*blind*) [AS., *blind*]. Without sight. Deprived of sight. **B. Spot**, that part of the area of the fundus of the eye where the optic nerve enters. **B. Stagers.** See *Stagers*.

**Blinder** (*blind'-er*) [AS., *blind*]. A shield worn before an eye, to temporarily throw it out of function. See *Gould, Method of*. **B. Treatment** of monocular amblyopia. See *Gould, Method of*.

**Blindness** (*blind'-nes*) [AS., *blind*]. Want of vision.

**Color-B.**, subnormal perception of colors. This condition is found in about 4 per cent. of people, is more frequent in men than in women, and is probably due to non-exercise of the color sense. **Complete Color-B.** is very rare, the different colors probably appearing as different intensities or shades of white light. In **Partial Color-B.** subnormal perception of red is the most frequent, green, blue and yellow, respectively, being next in order. **Tests for Color-B.** usually consist in matching and classifying colored yarns. **Cortical B.**, B. due to lesion of the cortical center of vision. **Day-B.** See *Nyctalopia*. **Mind-B.** See *Psychic B.* **Moon-B.**, a rare condition of retinal anesthesia said to be due to exposure of the eyes to the moon's rays in sleeping. **Night-B.** See *Nyctalopia*. **B.**, Object-. See *Apraxia*. **Psychic B.**,

loss of conscious visual sensation from destruction of the cerebral visual center; there is sight but not recognition. **Snow-B.**, photophobia and conjunctivitis due to exposure of the eyes to the glare of sunlight upon snow. **B.**, Word-. See *Aphasia*.

**Blister** (*blis'-ter*) [ME., *blister*, a vesicle]. A vesicle resulting from the exudation of serous fluid between the epidermis and true skin. Also the agent by which the blister is produced. **B.**, Fly, a beetle, *Cantharis vesicatoria*, the body of which is used as a blistering agent; a blister of cantharides. **B.**, Flying, a blister that remains long enough to produce redness of the skin and not vesication. **B. Test**, for gout. The serum from a blister in a gouty individual will yield crystals of uric acid when examined by Garrod's thread test (*y. z.*), only, however, when the blister is situated at a distance from the affected joint. According to Garrod the acid cannot be detected in the fluid from a blister in the neighborhood of the gouty articulation, and he infers that gouty inflammation causes a local destruction of uric acid.

**Blistering** (*blis'-ter-ing*) [ME., *blister*, a vesicle]. Forming a vesicle upon the skin. **B. Collodion**, a solution of cantharidin in ether. **B. Liquid.** Same as *B. Collodion*. **B. Paper**, paper saturated with cantharides; used for producing vesication.

**Bloat** (*blot*) [ME., *blote*, swelling]. 1. Puffiness; edema; turgidity from any cause, as from anasarca. 2. A form of colic in the horse produced by tympanitic distention of the intestines. Also called *Wind Colic*.

**Block** (*blok*) [ME., *bluk*, a piece of wood]. In dentistry a mass of gold foil for filling teeth, made by folding a tape of foil upon itself several times by means of pliers. **B. Teeth.** Two or more artificial teeth carved from a piece of ivory, or carved or moulded from a mass of porcelain paste and afterwards baked and enamelled. **B. Teeth, Biscuiting, or Crucing of.** The teeth, after being moulded or carved, are placed on a slide and put in the muffle of a furnace and subjected to a bright-red heat, by which process the particles become sufficiently agglutinated and hardened to receive the enamel. This is called *biscuiting* or *crucing*.

**Blond** (*blond*) [Fr., *blond*, light, fair]. 1. Light complexioned; fair. 2. A person with a fair complexion.

**Blood** (*blud*) [ME., *blood*]. The fluid that circulates through the heart, arteries, and veins, supplying nutritive material to all parts of the body. In the human being the blood of the arteries is bright-red; that of the veins dark-red. Blood consists of colorless plasma in which are suspended the red and colorless corpuscles. When exposed to the air it coagulates, forming a red-clot and a yellowish fluid called serum. Healthy blood consists of 79 per cent of water, and 21 per cent.

solids. **B.-Casts**, tubercasts to which red blood corpuscles are attached. **B.-Corpuscles**, small, circular, biconcave discs floating in the blood. Red corpuscles are circular in mammals (except the camel), and elliptical in birds and reptiles. In man they are about  $\frac{3}{1000}$  inch in diameter and  $\frac{1}{1000}$  inch thick. Colorless corpuscles are about one-third larger in diameter and comparatively few. They exhibit movements similar to those of *amöbe*. The coloring-matter of the B. is found in a substance

HUMAN COLORED BLOOD-CORPUSCLES.

1, on the flat; 2, on edge; 3, rouleau of corpuscles. (After Landois)

known as hemoglobin, and is said to be due to minute quantities of the salts of iron. **B.-cure**, the therapeutic employment of fresh blood, mainly that of bullocks.

I. REAL TRANSVERSE SECTION OF A HUMAN RED BLOOD-CORPUSCLE (magnified 500 times).

a, b, diameter; c, d, thickness. (After Landois.)

**B.-crystals**, crystals of a substance known as hematoïdin. **B.**, Defibrinated, freshly shed blood that has been beaten with a glass rod or tongs until the fibrin has all adhered to the rod in the form of a solid, fibrous, yellowish-white, elastic mass. **B.-flower**. See *Acleptus*. **B.-flake**. See *Bilharzia Hematobia*. **B.**, **Gases of**, certain gases given off when blood is exposed to the vacuum produced by an air-pump. They are carbonic acid, nitrogen, and oxygen, and constitute about half of the volume of the blood. **B.-globules**. Same as *B.-corpuscles*. **B.-heat**, a temperature varying from 98° to 100° F. **B.-islands**, a term applied to the groups of corpuscles developed during the first days of embryonic life, within the large branched cells of the mesoblast. **B.**, **Loss of**. See *Hemorrhage*. **B.-mole**, in obstetrics, a mole consisting of the decidua only, interspersed with effusions of blood, the fetus having been expelled. **B.-plaque**. See *B.-platelets*. **B.-plasma**, the *liquor sanguinis*, or fluid part of the blood. **B.-plate**. See *B.-platelets*. **B.-platelets**; besides the red and colorless corpuscles, the blood contains smaller formed elements, concerning which there are many theories and names. Hayem describes *Hematoblasts*; Pouches describes *Globulins*; Max Schultze, *Körnchen* (elementary bodies); Bizzozero, *Blut-plättchen*, or *Blood-platelets*. They are circular or oval, light gray, and in human blood destitute of nuclei. They are from 1 to 1.3  $\mu$  in size, there being from 18,000 to 300,000 in the cubic millimeter. **B.-poisoning**, a common term denoting any ailment arising from the introduction of decomposing organic matter or putrefactive germs into the blood. See *Anthrax*, *Pyemia* and *Septicemia*. **B.-pressure**, the force of compression exerted by the blood upon the walls of the vessels under the influence of the heart's action, the elastic walls, etc. Various instruments have been devised to estimate the amount of this pressure, the *Hemodynamometer of Poissuille*, *Ludwig's Kymograph*, *Fick's Spring Kymograph*, *v. Basch's Sphygmomanometer*, the *Graduated Sphygmograph*, etc. **B.-root**. See *Sanguinaria*. **B.-shot**, extravasated with blood. **B.-spavin**. See *Spavin*. **B.-stone**. See *Conspectus of Pigment*, under *Pigment*. **B.-striking**. Synonym of *Anthrax*. See also *Black-leg*. **B.-tablet**. See *Blood-plate*. **B.-tumor**. See *Hematoma*. **B.-vessel**, a tube-like structure for conveying the blood through the body. (Cf. *Artery* and *Vein*).

**Bloodless** (*blud'-less*) [ME., *blood*]. Without blood. **B. Operations**, surgical operations, such as amputations, in which the member is so bandaged by compresses and elastic bands that the blood is expelled and kept from the part to be operated upon.

**Bloodletting** (*blud'let-ing*) [ME., *blood*; *leten*]. The artificial abstraction of blood from the body. **B.**, **General**, venesection or phlebotomy; it acts by reducing the heart's action and diminishing the quantity of blood. It is occasionally used with excellent results in

pneumonia, sunstroke, etc. **B.**, **Local or Topical**. See *Cupping*, *Leeching* or *Scarification*. It is useful in certain inflammatory conditions.

**Bloody** (*blud'-y*) [ME., *blood*]. Having the nature of, or filled with blood. **B. Flux**. See *Dysentery*. **B. Milk**. See *Red Milk Bacillus* and *Bacteria*, *Synonymatic Table of*. **B. Murrain**. Synonym of *Anthrax*. **B. Sweat**. See *Ephidrosis*.

**Bloom** (*blum*) [ME., *blom*, a blossom]. 1. A blossom. 2. A state of health. 3. See *Lubricating Oils*.

**Blossom** (*blus'-um*) [ME., *blossome*, a flower]. In biology, (1) the flower of a plant; (2) to put forth flowers.

**Blotch** (*bloch*) [origin uncertain]. A pimple or blain; a small discolored patch of skin; a group of small pustules.

**Blow** (*blo*) [AS., *blōvan*]. 1. To pant. 2. To deposit eggs upon, as flies.

**Blowing Sound**. See *Bellows Murmur*.

**Blown** (*blon*) [ME., *blowen*]. In farriery, with the stomach distended from gorging with food. **B. Meat**, meat that has been blown up with air in order to give it a white color and to hide defects in its condition.

**Blow-pipe** (*blo'-pip*). A cylindrical tube, from twelve to eighteen inches long, about half an inch in diameter at one end, and gradually tapering to a fine point or nozzle, which may be straight or bent at a right angle; it is used in directing the flame of a lamp in a fine conical tongue. **B.**, **Automaton**, in dentistry, a blow-pipe especially designed for crown and bridge-work, into which the air is admitted and conducted through a small tube to the upper end of another which admits illuminating gas. The supply of both air and gas is regulated by the pressure of the thumb or fingers on the rubber tubes of the appliance. **B.**, **Oxyhydrogen**, an apparatus for producing intense heat by burning hydrogen or illuminating gas at the end of a mixing nozzle.

**Bloxam's Test**. See *Tests, Table of*.

**Blue** (*bloo*) [ME., *blew*]. One of the colors of the spectrum. **B.**, **Alexandria**. Same as *Egyptian Blue*. **B.-Baby**, a child with blue disease. **B.-bottle**. See *Centaurea*. **B. Blindness**, acyanopsia. **B. Cohosh**. See *Caulophyllum*. **B. Disease**, cyanosis of the new-born, due frequently to congenital disease of the heart. This usually consists in constriction of the pulmonary artery with deficiency in the septum of the ventricles, the aorta communicating with the right ventricular cavity. See *Cyanopathy*. **B. Flag**. See *Iris*. **B. Gentian**, the root of *Gentiana catesbei*, tonic and stomachic. Dose of fld. ext.  $\mathfrak{m}$  x-xl. Unof. **B. Gum**. See *Gingival*. **B. Gum Tree**. See *Eucalyptus*. **B. Cardinal Flower**. Synonym of *Lobelia syphilitica*. **B. Edema**, a puffed and bluish appearance of the limb sometimes seen in hysterical paralysis. **B. Jaundice**. See *Aciotocardia*. **B. Line**. See *Lead Line*. **B. Malachite**. Same as *Azurite*. **B. Mass**. See *Hydrargyrum*. **B.-milk Bacillus**, *Bacillus cyanogenus*; it imparts a blue color to milk and renders it irritating to the stomach and intestine. See *Bacteria*, *Synonymatic Table of*. **B. Ocher**. See *Conspectus of Pigments* under *Pigment*. **B. Ointment**. See *Hydrargyrum*. **B. Pill**. See *Hydrargyrum*. **B.**, **Prussian**. See *Pigment*. **B. Stick**. Same as *B. Stone*. **B. Stone**. See *Copper* and *B. Vitriol*. **B. Verditer**. Same as *Bremen Blue*. **B. Vervain**. See *Verbena*. **B. Vitriol**. See *Conspectus of Pigments*, under *Pigment*.

**Blues** (*blooz*) [ME., *blew*]. A popular name for short periods of mental depression; they are usually associated with indigestion.

**Blumenbach, Clivus of**. See *Clivus*. **B.**, **Plane of**. See *Plane*.

**Blunt-hook** (*blunk'-hook*). An obstetric instrument, used mainly in embryotomy.

**Blunzen** (*blunz'-en*) [Ger.]. A peculiar Württemberg sausage, made by filling the stomachs of hogs with meat, and cured by a method favoring putrefaction. This is the most common source of sausage-poisoning. See *Allantiasis* and *Botulismus*.

**Blushing** (*blush'-ing*) [ME., *blushen*, to glow]. The reddening of the face through shame, modesty, or confusion. See *Rubor*.

**Boa** (*bo'-ah*) [L.]. An ancient name applied to various eruptions and eruptive diseases, as measles, smallpox, hydroa, syphilis. **B. Vista Fever.** See *Fever*.

**Boas's Test.** See *Tests, Table of*.

**Boat-belly** (*boat'-bel-e*). See *Scaphoid Abdomen*.

**Bobb's Operation.** See *Operations, Table of*.

**Bochdalek's Ganglion.** See *Ganglia, Table of*. **B's Pseudo-ganglion.** See *Pseudo-ganglion*.

**Bock, Nerve of.** See *Nerves, Table of*.

**Bockhart's Blood-serum Mercury.** A mercurial used in the treatment of syphilis. It is prepared as follows from the blood of sheep, horses, or oxen: 10½ drams of blood-serum, sterilized after Koch's method, are placed in a graduated glass, and then mixed with a solution of 45 grains of bichlorid of mercury dissolved in one ounce of boiling distilled water. The precipitate formed is redissolved by the addition of 105 grains of chlorid of sodium, dissolved in five drams of distilled water. This compound is then a three per cent. solution of blood-serum mercury. By adding enough distilled water to make six ounces five drams, we have the solution generally used, containing one and one-half per cent of the mercurial salt. Injections of 15 minims (containing one-quarter grain of sublimate, combined with albumin) are made daily.

**Bodo** (*bo'-do*) [L.]. A genus of flagellate protozoans. **B. saltans** has been reported as living in great numbers in unhealthy ulcerations. **B. urinarius** has been found in the urine of cholera-patients.

**Body** (*bod'-e*) [AS., *bodig*]. 1. The animal frame with its organs. Also a cadaver or corpse. 2. This term is applied by the manufacturer of porcelain teeth to the parts composing the principal portion of the artificial organ. 3. The tube of a microscope, including the draw-tube; it is the tube receiving the ocular at one end and the objective at the other. See also *Corpus*, and *Corpora*. **B. Cells.** See *Heredity*. **B. Louise.** See *Pediculus*. **B.-plasm.** See *Somatoplasm*, under *Heredity*. **B., Sub-thalamic.** See *Luys, Body of*.

**Boeckel's Operations.** See *Operations, Table of*.

**Boerhaave, Glands of.** See *Gland*.

**Bog** (*bog*) [E. dial.]. To ease the body by stool.

**Bog** (*bog*) [Gael., *bogan*, a bog]. Ground that is wet and spongy. **B.-bean.** See *Buckbean*. **B.-spavin.** See *Spavin*.

**Bogue's Operation.** See *Operations, Table of*.

**Böhm's Acid Carmin.** See *Stains, Table of*. **B.'s Operation.** See *Operations, Table of*.

**Böhmer's Hematoxylin Solution.** See *Stains, Table of*.

**Bohun Upas** (*bo'-hun-u'-pas*). See *Antiar* and *Upas*.

**Boil** (*boil*) [ME., *boile*]. A furuncle; a localized inflammation of the skin and subcutaneous connective tissue attended by the formation of pus. See *Furunculus*.

**B., Aleppo or B., Delhi,** a peculiar ulcerative affection endemic in India, due to a specific and pathogenic microbe. It has been proposed by Heydenreich to call this *Tropical Boil*. Other names are *Penjdeh Boil* and *Bouton Biskra*. **B.-plague.** Synonym of *Anthrax*.

**Boiled Oil.** Linseed oil that has been heated to a high temperature (130° C. and upward), while a current of air is passed through or over the oil, and

the temperature increased until the oil begins to effervesce from evolution of products of decomposition. **B.-sago Matter.** Vitreous-looking bodies frequently seen in the stools of dysentery. They are simply granules of starch ingested as food and remaining partially or wholly undigested. They are also called *Frog's-spawn matter*.

**Boiler-makers' Deafness.** See *Deafness*.

**Boiling** (*boil'-ing*) [ME., *boilen*, to stir]. The vaporization of a liquid when it gives off vapor having the same tension as the surrounding air. Most tissues, animal and vegetable, are softened and rendered more or less soluble by boiling. Albumin and most albuminoids, however, are rendered insoluble. The temperature of boiling water at the level of the sea is 212° F. (100° C.); it decreases with increasing altitude. **B. Test.** See *Tests, Table of*.

**Boissons** (*boah'-song*) [Fr.]. Cheap fermented liquors made from raisins or other dried fruits to which sweetened water is added and fermentation allowed.

**Bola** (*bo'-lah*). See *Myrrh*.

**Bolary** (*bo'-lar-e*) [*bolus*, clay]. Of the nature of bole.

**Bolax** (*bo'-laks*). See *Balsam-bog*. **B. Gum.** See *Balsam-bog*.

**Bolbomelanoma** (*bol-bo-mel-an-o'-mah*) [*βολβόμα*, a bulb; *μελάνα*, blackness]. Melanotic carcinoma of the eyeball.

**Boldin** (*bol'-din*). See *Boldus*.

**Boldo** (*bol'-do*). See *Boldus*. **B.-glucine**, an aromatic glucosid obtained from *Peumus boldo* and other species. It is a hypnotic in doses of gr. xx-5j. Unof.

**Boldoa** (*bol'-do-ah*) [Chilian, *Boldu*]. A genus of monimiaceous trees. **B. fragrans**, the tree *Peumus boldo*. See *Boldus*.

**Boldus** (*bol'-dus*) [L.]. Boldo. The leaves and stems of an evergreen, *Peumus boldo*, native to Chili and vicinity, sometimes used in anemia and general debility as a substitute for quinin. It contains a bitter alkaloid, *Boldin*, an hypnotic in doses of gr. iij. **B., Ext., Fld.** Dose mj-iv. **B., Tinct.,** contains 20 per cent. of the drug. Dose m-v-vij.

**Bole** (*bol*) [*βόλος*, a clod of earth]. 1. A translucent, soft variety of clay formerly much used in medicine, internally as an astringent, externally as an absorbent. Dose gr. v-x. Several varieties are used, as the *Armenian bole*; the *Lemnian*, and the *French bole*. 2. A bolus. See *Bolus*.

**Boletus** (*bo-le'-tus*) [*βολίτης*, a kind of mushroom]. A genus of fungi, some species of which are edible, while others are highly poisonous. None is official.

**Bologna** (*bo-len'-yah*) [It.]. A city of northern Italy.

**B. Lime.** Same as Vienna White. **B. Phosphorus,** a sulphid of barium, having the property of emitting a pale, feeble light in the dark.

**Bolus** (*bo'-lus*) [L.: *pl.*, *Boli*; Eng. *pl.*, *Boluses*]. A mass of medicine exhibited in the form of a large pill.

**Bombardier Beetle** (*bom-bar-der be'-tl*). See *Brachennin*.

**Bombax** (*bom'-baks*) [*bombyx*, cotton]. A genus of huge tropical malvaceous trees of many species. Some of these trees afford demulcent diuretic medicines. *Mocmain*, q. v., is a product of *B. malabaricum*. **Bombus** (*bom'-bus*) [*βούβο*, a humming sound]. A ringing or buzzing sound in the ears; tinnitus. Also a sonorous movement or rumbling flatus of the intestines: borborygmus.

**Bona Fever** (*bo'-nah fe'-ver*). See *Fever*.

**Bonbon** (*bon'-bon*) [Fr.]. A confection. **B., Pectoral,** a medicated antitubercic confection.

**Bond's Operation.** See *Operations, Table of*.

**Bonduc Seeds** (*bon'-duk sedz*). See *Bondicella*.

**Bonducella** (*bon-du-se' ah*) [*L.*]. *Bondue* Seeds. The seeds of *Cesalpinia bonariensis*, a tropical plant. It is a bitter tonic and antiperiodic in intermittent fevers. Dose gr. x-xv. **B.**, **Pulv.**, **Comp.**, contains bonduc and black pepper. Dose gr. xv-xx.

**Bone** (*bon*) [*AS.*, *ān*, a bone]. A hard tissue that constitutes the framework or skeleton of the body. It is composed mainly of tri-calcium phosphate and cartilage. Bone usually consists of a compact outer mass covered with *periosteum*, surrounding a reticulated inner structure that encloses a central cavity filled with marrow. A transverse section of a long bone shows bone-tissue to be composed of a number of nearly circular zones, each having a central tube, the *Haversian canal*, through which the blood circulates. Surrounding the *Haversian canal* are concentrically arranged belts of oblong spaces called *lacunae*. Each lacuna is the outlet of a number of *canaliculi*, through which the nutrition is conveyed to all parts of the bone. A table of bones is appended. **B. Ash**, the calcic phosphate remaining after bones have been incinerated. **B. Binder**. See *Osteocolla*. **B.-black**. Same as *Animal Black*. **B.-brown**. See *Pigments*, *Conspectus of*. **B. Cartilage**. See *Ostein*. **B.-conduction**, the transmission of sound-waves to the auditory nerve by means of sonorous vibrations communicated to the bones of the skull, the impression reaching the nerve in part directly and in part by way of the tympanic structure. The tuning-fork is the instrument most commonly used as a test of bone-conduction. Bone-conduction is lost or diminished in many of the typical labyrinthine lesions, e. g., in true Menière's disease. See *Air-conduction*. **B. Earth**. See *Ossiterre*. **B.**, **Epipetric** [*ἐπί*, upon; *-πετρ*, a wing], a small Wormian bone sometimes found between the great wing of the sphenoid and the anterior inferior angle of the parietal. **B.-fat**, a whitish-yellow fat obtained by boiling bones. It is used in soap making. **B.-gelatin**. See *Gelatin*. **B.-glue**. See *Glue*. **B. incarial**. See *Incarial*. **B.-nippers**, surgical cutting-forceps for use on bones. **B.-oil**, a foul-smelling oil obtained in the dry distillation of bone. **B.-setter**, a specialist at setting bones; usually an uneducated empiric, and often a pretender to hereditary skill in the business. **B.-spavin**. See *Spavin*. **B.-tumor**. Synonym of *Actinomycosis*.

**Bonelet** (*bon'-let*). See *Ossicle*.

**Bonellein** (*bo-nell'-in*) [*Bonellia*, a genus of gephyrean worms, named after F. A. Bonelli, an Italian naturalist]. In biology, the green pigment of certain annelids, as *Bonellia viridis*.

**Boneset**. See *Eupatorium*.

**Bonnafond's Apparatus**. An apparatus for generating vapors and injecting them into the middle ear through the Eustachian tube.

**Bonnet's Capsule**. See *Ocular Sheath*. **B. Operations**. See *Operations*, *Table of*.

**Bontius, Pills of**. Purgative pills used in dropsy. They contain gamboge, Scotrin aloes, and gum ammoniac.

**Bonwill's Crown**. In dentistry, an artificial crown of all porcelain to be grafted on a natural root. **B's. Method, 1.** A method of producing anesthesia. It is done by rapid breathing of the ordinary atmospheric air. The patient opens his mouth and breathes freely, quickly, and deeply, and in a few seconds or minutes partial anesthesia supervenes. **2.** A method of articulating teeth.

**Bonzel's Operation**. See *Operations*, *Table of*.

**Booboo** (*bo'-boo*). See *Bahia*.

**Boohoo** (*booh'-hoo*) [native S. Pacific]. A kind of gastritis with slight fever and with great nostalgia and

depression of spirits. It attacks strangers in some of the Pacific Islands.

**Booker, Bacillus of**. See *Bacteria*, *Synonymatic Table of*.

**Boot, Junod's**. See *Junod's Boot*.

**Boracic Acid** (*bo-ras'-ik as'-id*). See *Acid*, *Boric*; also *Boron*.

**Borage** (*bo'-rāi*) [*ME.*, *borage*]. The plant *Borago officinalis*, a demulcent, mild refrigerant and diaphoretic. Dose of fld. ext., ʒ j. Unof.

**Boraginaceous** (*bo-raj-in-a'-se-us*) [*Boraginaceae*, a natural order of plants]. Pertaining to the Boraginaceae.

**Borate** (*bo'-rat*) [*Ar.*, *bōraq*, borax]. Any salt of boric acid.

**Borax** (*bo'-raks*). See *Boron*. **B. Bath**. See *Bath*.

**Borborygmus** (*bor-bor-ig'-mus*) [*βορβορυγμός*, a rumbling; *pl.*, *Borborygmi*]. A rumbling of the bowels.

**Bordeaux Method**. A form of cotton antiseptic dressing for stumps.

**Borelli's Operation**. See *Operations*, *Table of*.

**Boric Acid** (*bo'-rik as'-id*). See *Boron*.

**Born** (*born*) [*AS.*, *boren*, to bear, bring forth]. Brought into the world by the process of parturition. **B. Alive**. See *Live Birth*.

**Borneo Camphor** (*bor'-ne-o-kam'-for*). See *Borneol*.

**Borneol** (*bor'-ne-ol*) [*Borneo*],  $C_{10}H_{18}O$ . Borneo Camphor; a substance that occurs in *Dryobalanops camphora*, a tree growing in Borneo and Sumatra. It is artificially prepared by acting with sodium upon the alcoholic solution of common camphor. It is quite like Japan camphor, and has a peculiar odor resembling that of peppermint. It sublimes in six-sided leaflets, melts at 198° and boils at 212°. It produces spasms of an epileptiform character.

**Born's Method**. A method of reconstructing objects from microscopic sections; by means of a camera, the outlines are transferred to wax plates, which are then cut out so as to correspond to the sections.

**Boro-borax** (*bo-ro-bo'-raks*). A crystalline combination of borax and boric acid. It is used as an antiseptic.

**Borofuchsin**. See *Stains*, *Conspectus of*.

**Boroglycerid** (*bo-ro-glis'-er-id*). See *Boroglycerin*.

**Boroglycerin** (*bo-ro-glis'-er-in*) [*Ar.*, *bōraq*, borax; *γ'υκερός*, sweet]. A mixture of boric acid, 62 parts, with glycerin, 92 parts, it is called also *boroglycerid*, and *glyceryl borate*. It is a solid preparation, soluble in water. It is used as a local application in eye and skin affections. It is an active antiseptic in a solution of 1 to 40. Unof.

**Boron** (*bo'-ron*) [*Ar.*, *bōraq*, borax].  $B = 11$ ; quantivalence III, V. The base of boric acid and of the mineral borax. **Boracic**, or, more properly, **Boric Acid**,  $H_3BO_3$ , a crystalline substance, found native in the volcanic lagoons of Tuscany. It occurs in white, transparent crystals, soluble in water and alcohol; it is an active antiseptic, and is much used in parasitic diseases of the skin. Dose gr. v-xx. *Unguent. Acidi Borici* (B. P.), contains hard paraffin 2, soft paraffin 4, boric acid 1. It is used as an antiseptic and in dermatology. **Borax**,  $Na_2B_4O_7 \cdot 10H_2O$ , sodium biborate, occurs in lacustrine deposits as white, transparent crystals, soluble in water, alcohol and glycerin. It is used as an antiseptic wash for ulcers and indolent lesions and is valuable also as an emmenagogue, and in leucorrhea. Dose gr. v-xl. All unof. *Glycerinum Boracis* (B. P.), contains borax, glycerin and distilled water; it is used as a local application. *Mel Boracis* (B. P.), borax honey, contains borax, clarified honey and glycerin (about 1 in 7); it is used as a local application.

## TABLE OF BONES.

| NAME.                                       | PRINCIPAL FEATURES.  | ARTICULATIONS AND VARIETY.  | MUSCULAR AND LIGAMENTOUS ATTACHMENTS.   |
|---|--|---|---|
| Astragalus.                                 | Irregularly cubical; forms the key-stone of arch of foot; head, neck, six articular surfaces.  | Tibia, } <i>ginglymus</i> .<br>Fibula, }<br>Os calcis, } <i>arthrodia</i> .<br>Scaphoid, }  | Internal and external lateral ligaments.  |
| Atlas.                                      | First cervical vertebra; ring-like; anterior and posterior arches and tubercles; articular surfaces.   | Occipital bone— <i>double arthrodia</i> .<br>Axis, four joints— <i>diarthrodia rotatoria and double arthrodia</i> .   | Longus colli ( <i>tubercle</i> ), rectus capitis posticus minor ( <i>spinous process</i> ).   |
| Axis.                                       | Second cervical vertebra; body, odontoid process, pedicles, laminae, spinous process, transverse processes, articular surfaces.  | First cervical vertebra— <i>diarthrodia rotatoria and double arthrodia</i> .<br>Third cervical vertebra— <i>double arthrodia</i> .  | Longus colli, check ligaments.  |
| Calcaneum.                                  | The heel bone; irregularly cuboidal; lesser process [sustentaculum tali], greater process, petro-neal ridge or spine, superior groove, articular surfaces.                 | Astragalus, }<br>Cuboid, } <i>arthrodia</i> .<br>Scaphoid, }  | Tibialis posticus, tendo Achillis, plantaris, abductor pollicis, abductor minimi digiti, flexor brevis digitorum, flexor accessorius, extensor brevis digitorum.  |
| Carpal.                                     | Consists of scaphoid, semilunar, cuneiform, pisiform, trapezium, trapezoid, os magnum, unciform. See <i>Individual Bones</i> .   |   |   |
| Clavicle.                                   | Collar bone, resembles the italic "f"; conoid tubercle, deltoid tubercle, oblique line.  | Sternum, }<br>Scapula, } <i>arthrodia</i><br>Cartilage of first rib, }  | Sterno-cleido-mastoid, trapezius, pectoralis major, deltoid, subclavius, sterno-hyoid, platysma.  |
| Coccyx.                                     | The last bone of the vertebral column; resembles a cuckoo's beak; usually composed of four small segments; base, apex, cornua.   | Sacrum— <i>amphiarthrodia</i> .   | Coccygeus, gluteus maximus, extensor coccygis, sphincter ani, levator ani.  |
| Cranial.                                    | Occipital, parietal (two), frontal, temporal (two), sphenoid, ethmoid. See <i>Individual Bones</i> .   |   |   |
| Cuboid.                                     | Somewhat pyramidal; tuberosity.  | Os calcis, }<br>External cuneiform, } <i>arthrodia</i> .<br>4th and 5th metatarsal bones, }   | Flexor brevis pollicis.   |
| Cuneiform (of carpus).                      | Pyramidal.   | Semilunar, }<br>Pisiform, } <i>arthrodia</i><br>Unciform, }<br>Interarticular fibro-cartilage, }  |   |
| Cuneiform (of tarsus).<br><i>Internal</i> . | Irregularly wedge-shaped; the largest of the three.  | Scaphoid, }<br>Middle cuneiform, } <i>arthrodia</i> .<br>First and second metatarsal bones, }   | Tibialis anticus and posticus.  |
| <i>Middle</i> .                             | Wedge-shaped; smallest of the three.   | Scaphoid, }<br>Internal cuneiform, } <i>arthrodia</i> .<br>External cuneiform, }<br>Second metatarsal, }  | Tibialis posticus.  |
| <i>External</i> .                           | Wedge-shaped.  | Scaphoid, }<br>Middle cuneiform, } <i>arthrodia</i> .<br>Cuboid, }<br>Second, third, and fourth metatarsal bones, }   | Tibialis posticus, flexor brevis pollicis.  |
| Ethmoid.                                    | Irregularly cubical; situated at anterior part of base of skull; horizontal or cribriform plate, perpendicular plate, two lateral masses, crista galli.                    | Sphenoid, }<br>Two sphenoidal— } <i>synarthrodia</i> .<br>turbinated, }<br>Frontal, }<br>Two nasal, }<br>Two superior maxillary, }<br>Two lachrymal, }<br>Two palate, }<br>Two inferior turbinated, }<br>Vomer, } | None.   |
| Femur.                                      | Cylindrical; longest, largest, and strongest bone in the body; shaft and two extremities, head, neck, greater and lesser trochanters, linea aspera, condyles; a long bone. | Os innominatum— <i>enarthrodia</i> .<br>Tibia— <i>ginglymus</i> .<br>Patella— <i>arthrodia</i> .  | Gluteus medius, gluteus minimus, pyramiformis, obturator internus, obturator externus, gemellus superior, gemellus inferior, quadratus femoris, psoas magnus, iliacus, vastus externus, gluteus maximus, short head of the biceps, vastus internus, adductor magnus, pectineus, adductor brevis, adductor longus, crureus, subcrureus, gastrocnemius, plantaris, popliteus. |

## BONES OF THE HUMAN SKELETON.

ATLAS, SUPERIOR SURFACE.

Superior articular process. 8. Tubercle for attachment of transverse ligament.

AXIS, LATERAL ASPECT.

1. Body. 2. Odontoid process. 3. Facet for articulating with anterior arch of atlas. 4. Lamina. 5. Spinous process. 6. Transverse process. 7. Superior articular process. 8. Inferior articular process.

AXIS, POSTERO-SUPERIOR VIEW.

1. Posterior surface of body. 2. Odontoid process. 3, 3. Superior articular processes. 4, 4. Inferior articular processes. 5, 5. Transverse processes. 6. Spinous process.

ATLAS AND AXIS, ANTERIOR SURFACE.

7, 7. Inferior articular processes. 8, 8. Transverse processes. 9. Anterior surface of body of axis. 10. Apex of odontoid process.

SEVENTH CERVICAL VERTEBRA, POSTERO-SUPERIOR VIEW.

1. Body. 2, 2. Transverse processes. 3, 3. Anterior or costal roots of transverse processes. 4, 4. Foramina for vertebral arteries. 5, 5. Superior articular processes. 6, 6. Inferior articular processes. 7, 7. Laminae. 8. Spinous process. 9. Spinal foramen.

DORSAL VERTEBRA, ANTERO-SUPERIOR VIEW.

1. Anterior surface. 2. Vertebral foramen. 3. Spinous process. 4, 4. Transverse processes. 5, 5. Articular surfaces for tubercles of ribs. 6, 6. Superior articular processes. 7, 7. Pedicles.

FIRST DORSAL VERTEBRA, LATERAL VIEW.

1. Superior surface of body. 2, 2. Semi-lunar processes. 3. Articular facet for head of first rib. 4. Demi-facet for head of second rib. 5. Superior articular process. 6, 6. Inferior articular processes. 7. Transverse process. 8. Articular facet for tubercle of first rib. 9. Spinous process.

ELEVENTH DORSAL VERTEBRA, LATERAL VIEW.

1. Articular facet for head of eleventh rib. 2. Transverse process. 3. Superior tubercle of transverse process. 4. Inferior and anterior tubercle. 5. Inferior and posterior tubercle. 6. Superior articular process. 7. Inferior articular process. 8. Spinous process.

TWELFTH DORSAL VERTEBRA, LATERAL VIEW.

1. Articular facet for head of twelfth rib. 2. Transverse process. 3. Superior and posterior tubercle of transverse process. 4. Inferior and anterior tubercle. 5. Inferior and posterior tubercle. 6. Superior articular process. 7, 7. Inferior articular processes. 8. Spinous process.

TABLE OF BONES.—*Continued.*

| NAME.                | PRINCIPAL FEATURES.   | ARTICULATIONS AND VARIETY.   | MUSCULAR AND LIGAMENTOUS ATTACHMENTS.   |
|----------------------|---|--|---|
| Fibula.              | Long bone; shaft, upper extremity or head, lower extremity or external malleolus.   | Tibia— <i>arthrodia</i> .<br>Astragalus, with the tibia and fibula— <i>ginglymus</i> .                               | Biceps, soleus, peroneus longus, extensor longus digitorum, peroneus tertius, extensor proprius pollicis, tibialis posticus, flexor longus pollicis, peroneus brevis.   |
| Foot.                | Composed of tarsus, metatarsus and phalanges, <i>q. v.</i>  |  |   |
| Frontal.             | The forehead bone; a flat bone; a frontal portion and an orbito-nasal portion; frontal eminences, superciliary ridges, supraorbital arches, supraorbital notches or foramina, internal and external angular processes, temporal ridges, nasal notch, nasal spine, nasal eminence or glabella.   | Two parietal,<br>Sphenoid,<br>Ethmoid,<br>Two nasal,<br>Two superior max-<br>illary,<br>Two lachrymal,<br>Two malar, | Corrugator supercillii, orbicularis palpebrarum, and temporal on each side.   |
|                      |   | } <i>synarthrodia</i> .  |   |
| Hand.                | Composed of carpus, metacarpus and phalanges, <i>q. v.</i>  |  |   |
| Humerus.             | Largest bone of upper extremity; long bone; a shaft and two extremities. Upper extremity presents a head, neck and greater and lesser tuberosities. Lower extremity, trochlea, olecranon fossa, coronoid fossa, external and internal condyles, supracondylar foramen, supracondylar ridges.  | Scapula (glenoid cavity)— <i>enarthrodia</i> .<br>Ulna, }<br>Radius, } <i>ginglymus</i> .                            | Supraspinatus, infraspinatus, teres minor, subscapularis, pectoralis major, latissimus dorsi, deltoid, coraco-brachialis, brachialis anticus, triceps, sub-anconeus, pronator radii teres, flexor carpi radialis, palmaris longus, flexor digitorum sublimis, flexor carpi ulnaris, supinator longus, extensor carpi radialis longior, extensor carpi radialis brevior, extensor communis digitorum, extensor minimi digiti, extensor carpi ulnaris, supinator brevis and anconeus.   |
| Hyoid.               | A bony arch; irregular bone; a body, two greater and two lesser cornua.   | None.  | Sterno-hyoid, thyro-hyoid, omo-hyoid, digastricus, stylo-hyoid, mylo-hyoid, genio-hyoid, genio-hyo-glossus, hyoglossus, middle constrictor of the pharynx.  |
| Ilium.               | See <i>Innominate</i> .   |  |   |
| Incus.               | Resembles a bicuspid tooth with two roots, body, and two processes.   | Malleus— <i>arthrodia</i> ( <i>trigger-joint</i> ).<br>Stapes— <i>arthrodia</i> .                                    | None.   |
| Inferior maxillary.  | Body and two rami; contains the teeth of the lower jaw; symphysis, mental process, mental foramen, coronoid and condyloid process, head, neck, sigmoid notch; irregular bone.   | The two temporal bones— <i>bilateral condyloid—diarthrodia</i> .   | Levator menti, depressor labii inferioris, depressor anguli oris, platysma myoides, buccinator, masseter, orbicularis oris, genio-hyo-glossus, genio-hyoideus, mylo-hyoideus, digastric, superior constrictor, temporal, internal pterygoid, external pterygoid.  |
| Inferior turbinated. | Situated on the outer wall of the nasal fossa; irregular bone.  | Ethmoid,<br>Superior maxillary,<br>Lachrymal,<br>Palate,   | None.   |
|                      |   | } <i>synarthrodia</i> .  |   |
| Innominate.          | Large, 3 parts; flat bone; with its fellow and sacrum and coccyx forms pelvis.<br><br><i>Ilium</i> —superior broad expanded portion, crest, superior, middle and inferior curved lines, iliopectineal line, venter, auricular surface, anterior and posterior, superior and inferior spinous processes, $\frac{2}{3}$ (about) of acetabulum.<br><i>Ischium</i> —lower and back portion, body, tuberosity and ramus, spine, greater and lesser sacro-sciatic notches, external and internal lips of tuberosity, lower boundary of obturator foramen, $\frac{2}{3}$ (about) of acetabulum.<br><i>Pubis</i> —body, horizontal ramus, descending ramus, spine, iliopectineal line, angle, symphysis, obturator foramen (upper boundary), $\frac{1}{3}$ of acetabulum. | { With its fellow of<br>opposite side,<br>Sacrum,<br>Femur— <i>enarthrodia</i> .                                     | <i>Ilium</i> —tensor vaginæ femoris, external oblique, latissimus dorsi, iliacus, transversalis, quadratus lumborum, erector spinæ, internal oblique, gluteus maximus, medius and minimus, rectus, pyriformis, multifidus spinæ, sartorius.<br><br><i>Ischium</i> —obturator externus and internus, gracilis, levator ani, gemelli superior and inferior, coccygeus, biceps, semi-tendinosus, semi-membranous, quadratus femoris, adductor magnus, transversus perinei, erector penis.<br><br><i>Pubis</i> —internal and external oblique, transversalis, rectus, pyramidalis, psoas parvus, pectineus, adductor magnus, longus and brevis, gracilis, external and internal obturator, levator ani, compressor urethræ, accelerator urinae. |

LUMBAR VERTEBRA, POSTERO-SUPERIOR VIEW.

- 1, 1. Anterior surface of body. 2, 2. Transverse processes. 3. Spinous process. 4, 4. Superior articular processes. 5, 5. Inferior articular processes.

SACRUM, ANTERIOR ASPECT.

- 1, 1, 1. Bodies of sacral vertebrae, with transverse lines of union. 2, 2, 2. Anterior sacral foramina. 3. Base. 4. Auricular surface of lateral aspect. 5. Its inferior portion. 6. Articular surface of base. 7. Notch for formation of last lumbar intervertebral foramen. 8. Superior articular process of first sacral vertebra. 9. Apex of sacrum. 10. Cornu. 11. Notch for transmission of fifth sacral nerve.

SACRUM, POSTERIOR ASPECT.

- 1, 1, 1. Spinous processes of sacral vertebrae. 2, 2. Sacral groove. 3, 3, 3. Posterior sacral foramina. 4, 4, 4. Articular processes, united. 5, 5, 5. Transverse processes. 6. Cribiform fossa. 7, 7. Auricular surface. 8, 8. Superior articular processes of first sacral vertebra. 9. Superior orifice of sacral canal. 10. Groove representing inferior orifice. 11, 11. Cornua. 12. Apex.

VERTEBRAL COLUMN, LATERAL ASPECT.

- 1-7. Cervical vertebrae. 8-19. Dorsal vertebrae. 20-24. Lumbar vertebrae. A, A. Spinous processes. B, B. Articular facets of transverse processes of first ten dorsal vertebrae. C. Auricular surface of sacrum. D. Foramina in transverse processes of cervical vertebrae.

COCCYX, ANTERIOR ASPECT.

1. Base. 2, 2. Cornua. 3. Second coccygeal vertebra. 4. Third coccygeal vertebra. 5. Fourth coccygeal vertebra. 6. Fifth coccygeal vertebra.

OCCIPITAL BONE, POSTERO-INFERIOR VIEW

1. Basilar process. 2. Foramen magnum. 3, 3. Posterior condyloid foramina. 4. Crest. 5. External occipital protuberance. 6, 6. Condyles. 7, 7. Jugular processes. 8, 8. Jugular fossae.

PARIETAL, TEMPORAL, AND SPHENOID BONES; POSTERIOR ASPECT.

1. Body of sphenoid bone. 2, 2. Sphenoid and temporal bones. 3, 3. Parietal bones. 4, 4. Mastoid processes. 5, 5. Jugular fossae. 6, 6. Notches entering into formation of sphenoidal fissures. 7, 7. Spheno-parietal sutures. 8, 8. Spheno-temporal sutures. 9, 9. Temporo-parietal sutures.

NASAL BONES, EXTERNAL ASPECT.

- 1, 1. The two nasal bones. 2, 2. Superior extremity. 3, 3. Inferior border. 4, 4. Internal border. 5, 5, 5. External border.

TABLE OF BONES.—*Continued.*

| NAME.                | PRINCIPAL FEATURES.   | ARTICULATIONS AND VARIETY.   | MUSCULAR AND LIGAMENTOUS ATTACHMENTS   |
|----------------------|---|--|--|
| Ischium.             | See <i>Innominate</i> .   |  |  |
| Lachrymal.           | Small; situated at front part of inner wall of orbit; resembles finger-nail; crest, lachrymal groove; flat bone.  | Frontal,<br>Ethmoid,<br>Superior maxillary,<br>Inferior turbinated, } <i>synarthrodia</i> .  | Tensor tarsi.  |
| Lingual.             | See <i>Hyoid</i> .  |  |  |
| Magnum (os).         | Largest bone of carpus; occupies center of wrist; head, neck, body; short bone.   | Scaphoid, } <i>enarthrodia</i> .<br>Semilunar, }<br>Second }<br>Third } Metacarpal— <i>arthrodia</i> .<br>Fourth }<br>Trapezoid, } <i>arthrodia</i> .<br>Unciform, } | Flexor brevis pollicis (part).   |
| Malar.               | Small; quadrangular; at upper and outer part of face; forms prominence of cheek, part of outer wall and floor of orbit, part of temporal and zygomatic fossæ; frontal, orbital, maxillary and zygomatic processes, malar foramen, four borders; irregular bone. | Frontal,<br>Sphenoid,<br>Temporal,<br>Superior maxillary, } <i>synarthrodia</i> .  | Levator labii superioris proprius, zygomaticus major and minor, masseter, temporal.  |
| Malleus.             | Resembles a hammer: head, neck, handle or manubrium, processus gracilis, processus brevis; irregular.   | Incus— <i>arthrodia</i> (trigger-joint).   | Tensor tympani.  |
| Maxillary, inferior. | See <i>Inferior maxillary</i> .   |  |  |
| Maxillary, superior. | See <i>Superior maxillary</i> .   |  |  |
| Metacarpal.          | Five in number; shaft, base, and head; long bones.  | Second row of carpus— <i>arthrodia</i> .<br>Phalanges— <i>condyloid</i> .  | To the <i>thumb</i> —flexor and extensor ossis metacarpi pollicis, first dorsal interosseous.<br><i>Second metacarpal bone</i> —flexor carpi radialis, extensor carpi radialis longior, first and second dorsal interosseous, first palmar interosseous, flexor brevis pollicis (frequently).<br><i>Third metacarpal</i> —extensor carpi radialis brevior, flexor brevis pollicis, adductor pollicis, second and third dorsal interosseous.<br><i>Fourth metacarpal</i> —third and fourth dorsal and second palmar interosseous.<br><i>Fifth metacarpal</i> —extensor carpi ulnaris, flexor carpi ulnaris, flexor ossis metacarpi minimi digiti, fourth dorsal, and third palmar interosseous. |
| Metatarsal.          | Five in number, shaft, base, and head; long bones.  | Tarsus— <i>arthrodia</i> .<br>Phalanges— <i>condyloid</i> .  | <i>First</i> —tibialis anticus (part), peroneus longus, first dorsal interosseous.<br><i>Second</i> —adductor pollicis, first and second dorsal interosseous, tibialis posticus (part).<br><i>Third</i> —adductor pollicis, second and third dorsal, and first plantar interosseous, tibialis posticus (part).<br><i>Fourth</i> —adductor pollicis, third and fourth dorsal and second plantar interosseous, tibialis posticus (part).<br><i>Fifth</i> —peroneus brevis, peroneus tertius, flexor brevis minimi digiti, transversus pedis, fourth dorsal, and third plantar interosseous.  |
| Nasal.               | Oblong; forms with its fellow the bridge of the nose; nasal foramen, spine, crest; flat bone.   | Frontal,<br>Ethmoid,<br>Nasal (opposite),<br>Superior maxillary, } <i>synarthrodia</i> .   |  |

SUPERIOR MAXILLARY BONE, EXTERNAL ASPECT.

nasal process. 16. Notch for anterior opening of nasal fossæ.

1. Anterior aspect of pyramidal process, or canine fossa.
2. Incisive or myrtiliform fossa.
3. Infra-orbital foramen.
4. Summit of pyramidal process, or malar process.
5. Posterior aspect of pyramidal process.
6. Inferior border of pyramidal process.
7. Posterior border, or maxillary tuberosity.
8. Nasal process.
9. Posterior border, grooved for lachrymal duct.
10. Anterior nasal spine.
11. Infra-orbital groove.
12. Summit of nasal process.
13. Posterior and superior angle.
14. Superior border.
15. Anterior border of

INFERIOR TURBINATED BONE, INTERNAL OR CONVEX ASPECT.

- process.
5. Ethmoidal process.
6. Portion of superior border that articulates with palate bone.
7. Anterior extremity.
8. Posterior extremity.

1. 1. Antero-posterior ridge, dividing the internal surface into two almost equal parts.
2. 2. Inferior border.
3. 3. Anterior portion of superior border, articulating with nasal process of superior maxillary bone.
4. Lachrymal process.

LACHRYMAL BONE, EXTERNAL ASPECT.

1. 1. Vertical crest, dividing external surface into two parts.
2. 2. Spine, in which crest terminates.
3. 3. Sulcus contributing to formation of lachrymal canal.
4. 4. Continuation of preceding, contributing to formation of nasal canal.
5. 5. Posterior division of external surface, contributing to formation of orbit.
6. 6. Anterior border.
7. 7. Posterior border.
8. Superior extremity.
9. Portion of inferior border that articulates with lachrymal process of inferior turbinate bone.
10. Portion that articulates with orbital plate of superior maxillary bone.

INFERIOR MAXILLARY BONE, EXTERNAL ASPECT.

11. Condyle.
12. Sigmoid notch.
13. Origin of inferior dental canal.
14. Mylo-hyoid groove.
15. Alveolar border.

1. Body of bone and external oblique line.
2. Ramus.
3. Symphysis.
4. Incisive fossa.
5. Mental foramen.
6. Depression in inferior border for attachment of digastric muscle.
7. Depression for passage of facial artery.
8. Angle of jaw.
9. Posterior extremity of internal oblique line.
10. Coronoid process.

- a. Incisors.
- b. Bicuspsids.
- c. Canines.
- m. Molars.

MALAR BONE, EXTERNAL ASPECT.

1. Orifice for malar nerve.
2. Superior or orbital border.
3. Inferior or zygomatic border.
4. Posterior or temporal border.
5. Anterior or maxillary border.
6. Superior angle.
7. Inferior angle.
8. Anterior angle.
9. Posterior angle.

LATERAL ASPECT OF SKULL.

1. Frontal bone.
2. Parietal bone.
3. Occipital bone.
4. Temporal bone.
5. Greater wing of sphenoid bone.
6. Lambdoid suture.
7. Occipito-parietal suture.
8. Squamo-parietal suture.
9. Masto-parietal suture.
10. Spheno-parietal suture.
11. Spheno-temporal suture.
12. Spheno-frontal suture.
13. Temporal ridge.
14. Malar bone.
15. Fronto-malar suture.
16. Malo-temporal suture.
17. Malo-maxillary suture.
18. Superior maxillary bone.
19. Infraorbital foramen.
20. Nasal bone.
21. Naso-maxillary suture.
22. Naso-frontal suture.
23. Lachrymal groove, at the bottom of which may be seen the suture between the lachrymal and the superior maxillary bones.
24. Nasal eminence.
25. Inferior maxillary bone.
26. Mental foramen.
27. Angle of lower jaw.
28. Coronoid process.
29. Condyle.
30. Neck of condyle.
31. External auditory canal.
32. Styloid process.
33. Mastoid process.
34. Masto-occipital suture.

PALATE BONE, EXTERNAL ASPECT.

1. External surface of orbital process.
2. Superior or orbital surface.
3. Anterior or maxillary surface.
4. Notch forming greater part of spheno-palatine foramen.
5. Sphenoidal process.
6. Groove entering into formation of posterior palatine canal.
7. Surface that enters into the formation of base of maxillary sinus.
8. External surface of pterygoid process.
9. Groove to receive posterior border of internal plate of pterygoid process.

TABLE OF BONES.—*Continued.*

| NAME.              | PRINCIPAL FEATURES   | ARTICULATIONS AND VARIETY.  | MUSCULAR AND LIGAMENTOUS ATTACHMENTS.  |
|--------------------|--|---|--|
| Occipital.         | Back part and base of cranium; trapezoid in shape; outer and inner tables; external protuberance, external occipital crest, superior and inferior curved lines, foramen magnum, condyles, jugular process, anterior and posterior condyloid foramina, basilar process, pharyngeal spine, 4 fossæ on internal surface, internal occipital protuberance and crest, grooves for the cerebral sinuses, torcular Herophili, jugular foramen; flat bone.   | Parietal (two),<br>Temporal (two),<br>Sphenoid,<br>Atlas— <i>double arthrodia.</i>  | Twelve pairs—occipito-frontalis, trapezius, sterno-cleido-mastoid, complexus, biventer cervicis, splenius capitis, superior oblique, rectus capitis posticus, major and minor, rectus lateralis, rectus capitis anticus, major and minor, superior constrictor of the pharynx.   |
| Palate.            | Back part of nasal fossa; helps to form floor and outer wall of nose, the roof of mouth and floor of orbit, also sphenomaxillary and pterygoid fossæ and the sphenomaxillary fissure; L-shaped; inferior or horizontal plate, superior or vertical plate, posterior palatine canal, posterior nasal spine, inferior and superior turbinated crests, maxillary process, pterygoid process, accessory descending palatine canals, orbital process, sphenoidal process, sphenopalatine foramen. | Sphenoid,<br>Ethmoid,<br>Superior maxillary,<br>Inferior turbinated,<br>Vomer,<br>Opposite palate,  | Tensor palati, azygos uvulæ, internal and external pterygoid, superior constrictor of pharynx.   |
| Parietal.          | Form sides and roof of skull; irregular, quadrilateral; two surfaces, four borders, four angles, parietal eminence, temporal ridge, parietal foramen, furrows for cerebral sinuses, depressions for Pacchionian bodies; flat bone.   | Opposite parietal,<br>Occipital,<br>Frontal,<br>Temporal,<br>Sphenoid,  | Temporal.  |
| Patella.           | Flat; triangular; sesamoid; anterior part of knee-joint; two surfaces, three borders, apex; flat bone.   | Condyles of femur— <i>partly arthrodial.</i>  | Rectus, crureus, vastus internus, vastus externus.   |
| Pelvic.            | Composed of two ossa innominata, sacrum and coccyx, <i>q. v.</i>   |   |  |
| Phalanges of foot. | Two of great toe, three of each of the others; shaft, base, head; long bones.  | First row with metatarsal and second phalanges— <i>condyloid.</i><br>Second of great toe with first phalanx; of other toes, with first and third phalanges,<br>Third row with second row, | <i>First—great toe</i> —inner tendon extensor brevis digitorum, abductor pollicis, adductor pollicis, flexor brevis pollicis, transversus pedis.<br><i>Second toe</i> —first and second dorsal interosseous, first lumbrical.<br><i>Third toe</i> —third dorsal and first plantar interosseous, second lumbrical.<br><i>Fourth toe</i> —fourth dorsal and second plantar interosseous, third lumbrical.<br><i>Fifth toe</i> —flexor brevis minimi digiti, abductor minimi digiti, third plantar interosseous, fourth lumbrical.<br><i>Second—great toe</i> —extensor longus pollicis, flexor longus pollicis.<br><i>Other toes</i> —flexor brevis digitorum, one slip of common tendon of extensor longus and brevis digitorum.<br><i>Third</i> —two slips from the common tendon of the extensor longus and extensor brevis digitorum, and flexor longus digitorum. |
| Phalanges of hand. | 14 in number, three for each finger and two for thumb; shaft, head, base; long bones.  | First row with metacarpal bones and second row of phalanges— <i>condyloid.</i><br>Second row with first and third rows,<br>Third row with second row,                                     | <i>Thumb</i> —extensor primi internodii pollicis, flexor brevis pollicis, abductor pollicis, adductor pollicis, flexor longus pollicis, extensor secundi internodii.<br><i>First—index finger</i> —first dorsal and first palmar interosseous.<br><i>Middle finger</i> —second and third dorsal interosseous.<br><i>Ring finger</i> —fourth dorsal and second palmar interosseous.<br><i>Little finger</i> —third palmar interosseous, flexor brevis minimi digiti, abductor minimi digiti.<br><i>Second—to all</i> —flexor sublimis digit-  |

BASE OF SKULL

1. Median suture of palatine vault. 2. Inferior orifice of anterior palatine canal. 3, 7. Inferior openings of posterior palatine canals. 4. Posterior border of palatine vault; posterior nasal spine. 5. Posterior border of nasal septum. 6. Hamular process. 11. Internal pterygoid plate of sphenoid bone. 7. Internal pterygoid plate. 8. External pterygoid plate. 9. Sphenoid fossa. 10. Oval or inferior maxillary foramen. 11. Foramen spinosum. 12. Foramen lacerum medium. 13. Zygomatic arch. 14. Spheno-occipital suture. 15. Genial cavity. 16. External auditory canal. 17. Mastoid process. 18, 18. Styloid process and stylo-mastoid foramen. 19. Inferior orifice of carotid canal. 20. Foramen lacerum posterius. 21, 21. Occipital condyles. 22. Basilar process. 23. Foramen magnum. 24. External occipital crest. 25-25. Inferior curved lines of occipital bone.

THE ORBITAL CAVITIES.

1. Anterior opening of nasal fosse. 2. Anterior extremity of inferior lacrimal bone. 3. Maxilla bone. 4, 4. Orbital cavity. 5. Lacrimal canal. 6. Os planum of ethmoid. 7. Optic foramen. 8. Sphenoidal fissure. 9. Spheno-maxillary fissure. 10. Great wing of sphenoid. 11. Squamous portion of temporal. 12. Anterior angle of parietal. 13. Portion of frontal bone entering into formation of temporal fossa. 14. Mastoid process. 15. Styloid process.

HYOID BONE, ANTERIOR ASPECT.

- 1, 1. Anterior or convex surface of body. 2, 2. Greater cornua. 3, 3. Junction of greater cornua with body. 4, 4. Lesser cornua.

THORAX, ANTERIOR VIEW.

1. Manubrium sterni. 2. Gladiolus. 3. Ensiform cartilage or xiphoid appendix. 4. Circumference of apex of thorax. 5. Circumference of base. 6. 1st rib. 7. 2d rib. 8, 8. 3d, 4th, 5th, 6th and 7th ribs. 9. 8th, 9th and 10 ribs. 10. 11th and 12th ribs. 11, 11. Costal cartilages.

RIBS OF LEFT SIDE, POSTERIOR ASPECT.

- 1-12. Anterior extremities of 12 ribs of left side. 13, 13. Internal surface. 14, 14. External surface. 15. Head of 1st rib. 16. Head of 2d rib. 17. Head of 3d rib. 18, 18. Heads of ribs from 4th to 9th. 19. Head of 10th rib. 20, 20. Heads of 11th and 12th ribs. 21, 21. Necks of ribs. 22. Tubercle of 1st rib. 23. Articular facet of tubercle of 2d rib. 24, 24. Articular facets of tubercles of ribs from 3d to 9th. 25. Articular facet for tubercle of 10th rib. 26, 26. Angles of ribs.

TABLE OF BONES.—*Continued.*

| NAME.                                    | PRINCIPAL FEATURES.  | ARTICULATIONS AND VARIETY.  | MUSCULAR AND LIGAMENTOUS ATTACHMENTS.  |
|--|--|---|--|
| Phalanges, of hand.<br><i>Continued.</i> |  |   | orum and extensor communis digitorum; in addition.<br><i>To index finger</i> —extensor indicis.<br><i>To little finger</i> —extensor minimi digiti.<br><i>Third</i> —flexor profundus digitorum, extensor communis digitorum.  |
| Pisiform.                                | Anterior and inner side of carpus; small; spherical; one articular facet; short bone.  | Cuneiform— <i>arthrodia</i> .   | Flexor carpi ulnaris, abductor minimi digiti, anterior annular ligament.   |
| Pubis.                                   | See <i>Innominate</i> .  |   |  |
| Radius.                                  | Outer side of forearm; shaft, head, neck, tuberosity, lower extremity, oblique line, sigmoid cavity, styloid process.  | Humerus— <i>ginglymus</i> .<br>Ulna, { superior— <i>diarthrodia rotatoria</i> .<br>middle— <i>membranous</i> .<br>inferior— <i>diarthrodia rotatoria</i> .<br>Semilunar— <i>condyloid</i> . | Biceps, supinator brevis, flexor sublimis digitorum, flexor longus pollicis, pronator quadratus, extensor ossis metacarpi pollicis, extensor primi internodii pollicis, pronator radii teres, supinator longus.  |
| Ribs.                                    | Twelve in number on each side; shaft, head, neck, tuberosity, angle (anterior and posterior), anterior or sternal extremity; first, second, tenth, eleventh and twelfth are peculiar; flat bones.  | Vertebrae— <i>arthrodia</i> .<br>Sternum, { First rib— <i>synarthrodia</i> .<br>Others— <i>arthrodia</i> .  | Internal and external intercostals, scalenus, anticus, medius and posticus, pectoralis minor, serratus magnus, obliquus externus, transversalis, quadratus lumborum, diaphragm, latissimus dorsi, serratus posticus superior and inferior, sacro-lumbalis, musculus accessorius ad sacro-lumbalem, longissimus dorsi, cervicalis ascendens, levatores costarum, infracostales. |
| Sacrum.                                  | Large triangular bone at lower part of vertebral column, and upper and back part of pelvic cavity; composed of five vertebrae; base, promontory, four surfaces, apex, central canal, anterior and posterior sacral foraminae, lateral masses, laminae, articular processes, sacral cornua, transverse processes, sacral groove, ala; irregular bone. | Last lumbar vertebra,<br>Coccyx,<br>Ossa innominata (two), } <i>amphiarthrodia</i> .  | Pyriformis, coccygeus, iliacus, gluteus maximus, latissimus dorsi, multifidus spinæ, erector spinæ, extensor coccygis.   |
| Scaphoid, of carpus.                     | Largest bone of first row; boat-shaped; upper and outer part of carpus; four surfaces; tubercle; short bone.   | Radius— <i>condyloid</i> .<br>Trapezium,<br>Trapezoid,<br>Os magnum,<br>Semilunar, } <i>arthrodia</i> .   | External lateral ligament of wrist.  |
| Scaphoid, of tarsus.                     | Or navicular bone; boat-shaped; inner side of tarsus, four surfaces, tuberosity; short bone.   | Astragalus,<br>Cuneiform (three),<br>Cuboid (occasionally), } <i>arthrodia</i> .  | Tibialis posticus (part).  |
| Scapula.                                 | Back part of shoulder; triangular; posterior aspect and side of thorax; two surfaces, three borders, three angles, subscapular fossa, subscapular angle, dorsum, spine, supra-spinous and infra-spinous fossæ, acromion process, glenoid cavity, neck, head, coracoid process; flat bone.  | Humerus— <i>enarthrodia</i> .<br>Clavicle— <i>arthrodia</i> .   | Subscapularis, supraspinatus, infraspinatus, trapezius, deltoid, omohyoid, serratus magnus, levator anguli scapulae, rhomboideus major and minor, triceps, teres major and minor, biceps, coraco-brachialis, pectoralis minor, platysma, latissimus dorsi.   |
| Semilunar.                               | Upper row of carpus; four surfaces, crescentic outline.  | Radius— <i>condyloid</i> .<br>Os magnum,<br>Unciform,<br>Cuneiform,<br>Scaphoid, } <i>arthrodia</i> .   |  |
| Sesamoid.                                | Small, rounded masses, cartilaginous in early life, osseous in the adult; developed in tendons; inconstant, except patellæ.  |   |  |
| Sphenoid.                                | Anterior part of base of skull; bat-shaped, with wings extended; body, two greater and two lesser wings, two pterygoid processes, ethmoidal spine, optic groove, optic foramen, olivary process, pituitary fossa, anterior, middle and posterior clinoid processes, sella turcica, carotid or cavernous.   | All the bones of cranium,<br>Malar (two),<br>Palate (two),<br>Vomer, } <i>synarthrodia</i> .  | Temporal, external and internal pterygoids, superior constrictor, tensor palati, levator tympani, levator palpebræ, obliquus superior, superior, inferior, internal and external recti.  |

CLAVICLE, INFERIOR ASPECT

Longitudinal depression for insertion of subclavius muscle. Rough impression for attachment of costoclavicular ligament. 3, 3. For attachment of coracoclavicular ligaments. 4, 4. Posterior border. 5, 5. Anterior border. 6, 6. Facet for articulation with sternum. 7. Facet for articulation with acromion.

SCAPULA, POSTERO-LATERAL ASPECT

1. Supraspinous fossa. 2. Infraspinous fossa. 3. Superior or coracoid border. 4. Coracoid or suprascapular notch. 5. Axillary or external border. 6. Anterior angle and glenoid cavity. 7. Inferior angle. 8. Rough impression for long head of triceps. 9. Internal or spinal border. 10. Spine. 11. Smooth surface over which trapezius muscle glides. 12. Acromion. 13. Base of spine. 14. Coracoid process.

HUMERUS, ANTERIOR ASPECT

1. Deltoid tuberosity. 2. Humeral head. 3. Anterior neck. 4. Greater or external tuberosity. 5. Lesser or internal tuberosity. 6. Surgical neck. 7. Ridge for attachment of coracohumeral ligament. 8. Anterior border of shaft. 9. External tuberosity. 10. Orifice of nutrient canal. 11. Lesser radial head. 12. Trochlea. 13. External condyle or epicondyle. 14. Internal condyle or epicondyle. 15. Inferior part of external border. 16. Inferior part of internal border. 17. Coronoid fossa.

RADIUS AND ULNA, ANTERIOR ASPECT

1. Anterior surface of body of ulna. 2. Greater sigmoid cavity. 3. Lesser sigmoid cavity. 4. Olecranon. 5. Coronoid process. 6. Orifice of nutrient canal. 7. Interosseous space. 8. Head of ulna. 9. Styloid process. 10. Body of radius. 11. Head. 12. Neck. 13. Bicipital tuberosity. 14. Ridge for insertion of pronator radii. 15. Inferior extremity of radius. 16. Styloid process.

BONES OF CARPUS, DORSAL ASPECT

R. Inferior extremity of radius. U. Inferior extremity of ulna. F. Interarticular fibro-cartilage. S. Scaphoid. L. Semilunar. C. Cuneiform. P. Pisiform. T. Trapezium. M. Trapezoid. Os magnum. U. Unciform. The numbers upon these bones indicate the number of others with which each articulates. 1, 2, 3, 4, 5. Proximal extremities of 1st, 2d, 3d, 4th and 5th metacarpal bones.

HAND, PALMAR SURFACE

1. Scaphoid. 2. Semilunar. 3. Cuneiform. 4. Pisiform. 5. Trapezium. 6. Groove for tendon of flexor carpi radialis. 7. Trapezoid. 8. Os magnum. 9. Unciform. 10, 10. Metacarpal bones. 11, 11. First phalanges of fingers. 12, 12. Second phalanges. 13, 13. Third phalanges. 14. First phalanx of thumb. 15. Second phalanx.

MEDIAN SECTION OF PELVIS, PLANE AND AXIS OF SUPERIOR STRAIT

passing through inferior margin of symphysis pubis. 11. Line perpendicular to last. 12. Arc of angle between these two.

Sacro-vertebral angle. 2, 2. Median section of sacrum. 3. Median section of coccyx. 4. Junction of sacrum and coccyx. 5, 5. Sacral canal. 6, 6. Median section of symphysis pubis. 7. Antero-posterior or sacro-pubic diameter of pelvic inlet. 8. Prolongation of this diameter. 9. Line perpendicular to this diameter at its middle. 10. Antero-posterior or cocci-pubic diameter of pelvic outlet. 11. Horizontal line passing through inferior margin of symphysis pubis. 12. Arc of angle between these two.

TABLE OF BONES,—*Continued.*

| NAME.   | PRINCIPAL FEATURES.  | ARTICULATIONS AND VARIETY.   | MUSCULAR AND LIGAMEN-<br>TOUS ATTACHMENTS.   |
|---|--|--|--|
| Sphenoid —<br><i>Continued</i>                                  | ous groove, lingula, ethmoidal crest, sphenoidal cells or sin-<br>uses, sphenoidal turbinated<br>bones, rostrum, vaginal pro-<br>cesses, pterygo-palatine canal,<br>spinous processes, round fora-<br>men, oval foramen, foramen<br>Vesalii, foramen spinosum, ptery-<br>goid ridge, external orbital fora-<br>mina, vidian canal, pterygoid<br>fossa, internal and external<br>pterygoid plates, hamular pro-<br>cess, scaphoid fossa.  |  |  |
| Sphenoidal<br>turbinated<br>or sphenoid-<br>al spongy<br>bones. | Situated at anterior and inferior<br>part of body of sphenoid; exist<br>as separate pieces until puberty<br>and occasionally are not joined<br>in the adult.   | Ethmoid, } <i>synarthrodia</i> .<br>Palate, }  | None.  |
| Stapes.   | Resembles a stirrup; one of the<br>ossicles of the tympanum; head,<br>neck, two branches (crura), base;<br>irregular bone.   | Incus— <i>arthrodia</i> .  | Stapedius.   |
| Sternum.  | The breast bone; manubrium,<br>gladiolus, ensiform cartilage, or<br>first, second and third pieces,<br>anterior and posterior surface,<br>borders.   | Clavicles (two)— <i>arthrodia</i> .<br>Costal cartilages (seven on each side)<br>first— <i>synarthrodia</i> ; others, <i>arthro-<br/>dia</i> .                                       | Pectoralis major, sterno-cleido-mas-<br>toid, sterno-hyoid, sterno-thyroid,<br>triangularis sterni, aponeuroses of<br>the obliquus and internus, and trans-<br>versalis muscles, rectus, diaphragm.  |
| Superior<br>maxillary.  | Forms with its fellow the whole<br>of the upper jaw; somewhat cu-<br>boidal; body and malar, nasal,<br>alveolar and palatine processes;<br>hollow (the antrum of Highmore<br>or maxillary sinus), incisive or<br>myrtiliform fossa, canine fossa,<br>canine eminence, infra-orbital fo-<br>ramen, posterior dental canals,<br>maxillary tuberosity, posterior<br>palatine canal, infra-orbital<br>groove; irregular bone.  | Frontal,<br>Ethmoid,<br>Nasal,<br>Malar,<br>Lachrymal,<br>Inferior turbinated,<br>Palate,<br>Vomer,<br>Fellow of opposite<br>side. } <i>synarthrodia</i> .                           | Orbicularis palpebrarum, obliquus in-<br>ferior oculi, levator labii superioris<br>alæque nasi, levator labii superioris<br>proprius, levator anguli oris, com-<br>pressor nasi, depressor alæ nasi,<br>dilator naris posterior, masseter,<br>buccinator, internal pterygoid, orbi-<br>cularis oris. |
| Tarsal.   | Consist of calcaneum, or os calcis,<br>astragalus, cuboid, scaphoid, in-<br>ternal, middle and external<br>cuneiform. See <i>Individual bones</i> .  |  |  |
| Temporal.   | Situated at side and base of skull;<br>squamous, mastoid and petrous<br>portions, temporal ridge, zygoma-<br>to or zygomatic process, emi-<br>nentia articularis, Glaserian fis-<br>sure, tubercle, glenoid fossa,<br>post-glenoid process, tympanic<br>plate, mastoid foramen, digastric<br>fossa, occipital groove, sigmoid<br>fossa, mastoid cells, meatus audi-<br>torius externus, hiatus Fallopii,<br>meatus auditorius internus,<br>lamina cribrosa, aquæductus<br>vestibuli, styloid process, stylo-<br>mastoid foramen, auricular fis-<br>sure; irregular bone. | Occipital,<br>Parietal,<br>Sphenoid,<br>Inferior maxillary,<br>Malar, } <i>synarthrodia</i> .  | Temporal, masseter, occipito-frontalis,<br>sterno-mastoid, splenius capitis,<br>trachelo-mastoid, digastricus, retra-<br>hens aurem, stylo-pharyngeus, stylo-<br>hyoideus, stylo-glossus, levator pa-<br>lati, tensor tympani, tensor palati,<br>stapedius.  |
| Tibia.  | At front and inner side of leg;<br>next to femur in length and<br>size; prismoid in form; upper<br>extremity or head, tuberosities,<br>spinous process, tubercle, popli-<br>teal notch, shaft, crest (the shin),<br>oblique line, internal malleolus;<br>long bone.  | Femur— <i>ginglymus</i> .<br>{ superior— <i>arthrodia</i> .<br>Fibula, { middle— <i>membranous</i> .<br>{ inferior— <i>arthrodia</i> .<br>Astragalus with fibula— <i>ginglymus</i> . | Semi-membranosus, tibialis anticus,<br>extensor longus digitorum, biceps,<br>sartorius, gracilis, semi-tendinosus,<br>tibialis anticus, popliteus, soleus,<br>flexor longus digitorum, tibialis pos-<br>ticus, ligamentum patellæ.   |
| Trapezium.  | In lower row of carpus; very<br>irregular; six surfaces, groove;<br>short bone.  | Scaphoid,<br>Trapezoid,<br>First and second meta-<br>carpal, } <i>arthrodia</i> .  | Adductor pollicis, flexor ossis meta-<br>carpi pollicis, flexor brevis pollicis<br>(part).   |
| Trapezoid.  | Smallest bone in second row of<br>carpus; wedge-shaped; six sur-<br>faces; short bone.   | Scaphoid,<br>Second metacarpal,<br>Trapezium,<br>Os magnum, } <i>arthrodia</i> .   | Flexor brevis pollicis (part).   |
| Triquetral.   | See <i>Wormian bones</i> .   |  |  |

RIGHT INNOMINATE BONE, EXTERNAL ASPECT.

1. Superior border, or crest. 2. Anterior superior iliac spine.
3. Posterior superior iliac spine. 4, 4, 4. Superior curved line. 5, 5. Inferior curved line. 6. Surface between inferior curved line and acetabulum. 7. Anterior inferior iliac spine.
8. Anterior interspinous notch. 9. Posterior inferior iliac spine. 10. Posterior interspinous notch. 11. Spine of ischium. 12. Great sciatic notch. 13. Acetabulum. 14. Foramen of acetabulum. 15, 15. Circumference of acetabulum.
16. Crest of pubis. 17. Spine of pubis. 18. Horizontal branch of pubis. 19. Descending branch of pubis. 20, 20. Ischium. 21. Groove for tendon of obturator externus muscle. 22. Obturator foramen.

FEMUR, POSTERIOR ASPECT. TIBIA AND FIBULA, ANTERIOR ASPECT.

- 1, 1. Linea aspera. 2, 2. External division. 3. Internal division. 4, 4. Inferior divisions. 5. Head. 6. Depression for attachment of round ligament. 7. Neck. 8. Great trochanter. 9. Digital or trochanteric fossa. 10. Lesser trochanter. 11. Outer condyle. 12. Inner condyle. 13. Intercondylar notch. 14. Outer tuberosity. 15. Inner tuberosity.

1. Shaft of tibia. 2. Internal tuberosity. 3. External tuberosity. 4. Spine. 5. Tubercle. 6. Crest. 7. Inferior extremity. 8. Internal malleolus. 9. Shaft of fibula. 10. Superior extremity. 11. Inferior extremity and external malleolus.

PELVIS, ANTERO-POSTERIOR VIEW, SUPERIOR STRAIT.

- 1, 1. Internal iliac foramina. 2, 2. Iliac crests. 3, 3. Anterior superior iliac spines. 4, 4. Anterior inferior iliac spines. 5, 5. Horizontal branch of pubis. 6, 6. Horizontal branches of pubis. 7, 7. External and amphysis of pubis. 8, 8. Acetabula. 9, 9. Tuberosities of ischia. 10, 10. Ascending rami of ischium. 11, 11. Descending rami of pubes. 12, 12. Spines of ischia. 13, 13. Posterior wall of pelvic cavity. 14, 14. Sacral hiatus. 15. Sacro-vertebral angle. 16, 16. Superior strait.

FOOT, PLANTAR ASPECT.

1. Inferior surface of calcaneum. 2. Inner tuberosity. 3. Outer tuberosity. 4. Angular depression between these tuberosities. 5. Inferior portion of head of astragalus. 6. Plantar surface of cuboid, for attachment of inferior calcaneo-cuboid ligament. 7. Tuberosity of cuboid. 8. Scaphoid. 9. Tuberosity of scaphoid. 10. Inferior portion of internal cuneiform. 11. Apex of middle cuneiform. 12. Apex of internal cuneiform. 13, 14, 15, 16, 17. First, second, third, fourth and fifth metatarsal bones. 18. Tuberosity of fifth metatarsal bone. 19. Two sesamoid bones. 20. First phalanx of great toe. 21. Last phalanx of great toe. 22, 22. First phalanges of remaining toes. 23, 23. Second and third phalanges of these toes.

TABLE OF BONES.—Continued.

| NAME.                | PRINCIPAL FEATURES.   | ARTICULATIONS AND VARIETY.   | MUSCULAR AND LIGAMENTOUS ATTACHMENTS.   |
|----------------------|---|--|---|
| Turbinate, inferior. | One on each side of outer wall of nasal fossæ; curled like a scroll; two surfaces, two borders, two extremities, lachrymal process, ethmoidal process, maxillary process.   | Ethmoid,<br>Superior maxillary,<br>Lachrymal,<br>Palate, } <i>synarthrodia</i> .   |   |
| Turbinate, middle.   | The free convoluted margin of the thin lamella, that descends from the under surface of the cribriform plate of the ethmoid bone.   |  |   |
| Turbinate, superior. | The thin curved plate of the ethmoid, that bounds the superior meatus of the nose above.  |  |   |
| Tympanic.            | Includes the <i>Incus</i> , <i>Malleus</i> and <i>Stapes</i> ( <i>q. v.</i> ).  |  |   |
| Ulna.                | Inner side of forearm, parallel with radius; prismatic; shaft and two extremities, olecranon process, coronoid process, greater and lesser sigmoid cavities, oblique ridge, perpendicular line, head or lower extremity, styloid process; long bone.  | Humerus— <i>ginglymus</i><br>Radius, { superior— <i>diarthrodia rotatoria</i> .<br>middle— <i>membranous</i> .<br>inferior— <i>diarthrodia rotatoria</i> .   | Triceps, anconeus, flexor carpi ulnaris, brachialis anticus, pronator radii teres, flexor sublimis digitorum, flexor profundus digitorum, flexor longus pollicis (occasionally), pronator quadratus, supinator brevis, extensor ossis metacarpi pollicis, extensor secundi internodii pollicis, extensor indicis, extensor carpi ulnaris.   |
| Unciform.            | Wedge-shaped; hook-like process; in lower row of carpus; short bone.  | Semilunar,<br>Fourth and fifth meta-<br>carpal,<br>Cuneiform,<br>Os magnum, } <i>arthrodia</i> .   | Flexor brevis minimi digiti, flexor ossis metacarpi minimi digiti, anterior annular ligament.   |
| Vertebrae.           | Twenty-six: cervical seven, dorsal twelve, lumbar five, sacrum (composed of five), coccyx (composed of four; each has a body and an arch; latter has two pedicles, two laminae and seven processes, viz.: four articular, two transverse, one spinous. Peculiar vertebrae, first, second and seventh cervical; first, ninth, tenth, eleventh and twelfth dorsal, sacrum, coccyx; irregular bones. | Articulate with each other, and with occipital and innominate bones and ribs ( <i>q. v.</i> ).<br>Intervertebral articulations, between the bodies— <i>amphiarthrodia</i> .<br>Between articular processes— <i>arthrodia</i> . | Attachment of muscles.— <i>To the Atlas</i> are attached nine pairs: the longus colli, rectus anticus minor, rectus lateralis, rectus posticus minor, obliquus superior and inferior, splenius colli, levator anguli scapulae and first intertransverse.<br><i>To the Axis</i> are attached eleven pairs: the longus colli, obliquus inferior, rectus posticus major, semispinalis colli, multifidus spinæ, levator anguli scapulae, splenius colli, scalenus medius, transversalis colli, intertransversales, interspinales.<br><i>To the remaining vertebrae</i> generally are attached thirty-five pairs and a single muscle: anteriorly, the rectus anticus major, longus colli, scalenus anticus, medius, and posticus, psoas magnus, psoas parvus, quadratus lumborum, diaphragm, obliquus internus and transversalis; posteriorly, the trapezius, latissimus dorsi, levator anguli scapulae, rhomboideus major and minor, serratus posticus superior and inferior, splenius, erector spinæ, sacro-lumbalis, longissimus dorsi, spinalis dorsi, cervicalis ascendens, transversalis colli, trachelo-mastoid, complexus, biventer cervicis, semispinalis dorsi and colli, multifidus spinæ, rotatores spinæ, interspinales, supraspinales, intertransversales, levatores costarum. |
| Vomer.               | Situated vertically at back part of nasal fossæ; forms part of septum of nose; somewhat like a plow-share; two surfaces and four borders.   | Sphenoid,<br>Ethmoid,<br>Superior maxillary<br>(two),<br>Palate (two),<br>Cartilage of the septum, } <i>synarthrodia</i> .   |   |
| Wormian.             | Supernumerary bones; irregular, inconstant, isolated, interposed between the cranial bones, most frequently in the lambdoid suture.   |  |   |

**Bose's Operation.** See *Operation*, *Table of*.

**Boss** (*boz*) [ME., *boes*]. A wide, fattish protuberance, as on the skull or on a tumor.

**Bosselated** (*boz-el-ated*) [ME., *boz*]. Covered with bosses or small nodules.

**Bosselation** (*boz-el-ation*) [ME., *boz*]. A boss-like elevation of the surface.

**Bostock's Catarrh.** See *Disease*, *Table of*.

**Bostryx** (*boz-triks*) [*boz-trix*, a curl]. In biology, a helical line.

**Boswellia** (*boz-wel-ya*) [after *Boswell*, a Scotch botanist]. A genus of large resinous trees of S. Asia and E. and Central Africa. *B. carteri* furnishes *gummi*, as also *B. serrata*.

**Bosworth's Operation.** See *Operation*, *Table of*.

**Bot** (*bot*) [*bot*, a belly worm]. The larva of certain species of flies of the genus *Estrus*, which are conveyed into the stomach of man, where they hatch. Also the larval worm, *Oxyuris vermicularis*. See *Parasites* (*Animal*), *Table of*.

**Botal, or Botallo, Duct of.** See *Duct*. **B., Foramen of.** See *Foramina*, *Table of*. **B., Valve of.** See *B., Valve of*.

**Botulismus** (*bot-ul-ez'-mus*). See *Botulismus*.

**Botanic** (*bot-an-ik*) [*bot-an*, an herb]. Pertaining to botany. **B. Physician**, a title assumed by certain persons who profess to use only vegetable remedies. See *Physician*.

**Botanist** (*bot-in-ist*) [*bot-an*, herb]. A student of botany.

**Botanophile** (*bot-an'-fil*) [*bot-an*, herb; *oîlav*, to love]. Botanic dilettanti. Persons fond of botany, but not true botanists.

**Botany** (*bot-un-ee*) [*bot-an*, an herb]. The science of plants—their classification and structure. **B. Bay Gum.** See *Arabis*.

**Bote** (*bot*). See *Parasites*.

**Bothria** (*bot-rya*) [*l.*]. Plural of *Bothrion*, or of *Bothriocephalus*.

**Bothriocephalus** (*bot-rye-ef'-al-us*) [*bothrion*, a pit; *kephalos*, a head]. A genus of tapeworms. See *Tapeworms*. **B. latus**, the *Broad tapeworm*; a common parasite of man in certain European localities. It may reach twenty-five feet in length, with a breadth of three-fourths of an inch. It is also called *Tenia lata*, and *Dobsonium latum*. See *Parasites* (*Animal*), *Table of*.

**Bothrion** (*bot-ryon*) [*bothrion*, a pit]. 1. A small cavity; the socket of a tooth. 2. A facet, or fosset, such as is seen upon the head of most of the tapeworms. 3. A deep corneal ulcer.

**Bothrium** (*bot-ryum*). See *Bothrion*.

**Botum** (*bot-um*) [*l.*]. A goiter or tumor of the neck. **B. trachelophyma**. Synonym of *Goiter*.

**Botrel's Operation.** See *Operation*, *Table of*.

**Botryoid** (*bot-ryoid*) [*bot-ryon*, a cluster; *oidos*, likeness]. Resembling in shape a bunch of grapes.

**Botryomycosis** (*bot-ry-mi-koh'-is*) [*bot-rye*, a bunch of grapes; *mycosis*, a fungus]. A disease of horses in which chromatic nodules form in the lungs. It is dependent upon the presence of a microorganism called *Botryomyces*.

**Botryose** (*bot-ry-oh*) [*bot-rye*, a cluster of grapes]. An infection constructed on the plan of a raceme.

**Botryo-therapeutics** (*bot-rye-ther-ap'-ut-iks*) [*bot-rye*, a bunch of grapes; *therapeutics*, medical art]. See *Grape Cure*.

**Bots** (*botz*), **Bott** (*bot*). See *Bot*.

**Böttcher's Cells**. Small cells in the cochlea, occurring in a single layer in the basilar membrane. **B.'s Crystals**, peculiar microscopic crystals formed by adding a drop of a concentrated solution of phos-

phate of ammonia to a drop of prostatic secretion. They are composed of a phosphate formed from a base that exists in prostatic fluid, and that is supposed to impart to it its peculiar odor. **B.'s Test.** See *Tests*, *Table of*.

**Botteker's Test.** See *Tests*, *Table of*.

**Böttger's Test.** See *Tests*, *Table of*.

**Bottini's Operation.** See *Operations*, *Table of*.

**Bottle** (*bot'l*) [ME., *botel*; Fr., *bouteille*]. A vessel, usually of glass, with a narrow neck. **B., Feeding**, a flat flask with a nipple of India-rubber attached, used for feeding infants. **B. Nose**, a common name for *Aene rosacea*. **B., Specific Gravity**, a Florence flask graduated to contain 500–1000 grains of water, with the weight of which an equal volume of any other liquid may be compared. **B.-stoop**, in pharmacy, a block so grooved that it serves to hold a wide-mouthed bottle in an oblique position while a powder is being dispensed from it. **B.-wax**, a hard, stiff variety of wax used in sealing bottles.

**Botts** (*botz*). See *Bot*.

**Botulinic Acid** (*bot-u-lin'-ik as'-id*) [*botulus*, a sausage]. An acid asserted to exist in putrefying sausages, and to constitute their specific poison.

**Botulism** (*bot-u-lizm*), **Botulismus** (*bot-u-liz'-mus*) [*botulus*, a sausage]. Sausage-poisoning. See *Allantosis*, *Blutizen*, and *Allanto-toxicon*.

**Bouchard's Diet.** See *Treatment*, *Methods of*. **B.'s Method.** See *Treatment*, *Methods of*. **B.'s Nodules**, nodules appearing upon the phalangeal joints of the hands of persons suffering with gastrostasis.

**Bouchut's Tubes.** A variety of tubes for intubation of the larynx.

**Bougard's Paste.** A caustic paste containing bichlorid of mercury, chlorid of zinc, arsenic, cinnabar, starch, and wheat flour. It is used as an application to carcinoma.

**Bougie** (*boo-zhe'*) [Fr., a candle]. A slender, cylindrical instrument made of waxed silk, catgut, etc., for introduction into the urethra or other passage, for the purpose of dilation, exploration, etc. Sometimes bougies are covered with preparations that are thus conveyed to the inner mucous surfaces. **B., Armed**, a bougie with a piece of nitrate of silver or other caustic attached to its extremity. **B., Filiform**, a whalebone or other bougie of very small size.

**Bouhou** (*boo-hoo'*). See *Bookhou*.

**Bouillaud's Disease.** See *Endocarditis*, and *Diseases*, *Table of*.

**Bouillon** (*boo-e-yon' (g)*) [Fr.]. An alimentary broth made by boiling meat, usually beef, in water. A soup. Also a liquid nutritive medium made by boiling meat, for the culture of microorganisms. Peptonized bouillons and solutions of powdered meats have also been used. **B. of Liebig**, made by dissolving Liebig's meat extract, 5 grams, in boiling water, 100 grams, neutralizing with bicarbonate of soda and filtering. Its nutritive value is increased by adding glucose.

**Bouisson's Operation.** See *Operations*, *Table of*.

**Bouknesia** (*book-ne'-me-ah*). Synonym of *Elephantiasis arabum*.

**Boulesia** (*boo-le'-is*). See *Bulesis*.

**Boulimia** (*boo-lim'-ee-ah*). See *Bulimia*.

**Boulopeithia** (*boo-lo-pi'-the-ah*). See *Bulopeithia*.

**Boulton's Solution.** A solution used in the form of a spray in the treatment of rhinitis. Its formula is, compound tincture of iodine mxx; carbolic acid (cryst.), mvi; glycerin, ʒviij; distilled water, ʒv. This is placed in a water bath at 100°, in a tightly-corked bottle until the solution becomes colorless, and is then filtered.

**Bouquet** (*boo-ka'*) [Fr.]. 1. In anatomy, a cluster, of nerves, blood-vessels, or muscles. 2. The delicate

- perfume and flavor of good wine. 3. The odor characteristic of a disease. **B. of Riolan**, the cluster of ligaments and muscles attached to the styloid process.
- Bourdin's Paste**. A mixture of nitric acid with flowers of sulphur; used as an escharotic.
- Bourdonnement** (*boor-don-mon(g')*) [Fr., *bourdonner*, to buzz]. Any buzzing sound. The murmur that is heard when the stethoscope is applied to any part of the body. It is thought to result from contraction of the muscular fibrille. See, also, *Bombus*.
- Boutha** (*boof'-thah*). A non-alcoholic, stimulating, aerated beverage, containing *thein*; proprietary.
- Bouton** (*boo-ton(g')*) [Fr.]. 1. A bud or bulb. 2. A pimple. **B. d'Alep**, the Aleppo button or boil. See *Furunculus orientalis*. **B. de Biskra**. See *Furunculus orientalis*.
- Boutons Terminals**. Small terminal enlargements or tactile-cells of sensory nerves, as in the nose of the guinea pig and mole.
- Boutonniere Operations**. See *Operations, Table of*.
- Bovet, Bacillus of**. See *Bacteria, Synonymatic Table of*.
- Bovey Coal** (*bo'-ve kol*). See *Lignite*.
- Bovina Fames** (*bo-vi'-nah fa'-mez*) [L.]. Bovine hunger; bulimia.
- Bovine** (*bo'-vin*) [*bovinus*, of an ox]. Ox-like. **B. Heart**, the immensely hypertrophied heart of aortic valvular disease. **B. Hunger**. See *Bovina Fames*.
- Bovine** (*bo'-vin-in*) [*bos, bovis*, an ox]. A proprietary preparation of beef used as a food for invalids and convalescents.
- Bovista** (*bo-vis'-tah*) [L.]. 1. A genus of fungi closely allied to *Lycoperdon*; some of the species are edible. 2. The *Lycoperdon bovista*, a fungus or puff-ball. When dry it is a good styptic, and its tincture is used for nervous diseases. It is chiefly employed by homeopaths.
- Bow** (*bo*) [ME., *bowe*]. A bending. **B.-drill**, a kind of drill worked by a bow and string, formerly employed in lithotripsy. **B.-leg**, a bending outward of the lower limbs. See *Genu varum*.
- Bowditch Island Ringworm**. See *Tinea imbricata*.
- Bowels** (*bow'-elz*) [ME., *bowele*; *botellus*, a sausage]. The intestines.
- Bowman's Capsule**. The hyaline membrane that forms the wall of the enlargement at the origin of a uriniferous tubule. Same as *Malpighian Capsule*. **B. Discs**, the products of a breaking up of muscle-fibers in the direction of the transverse striations. These correspond to the discs of "principal substance" of Dobie. **B. Glands**. See *Gland*. **B. Lamellæ of the Cornea**. See *Membrane of Descemet*. **B. Membrane**, a thin homogeneous membrane representing the uppermost layer of the stroma of the cornea, with which it is intimately connected. **B. Muscle**. See *Muscles*,

BOWMAN'S CAPSULE AND GLOMERULUS.

a. Vas afferens. e. Vas efferens. c. Capillary network of the cortex. k. Endothelium of the capsule. h. Origin of a convoluted tubule. (After Landois.)

*Table of. B. Operations*. See *Operations, Table of*. **B. Physic**. See *Gillenla*. **B. Probe**. See *Lachrymal*. **B. Root**. See *Gillenla*. **B. Tubes**, artificial passages made by forcing air or fluids between the corneal lamellæ.

- Box, Boxwood** (*boks, boks'-wood*). See *Buxus*. **B.-berry**, a popular name for *Gaultheria procumbens*. **B. Plate**, a metallic plate with an air-tight chamber, used as an obturator, or in connection with artificial teeth, for the replacement of the loss of natural structure. See *Raised Base*. **B. Pulse-measurer**, an instrument for measuring the pulse by its action upon a column of liquid when the exposed artery is placed within an oblong box communicating with the column.
- Boyer's Apparatus**. An apparatus for reducing fractures of the humerus; it is composed of four splints and two spiral bandages, one within and one around the splints. **B. Bandage**. See *Bandage*. **B. Cyst**. See *Diseases, Table of*. **B. Splint**. See *B.'s Apparatus*.
- Boyle's Law**. See *Law*. **B. Ventilator**. See *Ventilation*.
- Boynnton's Method**. See *Operations, Table of*. **B. Treatment**. See *Treatment, Methods of*.
- Bozeman's Apparatus**. A wooden framework intended to hold a patient in the knee-elbow posture in the operation for vesico-vaginal fistula. **B. Catheter**, a double-current catheter. **B. Operation**. See *Operations, Table of*.
- Braccate** (*brak'-ät*) [*braccæ*, breeches]: In biology, having the feet completely feathered.
- Brachelytrous** (*bra-kel'-it-rus*) [*ῥαχίς*, short; *ἐλντρον*, a sheath]. In biology, with short elytra or wing-covers.
- Brachia** (*bra'-ke-ah*). Plural of *Brachium*.
- Brachial** (*bra'-ke-al*) [*brachium*, the arm]. Pertaining to the arm. **B. Artery**, the continuation of the axillary artery, extending along the inner side of the arm. See *Arteries, Table of*. **B. Diplegia**. See *Paralysis*. **B. Glands**, the lymphatic glands of the arm. See *Gland*. **B. Plexus**, the plexus of the fifth, sixth, seventh and eighth cervical and the first dorsal pair of nerves. See *Plexuses, Table of*. **B. Veins**, the veins of the arm that accompany the brachial artery. See *Vein*.
- Brachialgia** (*bra-ke-al'-je-ah*) [*ῥαχίωρ*, the arm; *ἄλγος*, pain]. Pain or neuralgia in the arm or in the brachial plexus.
- Brachialis anticus** (*bra-ke-a'-lis an'-tik-us*). See *Muscles, Table of*.
- Brachiate** (*bra'-ke-ät*) [*brachium*, an arm]. In biology, possessing arms or branches.
- Brachinin** (*brak'-in-in*) [*ῥαχίς*, short]. A substance obtained from the Bombardier Beetle, *Brachinus crepitans*, of Europe. It is said to be efficacious against rheumatism. Unof.
- Brachiocephalic** (*bra-ke-o-sef-al'-ik*) [*ῥαχίωρ*, the arm; *κεφαλή*, head]. Pertaining to the arm and the head. **B. Artery and Vein**, the innominate artery and vein.
- Brachiocubital** (*bra-ke-o-kul'-bit-al*) [*ῥαχίωρ*, the arm; *cubitus* the forearm]. Relating to the arm and forearm; as the brachio-cubital ligament.
- Brachiocyllosis** (*bra-ke-o-sil-o'-sis*) [*ῥαχίωρ*, the arm; *κύλιωσις*, a bending]. A crookedness of the arm; also the paralysis that may accompany it.
- Brachiodermian** (*bra-ke-o-der'-mean*) [*ῥαχίωρ*, the arm; *δέρμα*, the skin]. Relating to the skin of the arm.
- Brachioncus** (*bra-ke-ong'-kus*) [*ῥαχίωρ*, the arm; *ὄγκος*, a swelling]. Any hard and chronic swelling of the arm.
- Brachionigraph** (*bra-ke-on'-ig-raf*) [*ῥαχίωρ*, the arm; *γράφειν*, to write]. A device or apparatus by which a

person who has lost the hand, or who has writer's cramp, can write by means of the muscles of the upper arm.

**Brachioradial** (*brak-ee-oh'-ee-ah*) [*βραχιωρ*, the arm; *radia*, a staff]. The supinator radii longus muscle. See *Muscles*, *Table 1*.

**Brachiorrheuma** (*brak-ee-oh'-ee-mah*) [*βραχιωρ*, the arm; *rrheuma*, a flux]. Rheumatism of the arm.

**Brachiotrophosis** (*brak-ee-oh'-trof'-ee-ah*) [*βραχιωρ*, the arm; *trophos*, to turn]. A twist or twisted deformity of the arm.

**Brachiotomy** (*brak-ee-oh'-ee-mee*) [*βραχιωρ*, the arm; *tomia*, a section]. The surgical or obstetric removal of an arm.

**Brachiplex** (*brak-ee-oh'-pleks*) [*βραχιωρ*, the arm; *plexus*, a twining]. The brachial plexus.

**Brachiplexal** (*brak-ee-oh'-pleks-ah*) [*βραχιωρ*, the arm; *plexus*, a twining]. Relating to the brachiplex.

**Brachiocephalic**, or **Brachiocephalous** (*brak-ee-oh'-ee-foh'-ee-ah*, or *brak-ee-oh'-ee-foh'-ee-ah*) [*βραχιωρ*, short; *kephala*, head]. Having an extremely short and very broad head.

**Brachium** (*brak-ee-um*) [*brachium*, *βραχιον*, the arm; *cf.* *Brachia*]. The arm, especially the upper arm; the arm above the elbow. An extensor process of an organ. **B. Cerebri** or **B. of Optic Lobes**, the bands connecting the nates and testes with the optic thalamus. **B. Pontis**, the brachium of the pons, being also the middle peduncle of the cerebellum. **Brachia cerebelli**, the peduncles of the cerebellum.

**Brach-Romberg Symptom.** See *Signs and Symptoms*, *Index*.

**Brachybiotic** (*brak-ee-oh'-ee-ik*) [*βραχις*, short; *bios*, life]. Short-lived.

**Brachycardia** (*brak-ee-kar'-de-ah*). Same as *Bradycardia*.

**Brachycephalia** (*brak-ee-sef'-ah-le-ah*) [*βραχις*, short; *kephala*, a head]. The quality of being brachycephalic.

**Brachycephalic** (*brak-ee-sef'-ah-le-ik*) [*βραχις*, short; *kephala*, a head]. In biology, applied to skulls of an egg-like shape, with the larger end behind. Having a skull, the transverse diameter of which is more than eight-tenths of the long diameter. See *Index*.

**Brachycephalism** (*brak-ee-sef'-ah-le-izm*). See *Brachycephalia*.

**Brachycephalous** (*brak-ee-sef'-ah-le-us*) [*βραχις*, short; *kephala*, a head]. Brachycephalic.

**Brachycephaly** (*brak-ee-sef'-ah-le*). See *Brachycephalia*.

**Brachydactylia** (*brak-ee-dah'-til'-ee-ah*) [*βραχις*, short; *dactylia*, a digit]. Abnormal shortness of the fingers or toes.

**Brachydactylism** (*brak-ee-dah'-til'-izm*). See *Brachydactylia*.

**Brachydactylous** (*brak-ee-dah'-til'-us*) [*βραχις*, short; *dactylia*, a finger]. Pertaining to an abnormal shortness of the fingers or toes.

**Brachygnathism** (*brak-ee-nath'-izm*) [*βραχις*, short; *gnathos*, a jaw]. Shortness of length of the superior maxillary arch, as in a horse.

**Brachykephalia** (*brak-ee-kef'-ah-le-ah*). See *Brachycephalia*.

**Brachymetropia** (*brak-ee-met'-rof'-ee-ah*) [*βραχις*, short; *metropia*, a measure]. See *Metropia*.

**Brachymetropic** (*brak-ee-met'-rof'-ee-ik*) [*βραχις*, short; *metropia*, a measure]. See *Metropia*.

**Brachyodont** (*brak-ee-oh'-ee-dont*) [*βραχις*, short; *odont*, a tooth]. In zoology, applied to low-crowned teeth; the opposite of *Hypsodont*.

**Brachypnea** (*brak-ee-oh'-ee-nee*) [*βραχις*, short; *pnea*, breath]. Abnormal shortness of breath.

**Brachypodous** (*brak-ee-oh'-ee-dus*) [*βραχις*, short; *podus*, foot]. In biology, possessing a short foot or stalk.

**Brachypterous** (*brak-ee-oh'-ee-us*) [*βραχις*, short; *pteron*, a wing]. In biology, short-winged.

**Brachyrrhinia** (*brak-ee-rin'-ee-ah*) [*βραχις*, short; *rhinos*, a nose]. Abnormal shortness of the nose.

**Brachysomia** (*brak-ee-oh'-ee-mah*) [*βραχις*, short; *σωμα*, body]. Shortness of the body.

**Brachyurous** (*brak-ee-oh'-ee-rus*) [*βραχις*, short; *oura*, tail]. In biology, short-tailed.

**Bracklet** (*brak'-let*) [*bractea*, a thin leaf]. In biology, the smaller bract borne on pedicles.

**Bract** (*brakt*) [*bractea*, a thin plate]. In biology, the name of the modified leaves borne on flower-peduncles or at the base of flower-clusters.

**Bracteole.** Same as *Bracklet*.

**Bradesthesia** (*brad-es-the'-ze-ah*). See *Bradyesthesia*.

**Bradyarthria** (*brad-ee-ah'-thre-ah*) [*bradys*, slow; *arthron*, articulation]. Abnormally slow articulation of words; bradylalia.

**Bradybolism** (*brad-ib'-ee-izm*) [*bradys*, slow; *balloein*, to throw]. Same as *Bradyspermatism*.

**Bradycardia** (*brad-ee-kar'-de-ah*) [*bradys*, slow; *kardia*, the heart]. Slow pulse—the opposite of *tachycardia*.

**Bradycauma** (*brad-ee-kav'-mah*) [*bradys*, slow; *καυμα*, burn; *pl.*, *Bradycaumata*]. Slow cautery, as with the moxa.

**Bradycrote** (*brad'-ee-krot*) [*bradys*, slow; *κρότος*, a beating]. Marked by or relating to slowness of the pulse.

**Bradycrotic** (*brad'-ee-krot'-ik*) [*bradys*, slow; *κρότος*, a beating]. Bradycrote.

**Bradycoia** (*brad-ee-ek'-oi'-ah*) [*bradys*, slow; *ακουειν*, to hear]. Hardness of hearing.

**Bradyesthesia** (*brad-ee-es-the'-ze-ah*) [*bradys*, slow; *αισθησις*, perception]. Dulness of perception.

**Bradylalia** (*brad-ee-la'-le-ah*) [*bradys*, slow; *λαλειν*, to talk]. A slow and disordered utterance.

**Bradylogia** (*brad-ee-lo'-je-ah*) [*bradys*, slow; *λόγος*, discourse]. Bradylalia.

**Bradymasesis**, **Bradymasesis** (*brad-ee-mas'-ee-sis*), or **Bradymastesis** (*brad-ee-mas'-te'-sis*) [*bradys*, slow; *μάσσις*, mastication]. Slow or difficult mastication, especially that seen in general paralysis, or after lesions of the fifth nerve.

**Bradypepsia** (*brad-ee-pep'-se-ah*) [*bradys*, slow; *πέψις*, digestion]. Difficult or slow digestion.

**Bradyphasia** (*brad-ee-fa'-ze-ah*) [*bradys*, slow; *φάσις*, speech]. Bradylalia.

**Bradyphrasia** (*brad-ee-fra'-ze-ah*) [*bradys*, slow; *φράσις*, utterance]. Slowness of speech; it occurs in some types of mental disease.

**Bradypnea** (*brad-ee-oh'-ee-ah*) [*bradys*, slow; *πνέειν*, to breathe]. Abnormal slowness of breathing.

**Bradyspermatism** (*brad-ee-sper'-mat-izm*) [*bradys*, slow; *σπέρμα*, seed]. Abnormally slow emission of semen.

**Bradysphygmia** (*brad-ee-sfig'-me-ah*) [*bradys*, slow; *σφυγμός*, pulse]. Abnormal slowness of the pulse.

**Bradyuria** (*brad-ee-oh'-ee-ah*). See *Bradyuria*.

**Bradytocia** (*brad-ee-to'-se-ah*) [*bradys*, slow; *τόκος*, birth]. Abnormally slow or protracted parturition.

**Bradytrophic** (*brad-ee-trof'-ik*) [*bradys*, slow; *τροφή*, nutrition]. Characterized by slowness of trophic changes.

**Bradyuria** (*brad-ee-oh'-ee-ah*) [*bradys*, slow; *ουρον*, urine]. Slow passage of urine.

**Braidism** (*brad'-izm*) [*Braid*, the originator]. The hypnotic state produced by fixation of the eyes upon a shining object; described by James Braid in 1842. See *Hypnotism*.

**Brain** (*brân*) [Low Ger., *brâgen*]. The general contents of the cranium, especially the cerebrum. **B.**,

SUPERIOR ASPECT, OR CONVEXITY OF THE BRAIN.

- 1, 1. Fissure of Rolando. 2, 2. Ascending frontal convolution. 3, 3. Ascending and superior parietal convolutions. 4, 4. First frontal convolution. 5, 5. Second frontal. 6, 6. Third frontal. 7, 7. First occipital. 8, 8. Second occipital. 9, 9. Third occipital. 10, 10. Anterior extremity of corpus callosum. 11, 11. Posterior extremity.

INFERIOR ASPECT OF THE BRAIN.

1. Anterior extremity of corpus callosum. 2. Optic chiasm. 3. Tuber cinereum and infundibulum. 4. Corpora albicantia, or mammillaria. 5. Pons varolii. 6. Third nerve. 7. Aqueduct of Sylvius. 8. Testes. 10. Inferior surface of frontal lobe. 11. Convolution of the fissure of

**Abdominal.** See *Solar Plexus*. **B., After-.** See *Metencephalon*. **B. Axis,** that portion of the brain-substance including the island of Reil, the basal ganglia, the crura, pons, medulla, and cerebellum. **B.-bladder,** a cerebral vesicle of the embryo. **B., Compression of,** may arise from injury or disease, from serous exudation, blood extravasation, etc. See *Compression*. **B., Concussion of,** is the result of injury producing symptoms of loss of power and function generally. See *Concussion*. **B.-fag,** mental exhaustion due to overwork. **B. Fever** See *Meningitis*; also Synonym of *Typhoid Fever*. **B., Fore-.** See *Prosencephalon*. **B., Hind-.** See *Opencephalon*. **B., Incallosal,** one in which there is a complete absence of the corpus callosum. This is commonly associated with mental and physical weakness, amounting often to idiocy. **B., Inter-.** See *Diencephalon*. **B., Irritation of,** follows injury, and is marked by symptoms of irritability and often by convulsive phenomena. **B., Little,** the cerebellum. **B.-mantle,** that portion of the brain-substance including the convolutions, corpus callosum, and fornix. **B., Mid-.** See *Mesencephalon*. **B.-pan,** the cranium. **B., Railway,** a neurosis sometimes occurring in those who ride constantly on railway trains. It is characterized by anesthesia, or spinal hyperesthesia, insomnia, paresis, etc. **B. Sand,** a gritty mineral matter found in and about the pineal gland, consisting mainly of calcium and magnesium carbonates and phosphates. Its function is not known. **B.-shake.** Synonym of *B., Concussion of*. **B.-stem,** the pons, medulla, and crura cerebri. **B.-storm,** a succession of sudden and severe phenomena, due to some cerebral disturbance. **B.-tire,** a condition of brain-exhaustion due to excessive functional activity. See *B.-fag*. **B.-wave,** the supposed telepathic vibration of a "mentiferous ether," by which thoughts and impressions may be transferred from one person to another. **B.-wax.** See *Cephalot*.

**Brainard's Operations.** See *Operation*; *Table of*.

**Bramah's Apparatus.** An apparatus by which water may be charged with  $\text{CO}_2$  by the continuous method.

**Bramble** (*bram'bl*). See *Rubus*.

**Bran** (*bran*) [ME., *bran*]. The epidermis or outer covering of the seeds of most cereals. It contains woody matter 35, starch 22, albumin and gluten 13, water 12, gum 8, other matters, including a small amount of silica, 10 per cent. It contains, also, a diastatic ferment that converts the starch into dextrin. **B. Bath.** See *Bath*. **B. Tea,** a decoction of bran, used in coughs.

Sylvius. 12. Olfactory nerve. 13. Third convolution of inferior surface of frontal lobe. 14. Fourth convolution. 15. Third convolution of external surface of frontal lobe. 16. External border of posterior lobe. 17. Splenoidal extremity. 18. Hippocampal convolution. 19. Middle convolution of posterior lobe. 20. External convolution of posterior lobe. 21. Middle convolution. 22. Internal convolution. 23. Gyrus fornicatus.

**Branch** (*branch*) [ME., *bramch*]. A name given to the divisions or offshoots of blood vessels, lymphatics, or nerves, from the trunk or main stem.

**Branchiæ** (*branchi-æ*) [Gr., *branchia*, gills]. The gills of fishes.

**Branchial** (*branchi-al*) [Gr., *branchia*, gills]. Pertaining to branchiæ. **B. Arches.** See *Arches*. **B. Openings.** See *Clefts*, *Thoracic*.

**Branchiostegite** (*branchi-ostegite*) [Gr., *branchia*, gills; *stegon*, a roof]. In biology, that portion of the carapace of a crustacean that covers the gills and branchial chamber.

**Branchiureme** (*branchi-ureme*) [Gr., *branchia*, gills; *urme*, an ear, hand or foot of a swimmer]. In biology, a crustacean having gill-bearing legs.

**Branchus** (*branch-us*) [Lat., *branchus*, hoarseness]. Hoarseness.

**Brand Bath.** See *Bath*. **B. Method.** See *Treatment, Methods of*.

**Brandt's Method.** See *Treatment, Methods of*. **B.'s Operation.** See *Operation, Table of*.

**Brandy** (*brandy*) [Fr., *brandy*]. **B. Nose.** See *Brandy*.

**Branks** (*branks*) [Gael., *brán*, a kind of pillory]. The rumps.

**Branny** (*branny*) [ME., *bran*]. Like bran. **B. Kidney.** Same as *Large White Kidney*, q. v. **B. Tetter.** Synonym of *Pityriasis*.

**Brasdor's Operation.** See *Operations, Table of*.

**Brash** (*brash*) [Dutch, *braaken*, to vomit]. A common name indicating almost any disorder of the digestive system; any rash, or eruption; a short fit of illness. **B., Water.** See *Pyrexia*.

**Brasilin** (*brasilin*) [ME., *brasil*],  $C_{16}H_{14}O_5$ . Brazilin, a coloring matter found in Brazil-wood and red-wood; it crystallizes in white, shining needles, and dissolves in alkalies with a carmin-red color on exposure to the air. See *Pigments, Conspectus of*.

**Brass** (*brass*) [ME., *brass*]. An alloy of copper with 25-40 per cent. of zinc. **B.-Founder's Ague.** See *Ague*.

**Brassica** (*brassica*) [AS., *brassica*, cabbage]. A genus of plants, Nat. Order, *Cruciferae*, including the common cabbage. **B. acidulata**, sour crout (or Sauer kraut). **B. asperifolia esculenta**, the common turnip. **B. cauliflora** (or *floridula*), the cauliflower. **B. cumana** or *rubra*, the red cabbage. **B. napus**, the rape plant. **B. nigra**, the black mustard. **B. sativa**, the common cabbage.

**Brassicidic Acid** (*brassicidic*). See *Acid*.

**Braun's Canal.** See *Canal*. **B. Operation.** See *Operation, Table of*. **B. Test.** See *Tests, Table of*.

**Braune** (*braune*). See *Bruni-ur*.

**Braune's Canal.** See *Canal*.

**Brawn** (*brawn*) [ME., *brawn*, a piece of flesh]. The flesh of a muscle; well developed muscles.

**Brawny** (*brawny*) [ME., *brawn*, a piece of flesh]. Fleishy; muscular. **B. Induration**, pathologic hardening and thickening of the tissues.

**Braxy** (*braxy*) [Ir. dial.]. A term applied to certain forms of blood disease, as anthrax in sheep. Three forms are recognized by shepherds: *a*, turnip; *b*, wet; *c*, red. **B., Red.** A form of septicemia in sheep in which the tissues are uniformly stained of a deep red color by the coloring matter of the blood. **B., Turnip.** A form of manutrition of the blood occurring in sheep that are fed on an unlimited supply of roots, particularly of swedes. The attack is sudden in onset, short in duration and fatal in termination. See *Koosoo miteura*, *Brander* and *Davaine*, under *Braxy*, *Braxy*, *Braxy*.

**Brayera** (*braya'-rah*) [Fr., *brayer*]. Koosoo, koosso, koso, koussou, cusso. The female inflorescence of *Haenia abyssinica*, containing tannic acid, a volatile oil and a crystalline principle, *Koussin*,  $C_{31}H_{38}O_{10}$ . In large doses it produces nausea and emesis. It is valuable mainly as an anthelmintic against tapeworm. Dose  $\frac{5}{16}$  ss., in infusion of boiling water. **B., Ext., Fld.**, dose  $\frac{5}{16}$  j. **Infusum Cusso** (B. P.). Dose  $\frac{5}{16}$  iv-viij.

**Bread** (*bred*) [Sax., *brædan* to nourish; Lat., *panis*; Gr., *âpros*]. A mixture of flour and water made porous by carbon dioxide and then baked. The flour may be of wheat, corn, oat, or rye. The carbon dioxide may be introduced by decomposing an alkaline carbonate (sodium or potassium), by an acid ("cream of tartar"), or by fermenting the starch with yeast. **B., Brown**, a kind of bread made from a mixture of corn, rye and wheat flour. **B., Graham**, made from unbolted wheat flour; it contains more gluten, diastase and mineral phosphates than ordinary bread. **B., White**, bread made from bolted wheaten flour, and therefore deficient in diastase, gluten and mineral phosphates. Other kinds, such as rye (or black), corn, bran, barley, etc., indicate their composition by their name. **B.-jelly**, a food of service as an occasional change from mushes, but with a tendency to constipate if given freely. It is prepared by pouring boiling water upon stale bread and allowing it to soak for an hour. The water is then removed, fresh water added, and the whole boiled until a thick mass forms. On pouring off the excess of water and cooling, a jelly-like material remains which may be eaten with milk or sugar. **B.-mould.** See *Ascothora*. **B.-paste**, a culture-medium for bacteria. Stale, coarse bread is dried, ground to powder and made into a paste with water. It is well suited for the growth of moulds.

**Break** (*brak*) [ME., *breken*, to break]. In electricity, an opening in the circuit of a battery. See *Make*. In surgery, a fracture. **B.-bone Fever.** See *Dengue*. **B. Shock**, a term sometimes employed in electrotherapeutics for the physiologic shock produced on the opening or breaking of an electric circuit.

**Breast** (*bræst*) [ME., *bræst*, the breast]. The upper anterior part of the body between the neck and abdomen. Also, the mamma. **B.-bone.** See *Sternum*. **B., Broken**, abscess of the mammary gland. **B., Chicken**, *Pectus carinatum*; a deformity marked by prominence of the sternal portion of the chest. **B. Glass**, a glass receptacle for the overflow of milk from the breast. **B. Pang**, angina pectoris. See *Stenocardia*. **B. Pump.** See *Antlia*. **B., Pigeon.** Same as *B., Chicken*. **B. Tea**, German, a mixture of althea, or marshmallow, eight parts; coltsfoot leaves, four parts; liquorice, three parts; anise and mullein leaves, each two parts; orris, one part: this is called also *species pectoralis*.

**Breastweed.** See *Saururus cernuus*.

**Breath** (*breth*) [AS., *bræth*]. The air exhaled from the lungs. It has lost a part of its oxygen and gained a certain but varying amount of ammonia, aqueous vapor and carbon dioxide from the oxidation of the waste-matter of the blood. Also applied to the air inspired. **B. Sounds**, the respiratory sounds heard upon auscultation. In the healthy chest three varieties of respiratory sounds may be recognized: 1. Those produced in the glottis, and audible over the lower end of the trachea—*tracheal* or *bronchial breathing*. 2. Those produced in the alveoli and audible over the lungs—*vesicular* breathing. 3. Those audible about the roots of the lungs, combining the character of the two preceding—*broncho-vesicular breathing*. A *Table of Breath-Sounds* is given on the next page.

## TABLE OF BREATH-SOUNDS IN HEALTH AND DISEASE.

*(Altered and enlarged from J. K. Fowler).*

| VARIETY OF BREATHING. | PERIOD.                           | PITCH.   | QUALITY.   | INTERVAL                | DURATION.                                       | INTENSITY.                    | WHERE HEARD.  | CONDITION IN WHICH HEARD.   |
|-----------------------|-----------------------------------|--|--|-------------------------|---|-------------------------------|---|---|
| Vesicular.            | 1. Inspiration.<br>2. Expiration. | Low.<br>Lower.   | Vesicular.<br>Blowing.                               | None.<br>. . . .        | . . . .<br>Shorter than inspiration or absent.  | Variable.<br>Faint or absent. | Over the lungs, in health.  | In health.  |
| Bronchial.            | 1. Inspiration.<br>2. Expiration. | High.<br>Higher.   | Tracheal.<br>Tracheal.                               | Distinct.<br>. . . .    | . . . .<br>Equal to or longer than inspiration. | Variable.<br>Greater.         | In <i>health</i> , over the seventh cervical spine; in <i>disease</i> , over areas of consolidation.  | In <i>health</i> ; pulmonary tuberculosis, lobar pneumonia, large pleuritic effusions, thoracic aneurysm, mediastinal tumors. |
| Broncho-vesicular.    | 1. Inspiration.<br>2. Expiration. | Higher than in vesicular breathing.<br>Higher than in vesicular breathing. | More or less tracheal.<br>More or less tracheal.     | Slight.<br>. . . .      | . . . .<br>About equal to inspiration.          | Variable.<br>Greater.         | In <i>health</i> , ant., over sternal portion of infra-clav. region; <i>post.</i> , upper part of inter-scapular region. In <i>disease</i> , over slight consolidation. | In <i>health</i> ; pneumonia, pulmonary tuberculosis.   |
| Amphoric.             | 1. Inspiration.<br>2. Expiration. | Low.<br>Lower.   | Hollow and metallic.<br>Both characters more marked. | Distinct.<br>. . . .    | . . . .<br>Longer than inspiration.             | Variable.<br>Greater.         | Over a large cavity communicating with an open bronchus.  | Pulmonary tuberculosis.   |
| Cavernous.            | 1. Inspiration.<br>2. Expiration. | Low.<br>Lower.   | Blowing and hollow.<br>Both characters more marked.  | Distinct.<br>. . . .    | . . . .<br>Longer than inspiration.             | Variable.<br>Greater.         | Over a cavity communicating with an open bronchus.  | Pulmonary tuberculosis.   |
| Tubular.              | 1. Inspiration.<br>2. Expiration. | Higher than in bronchial breathing.<br>Higher.                             | Laryngeal whiffing.<br>Laryngeal whiffing.           | Distinct.<br>or . . . . | . . . .<br>Equal to or longer than inspiration. | Variable.<br>Greater.         | Over consolidated areas.  | Lobar pneumonia, pulmonary tuberculosis.  |

**Breathing** (*brêth'-ing*) [AS., *brath*]. See *Respiration*.

**B.**, **Abdominal**, breathing in which the abdominal walls move decidedly and in which the diaphragm is actively engaged. **B.**, **Diminished**, is the reverse of *B. Exaggerated*. The normal breath-sound is present, but its intensity is much diminished. It is very frequently heard at the apex in the early stage of pulmonary tuberculosis. **B.**, **Exaggerated**, is the normal breath-sound of children, but when occurring in adults, it indicates a compensatory action of one part of the lungs for deficient action elsewhere. It is an exaggerated degree of the normal vesicular breathing. **B.**, **Interrupted**, **Wavy** or **Cogwheel**, a broken or interrupted inspiratory sound produced by nervousness, irregular contraction of the muscles of respiration, or irregular expansion of the lung from disease. **B.**, **Mouth**, habitual respiration through the mouth. **B.**, **Puerile**. See *B.*, *Exaggerated*. **B.**, **Suppressed**, entire absence of breath-sounds, as in pleuritic effusion and certain solid conditions of the lung. **B.**, **Thoracic**, respiration in which the thoracic walls are actively moved.

**Bred sore** (*brêd'-sôr*) [Vulgar]. A sore coming without any visible cause; a whitlow; also called *Breeder*.

**Breech** (*brêch*) [ME., *breech*]. The buttocks. **B.** **Position**. See *Fetus, Position of*.

**Breeches Splint**. A splint that surrounds the leg; oftenest made of woven wire.

**Breed** (*brêd*) [AS., *brëdan*, to nourish]. To beget, produce; to nurse; to develop.

**Breeder** (*brêd'-er*). See *Bred sore*.

**Breeding-season** (*brê'-ding sê'-zion*) [AS., *brëdan*, to nourish]. The period during which certain species of animals, especially the lower forms of vertebrates, beget and rear their young.

**Breeze** (*brêz*). See *Head-breeze* and *Static-breeze*.

**Brefeld and Nägele's Method**. See *Fractional Cultivation*.

**Bregenin** (*brêg'-en-in*) [Low Ger., *bregen*, brain],  $C_{10}H_{17}NO_3$ . A name given by Thudichum to a viscous principle, soluble in and crystallizable from alcohol, by means of which it has been extracted from brain-tissue. It is fusible like a fat, but is miscible with water.

**Bregma** (*brêg'-mah*) [*3pé'ua*, the sinciput: *pl.*, *Bregmata*]. A term applied to the anterior fontanelle. See *Craniometric Points*.

**Bregmatic** (*brêg-mat'-ik*) [*3pé'ua*, the sinciput]. Relating to a bregma.

**Bregmato-anterior** (*brêg'-mat-o-an-te'-re-or*) [*3pé'ua*, the sinciput; *anterior*, front]. Having the bregma in the anterior portion of the mother's pelvis; applied to the presentation in labor.

**Bregmato-cotyloid** (*breg-mat'-kot-i-lō'id*) [*breg-mat*, the sinciput; *cotylo*, a socket; *-id*, form]. With the bregma toward the cotyloid depression (acetabulum) of the mother's pelvis; a term used in obstetrics.

**Bregmatodymia** (*breg-mat'-id-mi-ā*) [*breg-mat*, the sinciput; *-odymia*, twin]. Teratic union of twins by the bregmata.

**Bregmato-lambdoid Arc** (*breg-mat'-lamb'-dō'id ark*). See *Ar*.

**Bregmato posterior** (*breg-mat'-post-er-i-ōr*) [*breg-mat*, the sinciput; *-post-er-i-ōr*, backward]. Having the bregma toward the rear of the mother's pelvis; a term used in obstetrics.

**Bremen** (*brēm'-n*) [*Ger*]. A town in Germany. **B. Blue**. See *Conspicuity of Pigments*, under *Pigment*. **B. Green**. See *Conspicuity of Pigments*, under *Pigment*.

**Bremond's Method**. See *Treatment, Methods of*.

**Brenner's Formula**. The feeble tone heard when the auricle is opened in galvanic stimulation of the auditory nerve. This tone corresponds with the resonance fundamental tone of the sound-conducting apparatus of the ear itself.

**Brenzcatechinsulphuric Acid** (*brenz-kat-e-kin-sul-fu'-rik*). See *Art*.

**Brephalus** (*brēf'-al-us*) [*3pēoos*, the new born babe or young]. In biology, applied to the young of a crustacean just as it quits the ovum, in whatever stage. Bates's substitute for larva.

**Brephopolysarcia** (*brēf-e-pōl-e-sar'-ke-ah*) [*3pēoos*, an infant; *-sar*, much; *-sarkē*, flesh]. Excess of flesh in an infant.

**Brephotrophium** (*brēf-o-tro-fē'-um*) [*3pēoos*, infant; *-troph*, to nourish]. An infant asylum; a foundling-hospital.

**Breschet. Canals of**. See *Canal*. **B., Sinus of**, the sphenoparietal sinus. See *Sinus*. **B.'s Veins**. See *Ven*.

**Bresgen's Formulæ**. Silver-nitrate powders of varying strengths, with powdered starch, for use in rhinitis.

**Breslau Fever**. See *Fever*. **B. Test**. See *Birth*.

**Brevē extensor digitorum** (*brēv-e-eks-tēn'-sor dig-it-ō'-um*) [*L.*]. The extensor brevis digitorum. See *Muscle*, *Table of*.

**Brevicaudate** (*brēv-e-kaud'-dāt*) [*brevis*, short; *cauda*, tail]. In biology, short-tailed.

**Breviductor** (*brēv-duk'-tor*) [*L.*]. The adductor brevis muscle of the thigh. See *Muscles, Table of*.

**Breviflexor** (*brēv-fleks'-or*) [*L.*]. Any short, flexor muscle.

**Brevifoliate** (*brēv-fōl'-e-āt*) [*brevis*, short; *folium*, a leaf]. In biology, short leaved.

**Brevilingual** (*brēv-in-gwāl*) [*brevis*, short; *lingua*, a tongue]. In biology, short tongued.

**Breviped** (*brēv'-pēd*) [*brevis*, short; *pēs*, a foot]. In biology, short footed.

**Brevipen** (*brēv'-pēn*) [*brevis*, short; *penna*, a wing]. In biology, short winged.

**Brevirostrate** (*brēv-i-ro-strāt*) [*brevis*, short; *rostrum*, a beak]. In biology, short billed.

**Brevissimus oculi** (*brēv-i-si-mus ōk'-u-lī*) [*L.*]. The smallest muscle of the eye; the obliquus inferior. See *Muscle, Table of*.

**Brewer's Test**. See *Test, Table of*.

**Briançon Manna** (*brī-an-sōn mēn'-ah*). A kind of manna from the twig of the European larch tree.

**Bribosia's Operation**. See *Operation, Table of*.

**Brick-Dust Deposit** (*brīk'-dust de-pōz-it*). A lateritious sediment from urine.

**Bricklayers' Itch** (*brīk-lā-ers' ich*). Eczema due to irritation of the skin.

**Brick-makers' Anemia**. See *An hydostomiasis*.

**Bridge** (*brīj*) [*ME., briggē*]. 1. The upper ridge of the nose formed by the union of the two nasal bones. 2. In electricity, an apparatus for measuring the resistance of a conductor. **B. Coloboma**. See *Coloboma*. **B., Herpetic**, a term for *Fascicular Keratitis*, q. v. **B. of Nose**, the prominent ridge formed by the nasal bones. **B. of Varolius**, the pons Varolii. **B.-Work**, in dentistry, the adaptation of artificial crowns of teeth to and over spaces made by the loss of natural teeth, by connecting such crowns to natural teeth or roots for anchorage by means of a bridge, and thereby dispensing with plates covering more or less of the roof of the mouth and the alveolar ridge.

**Bridle** (*brīd'-dl*) [*ME., bridel*]. 1. A *Frenum*, q. v. 2. A band or filament stretching across the lumen of a passage, or from side to side of an ulcer, scar, or abscess. **B. Stricture**, a stricture due to the presence of a bridle traversing the caliber of the urethra.

**Brieger, Bacillus of**. See *Bacteria, Synonymatic Table of*. **B.'s Method**, a method of separating ptomaines from a putrefying mass.

**Briggs's Operation**. See *Operations, Table of*.

**Brightic** (*brīt'-ik*) [*Bright*, an English physician]. A person suffering from Bright's disease.

**Bright's Disease** (*brīts dis-ēz'*) [*Bright*, an English physician]. A name formerly incorrectly used as a synonym of albuminuria, and at present covering several forms of disease of the kidney associated with albumin in the urine. It may be acute (*acute parenchymatous nephritis*) or chronic (which includes *chronic parenchymatous nephritis*, *granular contraction of the kidneys*, and *albuminoid degeneration of the kidneys*). Bright's disease is considered by Fothergill as a secondary condition arising from a tendency toward the reversion to that preanthropic type in which the liver performed the additional office of excreting uric acid. **Acute Bright's Disease** is sudden in its onset, and is associated with chills, headache, backache, vomiting, and edema, especially marked in the eyelids and the cheeks. The urine is scanty or even suppressed, of a dark, smoky hue, and contains a large amount of albumin, and blood. Microscopically, blood-corpuses, renal epithelium, debris, and hyalin, epithelial, and blood-casts are found, and occasionally, also, granular casts. Occasionally the glomeruli of the kidney are the seat of the most marked changes, and to this condition the term "*glomerulo-nephritis*," has been given. The most frequent cause of acute Bright's disease is exposure to cold. It is often a complication of the specific fevers, especially scarlet fever. Death frequently results from uremia or cardiac failure, or the disease may assume a chronic form. **Chronic Bright's Disease** embraces, as has been said, three distinct diseases of the kidney. *Chronic parenchymatous nephritis*, usually following an acute attack, is also known as *chronic tubal* and *chronic desquamative nephritis*, and from its size and pallor, the kidney resulting from the disease is called the "*large white kidney*." The capsule peels off readily and leaves a smooth or very slightly granular surface. The tubules are most involved in the change; they are enlarged and distended with proliferated and swollen epithelial cells. There is some thickening of the interstitial tissue, as a rule. This large kidney is prone to undergo degenerative changes, the protoplasm of the cells in the tubules breaking down into an amorphous debris. The kidney shrinks, and at the same time undergoes an increase in the interstitial tissue, forming what is known as the "*small white kidney*." *Granular contraction of the kidney* is also known as *chronic interstitial nephritis*,

and the kidney resulting is called the "small red granular kidney," the "red contracted kidney," and at times the "gouty kidney" or the "arterio-sclerotic kidney." This kidney is usually much diminished in size and weight; the capsule is greatly thickened and adherent, so that it cannot be removed without tearing the kidney-tissue. The renal substance is reddish, granular, with small cysts, and firm on section. Microscopically, there is found a great increase in the interstitial tissue, reducing the caliber of the tubules. This excess of fibrous tissue has given origin to the name "cirrhotic kidney," and this form of Bright's disease is frequently associated with gout, syphilis, chronic lead-poisoning, or alcoholic excess. *Albuminoid degeneration of the kidneys* is also known as the *amyloid, waxy, or lardaceous kidney*. This kidney is enlarged and quite pale; its consistence is firm, and the section has a peculiar, glistening, bacon-like appearance. The glomeruli stand out as bright points upon the surface; the capsule peels off easily and leaves a smooth surface. Iodin applied to the surface of the section turns the diseased portions a mahogany-brown color. The change in this disease is most marked in the glomeruli and the blood-vessel walls, but may be found elsewhere; it is most frequently due to prolonged suppuration, bone and joint disease, tuberculosis, syphilis, malaria, and mercurial poisoning. The onset of chronic Bright's disease is usually insidious, and may only be indicated by slight puffiness of the eyelids or the ankles, shortness of breath, dull and persistent headache, disorder of vision and hebétude. The pulse is one of high arterial tension, and there is hypertrophy of the left ventricle of the heart, especially in the case of the contracted kidney; there is frequent micturition, progressive anemia, dryness of the skin, indigestion, and a tendency to uremia. The urine is always scanty with the large white kidney, but abundant with the other forms of the disease. The specific gravity and the reaction vary; occasionally there may be present a small quantity of blood, and albumin is always present at some period in chronic Bright's disease. The quantity of albumin is very large in the large white and amyloid kidneys; very slight in the contracted form. Microscopically, the urine contains renal epithelium, granular and fatty matter, and tube-casts. The latter are most plentiful in the large white kidney, but are never so numerous as in acute nephritis; they are granular, fatty, and hyaline in nature. A frequent symptom of chronic Bright's disease is the so-called "albuminuric retinitis," in which condition there are ecchymoses of the retina, together with white glistening spots, most numerous near the macula lutea, and frequently arranged in lines like the radiations from a star. This is diagnostic of chronic renal disease. The prognosis of chronic Bright's disease is bad, death eventually resulting from uremia or apoplexy.

**Brilliant** (*bril'-yant*) [Fr.]. Bright, glittering. **B. Green**. See *Pigments, Conspicuous of*. **B. Yellow**. See *Pigments, Conspicuous of*.

**Brim** (*brim*) [ME., *brim*]. An edge or margin. **B. of Pelvis**. See *Pelvis*.

**Brimstone** (*brim'-ston*). See *Sulphur*.

**Brine Test**. See *Tests, Table of*.

**Brinton's Operation**. See *Operations, Table of*.

**Briquet's Ataxia**. See *Ataxia, and Diseases, Table of*.

**Briquettes** (*brik'-et*). See *Pitch*.

**Brise-coque** (*brèz'-kok*) [Fr., "shell-breaker"]. An instrument for crushing the shell of a calculus after its inner part has been pulverized.

**Brisement** (*brèz'-mon'(gy')*) [Fr.]. A crushing; the forcible breaking up of an ankylosis.

**Brise-pierre** (*brèz'-pe-âr'*) [Fr., "stone-crusher"]. An old form of lithotrite.

**Bristle** (*bris'-l*) [ME., *bristel*]. In biology, a stiff, coarse hair on certain animals and plants. A stiff feather. **B.-cell**, any one of the ciliated cells at the terminations of the auditory nerve-filaments. **B., Dentist's**. See *Nerve Bristles*.

**British** (*brit'-ish*) [L., *Britanni*, the original inhabitants of Britain]. Of or pertaining to Great Britain. **B. Gum**. See *Dextrin*. **B. Oil**, a mixture of petroleum, Barbadoes tar, oil of amber, oil of juniper, oil of turpentine and linseed oil; it is prized as a domestic remedy. **Unof.**

**Broach, Watchmaker's** (*brooch*). A five-sided steel instrument used by dentists for enlarging the canal in the root, and the opening into a decayed cavity in the crown of a tooth.

**Broad** (*broad*) [ME., *brood*]. Wide; extensive. **B. Land Irrigation**. See *Seewage, Disposal of*. **B.-leafed Laurel**. See *Kalmia*. **B. Ligament**. See *Ligament*. **B. Tapeworm**. See *Bothriocephalus*.

**Broca, "Grand Lobe Limbique"** of. The cortical cerebral convolution formed by the continuation of the *gyrus hippocampi* with the *gyrus fimbriatus*. This should not be confused with "Broca's Convolution," i. e., the third left frontal.

**Broca's Angles**. See *Angle*. **B. Aphasia**. See *Diseases, Table of*. **B. Area**, the speech-center of the frontal convolution. **B. Auricular Point**, the center of the external auditory meatus. **B. Center**. See *Center*. **B. Convolution**. See *Convolution, Table of*. **B. Fissure**. See *Fissures, Table of*. **B. Plane**, the *alveolo-condyloid plane*. A line passing from the alveolar process of the superior maxilla and through the lowest part (condyles) of the occipital bone, the shaven head being so placed that this line shall be horizontal. This is employed in cranio-cerebral topography. **B. Speech-center**, the folded part of the base of the third frontal gyrus.

**Brochus** (*bro'-kus*) [L.]. A person whose teeth project, or one who has a prominent upper lip.

**Brocq's Pomade**. A pomade used in lupus erythematosus. It consists of salicylic and lactic acids, each 3 ss; resorcin, grs. xiv; oxid of zinc, 3 ij; pure vaselin, 3 xviij.

**Brodie's Disease**. Same as *Brodie's Knee*. **B. Knee**. See *Diseases, Table of*.

**Brokaw Ring** (*brok'-aw ring*). A ring used in intestinal anastomosis, made of segments of rubber drainage-tubing and threaded with catgut strands.

**Broken** (*bro'-ken*) [AS., *brocen*, to break]. In surgery, fractured, as a bone. **B. Breast**, abscess of the mammary gland. **B. Wind**, **B.-winded**, in farriery, a term applied to a condition of heart-strain following severe muscular effort. It is characterized by paroxysms of cardiac dyspnea. See *Heaves*. **B.-wing Fever**. Synonym of *Dengue*.

**Bromal** (*bro'-mal*) [3βωωoc, a stench; *aldehyd*]. CBr<sub>3</sub>.CHO. Tribromaldehyd, analogous to chloral. It is produced by the action of bromin on alcohol. It is a colorless, oily fluid, of a penetrating odor, and sharp burning taste, boiling at 172°-173°; it has been used in medicine, having properties similar to those of chloral. **B. Hydrate**, CBr<sub>3</sub>.CHO + H<sub>2</sub>O, a fluid of oily consistence, having a structure similar to that of chloral hydrate, but more irritating and narcotic than the latter. It is used as a hypnotic and in epilepsy. Dose gr. j-v. **Unof.**

**Bromamid** (*bro'-mam-id*) [3βωωoc, a stench; *amid*]. A bromin compound of the anilid group with the formula, C<sub>6</sub>H<sub>5</sub>Br<sub>3</sub>NH<sub>2</sub>.HBr. It contains 75 per cent.

of bromin, and is much used as an antipyretic, in 10- to 15-grain doses.

**Bromanil** (*bro'-man-il'*) [*βρωανίλ*, a stench; *anilín*],  $C_6Br_4O_2$ . A compound obtained by heating phenol with bromin and iodin in water. It consists of golden-yellow, shining leaflets or thick plates that melt and sublime.

**Bromated Antifebrin** (*bro'-ma-tei-an-te-feb'-rin*). See *Anti-febrin*.

**Bromatography** (*re-mat-a'-ra-fi*) [*βρωμα*, food; *γραφία*, a writing]. A description of or treatise on foods.

**Bromatology** (*re-mat-i'-je*) [*βρωμα*, food; *λογία*, a science]. The science of foods.

**Bromethyl** (*bro-met'-il*). See *Ethyl Bromid*.

**Bromid**, or **Bromide** (*bro'-mid*, or *-mia*) [*βρωμις*, a stench]. Any haloid of bromin; those of calcium, iron, ammonium, potassium, and sodium are the ones mainly used in medicine. They allay nervous excitement, promote tranquillity, and are largely employed as sedatives. B. of Ethyl. See *Hydrobromic Ether*.

**Bromidia** (*bro-mid'-a*) [*βρωμια*, a stench]. An American nostrum containing in each fluid dram chloral hydrate and potassium bromid, each gr. 15, extract of cannabis indica and extract of hyoscyamus, each gr. one-half. Dose ʒj.

**Bromidrosiphobia** (*bro-mid'-ros-e-fó-be-ah*) [*βρωμις*, a stench; *ιδρώς*, sweat; *φόβος*, fear]. Insane dread of offensive personal smells, with hallucinations as to the perception of them.

**Bromidrosis** (*bro-mid'-rós-is*) [*βρωμις*, a stench; *ιδρώς*, sweat]. Bromidrosis; an affection of the sweat-glands in which the sweat has an offensive odor. It is usually associated with chronic local hyperidrosis, especially of the feet. The odor is due to a specific decomposition of the sweat from the presence of the *bacterium fragrans*.

**Bromidum** (*bro'-mid-um*) [*βρωμις*, a stench]. Bromid; a salt of bromin.

**Bromin**, **Bromine**, or **Bromum** (*bro-min*, or *-mium*) [*βρωμιν*, a stench]. Br—80; quantivalence 1. A reddish brown liquid, which, at ordinary temperatures, gives off a heavy, suffocating vapor. In its elementary form it is a very active escharotic, and internally a violent poison. It is used by inhalation and as an escharotic. Dose gr. ij, largely diluted. The salts of bromin are cerebral and cardiac depressants, and highly valuable as hypnotics. The salts of the alkaline metals are those most commonly used. They are cerebral and spinal depressants, also alterative, antispasmodic, and hypnotic. **Ammonii bromidum**,  $NH_4Br$ , prismatic crystals. Dose gr. v-xx. **Auri bromidum**. See *Aurum*. **Calcii bromidum**,  $CaBr_2$ , granular and deliquescent. Dose gr. v-ʒj. **Ethyl bromid**,  $C_2H_5Br$ , useful in spasmodic coughs. Dose ʒx-ʒj. **Ethylene bromid**. See *Ethylene*. **Ferri bromidi**, *Syr.*, contains ten per cent. of the salt. Dose ʒss-ʒj. **Lithii bromidum**,  $LiBr$ , granular and deliquescent. Dose gr. v-xx. **Nickel bromidum**. See *Nickel*. **Potassii bromidum**,  $KBr$ , colorless, cubic crystals. Dose gr. v-ʒj. **Sodii bromidum**,  $NaBr$ , colorless, monoclinic crystals. Dose gr. v-ʒj. **Zinci bromidum**,  $ZnBr_2$ , granular, deliquescent powder. Dose gr. ʒss-ʒj.

**Brominism**, **Bromism** (*bro'-min-izm*, *bro'-mizm*) [*βρωμιν*, a stench]. Certain peculiar phenomena produced by the excessive administration of the bromids. The most marked symptoms are headache, coldness of the extremities, coldness of the heart's action, somnolence, apathy, anesthesia of the soft palate and pharynx, pallor of the skin, and a peculiar eruption of a whe which is one of the earliest and most

constant symptoms. There is also anorexia with less of sexual power and atrophy of the testes or mammae. The patient may become almost imbecile.

**Bromo-Caffein** (*bro-mo-kaf'-e-in*) [*bromin*; *caffein*]. A proprietary effervescent preparation containing caffeine. It is used for the relief of headaches.

**Bromochloralum** (*bro-mo-klo-rál'-um*) [*βρωμις*, a stench; *chloral*]. A proprietary antiseptic and disinfecting compound, containing the bromid and chlorid of aluminum.

**Bromoform** (*bro'-mo-form*) [*βρωμις*, a stench; *forma*, form],  $CHBr_3$ . A bromid having a structure like that of chloroform,  $CHCl_3$ ; it is an active anesthetic. Its use is not followed by vomiting. It causes irritation of the conjunctiva and respiratory organs. It is used in whooping-cough in doses of gr. ij-v in a mixture of wine and water. Unof.

**Bromography** (*bro-mog'-ra-fi*). Same as *Bromatography*.

**Bromoioidism** (*bro-mo-i'-o-idizm*) [*Bromism*; *iodism*]. Poisoning by bromin and iodine compounds together.

**Bromol** (*bro'-mol*),  $C_6H_5BrO$ . Tribromophenol; an antiseptic substance used in the form of a powder, solution (1:30 olive oil), or ointment (1:10). Internally it is used in cholera infantum and typhoid fever. Dose gr. ʒss-ʒj. Unof.

**Bronchadenitis** (*brongk-ad-en-i'-tis*) [*βρογχίτις*, the bronchial tubes; *ἀδην*, gland; *ιτις*, inflammation]. Inflammation of the bronchial lymphatic glands.

**Bronchaphrosia** (*brongk-af'-ró-se-ah*) [*βρογχία*, bronchial tubes; *ἀφρός*, foam]. Obstruction due to the presence of froth in the bronchioles.

**Bronchi** (*brong'-ki*) [*βρογχος*, the windpipe]. The two tubes into which the trachea divides opposite the third dorsal vertebra, called respectively the right and the left bronchus.

**Bronchia** (*brong'-ke-ah*) [*βρογχος*, the windpipe]. The bronchial tubes, especially those that are smaller than the two bronchi.

**Bronchial** (*brong'-ke-al*) [*βρογχος*, the windpipe]. Relating to the bronchi or to their branches, or to the smaller air-passages in the lungs. B. Arteries, branches of the thoracic aorta, three or four in number. They are the nutrient vessels of the lungs. See *Arteries*, *Table of*. B. Catarrh, the simplest form of acute inflammation of the bronchi. It is the so-called "cold on the chest." The feeling of oppression and constriction, with slight mucous discharge, is due to hyperemia and swelling of the mucous membrane of the larger bronchi. B. Fluke. See *Distoma ringeri*. B. Glands, the chain of glands running beside the bronchi. They frequently undergo pathologic enlargement and give rise to a group of symptoms—cough, pain, spasmodic dyspnea, dysphagia, and change in the voice. The enlargement is usually tuberculous in nature.

**Bronchiectasis** (*brong-ke-ek'-tas-is*) [*βρογχος*, the windpipe; *εκτασις*, dilatation]. A term denoting the dilatation or relaxation of the walls of the bronchi, arising from inflammation and other causes. It is very rare as a primary condition, but is frequently associated with some chronic pulmonary disease. It occurs most frequently in pulmonary tuberculosis at the apex of the lung, but is also frequently seen in the bronchi at the base of the lung. It may involve a tube uniformly for some distance, producing the *cylindrical* form; or it may occur irregularly in sacs or pockets, the *sacculated* form. If the whole lung be involved in the change we have produced the so-called *turtle lung*. The characteristic symptom of bronchiectasis is paroxysmal coughing, with the expectoration of large quantities of muco-purulent, often fetid,

matter. Cavernous breathing will be heard over the dilated tubes.

**Bronchiocele** (*brongt'-ke-o-sel*) [*bronchiolus*, a little air passage; *κῆλη*, tumor]. A swelling or dilatation of a bronchiole.

**Bronchiole** (*brongt'-ke-ol*) [dim. of *bronchus*]. One of the smallest subdivisions of the bronchi.

**Bronchiolitis** (*bron-ke-o-li'-tis*) [*bronchiolus*, a little bronchus; *ιτις*, inflammation]. Inflammation of the bronchioles. **B. exudativa**, an inflammation of the bronchioles, with exudation. Curschmann's theory of the production of bronchial asthma.

**Bronchiostenosis** (*brong-ke-o-ste-no'-sis*) [*βρόγχος*, the windpipe; *στενός*, narrow]. Contraction of a bronchus or of any one or more of the bronchial tubes.

**Bronchitic** (*brong-ki't-ik*) [*βρόγχος*, the windpipe]. Relating to, of the nature of, or affected with, bronchitis.

**Bronchitis** (*brong-ki'-tis*) [*βρόγχος*, the windpipe; *ιτις*, inflammation]. Inflammation of the mucous membrane that lines the bronchial tubes. It is usually attended with soreness, cough, alteration of the voice, and febrile symptoms. **B., Acute**, a severe form of simple bronchial catarrh. It is the initiatory stage of the other forms of the disease, and is usually the result of a chill, though it may be associated with some other disease, as the exanthemata, and affections of the kidney and heart. Sibilant and sonorous rhonchi and bubbling râles may be heard on auscultation.

**B., Acute Capillary**, a variety in which there is an involvement of the minute tubes of the lung. It is most frequently met with in children, usually secondarily to other diseases of the lung or other organs. The symptoms are urgent—dyspnea, short, irritating cough, nervous depression, and excited action of the heart. Collapse of portions of the lung frequently occurs, and the patient may die of asphyxia and extreme exhaustion. **B., Catarrhal**, a form attended with profuse muco-purulent discharges. **B., Chronic**, a form occurring either as an independent disease or as the result of repeated attacks of the acute variety. It is generally associated with organic changes in the lungs and other organs, such as emphysema, bronchiectasis, pulmonary tuberculosis and pleurisy. Occurring in old people, it produces the well-known "*winter cough*" of the aged. **B., Croupous, Fibrinous, or Plastic**, a rare variety attended with the expectoration of casts of the bronchial tubes, after a paroxysm of dyspnea and violent coughing. The casts are fibrinous in nature, hollow, yellowish-white, and vary from one to seven inches in length. This form of bronchitis is usually seen in males, and between the ages of ten and thirty. **B., Mechanical**, or **Potter's**, a form caused by the inhalation of dust, etc. **B., Potter's**. See *B., Mechanical*. **B., Putrid, or Fetid**, a variety of chronic bronchitis characterized by the discharge of a copious, half-liquid, extremely offensive sputum. The peculiar odor is thought to be due to a microorganism, especially to a short, slightly-curved bacillus described by Lunnitzer. **B., Summer**. Synonymous with *Hay Fever, q. v.*

**Bronchlemmitis** (*brong-klem-i'-tis*) [*βρόγχος*, the windpipe; *λέμμα*, a skin]. Croupous bronchitis.

**Bronchoægophony** (*brong-ko-e-goff'-o-ne*). See *Bronchoegophony*.

**Bronchocele** (*brongt'-ko-sel*, or *-se'-le*) [*βρόγχος*, the windpipe; *κῆλη*, a tumor]. See *Goiter*.

**Bronchocephalitis** (*brong-ko-sef-al-i'-tis*). Synonym of *Whooping-cough*.

**Bronchoegophony** (*brong-ko-e-goff'-o-ne*) [*βρόγχος*, the windpipe; *αἰε*, a goat; *φωνή*, a voice, sound]. Bronchophony combined with egophony.

**Broncholemmitis** (*brong-ko-klem-i'-tis*). See *Bronchlemmitis*.

**Broncholith** (*brongt'-ko-lith*) [*βρόγχος*, the windpipe; *λίθος*, a stone]. A calculus or concretion formed in a bronchial tube.

**Bronchomycosis** (*brong-ko-mi-ko'-sis*) [*βρόγχος*, the windpipe; *μυκή*, a fungus]. The growth or presence of fungi in a bronchial tube.

**Bronchopathy** (*brong-kop'-a-the*) [*βρόγχος*, the windpipe; *πάθος*, disease]. Any disease of the air-passages.

**Bronchophonic** (*brong-ko-fon'-ik*) [*βρόγχος*, the windpipe; *φωνή*, a voice]. Relating to bronchophony.

**Bronchophony** (*brong-koff'-o-ne*) [*βρόγχος*, the windpipe; *φωνή*, the voice]. The resonance of the voice within the bronchi as heard through the stethoscope. It is normally present over the lower cervical spines, in the upper inter-scapular region, and over the sternal portion of the infra-clavicular regions. **B., Whispered**, bronchophony elicited by causing the patient to whisper.

**Bronchophthisis** (*brong-ko-thi'-sis*) [*βρόγχος*, the windpipe; *φθίσις*, a wasting]. Pulmonary tuberculosis characterized by extensive lesions of the bronchial tubes.

**Bronchophyma** (*brong-ko-fi'-mah*) [*βρόγχος*, the air-passage; *φύμα*, a growth]. Any growth, as a tubercle, in a bronchial tube.

**Bronchoplasty** (*brongt'-ko-plas-te*) [*βρόγχος*, the trachea; *πλασσειν*, to form]. The surgical closure of a tracheal fissure or fistula.

**Broncho-pneumonia** (*brong-ko-nu-mo'-ne-ah*) [*βρόγχος*, the windpipe; *πνεύμων*, the lung]. Lobular pneumonia, a term applied to inflammation of the lungs, which, beginning in the bronchi, finally involves the parenchyma of the lungs. This disease is most frequently encountered in children, but may occur in old age. Three varieties are described: 1. A simple, acute form, following a severe bronchial catarrh. 2. A secondary form, occurring after whooping-cough or some general febrile infective disease. 3. A rare suppurative form, with the formation of abscesses throughout the lung. The patient suffering with broncho-pneumonia presents the following symptoms: dyspnea, cough, fever, often high, restlessness, and occasionally marked cerebral symptoms. If convalescence be not properly guarded relapses are likely to occur. The physical signs vary greatly, and are often not marked. The course of the disease is generally chronic, and the prognosis must be guarded.

**Bronchorrhagia** (*brong-kor-a'-je-ah*) [*βρόγχος*, the bronchus; *ρρρρρρρρ*, to burst forth]. Hemorrhage from the air-passages.

**Bronchorrhea** (*brong-kor-e'-ah*) [*βρόγχος*, the bronchus; *ρεω*, to flow]. A form of bronchitis attended with profuse expectoration.

**Bronchostenosis** (*brong-ko-ste-no'-sis*) [*βρόγχος*, the windpipe; *στενός*, narrow]. Contraction of a bronchus.

**Bronchotome** (*brongt'-ko-tom*) [*βρόγχος*, the windpipe; *τέμνω*, to cut]. An instrument for cutting the larynx or trachea in the operation of bronchotomy.

**Bronchotomy** (*brong-kot'-o-me*) [*βρόγχος*, bronchus; *τέμνω*, to cut]. A surgical cutting-operation upon the bronchus, larynx, or trachea.

**Broncho-tracheal** (*brong-ko-tra'-ke-al*) [*βρόγχος*, the bronchus; *τραχεία*, the windpipe]. Relating to a bronchus (or to both bronchi) and to the trachea.

**Broncho-vesicular** (*bron-ko-ves-ik'-u-lar*) [*βρόγχος*, the bronchus; *vesicula*, a vesicle]. Both bronchial and vesicular. See *Breath-Sounds, Table of*.

**Bronchus** (*brongt'-kus*). See *Bronchi*.

**Bronson's Method.** See *Treatment, Methods of*.

**Bronze** (*bronz*) [*er-naw, bronz*]. An alloy of copper and tin. **B. John**, a popular term for *Yellow Fever*. **B. Liver**, a dark reddish brown or olive black color of the liver, seen in post mortem examinations in certain cases of chronic malarial poisoning.

**Bronzed** (*bronzd*) [*er-naw, bronzd*]. Tanned; of a bronzed color. **B. Skin**, a symptom of Addison's Disease. **B.-skin Disease.** See *Addison's Disease*.

**Brood** (*brood*) [*ME., brood*]. In biology, offspring; progeny. **B.-cells**, in cell-division, the mother cells including the daughter cells. **B.-food**, a highly nutritious tissue-forming pap. derived by bees from pollen by digestion.

**Brooke's Ointment.** An ointment for treating lupus. It is composed of oxal of zinc and powdered starch each  $\frac{1}{2}$  ounce; white vascline  $\frac{1}{2}$  ounce; hyd. oleatis (five per cent.) one ounce; salicylic acid 20 grains; white wax 20 minims; oil of lavender q. s.; enough red Armenian bole and raw amber may be added to match the color of the skin.

**Bloom** (*bloom*). See *Soparius*.

**Brosimum** (*bros-i-mum*) [*Broo-sim, food*]. A genus of mirtaceous trees of S. America. **B. galactodendron**, the Venezuelan cow tree; its milky sap is nutritious and yields both a cheesy food and a wax (used in) serviceable for candles.

**Broth** (*broth*). See *Bouillon*.

**Brother Ulcer** (*broth'er ul'cer*). See *Donda Adugu*.

**Brousniak** (*broo'n-ik*) [*Rus.*]. The berries of red whortleberry, red bilberry (*Vaccinium vitis idaea*), used in the form of a decoction in Russia for the relief of rheumatic affections. Unof.

**Broussaïsism** (*broo-sai'izm*) [*Broussaïs*, a French physician]. The physiologic, pathologic, and therapeutic doctrines taught by J. V. Broussaïs.

**Broussaïsism** (*broo-sai'izm*). See *Broussaïsism*.

**Brow** (*bro*) [*ME., broce*]. The forehead; the upper anterior portion of the head. **B.-Ague**, neuralgia of the first division of the fifth cranial nerve, commonly met with in malarious districts, though at times occurring independently of such surroundings, and then dependent upon some diathesis, especially the gouty. **B. Presentation**, presentation of the fetal brow in labor. See *Fetus, Position of*.

**Brown** (*brewn*) [*ME., brown*]. A dark reddish-yellow color. **B. Atrophy**, an atrophy of a tissue associated with a deposit therein of a brown or yellow pigment. **B. Coal.** See *Coal* and *Lignite*. **B. Crown**, in dentistry, an artificial, all porcelain crown, which is attached to a natural root by means of an iridio-platinum pin laked in position. The pin has the greatest strength at the neck of the tooth, where the strain is heaviest, and this strength is further increased by extending the porcelain upon the pin. **B. Edema.** See *Edema*. **B. Induration of Lung**, a state of the lung due to long continued congestion, usually arising from marked incompetency or from contraction of the mitral valve. The lungs are enlarged and do not collapse on opening the thorax, and have a peculiar tint of yellow shading into a brown or reddish brown; a brownish fluid exudes on pressure. The color is due to pigment granules in the epithelial cells of the air vesicles. **B. Madder.** See *Fungus, Conspicua*. **B. Mixture.** See *Mistura ferri sulphatis et Glycyrrhizae*. **B. Ointment**, the *unguentum rosaceum*, N. F.; called also *unguentum matris*, or "mother's save". It is composed of "brown powder," two parts; oil, one part; suet, one part. **B. Pink.** See *Pregnancy, Conspicua*. **B. Plaster**, the *empastrum matris camphoratum*, N. F.;

called also *empastrum matris camphoratum*, or "camphorated mother's plaster;" official in German pharmacy. It is made of red oxid of lead, thirty parts; oil of olives, sixty parts; yellow wax, fifteen parts; camphor, one part. **B. Study.** See *Conospondia*. **B. Wort**, the plant *Brunella vulgaris*, popularly reckoned a good vulnerary, as well as a cure for sore-throat. Unof.

**Brown's Operation.** See *Operations, Table of*.

**Browne's Operation.** See *Operations, Table of*.

**Brownian Movement.** An oscillation or agitation observed under the microscope in very fine granules, drops, etc., when suspended in a liquid. The movement is not locomotion, and is to be distinguished from that of the self motility of living microorganisms. Its cause is not definitely known, but it may be due to heat, light, electricity, osmosis, etc. See *Pedesis*.

**Brownism** (*broon'izm*). See *Brunonian Theory*.

**Brown-Sequard's Combination of Symptoms.** See *Signs and Symptoms, Table of*. **B. Disease.** See *Diseases, Table of*. **B. Method of Treatment.** See *Treatment, Methods of*. **B. Paralysis.** See *Diseases, Table of*.

**Bruch, Clusters of.** See *Gland, Aggregated, of Bruch*. **B., Glands of.** See *Gland*.

**Brucin** (*bru'-sin*) [*Brucea*, a genus of shrubs],  $C_{23}H_{25}N_2O_4$ . A poisonous alkaloid found in *Strychnos nuxvomica* and in *Strychnos ignatiua*. It crystallizes in prisms containing 4H<sub>2</sub>O, and melts at 178°. Its taste is exceedingly bitter and acrid. Its action on the animal economy is similar to but much less powerful than that of strychnin. See *Nux Vomica*.

**Brücke's Berlin Blue Mass.** A warm-flowing mass for injecting tissues. It is made as follows: potassium ferrocyanid, 217 gm.; water, 1000 c.c.; ferrous chlorid 1 part; water 10 parts. Take equal volumes of these solutions and add to each twice its volume of a cold saturated solution of sodium sulphate. Add the iron solution to the ferrocyanid solution, with constant stirring. Filter and wash the precipitate with the filtrate until it runs through clear, then wash with water until the filtrate runs off blue. Dry the precipitate. To a concentrated solution of this blue add enough gelatin to make a firm jelly when cold. Heat to 60° C. and filter through flannel. **B.'s Fluid**, potassio-mercuric iodid, employed in the precipitation of proteids. **B.'s Method**, a method of removing all the proteids from a substance. Acidulate the liquid with HCl, and then add to it a solution of potassio-mercuric iodid, made by saturating with mercuric iodid a boiling solution of potassium iodid. **B.'s Muscle.** See *Muscles, Table of*. **B.'s Reagent.** See *Tests, Table of*. **B.'s Red Mass**, a material for injecting the body. A concentrated solution of potassium ferrocyanid is injected into the artery until it runs clear from the vein. Then as much as possible is allowed to drain away. Next a concentrated solution of cupric sulphate free from iron is injected. By this method the red cupric ferrocyanid is precipitated in the vessels. **B.'s Test.** Same as *B.'s Reagent*.

**Bruise** (*brooz*). See *Contusion*.

**Bruit** (*bru-e'*) [*Fr., a noise or report*]. A term used by French physicians to designate the various specific sounds of auscultation. **B. d'airain**, Trousseau's term for the ringing note heard through the stethoscope applied to the chest wall when a coin is struck against another pressed against the surface of the chest on the opposite side. It is pathognomonic of a collection of gas in the pleural cavity. **B. de clapotement**, a splashing sound often heard in cases of well-marked dilatation of the stomach when pressure is made upon the abdominal walls. It is best elicited when the

patient is in the recumbent position, with relaxed abdominal walls, by palpating near the left border of the ribs. The same sound can be produced by shaking the patient (*bruit de glau-glau*). **B. de braque-ment**, a crackling sound. **B. de cuir neuf**, the new-leather murmur of the French; the creaking quality occasionally heard in pericardial friction-sounds. **B. de diable**, a venous murmur, of a whistling or rushing character, arising in the bulb of the common jugular vein, and due to such diseases as anemia, lead-poisoning, etc.; it is more common in the young, and is caused immediately by the vibration of the blood flowing from the narrow part of the common jugular vein into the wide, bulbous portion of the vessel. See also *Murmur*. **B. de galop**, a cantering rhythm of the heart frequently heard in mitral stenosis, in which three distinct heart-sounds are audible. It is due to a reduplication of the second sound. See also *Gallop Rhythm*. **B. de glou-glou**. See *B. de clapotement*. **B. de lime**. See *B. de scie*. **B. de moulin**, water wheel sound; a peculiar friction-sound mixed with splashing and gurgling, heard in pneumo-hydropericardium. **B. d'oboe**, a musical heart murmur. **B. de pot fêlé**, the cracked-pot sound. **B. de parchemin**, a rattling, as of parchment. **B. de râpe**. See *Bruit de scie*. **B. de rappel**, a sound resembling the double beat upon a drum. This doubling of the heart-sounds may be noted in different stages of chronic interstitial nephritis, when it is the first sound that is duplicated; and in mitral stenosis, when the second sound is doubled. **B. de scie**, a murmur sounding like that made by a saw or file. Also called *B. de râpe* and *B. de lime*. **B. skodique**, an amphoric note heard in the pleural cavity, especially near the apex anteriorly, when there is a fluid accumulation not filling the whole of the plural sac. Also called *Skoda's tympany*. **B. de soufflet**, a bellows-murmur. **B. de soupape**, a flapping sound. **B. de de va et vient**, a to-and-fro friction-sound.

**Brün's Operations**. See *Operations, Table of*.

**Brunet**, or **Brunette** (*bru-net'*) [Fr.]. 1. Of a dark complexion. 2. One with a dark complexion.

**Brüning's Red**. Same as *Rosanilin*.

**Brunissure** (*brun-is-ur'*) [Fr., *brunisseur*, that which browns]. A disease of the grape, attacking the leaves only, caused by *Plasmidio pora vitis*. (Viala and Sauvageau). Also called *Braune*.

**Brunner's Glands**. See *Glands*.

**Brownian Movement**. See *Brownian Movement*.

**B. Theory**, brownism; a doctrine taught by Dr. J. Brown (1735-88) that both physiologic and pathologic phenomena are due to variations in a natural stimulus, its excess causing sthenic and its deficiency producing asthenic diseases.

**Brunswick** (*brunz'-wik*) [Ger.]. A town in Germany. **B. Black**. Same as *Japan Black*. **B. Green**. See *Conspectus of Pigments*, under *Pigment*.

**Brush** (*brush*) [ME., *brusche*]. An instrument consisting of a collection of some flexible material fastened to a handle. In surgery, various forms of brush are employed; as the *acid brush*, of glass threads; the *electric brush*, a form of electrode; the laryngeal brush; the *nasal, pharyngeal, and stomach brush*. See also *Pencil*. 2. A thicket of small trees. **B.-burn**, the injury produced by violent friction, and the resulting heat; it often resembles a burn or scald. **B.-cells**. See *Cell*.

**Bryant, Ampulla of**. See *Ampulla*.

**Bryant's Line**. See *Lines, Table of*. **B.'s Method**. See *Treatment, Methods of*. **B.'s Operations**. See *Operations, Table of*. **B.'s Triangle**. See *Triangles, Table of*.

**Bryce's Test**. A test to determine if systemic infection has taken place after vaccination. It consists in repeating the inoculation during the evolution of the vaccine disease. If systemic infection has occurred, the second inoculation will mature rapidly, so as to overtake the first.

**Brygmus** (*brig'-mus*) [βρυγμός, biting]. Same as *Odon-topraxis*.

**Bryology** (*bri-ol'-o-je*) [βρίον, a moss; ζήτω, to speak]. The science of mosses.

**Bryonia** (*bri-ol'-ne-ah*) [βρωνια, bryony]. Bryony. The root of *B. alba* and *B. dioica*; indigenous to Europe, with properties due to an intensely bitter glucosid, *Bryonin*, C<sub>48</sub>H<sub>80</sub>O<sub>19</sub>, a strong irritant when applied to the skin or mucous membrane, often producing vesication. It is a remedy of great value in pleurisy, pleuro-pneumonia, and rheumatic fever, and an excellent agent in colds. Dose of the powdered root gr. x-xxx. **B., Infusum** (unof.), has a strength of  $\frac{5}{3}$  to the Oj of water. Dose  $\frac{5}{3}$  ss-ij. **B., Tinct.**, a 10 per cent. solution of the root in alcohol. Dose  $\frac{m}{v}$ - $\frac{5}{3}$  ss.

**Bryonin** (*bri-ol'-nin*) [βρωνια, bryony]. A precipitate from the tincture of *Bryonia alba*; useful as a hydragogue, and in rheumatism and bronchial affections. Dose gr. ij- $\frac{1}{4}$ . Unof. See *Bryonia*. Dose as a drastic purgative, gr.  $\frac{1}{6}$ - $\frac{1}{3}$ .

**Bryony** (*brī'-o-ne*). See *Bryonia*. **B. Black**. See *Tamus*.

**Bryoplastic** (*bri-o-plas'-tik*) [βρίον, moss; πλασσειν, to form]. A descriptive term loosely applied to such abnormal growths of tissue as resemble vegetable forms.

**Bryoretin** (*bri-o-r'-tin*) [βρωνια, bryony; ρητιν, resin]. A resin-like substance obtainable from the glucosid bryonin.

**Bubaline** (*bu'-bal-in*) [*bubalinus*, pertaining to the *bubalus*, buffalo]. In biology, resembling or pertaining to the buffalo.

**Bubby** (*bub'-e*) [E. dial.]. 1. A vulgar name for the mamma. 2. A local name for *Calycanthus floridus*.

**Bubo** (*bu'-bo*) [βουβων, the groin]. Inflammation and swelling of a lymphatic gland, properly and generally of the groin, and usually following chancroid, gonorrhea or syphilitic infection. **B., Parotid**. See *Parotitis*. **B., Primary**, a slight adenitis of the groin due to mechanical irritation, or other cause; formerly supposed to be due to syphilis without a chancre having preceded. **B., Sympathetic**, one caused by irritation, friction, injury, etc., and not arising from an infectious disease.

**Bubonadenitis** (*bu-bon-ad-en-i'-tis*) [βουβων, the groin; αδην, a gland; ιτις, inflammation]. Inflammation of an inguinal gland.

**Bubonalgia** (*bu-bon-al'-je-ah*) [βουβων, the groin; άλγος, pain]. Pain in the inguinal region.

**Bubonic** (*bu-bon'-ik*) [βουβων, the groin]. Relating to a bubo. **B. Plague**. Synonym of the *Plague, q. v.*

**Bubonocoele** (*bu-bon'-o-sel*) [βουβων, the groin; κηλη, tumor]. Inguinal hernia when the gut does not extend beyond the inguinal canal.

**Bubononcus** (*bu-bon-eng'-kus*) [βουβων, the groin; ογκος, a tumor]. A swelling in the groin.

**Bubonopanus** (*bu-bon-o-pa'-nus*) [βουβων, the groin; πανος, torch]. An inguinal bubo.

**Bubonulus** (*bu-bon'-u-lus*) [L., dim. of *bubo*]. Lymphangitis of the dorsum of the penis, often with abscesses; due to chancroidal virus.

**Bucca** (*buk'-ah*) [L.]. 1. The mouth; the hollow of the cheek, or its inner surface. 2. The xulva.

**Buccal** (*buk'-al*) [*bucca*, the cheek]. Pertaining to the cheek. **B. Coitus**. See *Irramiation and Name-*

- less Cime.* **B. Glands.** See *Gland*. **B. Teeth,** the teeth behind the canines are so called because they are situated on the inside of the cheeks. In the human subject they are the bicuspid and molars.
- Buccinal** (*buk'-in-al*) [*Buxus*, a trumpet]. In biology, trumpet-shaped.
- Buccinator** (*buk'-in-ator*) [*Buxus*, a trumpet]. The thin, flat muscle of the cheek. See *Muscles, Table of*.
- Bucco** (*buk'-o*). Same as *Bucha*.
- Bucco-labial** (*buk'-o-lab-ial*) [*bucca*, the mouth; *labium*, a lip]. Pertaining to the mouth and lip.
- B. Muscle,** the buccinator. See *Muscles, Table of*.
- Bucco-pharyngeal** (*buk'-o-far-in'-je-al*) [*bucca*, the mouth; *pharynx*, the pharynx]. Relating to the mouth and to the pharynx.
- Buccula** (*buk'-u-lah*) [L., dim. of *bucca*, the cheek]. The fleshy fold seen beneath the chin, and forming what is called a double chin.
- Buchanan's Operations.** See *Operations, Table of*.
- Buchu** (*bu'-ku*) [native African]. The leaves of several species of *Barosma*, yielding a volatile oil, to which its properties are probably due, and a bitter extractive, *Barosmin*. Dose gr. j-v. It causes a sensation of glowing warmth over the body, stimulates the appetite, and increases the circulation. It is useful in urethritis and affections of the genito-urinary mucous membrane. Dose of the leaves, gr. xv-xxx. **B., Ext.,** fld. Dose  $\frac{m}{x}$ - $\frac{3}{j}$ . **B., Infusum** (Unof.).  $\frac{5}{j}$  to  $\frac{1}{j}$ . Dose  $\frac{5}{ss}$ - $\frac{1}{j}$ . **B., Infusum** (B. P.). Dose  $\frac{5}{j}$ - $\frac{1}{j}$ . **B., Tinctura** (B. P.) Dose  $\frac{5}{j}$ - $\frac{1}{j}$ .
- Buck's Apparatus.** An apparatus consisting of a weight and pulley for applying extension to a limb.
- B. Fascia,** the superficial perineal fascia.
- B. Method.** See *Treatment, Methods of*. **B. Operations.** See *Operations, Table of*.
- Buckbean** (*buk'-ben*) Bog-bean. The rhizome of *Menyanthes trifoliata*, tonic, antiscorbutic, and emmenagogue. It has been recommended as a vermifuge, and has been used in functional amenorrhea. Dose of fld. ext.  $\frac{m}{v}$ -xxx. Unof.
- Bucket Fever** (*buk'-et fel'-ver*). See *Fever*.
- Buckeye Bark** (*buk'-i bark*). The bark of *Æsculus glabra*, astringent and tonic, and serviceable in rectal irritation, prolapsus, and various uterine derangements. Dose of fld. ext. gtt. iij-v. Unof.
- Buckhorn** (*buk'-horn*). The horn of a buck. When powdered or calcined, it is used by dentists for polishing enamel, and fillings, and for removing light deposits of tartar.
- B. Fern,** a fern, called also royal fern, *Adiantum regali*; it is vaunted as a cure for rickets. Unof.
- Buckle-shell** (*buk'-l-shel*) [New Eng. dialect]. A recently moulted lobster; also called paper-shell lobster, June lobster, or sand-lobster.
- Bucko** (*buk'-o*). Same as *Buchu*.
- Buckthorn** (*buk'-thorn*). See *Frangula*. **B., California.** See *Cercora Sagrada*.
- Bucku** (*buk'-u*). Same as *Buchu*.
- Buckwheat** (*buk'-h-wet*). The seed or grain of *Fagopyrum esculentum* and of other species of the same genus. It is used to some extent as a substitute for the true cereals. In theory, it takes a high rank as a food; but its free use tends to constipation, indigestion and headache, and especially to a peculiar roughness and itching of the skin. The flowers of the plant afford rich honey pasturage, but the honey is inferior.
- Bucnemia** (*buk'-nē-mē-ah*) [*buc*, increase; *knēmē*, the leg]. Inflammation of the leg characterized by tenderness and swelling; elephantiasis; also phlegmasia dolens. **B. Tropica.** See *Elephantiasis arabum*.
- Bud** (*bu'*) [M.L., *buddere*, a bud]. In biology, the undeveloped germ state of a leaf or flower.
- Budd's Disease.** See *Diseases, Table of*.
- Budding** (*bud'-ing*) [M.E., *budden*]. In biology, a form of reproduction or cell-division, occurring among the polyps and infusoria, in which a bud is given off by the parent and comes to resemble the latter. The bud may remain permanently attached or may form a colony, each member acquiring a differentiation of function, even to the formation of male and female elements. The process is also called *Gemmation*, *q. v.*
- Budge's Center.** See *Center*.
- Buffalo Rubin** (*buff'-al-o rub'-bin*). See *Pigments, Conspectus of*.
- Buffers' Consumption** (*buf'-erz con-sump'-shun*). The phthisis occurring among metal-polishers.
- Buffy Coat** (*buf'-e-kot*). A grayish or buff-colored crust or layer sometimes seen upon a blood-clot, after phlebotomy, and once looked upon as a sign of inflammation. It is caused by the partial subsidence of the red blood-corpuscles.
- Bufo** (*bu'-fo*) [*bufo*, the toad]. Phrynin; an alkaloid from the venom of the toad; it is poisonous, and said to resemble digitalin in its effects.
- Bufoform** (*bu-fon'-if-orm*) [*bufo*, a toad; *forma*, shape]. In biology, toad-like.
- Bugbane** (*bug'-ban*). See *Cimicifuga*.
- Buggery** (*bug'-er-ē*) [OF., *bougere*, an heretic]. Sodomy; bestiality.
- Bugleweed** (*bu'-gl-wēd*). The herb, *Lycopus virginicus*, narcotic and astringent. Dose of fld. ext.  $\frac{3}{ss}$ - $\frac{1}{j}$ . *Lycopin*, concentrated extract. Dose gr. j-iv. Unof.
- Buhach** (*bu'-hatch*) [Serbo-croatian for flea-bane; *buha*, a flea]. The plant *Pyrethrum cinerariæfolium*. See *Insect Powder*.
- Buhl's Disease.** See *Diseases, Table of*.
- Bulam, or Bulama Boil** (*bu'-lam or bu-lam'-ah boil*). A boil occurring on the African island of Bulam; probably caused by a burrowing-worm or insect-larva.
- B. Fever,** a West-Africa coast fever, said to be identical with yellow fever.
- Bulata** (*bul'-at-ah*). See *Balata*.
- Bulb** (*bulb*) [*βολβός*, a bulb]. 1. The expansion or dilatation of a canal or vessel. 2. Applied to the medulla and pons. 3. A short underground stem covered with fleshy leaf-bases or fleshy leaves, as the onion and squill. **B. of Aorta,** the dilatation of the aorta near its beginning. **B. of Corpus Cavernosum,** the muscle beneath the bulb of the urethra. **B. of an Eye,** the eyeball. **B. of Fornix.** See *Corpora*. **B. of a Hair,** the swelling at the root of a hair. **B., Olfactory,** one of the two bulbs of the olfactory nerve situated on either side of the longitudinal fissure upon the under surface of each anterior lobe of the cerebrum. **B. of a Tooth,** the papilla that forms the germ of a tooth. **B. of Urethra,** the posterior expanded part of the *corpus spongiosum penis*. **B. of the Vagina,** a small body of erectile tissue on each side of the vestibule of the vagina, homologous to the bulb of the urethra of the male. **B. of Vena Jugularis,** the dilatation at the beginning of the external jugular vein.
- Bulbar** (*bul'-bar*) [*βολβός*, a bulb]. Bulbous. Pertaining to the medulla. **B. Disease, or Paralysis,** a term applied to the progressive and symmetrical paralysis of the facial muscles about the mouth, including those of the tongue, pharynx, and sometimes those of the larynx. This paralysis is due to a disease of the motor nuclei in the medulla oblongata; an *acute* and a *chronic* form are met with. The acute form is due to hemorrhage or softening; the chronic to degeneration. The chronic form is insidious in its approach, the tongue often being the first organ involved; the

course is slow but progressive, and death usually results in from one to four years. Bulbar paralysis usually occurs after forty years of age. Syphilis is not a predisposing cause. The disease is also called *Labio-glosso-laryngeal Paralysis*. There is also a *pseudo-bulbar paralysis*, due to symmetrical lesions of the motor cerebral cortex.

**Bulbi vestibuli** (*bul'bi ves-tib'u-li*) [L.]. A name sometimes given to the glands of Bartholin.

**Bulbil**, or **Bulblet** (*bul'bil*, *bulb'let*) [*βοῦβόλος*, a bull]. Small bulbs of fleshy buds frequently occurring on above-ground parts of plants, as the bulblets of some onions and of the tiger-lily.

**Bulbillæ** (*bul-bil'e*) [*bulbillus*, dim. of *bulbus*, a bulb]. In biology, gemmæ of hydroid zoöphytes that become detached at an early stage, and are then capable of independent development.

**Bulbo-cavernosus** (*bul-bo-kav-ern-o'-sus*) [*βοῦβόλος*, a bulb; *caverna*, a cavern]. A perineal muscle in the male subject, corresponding to the sphincter vaginae of the female. See *Muscles*, Table of.

**Bulbo-urethral** (*bul-bo-u-reth'-ral*) [*βοῦβόλος*, a bulb; *οὐρήθρα*, the urethra]. Relating to the bulb of the urethra.

**Bulbus** (*bul'-bus*) [L.]. A bulb. **B. arteriosus**; in a certain stage in the development of the heart, the upper aortic enlargement is so called. **B. rhachidichus**, the medulla oblongata.

**Bulesis** (*bu-le'-sis*) [*βούλησις*, the will]. The will, or an act of the will.

**Bulimia** (*bu-lim'i-e-ah*) [*βοῦν*, increase; *ἡμῶς*, hunger]. Excessive, morbid hunger; it sometimes occurs in idiots and insane persons, and it is also a symptom of diabetes mellitus.

**Bulimic** (*bu-lim'i-ik*) [*βοῦν*, increase; *ἡμῶς*, hunger]. Pertaining to or affected with bulimia.

**Bulithos** (*bul'-lith-os*) [*βοῦς*, ox; *λίθος*, stone]. A bezoar from the ox or the cow.

**Bulla** (*bul'-ah*) [*bulia*, a bubble; *pl.*, *Bulle*]. A bleb or "blister," consisting of a portion of the epidermis detached from the skin by the infiltration of watery fluid. The bulla differs from the vesicle mainly in size. **B. ethmoidalis**, a rounded projection into the middle meatus of the nose, due to an enlarged ethmoid cell. **B.**, **Hemorrhagic**. See *Purpura*. **B. ossea**, the inflated or dilated part of the bony external meatus of the ear.

**Bullate** (*bül'-ät*) [*bulia*, a bubble]. Inflated; fornicated and with thin walls; blistered; marked by bullæ.

**Bull-dog Forceps** (*bül'-dog for'-seps*). See *Forceps*.

**Bullet Extractor** (*bül'-eteks-trak'-tor*). See *Forceps*.

**Bullosus** (*bül'-us*) [*bulia*, a blister]. Marked by bullæ; of the nature of a bulla.

**Bully's Toilet Vinegar**. A cosmetic consisting of tincture of benzoin, 1.0; acetic acid, 4.0; Cologne water, 100.0.

**Bully Tree** (*bül'-e-tre*). See *Balota*.

**Bulopeithia** (*bu-lo-pi'-the-ah*) [*βουλή*, will; *πειθεω*, to persuade]. An exaggerated hopefulness or morbid expectation of that which is desired.

**Bumastos** (*bu-mas'-tos*) [*βοῦς*, large (ox); *μαστός*, breast]. A very large or hypertrophied mamma.

**Bumble Foot** (*hum'-bl foot*). A disease of poultry, appearing as a wart-like substance growing in the ball of the foot. It is caused by high perches or by constant walking on cement or stone.

**Bump** (*bump*) [origin uncertain]. Any one of those eminences of the external surface of the skull that are conceived by phrenologists to mark the localities of the various "organs" of the brain.

**Bumstead's Operations**. See *Operations*, Table of.

**Bundle** (*bun'-dl*) [ME., *bundel*]. In biology, a fascicular grouping of elementary tissues, as nerve-fibers or muscle-fibers. **B. of Vicq d'Azyr**, a thick bundle of nerve-fibers arising in the more caudad of the two median nuclei of the corpus candicans of the brain, and extending to the anterior tubercle of the thalamus. It was formerly called the *fornix descendens*. **B.-sheath**, "In many plants a ring of cells, often with strongly-thickened and lignified walls, developed only on the outside of the bast, or around the entire bundle, or around the whole mass of fibro-vascular bundles." (Thoma.)

**Bunion** (*bun'-yun*) [origin uncertain]. A swelling of a bursa of the foot, especially of the great toe.

**Bunodont** (*bu'-no-dont*) [*βουνός*, a hill, mound; *ὄδον*, tooth]. Pertaining to tuberculate molar teeth.

**Bunsen Burner**. See *Burner*. **B. Cell**. See *Cell*.

**Bunt** (*bunt*). See *Smut*.

**Buphthalmia** (*büf-thal'-me-ah*), or **Buphthalmos** (*büf-thal'-mos*) [*βοῦς*, ox; *ὀφθαλμός*, eye]. See *Keratoglobus*.

**Bupleurum** (*bu-plu'-rum*) [L.]. A genus of umbelliferous herbs. Several old-world species were formerly employed in medicine, especially *B. rotundifolium*, of which the leaves and fruit are considered vulnerary and discutient. Unof.

**Bur**, or **Burr** [ME., *burre*, a bur]. 1. In botany, a rough, prickly shell or case. 2. The lobe of the ear. 3. In dentistry, an instrument for polishing the teeth. **B. Drills**, dental instruments of spherical, cone-shape, cylindrical, and wheel-forms, for opening and forming cavities. Flexible burs and drills having spring-tempered stems are used for opening and preparing nerve canals. **B. Thimble**, in dentistry, an open ring for the middle or index finger, with a socket attached, in which rests the end of the handle of the drill used in excavating a cavity in a tooth, preparatory to filling it.

**Burckhardt's Operation**. See *Operations*, Table of.

**Burcquism** (*boork'-izm*). See *Metallotherapy*.

**Burdach**, Column of. See *Funiculus cuneatus* and *Column*.

**B.**, **Cords of**, the cords formed in the dorsal zone of the human spinal cord by the meeting of the oval bundles of IIIs below the cords of Goll. **B.'s Fissures**. See *Fissures*, Table of.

**Burdock** (*ber'-dok*). See *Lappa*.

**Burdwan Fever** (*berd'-wan fe'-ver*). See *Fever*.

**Buret**, or **Burette** (*bu-ret'*) [Fr.]. A graduated tube designed for measuring small quantities of a reagent. It is usually held vertically in a stand and provided with a stopcock.

**Burggrave's Apparatus**. Same as *Scutin's Apparatus*, with the addition of a layer of wool around the limb.

**Burgundy Pitch**. See *Pix*.

**Burking** [*Burke*, a noted criminal]. Suffocation produced by a combination of pressure on the chest with closure of the mouth and nostrils. This was the method employed by Burke.

**Burmah Boil**. A form of endemic ulcer common in Burmah.

**Burmese** (*bur-méz'*) [native]. Pertaining to *Burmah*, a province of Farther India. **B. Lacquer**. See *Lacquer*. **B. Ringworm**, Fox's name for a severe and troublesome form of *Tinea circinata*.

**Burn** [ME., *bernen*, to burn]. 1. To become inflamed. 2. To be charred or scorched. 3. To have the sensation of heat. 4. An injury caused by fire or dry heat. 5. A disease in vegetables. 6. In chemistry, to oxygenize. 7. In surgery, to cauterize.

**Burner** [ME., *bernen*, to burn]. A common name for a lamp or heating apparatus used in laboratories

- for chemi- and pharmacæutic purposes. **B., Argand**, uses gas or oil, and contains an inner tube for supplying the flame with air. **B., Bunsen**, a form in which the gas is mixed with a sufficient quantity of air to produce complete oxidation before ignition.
- Burnett's Sir W. J. Disinfecting Fluid**. A strong solution of zinc chloride (gr. xxx to  $\frac{5}{2}$ ) of water) with a little iron chloride. This is added to one quart of water for use. It is serviceable as an antiseptic and deodorizer, and as a preservative of dead bodies.
- Burning** [*burn*, *brn*] [*ME., burnen* to burn]. Consuming with heat or fire. **B. of the Feet**, a neurotic affection of the sides of the feet, common in India. **B. Oil**, kerosene. The different burning oils are graded according to the two standards of color and fire-test. The colors range from pale-yellow (standard) white to straw (prime white) and colorless (water white). The fire-tests to which the commercial oils are mostly brought are 110° F., 120° F., and 150° F.; that of 110° going mainly to the continent of Europe and to China and Japan, and that of 120° to England. An oil of 150° F. fire-test, and water-white in color, is known in the trade as "headlight oil." An oil of 300° F., fire-test, and specific gravity .820 is known as "mineral sperm," or "mineral oil." "*Parenaphtha*" is a product of Russian petroleum, somewhat similar to mineral sperm oil. It has a specific gravity of .805, and a fire-test of 265° F. **B. Point**, in testing petroleum oils, the temperature at which a spark or lighted jet will ignite the liquid itself, which then continues to burn. This point is usually 6° to 20° C. higher than the flash-point, but there is no fixed relation between the two.
- Burnisher** [*ME., burnischen*, to polish]. An instrument used in polishing different kinds of metals, and in the laboratory of the dentist, for finishing pieces of dental mechanism.
- Burns**, Ligament of. The falciform process of the tarsi lata.
- Burns's Amaurosis**. See *Amblyopia, Post-Marital*; also *Amaurosis*.
- Burnt** [*ME., burnen*, to burn]. Scorched; injured by dry heat. Consumed by fire. **B. Alum**. See *Alumen calciatum*. **B. Sponge**. See *Spongia usta*. **B. Ocher**. Same as *Ocher*.
- Burow's (von) Operations**. See *Operations, Table of*.
- B. Veins**, small veins joining the portal and general circulations.
- Burra Gookeroo** (*bur'-ah gook'-er-oo*) [*E. Ind.*]. The string carpels of *Fribulus laurifolius*, a plant of the Zygaceæ order growing extensively throughout the East, and largely used as a diuretic and aphrodisiac. It has been employed for the relief of nocturnal emissions and impotence. Dose of the fluid extract mxx-l; of the infusion  $\frac{5}{2}$ -ii; of the syrup (for children)  $\frac{5}{2}$  ss-j.
- Burras Pipe** (*bur'-ah pip*) [*burra*, coarse-hair; *ME., burra*]. A port caustic.
- Burring** (*bur'-in*) [*ME., berre*, a harshness in the throat]. Rotacism; in stammering, the mispronunciation of the letter *r*. **B. Engine**, a dental appliance for the removal of *Burr*, etc., in forming cavities, etc. See *Dental Engine*.
- Burrow** (*bur'-ow*) [*ME., borow*, a hole]. 1. To make a hole or furrow, as in the skin; said of the itch insect. 2. To force a way through, as pus through the tissues.
- Burrowing** (*bur'-in*) [*ME., borow*, a hole]. The term given to the passage of pus through the tissues, after the formation of an abscess that has not burst or been evacuated by surgical methods.
- Bursa** (*bur'-sa*) [*Bursa*, a purse; *pl., Burse*]. A small sac interposed between parts that move upon one another. **B. anserina**, a pouch situated between the long internal lateral ligament and the lower internal hamstring tendons. **B. colera**, the gall-bladder. **B. cordis**, the pericardium. **B. fabricii**, "A glandular organ existing in both sexes and all species of birds; most developed in young birds, more or less atrophied in adults; it opens on the dorsal wall of the cloaca, into the lowest chamber of that organ." (Forbes.) **B. mucosæ**, a bursa situated in subcutaneous areolar tissue. **B., Plantar**, a bursa situated over the instep, either above or below a tendon. **B., Popliteal**, a bursa situated in the popliteal space between the tendon of the semimembranosus and the tendon of the inner head of the gastrocnemius, where they rub against each other. **B., Prepatellar**, a bursa situated over the patella and over the upper part of the patellar ligament. **B., Synovial**, found between tendons and bony surfaces. **B. vaginalis**, the synovial sheath.
- Bursal** (*bur'-sal*) [*bursa*, a purse]. Pertaining to a bursa, sac, or follicle.
- Bursalogy** (*bur'-sal'-o-je*) [*bursa*, a purse; *ζῳλογος*, science]. The science or study of the bursæ; the anatomy, physiology, and pathology of the bursæ.
- Bursera** (*bur'-ser-ah*) [*Burser*, a German botanist]. A genus of tropical trees, several species of which afford resinous gums. *B. acuminata* affords caranna; *B. tomentosa* furnishes tacamahac.
- Burseraceous** (*bur'-ser-ah'-se-us*) [*Burser*, a German botanist]. Pertaining to or resembling the genus *Bursera*.
- Bursiculate** (*bur'-sik'-u-lät*) [*bursicula*; dim. of *bursa*, a purse]. In biology, pouch or purse-like, or possessing a bursa.
- Bursiform** (*bur'-sif-orm*) [*bursa*, a purse; *forma*, form]. Resembling a bursa.
- Bursitis** (*bur'-sit'-is*) [*bursa*, a purse; *ιτις*, inflammation]. Inflammation of a bursa. **B., Tornwaldt's**, catarrhal inflammation of the anterior portion of the median recess of the naso-pharynx.
- Bursula** (*bur'-su-lah*) [dim. of *bursa*, a purse]. A small bursa; the scrotum.
- Burton's Sign**. See *Signs and Symptoms, Table of*.
- Busch's Operations**. See *Operations, Table of*. **B.'s Version**, in obstetrics, direct version, the head being grasped by one hand; while the other hand pushes the breech of the child upward, the head is pulled down into the cervix.
- Bushmaster** (*bush'-mast-er*). See *Lachesis*.
- Busk, Diameter of**. In craniometry, the auriculo-bregmatic diameter. **B., Horizontal Plane of**. See *Plane*.
- Butalanin** (*bu-tal'-an-in*) [*butyl*; *alanin*],  $C_5H_9(NH_2)O_2$ ,  $\alpha$ -amidoisovaleric acid; it consists of shining prisms that sublime without fusing. It is found in the pancreas of the ox.
- Butcher's Operations**. See *Operations, Table of*.
- Butea** (*bu'-le-ah*) [John, Earl of Bute (1713-92)]. A genus of leguminous tropical trees and shrubs. *B. frondosa* and *B. superba* afford Bengal Kino (see *Kino*); also called Butea Gum. **B. Gum**. See *Kino*.
- Butter** (*bu'-er*) [*butyrum*, butter]. The fatty part of the milk obtained by rupturing the cells of the fat-globules by "churning" or mechanical agitation. Also, various vegetable fats having the consistency of butter, as **B. of Cacao**. See *Theobroma*. Also applied to certain chemical products having the appearance or consistence of butter, as **B. of Antimony**, antimonious chlorid; **B. of Tin**, stannic chlorid; **B. of Zinc**, zinc chlorid. See, also, *Acid, Butyric*. **B.-and-Eggs**. See *Antirrhinum linaria*.

- B.-fat.** 1. The oily portion of the milk of mammalia. 2. The fatty portion of butter, made up of the glycerids of oleic, palmitic, and stearic acids (the so-called insoluble acids), and the glycerids of butyric, caproic, caprylic, and capric acids (the so-called soluble acids). The average proportion of the insoluble acids present in butter-fat is 88 per cent., and the average proportion of the soluble acids from five to six per cent. This gives a very important means of distinguishing between a natural butter and oleomargarin. The pure fat has a sp. gr. of from .910 to .914, and its melting-point varies from 85° to 92° F.
- B.-fly.** a winged plectet or tampon of cotton for vaginal application. **B.-fly Lupus.** Synonym of *Lupus erythematosus*. **B. Kidney.** See *Amyloid Kidney*. **B.-nut.** See *Juglans*.
- Butterin** (*but'-er-ēn*) [*butyrum*, butter]. An artificial substitute for butter, made principally of beef-fat. See *Oleomargarin*.
- Buttocks** (*but'-uks*) [ME., *buttok*]. The nates. The fleshy part of the body posterior to the hip-joints, formed by the masses of the glutei muscles.
- Button** (*but'-un*) [ME., *boton*]. See *Furunculus orientalis*. **B., Amboyna.** See *Frambesia*. **B., Belly,** the navel. **B., Biskra,** the *Aleppo Ulcer*. **B., Corrigan's,** a steel button-shaped cautery-iron, introduced by Sir J. C. Corrigan (1802-80). **B.-bush,** the bark of *Cephalanthus occidentalis*, a tonic, febrifuge, and diuretic. Dose of fld. ext. ʒ ss-j. Unof. **B.-hole,** **Mitral.** See *Funnel, Mitral*. **B.-hole Operation.** See *Boutonnière Operation* and *Operations, Table of*. **B.-lac.** See *Lac*. **B.-maker's Chorea.** See *Chorea*. **B.-scurvy,** a disease of privation, apparently similar to scibens or to yaws. **B.-snakeroot,** the root of *Liatris spicata*, and of *Eryngium yuccaefolium*; a stimulant, tonic, diuretic, and emmenagogue. Dose of fld. ext. ʒ ss-j. Unof.
- Butyl** (*bu'-til*) [*butyrum*, butter],  $C_4H_9$ . A hydrocarbon alcohol radical, that cannot be isolated, and that occurs only in combination with other radicals. **B. Chloral.** See *Chloral butylicum*. **B.-chloral Hydrate.** See *Chloral butylicum*.
- Butylamin** (*bu'-til'-am-in*) [*butyrum*, butter; *amin*]. Any primary amin of butyl. The butylamin of cod-liver oil is said to be one of its medicinal constituents.
- Butylene** (*bu'-til-en*) [*butyrum*, butter],  $C_4H_8$ . A hydrocarbon belonging to the olefin series. It exists in three isomeric forms, all of which are gases at ordinary temperatures.
- Butyric Acid** (*bu'-tir'-ik*). See *Acid, Butyric*.
- Butyrin** (*bu'-tir-in*) [*butyrum*, butter],  $C_3H_5(C_4H_7O_2)_3$ . A constant constituent of butter, together with olein, stearin, and other glycerids. It is a neutral yellowish liquid fat, having a sharp, bitter taste.
- Butyrene** (*bu'-tir-on*) [*butyrum*, butter],  $C_4H_{14}O$ . Dipropyl ketone. The principal product of the distillation of calcium butyrate. It boils at 144° and at 20° has a sp. gr. of .82.
- Buxin** (*buk'-in*) [*buxus*, the box-tree]. Bibirin; bebeerin; pelosin; the alkaloid of *Nectandra*. It is a white, amorphous powder with a persistent bitter taste; very insoluble in water, but easily soluble in alcohol and chloroform. Dose of it or its salts, from grains three to six in pill-form. It is used as a febrifuge. Unof.
- Buxton's Apparatus.** See *Anesthetic*.
- Buxus** (*buk'-us*) [L., the box-tree]. A genus of trees affording boxwood. **B. sempervirens,** the common box or box-tree of Europe and Asia. Its leaves, wood, and oil have been employed in medicine. Unof.
- Buzzi's Operation.** See *Operations, Table of*.
- Byrd's Method.** See *Artificial Respiration*. **B. Operation.** See *Operations, Table of*.
- Byrne's Method.** See *Treatment, Methods of*.
- Byrsa** (*bur'-sah*). Same as *Bursa*.
- Bysma** (*biz'-mah*) [*βίσμα*, a stopper; plug: *pl.*, *Bysmata*]. A plug or tampon.
- Byssaceous** (*bis-a'-she-us*) [*βίσσος*, a variety of flax]. In biology, composed of fine flax-like threads.
- Byssinosis** (*bis-in-o'-sis*) [*βίσσος*, cotton, flax; *νόσος*, disease]. A diseased condition of the lungs due to the inhalation of cotton-dust in factories.
- Byssocausis** (*bis-o-kaw'-sis*) [*βίσσος*, cotton; *καῖσις*, a burning]. Cauterization by the moxa; moxibustion.
- Byssogenous** (*bis-ō'-en-us*) [*βίσσος*, cotton; *γενής*, producing]. In biology, producing a byssus.
- Byssus** (*bis'-us*) [*βίσσος*, cotton, flax]. 1. Charpie, lint, or cotton. 2. The hairy growth of the pubic region. 3. In biology, a bunch of silky filaments secreted by the foot, in several molluscs. A name formerly given to the mycelium of large fungi. **B. Gland.** See *Gland*.
- Byssys** (*bis'-is*) [*βίσσος*, flax]. Same as *Byssus*. **B. Gland.** See *Gland*.
- Bythus** (*bith'-us*) [*βύθος*, the depth]. The lower or vesical portion of the abdomen.

## C

**C.** The chemic symbol of *Carbon*. Abbreviation of *integral*.

**c.c.** Abbreviation of *centimetre*.

**cm.** Abbreviation of *centimetre*.

**C. M.** Abbreviation of *crucian*, to-morrow morning.

**C. N.** Abbreviation of *crucian*, to-morrow night.

**Caballine Aloes** (*kab'-al-in al'-o*). See *Aloes*.

**Cabbage** (*kab'-aj*). See *Brassica*. **C. Rose**. See *Rosa canina*. **C.**, **Skunk**, a fetid plant of N. America, *Sesuvium portulacastrum*. Its tincture and fluid extract are prescribed as anti-spasmodic and antasthmatic. **Unof.** **C.-Tree**. See *Antira*.

**Cabinet** (*kab'-in-ee*) [*Fr.*, a closet]. A closed compartment. **C.**, **Pneumatic**. See *Pneumatic*.

**Cacemia** (*kak'-e-mi-ah* or *kak'-e-me-ah*). See *Cacemia*.

**Cacemic** (*kak'-e-mik* or *kak'-e-me-ik*). See *Cacemic*.

**Cacain** (*kak'-a-in*) [*Nahuatl*, *cacauatl*, cacao]. Theobromin, *q. v.*

**Calalia** (*kak'-al'-e-ah*) [*κακάλια*, a plant, colt'sfoot (?)].

A genus of composite flowered herbs, many species of which have been used in medicine. **C. suaveolens**, is the sweet centaury of N. America. **Unof.**

**Cacanthrax** (*kak'-m'-thraks*) [*κακος*, bad; *άνθραξ*, a coal]. Contagious anthrax. See *Anthrax*.

**Cacao** (*kak'-a*). See *Theobroma*. **C. Butter**, oleum theobromi is obtained from seeds or nibs of *Theobroma cacao*. It is a pure white fat, with a pleasant odor and taste; it fuses at 86° F. (30° C.); its specific gravity is .945 to .952. It is used in cosmetics, and for pharmaceutical preparations. See also *Theobroma*.

**Cacaphthæ** (*kak'-af'-the*) [*κακος*, bad; *άφθα*, an eruption]. Malignant or cachectic aphthæ. See *Aphthæ*.

**Cacation** (*kak'-at'-chur*) [*caatio*, a going to stool]. Defecation; alvine discharge.

**Cacatory** (*kak'-at'-o-re*) [*caatio*, a going to stool]. Attended with diarrhæa; as a cacatory fever.

**Caccagogue** (*kak'-a-gog*) [*κακκι*, dung; *άγωγος*, leading]. 1. Aperient; laxative. 2. An aperient, especially an ointment or suppository that induces gentle purgation. [Archaic.]

**Cacemia** (*kak'-e-me-ah*, or *kak'-e-me-ah*) [*κακος*, bad; *αιμα*, blood]. An ill-condition of the blood; depravity of the blood.

**Cacemic** (*kak'-e-me-ik*) [*κακος*, bad; *αιμα*, blood]. Associated with or suffering from cacemia.

**Cacesthesia** (*kak'-es-the'-sis*) [*κακος*, bad; *αισθησις*, sensation]. Morbid sensation.

**Cachæmia** (*kak'-e-me-ah*). See *Cacemia*.

**Cachectic** (*kak'-ek'-ti*) [*κακος*, bad; *ήγισ*, a habit]. Ill-conditioned; marked by cachexia. **C. Aphthæ**. See *Aphthæ*.

**Cachelcoma** (*kak'-ek'-k'-e-me-ah*) [*κακος*, ill; *ήλκωμα*, ulcer; *αλ*, *Cachæmia*]. A malignant or foul ulcer.

**Cachemia** (*kak'-e-me-ah*). See *Cacemia*.

**Cachet** (*kak'-et*) [*Fr.*]. A pharmaceutical preparation consisting of two concave pieces of wafer, varying in size from 1/4 to 1 1/2 inches in diameter, round or oblong in shape, in one of which the powder to be administered is placed, and the other, having previously been moistened, is then laid over the powder and the two margins are pressed together, when they adhere and completely enclose the powder. **C. de Pain**. Same as *Cachet*, *q. v.*

**Cachexia** (*kak'-ek'-e-ah*) [*κακος*, bad; *ήγισ*, a habit]. A term used to designate any morbid tendency, dyscrasia, depraved condition of general nutrition, or impoverishment of the blood, etc. It is applied particularly to scrofulous, syphilitic, or carcinomatous

patients. It is characterized by emaciation and a peculiar sallow or muddy complexion. **C. africana**, dirt-eating; geophagy. A disease supposed to be identical with miners' anemia. **C. aquosa**, a dropsical and anemic state. **C. icterica**, jaundice. **C.**, **Lymphatic**. Synonym of *Hodgkin's Disease*. **C.**, **Negro**. Same as *C. africana*. **C.**, **Pachydermic**. See *Myxedema*. **C. strumipriva**, the condition allied to if not identical with myxedema, following the extirpation or arrest of function of the thyroid gland. It is a cretinoid state, characterized in monkeys by hebétude, malnutrition, muscular tremor, puffy edema, leukocytosis, and the presence of mucin in the blood and connective tissue. **C. thyreopriva**. See *Myxedema*. **C. virginum**. See *Chlorosis*.

**Cachexy** (*kak'-eks'-e*). See *Cachexia*.

**Cachibou** (*kash'-e-boof*). See *Chibou*.

**Cachinnation** (*kak'-in'-a'-shun*) [*cachinnare*, to laugh loudly]. Immoderate laughter, as in the insane.

**Cachou** (*kash'-oo'*) [*Fr.* for "catechu"]. An aromatic pill or tablet for concealing the odor of the breath.

**Cachunde** (*ka'-chun'-de*) [*Sp.*]. An oriental ectuary used as a breath-perfume, and also as a stomachic and carminative. **Unof.**

**Cacocholia** (*kak'-o-ko'-le-ah*) [*κακος*, ill; *χολή*, bile]. A morbid condition of the bile.

**Cacochroia** (*kak'-o-kro'-le-ah*) or **Cacochræa** (*kak'-o-kre'-ah*) [*κακος*, bad; *χρoia*, color]. A bad complexion; unnatural color of the skin.

**Cachochylia** (*kak'-o-ki'-le-ah*) [*κακος*, bad; *χυλος*, juice]. Imperfect or disordered digestion.

**Cacochymia** (*kak'-o-kin'-e-ah*) [*κακος*, bad; *χυμος*, juice]. A morbid state of the fluids, humors, blood, or secretions; faulty stomachic digestion.

**Cacochymic** (*kak'-o-kin'-ik*) [*κακος*, bad; *χυμος*, juice]. Affected with cachochymia; dyspeptic.

**Cacocnemial** (*kak'-ok-ne'-me-ah*) [*κακος*, ill; *κνήμη*, leg]. Thinness or ill-condition of the leg or shin.

**Cacocolpia** (*kak'-o-kol'-pe-ah*) [*κακος*, ill; *κόλπος*, vagina]. A diseased state of the vagina.

**Cacodemon** (*kak'-o-de'-mon*) [*κακος*, ill; *δαίμων*, spirit]. An old name for a supposed besetting evil spirit; also, the nightmare.

**Cacodemonia** (*kak'-o-de-mo'-ne-ah*) [*κακοδαίμονια*, possession by an evil spirit]. Supposed possession or obsession by an evil spirit.

**Cacodemonomania** (*kak'-o-de-mo-no-ma'-ne-ah*) [*κακοδαίμονια*, possession by an evil spirit; *μανία*, madness]. A delusional belief, on the part of a patient, that he is possessed of a devil.

**Cacodontia** (*kak'-o-don'-te-ah*) [*κακος*, bad; *οδούς*, tooth]. A bad condition of the teeth.

**Cacodyl** (*kak'-o-dil*) [*κακος*, bad; *οξείν*, to smell; *ήλη*, matter], As(CH<sub>3</sub>)<sub>2</sub>. Kakodyl; dimethylarsin; a radical containing arsenic, hydrogen, and carbon. It is a colorless, heavy liquid, with an extremely offensive odor, and poisonous vapor; it is inflammable when exposed to air. Its protoxide is called alkarsin, *q. v.*

**Cacoesthesia** (*kak'-o-es-the'-sis*). See *Cacesthesia*.

**Cacœthes** (*kak'-o-e'-thēs*) [*κακος*, bad; *ήθος*, a habit]. Any bad habit, disposition, or disorder.

**Cacogalactia** (*kak'-o-gal'-ak'-te-ah*) [*κακος*, bad; *γάλα*, milk]. A bad or abnormal condition of the milk.

**Cacogastric** (*kak'-o-gas'-trik*) [*κακος*, bad; *γαστήρ*, the stomach]. Dyspeptic.

**Cacogenesis** (*kak'-o-jen'-es-is*) [*κακος*, bad; *γένεσις*, formation]. Any morbid, monstrous, or pathologic growth or product.

**Cacoglossia** (*kak-o-glos'-e-ah*) [*κακός*, evil; *γλῶσσα*, the tongue]. Gangrene of the tongue.

**Cacolet** (*kak'-o-la*) [Fr.]. A mule-chair or horse-pannier for the transportation of the wounded.

**Cacomorphia** (*kak-o-mor'-fe-ah*) [*κακός*, bad; *μορφή*, form]. Malformation; deformity.

**Cachonychia** (*kak-o-nik'-e-ah*) [*κακός*, bad; *ὄνυξ*, nail]. Disease or defect of a nail or of the nails.

**Caconym** (*kak'-o-nim*) [*κακός*, bad; *ὄνομα*, a name]. An undesirable or objectionable name, e. g., in biologic nomenclature or terminology.

**Cacopathy**, or **Cacopathia** (*kak-op'-a-the* or *kak-o-path'-e-ah*) [*κακός*, bad; *πάθος*, illness]. Any severe, malignant, or untoward condition or disease.

**Cacophonia** (*kak-o-fō'-ne-ah*) [*κακός*, bad; *φωνή*, voice]. An altered, depraved, or abnormal voice.

**Cacophonous** (*kak-o-fon'-ik*) [*κακός*, bad; *φωνή*, voice]. Affected with cacophonia.

**Cacoplastic** (*kak-o-plas'-tik*) [*κακός*, bad; *πλαστός*, formed]. 1. Characterized by or adapted to a low degree or kind of organization. 2. Relating to, causing, or attended with defective formation; liable to be changed into an abnormal tissue.

**Cacopragia** (*kak-o-pra'-je-ah*) [*κακός*, bad; *πράσσειν*, to do]. Functional derangement, as of nutritive processes, or of organs.

**Cacoproctia** (*kak-o-prok'-te-ah*) [*κάκη*, gangrene; *πρωκτός*, anus]. A gangrenous state of the rectum.

**Cacorrhachis** (*ka-kor'-rak-is*) [*κακός*, ill; *ράχης*, spine]. A diseased state of the vertebral column.

**Cacorrhina** (*kak-o-in'-e-ah*) [*κακός*, ill; *ῥίς*, nose]. Any diseased condition of the nose.

**Cacosmia**, or **Kakosmia** (*kak-oz'-me-ah*) [*κακός*, foul; *ὄσμη*, smell]. A repugnant or disgusting smell. **C.**, Subjective, a disturbance of the olfactory nerve or center, from hysteria or from other disease, giving rise to the perception of an offensive smell.

**Cacosomium** (*kak-o-sol'-me-um*) [*κακός*, bad; *σῶμα*, body]. A hospital for leprosy and other incurable diseases.

**Cacospermia** (*kak-o-sper'-me-ah*) [*κακός*, ill; *σπέρμα*, seed]. Any diseased state of the semen.

**Cacosphyxia** (*kak-o-sfik'-e-ah*) [*κακός*, ill; *σφίξις*, pulse]. A disordered state of the pulse.

**Cacostomia** (*kak-o-sto'-me-ah*) [*κακός*, ill; *στόμα*, mouth]. Any diseased or gangrenous state of the mouth.

**Cacothanasia** (*kak-o-than'-a'-ze-ah*) [*κακός*, bad; *θάνατος*, death]. A painful death.

**Cacothelin** (*kak-oth'-el-in*)  $C_{12}H_{23}NO_{20}$ . An alkaloid produced from brucin by the action of  $HNO_3$ .

**Cacothymia** (*kak-o-thim'-e-ah*) [*κακός*, bad; *θυμός*, mind]. A disordered state of the mind or disposition; mental disorder with moral depravity; insane malignity of temper.

**Cacotrophia** (*kak-o-tro'-fe-ah*). Same as *Cacotrophy*.

**Cacotrophy** (*kak-ot'-ro-fe*) [*κακός*, bad; *τρέφειν*, to nourish]. Disordered or defective nutrition.

**Cacozyme** (*kak'-o-zim*) [*κακός*, bad; *ζύμη*, a ferment]. A disorganizing, putrefactive, fermentative, or pathogenic microorganism.

**Cactina** (*kak-ti'-nah*) [*κάκτος*, a prickly plant]. A proprietary preparation said to be a proximate principle derived from night-blooming cereus (*Cereus grandiflora* and *C. mexicana*). It is a cardiac stimulant recommended as a substitute for digitalis. Unof.

**Cactus** (*kak'-tus*) [*κάκτος*, a prickly plant]. A genus of plants. **C. grandiflorus**. See *Night-blooming Cereus*. **C. Nipple**. See *Mammillaria*.

**Cacumen** (*kak-u'-men*) [L.: *pl.*, *Cacumina*]. 1. The top, as of a plant. 2. The culmen of the vermis superior of the cerebellum.

**Cadaver** (*kad-av'-er*) [*cadere*, to fall]. The dead body, especially that of man. A corpse. **C. Tubercle**, anatomic wart. A peculiar circumscribed hyperplasia of the papillary structures of the skin occurring chiefly on the dorsal surface of the hands and fingers of persons who are in the habit of handling dead and decomposing bodies.

**Cadaveric** (*kad-av'-er-ik*) [*cadere*, to fall]. Pertaining to the cadaver or dead body. **C. Alkaloids**, *Ptomaines*, q. v. **C. Ecchymoses**, certain post-mortem stains, closely resembling in their general appearance the effects of bruises or contusions. They occur, both externally and internally, on the lowest and most dependent parts of the body. They are also called hypostases, sugillations, and vibices. **C. Spasm**, the early, at times instantaneous, appearance of rigor mortis, seen after death from certain causes. It is also called *instantaneous rigor* and *tetanic rigidity*.

**Cadaverin** (*kad-av'-er-in*) [*cadere*, to fall],  $C_2H_4N_2$ . A ptomaine, isomeric with neuridin, and, like it, occurring very frequently in decomposing animal tissues. It is obtained from human hearts, lungs, livers, etc., after three days' decomposition at ordinary temperature, also from horseflesh, from putrid mussel, from herring and haddock. It is a constant product of the growth of the comma-bacillus, irrespective of the medium. It does not occur in culture-media from which bacteria are absent. It is a thick, water-clear, syrupy liquid, having an exceedingly unpleasant odor, somewhat resembling that of conin and semen. It is certainly identical with so-called "animal conin." Putrescin and cadaverin were both formerly believed to be physiologically indifferent; but recent investigations show both bases capable of producing active inflammation and necrosis. The necrosis of the intestinal epithelium in Asiatic cholera seems due to their presence. They also have the power, even in small quantities, of preventing blood from coagulating, and rendering it "laky." Cadaverin is believed by Grawitz to hinder the growth of bacteria. Cadaverin hydrochlorid, on dry distillation, decomposes into ammonium chlorid,  $NH_3HCl$ , and piperidin,  $C_3H_{11}N$ . Whether or not this change, whereby the non-poisonous cadaverin becomes a toxic base, can take place under the influence of bacteria during putrefaction, is not known.

**Cadaverization** (*kad-av'-er-is-a'-shun*) [*cadere*, to fall]. The passage of a living body to the state of a cadaver. Applied to the algid and cyanotic stage of cholera.

**Cadaverous** (*kad-av'-er-us*) [*cadere*, to fall]. Resembling a cadaver; ghastly; of a deathly pallor.

**Cade** (*kad*) [a Languedoc name]. See *Juniperus*. **C.**, Oil of (*oleum cadmium*), a tarry oil from the wood of *Juniperus oxycedrus*; it is used in the treatment of skin-diseases.

**Cadet's Fuming Liquid**. See *Alkarsin*. **C.'s Test**. See *Tests*, Table of.

**Cadiva Insania** (*kad-i'-zah in-sa'-ne-ah*) [L.]. Falling insanity; an old name for epilepsy.

**Cadlock** (*kad'-lok*). Wild mustard, *Brassica sinapis-trium*. See *Brassica*.

**Cadmium** (*kad'-me-um*) [*καδμία*, calamin].  $Cd = 112$ ; quantivalence 11. A bluish-white metal resembling zinc in its general properties. Only the sulphate and iodid are used in medicine. In its physiologic action it is escharotic and astringent, producing in large doses emesis and violent gastritis. See *Elements*, Table of. **C. iodidum**,  $CdI_2$ , used as an ointment, 1 to 8 of lard. **C. sulphas**,  $CdSO_4 \cdot 4H_2O$ , a valuable astringent in gonorrhea and in corneal opacities; used in a lotion in strength of gr.  $\frac{1}{2}$  or 4 to  $\frac{3}{4}$  of

- water, or as an ointment 1 to 40 of fresh lard. Unof. C.-Red. See *Conspectus of Pigments*, under *Pigment*. C.-Yellow. See *Conspectus of Pigments*, under *Pigment*.
- Caduca** (*ka-du' kah*) [*cadere*, to fall]. See *Decidua*. C. Passio. See *Critia in Menstrua*.
- Caducibranchiate** (*ka-du-'brang' k at*) [*caducus*, falling off; *branchia*, gills]. In biology, applied to such amphibia as lose the gills or branchiae upon reaching maturity.
- Caducicorn** (*ka-du-'korn*) [*caducus*, falling off; *cornu*, horn]. In biology, applied to animals that shed their horns or antlers.
- Caducity** (*ka-du-'sit-i*) [*caduitis*, senility]. Senility; the feebleness of advanced age.
- Caducous** (*ka-du-'kus*) [*caducus*, falling off]. In biology, the shedding or falling off of certain parts, as gills, antlers, horns. Dropping off very early, as compared with other parts.
- Caducus Morbus** (*ka-du-'kus mor-'bus*) [L.]. Falling sickness; an old name for epilepsy.
- Cæcal** (*ka-'kal*). See *Cæcal*.
- Cæcitis** (*ka-'sit-i*). See *Cæcitis*.
- Cæcum** (*ka-'kum*). See *Cecum*.
- Cænæsthesia** (*ken-es-the-'sis*). See *Cenæsthesia*.
- Cænogenetic** (*ken-no-jen-et-'ik*) [*kaivōs*, recent; *γένεσις*, generation]. In biology, the appearance of a new character very late in the course of development. This usually arises from comparatively recent variations of the type-form.
- Cæruleus** (*se-ru-'le-us*) [L.]. Sky-blue. C. morbus, blue disease. See *Cyanosis*.
- Cærulosis** (*se-ru-'lō-sis*). See *Cyanosis*.
- Cæsalpinia** (*ka-sal-pin-'e-ah*) [L.]. A genus of tropical leguminous trees. C. **bonducella**. See *Bonducella*. C. **moringa** has a diuretic bark. All unof.
- Cæsarean Operation** (*se-sar-'e-an*). See *Cæsarean*.
- Cesium** (*se-'sium*). See *Cesium*.
- Caffea** (*ka-'fe'*) [L.]. The seeds of *C. arabica*. The dried and roasted seeds are almost universally used in infusion as a beverage, forming a cerebral stimulant and stomachic tonic. They are valuable in promoting digestion and allaying hunger and fatigue. Coffee frequently causes excessive palpitation of the heart. Its properties are due to an alkaloid, **Caffeine**,  $C_8H_{10}N_4O_2 \cdot H_2O$ , identical with *Thein*. See *Tea*. Dose of the alkaloid gr. j-v. C. **citrate**. Dose gr. -v. C. **valerianas**, for nervous vomiting in hysteria. Dose gr. -iv. Ext. **Caffea Viridis** Fld. Unof. Intended as a substitute for the Fluid Extract of Guarana. Dose 5 ss-ij. See *Guarana*. **Injectio Caf Hypodermatica**, one grain of caffeine in three minims. Dose m-j-vj.
- Caffeine** (*ka-'fe'-in*) [*caffea*, coffee].  $C_8H_{10}N_4O_2 \cdot H_2O$ . The only alkaloid that occurs in the leaves and berries of the coffee tree, in tea, in Paraguay tea, and in guarana; the roasted pulp of the fruit of *Paulinia pectinifolia*. It occurs in pure, silky needles, slightly soluble in cold water and alcohol, with a feebly bitter taste. It is a cerebral and spinal stimulant. See *Caffea*. C. **citrate**, citrated caffeine, prepared by dissolving equal weights of caffeine and citric acid in double the quantity of hot distilled water. Dose gr. ij-x. C. **citrate effervesces**, effervescent citrated caffeine. Dose 5 grains in water. C.-iodol, a crystalline addition-product obtained by mixing alcoholic solutions of caffeine and iodol in molecular proportion. It contains 74.6 per cent. of iodol and 25.4 per cent. of caffeine, and is a light gray, odorless, tasteless and nearly insoluble compound. It is proposed as a substitute for iodol. Unof.
- Caffeina** (*ka-'fe'-in ah*). See *Caffeine*.
- Caffeinism** (*ka-'fe'-in-izm*) [*caffea*, coffee]. Chronic coffee poisoning; a train of morbid symptoms due to excess in the use of coffee.
- Cagot** (*ka-'gō'*) [Fr.]. 1. A member of an outcast race or clan in the S. W. of France; formerly regarded as lepers. 2. (By error) a cretin. C. **Ear**. See *Ear Deformities*.
- Cahinca**, or **Cainca** (*ka-'hing'-kah*) [native S. American]. The diuretic root of *Chiococca racemosa*, C. **densifolia**, or C. **anguifuga**, rubiaceous shrubs of tropical America. Unof.
- Cahn and V. Mering's Method**. A method of estimating the amount of acids in the stomach. It consists in distilling the contents of the stomach with water three times. The volatile acids are estimated in the distillate. The residue is shaken six times with 500 c.c. of ether, and this is evaporated to dryness, and the lactic acid estimated by titration. The residue contains the HCl, and this also can be estimated by titration.
- Cailcedra** (*ka-'se'-drah*) [origin unknown]. 1. The *Cedrela odorata*, a large tree of tropical America. The bark and wood are used in intermittent fevers; a fragrant oil (cedar-wood oil) is distilled from the wood. The tree also affords a resin. 2. The *Khaya senegalensis* of Africa and tropical America, a tree that closely resembles the foregoing.
- Cailliet's Test**. See *Tests, Table of*.
- Caillian's Test**. See *Tests, Table of*.
- Caisson Disease** (*ka-'son dis-ēz'*). The symptoms due to increased atmospheric pressure sometimes occurring in divers, caisson workers, etc. Paraplegia, hemiplegia, anesthesia, or apoplectic attacks are common, but paralysis of the legs is the most frequent symptom, coming on only after return to the normal atmosphere. The nature of the lesion is obscure.
- Cajeput Oil** (*ka-'je-put oil*). See *Caiuputi, oleum*.
- Cajuputene** (*ka-'ju-pu-'ten'*) [Malay],  $C_{10}H_{16}$ . The principal constituent of cajeput oil; it is a liquid of an agreeable odor.
- Cajuputi, Oleum** (*ka-'ju-pu-'te, ol'-e-um*). [Malay, "white wood;" *oleum*, oil]. Oil of Cajuput. A volatile oil distilled from the leaves of *Melaleuca leucadendron*. It resembles oil of turpentine in its general effects, being irritant externally and producing a sense of warmth internally, with accelerated pulse. It is used with benefit for flatulent colic, dropsy, hysteria, and cutaneous disorders; it also relieves toothache. Dose m-j-v. C., **Spiritus** (B.P.). Dose 5 ss-j.
- Cajuputol** (*ka-'ju-pu-'tol*) [Malay, *Cajuputi*, white wood]. The more limpid part of oil of cajuput; it is found also in some other fragrant volatile oils.
- Cake Colors** (*ka-'kul'-orz*). See *Pigments, Colors, and Dyestuffs*.
- Caked** (*ka-'kul*) [ME., *cake*]. Compressed or hardened into a solid mass. C. **Breast**, a breast in a puerperal woman in which the milk has become hardened and inspissated. C. **Bag**, in cows, an inflammation of the mammary gland.
- Calabar Bean** (*ka-'lab-ar ben*). See *Physostigma*.
- Calabarin** (*ka-'lab-'ar-in*) [*Calabar*]. An alkaloid from Calabar bean, apparently acting much like strychnin.
- Caladana** (*ka-'ad-'a-nah*). See *Kaladana*.
- Caladium** (*ka-'a-'de-um*) [L.]. A genus of large-leaved araceous plants. C. **bicolor**, of Brazil, is anthelmintic and cathartic. Various other species are employed locally in medicine. Unof.
- Calage** (*ka-'ahzh'*) [Fr., *wedging*]. A method of prophylaxis or treatment of sea-sickness by fixation of the viscera by pillows placed between the abdomen and

- the wall of the cabin and between the back and edge of the berth, the patient lying upon the side.
- Calamary** (*kal'-am-a-re*) [*kāzāquū*, inkstand]. Same as *Cuttle-bone*.
- Calamin** (*kal'-am-in*) [*calamina*, a corruption of *calmia*]. Native zinc carbonate. *Calamina preparata*, the prepared calamin, washed and pulverized, is used mainly as an external esiccant and astringent. *Unguentum calaminæ*, Turner's cerate. Unof.
- Calamint, Calamint** (*kal'-am-int* or *-minth*). Any plant of the labiate genus *Calamintha*. The calamints are aromatic stimulants, with the general properties of the other mints, such as pennyroyal. Unof.
- Calamistrum** (*kal-am-is'-trum*) [*calamus*, a reed]. In biology, one of the spines found on the hind-legs of spiders, used in arranging the silk as it issues from the spinnerets.
- Calamus** (*kal'-am-us*) [L., a reed: *gen.*, *Calami*]. Sweet Flag. The rhizome of *Acorus calamus*. It contains a volatile oil and *acorin*, a bitter nitrogenous principle. The root is an aromatic, stomachic tonic, and a common ingredient of many popular "bitters." C., Ext., Fld. Dose  $\text{m}_{\text{xx}}-\text{ʒj}$ . C., *Draco*, a species of rattan-palm that affords a part of the so-called Dragon's Blood (*q. v.*) of commerce. C. *scriptorius* (a writing pen or reed). The groove on the floor of the fourth ventricle, at the end of which is the ventricle of Arantius.
- Calapitte** (*kal'-ap-it*) [Mex., *calappa*, the cacao-tree]. A concretion found occasionally in the cocoa-nut; vegetable bezoar. It is valued as an amulet in the East.
- Calathidium** or **Calathium** (*kal-ath-id'-e-um* or *kal-ath'-e-um*) [*kāzāthos*, a vase-shaped basket]. In biology, applied to the flower-head in certain of the *Compositæ*.
- Calathiform** (*kal-ath'-if-ormi*) [*kāzāthos*, a vase-shaped basket; *forma*, form]. In biology, shaped like a cup, vase, or bowl, hemispherical, or concave.
- Calberla's Method.** A method of imbedding microscopic specimens in egg-emulsion. The white of several eggs is separated from the yolks, the chalazæ removed, and the white cut up with a pair of scissors. To each 15 parts of white add one part of a 10 per cent. solution of sodium carbonate (10 parts of calcined sodium carbonate to 100 parts of water). To this solution add the well-shaken yolks and again shake well. Pour the mixture into a deep vessel, allow to settle, remove the scum, and the mass is ready for use. The specimens, after being well washed in water, are placed in this mass until permeated. They are then fastened with pins to the freshly-cut surface of a piece of hardened mass.
- Calcaneal** (*kal-ka'-ne-al*) [*calcaneum*, the heel]. In biology, relating to the heel-bone, or calcaneum, or to a tuberosity in birds, resembling the calcaneum.
- Calcaneo-astragalar** (*kal-ka'-ne-o-as-trag'-al-ar*). See *Calcaneo-astragaloid*. C.-*astragaloid*, relating to the calcaneum and the astragalus. C.-*cavus*, a club-foot that combines the characters of calcaneus and cavus. C.-*cuboid*, belonging to the calcaneum and the cuboid. C.-*scaphoid*, belonging to the calcaneum and the scaphoid bone. C.-*valgo-cavus*, club-foot combining the features of calcaneus, valgus and cavus.
- Calcaneum** (*kal-ka'-ne-um*) [L., the heel]. A common name for the *os calcis* or heel-bone.
- Calcaneus** (*kal-ka'-ne-us*) [*calcaneum*, the heel]. Club-foot in which the heel alone touches the ground, the instep being drawn up toward the shin.
- Calcar** (*kal'-kur*) [L., a spur]. 1. Any spur or spur-like point, as the hippocampus minor. 2. Ergot of rye. 3. The calcaneum.
- Calcareous** (*kal ka'-re-us*) [*calx*, limestone]. Pertaining to or having the nature of limestone. C.
- Degeneration.** See *Degeneration*.
- Calcarine** (*kal'-kar-in*) [*calcar*, a spur]. Relating to the hippocampus minor. C.
- Fissure.** See *Fissure*.
- Calceiform** (*kal'-se-if-orm*) [*calceus*, a shoe; *forma*, form]. In biology, resembling in shape a shoe or slipper, as the corolla of certain flowers.
- Calceolaria** (*kal-se-o-lu'-re-ah*) [L., like a slipper]. A genus of scrophulariaceous plants, mostly of the Andean region. Many of the species have a high local repute as alteratives and antisyphilitics; several are emetic and purgative. Unof.
- Calcic** (*kal'-sik*) [*calx*, lime]. Of or pertaining to lime.
- C. Inflammation of: Gums and Peridental Membrane.** Inflammation caused and maintained by deposits of calculus on the necks of the teeth.
- Calcosis** (*kal-sik-o'-sis*) [*calx*, lime; *róσος*, disease]. Marble-cutter's phthisis; phthisis due to the inhalation of marble-dust.
- Calcification** (*kal-sif-ik-a'-shun*) [*calx*, lime; *fiere*, to become]. The deposit of calcareous or other insoluble crystalline matter within the tissues of the body.
- Calcigerous** (*kal-sij'-er-us*) [*calx*, lime; *gerere*, to bear]. Containing lime or a lime-salt; as the calcigerous cells of the dentine, or calcigerous tubules in bone.
- Calcigrade** (*kal'-sig-rād*) [*calx*, heel; *gredi*, to walk]. Walking on the heels.
- Calcination** (*kal-sin-a'-shun*) [*calcinare*, to calcine]. The process of driving off the volatile chemical constituents from inorganic compounds. The expulsion of carbon dioxide from carbonates.
- Calcine** (*kal'-sin* or *kal'-sin'*) [*calcinare*, to calcine]. To separate the inorganic elements of a substance by subjecting it to an intense heat.
- Calcium** (*kal'-se-um*) [*calx*, lime.][*gen.*, *Calcii*]. Ca = 40; quantivalence 11. A brilliant, silver-white metal, the basis of lime and limestone, characterized by strong affinity for oxygen, and isolated with great difficulty. See *Elements, Table of*. It is best known in the form of *calcium oxid*, quicklime; *C. hydrate*, slaked lime; and *C. carbonate*, chalk. The preparations of lime used in medicine are usually alkaline and slightly astringent. Calcium oxid is a powerful escharotic. C. *benzoas*,  $\text{Ca}(\text{C}_7\text{H}_5\text{O}_2)_2$ , used in nephritis and albuminuria of pregnancy. Dose gr. v-x. C. *carbonate Test*. See *Tests, Table of*. C. *chloridum*,  $\text{CaCl}_2$ , soluble in water. Dose gr. x-xx. C. *chlorid.*, Liq. (B. P.). Dose  $\text{m}_{\text{xx}}-\text{l}$ . *Calcii bromidum*. See *Bromin*. C. *Carb. Precipitatus*,  $\text{CaCO}_3$ , insoluble in water, but soluble in acids, with effervescence. Dose gr. v-xx. C. *hypophosphis*,  $\text{Ca}_2\text{PH}_2\text{O}_6$ . See *Phosphorus*. C. *Phosphas Precipit.*,  $\text{Ca}_3(\text{PO}_4)_2$ . See *Phosphorus*. *Calcis Liniment*, carron oil, contains equal parts of lime-water, and olive oil. C., *Liquor*, lime-water, contains about  $1\frac{1}{2}$  parts of lime in 1000 of water. Dose ʒ ss-ij. C. *Liq. Saccharatus* (B. P.). Dose  $\text{m}_{\text{xx}}-\text{ʒj}$ . C., *Syr.*, saccharated syrup of lime, contains lime 65, sugar 40, water q. s. It is the antidote to poisoning by carbolic or oxalic acid. Dose ʒ ss-ij. *Calx*,  $\text{CaO}$ , calcium oxid, quicklime, not used internally. C. *chlorinata*. See *Chlorin*. C. *Sulphurata*. Dose gr.  $\frac{1}{16}$ . *Creta*, native calcium carbonate; chalk. C. *Mist.*, consists of C. pulv. comp. 20, cinnamon-water 40, valence 40. Dose ʒ ss. C. *Preparata*, chalk freed from impurities by washing and elutriation. Dose gr. v-xx. C. *Pulv. Aromat.* (B. P.). Dose gr. x-ʒj. C. *Pulv. Aromat. cum Opil* (B. P.). Dose gr. x-ʒj. C. *Pulv. Comp.*, compound chalk-powder.

consists of C. prep. 30, acacia 20, sugar 50 parts. Dose gr. v- $\overline{5}$ j. **Testa præparata**, prepared oyster-shell. Unof. Dose gr. x-xx. **C. trochisci**, each contains prepared chalk 4 gr., acacia 1, sugar 6, with a little nutmeg.

**Calculary** (*kal'-ku-lar-ē*) [*calculus*, a stone] Relating to or of the nature of a calculus.

**Calculifragous** (*kal'-ku-l'frā-gū-s*) [*calculus*, a stone; *frangere*, to break] Lithotritic; breaking or reducing a stone in the bladder.

**Calculus** (*kal'-ku-lus*) [*calculus*, a stone]. Of the nature of a calculus.

**Calculus** (*kal'-ku-lus*) [dim. of *calx*, chalk: *pl.*, *Calculi*].

A calcareous or stone like concretion found in the bladder, kidney, etc. **C.**, **Arthritic**, a gouty concretion. **C.**, **Biliary**, a gall stone. **C.**, **Bronchial**, a concretion in an air-passage. **C.**, **Cutaneous**. See *Milium*. **C.**, **Dental**, tartar on the teeth or gums. **C.**, **Fusible**, a urinary calculus composed of phosphates of ammonium, calcium, and magnesium. **C.**, **Lacteal**, or **Mammary**, a calcareous nodule sometimes obstructing the lactiferous ducts. **C.**, **Mulberry**, the oxalate of some variety, resembling a mulberry in shape and color. **C.**, **Nasal**. See *Rhinolith*. **C.**, **Prostatic**, one in the prostate gland. **C.**, **Renal**, a calculus found in the kidney, producing what has been called nephritic colic. **C.**, **Salivary**, one forming in the ducts of the salivary glands. **C.**, **Uterine**, an intra-uterine concretion; a wombstone; formed mainly by calcareous degeneration of a tumor. **C.**, **Vesical**, one that may have originally descended from the kidney or formed primarily in the bladder.

**Calea** (*kal'-e-ah*) [L.]. A genus of tropical American composite-flowered plants. **C. zacatechichi**, a Mexican plant, tonic, antiperiodic, and a hepatic stimulant. Unof.

**Caledonia Brown**. See *Conspectus of Pigments*, under *Pigment*.

**Calcfacient** (*kal'-e-fal'-she-ent*) [L., *calidus*, warm; *facere*, to make]. 1. Warming; producing a sensation of heat. 2. A medicine, externally applied, that causes a sensation of warmth.

**Calcfactor** (*kal'-e-fak'-tor*) [*calidus*, warm; *facere*, to make]. A warmer; a little, portable stove; a pocket stove; a chafing-dish.

**Calendula** (*kal'-en'-du-luh*) [*calendæ*, the first day of the month: *gen.*, *Calendule*]. Marigold. The flowering plant known as the garden-marigold, *C. officinalis*. **C.**, **Tinct.**, contains 20 per cent. of the leaves and stems. It is used exclusively as a local application to wounds, bruises, and ulcers, and has been vaunted as a cure for carcinoma.

**Calendulin** (*kal'-en'-du-lin*) [*calendæ*, the first day of the month]. An amorphous principle obtainable from calendula.

**Calentur** (*kal'-en-tur*) [Sp., *calentura*, heat; L., *calere*, to be hot]. A tropical remittent fever with delirium; formerly, a supposed fever of this kind that attacked mariners, leading them to leap into the sea.

**Calf** [ML., *calvi*] The thick fleshy posterior portion of the leg. See *Sura*. **C.-bone**, the tibia. **C.-knee**. See *Genu Valerian*.

**Calices of the Kidneys** (*kal'-li-ēs*). Plural of *Calyx*. The cup-like tubes of the ureter that encircle the apices of the Malpighian pyramids of the kidneys.

**Calico Bush** (*kal'-i-ko bush*). See *Kalmia*.

**California** (*kal'-i-for'-ni-ah*) [Mex.] A western State.

**C. Buckthorn**. See *Cornus Sagrada*. **C. Elm**. See *Fraxinus*. **C. Feverbush**. See *Gerruya*. **C. Laurel**, the leaves of *Umbellularia californica*, common to the Pacific slope. It is recommended for nervous headaches, cerebral spinal meningitis, neu-

ralgia, etc. Dose of fld. ext., gtt. x-xxx. **C. Poppy**. See *Lescholtzia californica*.

**Caligated** (*kal'-ig-a-ted*) [*caliga*, a boot]. In biology, applied to the booted tarsus of the typical oscine birds.

**Caligation** (*kal'-ig-a'-shun*), or **Caliginosity** (*kal'-ij-in-ōs'-it-e*). See *Caligo*.

**Calignani's Operation**. See *Operations*, *Table of*.

**Caligo** (*kal'-i-gō*) [L.]. Dimness of vision; an opacity of the cornea, lens, or vitreous humor.

**Caligula** (*kal'-ig'-u-lah*) [*caliga*, a boot]. In biology, applied to the tarsal envelop of oscine birds.

**Caliology** (*kal'-e-ol'-o-jē*) [*kalia*, a nest; *λέγειν*, to speak]. In biology, the systematized knowledge of birds' nests.

**Calipers** (*kal'-ip-erz*) [corruption of *caliber*]. Compasses with curved legs; they are used in vulcanite and celluloid dental work to measure the thickness of the plate. Calipers are used also in pelvimetry, craniometry, and other measurements of parts of the body.

**Calisaya** (*kal-is-a'-yah*) [South America]. *Cinchona* bark, especially that of *Cinchona calisaya*. See *Cinchona*.

**Calisthenics**, or **Callisthenics** (*kal-is-then'-iks*), [*καλός*, beautiful; *σθένος*, strength]. The practise of various rhythmic movements of the body, intended to develop the muscles and produce gracefulness of carriage; light gymnastics, especially designed for the use of girls and young women.

**Callaway's Test**. In dislocation of the shoulder the loss of from one to two inches in the vertical circumference of the shoulder-joint of the injured side, as determined by measuring with a tape-line over the acromion and through the axilla. This test is not reliable after traumatic swelling has set in.

**Callicarpa** (*kal'-ik-ar'-pah*) [*καλός*, beautiful; *καρπός*, fruit]. A genus of verbenaceous plants. **C. americana**, a shrub of the U. S., called "French Mulberry," is used locally for skin-diseases and for dropsy. Unof. **C. bouplandiana**, of South America, and **C. cana**, **C. lanata**, and **C. rheedi**, of the E. Indies, are similarly employed. All unof.

**Callisection** (*kal'-is-ek'-shun*) [*callus*, insensibility; *sectio*, a cutting]. Painless vivisection.

**Callisen's Operation**. See *Operations*, *Table of*.

**Callitriche** (*kal'-it'-rik-e*) [*καλός*, beautiful; *τρίχis*, hair]. A genus of aquatic herbs. **C. heterophylla** and **C. verna** are diuretic; these and other species afford a mucilage employed as a hair-dressing and they are used in domestic practice for making poultices. Unof.

**Callomania** (*kal-o-ma'-ne-ah*) [*καλός*, beautiful; *μανία*, madness]. The mania of beauty and grace; a monomania in which the patient believes herself to be endowed with extraordinary beauty.

**Callosal** (*kal'-o'-sal*) [*callosus*, hard]. Pertaining to the corpus callosum.

**Callose** (*kal'-os*) [*callosus*, thick-skinned, hard]. In biology, having hardened spots or protuberances.

**Callositas** (*kal'-os'-it-as*). See *Callosity*.

**Callosity** (*kal'-os'-it-e*) [*callus*, hardness]. *Callositas*. Tylosis, Tyloma, Keratoma. A hard, thickened patch on the skin produced by excessive accumulation of the horny layers.

**Calloso-marginal** (*kal-o-so-mar'-jin-al*) [*callosus*, hard; *margo*, margin]. Relating to the callosal and marginal gyri of the brain.

**Callosum** (*kal'-o'-sum*). Same as *Corpus Callosum*.

**Callosus** (*kal'-us*) [*callosus*, hard]. Hard; tough, like callus.

**Callus** (*kal'-us*) [L.]. 1. A callosity; hardened and thickened skin. 2. The new growth of incomplete osseous tissue that surrounds the ends of a fractured

bone, during the process of repair. See *Callosity*. **C.**, **Permanent**, the permanent bond of bony union after re-absorption of the **C. Provisional**, or cartilage-like, plastic material first thrown out. **C. of Skin**, induration and thickening of the skin.

**Calmant** (*kahm'-ant*) [ME., *calme*]. A calmative medicine.

**Calmative** (*ka(h)l'-mat-iv*) [ME., *calme*]. 1. Calming; sedative. 2. An agent that produces a calming or sedative effect.

**Calomel** (*kal'-o-mel*). See *Hydrargyrum*.

**Calophyllum** (*kal-o-fil'-um*) [*καλός*, beautiful; *φύλλον*, leaf]. A genus of large tropical guttiferous trees. Several of the species (as *C. tacamahaca*, *C. inophyllum*) yield medicinal oils and resins. Unof.

**Calor** (*ka'-lor*) [L., "heat"]. 1. Heat. 2. Moderate fever heat; less than *feveror* and *ardor*. **C. animalis**, animal heat. **C. febrilis**, fever-heat. **C. fervens**, boiling heat. **C. innatus**, natural or normal heat. **C. mordicans**, biting or pungent heat (an unfavorable symptom of typhus). **C. natus**, native or animal heat; blood heat; normal heat. **C. internus**, inward heat; fever not appreciable on the surface of the body.

**Caloricity** (*kal-or-is'-it-e*) [*calor*, heat]. The heat-producing power of the living animal body.

**Calorie** (*kal'-or-e*) [Fr.]. See *Calory*.

**Calorific** (*kal-or-if-a'-she-ent*) [*calor*, heat; *facere*, to make]. Heat-producing (applied to certain foods).

**Calorimeter** (*kal-or-im'-et-er*) [*calor*, heat; *μέτρον*, a measure]. An instrument for transforming the potential energy of the food into heat, and for measuring the number of heat-units produced. Two forms are used, the Water-Calorimeter and the Ice-Calorimeter.

**Calorimetry** (*kal-or-im'-et-re*) [*calor*, heat; *μέτρον*, a measure]. The estimation of the heat-units by the calorimeter.

**Calorimotor** (*kal-or-im-o'-tor*) [*calor*, heat; *motor*, mover]. A galvanic battery that produces heating-effects, generating electricity in large quantity, but not necessarily with a high electro-motive force.

**Calorinosis** (*kal-or-in'-es-is*) [*calor*, heat; *pl.*, *Calorinosis*]. Any disease characterized by an alteration in the quantity of animal heat.

**Calory** (*kal'-or-e*) [Fr., *Calorie*]. A heat-unit; the amount of heat required to raise the temperature of one kilogram of water one degree Centigrade. See *Unit*.

**Calotropis** (*kal-ot'-ro-pis*) [*καλός*, beautiful; *τρόπος*, a ship's keel]. A genus of E. Indian asclepiadaceous trees and shrubs. See *Madur*.

**Caltha** (*kal'-thah*) [L.]. A genus of ranunculaceous herbs. **C. palustris**, the marsh-marigold of cold and cool regions; it is vesicant when fresh. It is often cooked and eaten as a pot-herb. Unof.

**Calumba** (*kal-um'-bah*) [native Mozambique, *kalumb*]. Columbo. The root of *C. jateorrhiza*, native to South Africa and parts of the E. Indies. It is an excellent example of a simple bitter, and contains a bitter principle, *Calumbin*,  $C_{21}H_{22}O_7$ , of which the dose is gr. j-ij. It is not astringent, and may be prescribed with salts of iron. It is useful in atonic dyspepsia, and as a mild, appetizing tonic in convalescence. **C.**, **Ext.** (B. P.). Dose gr. ij-x. **C.**, **Fld. Ext.** Dose  $\pi$ v-xxx. **C.**, **Infus.** (B. P.). Dose  $\tilde{s}$ j-ij. **C.**, **Tinct.**, contains ten per cent. of *C.* Dose  $\tilde{s}$ s-ij. See also *American Columbo*.

**Calumbin** (*kal-um'-bin*). See *Calumba*.

**Calva** (*kal'-vah*). Same as *Calvaria*.

**Calvaria** (*kal-va'-re-ah*) [*calva*, the scalp]. The upper part of the skull.

**Calvarian** (*kal-va'-re-an*) [*calva*, the scalp]. Relating to the calvaria.

**Calvarium** (*kal-va'-re-um*). See *Calvaria*.

**Calvert's Test**. See *Tests*, *Table of*.

**Calvities** (*kal-vish'-e-ez*) [*calvus*, bald]. Baldness, especially general or senile baldness. See *Alopecia*. **C. senilis**. See *Alopecia senilis*.

**Calx** (*kalks*) [L.]. The heel. In chemistry, a name formerly applied to any oxid of a metal, especially an alkaline metal, and chiefly to lime, or oxid of calcium, CaO. See *Calcium*.

**Calycanthemous** (*kal-ik-an'-them-us*) [*καλὺνξ*, calyx; *ἄνθεον*, a flower]. In biology, with petaloid sepals.

**Calycanthin** (*kal-ik-an'-thin*) [*καλὺνξ*, calyx; *ἄνθος*, flower],  $C_{50}H_{28}O_{22}$ . A glucosid obtained from certain plants of the genus *Calycanthus*.

**Calycanthus** (*kal-ik-an'-thus*) [*καλὺνξ*, calyx; *ἄνθος*, flower]. A genus of North American shrubs. **C.**, **floridus**, the Carolina allspice, sweet-shrub, or bubbly, is tonic, emetic, and antifebrile. **C. occidentalis** is the California sweet-shrub. Unof.

**Calyciflorate** (*kal-ik-e-flo'-rat*) [*calyx*, calyx; *flos*, flower]. In biology, with the petals and stamens borne on the calyx.

**Calycine** (*kal'-is-in*) [*calyx*, calyx]. In biology, pertaining to or resembling a calyx.

**Calycle** (*kal'-ik-l*) [*calyculus*, a little calyx]. In biology, applied to parts that resemble a calyx, as the bracts or leaflets of certain plants, or the cup-cells of zoöphytes.

**Calycular** (*kal-ik'-u-lar*) [*calyculus*, a calycle]. 1. In biology, having bracts resembling accessory calices or a cup-cell resembling a calycle. 2. An old name for the plant *Hyoscyamus*.

**Calymna** (*kal-im'-nah*) [*καλύπτειν*, to cover, hide]. A jelly-like envelop of radiolarians.

**Calyphyomy** (*kal-if-i'-o-me*) [*καλὺνξ*, a calyx; *φύειν*, to grow]. In biology, the growing together of sepals and petals.

**Calyptera** (*kal-ip-te'-rah*) [*καλύπτειν*, a covering]. In biology, the tail coverts of birds.

**Calyptoblastic** (*kal-ip-to-blas'-tik*) [*καλύπτω*, covered; *βλαστός*, a germ]. In biology, having capsulated generative buds, as the campanularian and setularian hydroids.

**Calyptra** (*kal-ip'-trah*) [*καλύπτειν*, a veil]. In biology, a hood-like body covering the fruit-organ in plants, as the modified archegonium of mosses, or the united bracts of some flowers.

**Calyptrate** (*kal-ip'-trāt*) [*καλύπτειν*, a veil]. In biology, having a hood-like investment.

**Calyptragen** (*kal-ip'-tro-gen*) [*καλύπτειν*, a veil; *γένεσις*, producing]. In biology, the root-cap.

**Calyx** (*ka'-liks*) [*καλὺνξ*, the cups or calyx of a flower; *pl.*, *Calices*]. In biology, applied to various cup-like ensheathing structures, as the funnel-shaped tissues surrounding the Malpighian pyramids of the kidney, the cups of a polyzoon, or a Crinoid; an ovarian capsule. **C. of Ovum**, the wall of the Graafian follicle from which the ovum has escaped.

**Camass** (*kam-as*) [nat. American Indian]. The edible bulb of *Camassia esculenta*, *C. fraseri*, or *C. leichtlinii*, squill-like plants of Western N. America. Death Camass, the poisonous root or bulb of *Zygadenus venenosus*; called also *hog's potato*, as it is eaten by swine. The bulb or corm of the Blue Camass (*Brodiaea grandiflora*), is also considered poisonous, although it may be eaten.

**Camata** (*kah-mah'-tah*) [origin unknown]. The dried acorns of *Quercus agrifolia*, used in the arts for their astringency. See *Camatina* and *Falonia*.

**Camatina** (*kah-mah-té'-nah*) [origin unknown]. The immature acorns of *Quercus agrifolia*, used in the arts for their astringency. See *Camata* and *Falonia*.

**Cambiform** (*kam'bi-form*) [*ambium*, cambium; *forma*, shape]. In biology, applied to narrow, thin-walled succulent cells, often found in connection with sieve tubes, but whose nature is not well understood.

**Cambi-Resin** [East Indian]. The resinous juice of *Gardenia lucida* an E. Indian plant. It has been recommended for use in hospital dressings, from which it is said to expel flies.

**Cambium** (*kam'bi-um*) [1]. In biology, a layer of tissue formed between the wood and the bark of exogenous plants. It is composed of extremely delicate, thin walled cells, filled with protoplasm and organized nutrient matter, and appearing like a thin film of mucilage.

**Cambogia** (*kam'bi-gia*) [*Cambaja*, or *Cambodia*, a country in Farther India]. Gamboge. A resinous gum from *Garcinia Hanburii*, a tree native to Southern Asia. Its properties are due to *gambogic acid*. It is a drastic hydragogue cathartic, decidedly diuretic. **C.**, **Pil. Comp.**, (B. P.), contains gamboge, Barbadoes aloes, hard soap, compound powder of cinnamon, and syrup. Dose gr. v-x. It is also officially a constituent of **Pil. Cath. Comp.** See *Colocynth*. Dose gr. ij-v.

**Cambuca** (*kam-bu'-kah*) [L.]. An old name for a bubo or venereal ulcer.

**Camel's Hair**. The hair of the camel, used in Africa, Asia Minor, and the Caucasus, and latterly in Europe, for the manufacture of woven goods, that are made from the unbleached hair. **C.'s-h. Brush**, a small fine brush used for making various applications to the surface of the body, and for cleansing the ear, etc.

**Camelina** (*kam-el'-i-nah*) [*yaui*, dwarf; *zivov*, flax]. A genus of cruciferous plants. **C. sativa**, the gold of pleasure. A cruciferous plant of the old world, naturalized in N. America. Its seeds afford a fixed oil; the plant itself was formerly esteemed in eye-diseases. Unof.

**Camellia** (*kam-el'-ee-ah*) [after Kamel, a scientist of the seventeenth century]. A genus of shrubs. **C. theifera**. See *Tea*.

**Camellin** (*kam-el'-in*) [see *Camellia*],  $C_{53}H_{84}O_{19}$ . A glucosid obtained from the seeds of *Camellia japonica*. **Camembert Cheese**. See *Cheese*.

**Camera** (*kam'-ee-ah*) [*kauāpa*, an arched roof or chamber]. In biology, a chamber or vaulted structure. In optics, the chamber or dark-box of the apparatus used for photography. **C. cordis**, the enveloping membrane of the heart, the pericardium. **C. of Cranium**, the chamber of the skull. **C. lucida**, an optical device for superimposing or combining two fields of view in one eye, invented by the chemist Wollaston. **C. oculi**, the chamber of the eye.

**Camerated** (*kam'-er-a-ted*) [*kauāpa*, a vault]. In biology, chambered, vaulted.

**Cammer's Method**. A method of estimating uric acid in the urine. It is done by means of Salkowski's magnesia mixture (one part of crystallized magnesium sulphate, two parts of ammonium chloride, four parts of ammonia solution, of sp. gr. 0.924, and eight parts of water), to remove the phosphates, and the addition of silver nitrate.

**Camerine** (*kam'-er-in*) [*kauāpa*, a vault]. In biology, a formative shell of the nummulite limestone.

**Camertelous** (*kam-er-tel'-u*) [*camera*, a vault; *telu*, a web]. Applied to spiders that spin intricate webs or hiving chambers.

**Camerostoma** (*kam-er-ost'-ma*) [*kauāpa*, a vault; *stoma*, a mouth]. In biology, the vaulted cover of the manducatory organs of aphids.

**Camisole** (*kam-i-sol*) [Fr.]. The straight jacket, formerly used for the restraint of violently insane persons.

**Camomile**, or **Chamomile** (*kam'-o-mil*). See *Anthemis* and *Matricaria*.

**Campana** (*kam-pa'-nah*). See *Pulsatilla*.

**Camp Cure**. Life in camp and in the open air, adopted as a therapeutic measure. **C. Fever**. Synonym of *Typhus Fever*. **C. Measles**, an epidemic of measles among soldiers.

**Campani's Ocular**. See *Ocular*. **C. Tests**. See *Tests*, *Table of*.

**Campanula** (*kam-pan'-u-lah*) [L., "a little bell"]. 1. Any bell-shaped part or process. 2. A genus of plants with bell-shaped flowers; blue-bell; Canterbury bell. Several of the species, as *C. trachelium* and *C. glomerata* have been employed in medicine, as detergents, astringents, and vulneraries. Unof.

**Campanulate** (*kam-pan'-u-lât*) [*campanula*, a little bell]. Bell-shaped.

**Camper's Angles**. See *Angle*. **C. Ligament**. See *Ligament*. **C. Lines**. See *Lines*, *Table of*. **C. Plane**. See *Plane*. **C. Profile Line**. See *Profile Line*.

**Camphene** (*kam-fen'*, or *kam'-fen*) [*camphor*],  $C_{10}H_{16}$ . The solid terpene obtained from pinene halogen hydrid by the elimination of the haloid acid.

**Camphenes** (*kam'-fenz*) [*camphor*]. The volatile oils or hydrocarbons having the general formula  $C_{10}H_{16}$ , isomeric with oil of turpentine. Many camphenes exist ready-formed in plants, as oil of cloves, etc. They are liquid at ordinary temperatures. They are also called *terpenes*, but by some authorities the latter is made the generic name of all the volatile hydrocarbons having the formula  $C_{10}H_{16}$ , while the name camphene is limited to those terpenes that are solid at ordinary temperatures.

**Camphoid** (*kam'-foid*) [*camphor*]. A substitute for collodion. It is a solution, one in 40, of pyroxilin, in equal parts by weight of camphor and absolute alcohol. It may be used as a vehicle for applications to the skin. The application dries in a few minutes, leaving an elastic opaque film, not easily washed off.

**Campholic Acid** (*kam-fol'-ik*). See *Acid*, *Campholic*.

**Campho-phenique** (*kam-fō-fen-ek'*) [Fr.]. A proprietary preparation combining camphor and phenol; it is recommended as an antiseptic and local stimulant.

**Camphor** (*kam'-for*) [*camphora*, camphor; *gen.*, *Camphoræ*],  $C_{10}H_{16}O$ . A solid volatile oil obtained from *Cinnamomum camphora*, a tree indigenous to Eastern Asia. It yields *camphoric* and *camphretic acids*, also *C. Cymol* when distilled with zinc chlorid. It is a valuable antispasmodic, anodyne and diaphoretic. Applied locally, it is an excellent rubefacient. It is a moderate cerebral excitant. It is effectual in cholera, vomiting, cardiac depression and affections requiring an antispasmodic. **C., aqua**, consists of camphor 8, alcohol 5, precipitated calcium phosphate 5, distilled water q. s. ad 1000 parts. Dose ʒj-iv. **C. Ball**, an English preparation used as an application to chapped skin. Its composition is spermaceti 4, white wax 12, oil of almonds 5; melt in a water bath, and add flowers of camphor 4. Dissolve and when nearly cold pour into boxes or mould in gallipots. **C. Borneo**. See *Borneol*. **C. Carbulated**, a mixture of 2½ parts of camphor with one each of carbolic acid and alcohol. A good antiseptic dressing for wounds. **C., ceratum**, consists of camphor liniment 1, white wax 3, and lard 6. Used for itching skin-affections. **C., Chloral**, a fluid prepared by mixing equal parts of camphor and chloral hydrate. It is an excellent solvent for many alkaloïds. Used externally. **C.-ice**, the *ceratum camphoræ compositum*, N. F. **C., linimentum**, has camphor 25, cottonseed oil 80 parts. **C., Liniment. Comp.** (B. P.), contains camphor and oil of

lavender dissolved in rectified spirit, and strong solution of ammonia added. **C.**, **Monobromated**,  $C_{10}H_{15}BrO$ , camphor in which one atom of hydrogen has been replaced by an atom of bromine. It resembles the bromids in therapeutic action. Dose gr. j-x, in emulsion. **C.** **salicylate**, prepared by heating together 14 parts of camphor with 11 of salicylic acid. It is used as an ointment. **C.**, **Spt.**, contains camphor 10, alcohol 70, water 20 parts. Dose  $\mathfrak{m}\nu$ -xx. **C.**, **Tinct.**, **Comp.** (B. P.), contains opium, benzoic acid, camphor, oil of anise, and proof spirit. Dose  $\mathfrak{m}\lambda\nu$ - $\mathfrak{z}$ j. **C.** **Tinct.**, **Rubini's**. Unof. A saturated solution of camphor in alcohol. Dose  $\mathfrak{gtt}$ . iv-x. **Raspail's "Eau Sedative."** Unof. Contains aq. ammoniac  $\mathfrak{z}$ ij, sodium chlorid  $\mathfrak{z}$ ij, camph. spt. wine  $\mathfrak{z}$ ijj, water Oij. Used externally.

**Camphoric Acid** (*kam-for'-ik*). See *Acid*.

**Camphoronic Acid** (*kam-fō-ron' ik*). See *Acid*.

**Camphors** (*kam'-fōr*) [*camphora*, camphor]. Peculiar-smelling substances containing oxygen and intimately related to the terpenes. They are often found with the latter in plant-secrections and can be artificially prepared by oxidizing the same.

**Camphylene** (*kam'-fil-ēn*) [*camphora*, camphor],  $C_{10}H_{16}$ . 1. A liquid terpene produced by decomposing camphene with lime at a great heat. 2. A commercial name for naphthalin, occurring in blocks that are sold for protecting furs and woollens from moths, and are placed in urinals for disinfecting purposes.

**Campimeter** (*kam-pim'-et-er*). See *Perimeter*.

**Camplin's Biscuits**. See *Biscuits*.

**Campsis** (*kamp'-sis*) [*κάμψις*, a curving]. Any abnormal curvature or flexion.

**Camptorium** (*kamp-tō'-re-um*) [*καμπτήρ*, a bending]. In biology, the anterior border of the wing; the bend of the wing.

**Campylochirus** (*kam-pil-o-ki'-rus*) [*καμπύλος*, crooked; *χείρ*, hand]. Having distorted hands.

**Campylorrhachis** (*kam-pil-or'-a-kis*) [*καμπύρρος*, crooked; *ράχις*, backbone]. A fetus with spinal deformity.

**Campylorrhinus** (*kam-pil-o-ri'-nus*) [*καμπύλος*, crooked; *ῥίς*, nose]. A monstrosity with a deformity of the nose.

**Campylospermous** (*kam-pil-o-sper'-mus*) [*καμπύλος*, curved; *σπέρμα*, a seed]. In biology, applied to seeds having the material curved so as to form longitudinal furrows.

**Campyloptropal** (*kam-pil-o'-ro-pal*) [*καμπύλος*, curved; *τρέπω*, to turn]. In biology, applied to ovules or seeds that are bent or curved on themselves.

**Canada** (*kan'-a-dah*) [Sp.]. A British possession in North America. **C.** **Balsam**. See *Balsamum canadense*. For its uses in microscopy, see *Mounting Media*. **C.** **Snakeroot**, the root of *Asarum canadense*. See *Asarum*. **C.** **Hemp**. See *Apocynum*.

**Canadian** (*kan-a'-de-an*) [*Canada*]. Pertaining or belonging to Canada.

**Canadol** (*kan'-ad-ol*). A transparent volatile liquid resembling benzene in smell. It is an excellent local anesthetic for minor surgical operations. Unof. See also *Gasolene*.

**Canaille** (*kan'-a'-grā*) [Sp.]. The *Rumex hymenosepalus*, a plant of Texas, Mexico, Utah and California. The root is highly astringent: the sour stalks are used, like rhubarb-stalks, in making pies. Unof.

**Canal**, or **Canalis** (*kan-al'*, or *kan-a'-lis*) [*canna*, a reed or tube]. 1. A tube or duct for carrying the fluids of the body. 2. A hollow instrument used as a splint. **C.** **Abdominal**. See *C.*, *Inguinal*. **C.**, **Abital**. See *C.*, *Aphodal*. **C.**, **Aërial**. See *C.*, *Air*. **C.**, **Afferent**. See *C.*, *Incurrent*. **C.**, **Air**, a cavity

containing air, such as exists in most vegetable organs; it is formed by an arrest of development or by a destruction of some of the anatomic elements. **C.**, **Alcock's**, a strong sheath of the obturator layer of the pelvic fascia containing the internal pudic artery. **C.**, **Alimentary**, the whole digestive tube from the mouth to the anus. **C.**, **Alisphenoid**, in comparative anatomy, a canal in the alisphenoid bone, opening anteriorly into the foramen rotundum, and transmitting the external carotid artery. **C.**, **Alveolar, Anterior**, one located in the superior maxilla; it transmits the anterior superior dental nerve. **C.**, **Alveolar, Inferior**, the inferior dental canal. **C.**, **Alveolar, Median**, one located in the superior maxilla and transmitting the middle superior dental nerve. **C.**, **Alveolar, Posterior**, one situated in the superior maxilla; it transmits the posterior superior dental nerve. **C.**, **Alveolo-dental**. See *C.*, *Dental*. **C.**, **Ambulacral**, in the *Echinodermata*, branches of the circular canal. **C.**, **Anal**, leads from the rectum to the external opening of the anus. **C.**, **Aphodal**, in certain sponges, one connecting a chamber with an excurrent canal. **C.**, **Apical**, in the *Ctenophora*, two canals extending from the funnel to the apical pores. **C.**, **Aquiferous**. 1. Canals that in many molluscs traverse the substance of the foot, opening externally by pores, or internally into the blood-sinuses. 2. In the *Entozoa*, a series of ramifying excretory canals, with blind extremities, converging to a common canal that opens externally. **C.**, **Arachnoid**, a space formed beneath the arachnoid membrane of the brain; it transmits the vena magna Galeni. **C.** of *Arantius*, the ductus venosus. **C.**, **Archinephric**, the duct of the archinephron or primitive kidney. **C.**, **Arterial**. See *Ductus arteriosus*. **C.**, **Atrial**, the cavity of the atrium. **C.**, **Auditory, External**, that from the auricle to the tympanic membrane. **C.**, **Auditory, Internal**, that beginning on the posterior surface of the petrous bone, and extending outward and backward for a distance of about four lines; it transmits the auditory and facial nerves, and the auditory artery. **C.**, **Auricular**. 1. See *C.*, *Auditory, External*. 2. The constriction between the auricular and ventricular portions of the fetal heart. **C.**, **Avant**, the anterior portion of the male urethra. **C.**, **Axial**, in certain *Echinodermata*, the central canal of a brachium, opening into the alimentary canal. **C.**, **Bartholin's**, the duct of Bartholin's gland. **C.** of *Bernard*, a supplementary duct of the pancreas. Also called Santorini's canal. **C.**, **Bichat's**. See *C.*, *Arachnoid*. **C.**, **Biflex**. See *Gland, Interungulate*. **C.**, **Biliary**. See *C.*, *Hepatic*. **C.**, **Biliary, Interlobular**, canals situated between the acini of the liver, containing small branches of the portal vein, etc. **C.**, **Blastoporic**. See *C.*, *Neurenteric*. **C.** of *Bone*, a canaliculus of bone. **C.**, **Braun's**. See *C.*, *Neurenteric*. **C.**, **Braune's**, the continuous passage formed by the uterine cavity and the vagina during labor, after full dilatation of the os. **C.**, **Breschet's**. See *C.* of the *Diploë*. **C.**, **Bullular**. See *C.* of *Petit*. **C.**, **Carinal**, an air-canal in the *Equiseta*, situated on the inner side of the xylem. **C.**, **Carotic**. See *C.*, *Carotid*. **C.**, **Carotico-tympanic**, two or three short canals extending from the carotid canal to the tympanum; they transmit branches of the carotid plexus. **C.**, **Carotid**, one in the petrous portion of the temporal bone; it transmits the internal carotid artery. **C.** of *Cartilage*, the canals in ossifying cartilage, during its vascularization intended to receive prolongations of the osteogenetic layer of the periosteum. They radiate in all directions from the center of ossification. **C.**, **Central** (of the modiolus), a canal running from the base to the apex of the cochlea. **C.**, **Central** (of spinal

cord), the small canal that extends through the center of the spinal cord from the conus medullaris to the lower part of the fourth ventricle. It represents the embryonic ectodermal canal. **C., Cerebro-spinal.** 1. The neural or cranio-vertebral canal, formed by the skull and the spine, and containing the brain and spinal marrow. 2. The primitive continuous cavity of the brain and spinal cord, not infrequently more or less extensively obliterated in the latter, but in the former modified in the form of the several ventricles and other cavities. **C., Cervical.** See *C. of Cervix Uteri*. **C., Cervico-uterine.** See *C. of Uterine*. **C. of Cervix Uteri,** that portion of the uterine canal that extends between the internal and external os. **C. of Chorda Tympani,** a small canal in the temporal bone, between its tympanic and petrous portions, parallel with the Glaserian fissure; it transmits the chorda tympani nerve. **C., Chyleaqueous,** in certain invertebrates, a system of canals containing water and digestive products. **C., Ciliary.** See *C. of Fontana*. **C., Circular,** in the *Planulermutua*, a vessel surrounding the esophagus, connected with the exterior by the madreporic canal, and giving off the ambulacral canals. **C. clavellaris,** in biology, a cecal canal running into the olfactory clubs of *Medusa*. **C., Cloacal.** See *C., Excurrent*. **C. of Cloquet.** See *C., Hyaloid*. **C., Cochlear,** the spiral and snail-like cavity of the cochlea, 28 to 35 mm. long. The base is turned inward toward the internal auditory meatus, and the apex outward toward the tympanum. **C. of Communication,** in the embryo of the fowl, canals that run from the cavity of each protovertebra to the pleuro-peritoneal space. **C., Connecting,** the arched or coiled portion of a uriniferous tubule, joining with a collecting tubule. **C., Corona,** in biology, the coronal intestine of *Medusa*. Same as *Pouch corona*. **C. of Corti,** the triangular canal formed by the pillars of Corti, the base of which corresponds to the membrana basilaris. It extends over the entire length of the lamina spiralis. **C. of Cotunnus.** See *Aqueduct of the Vestibule*. **C., Cranio-vertebral.** See *C., Cerebro-spinal*, and *C., Neural*. **C., Crural.** See *C., Femoral*. **C., Ctenophoral,** in the *Ctenophora*, eight canals connected at right angles with the tertiary radial canals, and corresponding in their course with the eight locomotive bands. **C. of Cuvier,** the ductus venosus. **C., Cystic,** the cystic duct. **C. of De Candoile.** See *C., Medullary*. **C., Deferent,** the vas deferens. **C., Demicircular.** See *C., Semi-circular*. **C., Dental, Anterior,** one extending into the facial portion of the superior maxilla; it transmits the anterior dental vessels and nerves. **C., Dental, Inferior,** the dental canal of the inferior maxilla; it transmits the inferior dental nerve and vessels. **C., Dental, Posterior,** two canals in the superior maxilla. They transmit the superior posterior dental vessels and nerves. **C., Dentina,** the minute canals in dentine, extending approximately at right angles to the surface of a tooth from the pulp-cavity, into which they open, to the cementum and enamel. **C., Digestive.** See *C., Alimentary*. **C. of Diploë,** canals in the diploë of the cranium transmitting Brochet's vials. **C., Efferent.** 1. See *C., Excurrent*. 2. In the *Catadactylus*, canals connecting the testicles with the deferent canals. **C., Ejaculatory.** See *Duct, Ejaculatory*. **C. of Epididymis,** a convoluted tube, about 20 feet long when straightened, forming the epididymis and continuous with the vas deferens. **C., Eschricht's Yellow,** in certain of the *Catadactylus*, a system of canals, opening into the fertilizing canal, and terminating in round or oval sacs. **C., Ethmoidal, Anterior,** one between the ethmoidal and

frontal bones; it transmits the nasal branch of the ophthalmic nerve, and the anterior ethmoidal vessels. **C., Ethmoidal, Posterior.** See *C., Orbital, Posterior, Internal*. **C., Eustachian,** one in the petrous portion of the temporal bone, containing a portion of the Eustachian tube. **C., Excurrent,** in sponges, the tubes that carry water from the ciliated chambers to the exterior. **C., Facial,** the aqueduct of Fallopius; it transmits the facial nerve. **C., Fallopian.** See *Aqueduct of Fallopius*. **C., Femoral.** 1. The inner compartment of the sheath of the femoral vessels behind Poupart's ligament; a femoral hernia descends through this. 2. See *C., Hunter's*. **C. of Ferrein,** a triangular channel, supposed to exist between the free edges of the eyelids when they are closed, and to serve for conducting the tears toward the puncta lachrymalia during sleep. **C., Fertilizing,** in many cestoda, a tube connecting the vagina and the uterus. **C., Fibro-adipose,** in certain fishes, a canal, filled with adipose tissue, on the dorsal side of the neural canal. **C. of Fontana,** a series of small spaces formed by the interlacing of the connective-tissue fibers of the framework of the peripheral processes of the iris, situated in the angle of the anterior chamber, and serving as a medium for the transudation of the aqueous humor from the posterior to the anterior chamber of the eye. They are also called *C. of Hovius*, *C., Ciliary*, and *Fontana's Spaces*. **C., Galactophorous,** the lactiferous tubules of the mammary gland. **C. of Gärtner,** in the female, a relic of the main portion of the Wolffian duct of the embryo; it is a tube extending from the broad ligament of the uterus to the wall of the uterus and vagina. **C., Gastro-vascular,** in the *Hydrozoa*, canals extending from the stomach into the substance of the disc of the umbrella. **C., Genital,** in comparative anatomy, any canal designed for copulation or for the discharge of ova. **C., Gonocalycine,** a system of canals found in the gonocalyx of the *Hydrozoa*. **C. of Groin.** See *C., Inguinal*. **C. of Guidi.** See *C., Tidian*. **C., Gynecophoric,** in *Bilharzia*, a groove extending from a little below the ventral sucker to the end of the tail. It lodges the female during copulation. **C. of Havers.** See *C., Haversian*. **C., Haversian,** canals in the compact substance of bone forming a wide-meshed network, and establishing communication between the medullary cavity and the surface of the bone. Their average diameter is  $\frac{1}{800}$  inch, and they are lined by a continuation of the endosteum; they transmit blood-vessels, lymph-vessels and nerves. **C., Hemal,** one in the ventral surface of the vertebral column, enclosed by the hemal arches; it is incomplete in certain portions. **C. of Henle,** a portion of the uriniferous tubules. **C., Hepatic.** 1. The excretory duct of the liver. 2. The radicles of the hepatic duct. **C., Hernial,** one transmitting a hernia. **C. of Hovius.** See *C. of Fontana*. **C. of Huguier.** See *C. of the Chorda Tympani*. **C., Hunter's,** a triangular canal formed in the adductor magnus muscle of the thigh; it transmits the femoral artery and vein and internal saphenous nerve. **C. of Huschke,** one formed by the junction of the tubercles of the annulus tympanicus. This is generally obliterated after the fifth year, but may persist through life. **C., Hyaloid,** an irregularly-cylindrical canal running antero-posteriorly through the vitreous body, through which in the fetus the hyaloid artery passes, to ramify on the posterior surface of the crystalline lens. **C., Hyapophyseal,** in birds, that formed by the inferior spinous processes of the upper cervical vertebrae; it transmits the carotid artery. **C., Inci-**

sive. See *C.*, *Incisor*. **C.**, *Incisor*, a canal that opens into the mouth by an aperture just behind the incisor teeth of the upper jaw; it is formed by a groove on the adjoining surfaces of the superior maxillæ, and has two branches that open into the nasal fossæ. **C.**, *Incurrent*, in sponges, the canals that convey water from the exterior to the ciliated chambers. **C.**, *Infra-orbital*, a small canal running obliquely through the bony floor of the orbit; it transmits the infraorbital artery and nerve. **C.**, *Inguinal*, a canal about one and one-half inches long, running obliquely downward and inward from the internal to the external abdominal ring, and constituting the channel through which an inguinal hernia descends; it transmits the spermatic cord in the male, and the round ligament of the uterus in the female. **C.**, *Inter-*. See *C.*, *Incurrent*. **C.**, *Inter-cellular*, in biology, canals formed by the interspaces between vegetable cells. **C.**, *Intestinal*, that portion of the alimentary canal that is included between the pylorus and the anus. **C.**, *Intrafascicular*, one formed in a fibro-vascular bundle by the destruction of the vascular tissue and parenchyma. **C.**, *Intralobular*, **Biliary**, the radicles of the bile-ducts, forming a fine network in and around the hepatic cells, and communicating with vacuoles in the cells. **C.** of *Jacobson*. See *C.*, *Tympanic*. **C.**, *Kidney*, in the *Platelmintes*, excretory tubes that take up excrementitious matter from the tissues. **C.**, *Kidney*, *Primitive*, in some of the lower animals canals that appear to replace the kidneys. **C.** of *Kowalevsky*. See *C.*, *Neurenteric*. **C.**, *Lacrymal*. 1. The bony canal that lodges the nasal duct. 2. One of the lacrymal canaliculi. **C.**, *Lateral*, in most fishes, two canals, one on each side, that communicate with cavities in the head, and with the exterior, by apertures in each overlying scale; they are probably sensory in function. **C.** of *Laurer*, in certain worms, one by which the oviduct opens externally on the dorsal surface; according to some, the vitellarian duct. **C.**, *Lingual*, in the horse, etc., the floor of the mouth, from its lodging the tongue. **C.** of *Loewenberg*, that portion of the cochlear canal that is situated above the membrane of Corti. **C.**, *Longitudinal*, in the *Cestoda*, canals, one on each side of a joint; they are of uncertain function. **C.**, *Looped*, in the *Annulata*, the segmental organs. **C.**, *Macro-myelonal*, the central canal of the spinal cord. **C.**, *Madreporic*, in the *Echinodermata*, one joining the madreporic, and the circular canal. **C.**, *Malar*, one in the malar bone transmitting the malar division of the temporo-malar branch of the superior maxillary nerve. **C.** of *Marrow*. See *C.*, *Cartilage*. **C.**, *Maxillary*. See *C.*, *Dental*. **C.**, *Median*. 1. The central canal of the spinal cord. 2. The aqueduct of Sylvius. **C.**, *Medullary*. 1. The hollow cavity of a long bone, containing the marrow. 2. See *C.*, *Vertebral*. 3. The central canal of the spinal cord. 4. An Haversian canal. 5. The canal of De Candolle, enclosing the pith in the stem of plants. 6. In embryology, the medullary tube. **C.**, *Medullary*, *Cerebro-spinal*, the central canal of the spinal cord. **C.**, *Membranous*, of the *Cochlea*, a canal in the cochlea, following the turns of the lamina spiralis; it is bounded by the basilar membrane, the membrane of Reissner, and the wall of the cochlea. **C.**, *Membranous*, *Semicircular*. See *C.*, *Semicircular*. **C.** of *Modiolus*, the spiral canal of the cochlea. **C.**, *Muciparous*. See *C.*, *Mucous*. **C.**, *Mucous*, in general, canals lined with mucous membrane. In zoölogy, canals found beneath the scales of fishes and other scaly animals, furnishing the mucus that lubricates the surface. **C.** of *Müller*. See *Müllerian Duct*. **C.**, *Myelonal*, the central canal of the spinal cord. **C.**, *Nasal*. 1. See

*C.*, *Lacrymal*. 2. An occasional canal found in the posterior portion of the nasal bone; it transmits the nasal nerves. **C.**, *Naso-lacrymal*. See *C.*, *Lacrymal*. **C.**, *Naso-palatine*. See *C.*, *Incisor*. **C.**, *Neural*. 1. See *C.*, *Vertebral*. 2. In *Echinoderms*, a canal a part of the wall of which is formed by the ambulacral nerve and its connections. **C.**, *Neurenteric*, of *Kowalevsky*, also called *Biatorporic Canal*, in the embryo, a passage leading from the posterior part of the medullary tube into the archenteron. **C.**, *Neuro-central*. See *C.*, *Vertebral*. **C.** of *Nuck*, a pouch of peritoneum which, in the female fetus, descends for a short distance along the round ligament of the uterus into the inguinal canal; it is the analogue of the processus vaginalis in the male. It sometimes persists after birth. **C.**, *Nutritive*. See *C.*, *Haversian*. **C.**, *Obstetric*. See *C.*, *Parturient*. **C.**, *Obturator*, a canal in the ilium transmitting the obturator nerve and vessels. **C.**, *Olfactory*, in the embryo, the nasal fosse at an early period of development. **C.**, *Omphalo-mesenteric*, in the embryo, a canal that connects the cavity of the intestine with the umbilical vesicle. **C.**, *Optic*. See *Optic Foramen*. **C.**, *Orbital*, *Anterior Internal*. See *C.*, *Ethmoidal*, *Anterior*. **C.**, *Orbital*, *Posterior Internal*, the posterior of two canals formed by the ethmoid bone and the orbital plate of the frontal. It transmits the posterior ethmoidal vessels. **C.**, *Palatine*, *Accessory Posterior*, one or two canals in the horizontal plate of the palate bone, near the groove entering into the formation of the posterior palatine canal. **C.**, *Palatine*, *Anterior*, formed by the union of the incisive canals; it opens on the palate behind the incisor teeth. **C.**, *Palatine*, *Descending*. See *C.*, *Palato-Maxillary*. **C.**, *Palatine*, *External*, *Small*, a small canal in the pyramidal process of the palate bone, close to its connection with the horizontal plate. It transmits the external palatine nerve. **C.**, *Palatine*, *Posterior*. See *C.*, *Palato-maxillary*. **C.**, *Palatine*, *Smaller*. See *C.*, *Palatine*, *Posterior*. **C.**, *Palatine*, *Superior*, one formed by the palate bone and the superior maxilla, transmitting the large palatine nerve and blood-vessels. **C.**, *Palato-maxillary*, one formed by the outer surface of the palate bone and the adjoining surface of the superior maxilla. It transmits the large palatine nerve and blood-vessel. **C.**, *Paragastric*, in the *Ctenophora*, one that branches off on each side of the funnel, and terminates near the oral extremity of the funnel. **C.**, *Parturient*, the channel through which the fetus passes in parturition, including the pelvic canal, and the uterus and vagina considered as a single canal. **C.**, *Pelvic*, the canal of the pelvis, from the superior to the inferior strait. **C.**, *Pericardio-peritoneal*, in some of the lower vertebrates; canals connecting the pericardium and the peritoneal cavity. **C.**, *Perigastric*, in the *Hydrozoa*, two canals running parallel to the stomach, from the infundibulum, and terminating in culs-de-sac near the mouth. **C.**, *Peritoneal*, in the *Plagiostomata*, etc., two canals leading from the peritoneal cavity, one to each side of the cloaca. **C.**, *Perivascular*, the circumvascular lymph spaces. **C.** of *Petit*. Properly, a space, intersected by numerous fine interlacing fibers, existing between the anterior and posterior laminae of the suspensory ligament of the crystalline lens. It extends from the periphery of the lens, nearly to the apices of the ciliary process, and transmits the secretion from the posterior chamber. **C.**, *Petro-mastoid*, a small canal not always present, situated at the angle of union between the mastoid and petrous bones. It transmits a small vein from the middle fossa of the skull to the transverse sinus. **C.**, *Petrosal*, two canals

on the upper surface of the petrous portion of the temporal bone, transmitting the large and small superficial petrosal nerves. **C., Plasmatic.** 1. An Haversian canal. 2. In the *Funaria*, canals given off from the longitudinal vessels, containing a homogeneous fluid which is supposed to serve for the nutrition of the animal. **C., Poison,** in snakes, the canal in the poison fang, serving for the exhalation of the venom. **C., Pore.** See *C., Pore.* **C., Porous,** in the ovule, supposed to serve for the entrance of the spermatozooids in fecundation. **C., Portal.** See *Intyabular, Biliary.* **C., Preputial,** in the lower animals, the sheath of the penis. **C., Primitive,** the neural canal of the embryo. **C., Prosodal,** in sponges, a canal connecting the chamber with the prosopyle. **C., Pseudostomatous,** the processes of branched cells that extend from a subepithelial or endothelial layer to the free surface, their free ends forming the pseudostomata. **C., Pterygoid.** See *C., Vidian.* **C., Pterygo-palatine,** one formed by the root of the internal pterygoid plate of the sphenoid bone and the sphenoidal process of the palate bone. It transmits the pterygo-palatine vessels and nerve. **C., Pulmo-aortic.** See *Ductus arteriosus.* **C., Radial,** in the *Conium*, two canals that branch off laterally from the funnel. Each divides into two (the secondary radial), which themselves divide into two (the tertiary radial), which open into the stenophoral canals. **C. of Recklinghausen,** minute channels supposed to exist in all connective tissue, which are directly continuous with the lymphatic vessels, and hence may be said to form their origin. **C. of Reissner.** See *C., Membranum, of the Cochlea.* **C., Resin.** See *C., Resiniferous.* **C., Resiniferous,** a canal in which resin is secreted. **C., Rhachidian.** See *C., Vertebral.* **C. of Rivinus,** the duct of the sublingual gland. **C. of Rosenthal.** See *C., Spiral, of the Modiolus.* **C., Sacculo-cochlear,** one connecting the sacculus and the cochlea. **C., Sacculo-utricular,** one connecting the sacculus and the utricle. **C., Sacral,** the continuation of the vertebral canal in the sacrum. **C., Sand.** See *C., Madreporic.* **C., Santorini's.** See *C. of Bernard.* **C. of Schlemm,** an irregular space or plexiform series of spaces occupying the sclero-corneal region of the eye; it is regarded by some as a venous sinus, by others as a lymph-channel. **C., Secretory,** an inter-space between the cells of vegetable tissue, lined with special cells, secreting various products such as oils, balsams, gum resins, etc. **C., Semicircular,** bony canals of the labyrinth of the internal ear. They are three in number, the *external, anterior,* and *posterior,* and contain the *membranous semicircular canals.* **C., Semicircular, Anterior.** See *C., Semicircular, Superior.* **C., Semicircular, Anterior Vertical.** See *C., Semicircular, Superior.* **C., Semicircular, External,** that one of the semicircular canals of the labyrinth having its plane horizontal and its convexity directed backward. **C., Semicircular, Frontal.** See *C., Semicircular, Superior.* **C., Semicircular, Horizontal.** See *C., Semicircular, External.* **C., Semicircular, Inferior.** See *C., Semicircular, Posterior.* **C., Semicircular, Inner.** See *C., Semicircular, Posterior.* **C., Semicircular, Internal.** See *C., Semicircular, Posterior.* **C., Semicircular, Lateral.** See *C., Semicircular, External.* **C., Semicircular, Osseous.** See *C., Semicircular.* **C., Semicircular, Posterior,** that one of the semicircular canals having its convexity directed backward, and its plane almost parallel to the posterior wall of the pyramid. **C., Semicircular, Posterior Vertical.** See *C., Semicircular, Posterior.* **C., Semicircular, Sagittal.** See *C., Semicircular,*

*Posterior.* **C., Semicircular, Superior,** that one of the semicircular canals having its convexity directed toward the upper surface of the pyramid. **C., Seminal,** the seminiferous tubules. **C., Serous,** any minute canal connected with the lymph vessels and supposed to be filled with lymph. **C., Sheathing,** the communication between the cavity of the tunica vaginalis of the testicle and the general peritoneal cavity. It soon closes in man, leaving the tunica vaginalis a closed sac. **C., Side,** blind canals in the ventral skin of amphioxus, supposed to have a urinary function. **C., Spermatic.** 1. The vas deferens. 2. The inguinal canal in the male. **C., Spheno-palatine.** See *C., Pterygo-palatine.* **C., Spinal.** See *C., Vertebral.* **C., Spiral, of the Cochlea,** one that runs spirally around the modiolus, taking two turns and a half, diminishing in size from the base to the apex, and terminating in the cupola. **C., Spiral, of the Modiolus,** a small canal winding around the modiolus of the base of the lamina spiralis. **C., Spiroid, of the Temporal Bone.** See *Aqueduct of Fallopius.* **C. of Stenson.** See *Stenson's Duct.* **C., Sternal,** in the *Crustacea*, one formed by the union of the mesophragms of the endosternites. **C. of Stiebel,** in certain Mollusca the embryonic renal organ. **C. of Stiega.** See *C. of Laurer.* **C. of Stilling.** See *C., Hyaloid,* and *C., Central, of Spinal Cord.* **C., Stone.** See *C., Madreporic.* **C., Suborbital.** See *C., Infraorbital.* **C., Supraorbital,** one at the upper margin of the orbit. It transmits the supraorbital artery and nerve. **C., Temporal.** See *C., Zygomatico-temporal.* **C., Temporo-malar.** See *C., Zygomatico-temporal.* **C., Thoracic,** the thoracic duct. **C., Tympanic,** one that opens on the lower surface of the petrous bone, between the carotid canal and the groove for the internal jugular vein. It transmits Jacobson's nerve. **C., Urethro-sexual,** in some mammals the vagina and urethra combined. **C., Urinary,** the urethra. **C., Uro-genital.** See *Urogenital Sinus.* **C., Uterine,** the canal of the uterus, including the body and neck. **C., Utero-cervical,** the cavity of the cervix uteri at the time of labor. **C., Utero-vaginal.** 1. The common canal formed by the uterus and vagina. 2. In embryology, the duct of Müller. **C., Vaginal,** the canal of the vagina. **C., Vascular.** See *C., Haversian,* and *C., Cartilage.* **C., Vector,** the oviduct. **C., Venous,** the ductus venosus. **C., Vertebral,** the canal formed by the vertebrae. It transmits the spinal cord and its membranes. **C., Vertebrarterial,** the osseous canal through which the vertebral artery runs. **C., Vestibular.** See *C., Incurrent.* **C., Vidian,** a canal of the sphenoid bone at the base of the internal pterygoid plate, opening anteriorly into the sphenomaxillary fossa, and posteriorly into the foramen lacerum. It transmits the Vidian nerve and vessels. **C., Vitelligene,** in comparative anatomy, canals leading to the vitelligene glands. **C., Vitellin,** a supposed canal leading from the central cavity of the vitellus, in birds' eggs, to the cicatricula. **C., Vulvar,** the vestibule of the vagina. **C., Vulvo-uterine,** the vagina. **C., Vulvo-vaginal.** 1. The vagina and the vulva considered as a single canal. 2. The orifice of the hymen. **C., Water-vascular.** See *C., Aquiferous.* **C. of Wharton.** See *Wharton's Duct.* **C., White, of Malpighi,** in insects, two white convoluted urinary tubules opening into the large intestine. **C. of Wirsung,** the pancreatic duct. **C. of Wolff.** See *Wolffian Duct.* **C., Yellow, of Malpighi,** in insects, two yellowish convoluted tubes opening at the junction of the stomach and intestine; they are regarded as urinary. **C., Zygomatic.** See *C., Zygomatico-temporal* and *C.,*

- Zygomatico-facial. C.**, Zygomatico-facial. See *C.*, *Malar. C.*, Zygomatico-temporal, the temporal canal of the malar bone, running from its orbital to its temporal surface. It transmits a branch of the superior maxillary nerve.
- Canalicular** (*kan-al-ik'-u-lar*) [*canalis*, a channel]. In biology, canal-shaped.
- Canaliculization** (*kan-al-ik-u-liz-a'-shun*) [*canaliculus*, a little canal]. The formation of canaliculi, as in bone, or as in calcified cartilage.
- Canaliculus** (*kan-al-ik'-u-lus*) [*L.*: *pl.*, *Canaliculi*]. A small canal; especially that leading from the punctum to the lachrymal sac of the eye; and in the plural, the minute canals opening into the lacunæ of bone. See *Bone*.
- Canalization** (*kan-al-iz-a'-shun*) [*canalis*, a canal]. 1. The formation of canals, as in tissues, etc. 2. A system of wound-drainage without tubes. **C.** of the clot, formation of a channel through a clot in a vessel for the passage of the blood-current, occurring from the 50th to the 70th day after ligation. See *Cells*, *Vasifactive*.
- Canarin** (*kan'-ar-in*). See *Pigments*, *Conspectus of*.
- Canarium** (*kan-a'-re-um*) [*E. Ind.*, *canari*]. A genus of burseraceous trees and shrubs of warm regions. **C.**, **commune** affords a part (at least) of the manilla elemi, and also a balsam resembling copaiba. Other species yield similar products.
- Canatillo** (*kah-nah-tel'-yo*). See *Tépopote*.
- Canellate** (*kan'-sel-át*) [*canellare*, to provide with a lattice]. Reticulated, or characterized by latticed lines, as the spongy tissue of bones, or certain leaves consisting entirely of veins.
- Cancellation** (*kan-sel-a'-shun*) [*cancelli*, lattice-work]. The quality of being cancellate; cancellous structure.
- Cancellous** (*kan'-sel-us*) [*cancelli*, lattice-work]. Resembling lattice-work. **C.** Tissue. See *Tissue*.
- Cancellus** (*kan'-sel-us*) [*cancelli*, lattice-work]. A space, or unit of structure, in cancellous bone; any one of the minute divisions in spongy bone. The spongy, lattice-work texture of bone.
- Cancer** (*kan'-ser*). See *Carcinoma*. **C.**, **Alveolar**, a carcinoma with an alveolar structure. **C.** **aquaticus**. Synonym of *Stomatitis*, *Gangrenous*. **C.** **-bandage**, a crab-shaped bandage; a split-cloth of eight tails. **C.** **-cell**, a peculiar cell sometimes seen in adenoid cancer and in sarcoma. It was formerly thought to be pathognomonic of the malignant quality of a tumor. **C.**, **Clay-pipe**. See *C.*, *Smokers'*. **C.**, **Colloid**, one containing colloid material. **C.** **en cuirasse**, disseminated lenticular cancer of the skin. **C.** **-juice**, the milky fluid yielded by the cut surface of a hard cancer on scraping. **C.**, **Melanotic**, a malignant pigmented form. **C.**, **Smokers'**, epithelioma of the lip due to the irritation of a pipe. **C.** **-root**, a name of *Epiphegus virginiana*, *Aphyllon uniflorum*, *Conopholis americana* and other plants vaunted as cancer-cures. The above are all either root-parasites or saprophytes. Unof. See *Aphyllon*. **C.** **-r.** *Beech-drop*, a name for a plant used as a local application for cancer. **C.** **-weed**, *Prenanthes alba*, a plant. **C.** **-wort**, *Linuria spuria* and *L. elatine*, European herbs.
- Cancerate** (*kan'-ser-át*) [*kapkivós*, a crab]. To become cancerous; to be developed into a cancer.
- Canceration** (*kan-ser-a'-shun*) [*kapkivós*, a crab]. Development into a cancer; the assumption of malignant qualities by a tumor.
- Cancerous** (*kan'-ser-us*) [*kapkivós*, a crab]. Having the qualities of a cancer; malignant.
- Canchalagua** (*kan-cha-lá'-gwah*) [*Sp.*]. A Spanish-American name for various plants, chiefly of the genus *Erythraea*, (as *E. chilensis*, *E. veneta*, *E. trichantha*). They are bitter tonics, with the qualities of gentian. Unof.
- Canchasmus** (*kan-kaz'-mus*) [*καγκασμός*, loud laughter]. Hysterical or immoderate laughter.
- Cancriform** (*kan'-krif-orm*) [*cancer*, a crab; *forma*, form]. Resembling a cancer in appearance.
- Cancrisocial** (*kan'-kris-o'-shal*) [*cancer*, a crab; *socius*, a companion]. In biology, a communalistic association of sea anemones, sponges, molluscs, etc. on the shell inhabited by a hermit crab.
- Cancrivoracious** (*kan'-kri-v'-o-rus*) [*cancer*, a crab; *vorare*, to eat]. Applied to animals that feed upon crabs.
- Cancroid** (*kan'-kroid*) [*cancer*, a crab]. Cancer-like; semi-malignant. **C.** **Ulcer**. See *Rodent Ulcer*.
- Cancroin** (*kan'-bro-in*) [*cancer*, a crab]. A substance (said to be identical with neurin), introduced by Adamkiewicz as a material for hypodermatic injection in cases of malignant disease, it being regarded by him as an alexin destructive of cancer-tissue.
- Cancrophagous** (*kan'-kroff'-ag-us*) [*cancer*, a crab; *phagiv*, to eat]. Same as *Cancrivoracious*.
- Cancrum** (*kan'-kri-um*) [*L.*, "a cancer"]. A cancer or rapidly-spreading ulcer. **C.** **Oris**, also called *Canker of the Mouth*, *Gangrenous Stomatitis*, *Noma*, *Gangrenous Ulceration of the Mouth*. It is a disease of childhood between the ages of one and five, characterized by the formation of foul, deep ulcers of the buccal surfaces of the cheeks or lips. There is but slight pain, but the prostration is great, and death usually results from exhaustion or blood-poisoning. The disease is generally the result of poor hygienic surroundings acting upon a debilitated system. **C.** **Nasi**, gangrenous rhinitis of children.
- Candela** (*kan-de'-lah*) [*candere*, to glow]. 1. A medicated candle for fumigation. 2. A wax bougie.
- Candle** (*kan'-dl*) [*candela*, a candle]. A taper; a bougie. **C.** **-berry**, the bay-berry, *Myrica cerifera*, or its waxy fruit, from which a greenish wax is obtained. See *Myrica*. **C.** **-fish Oil**. See *Eulachoni Oleum*. **C.** **-foot**. See *Unit Quantity of Light*. **C.** **-house**, an establishment in which candles are manufactured. **C.** **-power**, in photometry, the candle-power of a lamp is measured by the ratio of the illumination of the light considered to that of a standard candle, both sources being at the same distance from the object illuminated.
- Cane Sugar** (*kān-shug'-ar*). See *Saccharum*.
- Canella** (*kan-de'-ah*) [*dim.* of *Canna*, a reed]. The bark of *C. alba* deprived of its corky layer and dried. It is a native of the West Indies and is an aromatic tonic and bitter stomachic. Dose of the powdered bark, gr. xv-xxx. Official in the B. P.
- Canelle-Brown**. Same as *Phenylene Brown*.
- Canescent** (*kan-es'-ent*) [*canus*, white or hoary]. In biology, applied to the gray, hoary or white plumage or fur of animals and to the pubescence of plants.
- Canestrini**, *Bacillus of*. See *Bacteria*.
- Canine** (*ka'-nin* or *ka-nin'*) [*canis*, a dog]. Partaking of the nature of, relating to, or resembling a dog, or the sharp tearing-teeth of mammals, located between the incisors and the molars. **C.** **Appetite**, bulimia, q. v. **C.** **Eminence**, a prominence on the outer side of the upper maxillary bone. **C.** **Fossa**. See *Fossa*. **C.** **Laugh**, a sardonic smile, or grin. **C.** **Madness**, rabies, hydrophobia. **C.** **Muscle**, the levator anguli oris. See *Muscles*, *Table of*. **C.** **Teeth**, dentes canini; cynodontes; dentes lanarii; dents angulaires; cuspidati; conoides; eye-teeth. The cuspid teeth next to the lateral incisors; so called from their resemblance to a dog's teeth.

**Caniniform** (*kan-in'if-orm*) [*caninus*, pertaining to the dog; *forma*, shape]. Applied to teeth resembling canines.

**Canis** (*ka'-m*) [L., "a dog"]. 1. The dog. 2. A genus of animals. **C. rabiosa**. Synonym of *Hydrophobia*.

**Cannies** (*kan-in'ee-ah*) [Lat.]. Poliosis; hoariness; hair bleaching; Trichonosis cana; Trichonosis discolor; a premature or senile, partial or universal decolorization of the hair, the change varying from black or brown through every gradation to the whiteness of wool. This change may be physiologic or pathologic, gradual or rapid, general or confined to localized patches.

**Canker** (*kan'-ker*) [*cancrium*, a cancer]. An ulceration of the mouth, or any ulcerous or gangrenous sore; cancrum oris; in farriery, a fetid abscess of the horse's foot. See *Cancrium Oris*. **C.-rash**. Synonym of *Syphilis*.

**Canna** (*kan'-nah*) [*canna*, a cane]. A genus of large-leaved marantaceous plants. **C. indica**, has an acrid and stimulant root; it is alterative, diuretic and diaphoretic. Unof. The rhizome of *C. speciosa* affords *canna-larid*, or tous-les-mois, a good substitute for true arrow-root. **C. Starch**. See *Tous les-mois*.

**Cannabene** (*kan'-ab-en*). See *Cannabis*.

**Cannabin**. See *Cannabis*.

**Cannabinin** (*kan-ab'-in-in*) [*cannabis*, hemp]. A volatile alkaloid from cannabis indica.

**Cannabinon, Cannabinone** (*kan-ab-in-on*) [*cannabis*, hemp]. An amorphous bitter resinoid from Indian hemp, used as an hypnotic. Dose 1 to 3 grains. Unof.

**Cannabis** (*kan'-ab-is*) [L.]. Hemp. Indian hemp. The flowering tops of *C. sativa*, of which there are two varieties, *C. indica* and *C. americana*, the former being the more potent. They contain a resin, *cannabin*, and a volatile oil, from which are obtained *Cannabene*  $C_{15}H_{20}$ , a light hydrocarbon, and *Hydrid of Cannabis*, a crystalline body. It is an antispasmodic, anesthetic, narcotic, and a powerful aphrodisiac. In large doses it produces mental exaltation, intoxication, and a sensation of double-consciousness. It is a valuable hypnotic in delirium tremens, and is useful for painful affections of the bladder and for functional impotence. *Bhang*, *Ganjah*, *Churrus*, and *Hashish* are the various Indian names by which the drug is known. Strychnin and curium are antagonistic. **C. Indica**, Ext., dose gr.  $\frac{1}{10}$ . **C. Ind.**, Ext. Fld., an alcoholic preparation. Dose m-j-v. **C. Ind.**, Tinct., contains 15 per cent. of the drug. Dose m-xx- $\frac{1}{2}$ j. **Cannabin Tannate**, the tannate, a glucosid. Dose as a hypnotic gr. v-x.

**Cannabism** (*kan'-ab-izm*) [*cannabis*, hemp]. The habitual use of Cannabis indica; ill-health caused by the misuse of Cannabis indica.

**Cannabist** (*kan'-ab-ist*) [*cannabis*, hemp]. A devotee to the use of Cannabis indica.

**Cannel Coal** (*kan'-el kol*). See *Coal*.

**Cannoid** (*kan'-oid*) [*canna*, a reed; *idos*, form]. Tubular, as the skeleton of certain radiolarians.

**Cannon-bone** (*kan'-n bon*). One of the functional and complete metacarpal or metatarsal bones of a hoofed quadruped, supporting the weight of the body upon the feet.

**Cannula** (*kan'-u-lah*) [dim. of *canna*, a tube]. A surgical instrument consisting of a tube or sheath obliquely pointed and a stylet. It is used for tapping and draining tumors and cavities.

**Cannulated** (*kan'-u-lated*) [*cannula*, a little tube]. Made hollow; as a cannulated needle.

**Canquoin's Paste**. A paste of flour, water, and zinc chloride; it is a powerful escharotic.

**Cantani's Diet**. An exclusive meat-diet in diabetes.

**Canterbury Bell** (*kan'-ter-ber-e bel*). See *Campanula*.

**Cantering Rhythm** (*kan'-ter-ing rithm*). See *Bruit de Galop*.

**Canthal** (*kan'-thal*) [*kanthos*, a canthus]. Relating to a canthus.

**Cantharisiac** (*kan-thar-it'-as-is*) [*κάνθαρος*, a kind of beetle]. A term proposed by Hope for the diseases that originate from the presence in the body of coleopterous insects or their larvae.

**Cantharidal** (*kan-thar'id-al*) [*kanthapic*, a blistering fly]. Relating to or containing cantharides.

**Cantharides** (*kan-thar'id-eez*). Plural of *Cantharis*.

**Cantharidin** (*kan-thar'id-in*) [*kanthapic*, a blistering fly],  $C_{10}H_{12}O_4$ . The bitter principle contained in Spanish flies and other insects; it crystallizes in prisms or leaflets, and melts at  $218^{\circ}$ . It has an extremely bitter taste, and produces blisters on the skin. See *Cantharis*.

**Cantharidism** (*kan-thar'id-izm*) [*kanthapic*, a blistering fly]. Cantharidal poisoning.

**Cantharis** (*kan'-thar-is*) [*kanthapic*, a blistering fly; pl., *Cantharides*]. Spanish Fly. The dried body of a species of beetle, *C. vesicatoria* (nat. ord. *Coleoptera*). It contains a powerful poisonous principle, *cantharidin*,  $C_{10}H_{12}O_4$ . Locally applied, cantharis is a rubefacient and vesicant; internally it is an irritant, causing gastralgia and vomiting. In toxic doses it produces severe gastro-enteritis, strangury, and priapism. It is used chiefly as an external counter-irritant in the form of "blisters." **C.**, acetum (B. P.), of the strength of  $\frac{1}{2}$ ij to Oj. **C.**, Ceratum, cantharides 32, yellow wax 18, resin 18, lard 22, oil of turpentine 15. **C.**, Ext., Ceratum, cantharides 30, resin 15, yellow wax 35, lard 35, alcohol q. s. **C.**, Charta, cantharides 1, Canada turpentine 1, olive-oil 4, spermaceti 3, white wax 8, water 10 parts. **Charta epispastica** (B. P.), blistering-paper (white wax, spermaceti, olive-oil, resin, Canada balsam, cantharides, distilled water). **Collodium cantharidatum**, cantharides 60, flexible collodion 85, chloroform q. s. **C. cum picis emplastr.**, *Warming Plaster*, Burgundy pitch 92, cerat. canthar. 8 parts. **Emplastrum calefaciens** (B. P.), cantharides, expressed oil of nutmeg, yellow wax, resin, resin-plaster, soap-plaster, boiling water. **C.**, **emplastrum** (B. P.), cantharides, yellow wax, prepared suet, prepared lard, resin. **C.**, **liniment.**, cantharides 15, oil of turpentine q. s. ad 100. **C. Tinct.**, contains 5 per cent. of the drug. Dose m-j-xx. **C.**, **unguent.** (B. P.), cantharides, yellow wax, olive oil.

**Canthectomy** (*kan-thek'-to-me*) [*kanthos*, canthus; *ἐκτομή*, a cutting out]. Excision of a canthus.

**Canthitis** (*kan-thi'-tis*) [*kanthos*, canthus; *itis*, inflammation]. Inflammation of a canthus.

**Cantholysis** (*kan-thol'-is-is*) [*kanthos*, canthus; *λύσις*, a loosening]. Canthotomy with section of the external canthal ligament.

**Canthoplastic** (*kan-tho-plas'-tik*) [*kanthos*, the canthus; *πλαστικός*, to form]. Relating to canthoplasty.

**Canthoplasty** (*kan-tho-plas-te*) [*kanthos*, the angle of the eye; *πλαστικός*, to form]. A surgical operation for increasing the size of the palpebral fissure by cutting the outer canthus.

**Canthorraphy** (*kan-thor'-a-fi*) [*kanthos*, canthus; *ράφή*, a seam]. A surgical operation to reduce the size of the palpebral fissure by suture of the canthus.

**Canthotomy** (*kan-thot'-o-me*) [*kanthos*, canthus; *τομή*, a cutting]. Surgical division of a canthus.

**Canthus** (*kan'-thus*) [*kanthos*, canthus]. The inner or outer angle formed by the juncture of the eyelids.

**Cantus galli** (*kan'-us gal'-i*) [L., "cock-crowing"]. Same as *Child-croaking*.

**Canula** (*kan'-u-lah*). See *Cannula*.

**Canutillo** (*kahn-oo-tell'-yo*). See *Tipopoté*.

**Caoutchouc** (*koo-chook'*) [S. American]. India-rubber.

The chief substance contained in the milky juice that exudes upon incision of a number of tropical trees belonging to the natural orders *Euphorbiaceæ*, *Artocarpaceæ*, and *Apocynaceæ*. The juice is a vegetable emulsion, the caoutchouc being suspended in it in the form of minute transparent globules. When pure, caoutchouc is nearly white, soft, elastic, and glutinous; it swells up in water without dissolving; the best solvents are carbon disulphid and chloroform. It melts at about 150° C., and decomposes at 200° C.

**Capacity** (*kap-as'-it-e*) [*capacitas*, capacity]. Mental receptivity; passive (or active) mental capability; moral or legal responsibility.

**Capax Doli** (*ka'-paks do'-li*). See *Doli Capax*.

**Capelina** (*kap-el'-i-nah*). See *Capistrum*.

**Capeline** (*kup'-el-in*). See *Bandage*.

**Capeman's Method**. See *Treatment, Methods of*.

**Caper** (*ka'-per*). See *Cappraris*.

**Capiat** (*ka'-pe-at*) [L., "let it take"]. An instrument intended for use in removing remnants of the placenta, polyp, or the like, from the uterine cavity.

**Capillaire** (*kap-il'-ar'*) [Fr.]. The plant *Adiantum capillus veneris*, a species of maiden-hair fern; also a cough-syrup prepared from the same. See *Adiantum*.

**Capillarity** (*kap-il'-ar'-it-e*) [*capillus*, a hair]. Capillary attraction: the force that causes fluids to rise in fine tubes or bores, or in very thin chinks. In an electric battery, the disturbing effects of the proper action of a voltaic cell caused by capillary action.

**Capillary** (*kap-il'-a-ré*, or *kap-il'-ar-e*) [*capillus*, a hair].

1. A minute blood-vessel connecting the smallest ramifications of the arteries with those of the veins. Also a very minute fissure of the skull. Also the intercellular biliary passages. 2. Hair-like; relating to a hair, or to a hair-like filament, or to a tube with a hair-like bore. **C.** Attraction capillarity. **C. Bronchitis**. See *Bronchitis*. **C. Embolism**. See *Embolism*. **C. Fissure**, **C. Fracture**, a linear fracture, without displacement. **C. Nevus**. See *Nævus Vascularis*. **C. Pulse**, a visible change of color or an artificial blush in aortic regurgitation. **C. Vessels**, the capillaries. **Capillaries**, Meigs's, branching capillaries discovered by A. V. Meigs in the human heart. **C., Pulmonary**, a name used to designate the plexuses beneath the mucous membrane, on the walls and septa of the alveoli of the lungs.

**Capilli** (*kap-il'-i*) [Plural of *Capillus*, hair]. In biology, applied to the hairs on the front and top of an insect's head.

**Capilliculture** (*kap-il'-e-kul-chūr*) [*capillus*, hair; *cultura*, culture]. Systematic treatment for the improvement or restoration of the hair.

**Capilliculus** (*kap-il'-ik'-u-lus*) [dim. of *capillus*: *pl.*, *Capilliculi*]. Any one of the very smallest of the capillary vesicles.

**Capillifolious** (*kap-il'-if-o'-le-us*) [*capillus*, hair; *folium*, a leaf]. Characterized by hair-like leaves.

**Capilliform** (*kap-il'-if-orm*) [*capillus*, hair; *forma*, form]. Hair-shaped.

**Capillitium** (*kap-il'-ish'-e-um*) [*capillus*, the hair]. In biology, the hair-like threads within the spore-cases of many fungi.

**Capillus** (*kap-il'-us*) [L.: *pl.*, *Capilli*]. A hair; the hair of the head.

**Capistrum** (*kap-is'-trum*) [L., a muzzle or halter: *pl.*, *Capistra*]. 1. A bandage for the head or for the lower jaw. Called also *Capelina*. 2. In biology, a mask or hood-like coloration of the face and part of the head in certain birds.

**Capital** (*kup'-it-al*) [*caput*, the head]. 1. Pertaining to the head, or to the summit of a body or object. 2. Of great importance; as a capital operation in surgery.

**Capitalis reflexa** (*kup-it-al'-lis re fleks'-ah*). A recurrent bandage for a stump.

**Capitate** (*kup'-it-al*) [*caput*, head]. In biology, having a head or a head-like termination.

**Capitellate** (*kup-it-el'-at*) [*capitellum*, a little head]. In biology, bearing small heads.

**Capitellum** (*kup-it-el'-um*) [dim. of *caput*]. The rounded, external surface of the lower end of the humerus.

**Capitiluvium** (*kup-it-el'-u'-ve-um*) [*caput*, head; *luere*, to wash]. A washing or bathing of the head; a wash for the head.

**Capitopedal** (*kup-it-o-ped'-al*) [*caput*, a head; *pes*, foot]. In biology, pertaining to or near the junction of the head and foot.

**Capitular** (*kup-it'-u-lar*) [*caput*, head]. Pertaining to a capitulum or head. **C. Process** of a vertebra, one with which the head of a rib articulates.

**Capitulum** (*kup-it'-u-lum*) [*capitulum*, a small head]. In anatomy and biology, the enlarged terminal portion of an organ, plant, or animal, as the head of a bone; the enlarged free portion of a stalked animal; the knobbed end of an antenna or of an insect's poiser; a dense cluster or head of flowers, leaves, or spores in plants. **C. of Santorini**, a small elevation on the apex of the arytenoid cartilage corresponding in position to the posterior extremity of the vocal band.

**Cappa** (*kap'-ah*). The ectocinereal lamina of the mesencephalon.

**Cappagh Brown**. See *Pigments, Conspectus of*.

**Capparis** (*kap'-ar-is*) [L., the caper-bush]. A genus of shrubs including the caper-bush, *C. spinosa*. Its flower-buds (capers) are pickled, or made into a piquant sauce. The bark of the root and the flowers are official remedies in some countries (as Spain); it is diuretic, cathartic, depurative, stimulant. Unof.

**Cappazwoli's Test**. See *Tests, Table of*.

**Capped Elbow** (*kaped'-el-bow*). See *Shoe-boil*.

**Capped Hock** (*kaped'-hok*). In farriery, the development of a bruise at the point of the hock of a horse, with the formation of an hygroma, the result of rubbing or striking that part against the partition of the stall.

**Capped Knee** (*kaped'-ne*). A dropsical collection in the bursa in front of the knee-joint of the horse.

**Capranica's Tests**. See *Tests, Table of*.

**Caprantilopine** (*kap-ran-till'-o-pin*) [*capra*, a she-goat; *antilopinus*, antelope]. Uniting the characters of a goat and an antelope.

**Capre** (*kap'-er*). See *Mulatto*.

**Capreolar** (*kap-re'-o-lar*), **Capreolary** (*kap'-re-o-la-re*), **Capreolate** (*kap'-re-o-lat*) [*capreolus*, a tendril]. In biology, climbing, furnished with tendrils; in anatomy resembling tendrils, as the spermatic vessels, *vss. capreolaria*. **C. Vessels**, the spermatic vessels, from their twined and twisted appearance.

**Capreolus** (*kap-re'-o-lus*) [*capreolus*, a wild goat; a tendril of a plant]. 1. A buck or he-goat. 2. The tendril of a plant.

**Capric Acid** (*kap'-rik as'-id*). See *Acid*.

**Caprification** (*kap-rif-ik-a'-shun*) [*caprificus*, the wild-fig tree]. In biology, the process of hastening fertilization and ripening of cultivated figs by the introduction of gall-insects, by hanging a branch of the wild fig in the tree, or planting a wild fig in the midst of the fig orchard.

**Caprify** (*kap'-rif-i*) [*caprificus*, the wild-fig tree]. To fertilize by means of *Caprification*, *q. v.*

**Capriiloquium** (*kap-ri-lo'-kwee-um*) [*caper*, a goat; *loqui*, to speak]. Same as *Caprophorum*.

**Caprin** (*kap-ri-nū*) [*caper*, a goat]. An oily and flavoring constituent of butter; glycerin caprate.

**Caproic Acid** (*kap-roi'-ik-asid*). See *Acid*.

**Caprolactone** (*kap-ro-lak-ton*) [*caper*, a goat; *la*, milk].  $C_6H_{10}O_2$ . A compound obtained from bromocaproic acid on treating the latter with water. It is a liquid boiling at 200°.

**Caprone** (*kap-ro-nū*) [*caper*, a goat].  $C_{11}H_{22}O_2$ . Caproic ketone; a clear, volatile oil found in butter, and forming the larger part of the oil of rue.

**Caproylamin** (*kap-roi'-am-in*) [*caper*, a goat; *amin*].  $C_8H_{11}N$ .  $H_2$  xylamin. A ptomaine found in the putrefaction of yeast.

**Caprylic Acid** (*kap-ri'-ik-asid-ut*). See *Acid*.

**Capsella** (*kap-sel'-ah*) [dim. of *capsa*, a box]. The leaves and stems of *C. bursa pastoris*, common in temperate climates. It is considered an excellent hemostatic and antiscorbutic, and is slightly stimulant and astringent. Unof. *C. bursa pastoris*. See *Shepherd's Purse*.

**Capsicin** (*kap-si'-sūn*),  $C_{15}H_{15}O_2$ . The active principle of Cayenne pepper. It is a thick, yellowish-red substance, scarcely flowing at ordinary temperatures, but becoming very limpid if warmed. See *Capsicum*.

**Capsicol** (*kap-si'-kol*) [*capsi-um*; *oleum*, oil]. A red oil obtainable from the oleo-resin of capsicum.

**Capsicum** (*kap-sik-um*) [*caper*, a box; *gen.*, *Capsici*]. Cayenne Pepper. The fruit of *C. fastigiatum*, native to tropical Africa and America. Its odor and hot taste are due to a volatile oil, *capsicin*,  $C_{15}H_{15}O_2$ , which is irritant to the skin and mucous membranes. Internally, it is a stomachic tonic, diuretic and aphrodisiac. It is useful in atonic dyspepsia, flatulent colic, and in intermittent fever. *C.*, *emplastrum*, prepared from the oleoresin and resin plaster. *C.*, *Ext. Fld.* Dose  $\mathfrak{m}\nu-5j$ . *C.*, *linimentum*, 1 in 10, for chest affections, rheumatism, etc. *C.*, *Oleo-resin*, *Ethereal*. Dose  $\mathfrak{m}\nu-v$ . *C.*, *Tinct.*, contains 5 per cent. of capsicum. Dose  $\mathfrak{m}\nu-5j$ .

**Capsitis** (*kap-sit'-is*). Same as *Capsulitis*.

**Capsula** (*kap-sul'-ah*) [*capsula*, a small box]. The internal capsule of the brain; it is the thick layer of fibers between the caudatum and thalamus mesad and the lenticula laterad; it is continuous with the crura caudal, and its expansion is called the *corona*.

**Capsular** (*kap-sul'-ar*) [*capsula*, a small box]. Pertaining to a capsule. *C.* *Artery*, the middle suprarenal artery. See *Arteries*, *Table of*. *C.* *Ligament*, the sac or membranous bag that surrounds every movable joint or articulation. It contains the synovial fluid. *C.* *Vein*, the supra-renal vein. See *Vein*.

**Capsule** (*kap-sul'-ul*) [dim. of *capser*, a chest]. A tunic or bag that encloses a part of the body or an organ. In biology, the investment of a part or organ, as a deluscent pod or seed vessel, the egg-case of an insect, the test of a radiolarian. Also, in pharmacy, a small, spherical shell composed of glycerin and gelatin, divided so that the parts fit together like a box and cover. It is used for the administration of nauseous and repulsive medicines. *C.*, *Bonnet's*, the posterior portion of the sheath of the eyeball. *C.*, *Bowman's*. See *Bowman's Capsule*. *C.*, *External*, a layer of non-nerve-fibers forming part of the external boundary of the lenticular nucleus. *C.*, *filler*, a contrivance consisting of a funnel, tube and plunger, or other device, used for introducing medicines into capsules. *C.* of *Glisson*, the cellulo-vascular membrane enveloping the hepatic vessels. *C.*, *Internal*, a layer of nerve-fibers beneath and on the inner side of the optic thalamus and caudate nucleus, which it separates

from the lenticular nucleus, and containing the continuation upward of the crus cerebri. *C.* of the *Lens*, a transparent, structureless membrane enclosing the lens of the eye. *C.*, *Malpighian*, the commencement of the uriniferous tubules. See *Malpighian Bodies*. *C.*, *Suprarenal*, the ductless glandular body at the apex of each kidney. *C.* of *Tenon*, the *tunica vaginalis* of the eye.

**Capsuliferous** (*kap-sul-if'-er-us*) [*capsula* a little box; *ferre*, to bear]. In biology, producing capsules.

**Capsulitis** (*kap-sul-itis*) [*capsula*, a small box; *itis*, inflammation]. Inflammation of the capsule of the lens, or of the fibrous capsule of the eyeball.

**Capsulo-ciliary** (*kap-su-lo-sil'-e-are*) [*capsula*, a little box; *cilium*, an eyelid]. Relating to the capsule of the lens and to the ciliary organ.

**Capsulogenous** (*kap-sul-og'-en-us*) [*capsula*, a little box; *gena*, born]. Capsule-producing, as the cocoon or capsule-glands of the earthworm.

**Capsulo-lenticular** (*kap-su-lo-len-tik'-u-lar*) [*capsula*, a little box; *lenticula*, a lentil]. Relating to the lens and to its capsule.

**Capsulo-pupillary** (*kap-su-lo-pu'-pil-are*) [*capsula*, a little box; *pupilla*, the pupil of the eye]. Relating to the capsule of the lens and to the pupil.

**Capsulotome** (*kap-sul'-o-tōm*). See *Cystotome*.

**Capsulotomy** (*kap-su-lot'-o-me*) [*capsula*, a capsule; *temere*, to cut]. The operation of rupturing the capsule of the crystalline lens in cataract-operations.

**Captage** (*kap-tahj*) [Fr.]. The measure to be applied to a natural spring of water, to secure the entire product of the spring, and the purity of the water, by the prevention of any admixture of deleterious or foreign matter.

**Captation** (*kap-ta'-shun*) [*capture*, to desire]. The first or opening stage of the hypnotic trance.

**Capucin Madder** (*kap-u-sin mad'-er*). See *Pigments*, *Conspectus of*.

**Capuron**, *Cardinal Points of*. See *Pelvis*.

**Caput** (*kap'-ut*) [L.]. 1. The head; also the chief part or beginning of an organ. 2. The cephalic or precrural portion of the caudatum of the prosencephalon. *C. coli*, the head of the colon. *C. cornu posterioris*. Same as *C. gelatinosum*. *C. gallinaginis*. See *Verumontanum*. *C. gelatinosum*, the name given to the translucent gray matter covering the dorso-mesal periphery of the dorsal horn of the spinal cord. It is a nervous substance composed of numerous closely crowded nerve-elements, with an intricate intervening plexus of very fine nerve-fibrils, derived from the dorsal (posterior or "sensory") nerve-roots. *C. medusæ*. See *Medusa*, *Caput*. *C. obstipum*. Synonym of *Wry-neck*. *C. quadratum*, the rectangular head of rickets, flattened upon the top and at the sides, with projecting occiput and prominent frontal bosses. *C. succedaneum*, a tumor composed of a sero-sanguineous infiltration of the connective tissue situated upon the presenting part of the fetus.

**Caraboid** (*kar'-ab-oid*) [*καρᾶς*, a carabus; *ειδός*, form]. In biology, the second larval stage of certain insects.

**Carajura** (*kar-ah-ju'-rah*) [Brazil]. Same as *Chica Red*.

**Caramania Gum**. See *Bassora Gum*.

**Caramel** (*kar'-am-el*) [Fr., burnt sugar]. Cane-sugar deprived of two molecules of water. It is a viscid, brown-colored liquid.

**Caranna** (*kar-an'-ah*) [Sp., *caraña*]. An aromatic oleo-resin produced by the tree *Protium carana*, of tropical America; it was formerly used in plasters; also a name for similar gummy resins from *Iceia altissima*, *Bursera acuminata*, etc., all tropical American trees.

**Carapa** (*kar'-ap-ah*) [*caraipi*, a native Guiana name]. A genus of tropical meliaceous trees. **C. guianensis** has an antispasmodic and febrifuge bark, and its seeds afford carapa oil, a protective against insects and vermin. **C. touloucouna**, of W. Africa, and **C. indica**, of Asia, have similar properties. Unof.

**Carate** (*kah-rah' te*) [S. America]. 1. A skin-disease local in tropical America, marked by blue, brown, scarlet, or rosy patches on the skin; it is usually confined to persons not of the white race. 2. A kind of camphor produced in S. America from the plant *Momordica charantia*.

**Caraua** (*kar-aw'-nah*). See *Caranna*.

**Caraway** (*kar'-ah-wa*). See *Carum*.

**Carbacidometer** (*kar-bas-id-om'-et-er*) [*carbo*, a coal; *acidum*, acid; μέτρον, a measure]. A form of air-tester for estimating the amount of carbonic acid gas in the atmosphere of a room or compartment.

**Carbamic Acid** (*kar-bam'-ik as'-id*). See *Acid*.

**Carbamid** (*kar'-bam-id*, or *-mid*) [*carbo*, a coal; *amid*],  $\text{CH}_4\text{N}_2\text{O}$ . Urea. Amid of carboxyl. It is prepared from urine, and crystallizes in long, rhombic prisms or needles that have a cooling taste. It is soluble in one part of cold water and in five parts of alcohol, but almost insoluble in ether; it melts at  $132^\circ$ ; at a higher temperature it decomposes into ammonia, ammellid, biuret, and cyanuric acid; it is found in urine and in various animal fluids.

**Carbanil** (*kar'-ban-il*) [*carbo*, a coal; *anilin*],  $\text{C}_7\text{H}_5\text{NO}$ . Phenyl isocyanate; a compound produced in the distillation of oxanilid. It is a mobile liquid, boiling at  $163^\circ$ , and has a pungent odor, provoking tears.

**Carbanilamid** (*kar-ban-il'-am-id*) [*carbo*, a coal; *anilin*; *amid*],  $\text{C}_7\text{H}_5\text{N}_2$ . Phenylurea; prepared by evaporating the aqueous solution of anilin hydrochlorid and potassium isocyanid. It forms needles easily soluble in hot water, alcohol, and ether, and melting at  $144\text{--}145^\circ$ .

**Carbanilid** (*kar-ban'-il-id*) [*carbo*, coal; *anilin*],  $\text{C}_{13}\text{H}_{12}\text{N}_2\text{O}$ . Diphenyl urea; a compound formed by the action of phosgene gas on anilin, or by heating carbanilamid with anilin to  $190^\circ$ . It consists of silky

needles, easily soluble in alcohol and ether, but sparingly soluble in water, and melts at  $235^\circ$ .

**Carbasus** (*kar'-bas-us*) [*καρβασα*, cotton]. Gauze; thin muslin used in surgery. **C. carbolata** (N. F.), carbolized gauze. **C. iodoformata** (N. F.), iodoform gauze.

**Carbazol** (*kar'-baz-ol*) [*carbo*, coal; *azotum*, nitrogen],  $\text{C}_{12}\text{H}_9\text{N}$ . Diphenylimid; a body produced when the vapors of anilin are conducted through a tube heated to redness. It is a by-product in the manufacture of anilin. It dissolves in hot alcohol, ether, and benzene, and crystallizes in colorless leaflets that melt at  $238^\circ$ .

**Carbazotate** (*kar-baz-ot'-tat*) [*carbo*, a coal; *azotum*, nitrogen]. Same as *Picrate*.

**Carbazotic Acid** (*kar-baz-ot'-ik*). See *Picric Acid*.

**Carbo** (*kar'-bo*) [L.]. A coal; charcoal. **C. animalis**, animal charcoal; bone-black; it is used in pharmacy and in manufacturing chemistry largely as a decolorizing-agent and as a filter. **C. animalis purificatus**, purified animal charcoal. **C. ligni**, wood-charcoal; an absorbent, disinfectant, and deodorizer, used in poulticing wounds and dressing ulcers. Given powdered, in capsules, it relieves gastric irritation.

**Carbohydrate** (*kar-bo-hi'-drät*) [*carbo*, coal; ἵδωρ, water]. An organic substance containing six carbon atoms or some multiple of six, and hydrogen and oxygen in the proportion in which they form water; that is, twice as many hydrogen as oxygen atoms. The carbohydrates form a large group of interesting organic compounds, and may be arranged into three groups: the *glucoses* (*monoses*); the *disaccharids*, or *sugars*; and the *polysaccharids*. The *glucoses* are the aldehyd-derivatives or ketone-derivatives of the hexahydric alcohols, into which they may be converted by the absorption of two hydrogen atoms. They are mostly crystalline substances, very soluble in water, but dissolving with difficulty in alcohol. They possess a sweet taste. The *disaccharids* and *polysaccharids* are ethereal anhydrids of the glucoses. All of them may be converted into the glucoses by hydrolytic decomposition. The disaccharids are ether-like anhydrids of the hexoses. A *Table of Carbohydrates* is added. **C., Test for.** See *Tests, Table of*.

## SERIES OF THE CARBOHYDRATES.

### 1. GLUCOSES.

| NAME.                | FORMULA.                            | FERMENTATION        | OPTIC ACTIVITY.  | REDUCING POWER.             |
|----------------------|-------------------------------------|---------------------|--|-----------------------------|
| <i>Monoses.</i>      |                                     |                     |  |                             |
| Glycerose, . . . . . | $\text{C}_3\text{H}_6\text{O}_3$    | . . .               | . . .  | . . .                       |
| Erythrose, . . . . . | $\text{C}_4\text{H}_8\text{O}_4$    | . . .               | . . .  | . . .                       |
| <i>Pentoses.</i>     |                                     |                     |  |                             |
| Arabinose, . . . . . | $\text{C}_5\text{H}_{10}\text{O}_5$ | Unfermentable.      | . . .  | Reduces Fehling's solution. |
| Xylose, . . . . .    | $\text{C}_5\text{H}_{10}\text{O}_5$ | Unfermentable.      | . . .  | Reduces Fehling's solution. |
| Rhamnose, . . . . .  | $\text{C}_6\text{H}_{12}\text{O}_5$ | Unfermentable.      | . . .  | Reduces Fehling's solution. |
| <i>Hexoses.</i>      |                                     |                     |  |                             |
| Mannose, . . . . .   | $\text{C}_6\text{H}_{12}\text{O}_6$ | Fermented by yeast. | Exists in three forms:<br>1, dextro-rotatory;<br>2, levo-rotatory; 3,<br>inactive. | Reduces Fehling's solution. |
| Glucose, . . . . .   | $\text{C}_6\text{H}_{12}\text{O}_6$ | Fermented by yeast. | Exists in three forms:<br>1, dextro-rotatory;<br>2, levo-rotatory; 3,<br>inactive. | Reduces Fehling's solution. |
| Galactose, . . . . . | $\text{C}_6\text{H}_{12}\text{O}_6$ | Fermented by yeast. | Dextro-rotatory.   | Reduces Fehling's solution. |
| Fructose, . . . . .  | $\text{C}_6\text{H}_{12}\text{O}_5$ | Fermented by yeast. | Levo-rotatory.   | Reduces Fehling's solution. |

SERIES OF THE CARBOHYDRATES.—*Continued.*

## 1. GLUCOSES.

| NAME.                                      | FORMULA.       | FERMENTATION.           | OPTIC ACTIVITY. | REDUCING POWER.             |
|--|----------------|-------------------------|-----------------|-----------------------------|
| Saccharose, . . . . .                      | $C_6H_{12}O_6$ | Unfermentable by yeast. | . . .           | Reduces Fehling's solution. |
| Methyl-hexose, . . . . .                   | $C_7H_{14}O_6$ | . . .                   | . . .           | . . .                       |
| <i>Heptose</i><br>Manno-heptose, . . . . . | $C_7H_{14}O_7$ | Unfermentable by yeast. | . . .           | . . .                       |
| Gluco-heptose, . . . . .                   | $C_7H_{14}O_7$ | Unfermentable by yeast. | . . .           | . . .                       |
| Gluco-heptose, . . . . .                   | $C_7H_{14}O_7$ | Unfermentable by yeast. | . . .           | . . .                       |
| Metha-heptose, . . . . .                   | $C_8H_{16}O_7$ | Unfermentable by yeast. | . . .           | . . .                       |
| <i>Octose</i><br>Manno-octose, . . . . .   | $C_8H_{16}O_8$ | Unfermentable by yeast. | . . .           | . . .                       |
| <i>Nonose</i><br>Manno-nonose, . . . . .   | $C_9H_{18}O_9$ | Fermented by yeast.     | . . .           | Reduces Fehling's solution. |

## 2. DISACCHARIDS.

|                                    |                              |                         |                  |  |
|------------------------------------|------------------------------|-------------------------|------------------|--|
| Saccharose (Cane-Sugar), . . . . . | $C_{12}H_{22}O_{11}$         | Unfermentable by yeast. | Dextro-rotatory. | Does not reduce Fehling's solution.    |
| Lactose (Milk-Sugar), . . . . .    | $C_{12}H_{22}O_{11} + H_2O$  | Fermented by yeast.     | Dextro-rotatory. | Reduces Fehling's solution on boiling. |
| Maltose, . . . . .                 | $C_{12}H_{22}O_{11} + H_2O$  | Fermented by yeast.     | Dextro-rotatory. | Reduces Fehling's solution.            |
| Mycose (Trehalose), . . . . .      | $C_{12}H_{22}O_{11} + 2H_2O$ | Fermented by yeast.     | Dextro-rotatory. | Does not reduce Fehling's solution     |
| Meliose, . . . . .                 | $C_{12}H_{22}O_{11}$         | . . .                   | . . .            | . . .                                  |

## 3. TRISACCHARIDS.

|                                 |                              |                     |                  |                                     |
|---------------------------------|------------------------------|---------------------|------------------|-------------------------------------|
| Melitose (Raffinose), . . . . . | $C_{18}H_{32}O_{16} + 5H_2O$ | Fermented by yeast. | Dextro-rotatory. | Does not reduce Fehling's solution. |
| Melezitose, . . . . .           | $C_{18}H_{32}O_{16} + 2H_2O$ | . . .               | Dextro-rotatory. | . . .                               |

## 4. POLYSACCHARIDS.

| NAME                                 | FORMULA                                  | OPTIC ACTIVITY.  | IODIN REACTION.      | REDUCING POWER AND FERMENTATION.                   |
|--------------------------------------|--|------------------|----------------------|--|
| Starch (Amylum), . . . . .           | $C_6H_{10}O_5$ , or $C_{36}H_{62}O_{33}$ | Dextro-rotatory. | Blue coloration.     | Fermentable.                                       |
| Paramylum, . . . . .                 | $C_6H_{10}O_5$                           | . . .            | Negative.            | . . .  |
| Lithanin (Moss-starch), . . . . .    | $C_6H_{10}O_5$                           | Dextro-rotatory. | Dirty blue color.    | . . .  |
| Italin, . . . . .                    | $C_6H_{10}O_5$                           | . . .            | Yellow color.        | . . .  |
| Glycogen (Animal Starch), . . . . .  | $C_6H_{10}O_5$                           | Dextro-rotatory. | Reddish-brown color. | Fermentable.                                       |
| <i>The Gum</i><br>Dextrin, . . . . . | $C_6H_{10}O_5$                           | Dextro-rotatory. | . . .                | Does not reduce Fehling's solution. Unfermentable. |
| Arabin, . . . . .                    | $C_{10}H_{16}O_{12} + H_2O$              | Dextro-rotatory. | . . .                | Does not reduce Fehling's solution. Unfermentable. |
| Galactan (Vegetable Gum), . . . . .  | $C_6H_{10}O_5$                           | Dextro-rotatory. | . . .                | Does not reduce Fehling's solution. Unfermentable. |
| Cellulose, . . . . .                 | $C_6H_{10}O_5$                           | Dextro-rotatory. | Blue color.          | . . .  |

**Carbohydraturia** (*kar-bo-hi-drat-u'-re-ah*) [*carbobydrate*; *οὐρον, urine*]. The presence of an abnormally large proportion of carbohydrates in the urine.

**Carbolic** (*kar-bol'-ik*) [*carbo*, a coal; *oleum*, oil]. Containing or derived from coal-tar oil. **C. Acid**. See *Acid*. **Carbolic**. **C. Mask**, Curschmann's respirator for use in fetid bronchitis. It is fastened in front of the nose and mouth, and contains cotton in a special receptacle, impregnated with carbolic acid, equal parts of carbolic acid and alcohol, turpentine, creasote, etc.

**Carbolism** (*kar'-bol-izm*) [*carbo*, a coal; *oleum*, oil]. Carbolic-acid poisoning: a diseased state induced by the misuse or maladministration of carbolic acid.

**Carbolize** (*kar'-bol-iz*) [*carbo*, a coal; *oleum*, oil]. To impregnate with carbolic acid. To render aseptic or antiseptic by the use of carbolic acid.

**Carboluria** (*kar-bol-u'-re-ah*) [*carbo*, a coal; *oleum*, oil; *οὐρον, urine*]. The presence of carbolic acid in the urine, producing a dark discoloration. It is one of the signs of carbolic-acid poisoning.

**Carbon** (*kar'-bon*) [*carbo*, charcoal]. Charcoal. C = 12; quantivalence II, IV. A non-metal occurring in the various forms of diamond, graphite or "black lead," and charcoal. In medicine only the last named form is employed, which may be,—**C.**, **Animal**, useful as a deodorant and disinfectant, as it readily absorbs and aids in oxidizing many gases. It is used internally to absorb fermenting products of digestion. **Carbo animal**, purificat., purified animal charcoal. Dose gr. xx–5 j. **C. Cataplasma** (B. P.), charcoal poultice; wood-charcoal 1, bread-crumbs 1, linseed meal 3, boiling water 20. **C. dioxid**, the acid, gaseous product, having the composition of CO<sub>2</sub>, commonly known as "carbonic acid gas," or carbonic acid. It is a colorless gas having a sp. gr. of 1.52, soluble in cold water, and possessing a pungent smell and an acid taste. Inhaled, it destroys animal life by asphyxiation. In solution, it is an excellent refrigerant and stomachic. Its inhalation is fatal in a short time, even when diluted with 95 parts of air. It is a product of respiration. It is used in medicine for inhalation in whooping cough, asthma, and to stop hiccough. It is also used as a local anesthetic in minor surgery. **C. disulphid**, bisulphid of carbon, CS<sub>2</sub>, a colorless, transparent liquid of offensive odor, highly inflammable, very poisonous. A good solvent for caoutchouc. A diluted spray of it is recommended in diphtheria. Dose m ss–j. **Carbo ligni**, wood charcoal. **C. monoxid**, CO, carbonic oxid, a colorless, tasteless, and inodorous gas, one of the products of imperfect combustion. When inhaled it is actively poisonous. **C. tetrachlorid**, CCl<sub>4</sub>, anesthetic, recommended locally for asthma, by inhalation. Unof. See *Anesthetic*. **C. oxysulphid**, a body, COS, formed by conducting sulphur vapor and carbon monoxid through red-hot tubes; it is a colorless gas, with a faint and peculiar odor. It unites readily with air, forming an explosive mixture. It is soluble in an equal volume of water. It is present in the waters of some mineral springs.

**Carbonaphtholic Acid** (*kar-bon-af-thol'-ik*). See *Acid alpha-oxynaphthoic*.

**Carbonemia** (*kar-bon-e'-me-ah*) [*carbon*, charcoal; *αἷμα, the blood*]. A word denoting the accumulation of carbon dioxid in the blood.

**Carbonic Acid** (*kar-bon'-ik as'-id*). See *Carbon dioxid*.

**Carbonis detergens**, **Liquor**. See *Pix*.

**Carbonization** (*kar-bon-iz-a'-shun*) [*carbo*, coal]. The process of decomposing organic substances by heat without air, until the volatile products are driven off and the carbon remains.

**Carbonyl** (*kar'-bon-il*) [*carbo*, charcoal]. A hypothetic organic radical having the formula CO.

**Carbostyryl** (*kar-bo-stir'-il*) [*carbo*, charcoal; *styrax*, storax], C<sub>9</sub>H<sub>7</sub>NO. Oxyquinolin; a compound prepared by digesting quinolin with a bleaching-lime solution. It crystallizes from hot water in fine needles, and from alcohol in large prisms, that melt at 198–199°.

**Carboxyl** (*kar'-boks-il*) [*carbo*, charcoal; *ὄξος, sharp*]. The atomic group, CO.OH, characteristic of the organic acids. The hydrogen of this can be replaced by metals, forming salts.

**Carbuncle**, or **Carbunculus** (*kar'-bung-kel*, or *kar-bung'-ku-lus*) [*carbo*, a live coal]. A hard, circumscribed, deep-seated, painful inflammation of the subcutaneous tissue, accompanied by chill, fever, and constitutional disturbance. It differs from a boil in having greater size, a flat top, and several points of suppuration. It is erroneously called anthrax.

**Carbuncular** (*kar-bung'-ku-lar*) [*carbo*, a live coal]. Pertaining to a carbuncle. **C. Disease**. See *Anthracosis*.

**Carbunculo contagioso**. Synonym of *Anthrax*.

**Carbyl** (*kar'-bil*) [*carbo*, charcoal; *ἰζη, matter*]. A name given by Magnus to the hydrocarbon ethylene when it acts as a basic radical.

**Carbylamin** (*kar-bil'-am-in*) [*carbo*, charcoal; *amin*]. 1. A name for hydrocyanic acid. 2. One of a series of compounds parallel to, and isomeric with, the nitrites, characterized by their ready decomposition by dilute acids into formic acid and amins. They are colorless liquids that can be distilled, and possess an exceedingly disgusting odor. They are sparingly soluble in water, but readily soluble in alcohol and ether.

**Carcassonne's Ligament**. See *Ligament*.

**Carcerule** (*kar'-ser-ool*) [*carcer*, a prison]. In biology, a many-celled, many-seeded, indehiscent pericarp.

**Carcharodont** (*kar-kar'-o-dont*) [*κάρχαρος, sharp, jagged; ὄδους, tooth*]. In biology, having compressed, trenchant, acute, pointed teeth, as sharks and snakes.

**Carcinoid** (*kar'-sin-oid*) [*καρκίνος, a crab; εἶδος, shape*]. In biology, crab-like.

**Carcinology** (*kar'-sin-ol'-o-je*) [*καρκίνος, a crab; ῥόγην, to speak*]. The systematized knowledge of crustaceans, or crabs, etc., a department of zoology.

**Carcinoma** (*kar'-sin-ol'-mah*) [*καρκίνωμα; καρκίνος, a crab, thus called from the appearance of the veins*]. A malignant tumor, characterized by a network of connective tissue whose areolae are filled with cell-masses resembling epithelial cells. See *Tumors*, *Table of*. **C.**, **Chimney-Sweepers'**. See *Epithelioma*. **C.**, **colloid (Alveolar)**, affects chiefly the alimentary canal, uterus, peritoneum, etc.; the delicate connective-tissue stroma is filled with colloid matter in alveoli, or cysts. **C. cutis**, cancer of the skin. See *Epithelioma*. **C.**, **desmoid**. See *Hodgkin's Disease*. **C.**, **encephaloid**, is of rapid growth, with a small amount of stroma, large alveoli, and greater amount of cells and blood-vessels. **Hematoid** (bloody), **Osteoid** (in bones), **Villous** (papillary), etc., are other varieties, encephaloid in character. **C.**, **epitheliomatous**, or **squamous-celled**, the cells resemble squamous epithelium, and they invade the adjacent tissue in a columnar manner. **C. lenticulare**, the most common form of cutaneous scirrhus. It begins as small, shot-sized, flatish, red papules, that enlarge to the size of a pea, bean, or filbert, most of them projecting above the surface, while others are subcutaneous. They are generally seated on a red or violaceous surface, and these coalesce into large irregular masses that sooner or later break down, ulcerate, and fungate, sometimes bleeding profusely.

The patient soon dies of exhaustion. **C.**, lipomatous, contains cells infiltrated with fat. **C.**, medullary. Same as **C.**, *Leu. med.* **C.**, melanodes, similar to **C.**, *Leu. med.*, but marked by dark-blue, brown or lead-papules, that break into fungous growths. **C.**, melanotic, has cells filled with dark pigment. **C.**, scirrhus, or **Hard**, most commonly in the breast; it has a stout fibrillated stroma, closely packed with large nucleated cells. **C.** *tuberosum*, a rarer form of cutaneous scirrhus in which the nodules are of a larger size, even up to that of a hen's egg. The patient speedily dies of exhaustion consequent upon ulceration of the tubercles. **C.**, Stiles's Test for; the excised part is washed in a five per cent. solution of nitric acid for ten minutes, washing it then in cold water for five minutes. The carcinomatous tissue appears a dull white, the normal tissue translucent.

**Carcinomatous** (*kar-in-oh-mat-us*) [*καρκινος*, a crab]. Relating to or affected with carcinoma.

**Carcinomorphic** (*kar-in-oh-mor'-fik*) [*καρκινος*, a crab; *μορφη*, form]. In biology, resembling a crab.

**Carcinophagous** (*kar-in-oh'-a-z-us*) [*καρκινος*, a crab; *φαγειν*, to eat]. Feeding upon crabs and other crustaceans.

**Carcinosis** (*kar-in-oh'-sis*) [*καρκινος*, a crab]. 1. A cancerous cachexia; a tendency to the development of malignant disease. 2. A form of cancer, usually fatal, beginning generally in the uterus or the stomach and spreading to the peritoneum. **C.**, *Acute*, rapidly fatal carcinosis. **C.**, *Miliary*, carcinosis in minute foci.

**Carcinus** (*kar'-in-us*) [*καρκινος*, crab]. Same as *Cancer*, or *Carcinoma*.

**Cardamom** (*kar-dam-um*). See *Cardamomum*.

**Cardamomum** (*kar-dam-oh'-mum*) [L.; *gen.* *Cardamini*]. Cardamom. The fruit of *Elettaria repens*, cultivated in Malabar. Its properties are due to a volatile oil,  $C_{10}H_{16}$ . It is an aromatic, carminative stomachic, used as an ingredient of several "bitters." It is useful when combined with purgatives to prevent griping. **C.**, *infusum*. Unof. Consists of cardamom 3j, water  $O_2$ . Dose a wineglassful. **C.**, *Tinct.*, 10 per cent strength. Dose 3j-ij. **C.**, *Tinct. Comp.*, cardamom 20, cinnamon 20, caraway 10, cochineal 5, green 10, dilute alcohol, *q. s.* ad 1000 parts. Dose 5j-ij.

**Carden's Operations**. See *Operations*, *Table of*.

**Cardia** (*kar'-de-ah*) [*καρδια*, the heart]. The heart. **C.** of the Stomach, the esophageal orifice of the stomach.

**Cardiac** (*kar'-de-ah*) [*καρδια*, the heart]. Pertaining to the heart. **C.** *Aspect*, that nearest the heart. **C.** *Cycle*, the total cardiac movement or revolution.

**C.** *Dropsy*. See *Dropsy*. **C.** *Dulness*, the region covering the position of the heart, as shown by percussion.

**C.** *Dyspnea*. See *Dyspnea*. **C.** *Epilepsy*, a rare affection, with or without pain in the region of the heart, occurring in paroxysms. The paroxysm usually follows a nocturnal period of consciousness, and at times is associated with twitching of the facial muscles and other convulsive movements. **C.** *Facies*. See *Facies*. **C.** *Ganglia*, lie in the groove and substance—the

principal are **Remak's** and **Bidder's**, the first on the surface of the sinus venosus, and the latter (two) at the auriculo-ventricular groove. See *Ganglia*, *Table of*. **C.** *Impulse*, the elevation caused by the movement of the heart, usually seen in the fifth left intercostal space. **C.** *Murmurs*. See *Murmurs*. **C.** *Orifice*, of the stomach, the esophageal orifice. **C.** *Passion*, pain in the heart, or the stomach. **C.** *Plexus*. See *Plexus*. **C.** *Rhythm*, the term given to the normal regularity in the force and volume of the individual heart beats. In cases of cardiac insufficiency this regularity is disturbed to a greater or less degree, as is also the interval between the beats, and this condition has been termed *arrhythmia*. The name *allorhythmia* has been applied to various perversions of rhythm. These abnormal conditions are due very probably to some derangement of the intrinsic nerve-apparatus of the heart, and are considered as unfavorable indications.

**Cardiagra** (*kar-de-ah'-grah*) [*καρδια*, heart; *αγρα*, seizure]. Gouty attack of the heart.

**Cardialgia** (*kar-de-ah'-je-ah*) [*καρδια*, heart; *αλγος*, pain]. A term loosely used as a synonym of *gastrodynia* in general, heartburn, and stomachic pains on the left side.

**Cardiamorphia** (*kar-de-am-oh'-fe-ah*) [*καρδια*, heart; *α* priv.; *μορφη*, form]. Deformity or malformation of the heart.

**Cardianastrophe** (*kar-de-an-ah'-tro-fe*) [*καρδια*, heart; *ἀναστροφή*, a turning back]. Displacement of the heart to the right side of the chest.

**Cardianeuria** (*kar-de-ah-nu'-re-ah*) [*καρδια*, heart; *α* priv.; *νευρον*, a nerve]. Lack of nerve-stimulus to the heart.

**Cardiant** (*kar'-de-ant*) [*καρδια*, the heart]. 1. Affecting the heart. 2. A remedy that affects the heart.

**Cardiactia** (*kar-de-ah'-te-ah*) [*καρδια*, heart; *ακτις*, bound]. Cardiac stenosis.

**Cardiasthma** (*kar-de-ah'-mah*) [*καρδια*, heart; *ἀσθμα*, asthma]. Dyspnea or so-called asthma due to heart-disease.

**Cardiatelia** (*kar-de-ah'-te-le-ah*). See *Atelocardia*.

**Cardiastrophia** (*kar-de-at-ro'-fe-ah*) [*καρδια*, heart; *ἀστροφία*, wasting]. Atrophy of the heart.

**Cardiauxe** (*kar-de-ah'-ks'-e*) [*καρδια*, heart; *αἰξη*, increase]. Enlargement of the heart.

**Cardicentesis** (*kar-de-sin-te'-sis*). See *Cardiocentesis*.

**Cardiechema** (*kar-de-ek'-e'-mah*) [*καρδια*, heart; *ἡχημα*, sound; *φλ.*, *Cardiechemata*]. A sound produced in or by the heart.

**Cardiectasis** (*kar-de-ek'-tas-is*) [*καρδια*, heart; *ἐκτασις*, a stretching out]. Dilatation of the heart.

**Cardielcosis** (*kar-de-el-ko'-sis*) [*καρδια*, heart; *ἐλκος*, ulceration]. Ulceration of the heart.

**Cardiempthraia** (*kar-de-em-fraks'-e-ah*) [*καρδια*, heart; *ἐμπόραξις*, obstruction]. Obstruction to the blood-current in the heart.

**Cardiourysma** (*kar-de-u-riz'-mah*) [*καρδια*, heart; *εὐρύς*, wide]. Dilatation of the heart.

**Cardiform** (*kar'-di-j-orm*) [*cardus*, a card; *forma*, shape]. In biology, having the teeth set as in a card.

**Cardinal** (*kar'-din-al*) [*cardo*, a hinge]. A chief or principal part. **C.** *Flower*, a common name for several species of *Lobelia*, chiefly *L. cardinalis*.

**C.** *Points*. See *Eye*, *Diagrammatic*. **C.** *Points of Capuron*. See *Pelvis*. **C.** *Veins*, the venous trunks which, in the embryonic stage, form the primitive jugular veins.

**Cardiocele** (*kar'-de-oh-sel*) [*καρδια*, heart; *κήλη*, tumor]. Hernial protrusion of the heart, chiefly through the diaphragm.

CARDIAC CYCLE.

The inner circle shows the events that occur in the heart; the outer circle shows the relations of the sounds and silences to the events.

**Cardiocentesis** (*kar-de-o-sen-tē-sis*) [*καρδία*, heart; *κέντησις*, puncture]. Surgical puncture and aspiration of one of the chambers of the heart.

**Cardioclasis** (*kar-de-o-klā-zē-ah*) [*καρδία*, heart; *κλάσις*, rupture]. Rupture of the heart.

**Cardiocrystallus** (*kar-de-o-kris-tal'-us*) [*καρδία*, heart; *κρυστάλλος*, crystal; *pl.*, *Cardiocrystalli*]. A heart crystal; a microscopic white crystal sometimes found in the tissues of the heart.

**Cardiodemia** (*kar-de-o-de'-me-ah*) [*καρδία*, heart; *δημός*, fat]. Fatty heart; fatty degeneration of the heart.

**Cardiodynia** (*kar-de-o-din'-e-ah*) [*καρδία*, heart; *δύνη*, pain]. Pain in or about the heart.

**Cardiogram** (*kar'-de-o-gram*) [*καρδία*, heart; *γράμμα*, a writing]. The tracing made of the cardiac impulse by the cardiograph. See, also, *Heart*.

**Cardiograph** (*kar'-de-o-graf*) [*καρδία*, heart; *γράφειν*, to write]. An instrument for registering graphically the modifications of the pulsations of the heart.

**Cardiographic** (*kar-de-o-graf'-ik*) [*καρδία*, the heart; *γράφειν*, to write]. Pertaining to or recorded by the cardiograph.

**Cardiography** (*kar-de-o-graf'-e*) [*καρδία*, the heart; *γράφειν*, to write]. 1. The use of the cardiograph. 2. A description of the anatomy of the heart.

**Cardiohemothrombus** (*kar-de-o-hem-o-throm'-bus*) [*καρδία*, heart; *αἷμα*, blood; *θρόμβωσις*, a becoming curdled]. Heart-clot.

**Cardio-inhibitory** (*kar-de-o-in-hib'-it-o-re*) [*καρδία*, the heart; *inhibere*, to restrain]. Pertaining to the diminution of the heart's action. **C.-i.** **Nerves**, the fibers of the spinal accessory supplied to the vagus.

**Cardiolith** (*kar'-de-o-lith*) [*καρδία*, heart; *λίθος*, a stone]. A cardiac concretion.

**Cardiology** (*kar-de-ol'-o-jē*) [*καρδία*, heart; *λόγος*, discourse]. The anatomy, physiology, and pathology of the heart.

**Cardiomalacia** (*kar-de-o-mal-a'-se-ah*) [*καρδία*, heart; *μαλακία*, softness]. Morbid softening of the substance of the heart.

**Cardiomegalia** (*kar-de-o-meg-a'-le-ah*) [*καρδία*, heart; *μέγας*, large]. Cardiac enlargement.

**Cardiometer** (*kar-de-om'-et-er*) [*καρδία*, heart; *μέτρον*, a measure]. An instrument for estimating the force of the heart's action.

**Cardiometry** (*kar-de-om'-et-re*) [*καρδία*, the heart; *μέτρον*, a measure]. The estimation of the size and dimensions of the heart (as by means of auscultation and percussion).

**Cardiopalmus** (*kar-de-o-pal'-mus*) [*καρδία*, heart; *παλμός*, palpitation]. Palpitation of the heart.

**Cardiopathy** (*kar-de-op'-a-the*) [*καρδία*, heart; *πάθος*, disease]. Any disease of the heart.

**Cardiopericarditis** (*kar-de-o-per-e-kar-di'-tis*) [*καρδία*, heart; *περί*, around; *καρδία*, the heart; *τις*, inflammation]. Carditis and pericarditis together; inflammation of the heart-tissues and of the pericardium.

CARDIOGRAPH OF V. KNOLL.  
t. Exit tube. e. Spring. p. Button.  
(Landois.)

**Cardioplegia** (*kar-de-o-ple'-je-ah*) [*καρδία*, heart; *πληγή*, a stroke]. Paralysis of the heart.

**Cardio-pneumatic** (*kar-de-o-nu-mat'-ik*) [*καρδία*, heart; *πνεῦμα*, the breath]. Pertaining to the heart and the breath. **C.-p.** **Movements**. Those movements of the air in the lungs that are caused by the pulsations of the heart and larger vessels.

**Cardio-pneumograph** (*kar-de-o-nu'-mo-graf*) [*καρδία*, heart; *πνεῦμα*, breath; *γράφειν*, to write]. An instrument designed for graphically recording cardio-pneumatic movements.

**Cardiopuncture** (*kar-de-o-punk'-chur*) [*καρδία*, heart; *punctura*, a puncture]. 1. Cardiocentesis. 2. Any surgical or vivisectional puncture of the heart.

**Cardiopyloric** (*kar-de-o-pi-lor'-ik*) [*καρδία*, heart; *πύλωρος*, a gate-keeper]. Referring to both the cardiac and pyloric portions of the stomach.

**Cardiorrhesis** (*kar-de-o-reks'-is*) [*καρδία*, heart; *ρήξις*, rupture]. Rupture of the heart.

**Cardiosclerosis** (*kar-de-o-skle-ro'-sis*) [*καρδία*, heart; *σκληρύνειν*, to harden]. Induration of the tissues of the heart. See *Fibroid Heart*.

**Cardioscope** (*kar'-de-o-skōp*) [*καρδία*, heart; *σκοπεῖν*, to view]. An instrument for the observation of the movements or of lesions of the heart.

**Cardiostenosis** (*kar-de-o-ste-no'-sis*) [*καρδία*, heart; *στένωσις*, narrowing]. Constriction of the heart, especially of the *conus arteriosus*; also the development of such a constriction.

**Cardio-thyroid Exophthalmos** (*kar'-de-o-thi-roid eks-off-thal'-mos*). Synonym of *Exophthalmic Goiter*.

**Cardiotomy** (*kar-de-ol'-o-me*) [*καρδία*, heart; *τομή*, cutting]. The anatomy or dissection of the heart.

**Cardiotopography** (*kar-de-o-to-pog'-ra-fe*) [*καρδία*, heart; *τόπος*, place; *γράφειν*, to write]. The topography or topographic anatomy of the heart and the cardiac area.

**Cardiotoxic** (*kar-de-o-toks'-ik*) [*καρδία*, heart; *τοξικόν*, poison]. Having a poisonous effect upon or through the heart.

**Cardiotrauma** (*kar-de-o-trau'-mah*) [*καρδία*, heart; *τραῦμα*, a wound]. Traumatism or wound of the heart.

**Cardiotromus** (*kar-de-ol'-ro-mus*) [*καρδία*, heart; *τρόμος*, a quivering]. A fluttering or slight palpitation of the heart.

**Cardiovascular** (*kar-de-o-vas'-ku-lur*) [*καρδία*, heart; *vasculum*, a small vessel]. Both cardiac and vascular; pertaining to the blood-vessels of the heart.

**Carditic** (*kar-di'-ik*) [*καρδία*, the heart; *τις*, inflammation]. Relating to or affected with carditis.

**Carditis** (*kar-di'-tis*) [*καρδία*, the heart; *τις*, inflammation]. Inflammation of the heart. **C.**, **Internal**. Synonym of *Endocarditis*.

**Cardo** (*kar'-do*) [*cardo*, a hinge]. In biology, a hinge-joint, as that of a bivalve shell or the maxilla of an insect.

**Cardol** (*kar'-dol*). See *Anacardium*.

**Carduus** (*kar'-du-us*) [*L.*, a thistle]. The seeds of *C. marianus*, St. Mary's thistle, and *C. benedictus*, blessed thistle. A decoction of the former,  $\mathfrak{z}$ ij ad Oj, constitutes an old and popular remedy for hemoptysis. The latter is also a popular cure-all, used mainly as a tonic bitter. Dose of decoction  $\mathfrak{z}$ j- $\mathfrak{z}$ ss; of a tincture,  $\mathfrak{M}$ x-xx.

**Carferral** (*kar'-fer-al*) [*carbon*, charcoal; *ferrum*, iron; *aluminum*]. A proprietary combination of carbon, iron oxid, and clay; it is used as a filtering material for water.

**Carica Papaya** (*kar'-ik-ah pap-a'-yah*). See *Papain*.

**Caricin** (*kar'-is-in*). See *Papain*.

**Caricologist** (*kar-ik-ol'-o-jist*) [*carere*, sedge; *λέγειν*, to speak]. A student of sedges.

**Caricous** (*kar'-i-k-u*) [*aria*, a fig] Fig-shaped, as a caricous tumor.

**Caries** (*kar'-ree*) [*carus*, rottenness]. A chronic inflammation of bone with rarefaction or absorption of bony tissue, followed usually by pus formation; molecular death of bone, with the accompanying process, as ulceration. **C. fungosa**, tuberculosis of a bone with attached sequester, the meshes of the latter being filled with granulations growing into them from the inner surface of the cavity. **C., necrotic**, when portions of the bone lie in a suppurating cavity. **C. sicca**, a form of tuberculous caries characterized by absence of suppuration, obliteration of the cavity of the joint, and sclerosis and concentric atrophy of the articular extremity of the bone. **C. of Spine**, or **Pott's Disease**, osteitis of the bodies of the vertebrae and intervertebral fibro-cartilage, producing curvature of the spine. **C. of Teeth**, a chemical decomposition of the earthy part of any portion of a tooth, accompanied by a partial or complete disorganization of the animal framework of the affected part.

**Carina** (*kar'-i-nah*) [*arim*, the keel]. In biology, one of many keel-like structures; as the breast-bone of most birds, the median piece to the carapace of a crinoid, etc.

**Carinate** (*kar'-i-nat*) [*varinatus*, keel-shaped]. Keeled.

**Carinated Abdomen** (*kar'-in-at-ed ab'-do-men*). See *Scaphoid Abdomen*.

**Cariniform** (*kar'-in-if-orm*) [*carina*, keel; *forma*, shape]. In biology, applied to the keel-like fins of certain fishes, and to other structures.

**Carino-lateral** (*kar'-in-o-lat'-er-al*) [*carina*, a keel; *latus*, side]. Placed at the side of the carina of an animal.

**Cariol** (*kar'-e-ol*). A poisonous active principle obtainable from parsley. It resembles apiol in its physiologic effects, but produces a peculiar uterine vascular congestion; it is useful in genito-spinal atony. Unof.

**Carious** (*kar'-ee-us*) [*caries*, rottenness]. Pertaining to or affected with caries. **C. Teeth**, Effects of; carious teeth may occasion facial neuralgia, facial paralysis, sciatica, hemiplegia and spinal irritation, paraplegia, tetanus, headache, epilepsy, hysteria, chorea, insanity, etc.

**Carissa** (*kar'-i'-ah*) [L.]. A genus of shrubs. **C. schimperi**. See *Quabain*.

**Carius**, Method of. A method for the quantitative determination of halogens. The substance, weighed out in a small, glass tube, is heated together with concentrated  $\text{HNO}_3$  and silver nitrate to from 150° to 300° C. in a sealed tube, and the quantity of the resulting silver haloid determined.

**Carlsbad Water**. A famous mineral water used largely for chronic affections of the gastro-intestinal tract, obesity, gout, and diabetes.

**Carmin** (*kar'-min*)  $\text{C}_{12}\text{H}_{18}\text{O}_{10}$ . A coloring-matter extracted from *Cochineal*, *g. c.* **C. Naphtha**. See *Piment*, *Constituents* of. **C. Red**. Same as *Cochineal*.

**Carminant** (*kar'-min-ant*) [*carmin*, a charm]. 1. A crumative. 2. A crumative agent or medicine.

**Carminative** (*kar'-min-at-iv*) [*carmin*, a charm]. A calming or soothing medicine, chiefly for children, that acts by relieving pain from flatulence.

**Carminic Acid** (*kar-min'-ik-sid*). See *Acid*.

**Carminophile** (*kar-min'-o-fil*) [*carmin*: *phileo*, to love]. Readily stainable with carmin.

**Carnal** (*kar'-nal*) [*carno*, flesh]. Pertaining to flesh. **C. Knowledge**, sexual intercourse. In forensic medicine it signifies penetration merely, which penetration need only be vulval without seminal emission.

**Carnauba** (*kar-na-oo'-bah*) [Braz.]. The root of *Corypha cerifera*, a wax-producing palm-tree of tropical America. It is used in Brazil as an alterative and resembles sarsaparilla in its properties. Dose of the fld. ext.  $\text{m xxx-}\overline{\text{v}}$  j. Unof. **C. Wax**, obtained from the leaves of the carnauba-palm, *Copernicia cerifera*, of Brazil. Its specific gravity is .999 and its melting-point 185° F. (84° C.). It is brittle and of a yellowish color. It is extensively used in the manufacture of candles.

**Carneous** (*kar'-ne-us*) [*carneus*, of flesh]. Fleshy. **C. Columns**. See *Columna Carnea*.

**Carnification** (*kar-nif-ik-a'-shun*) [*caro*, flesh; *fieri*, to become]. A term indicating the alteration of tissue to an unnatural, fleshy appearance. Also, the amyloid degeneration of certain tissues.

**Carnin** (*kar'-nin*) [*caro*, flesh].  $\text{C}_2\text{H}_5\text{N}_4\text{O}_3$ . A leucomaine isolated from American meat-extract, but not from muscle-tissue itself; also obtained from yeast and wine. It crystallizes in white masses composed of very small irregular crystals; it is soluble with great difficulty in cold, readily soluble in hot water, insoluble in alcohol and in ether. It is not thought to be very poisonous, but experiments made by Brücke show that it causes a fluctuation in the rate of the heart-beat.

**Carnivorous** (*kar-niv'-o-rus*) [*caro*, flesh; *vorare*, to devour]. In surgery, caustic, escharotic; flesh-eating.

**Carnochan's Operations**. See *Operations*, *Table of*.

**Carnose** (*kar'-nos*) [*carneus*, fleshy]. Resembling or having the consistence of flesh.

**Carnosity** (*kar-nos'-it-e*) [*carneus*, fleshy]. A fleshy growth or excrescence.

**Carnot's Doctrine**. An absurd theory advanced as an objection to vaccination. It is the doctrine of the "displacement of mortality." Carnot claimed that while certain diseases (small-pox, measles, croup, etc.) were decreasing, other diseases (cholera, typhoid fever, dysentery) were increasing, and that vaccination was the cause of all the disturbance.

**Caro** (*ka'-ro*) [L.]. Flesh: muscular tissue.

**Caroba** (*kar-o'-bah*) [L.]. The leaflets of *Jacaranda procera* and of *Cybisia antisyphilitica*. It is a popular Brazilian remedy as an emeto-cathartic, alterative, and tonic in syphilis and in yaws. Dose of the fld. ext.  $\text{m xv-}\overline{\text{v}}$  j. Unof.

**Carobin** (*kar-o'-bin*) [*caroba*]. An alkaloid said to be found in the leaves of *Jacaranda procera*.

**Carolina** (*kar-o-lin'-nah*) [*Carolus*, Charles]. A name given to two Southern States of the Union. **C. Allspice**. See *Calycaanthus*. **C. Pink**. See *Spigelia*.

**Carotic** (*kar-ot'-ik*) [*kápos*, stupor]. Of the nature of carus; stupid; stupefying.

**Carotico-clinoid** (*kar-ot'-ik-o-kli'-noid*) [*kápos*, stupor; *κλίνω*, a bed]. Relating to a carotid artery and a clinoid process of the sphenoid bone.

**Carotico-tympanic** (*kar-ot'-ik-o-tim pan'-ik*) [*kápos*, stupor; *τύμπανον*, a drum]. Relating to the carotid canal and the tympanum.

**Carotid** (*kar-ot'-id*) [*καρωτις*; *καρβιν*, to produce sleep]. 1. The principal (right and left) artery of the neck. (They were thought to give origin to sleep.) See *Arteries*, *Table of*. 2. Of or relating to either of the two great arteries of the neck, or their principal branches. See *Canal*, *Foramen*, *Ganglion*, *Plexus*, etc.

**Carotin** (*kar'-o-tin*) [*carota*, carrot],  $\text{C}_{40}\text{H}_{56}\text{O}$ . An oily coloring matter found in carrot-root and tomato. It is a lipochrome.

**Carpadelium** (*kar-pad-el'-e-um*) [*καρπός*, fruit; *ἀνύσος*, not manifest]. Same as *Cremocarp*.

**Carpagra** (*kar-p'-a-grah*) [*καρπός*, the wrist; *ἄρρα*, a seizure]. A sudden attack of pain at the wrist.

**Carpain** (*kar-pa'-in*),  $C_{11}H_{27}NO_2$ . An alkaloid extracted from the leaves of *Carica papaya*. It forms well-defined, beautiful crystals, with a very bitter taste, and melting at  $115^{\circ}C$ . It is recommended for the subcutaneous treatment of heart-disease. Dose, grain  $\frac{1}{10}$  to  $\frac{1}{8}$  subcutaneously, every day, or every second day.

**Carpal** (*kar-p'-al*) [*καρπός*, the wrist]. Pertaining to the wrist. **C. Angle**, in biology, the bend of the wing.

**Carpale** (*kar-pa'-le*) [*καρπός*, the wrist]. Any one of the wrist-bones.

**Carpel** (*kar'-pel*) [*καρπός*, fruit]. In biology, the ovule-producing organ of a plant; a simple pistil, or the homologous portion of a compound pistil.

**Carpellary** (*kar'-pel-a-re*) [*καρπός*, fruit]. Containing, like, or belonging to a carpel.

**Carpen** (*kar-p'-en*) [*καρπός*, the wrist]. Belonging to the carpus in itself.

**Carphologia** (*kar-fo-lo'-je-ah*). See *Carphology*.

**Carphology** (*kar-fol'-o-je*) [*κάρφος*, chaff; *λέγειν*, to collect]. A symptom in delirious and dying persons consisting in picking at the bedclothes. It is generally looked upon as an unfavorable omen. *Floccilatio*, or *floccilation*, was the term formerly given to this symptom.

**Carpobalsamum** (*kar-po-bal'-sam-um*) [*καρπός*, fruit; *βάλσαμον*, balsam]. The fruit of *Balsamodendron* (*Commiphora*) *opobalsamum*, the Mecca balsam-tree; also a fragrant volatile oil from the same fruit. It is highly prized in the Orient. Unof.

**Carpocace** (*kar-pok'-as-e*) [*καρπός*, wrist; *κακός*, bad]. A diseased condition of the wrist.

**Carpogenic** (*kar-po-jen'-ik*) [*καρπός*, fruit; *γένης*, producing]. Applied to the fruit-producing cell or system of cells in certain algae.

**Carpognathite** (*kar-pog'-nath-it*) [*καρπός*, the wrist; *γνάθος*, the jaw]. In biology, the fifth joint of the gnathopodite or foot-jaw of a crustacean. See *Carpos*.

**Carpogonium** (*kar-po-go'-ne-um*) [*καρπός*, fruit; *γόνος*, producing]. In biology, the unfertilized female reproductive organ of certain thallophytes.

**Carpolith** (*kar-po-lith*) [*καρπός*, fruit; *λίθος*, a stone]. 1. A hard concretion formed in a fruit. 2. A petrified fruit.

**Carpology** (*kar-pol'-o-je*) [*καρπός*, fruit; *λέγειν*, to speak]. That department of botany that treats of fruits.

**Carpomania** (*kar-po-ma'-ne-ah*) [*καρπός*, fruit; *μανία*, madness]. In biology, the excessive production of fruit by trees that are cultivated.

**Carmo-metacarpal** (*kar-po-met-a-kar'-pal*) [*καρπός*, carpus; *μετά*, between, among; *καρπός*, carpus]. Relating to the carpus and to the metacarpus.

**Carpopedal** (*kar-po-ped'-al*) [*καρπός*, carpus; *pes*, *pedis*, a foot]. Affecting the wrists or the hands and feet.

**C. Spasm**, a spasm of the hands and feet, or of the thumbs and great toes, associated with the laryngismus stridulus of children. **C. Contractions**. See *Contraction*.

**Carpophagous** (*kar-poff'-ag-us*) [*καρπός*, fruit; *φαγείν*, to eat]. Applied to fruit-eating animals.

**Carpophore** (*kar'-po-för*) [*καρπός*, fruit; *φέρειν*, to bear]. In biology, the stalk or support of fruits, corresponding to the receptacle in the flower. Also an organ, in some thallophytes, that bears spores.

**Carpopodite** (*kar-pöp'-o-dit*) [*καρπός*, the wrist; *πούς*, the foot]. In biology, a part of the crustacean limb, i.e., the fifth joint of the endopodite. See *Carpos*.

**Carpoptosis** (*kar-pöp'-to'-sis*) [*καρπός*, wrist; *πτώσις*, a fall]. Wrist-drop.

**Carpos** (*kar'-pos*) [*καρπός*, wrist]. In biology, the fifth

joint of any crustacean appendage (Bate). The same as *Carpognathite* and *Carpopodite* (Milne Edwards).

**Carpospore** (*kar'-po-spor*) [*καρπός*, fruit; *σπορά*, seed]. In biology, the equivalent of spore.

**Carpostome** (*kar'-po-stom*) [*καρπός*, fruit; *στόμα*, mouth]. In biology, one of the narrow mouths or canals through which spores are discharged from the cystocarp or sporocarp.

**Carpotica** (*kar-pol'-ik-ah*) [*καρπός*, fruit]. Diseases connected with pregnancy and childbirth.

**Carpozyma** (*kar-po-zil'-mah*) [*καρπός*, fruit; *ζίμη*, ferment]. A genus of fermentative microorganisms. **C. apiculata**, a widely-diffused alcoholic ferment found in all fruits.

**Carpue's Operation**. See *Operations*, *Table of*.

**Carpus** (*kar-p'-us*) [*καρπός*, the wrist]. The eight bones collectively forming the wrist. See *Bones*, *Table of*.

**Carr's Method**. See *Treatment*, *Methods of*.

**Carrageen**, or **Carragheen** (*kar'-ag-en*) [*Carragheen* in Ireland]. Irish moss. See *Chondrus*.

**Carragheenin** (*kar-ag-en'-in*),  $C_6H_{10}O_5$ . A mucilaginous constituent of carrageen, apparently identical with pararrabin.

**Carré's Apparatus**. An apparatus for manufacturing ice by means of the evaporation of ether.

**Carriage** (*kar'-ä*). See *Ward-carriage*, *Ambulance*, *Cacolet*.

**Carrick Bend** (*kar'-ik-bend*). A form of knot for fastening together two ligatures. The merit of the knot consists in the free end being held firmly between the two long portions.

**Carron Oil** (*kar'-on oil*). See *Linum* and *Calcium*.

**Car-sickness** (*kar'-sik-nes*). The well-known symptoms of sea-sickness produced by journeying in railway cars.

**Carswell's Grapes**. Pulmonary tubercles when they occur by racemose distribution at the extremities of several adjacent bronchioles. See *Diseases*, *Table of*.

**Carter's Operation**. See *Operations*, *Table of*. **C. Test**. See *Tests*, *Table of*.

**Carthamin** (*karth'-am-in*) [*Ar.*, *qartama*, paint],  $C_{14}H_{16}O_7$ . The coloring-matter in safflower, the blossoms of *Carthamus tinctorius*. It is precipitated from its soda solution by acetic acid as a dark-red powder, which, on drying, acquires a metallic luster. It dissolves with a beautiful red color in alcohol and the alkalis. It is used for surface-coloring or dyeing. See *Pigments*, *Conspectus of*.

**Carthamus** (*karth'-am-us*) [*Ar.*, *qartama*, paint]. American or bastard saffron or safflower. The flowers of *C. tinctorius*. An infusion, "Saffron tea," is a popular domestic remedy as a diuretic in measles and other exanthematous affections. Unof.

**Cartilage** (*kar'-til-aj*) [*cartilago*, gristle]. Gristle; a white, semi-opaque, non-vascular tissue composed of a matrix containing nucleated cells. When boiled, cartilage yields a substance called *Chondrin*, *q. v.* **C., Articular**, that lining the articular surfaces of bones. **C., Bone-**, bone that takes its origin from cartilage, and not from a membrane. **C., Costal**, that occupying the interval between the true ribs and the sternum or adjacent cartilages. **C., Ensiform**, the third piece of the sternum. It is also called the *xiphoid appendix*.

**C., Epactal**, small cartilaginous nodules on the upper edge of the alar cartilages of the nose. **C., Hyaline**, distinguished by a granular or homogeneous matrix.

**C., Fibro-**, distinguished by a fibrous matrix. **Cartilages of Larynx**, the cartilages of the larynx take part in producing the various modulations of the pitch and intensity of the voice. They are the *thyroid*, *cricoid*, *epiglottis*, and a pair each of *arytenoid*, *cornicula laryngis*, and *cuneiform*, *q. v.* **C. of Meckel**.

See *Meckel*. **C.**, **Mucronate**, the ensiform cartilage.

**C.**, **Nasal**, the cartilaginous framework of the nose, consisting of five pieces, the two upper and two lower cartilages, and the cartilage of the septum.

**C.**, **Reticular**, a peculiar cartilage found in the auricle of the ear, the epiglottis, and Eustachian tubes. Its peculiarity consists in a network of yellow elastic fibers pervading the matrix in all directions. **C.** of Santorini, a nodule at the apex of each arytenoid cartilage, the corniculum laryngis. **C.** of Weitbrecht, the interarticular fibro cartilage that exists in the acromioclavicular articulation. **C.** of Wrisberg, the cubicular cartilages, one on each side of the fold of membrane stretching from the arytenoid cartilage to the epiglottis. **C.**, **Yellow**. See **C.**, **Reticular**.

**Cartilagin** (*kar-til-aj-in*) [*artilagō*, cartilage]. A characteristic principle of hyaline cartilage. Boiling changes it into chondrin.

**Cartilagification** (*kar-til-aj-in-if-ik-a'-shun*) [*cartilagō*, cartilage; *paieō*, to make]. A change into cartilage.

**Cartilagiform** (*kar-til-aj-in-if-ik-rm*) [*artilago*, cartilage; *form*, form]. Resembling cartilage.

**Cartilaginous** (*kar-til-aj-in-us*) [*artilagō*, cartilage; *form*, form]. Resembling cartilage.

**Cartilago** (*kar-til-a'-gō*) [*l.*: *gen.*, *Cartilaginīs*]. Cartilage. **C.** triticea, a small, oblong, fibro-cartilaginous mass, often found in the elastic ligament, the thyrohyoid, connecting the superior cornu of the thyroid cartilage with the greater cornu of the hyoid bone.

**Carum** (*kar-rum*) [*καρυ*, caraway]. Caraway. The seeds of *C. carum*, indigenous to Europe and an allied species native to the Pacific coast of America. Its odor and taste are due to a volatile oil. It is valuable in infantile colic, but is used chiefly as a flavor. **C.**, **Aqua** (B. P.). Dose ʒj-ij. **C.**, **Infusum**, unof., ʒj-ij. **C.**, **Oleum**. Dose ʒss-ij. **C.**, **Oleum**. Dose ʒj-iv.

**Caruncle** (*kar-un'-ku-lē*) [*caruncula*, dim. of *carō*, flesh]. A small, abnormal fleshy growth. In biology, applied to certain elevations, protuberances, or excrescences on animals or plants, as the comb of a bird, the fleshy papilla at the inner canthus of the eye, the growths on insect larvæ, and the small masses about the hilum of some seeds. **C.**, **Lachrymal**, one upon the conjunctiva near the inner canthus. **C.**, **Urethral**, a small, bright red growth situated on the posterior lip of the meatus urinarius; a frequent condition in women. The caruncle varies in size from a hempseed to a filbert; it is very painful, especially during micturition and coitus, and bleeds readily.

**Caruncula** (*kar-un'-ku-lah*) [dim. of *carō*, flesh; *pl.*, *Carunculæ*]. A caruncle. **C.**, **mammillaris**, the olfactory tubercle, an eminence of gray matter between the roots of the olfactory nerve.

**Carunculæ** (*kar-un'-ku-lah*) [*caruncula*, a caruncle]. The nymphæ. **C.** myrtiliformes, the projections of membrane near the orifice of the vagina, thought to be the remains of the hymen after its rupture. They have also been found in the imperforated hymen.

**Caruncular** (*kar-un'-ku-lar*) [*caruncula*, a caruncle]. Like or pertaining to a caruncle.

**Carus** (*kar-us*) [*carus*, sleep]. Deep, lethargic sleep. **C.** cataleptica, cataplexy. **C.** ecstasis, trance, or catalepsy. **C.** lethargus, lethargy.

**Carus**, **Curve or Circle of**. See *Curve*.

**Carvacrol** (*kar'-ar-ol*) [*Ital.*, *carvi*, caraway; *ἀρωμα*, sharp].  $C_{10}H_{14}O$ . A liquid body occurring in the oil of certain varieties of *Satureia*. It is produced on heating carvol with glacial phosphoric acid. It is a thick oil, solidifying at low temperatures; it melts at 0°

and boils at 236°. It has a very disagreeable odor and strong taste. It has been used to relieve toothache.

**Carvene** (*kar'-en*) [*lt.*, *carvi*, caraway].  $C_{10}H_{16}$ . A hydrocarbon contained in caraway. It is a light terpene. See also *Citrene*.

**Carvol** (*kar'-ol*) [*lt.*, *carvi*, caraway; *oleum*, oil].  $C_{10}H_{14}O$ . An aromatic alcohol isomeric with carvacrol, and obtained from oil of cumin. It is an oil with a pleasant odor, boiling at 225° C.

**Caryoblast** (*kar'-e-o-blast*) [*κάρυον*, a nucleus; *βλαστός*, a germ]. Any nucleated plastidule.

**Caryocinesis** (*kar'-e-o-sin-e'-sis*) [*κάρυον*, a nut (nucleus); *κίνησις*, movement]. See *Karyokinesis*.

**Caryocinetic** (*kar'-e-o-sin-e'-ik*). See *Karyokinetic*.

**Caryolysis** (*kar'-e-o-l-isis*) [*κάρυον*, nucleus; *λύειν*, to loose]. The process of the dissolution of cell-nuclei.

**Caryolytic** (*kar'-e-o-lit'-ik*) [*κάρυον*, nucleus; *λύσις*, dissolution]. Pertaining to *Caryolysis*.

**Caryomitosi** (*kar'-e-o-mit-o'-sis*). See *Karyomitosi*.

**Caryophyllin** (*kar'-e-o-fil'-in*) [*κάρυον*, a nut; *φύλλον*, a leaf].  $C_{10}H_{16}O$  or  $C_{20}H_{32}O_2$ . The neutral crystalline principle of cloves. It occurs in tasteless and odorless silky acicular crystals, soluble in warm alcohol and ether. See *Caryophyllus*.

**Caryophyllus** (*kar'-e-o-fil'-us*) [*κάρυον*, a nut; *φύλλον*, a leaf]. Clove. The unexpanded flowers of *Eugenia caryophyllata*, distinguished by their pungent, spicy taste. Its properties are due to a volatile oil, which is antiseptic, stimulant, and irritant. It also contains a crystalline body, *Eugenin*,  $C_{10}H_{12}O_2$ , and a camphor, *Caryophyllin*,  $C_{10}H_{16}O$ . It is useful as a stomachic, and to prevent griping when combined with purgatives.

**C.**, **Infusum** (B. P.). A strength of 1 to 40 recommended. Dose ʒj-ij. **C.**, **Oil**, contains an acid and a phenol compound. Dose ʒj-iv. It is used also by microscopists to clarify preparations and tissues for mounting.

**Caryoplasm** (*kar'-e-o-plazm*) [*κάρυον*, a nucleus; *πλάσμα*, that which is formed]. The plasm of a cell-nucleus; nuclear plasm.

**Caryopsis** (*kar'-e-op'-sis*) [*κάρυον*, a nut; *ὄψις*, appearance]. In biology, an indehiscent dry fruit, like that of the wheat, in which the single seed is enveloped in the closely-adhering pericarp.

**Casali Green**. See *Conspectus of Pigments*, under *Pigment*.

**Casali's Test**. See *Tests*, *Table of*.

**Casamajor's Test**. See *Tests*, *Table of*.

**Casaubon's Apparatus**. One for charging water with  $CO_2$  by the intermittent method.

**Casca Bark** (*kas'-kah bark*). Sassy Bark; Ordeal Bark. The bark of *Erythrophloeum guineense*, a tree native to Africa, with properties due to an alkaloid. It produces nausea and vomiting. It is valuable in intermittent fevers, and is a more powerful heart-tonic than digitalis. **C.**, **Tinct.**, 25 per cent. in strength. Dose ʒx. Unof. **C.**, **Ext. Aq.** Dose gr. j. **C.**, **Ext. Fld.** Dose ʒj-iv. **Erythrophlein**, the active alkaloid, unof., is locally an anesthetic.

**Cascadœ** (*kas-kad'-e*). See *Tinea imbricata*.

**Cascara** (*kas'-kar-ah*) [*Sp.*, "bark"]. The bark. **C.** **amarga**, Honduras Bark. The bark of a tree native to Mexico, much used as an alterative tonic in syphilis and skin-affections. **C.** **Cordial**, a trade preparation. Dose ʒxv-ʒij. **C.**, **Fld. Ext.** Dose ʒss-ij; of the powdered extract gr. v-x. Unof. **C.** **sagrada**, Chittam Bark, Sacred Bark. The bark of *Rhamnus purshiana*, or California Buckthorn. Its properties are due to a volatile oil. It is useful in the treatment of chronic constipation. All unof. **Casc. sagrad.**, **Ext.** (B. P.). Dose gr. ij-vij. **Casc. sagrad.**, **Ext.** **Liquidum** (B. P.). Dose ʒj-v-ʒj.

**Cascarilla** (*kas-kar-il'-ah*) [Sp., dim. of *casca*, bark]. The bark of *Croton eluteria*, native to the Bahama Islands, an aromatic bitter, increasing the natural secretions of the digestive organs. **C.**, **Infus.** (B. P.). Dose  $\frac{3}{4}$ j-ij. **C.**, **Tinctura** (B. P.). Dose  $\frac{3}{4}$ ss-ij.

**Cascarillin** (*kas-kar-il'-in*) [*cascarilla*, dim. of *casca*, bark],  $C_6H_5O_2$ . The active principle of cascarilla bark: a white, crystalline, bitter substance, scarcely soluble in water.

**Case** (*käs*) [*cadere*, to happen]. A single instance or example of a disease. A covering, or box-like structure. **C.**, **Brain-**, the calvaria. **C.**, **Muscle-**. See *Muscle*. **C.-taking**, the collection of memoranda and notes of an individual case for service in diagnosis or prognosis, or for use in a medico-legal inquiry. **C.**, **Trial-**, in ophthalmology, a case containing various lenses for refracting the eye, etc.

**Caseation** (*ka-ze-a'-shun*) [*caseum*, cheese]. The precipitation of casein during the coagulation of milk. Also a fatty degeneration of pus, tubercle, etc., in which the structure is converted into a soft, cheese-like substance.

**Casein** (*ka'-ze-in*) [*cas-um*, cheese]. A derived albumin, the chief proteid of milk, precipitated by acids and by rennet at 40° C. It is closely allied to alkali-albumin, but contains more nitrogen and a large amount of phosphorus. It constitutes most of the curd of milk. Two varieties of **C.**, **Vegetable**, have been described,—**Legumin**, in peas, beans, etc., and **Conglutin**, in hops and almonds. **C. Saccharid**, a compound of dry casein one part, cane-sugar nine parts, and sodium bicarbonate enough to render it slightly alkaline. It is useful in preparing emulsions, whether of oils, balsams, terpenes, resins, or gum-resins.

**Caseinogen** (*ka-ze-in'-o-jeen*) [*caseum*, cheese; *γεννῶν*, to produce]. A peculiar substance occurring in milk, neither an alkali-albumin nor a globulin, but occupying a distinct position among proteids. When acted upon by a digestive ferment it produces casein, or the curd of milk. Caseinogen is a proteid analogous to fibrinogen, myosinogen, etc.

**Caseose** (*ka'-ze-os*) [*caseum*, cheese]. A product of the gastric digestion of casein.

**Caseous** (*ka'-ze-us*) [*caseum*, cheese]. Having the nature or consistence of cheese.

**Cashew** (*kash-oo'*). The cashew-nut, the product of *Anacardium occidentale*. See *Acajou*.

**Cashoo** (*kash-oo'*). Same as *Catechu*.

**Cassava** (*kas-a'-vah*) [Sp., *casabe*]. The fecula of manioc, *Javipha manihot*, separated from the juice. Unof. See *Tapioca*.

**Cassel Brown**. Same as *Vandyke Brown*. **C. Green**. Same as *Manganese Green*. **C. Yellow**. See *Conspectus of Pigments*, under *Pigment*.

**Cassel's Operation**. See *Operations*, *Table of*.

**Casselmann's Green**. See *Conspectus of Pigments*, under *Pigment*.

**Cassena** (*kas-e'-nah*) [L.]. The *Ilex cassine*, the youpon-tree of the Southern U. S. Its leaves are expectorant, cathartic, emetic, and stimulant. Unof.

**Casser, Ganglion of**. See *Ganglia*, *Table of*. **C.**, **Nerve of**. See *Nerves*, *Table of*.

**Casserian Ganglion**. See *Ganglia*, *Table of*.

**Cassia** (*cash'-e-ah*) [καία, a perfume]. 1. A genus of leguminous plants, several species of which afford *Senna*, *q. v.* 2. An old name, still used commercially, for the coarser varieties of cinnamon. See *Cinnamon*. **C. Bark**, *Cassia lignea*. See *Cinnamon*. **C. Buds**, the immature fruit of Chinese cinnamon; used chiefly as a spice. **C. marilandica**, of N. America, produces the leaves called American senna,

which are less active as a cathartic than the true senna. **C. Oil**, a variety of oil of cinnamon, used in pharmacy and in perfumery. **C.**, **Purging**, is the fruit of a tree, *C. fistula*, growing in tropical regions. The pulp, **C. Pulpa** (B. P.), in  $\frac{3}{4}$ j-ij doses is a mild laxative.

**Cassideus** (*kas-id'-e-us*) [*cassis*, a helmet]. In biology, helmet-shaped.

**Cassimuniar**, or **Cassumunar** (*kas-im-u'-ne-ar*, or *kas-un-u'-nar*). The plant *Zingiber cassumunar* and its aromatic rhizome, formerly used like true ginger; now scarcely known in commerce or in pharmacy. It is tonic and stimulant. Unof.

**Cassius's Purple**. See *Pigments*, *Conspectus of*.

**Cassonade** (*kas-on-ad'*) [Fr.]. A name formerly applied in the French colonies to *Muscovado Sugars*, *q. v.*

**Cast** (*kast*) [ME., *casten*, to throw]. 1. A mass of fibrous or plastic material that has taken the form of some cavity in which it has been moulded. From their source, casts may be classified as bronchial, intestinal, nasal, esophageal, renal, tracheal, urethral, vaginal, etc. Of these, the *renal* casts are the most important, by reason of their significance in diseases of the kidney. Classed according to their constitution, casts are epithelial, fatty, fibrinous, granular, hyaline, mucous, sanguineous, waxy, etc. See *Tube-casts*. 2. To throw off; applied to labor in cattle. 3. Strabismus.

**Castanea** (*kas-ta'-ne-ah*) [L.]. Chestnut. The leaves of *C. vesca*. They contain tannic and gallic acids and other principles whose value is not known. They are used in infusion or decoction as a remedy for whooping-cough. **C.**, **Fld. Ext.** Dose  $\mathfrak{m}$  v-lx.

**Castillon's Powders**. Powders containing sago, salcap, tragacanth, of each 8 parts, prepared oyster-shells, 2, cochineal, 1. They are used in treating diarrhea and dysentery.

**Castling** (*kast'-ing*) [ME., *casten*, to throw]. In dental mechanism, running fused lead, tin, zinc, or brass into a mould made in sand, with a plaster transfer of any portion or the whole of the alveolar border and so many of the teeth as may be remaining in it, and the palatine arch when it becomes necessary to adapt a plate to it.

**Castor** (*kas'-tor*). See *Castoreum*. **C. Bean** and **C. Oil**. See *Ricini*.

**Castoreum** (*kas-to'-re-um*) [κάστωρ, the beaver]. The dried preputial follicles and their secretion, obtained from the beaver, *Castor fiber*. It is a reddish-brown substance with a strong odor. It is antispasmodic and stimulant, its action resembling that of musk. **C.**, **Tinct.** Dose  $\frac{3}{4}$ ss-j. Unof.

**Castoria** (*kas-to'-re-ah*) [κάστωρ, the beaver]. A proprietary medicine recommended as a substitute for castor oil.

**Castorin** (*kas'-tor-in*) [κάστωρ, the beaver]. A crystalline substance obtained from castor.

**Castration** (*kas-tra'-shun*) [*castrare*, to cut]. Orchestomy; the excision of one or both testicles. **C.**, **Female**, removal of the ovaries; oophorectomy; spaying.

**Casts** (*kasts*). See *Cast*, and *Tube-casts*.

**Casual** (*kas'-u-al*) [*casus*, chance]. Fitted or set apart for the treatment of accidental injuries, as a casual ward in a hospital.

**Casualty** (*kas'-u-al-te*) [*casus*, chance]. An accidental injury; a wound, or loss of life, accidentally incurred; an injury in a battle.

**Catabasis** (*kat-ab'-as-is*) [κατάβασις, a descent]. The decline of a disease.

**Catabolergy**, or **Katabolergy** (*kat-ab-ol'-er-je*) [κατά, down; βάλλειν, to throw; ἔργον, work]. Energy expended in katabolic processes.

**Catabolic** (*kat-ab-ol'-ik*) [κατά, down; βάλλειν, to throw]. Of the nature of, or pertaining to, catabolism.

**Catabolism** (*kat-ab'-o-lizm*) [*κατα*, down; *βάλλειν*, to throw]. Destructive metamorphosis; dissimilation; physiologic disintegration; movement toward a catabolic state.

**Catabythismomania** (*kat-ab-ith-iz-mo-ma'-ni-a-h*) [*καταβυθισμός*, submergence; *μανία*, madness]. Insane impulse to suicide by drowning.

**Catabythismus** (*kat-ab-ith-iz-mus*) [*καταβυθισμός*, submergence]. Drowning; especially suicidal drowning.

**Catacathartic** (*kat-a'-th-ar'-tik*) [*κατα*, against; *καθάρσις*, purgation]. 1. Purgative. 2. A medicine or agent that causes purgation.

**Catacausis** (*kat-a'-az'-is*) [*κατά*, down; *καίειν*, to burn]. Spontaneous combustion.

**Cataclasis** (*kat-a'-kl-az'-is*) [*κατα*, down; *κλάειν*, to break]. A fracture.

**Cataclasis** (*kat-a'-kl-az'-is*) [*κατα*, down; *κλάειν*, to break]. A fracture.

**Cataclasis** (*kat-a'-kl-az'-is*) [*κατα*, down; *κλάειν*, to break]. A fracture.

**Catacorolla** (*kat-a'-ko-r'-ah*) [*κατα*, against; *corolla*, a little crown]. In biology, a secondary corolla either within or without the true corolla.

**Catacrotic** (*kat-ak'-rot'-ik*) [*κατα*, down; *κροτός*, a striking]. Interrupting the line of descent in a sphygmogram.

**Catacrotism** (*kat-ak'-rot'-izm*) [*κατα*, down; *κροτός*, a striking]. An interruption or oscillation of the line of descent in a sphygmogram; the quality of being catacrotic or of being marked by oscillation in the sphygmographic line of descent.

**Catadicrotism, or Katadicrotism** (*kat-ad-ik'-rot'-izm*) [*κατα*, down; *δικοτός*, double beating]. The occurrence of a divided or double pulsation in the downward stroke of the sphygmograph.

**Catadidymous** (*kat-ad-id'-im-us*) [*κατά*, down; *δίδυμος*, twin]. Joined into one, as a twin monstrosity, but with a downward cleavage, so that the upper parts are double.

**Catadidymus** (*kat-ad-id'-im-us*) [*κατά*, down; *δίδυμος*, twin]. A catadidymous monstrosity.

**Catadromous** (*kat-ad'-ro-mus*) [*κατά*, down; *δράμειν*, running down]. In biology, applied to such fishes as descend rivers to spawn in the sea, e. g., the eel.

**Catagenesis** (*kat-ij-en'-es-is*) [*κατα*, down; *γίνεσις*, generation]. In biology, the process of creation by retrograde metamorphosis of energy, or by the specialization of energy (Cope).

**Catagma** (*kat-ag'-mah*) [*κατάγμα*, a fracture: *pl.*, *Catagmata*]. A fracture.

**Catagmatic** (*kat-ag-mat'-ik*) [*κατάγμα*, a fracture]. 1. Relating to or serviceable in cases of fracture. 2. A remedy that promotes the union of broken parts.

**Catagoglossum** (*kat-ag-o-glo'-um*) [*κατάγειν*, to draw down; *γlossa*, the tongue]. A tongue depressor.

**Cataleptia** (*kat-al'-p'-ia*) [*κατά*, down; *λαμβάνειν*, to seize]. A peculiar neurosis characterized by loss of will and muscular rigidity, due to a diseased condition of the central nervous system. It occurs in those of the neurasthenic diathesis, and usually between the ages of 20 and 30 years. It is commonly associated with hysteria, but may be found in conjunction with tetanus and the various psychoses. It often forms a part of the hypnotic state. See *Symptomatology*. **C.**, **Local**, that affecting a single organ or group of muscles. **C.**, **Plastic**. See *Cataleptia plastica*.

**Cataleptic** (*kat-al'-ep'-tik*) [*κατά*, down; *λαμβάνειν*, to seize]. Relating to, affected with, or of the nature of, catalepsy.

**Cataleptiform** (*kat-al'-ep'-tif-orm*) [*κατά*, down; *λαμβάνειν*, to seize; *forma*, form]. Resembling catalepsy.

**Catalpa** (*kat-al'-pah*) [native Am. Indian]. A genus of American and Asiatic bignoniaceous trees. **A.** *big-noniodes* and **A.** *speciosa*, of North America, have astringent, anthelmintic, and tonic qualities; the leaves and pods are reputed anodyne, emollient, and antasthmatic. Unof.

**Catalysis** (*kat-al'-is-is*) [*καταλύνειν*, to dissolve]. In chemistry, a reaction that appears to take place owing to the mere presence of another body that apparently undergoes no change.

**Catalytic** (*kat-al-il'-ik*) [*καταλύνειν*, to dissolve]. 1. Of the nature of, or characterized by, catalysis. 2. Any medicine that is supposed to break down, destroy, or counteract morbid agencies existing within the economy. See *Alternative*.

**Catamenia** (*kat-am-el'-ne-ah*) [*κατά*, concerning, according to; *μήν*, month]. The recurrent monthly discharge of blood during sexual life from the genital canal of the female.

**Catamenial** (*kat-am-el'-ne-al*) [*κατά*, concerning; *μήν*, a month]. Pertaining to the catamenia.

**Catantochasmus** (*kat-an-to-kaz'-mus*) [*κάταντα*, downward; *χάσμα*, an expanse]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and a line joining the anterior point of the foramen magnum and the posterior nasal spine is less than 13°.

**Catanotopylus** (*kat-an-top'-il-us*) [*κάταντα*, downward; *πύλη*, an opening]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the anterior and posterior points of the foramen magnum is between one and eight degrees.

**Catanorrhinus** (*kat-an-tor-i'-nus*) [*κάταντα*, downward; *ῥίς*, the nose]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the wing of the vomer and the anterior nasal spine is between 1° and 16.5°.

**Catantostomus** (*kat-an-tos'-to-mus*) [*κάταντα*, downward; *στόμα*, the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and a line joining the premaxillary point and the wing of the vomer is between 9° and 25.5°.

**Catanuraniscus** (*kat-an-tur-an-is'-kus*) [*κάταντα*, downward; *οὐρανίσκος*, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the posterior rim of the incisor foramen and the premaxillary point is between 1° and 20°.

**Catanuranus** (*kat-an-tur'-an-us*) [*κάταντα*, downward; *οὐρανός*, the palate]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the nasal spine is between 1° and 17°.

**Catapasm** (*kat-ap'-azm*) [*κατάπασμα*, powder]. A dry powder to be sprinkled upon the skin or upon a sore.

**Catapetalous** (*kat-ap-el'-al-us*) [*κατά*, against; *πέταλον*, a leaf]. In biology, applied to polypetalous flowers in which the bases of the petals are adherent to the bases of the stamens.

**Cataphasia** (*kat-ap'-a'-ze-ah*) [*κατάφασσις*, assent]. A condition of imperfect consciousness, in which the patient repeatedly utters the same word or words spontaneously, or in reply to a question.

**Cataphora** (*kat-ap'-o-rah*) [*καταφορά*, a fall]. Lethargy; imperfect or restless coma, with intervals of coma-vigil.

**Cataphoresis** (*kat-af-or-e'-sis*) [*καταφέρειν*, to bring down]. The introduction of drugs into the system through the skin, by means of ointments or solutions applied by the electrode of a battery.

**Cataphoric** (*kat-af-or'-ik*) [*κατά*, down; *φορῆν*, to carry]. Passing, or causing a passage, from the anode to the kathode, through a diaphragm or septum.

**Cataphract** (*kat'-af-rakt*) [*καταφράκτης*, a coat of mail]. In biology, the protective armor-plates or scales of some animals.

**Cataphracted** (*kat'-af-rak-ted*) [*καταφρακτός*, mailed]. In biology, protected by an armor of thick skin, heavy plates or scales.

**Cataphyllum** (*kat-af-il'-um*) [*κατά*, down; *ὄνυλον*, a leaf]. In biology, a rudimentary scale-like leaf, as a cotyledon or bud-scale.

**Cataplasis** (*kat-ap'-las-is*) [*κατά*, down; *πλάσις*, formation]. The stage of decline in the individual life.

**Cataplasm** (*kat'-ap-lazm*) [*κατάπλασμα*, a poultice]. See *Poultice*. **C.**, **Emollient**. See *Species emollientes*.

**Cataplasma** (*kat-ap-laz'-mah*) [L.]. A cataplasm.

**C. fermenti** (B.P.), beer yeast, wheaten flour, water at 100° F. A stimulant and antiseptic for indolent ulcers.

**Cataplectic** (*kat-ap-lek'-tik*) [*κατάπληκτις*, a striking down]. Fulminant; sudden and overwhelming.

**Cataplexis** (*kat-ap-leks'-is*) [*κατάπληξις*, a striking down]. 1. A sudden and overwhelming shock or attack of disease; prostration by the onset of disease, or by shock. 2. Hypnotic sleep.

**Cataptonsis** (*kat-ap-to'-sis*) [*κατά*, down; *πτῶσις*, a falling]. Apoplexy; epilepsy; paralysis; ptosis.

**Cataract** (*kat'-ar-akt*) [*καταράκτης*, a falling down or over, as of something over the vision]. Diminished transparency or an opacity of the crystalline lens, or of its capsule. **C.**, **Artificial Maturation of**, *Förster's Method* consists in friction of the cornea against the lens by pressure upon the cornea. *Beltmann's Method* consists in "direct trituration" of the lens with a spatula introduced into the anterior chamber. Both methods are preceded by an iridectomy. **C.**, **Black**, the lens is pigmented, and of a dark-brown color. **C.**, **Capsular**, consists in non-transparent deposits on the inner surface of the capsule. **C.**, **Cor-tical**, opacification of the outer layers of the lens. **C.**, **Diabetic**, is associated with diabetes. **C.**, **Discis-sion of**, an operation preliminary to absorption, or ex-traction by suction, consisting in rupturing the capsule, so that the aqueous humor gains access to the lens. **C.**, **Extraction of**, removal of the cataractous lens by surgical operation. See *Extraction of C.* **C.**, **Fluid**, *C.*, *Lacetal*, the breaking up of an opaque lens into a milky fluid. **C.**, **Green**, a name given to a grayish-green reflex seen in glaucoma; it is also seen when the pupil is dilated and at the same time the media are not completely transparent. **C.**, **Immature**, or **Unripe**, only a part of the lens-substance is cataractous. **C.**, **Lacteal**. See *C.*, *Fluid*. **C.**, **Lamellar**, or **Zonular**; certain layers between the cortex and nucleus are opaque, the remaining layers being transparent. **C.**, **Mature**, or **C.**, **Ripe**, the whole lens-substance is cataractous. **C.**, **Morgagnian**, when a *hypermature* or *overripe C.* shrinks and leaves a nucleus floating in the dissolved outer layers. **C.**, **Naphthalinic**, an opacity of the lens of a rabbit following the administration of naphthalin. **C.**, **Polar** (anterior or posterior), the opacity is confined to one pole of the lens. **C.**-**pricker**. See *Cataract-pricking*. **C.**-**pricking**, a name given to the old method of artificial luxation of the lens in cases of cataract. A needle was passed into the sclera on the outer margin of the cornea and into the lens, which was then depressed into the vitreous. Those

who performed this operation were called *cataract-prickers*. **C.**, **Pyramidal**, the opacity is at the anterior pole and is conoid, the apex extending forward. **C.**, **Recurrent Capsular**, or **Secondary**, capsular cataract, appearing after the extraction of the lens. **C.**, **Senile**, the cataract of old persons, the most frequent form, and that understood when not specified as *congenital*, *juvenile*, *traumatic*, *soft*, etc. **C.**, **Soft**, is especially that of the young; the lens matter is of soft consistency and milky appearance.

**Cataractia** (*kat-ar-ak'-tah*). See *Cataract*. **C. secun-daria**. See *After-cataract*.

**Cataractous** (*kat-ar-ak'-tus*) [*καταράκτης*, a falling down or over]. Of the nature of or affected with cataract.

**Catarrh** (*kat-ar'*) [*καταρρέειν*, to flow down]. Inflam-mation of a mucous membrane, especially of the respiratory tract, but also applied to the bladder, etc. Its main symptoms are redness and swelling of the affected membrane with a more or less profuse mucous discharge. **C.**, **Epidemic**. See *Influenza*. **C.**, **Gastric**, gastritis, acute or chronic. **C.**, **Intes-tinal**, enteritis, acute or chronic. **C.**, **Nasal**, coryza, *q. v.* See also *Rhinitis*. **C.**, **Pulmonary**, bronchitis, acute or chronic. **C.**, **Suffocative**. Synonym of *Capillary Bronchitis*, *q. v.* See also *Suffocative Catarrh*. **C.**, **Uterine**, endometritis. **C.**, **Venereal**. Synonym of *Gonorrhea*. **C.**, **Vesical**, cystitis.

**Catarrhal** (*kat-ar'-al*) [*καταρρέειν*, to flow down]. Of the nature of, affected with, or relating to catarrh. **C. Fever**. Synonym of *Influenza*.

**Catarrhus** (*kat-ar'-us*). See *Catarrh*. **C. genitalium**. Synonym of *Leucorrhea*.

**Cataschasm** (*kat'-as-kazm*) [*κατά*, down; *σχάσμος*, a cutting]. Deep or thorough scarification.

**Catastaltic** (*kat-as-tal'-tik*) [*καταστέλλειν*, to check, to send downward]. 1. Astringent. 2. Passing from above downward (as a nerve-impulse).

**Catastasis** (*kat-as'-tas-is*) [*κατάστασις*, a settling]. Con-dition, state, habit; a decline, or quieting of symp-toms; restitution, as of a displaced part.

**Catastate** (*kat'-as-tat*) [*καταστατός*, settling down]. Any one of a series of successive catabolic states, sub-stances, or conditions, each one of which is less com-plex, more stable, and exhibits less functional activity than its predecessor.

**Catastatic** (*kat-as-tat'-ik*) [*κατάστασις*, a settling down]. Relating to a catastasis, or to a catastate.

**Catatonía, or Katatonía** (*kat-at-o'-ne-ah*) [*κατά*, down; *τόνος*, tension]. A form of mental derangement pro-gressing from melancholia successively through mania and stupidity to imbecility and tonic convulsions.

**Catatoniac** (*kat-at-o'-ne-ah*) [*κατα*, down; *τόνος*, ten-sion]. One who is the subject of catatonía.

**Catatoný** (*kat-at'-o-ne*). See *Catatonía*.

**Catechin** (*kat'-e-chin*) [*catechu*],  $C_{21}H_{20}O_9 + 5H_2O$ . Catechinic acid, the active principle of catechu. It crystallizes in shining needles of a snow-white, silky appearance.

**Catechol** (*kat'-e-chol*). See *Pyrocatechin*.

**Catechu** (*kat'-e-choo*) [E. Ind.]. An extract prepared from the wood of *Acacia catechu*, a native of the East Indies. It contains 50 per cent. of tannic acid, and hence is a powerful astringent. It is used for the diarrhea of children and as a gargle and mouth-wash. Dose of the powdered extract gr. j- $\overline{5}$ ss. See also *Pigments*, *Conspectus of*. **C.**, **Infusum** (B. P.). Dose  $\overline{3}$ j-iss. **C.**, **Pulv. Comp.** (B. P.). Contains catechu, kino, and rhatany. Dose gr. xx-xl. **C.**, **Tinct.** *Composita*, contains catechu 10, cassia cinnamon 5, dilute alcohol q. s. Dose  $\overline{m}$ x- $\overline{5}$ j. **C.**, **Trochisci**, each contains one grain of catechu with sugar, traga-canth, and orange flower water.

**Catelectrotonus** (*kath'-el'-e'-trō-nus*) [*κατα*, down; *ἡλεκτρον*, amber; *τῆσις*, tension]. The state of increased irritability of a nerve near the cathode. See *Amputation*.

**Catenulate** (*cat-nu-ate*) [*catenua*, a small chain]. In biology, having a chain-like arrangement.

**Catgut** (*kat'-gut*). The intestines of a sheep treated to make ligatures. **C.**, **Carbolized**, catgut rendered aseptic by soaking in a solution of carbolic acid. **C.**, **Chromicized**, treated with chromic acid. **C. Mat.**, an appliance used in intestinal anastomosis for the purpose of approximating the edges of the severed intestines. **C. Plate**, an appliance for uniting the intestinal edges in intestinal anastomosis. It is made of a solid catgut sheet; is thin, large, and flat, and resembles the Sem decalcified bone plates.

**Catha** (*kat'-hab*) [*Ar. catha*]. A genus of eclatraceous plants. **C. edulis** affords leaves and twigs which the Arabs use as a substitute for tea and coffee.

**Catharma** (*kat'-er'-ma*) [*καθάρμα*, refuse; *pl.*, *Catharmata*]. That which is removed by purgation; excrement.

**Catharsis** (*kath'-ar'-sis*) [*καθαρεύω*, to purge]. Purgation.

**Cathartic** (*kath'-ar'-tik*) [*καθαρτικός*, purging]. 1. Purgative. 2. A medicine used to produce evacuations of the bowels. A purgative. **C. Acid**. See *Senna*. **C. Pill, Compound**. See *Colocynth*.

**Cathelectrotonus**. See *Catelectrotonus*.

**Cathæresis** or **Cathæresis** (*kath'-er'-e'-sis*) [*καθαρεύω*, to cut down]. 1. Prostration or weakness induced by medication. 2. Caustic action; it often designates a feebly caustic action.

**Catheretic** (*kath'-er'-et-ik*) [*καθαρεύω*, to reduce]. 1. Reducing; weakening; prostrating. 2. Caustic. 3. A reducing or caustic agent.

**Catheter** (*kath'-et-er*) [*καθετήρ*, a thing put down]. A tube-like instrument for evacuating the liquid of a cavity, usually the bladder. **C.**, **Bozeman's**, a double-current uterine catheter. **C.**, **Eustachian**, an instru-

rubber and of varying caliber, somewhat triangular on section, used for the dilatation of laryngeal strictures. **C.**, **Self-retaining**, one that will hold itself within the bladder without other appliances to assist it. **Catheterism**, or **Catheterization** (*kath'-et-er-izm*, or *kath'-et-er-iz-a'-shun*) [*καθετήρ*, a thing put down]. The use or passing of a catheter.

**Catheterize** (*kath'-et-er-iz*) [*καθετήρ*, a thing put down]. To operate upon with a catheter.

**Cathetometer** (*kath'-et-om'-et-er*) [*κάθετος*, a plumb-line; *μετρον*, a measure]. An instrument of precision used in craniometry for determining the length, breadth, height, and possible abnormality of the skull.

**Cathetometric** (*kath'-et-o-met'-rik*) [*κάθετος*, a plumb-line; *μετρον*, a measure]. Relating to the cathetometer.

**Cathetometry** (*kath'-et-om'-et-er*) [*κάθετος*, a plumb-line; *μετρον*, a measure]. The measurement of the skull by the cathetometer.

**Cathodal** (*kath'-o-dal*) [*κατά*, down; *ὁδός*, way]. Relating to a cathode.

**Cathode** (*kath'-od*) [*κατά*, down; *ὁδός*, way]. The negative electrode or pole of an electric circuit.

**Cathodic** (*kath'-od'-ik*) [*κατά*, down; *ὁδός*, way]. 1. Relating to a cathode. 2. Proceeding downward; efferent or centrifugal (applied to a nerve-current or nerve-impulse).

**Catholicon** (*kath'-ol'-ik-on*) [*καθολικόν*, universal]. A universal remedy; a cure-all.

**Cation** (*kat'-e-on*) [*κατά*, downward; *ἵεναι*, to go]. An electro-positive element; one that accumulates at the cathode in electrolysis. See *Ion*.

**Catkin** (*kat'-kin*) [*Ger., Kätzchen*, dim. of cat]. In biology, the indeterminate deciduous, scaly spike of unisexual sessile flowers, forming the inflorescence of many trees, e.g., the willow and birch. Cf. *Ament*.

**Catling**, or **Catlin** (*kat'-ling*, or *kat'-lin*). A long, pointed, two-edged knife for amputating.

**Catnep**, or **Catnip** (*kat'-nep*, or *nip*) [corruption of catmint]. The leaves and tops of the herb *Nepeta cataria*, a stimulant and tonic; a popular remedy for chlorosis, hysteria, etc. Dose of fld. ext. ʒj-ij. Unof.

**Catocathartic** (*kat-o-kath-ar'-tik*). See *Catocathartic*.

**Catoche** (*kat'-o-ke*) [*κατοχή*, catalepsy]. Catochus.

**Catochus** (*kat'-o-kus*) [*κατοχος*, a holding down]. 1. Catalepsy; coma-vigil. 2. Apparent death; trance.

**Catodont** (*kat'-o-dont*) [*κάτω*, down; *ὀδόν*, tooth]. Possessing teeth only in the lower jaw.

**Catoptric Test**, the diagnosis of cataract by means of the reflection of images from the cornea and lens-capsules.

**Catoptrics** (*kat-op'-triks*) [*κατοπτρικός*, in a mirror]. The laws of the reflection of light.

**Catorhinus** (*kat-o-rin'-us*) [*κάτω*, below; *ῥίς*, the nose]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the wing of the nose and the anterior nasal spine is between 16.5° and 33°.

**Catostomus** (*kat-os'-to-mus*) [*κάτω*, below; *στόμα*, the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the wing of the vomer is between 25.5° and 42.5°.

**Catoteric** (*kat-o-ter'-ik*) [*κατωτερικός*, a carrying downward]. A purgative or cathartic.

**Catotica** (*kat'-ol'-ik-ah*) [*κατωτερικός*, a carrying downward]. Medicines or diseases that affect the internal surfaces of the body.

**Catotretous** (*kat'-ol'-ret-us*) [*κατά*, down; *πρητός*, perforate]. In biology, having the oral and anal apertures on the ventral surface. **C.**, **Amaraosis**, a condition noted in suppurative choroiditis in which the

THE SIZE OF CATHETERS.

The upper number indicates that of the American system; the lower that of the French.

ment for examining the F. tube, distending or making apertures in it. **C. Fever**, systemic disturbance, with fever, following the introduction of the catheter into the urethra. **C.**, **Gouley's**, a solid curved-steel instrument grooved on its inferior aspect, for passing over a guide through a stricture into the bladder. **C.**, **Lung**, a soft rubber tube that may be passed down the trachea. **C.**, **Schrötter's**, instruments of hard

- exudate is visible at a distance as a vivid whitish or yellowish reflex from the pupil. **C. Pupil.** See *Pupil*.
- Catouraniscus** (*kat-o-ür-an-is'-kus*) [*κάτω*, below; *οὐρανίσκος*, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the center of the posterior margin of the incisor foramen and the premaxillary point is between 20° and 40°.
- Catouranus** (*kat-o-ür'-an-us*) [*κάτω*, below; *οὐρανός*, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the posterior nasal spine is between 17° and 34°.
- Cattarrhine** (*kat'-ar-in*) [*κατά*, down; *ῥίς*, the nose]. In biology, of or pertaining to those monkeys and apes that have approximated nostrils, directed downward and separated by a narrow septum.
- Cattimandu** (*kat-im-an'-doo*) [E. Ind.]. An E. Indian tree, *Euphorbia cattimandoo*; also its medicinal gum. It is used as a cement and as a remedy for rheumatism. When fresh it is an active vesicant. Unof.
- Cattle-Plague** (*kat'-l plag*). See *Rinderpest*.
- Caucasian Idiocy** (*kaw-kaz'-yan id'-e-o-se*). See *Idiocy*, *Ethnic*.
- Cauda** (*kaw'-dah*) [L.]. A tail-shaped appendage. The tail-like part of the caudatum. **C. cerebelli**, the vermiform process. **C. epididymidis**, the inferior part of the epididymis. **C. equina**, the terminal extremity of the spinal cord, in conjunction with the roots of the sacral nerves. **C. pancreatis**, the slender left extension of the pancreas.
- Caudal** (*kaw'-dad*) [*cauda*, the tail; *ad*, to]. Toward the tail or cauda; opposed to *cephalad*; in man, downward.
- Caudal** (*kaw'-dal*) [*cauda*, the tail]. Pertaining to a cauda, or tail. The term *Ural* has been proposed to take the place of caudal.
- Caudalis** (*kaw-da'-lis*) [*cauda*, a tail]. In biology, applied as the specific name of fins or other organs near the tail.
- Caudate** (*kaw'-dat*) [*cauda*, a tail]. Having or resembling a tail. **C. Lobe of Liver**, a small elevation of the liver. **C. Nucleus**, the intra-ventricular portion of the corpus striatum. See also *Caudatum*.
- Caudatum** (*kaw-da'-tum*) [*cauda*, a tail]. A ganglion or free ring of gray matter circling round the lenticularis of the brain. It is massive in the frontal portion, but becomes attenuated caudad; the anterior portion is called the head, the posterior the tail.
- Caudex** (*kaw'-deks*) [*caudex*, a tree-stem]. In biology, applied to the scaly, unbranching trunk of a palm tree or tree fern.
- Caudicle** (*kaw'-dik-l*) [*caudex*, the stem of a tree]. In biology, a little stalk, as that of the pollen-masses in orchideous plants.
- Caudiduct** (*kaw'-de-duk-t*) [*cauda*, tail; *ducere*, to draw]. In biology, to draw or carry backward toward the tail.
- Cauditrunk** (*kaw'-de-trunk*) [*cauda*, tail; *truncus*, trunk]. In biology, that part of the body behind the head of fishes and fish-like mammals.
- Caudle** (*kaw'-dl*) [ME., *caudel*, a warm drink]. A nutritious food for invalids. It is made as follows: Beat up an egg to a froth; add a glass of sherry and half a pint of gruel. Flavor with lemon-peel, nutmeg, and sugar.
- Caudula** (*kaw'-du-lah*) [*cauda*, a tail]. In biology, a marginal tail-like process.
- Caul** (*kaw-l*) [ME., *calle*, a hood]. 1. A portion or all of the fetal membranes covering the head and carried out in advance of it in labor. 2. The great omentum.
- Caulescent** (*kaw-les'-ent*) [*caulis*, a stalk]. In biology, applied to plants having a distinct leaf-bearing stem.
- Caulicle** (*kaw'-lik-l*) [*caulis*, a stalk]. In biology, that portion of the stem of an embryo plant that is below the cotyledons and above the radicle.
- Cauliflower Excrescence** (*kaw-le-flo'-er eks-kres'-ens*). Epithelioma of the cervix uteri. See also *Verruca acuminata*.
- Cauliform** (*kaw'-lif-orm*) [*caulis*, a stalk; *forma*, shape]. In biology, resembling a stem.
- Cauligenous** (*kaw-lif'-en-us*) [*caulis*, a stalk; *genus*, producing]. Borne upon the stem.
- Cauline** (*kaw'-lin*) [*καυτός*, a stalk]. In biology, of or pertaining to the stem.
- Caulis** (*kaw'-lis*) [*καυτός*, a stalk]. In biology, a plant-stem.
- Caulocarpous** (*kaw-lo-kar'-pus*) [*καυτός*, a stem; *καρπός*, fruit]. In biology, applied to plants that bear fruit from year to year upon the same stem.
- Caulome** (*kaw'-lom*) [*καυτός*, a stem]. In biology, a general term for all kinds of stems.
- Caulophyllin** (*kaw-lo-fil'-in*) [*καυτός*, a stalk; *φύλλον*, a leaf]. A resinoid precipitate from the tincture of caulophyllum. See *Caulophyllum*.
- Caulophyllum** (*kaw-lo-fil'-um*) [*καυτός*, stalk; *φύλλον*, leaf]. Blue Cohosh, "Squaw-root;" the rhizome and rootlets of *C. thalictroides*, growing in Canada and the northern U. S. It contains a glucosid, *Saponin*, and two resins, one of which is *Caulophyllin*. It produces intermittent contractions of the gravid uterus, and possesses diuretic, emmenagogue, and antispasmodic powers. There are no official preparations. Dose of the powdered drug gr. v-xx; of Caulophyllin, gr. ij-v.
- Cauma** (*kaw'-mah*) [*καίμα*, a burning; *pl.*, *Caumata*]. Fever; heat; pyresis; an inflammatory fever; a burn. **C. enteritis**. Synonym of *Intestinal Catarrh*, *Acute*.
- Caumatic** (*kaw-mat'-ik*) [*καίμα*, a burning]. Pertaining to cauma.
- Causalgia** (*kaw-sal'-je-ah*) [*καυσός*, a burning; *ἄλγος*, pain]. Neuralgia with burning pain, often of the foot; sometimes with a local glossiness of the skin due to impairment of the normal nerve-stimulus of the part.
- Causation** (*kawz-a'-shun*). See *Etiology*.
- Cause** (*kawz*) [*causa*, a cause]. The sources, conditions and origins of a result. The preceding factors that unite to produce a given condition. Causes are spoken of as efficient, instrumental, final, primary, secondary, predisposing, controlling, determining, ultimate, exciting, etc. **C. Causans**, the causing cause or the essential predetermining factor. **C. Exciting**, the immediately preceding and conditioning factor. **C. Predisposing**, that which tends to the development of a condition.
- Causoma** (*kaw-so'-mah*) [*καίσσω*; *καίειν*, to burn; *pl.*, *Causomata*]. A burning; usually an inflammation.
- Caustic** [*kaws'-tik*] [*καίειν*, to burn]. A substance that disorganizes or destroys living tissue; it is mostly used in surgery to destroy unhealthy growths. **C. Alkali**, a pure alkaline hydrate or oxid. **C. Common**, potassa fusa or potassa cum calce. **C. Dubois's**, arsenious acid 1, mercuric sulphite 16, dragon's blood 8 parts. **C.-holder**, a porte-caustic. **C. Lunar**, argentic nitrate, or nitrate of silver. **C. Mitigated**, argentic nitrate made less active by fusion with potassium nitrate or argentic chlorid. **C. Potash**, potassium hydrate. See *Potassium*. **C. Soda**, sodium hydrate.
- Causticity** (*kaws-tis'-it-e*) [*καίειν*, to burn]. Caustic quality; corrosiveness.

**Causticum** (*kawst' tik um*). See *Causti*.

**Cauter** (*kawt'-ter*) [*kawt'*, a burner]. A searing iron or cautery-iron; any caustic application.

**Cauterant** (*kawt'-ter-ant*) [*kawt'*, a burner]. 1. Caustic; escharotic. 2. Any caustic substance; a caustic.

**Cauterism** (*kawt'-ter-izm*). See *Cauterization*.

**Cauterization** (*kawt'-ter-iz'-shun*) [*kawt'-ter-iz-shun*, to cauterize]. The surgical application of a cautery; the effect of such application.

**Cauterize** (*kawt'-ter-iz*) [*kawt'-ter-iz-shun*, to cauterize]. To sear or burn with a cautery or a caustic.

**Cautery** (*kawt'-ter-ee*) [*kawt'-ter-ee*; *kawt'*, to burn]. Primarily, the term was applied to caustics, but more frequently now to the platinum-wire heated by an electric current, or the hot iron, for counter-irritation, removal of tissue, etc. **C.**, **Actual**, the white-hot iron. **C.**, **Button**, iron heated in hot water. **C.**, **Corrigan's**. See *Button*. **C.**, **Dento-Electric**, consists of a looped wire, held by set-screws, in contact with metal conductors that pass through a hard-rubber handle. The battery wires are coupled to two terminals. This appliance is held in the hand like a pencil in writing, and the current is closed by pressing a spring with the forefinger, when the resistance of the loop of wire causes it to become heated. It is employed for obliterating sensitive dentine. **C.**, **Galvanic**, a platinum wire heated by electricity. **C.**, **Gas**, cauterization by a stream of burning gas directed upon the part. **C.**, **Paquelin's**, or **C.**, **Thermo**-, a hollow platinum point kept at a uniform temperature by a current of benzene vapor. **C.**, **Potential**, or **C.**, **Virtual**, the application of caustic substances.

**Cava** (*kawt'-zah*) [*L.*; *pl.*, *Cavæ*]. A vena cava.

**Caval** (*kawt'-al*) [*cava*, a hollow]. Relating to a vena cava.

**Cavalry Bone** (*kawt'-al-ree bôn*). A bony deposit in the adductor muscles of the thigh.

**Cavernoma** (*kaw-ern-ô'-ma*) [*caverna*, a cavern; *ôma*, a tumor]. A cavernous tumor; a cavernous angioma.

**Cavernous** (*kaw-ern-us*) [*caverna*, a cave]. Having cave-like spaces or hollow places. **C.**, **Bodies**, the corpora cavernosa of the penis. **C.**, **Breathing**, the reverberating or hollow sound of bronchial breathing in dilated or abnormal bronchi. **C.**, **Groove**, the carpal groove. **C.**, **Plexus**. See *Plexus*. **C.**, **Râle**. See *C. Breathing*. **C.**, **Sinus**, situated at the side of the body of the sphenoid. **C.**, **Tissue**, erectile tissue. **C.**, **Tumor**. See *Angioma*. **C.**, **Whisper**, whispering resonance in auscultation, modified by transmission through a cavity. **C.**, **Voice**. See *Pectoriloquy*.

**Cavernula Tentacularis**. In biology, a subumbral tentacle funnel, surrounding the base of each tentacle in many *Cnidaria* and *Peromedusa*.

**Cavernulæ Subumbræles**. In biology, niches of the subumbral cavity in *Medusa*.

**Caviar**, or **Caviare** (*kaw-ee-ah*) [*Fr.*]. The salted hard roe of the sturgeon and other large fish.

**Cavicorn** (*kawt'-ik-orn*) [*corn*, hollow; *cornu*, horn]. In biology, having hollow horns; or a hollow horned ruminant.

**Cavitary** (*kawt'-ah-ree*) [*cavarius*, hollow]. Hollow; applied to any nematode worm; any intestinal worm that has a body cavity; a worm that is not anecenterous.

**Cavitas** (*kawt'-ee-tas*) [*L.*]. A hollow. **C.**, **cochleata**. See *Pulchellus*. **C.**, **pulpæ**, the pulp-cavity of a tooth. See *Dental Cavity*.

**Cavity** (*kawt'-ee-tee*) [*cavus*, from *areo*, hollow]. Any hollow, normal or pathologic. Among the normal cavities are the abdominal, rachnoid, axial, buccal, cranial, frontal, nasal, pelvic, plural, thoracic, ventricular, etc.; among the abnormal are pulmonary and dental cavities. **C.**, **plate**, a term applied in mechan-

ical dentistry to a metallic base for artificial teeth, so constructed as to have one or more vacant spaces between it and the gums, which, when applied, and the air exhausted, contributes very greatly to the firmness of its adhesion. **C.**, **Preperitoneal**, a name given by Retzius to the loose and yielding subperitoneal tissue in front of the bladder, under the supposition that it could be inflated. It is not a true cavity, but merely a succession of areolar spaces. **C.**, **Sigmoid**. See *Sigmoid*.

**Cavo-valgus** (*kawt'-vo-valt'-gus*) [*cavus*, hollow; *valgus*, bow-legged]. Cavus combined with valgus. See *Club-foot*.

**Cavum** (*kawt'-vum*) [*L.*]. Any hollow or cavity, normal or pathologic. **C.**, **dentis**. See *Dental Cavity*.

**Cavus** (*kawt'-vus*) [*L.*]. 1. A hollow; a cavity. 2. Talipes arcuatus; hollow-foot.

**Cayenne Pepper** (*ki'-en pep'-er*). See *Capsicum*.

**Cazenave's Lupus**. See *Diseases*, *Table of*. **C.**, **Solution**. An animal parasiticide used in dermatology. It consists of iodid of sulphur, iodid of potassium, of each 1½ drams, water 32 ounces.

**Cazeneuve's Test**. See *Tests*, *Table of*.

**Ceanothus** (*se-an-ô'-thus*) [*κράνωθος*, a kind of thistle]. A genus of rhamnaceous shrubs, chiefly N. American. *C. americanus*, New Jersey tea, red root, is used in domestic medicine as an astringent and alterative; its leaves are substituted for tea. Unof.

**Ceasma** (*se-as'-mah*) [*κλάσμα*, a chip; *pl.*, *Ceasmata*]. A splinter; a fissured state.

**Ceasmic** (*se-as'-mik*) [*κλάσμα*, a chip]. Fissured; remaining in the primitive fissured state of the embryo. See *Teratism*.

**Cebadilla** (*thev-ad-ill'-yah*) [*Sp.*, "little barley"]. The seed of *Asagraea officinalis*, or *Schanocaulon officinale*; official in the B. P., and important as the principal source of the alkaloid veratrin. It is highly poisonous.

**Cebocephalia** (*se-bo-sef-a'-le-ah*) [*κεφαλος*, a kind of monkey; *κεφαλή*, the head]. The condition of being cebocephalic.

**Cebocephalic** (*se-bo-sef-a'-lik*) [*κεφαλος*, a kind of monkey; *κεφαλή*, the head]. Of the nature or appearance of a cebocephalus.

**Cebocephalus** (*se-bo-sef-a'-lus*) [*κεφαλος*, a monkey; *κεφαλή*, head]. A variety of single autostotic monsters of the species cyclocephalus, in which there is entire absence of the nose, with, however, two orbital cavities and two eyes, although the interocular region is narrow and perfectly flat.

**Cecal** (*se'-kal*) [*cæcum*, blind]. Relating to or of the nature of the cecum; cæcal.

**Cecitas** (*se'-sit-as*) [*L.*]. Blindness.

**Cecitis** (*se'-sit-tis*) [*cæcum*, the cecum; *itis*, inflammation]. Inflammation of the cecum; typhlitis, *q. v.*

**Cecity** (*se'-sit-ee*) [*cæcus*, blind]. Blindness.

**Cecograph** (*se'-ko-graf*) [*cæcus*, blind; *γράφειν*, to write]. A writing-machine for the use of the blind.

**Cecum** (*se'-kum*) [*cæcus*, blind]. The large blind pouch or cul-de-sac in which the large intestine begins.

**Cecuteny** (*se-kul'-shen-se*) [*cæcutire*, to become blind]. Tendency to, or the commencement of, blindness.

**Cedar** (*se'-dar*) [*Cedrus*, cedar]. One of the genus of coniferous trees, *Cedrus*. **C.**, **apple**, an excrescence or gall produced upon the red cedar, *Juniperus virginiana*, by the fungus called *Gymnosporangium macrosporus*. Cedar-galls are popularly esteemed as an anthelmintic. Dose gr. viij-xvii, in powder. Unof. **C.**, **Gum**, the fragrant resin of *Callitris arborea*, a coniferous South African tree. It is used in making plasters. Unof. **C.**, **wood Oil**. See *Calcedra*.

**Cedrela** (*sed'-re-lah*) [κεδρελάτη, a cedar-fir tree]. A genus of trees found in tropical regions and allied to mahogany. **C. febrifuga**, of Southern Asia; **C. odorata**, bastard cedar, of tropical America (see *Cailcedra*); **C. rosmarinus**, of Indo-China, and **C. toona**, of India, are among the species that afford active medicines. All unof.

**Cedrene** (*se'-dren*) [*cedrus*, cedar],  $C_{15}H_{24}$ . A volatile liquid hydrocarbon found in oil of red cedar (see *Juniperus virginiana*), oil of cloves and oil of cubeb. **C. Camphor**,  $C_{15}H_{26}O$ , a camphor that separates from the oil of red cedar.

**Cedrin** (*se'-drin*) [*cedrus*, cedar]. A bitter crystalline substance obtained from cedron.

**Cedriret** (*sed'-re-ret*). See *Caroulignone*.

**Cedron** (*se'-dron*) [*cedrus*, cedar]. The seeds of *C. simaba*, a popular external remedy in tropical America for the bites of venomous insects and serpents, and of reputed value in malarial fevers. Dose of the fld. ext.  $\frac{1}{2}$  j-viii.

**Ceke** (*thek'-e*). A Feejee term for elephantiasis of the scrotum.

**Celandini** (*sel'-an-din*). See *Chelidonium*.

**Celastrus** (*sel-us'-trus*) [κίλαστρος, an evergreen tree]. A genus of trees and shrubs, nearly allied to *Eunymus*. Many of the species are medicinal, and some are poisonous. **C. scandens**, the climbing staff-tree of North America, is cathartic, diuretic, and alterative; it is called waxwork, bitter-sweet, and fever-twig.

**Celation** (*sel-a'-shun*) [*celatio*, a hiding]. The concealment of illness, of a birth, or of pregnancy.

**Cele** (*se'-le*) [κοίλος, hollow]. An encephalic cavity; used instead of ventricle.

**-cele** (*sel')* [κίλη, a tumor]. A suffix denoting a tumor.

**Celelminth** (*se'-lel-minth*) [κοίλος, hollow; ἔλμινξ, worm]. A parasitic worm with a digestive canal or cavity; a cavitary worm.

**Celery** (*sel'-er-e*) [σέλινον, a kind of parsley]. The stalk of *Apium graveolens*, or common garden celery. It contains *Apiol*, *q. v.* It is reputed to be antispasmodic and nervine. Dose indefinite. **C. Seed**, used to cover the taste of other drugs. Unof.

**Celia** (*se'-le-ah*) [κοιλία, the belly]. 1. The belly: the stomach. 2. Any ventricle, or normal cavity of the brain.

**Celiac** (*se'-le-ak*) [*celiacus*; κοιλία, belly]. Abdominal. Pertaining to the belly. **C. Affection**, a chronic intestinal disorder most commonly met with in children between the ages of one and five, characterized by the occurrence of pale, loose stools, not unlike gruel or oatmeal-porridge; they are bulky, not watery, yeasty, frothy, and extremely offensive, and are accompanied by anemia and debility without much emaciation. The exhaustion may be aggravated by intercurrent attacks of watery diarrhea, and death may supervene. It is also called *Diarrhæa alba* or *Diarrhæa chylusa*. It is due probably to a temporary suspension of the pancreatic function. **C. Artery**. Same as *C. Axis*. See *Arteries*, *Table of*. **C. Axis**, a branch of the abdominal aorta; it divides into the gastric, hepatic, and splenic arteries. See *Arteries*, *Table of*. **C. Ganglion**. See *Ganglion*, *Semilunar*. **C. Passion**, painful diarrhea, or dysentery. **C. Plexus**. See *Plexuses*, *Table of*.

**Celiaca** (*se-li'-ak-ah*) [κοιλία, the abdomen]. Diseases of the abdominal organs.

**Celiadelphus** (*se-le-ad-el'-fus*) [κοιλία, belly; ἀδελφός, brother]. A monstrosity having two bodies joined at the abdomen.

**Celiagra** (*se-le-a'-grah*) [κοιλία, belly; ἄγρα, seizure]. Abdominal gout.

**Celialgia** (*se-le-al'-je-ah*) [κοιλία, belly; ἄλγος, pain]. Pain in the abdomen.

**Celian**, **Celine** (*se'-le-an*, *se'-lin*). Same as *Celiac*.

**Celiocyesis** (*se-le-o-si'-el'-sis*) [κοιλία, belly; κυσις, pregnancy]. Abdominal extra-uterine gestation.

**Celiolymph** (*se'-le-o-limf*) [κοιλία, a cavity; λympha, water]. The cerebro-spinal fluid.

**Celiomyalgia** (*se-le-o-mi-al'-je-ah*) [κοιλία, belly; μυς, muscle; ἄλγος, pain]. Pain in the abdominal muscles.

**Celioncus** (*se-le-onc'-kus*) [κοιλία, the belly; ὄγκος, a swelling]. A tumor of the abdomen.

**Celiopyosis** (*se-le-o-pi'-o-sis*) [κοιλία, belly; πυσις, a suppuration]. Suppuration in the abdominal cavity.

**Celiorrhea** (*se-le-or'-e-ah*) [κοιλία, the belly; ῥέειν, to flow]. Diarrhea.

**Celioschisis** (*se-le-os'-kis-is*) [κοιλία, belly; σχίσις, fissure]. Congenital abdominal fissure.

**Celiotomy** (*se-le-ot'-o-me*) [κοιλία, belly; τομή, a cutting]. Surgical opening of the abdominal cavity.

**Celitis** (*se-li'-tis*) [κοιλία, belly; ιτις, inflammation]. Inflammation of the abdominal organs.

**Cell** (*sel*) [*cella*, a small, hollow cavity]. 1. In anatomy, any one of the interstitial spaces and small cavities of the bones, etc. 2. In biology, a nucleated mass of protoplasm capable of reproduction. A mass of protoplasm, with or without a cell-wall and with or without a nucleus. 3. A galvanic element, or single member of a galvanic battery without the connecting wire between the metals. See *Battery*. 4. The case or cup in which a zoöid or larva is located. See *Cell-body*. **C., Abbe-Zeiss Counting**, a glass receptacle cemented upon a glass slide, its floor being marked in microscopic squares. It is used for counting the blood-corpuscles. **C., Air**. See *Air-cell*. **C., Ameboid**, a cell capable of changing its form and of moving about like an ameba. **C., Apolar**, a nerve-cell without processes or poles, such as has been ascribed to the sympathetic system. **C., Beaker**. See *C. Goblet*. **C., Betz's**, the motor or ganglionic cells comprising the fourth layer of the motor area of the gray matter of the brain. **C.-body**, the mass of a cell, composed of two substances, the *mitoma*, or *cytomitoma*, and the *paramitoma*. The first is the thread-like basis of the cell-body, the latter, the homogeneous filar and interlular substance. The nucleus is composed of the *karyomitoma*, or nuclear network, otherwise called the *chromatin*; the *nuclear sap*, or substances contained in the meshes of the chromatin, and from its non-staining quality called *achromatin*; and the *nuclear membrane*, made up of two layers, the outer achromatic, the inner chromatic, or staining. The *nucleoli* are usually multiple, and are composed of more refractile matter. **C., Bunsen**, the same as the Grove cell except that the platinum electrode of the latter is replaced in the Bunsen by a stick of carbon. **C.-capsule**, a thick or unusually strong cell-wall. **C., Ciliated**, one provided with cilia. **C. of Corti**, any one of the hair-cells on the outer surface of the organ of Corti. **C., Cylindrical**, a variety of epithelial cell. **C., Daniell's**, a battery cell containing two fluids, viz., a saturated solution of sulphate of copper and a semi-saturated solution of sulphate of zinc. In the former is placed a sheet of metallic copper, and in the latter a mass of zinc, these two metals forming the electrodes of the cell. **C., Daughter-**, a cell originating from the division of the protoplasm of a mother-cell; any one of the young cells found within the substance of an undivided mother-cell. **C. of Deiters**, one of the cells with fine processes resting on the basilar membrane of the cochlea, beneath the air-cells; also a nucleated cell of the neuroglia. **C., Demilune**, *Girnamuzzi's cells*, granular protoplasmic cells found in mucous glands,

lying between the mucous cells and the basement membrane. They play an important part in the functional activity of the gland. **C. -Doctrine**, the theory that the cell is the unit of organic structure, and that cell formation is the essential process of life and its phenomena. **C. Edison-Lalande**, a variety of cell used in making galvanic batteries. **C., Electrolytic**, a cell or vessel containing an electrolyte, in which electrolysis is carried on. **C., Endothelial**, one of those lining the intima of the blood vessel system. **C., Epidermic**, or **Epithelial**, one of those covering the membranes of the free surface of the body. **C., Ethmoidal**, any one of the cellular cavities of the lateral masses of the ethmoid bone. Called also *ethmoidal sinus*. **C., Ganglion**, a cell of the gray matter of the brain or spinal cord. **C. of Giannuzzi**. See *C. Dentium*. **C., Giant**, any polynucleated body of protoplasmic matter occurring in tuberculosis, sarcoma, etc. **C.-globulins**, Halliburton's name for forms of globulin that occur in lymph-corpuscles and extracted from them by solutions of sodium chlorid. **C., Goblet**, a form of epithelial cell. **C., Gowers's**, an apparatus for counting blood-corpuscles. **C., Grenet**, a variety of open cell used in making galvanic batteries. **C., Grove**, a two-fluid battery cell, the fluids being dilute sulphuric and nitric acids and the metals immersed in them respectively zinc and platinum. **C.-islets**, the centers of most active growth and proliferation in young cellular tissues. They contain the stores of nutriment that are gradually dissolved and digested. **C., Law**, a variety of cell used in making galvanic batteries. **C., Leclanché**, a variety of cell used in making galvanic batteries. It may be made as a liquid cell or as a dry cell, the latter being preferable. **C., Lymphoid**, a large ameboid cell. **C., Mother-**, a cell that divides its protoplasm and gives each part a new cell-wall. **C., Mounting**. See *Mounting*. **C.-Multiplication**, Cytogenesis, a name given to the process of reproduction of cells. It may be *indivision*, as when the cell-contents break up by segmentation into separate nucleated masses within the cell-wall; *gemmiparous*, as when new cells bud from the mother-cell; and *fi siparous*, as when the mother-cell divides by cleavage into two or more cells. **C., Neuro-muscular**, a name given to certain cells of lower life-forms, that act in part as nerves and in part as muscles. **C.-nests**, *Epidermic Pearls*: globular masses of flattened cells contained in epitheliomata. **C., Olfactory**, any one of the cells that lie between the network of epithelial cells in the nasal fossa. They consist of a body and two processes, one running outward to the surface of the mucous membrane, the other running inward and connected with elements of the olfactory nerve. **C.-parasite**, pathology, applied to any one of various microparasites, as, e.g., a coccidium, living within a cell. **C.-sap**, in biology, the more fluid portion of the cell-contents. **C. of Schultze**. Same as *C., Olfactory*. **C., Seminal**, any one of the epithelial cells contained in the membrane propria and constituting the seminal tubules. **C., Sphenoidal**, one of the two large cavities in the interior of the body of the sphenoid bone. **C., Squamous**, a variety of epithelial cells. **C., Stammer's**, a variety of cell used in making galvanic batteries. **C-substance**, in biology, the material composing a cell. **C., Thoma-Zeiss**. Same as *C., Lanthana*. **C., Vasofactive**, or **Vasoformative**, a cell that in embryonic or very early life, and probably in certain adult organs, anastomoses with other similar cells so as to form blood-vessels.

**Cella** (sel'-e-lah). A portion of the paracela extending outward from the porta. **C. lateralis**, the lateral

ventricle of the brain, or one of its cornua. **C. media**, the central cornu of the lateral ventricle, or that part of the ventricle whence the cornua extend.

**Cellæform** (sel'-e-form) [*cella*, a cell; *forma*, shape]. Resembling a cell, but not such morphologically. Cf. *Celliform*.

**Celliferous** (sel'-if'-er-us) [*cella*, cell; *ferre*, to bear]. Producing, forming, or bearing cells.

**Celliform** (sel'-if-form). See *Cellæform*.

**Celloid** (sel'-oid) [*cella*, a cell; *ειδος*, form]. Resembling a cell.

**Celloidin** (sel'-oid'-in). A concentrated form of collodion for use in imbedding objects for histologic purposes.

**Cellula** (sel'-u-lah). See *Cellule*.

**Cellulæ gangliosæ**. Ganglion cells, or mesodermal nerve cells; neuroblasts. **C. palpantes**, tactile cells.

**Cellular** (sel'-u-lar) [*cella*, cell]. Relating to or composed of cells. **C. Cartilage**, cartilage composed mainly of large cells, with but little intercellular substance. **C. Membrane**, **C. Tissue**, areolar tissue; bony connective tissue; cancellous tissue. **C. Therapy**, the name applied by Aulde to the method in therapeutics of exhibiting properly-selected medicaments with a view to restoration of cell-function. It aims to apply scientifically those remedies that experience has shown to possess special curative properties in the restoration of disordered functions.

**Cellule** (sel'-ul) [*cellula*, a small cell]. A small cell or cavity.

**Celluliferous** (sel'-u-lif'-er-us) [*cellula*, a little cell; *ferre*, to bear]. In biology, producing small cells.

**Cellulitis** (sel'-u-lit'-tis) [*cellula*, a small cell; *itis*, inflammation]. A diffuse inflammation of cellular tissue. **C., Pelvic**. See *Parametritis*.

**Celluloid** (sel'-u-loid) [*cellula*, a little cell; *ειδος*, form]. A valuable product of the action of camphor upon pyroxylin. It is prepared in a great variety of forms, both transparent and opaque, colored uniformly or mottled and striated. It cannot be caused to explode by heat, friction, or percussion. When brought into contact with flame it burns like paper. It dissolves in warm, moderately concentrated sulphuric acid, and is also soluble in glacial acetic acid, rapidly in warm, moderately concentrated nitric acid (four volumes of fuming acid to three of water), and in a hot, concentrated solution of caustic soda. The density of celluloid ranges from 1.310 to 1.393. When heated to 125° C. it becomes plastic and can be moulded into any desired shape. Separate pieces can also be welded together by simple pressure at this temperature. It is useful in various ways in surgery. It is used sometimes to form a plastic base for artificial teeth, known by various names, as "Rose Pearl," "Pyroxylin," etc. See *Zylonite*.

**Cellulose** (sel'-u-los) [*cellula*, a little cell],  $C_{12}H_{20}O_{10}$ . Wood fiber; lignose. The principal ingredient of the cell-membranes of all plants. It is a white, amorphous mass, insoluble in most of the usual solvents. In biology, the primary substance of organic cell-walls, characteristic of plant-cells, but found in the *Tunicata* among animals. It is dissolved by Schweitzer's reagent (ammonium-cupric-oxid) and decomposed by several forms of bacteria, e.g., *Bacillus butyricus*, Prazmowski; *Bacterium gummi*, Comes, and *Bacterium putredinis*, Davaine. To stain.—Use Grenacher's Alcoholic Borax-Carmin, Ehrlich's or Delafield's Hematoxylin, Methyl-Green, Methylene-Blue, Safranin, Fuchsin, Chlor. Zinc, Iodin, Phloroglucin, Anilin, Chlorid. See, also, *Carbohydrates*, *Table of*.

**Celology** (sel'-ol'-o-je) [*κηλη*, hernia; *λογία*, science]. That branch of surgical science that treats of hernia.

**Celom**, or **Celoma** (*se'-lom*, or *se-lo'-mah*) [*κοίλωμα*, a cavity]. A term used by embryologists and others to denote the body-cavity in its widest morphologic sense; the space between the exoderm and the endoderm.

**Celophlebitis** (*se-lo'-fle-bi'-tis*) [*κοίλος*, hollow; *φλέψ*, vein; *ιτις*, inflammation]. Inflammation of a vena cava.

**Celophthalmia** (*se-loff'-thal'-me-ah*) [*κοίλος*, hollow; *ὄφθαλμός*, eye]. Hollowness of the eyes.

**Celoscope** (*se'-lo-skōp*) [*κοίλος*, hollow; *σκοπεῖν*, to observe]. An instrument for examining the cavities of the body by means of the electric light, enclosed in a flask and mounted upon a glass shank.

**Celosis** (*se-lo'-sis*) [*κοίλος*, hollow]. The formation of any cavity.

**Celosoma** (*se-lo-so'-mah*) [*κήλη*, hernia; *σῶμα*, a body]. 1. A species of single autotistic monsters characterized by "more or less extensive body-cleft with evagination, associated with various anomalies of the extremities, of the genito-urinary apparatus, of the intestinal tract, and even of the whole trunk." 2. A variety of the foregoing species in which there is a lateral or median evagination, with fissure, atrophy, or even total absence of the sternum, and protrusion of the heart.

**Celostomia** (*se-lo-sto'-me-ah*) [*κοίλος*, hollow; *στόμα*, mouth]. Hollowness of the voice.

**Celotome** (*se'-lo-tōm*) [*κήλη*, hernia; *τέμνειν*, to cut]. A hernia-knife.

**Celotomy** (*se-lot'-o-me*) [*κήλη*, hernia; *τέμνειν*, to cut]. The operation for strangulated hernia by incision of the stricture.

**Celsus's Operations**. See *Operations, Table of*.

**Celtis** (*se'll'-tis*) [L., an African species of lotus]. A genus of ulmaceous trees. **C. australis**, the European nettle-tree, honey-berry, or lote, has mild, astringent leaves and bark. **C. occidentalis**, the hackberry of N. America, has edible, astringent berries; the bark is said to be anodyne, astringent, febrifuge. Unof.

**Cement** (*se-ment'*) [*cementum*, a rough stone]. Any plastic material capable of becoming hard and of binding together the objects that are contiguous to it; filling-material for the teeth; the crusta petrosa of the teeth. See *Teeth*. **C.-disc**, the glandular disc of orchids. **C.-duct**, the duct of the cement-gland in cirriped crustaceans. **C., Shellac**, a cement for sealing microscopic preparations and for making shallow cells. It is prepared by dissolving the gum or scales of shellac in about an equal volume of alcohol. Decant or filter the fluid, and to prevent brittleness add to every 50 parts 5 parts each of castor oil and Venetian turpentine.

**Cementoblast** (*se-ment'-o-blast*) [*cementum*, cement; *βλαστός*, germ]. A cement-corpuscle in tooth-tissue; more correctly, an osteoblast that takes part in the development of the dental cement.

**Cemento-dentary** (*se-ment-o-den'-tin-a-re*) [*cementum*, cement; *dens*, *dentis*, a tooth]. Relating to the cement and dentine of a tooth.

**Cementoma** (*se-ment-o'-mah*) [*cementum*, cement; *ῥῆμα*, tumor; *pl.*, *Cementomata*]. A tumor thrown out by the irritated alveolar periosteum.

**Cementum** (*se-ment'-um*). See *Tooth and Cement*.

**Cenanthus** (*se-nan'-the*) [*κενός*, empty; *ἄνθος*, flower]. In biology, that condition of a flower in which the stamens and pistils are suppressed.

**Cenchrus** (*sen'-krus*) [*κέγχρος*, a small grain]. In biology, a small spot on the metathorax of an insect.

**Cenesthesia** (*sen-es-the'-sis*) [*κοινός*, common; *αἴσθησις*, feeling]. A sense of existence, either painful or pleasurable. It is the prevailing conscious state of feeling, either of depression or of exaltation, which is the resultant of the subconscious organic sympathies of

the whole organism. It does not exceed physiologic limits so long as it does not exclude the normal exercise of mental functions.

**Cenogenetic** (*se-no-jen-et'-ik*) [*κοινός*, common; *γένεσις*, generation]. In biology, a modified, shortened, and simplified mode of development.

**Cenogenous** (*sen-oj'-en-us*) [*κοινός*, common; *γόνος*, produced]. In biology, the power of reproducing by means of eggs at one time and viviparously at another, as seen in the *Alphides*.

**Cenosis** (*sen-o'-sis*) [*κένωσις*, a draining]. Evacuation; apocenos.

**Cenosphæra** (*sen-o-sfe'-rah*) [*κενός*, empty; *σφαῖρα*, sphere]. In biology, the spherical skeleton of certain radiolarians.

**Cenospudia** (*sen-o-spu'-de-ah*) [*κενός*, empty; *σπινθήξ*, zeal]. "Brown study;" mental absorption, or anxiety with regard to unimportant matters.

**Cenotic** (*sen-ot'-ik*) [*κένωσις*, a draining]. Causing cenosis; drastic; purgative.

**Centaurea** (*sen-ta'-re-ah*) [*κένταυρος*, centaur]. A genus of composite-flowered herbs. **C. benedictus**. See *Carduus*. **C. centaurium**, the greater centaur of Europe, is aromatic, astringent, diaphoretic, and stomachic. **C. cyanus**, corn-flower, blue bottle; once used for fevers and in preparing collyria. **C. solstitialis**, barnaby's thistle; diuretic and antipyretic. **C. nigra**, of Europe (knap-weed, centaur), is astringent and diuretic. All unof.

**Centaur** (*sen'-tau-re*) [*centauria*]. A popular name for various plants of the genera *Centaurea*, *Erythraea*, *Sabbatia*, *Chlora*, etc. It is used as a simple, bitter tonic. Dose ʒss-j in decoction several times a day. Unof.

**Center** (*sen'-ter*) [*κέντρον*, the center]. The middle point of any surface or of a body. The ganglion or plexus whence issue the nerves controlling a function. **C., Accelerating**, a probable center in the medulla sending accelerating fibers to the heart. They leave the cord through the rami communicantes of the lower cervical and upper six dorsal nerves, passing thence into the sympathetic. **C., Ano-spinal**, controls defecation; it is situated at the level of the 5th, 6th, and 7th lumbar vertebrae; but for the co-ordinated activity it must remain in connection with the brain. **C., Auditory**, probably in the temporo-sphenoidal lobes, upon each side. **C., Broca's**. See *C., Speech*. **C., Cardio-inhibitory**, in the medulla, carried by the vagus. **C., Cilio-spinal**, connected with the dilatation of the pupil; it is in the lower cervical part of the cord. It controls the movements of the ciliary body. **C., Convulsional**, in the medulla, on the floor of the 4th ventricle. **C. for Closure of Eyelids**, in the medulla, a part of the facial center. **C., Coughing**, in the medulla, above the respiratory center. **C., Diabetic**, in the posterior part of the anterior half of the floor of the 4th ventricle, in the median line. **C., Ejaculation**, Budge's genito-spinal center, 4th lumbar vertebra (rabbit). **C., Erection**, is in the spinal cord, but is controlled from the medulla. **C. for Mastication and Sucking**, facial and hypo-glossal centers. **C. for Secretion of Saliva**, on the floor of the 4th ventricle. **C., Gustatory and Olfactory**, in the uncinate gyrus. **C., Heat-regulating or Temperature**, the center for the control of body-temperature. See *Thermotaxis*. **C., Leg**, in the ascending frontal convolution. **C., Micturition**, the vesico-spinal center of Budge, at the level of the lumbar vertebrae; coordination requires cerebral connection. **C. of Ossification**, the place in bones at which ossification begins. **C., Parturition**, at the level of the 1st and 2d lumbar vertebrae. **C., Respir-**

atory, in the medulla, between the nuclei of the vagus and accessorius; called by Fluorens the *Vena Vitalis*, or *Vita Point*. **C.**, Sensory, or Psycho-sensorial Areas, occipital and temporo-sphenoidal lobes, probably the same, or intimately associated with, the motor centers of the parts. **C.**, Sneezing, same as for nerves for the muscles of expiration. **C.**, Spasm, in the medulla, at its junction with the pons. **C.**, Speech, in the third left frontal convolution in right-handed people. **C.**, Swallowing, on the floor of the 4th ventricle. **C.**, Sweat, the dominating center is in the medulla, with subordinate spinal centers. **C.**, Upper, for Dilator Pupillæ, in the medulla. **C.**, Vasodilator, probably exists in the medulla, with a function the opposite of that of the Vaso-motor. **C.**, Vaso-motor, in the medulla. **C.**, Vesico-spinal. See *Micturition*. **C.**, Visual, in the occipital lobe, especially in the cuneus.

**Centering** (*sen'ter-ing*) [*κέντρον*, a center]. In microscopy, the arrangement of an object or an accessory so that its center coincides with the optic axis of the microscope. In optics, having the pupil and the optical center of the refracting lens in the same axis.

**Centesimal**. In the proportion of 1 to 100.

**Centigrade** (*sen'te-grád*) [*centum*, a hundred; *gradus*, a step]. Abbreviation, **C.** Having 100 divisions or degrees. **C.** Thermometer, a thermometer with zero as the freezing point and 100° as the boiling point of water. See *Thermometer*.

**Centigram** (*sen'te-gram*) [*centum*, a hundred; *γράμμα*, a small weight]. The hundredth of a gram, equal to 0.1543 of a gram avoirdupois, or one-sixth of a grain Troy.

**Centiliter** (*sen'ti-le-ter*) [*centum*, a hundred; *λίτρον*, a pound]. The hundredth of a liter, equal to 0.6102 of an English cubic inch.

**Centimeter** (*sen'tim-e-ter*) [*centum*, a hundred; *μετρον*, a measure]. The hundredth part of a meter, equal to 0.39371 (or about  $\frac{1}{2.54}$ ) of an English inch.

**Centinormal** (*sen'te-nor'-mal*) [*centum*, a hundred; *norma*, normal]. The  $\frac{1}{100}$  of the normal; applied to a solution the  $\frac{1}{100}$  of the strength of a normal solution.

**Centrad** (*sen'trad*) [*centrum*, the center; *ad*, to]. Toward the center, or toward the median line. See *Position and Direction*, Table of.

**Central** (*sen'tral*) [*centrum*, the center]. Relating to the center; passing through the center. See *Position and Direction*, Table of. **C.** Artery, an artery in the optic nerve and retina; it passes to the optic papilla and then divides. See *Arteries*, Table of. **C.** Ganglia, the corpora striata and thalami optici. **C.** Ligament, the terminal filum of the spinal cord. See *Ligament*. **C.** Lobe, the island of Reil. **C.** Stop. See *Diaphragm*.

**Centraxional** (*sen'traks'-al*) [*κέντρον*, center; *ἄξιν*, axis]. In biology, having a central axial line.

**Centre** (*sen'ter*). See *Center*.

**Centren** (*sen'tren*) [*centrum*, a center]. Belonging solely to a center.

**Centric**, **Central** (*sen'trik*, *sen'trik-al*) [*centrum*, a center]. Relating to a center, especially to a nerve-center. In biology, a term applied to the internal structure of such leaves as show no distinctly developed petiole tissue, and no considerable structural differences between the upper and under surfaces.

**Centricipital** (*sen'trik'-i-p'al*) [*centrum*, center; *caput*, a head]. Relating to the centriciput; parietal. **C.** vertebra, the second or more central of the three principal (parietal) vertebra.

**Centriciput** (*sen'trik'-i-p'ut*) [*centrum*, center; *caput*, head]. The mid-head; the second cranial segment situated between the snout and occiput.

**Centrifugal** (*sen-trif'-u-gal*) [*centrum*, the center; *fugere*, to flee]. Receding from the center toward the periphery. **C.** Nerves, those (mostly motor) conveying impulses toward the peripheral parts of the body.

**Centrifugalized Milk**. Milk from which the cream has been separated by whirling it in a centrifugal machine.

**Centripetal** (*sen-trif'-e-tal*) [*centrum*, the center; *petere*, to seek]. Traveling toward the center from the periphery. **C.** Nerves, those (mostly sensory) conveying impressions from the peripheral organs toward the cerebro-spinal nervous system.

**Centro-acinal**, or **Centro-acinar** (*sen-tro-as'-in-al*, or *sen-tro-as'-in-ar*) [*centrum*, center; *acinus*, a grape]. Belonging to the center of an acinus. **C.** Cells are found in the acini of the pancreas, etc.

**Centroleithal** (*sen-tro-les'-ith-al*) [*κέντρον*, center; *λίθος*, yolk]. In embryology, having the food-yolk centrally located in the protoplasm.

**Centrosoma** (*sen-tro-so'-mah*) [*κέντρον*, center; *σῶμα*, body; *pl.*, *Centrosomata*]. The central mass or body of any corpuscle, as distinguished from its appendages. **C.** of Boveri, in embryology, a separate central body contained in the sphere of attraction, at the pole of the resting nucleus in a dividing ovum.

**Centrosome** (*sen'tro-sôm*). See *Centrosoma*.

**Centrostigma** (*sen-tro-stig'-mah*) [*κέντρον*, center; *στιγμα*, a point]. In morphology, having all the axes converging to a central point.

**Centrotriæne** (*sen-tro-tri'-e-ne*) [*κέντρον*, center; *τρίαινα*, a trident]. In morphology, a triæne spicule whose arms arise from a central bundle or rhabdom.

**Centrotyle** (*sen-tro'til'-ol*) [*κέντρον*, center; *τύλος*, knobbed]. In biology, swollen in the middle.

**Centrum** (*sen'trum*) [*L.*]. The center or middle part; the body of a vertebra, exclusive of the bases of the neural arches. **C.** Anospinale, Budge's, the center for the movements of the anal sphincters, located in the cord at the level of the fifth lumbar vertebra in the dog, and between the sixth and seventh in the rabbit. **C.** Ovale Majus, the large mass of white matter appearing when either of the hemispheres is cut down to the level of the *corpus callo-um*. **C.** Ovale Minus, the white matter appearing when the upper part of a hemisphere of the brain is removed.

**Canurus** (*sen-u'-rus*). See *Canurus*.

**Cepaceous** (*se-pa'-she-us*) [*κεφα*, an onion]. Having the smell of onions.

**Cephalis** (*sef-a'-el-is*). See *Ipecacuanha*.

**Cephalad** (*sef'-al-ad*) [*κεφαλή*, head; *ad*, to]. Toward the head. See *Position and Direction*, Table of.

**Cephalagra** (*sef-al-a'-grah*) [*κεφαλή*, head; *ἄγρα*, seizure]. Gouty headache.

**Cephalalgia** (*sef-al-a'-ge-ah*) [*κεφαλή*, head; *ἄλγος*, pain]. Pain in the head. The word is variously qualified, as *C. Anemica*, *C. Contagiosa*, *C. Influenza*, *C. Epileptica*, *C. Nervosa*, etc.

**Cephalalgic** (*sef-al-a'-jik*) [*κεφαλή*, head; *ἄλγος*, pain]. Relating to headache.

**Cephalanthum** (*sef-al-an'-the-um*) [*κεφαλή*, head; *ἄνθος*, a flower]. In biology, the capitulum, or flower cluster, of one of the *Composite*.

**Cephalanthus** (*sef-al-an'-thus*). See *Button-bush*.

**Cephalate** (*sef'-al-at*) [*κεφαλή*, head]. In biology, possessing a head.

**Cephalea** (*sef-al-a'-ah*) [*κεφαλαία*, headache]. Headache; especially severe or chronic headache, with intolerance of light and sound.

**Cephalematocoele**. See *Cephalhematocoele*.

**Cephalematoma**. See *Cephalhematoma*.

**Cephelemia** (*sef-al-e'-me-ah*) [κεφαλή, head; αἷμα, blood]. An abnormal determination of blood to the head.

**Cephalotron** (*sef-al-e'-tron*) [κεφαλή, head; ἥτρον, the abdomen]. In biology, applied to the anterior portion of the body of certain crustaceans.

**Cephalhematoma** (*sef-al-he-mat-o'-mah*). See *Cephalhematoma*.

**Cephalhematocele** (*sef-al-he-mat'-o-sel*) [κεφαλή, head; αἷμα, blood; κήλη, tumor]. An hematocele situated beneath the scalp, and communicating with a dural sinus.

**Cephalhematoma** (*sef-al-he-mat-o'-mah*) [κεφαλή, head; αἷμα, blood; ὅμα, tumor; pl., *Cephalhematmata*]. A collection of blood between the pericranium and the exterior of one or more bones of the skull.

**Cephalhydrocele** (*sef-al-hi'-dro-sel*) [κεφαλή, head; ὕδωρ, water; κήλη, tumor]. Effusion of cerebral fluid beneath the occipito-frontal aponeuroses in fractures of the skull.

**Cephalic** (*sef-al'-ik*) [κεφαλή, head]. Pertaining to the head. The terms *Proral*, *Cranial*, *Rostral*, *Akral* have been proposed to take the place of Cephalic. See *Position and Direction, Table of*. **C. Index.** See *Index*. **C. Souffle**, a blowing murmur sometimes heard in auscultation of the head; a sign of aneurysm or of anemia. **C. Vein.** See *Vein*. **C. Version.** See *Version*. **C. Tetanus.** See *Köpf-Tetanus*.

**Cephalin** (*sef'-al-in*) [κεφαλή, the head]. An unstable phosphatic substance obtained from brain-substance; it is allied to lecithin; at least five modifications of it are reported to exist; it is called also *Kephalin*.

**Cephalitis** (*sef-al-i'-tis*). See *Encephalitis*.

**Cephalization** (*sef-al-iz-a'-shun*) [κεφαλή, the head]. In biology, Dana's term for that specialization the tendency of which is to concentrate important parts and organs at the head region of the trunk.

**Cephalize** (*sef'-al-iz*) [κεφαλή, head]. To develop head-organs.

**Cephalobranchiate** (*sef-al-o-brang'-ke-āt*) [κεφαλή, head; βράγχια, gills]. In biology, with external branchial tufts in the head-region.

**Cephalocathartic** (*sef-al-o-kath-ar'-tik*) [κεφαλή, head; καθαρτικός, purging]. 1. Purging or relieving the head. 2. A medicine that relieves the head.

**Cephalocele** (*sef'-al-o-sel*) [κεφαλή, head; κήλη, tumor]. Hernia of the brain; protrusion of a mass of the cranial contents.

**Cephalocentesis** (*sef-al-o-sen-te'-sis*) [κεφαλή, head; κέντησις, puncture]. Surgical puncture of the cranium.

**Cephalocercal** (*sef-al-o-ser'-kal*) [κεφαλή, head; κέρκος, tail]. In anatomy, from head to tail.

**Cephalochord** (*sef'-al-o-kord*) [κεφαλή, head; χορδή, cord]. The cephalic portion of the *chorda dorsalis* in embryonic life.

**Cephaloclast** (*sef'-al-o-klast*). See *Cephalotribe*.

**Cephaloconus** (*sef-al-o-ko'-nus*) [κεφαλή, head; κώνος, a cone]. In biology, applied to one of the processes on the head of a pteropod.

**Cephalodium** (*sef-al-o'-de-um*) [κεφαλή, head; εἶδος, form]. In biology, one of the outgrowths on the thallus of a lichen, and in which gonidia or algal cells are found.

**Cephalodymia** (*sef-al-o-dim'-e-ah*) [κεφαλή, head; δέμειναι, to mingle]. Teratologic union of twins by the merging of their heads together.

**Cephalodynia** (*sef-al-o-din'-e-ah*) [κεφαλή, head; ὁδύνη, pain]. Rheumatism affecting the occipito-frontalis muscle, the pain being chiefly experienced in the forehead or occiput, and at times involving the eyeballs.

**Cephalograph** (*sef'-al-o-graf*) [κεφαλή, head; γραφειν, to write]. An instrument for recording the contours of the head.

**Cephalography** (*sef-al-o-gra-fe*) [κεφαλή, head; γραφειν, to write]. A description of the head.

**Cephaloid** (*sef'-al-oid*) [κεφαλή, head; εἶδος, likeness]. Resembling the head.

**Cephalology** (*sef-al-ol'-o-je*) [κεφαλή, head; λόγος, science]. The science of cranial measurements and indications.

**Cephaloma** (*sef-al-o'-mah*) [κεφαλή, head; ὅμα, tumor; pl., *Cephalomata*]. Encephaloid carcinoma; soft carcinoma.

**Cephalomelus** (*sef-al-om'-el-us*) [κεφαλή, head; μέλος, a part]. A form of double monster in which there is a supernumerary limb attached to the head.

**Cephalomeningitis** (*sef-al-o-men-in ji'-tis*) [κεφαλή, head; μίμηξ, a membrane; ιτις, inflammation]. Cephalic meningitis; inflammation of the cephalic meninges.

**Cephalometer** (*sef-al-om'-et-er*) [κεφαλή, head; μέτρον, a measure]. An instrument for measuring the head.

**Cephalometry** (*sef-al-om'-et-ry*) [κεφαλή, head; μέτρον, a measure]. 1. The use of the cephalometer: craniometry. 2. The art of taking measurements of the head to determine the position of the fissures and convolutions of the brain.

**Cephalont** (*sef'-al-ont*) [κεφαλή, head; ὄν(δ)τις, being]. In biology, that phase of a gregarine in which an epimerite is added to the anterior cyst or protomerite.

**Cephalo-orbital** (*sef-al-o-or'-bit-al*) [κεφαλή, head; orbita, an orbit]. Relating to the cranium and orbits. **C. Index.** See *Index*.

**Cephalo-orbito-nasal** (*sef-al-o-or-bit-o-na'-zal*) [κεφαλή, the head; orbita, an orbit; nasalis, of the nose]. Relating to the cranium, orbits, and nose.

**Cephalopagus** (*sef-al-op'-ag-us*) [κεφαλή, head; παίζει, joined]. An ensomphalic monstrosity having the heads united at the top.

**Cephalopathic** (*sef-al-o-path'-ik*) [κεφαλή, head; πάθος, disease]. Pertaining or belonging to a disease of the head.

**Cephalopathy** (*sef'-al-o-path-e*) [κεφαλή, head; πάθος, disease]. Any disease of the head.

**Cephalophalsia** (*sef-al-o-fal'-se-ah*). Same as *Cephalotripsy*.

**Cephalophragm** (*sef'-al-o-fram*) [κεφαλή, head; θράγμα, division]. In biology, a Y-shaped septum transversely dividing the head-chamber of certain insects.

**Cephalophyma** (*sef-al-o-fi'-mah*). Synonym of *Cephalhematoma*.

**Cephalorrhachidian** (*sef-al-o-rak-id'-e-an*) [κεφαλή, head; ράχης, spine]. Same as *Cerebro-spinal*.

**Cephaloscope** (*sef'-al-o-skop*) [κεφαλή, head; σκοπεῖν, to examine]. A stethoscope for use in auscultation of the head or the ear.

**Cephalo-spinal** (*sef-al-o-spi'-nal*). See *Cerebro-spinal*.

**Cephalostat** (*sef'-al-o-stat*) [κεφαλή, head; ἵσταναι, to cause to stand]. A vise or clamp for holding a patient's head.

**Cephalostegite** (*sef-a-lot'-tej-il*) [κεφαλή, head; στέγος, a roof]. In biology, the anterior or head region of the carapace of a crustacean.

**Cephalot**, or **Cephalote** (*sef'-al-ot*, or *lot*) [κεφαλωτός, headed]. A brown, resinoid fat obtainable from brain-substance. Cf. *Cerebrot*.

**Cephalothorax** (*sef-al-o-tho'-raks*) [κεφαλή, head; θώραξ, a breast-plate]. In biology, the anterior portion of the body of an arthropod formed by the union of the head and thorax.

**Cephalothryptor** (*sef-al-o-thrip'-tor*). See *Cephalotribe*.

**Cephalotome** (*ser'af-é-tóm*) [*κεφαλή*, the head; *τεμνέω*, to cut]. The instrument used in performing cephalotomy.

**Cephalotomy** (*ser'af-é-tó-mē*) [*κεφαλή*, head; *τομή*, section]. The opening or division of the head of the fetus in labor.

**Cephalotribe** (*ser'af-é-trībē*) [*κεφαλή*, the head; *τριβέω*, to crush]. An instrument for crushing the fetal head.

**Cephalotripsy** (*ser'af-é-tīp-sē*) [*κεφαλή*, head; *τριβή*, to bruise]. The operation of crushing the fetal head when delivery is otherwise impossible.

**Cephalotriptor** (*ser'af-é-trīp'tōr*). See *Cephalotribe*.

**Cephalotroch** (*ser'af-é-trōch*) [*κεφαλή*, head; *τροχός*, a wheel]. In biology, a molluscan or annelid larva having a cephalic circle of cilia.

**Cephalous** (*ser'af-u*) [*κεφαλή*, head]. In biology, having a head. The opposite of *Acephalous*.

**Cephaloxia** (*ser'af-k'e-ā-sē*). Synonym of *Torticollis*.

**Cera** (*ser'arē*) [*κερά*]. Wax. A mixture of *cerotic acid*, *cerin*, and *myricin*, gathered by the honey-bee from the pollen of flowers and the leaves of plants. **C. alba**, white wax; prepared by bleaching yellow wax. It is valuable as an ingredient of cerates and ointments. **C. flava**, yellow wax; it possesses an agreeable balsamic odor. It is soluble in ether, hot alcohol, and chloroform.

**Ceraceous** (*ser'ar-é-sē-us*) [*cera*, wax]. Waxy; resembling wax.

**Ceramidium** (*ser'am-id'ē-um*) [*κεραμίδιον*, pottery]. In biology, the urn-shaped spore-bearing receptacle of certain algae.

**Cerasein** (*ser'ar-ē-sin*) [*cerasus*, a cherry-tree]. A precipitate from a tincture of the bark of choke-cherry, *Prunus virginiana* (true); used as a quinin-substitute, and as a diaphoretic and sedative. Dose 2 to 10 grains. Unof.

**Cerasin** (*ser'ar-sin*) [*cerasus*, a cherry-tree]. 1. An ingredient of the gum of cherry, peach, and plum trees, apparently identical with bassorin. 2. A crude precipitate from tincture of *Choke-cherry*, *q. v.*

**Cerasinose** (*ser'ar-in-ōs*) [*cerasus*, a cherry-tree]. A crystalline carbohydrate isomeric with arabinose; it is derivable from cherry-gum.

**Cerate** (*ser'at*) [*cera*, wax]. In pharmacy, an unctuous preparation consisting of wax mixed with oils, fatty substances, or resins, and of such a consistence that at ordinary temperatures it can be readily spread upon linen or muslin, and yet is so firm that it will not melt or run when applied to the skin. There are eight official cerates. **C., Goulard's**. See *Goulard*. **C., Hufeland's**. See *Hufeland*.

**Ceratectasia** (*ser'at-ek-tā-sē-ā*). See *Keratectasia*.

**Ceratectomy** (*ser'at-ek'tō-mē*). See *Keratectomy*.

**Ceratiasis** (*ser'at-ā-sē*). See *Keratiasis*.

**Ceratin** (*ser'at-in*). See *Keratin*.

**Ceratitis** (*ser'at-itis*). See *Keratitis*.

**Cerato-** (*ser'atō*). See *Kerato-*.

**Ceratum** (*ser'at-um*). See *Cerate*.

**Cerbera** (*ser'b-er-ā*) [*Cerberus*, a dog of mythology]. A genus of apocynaceous old-world trees, several of them extremely poisonous. **C. odollum**, of India, has purple flowers and bark; it contains *Cerberin*, *q. v.* **C. taughin**, the ordeal tree of Madagascar, is highly poisonous; one leaf is said to have destroyed 20 people.

**Cerberin** (*ser'b-er-in*) [*Cerberus*, a dog of mythology]. A poisonous principle from the seeds of *Cerbera odollum* and other related trees.

**Cercaria** (*ser'k-er-ā*) [*κερκή*, tail]. Any trematode worm (lukes) in its second (or tailed) stage of larval life.

**Cercarian** (*ser'ka'-re-an*) [*κερκή*, a tail]. Any trematode, or luke-worm, in the *Cercaria* stage.

**Cerchnus** (*ser'k'-nus*) [*κερκήνιος*, rough, hoarse]. Hoarseness; noisy respiration.

**Cercis** (*ser'-sis*). See *Judas Tree*.

**Cercomonas** (*ser-kom'-o-nas*) [*κερκός*, tail; *μονάς*, monad]. A genus of flagellate infusorians. **C. intestinalis**, a minute animal parasite, a protozoön, occasionally found in the fecal discharges of patients suffering with typhoid fever, chronic diarrhea, and cholera. Its pathologic significance has not yet been ascertained. **C. urinarius**. See *Bodo*.

**Cercus** (*ser'-kus*) [*κερκός*, the tail of a beast]. In biology, one of the antenna-like structures projecting from the hinder parts of certain insects.

**Cere** (*ser*) [*cera*, wax]. In biology, that portion of the sheath of the bill in certain birds, *e. g.*, parrots and birds of prey, which has a waxy appearance.

**Cereal** (*ser'-re-al*) [*Ceres*, the goddess of agriculture]. 1. Relating to edible grains. 2. Any edible grain or bread-corn; also the plant that produces it. The composition of the more important cereals is thus given by Bell:—

| CONSTITUENTS.                            | Wheat, winter-sown. | Wheat, spring-sown. | Long-eared Barley. | English Oats. | Maize. | Rye.   | Carolina Rice (without husk). |
|--|---------------------|---------------------|--------------------|---------------|--------|--------|-------------------------------|
| Fat, . . . . .                           | 1.48                | 1.56                | 1.03               | 5.14          | 3.58   | 1.43   | 0.19                          |
| Starch, . . . . .                        | 63.71               | 65.86               | 63.51              | 49.78         | 64.66  | 61.87  | 77.06                         |
| Sugar (as sucrose), . . . .              | 2.57                | 2.24                | 1.34               | 2.36          | 1.94   | 4.30   | 0.38                          |
| Albumin (insoluble in alcohol),          | 10.70               | 7.19                | 8.18               | 10.62         | 9.67   | 9.78   | 7.94                          |
| Nitrogenous matter (soluble in alcohol), | 4.83                | 4.40                | 3.28               | 4.05          | 4.60   | 5.09   | 1.40                          |
| Cellulose, . . . .                       | 3.03                | 2.93                | 7.28               | 13.53         | 1.86   | 3.23   | Traces.                       |
| Mineral matter, . .                      | 1.60                | 1.74                | 2.32               | 2.66          | 1.35   | 1.85   | 0.28                          |
| Moisture, . . . .                        | 12.08               | 14.08               | 13.06              | 11.86         | 12.34  | 12.45  | 12.15                         |
| Total, . . . . .                         | 100.00              | 100.00              | 100.00             | 100.00        | 100.00 | 100.00 | 100.00                        |

**Cerealin** (*ser'-re-al-in*) [*Ceres*, the goddess of agriculture]. An albuminoid found in various cereals and obtainable from bran. See *Flour*.

**Cerebel** (*ser'-e-bel*). See *Cerebellum*.

**Cerebellar** (*ser-e-bel'-ar*) [dim. of *cerebrum*]. Relating to the cerebellum. **C. Fossa**. See *Fossa*. **C. Ganglion**. See *Ganglion*.

**Cerebellic** (*ser-e-bel'-ik*). See *Cerebellar*.

**Cerebellitis** (*ser-e-bel-it'-tis*) [*cerebellum*, a little brain; *itis*, inflammation]. Inflammation of the cerebellum.

**Cerebellocortex** (*ser-e-bel-o-kor'-teks*) [*cerebellum*, the little brain; *cortex*, bark]. The cortex of the cerebellum.

**Cerebello-spinal** (*ser-e-bel-o-spi'-nal*) [*cerebellum*, the little brain; *spina*, the spine]. Relating to the cerebellum and the spinal cord.

**Cerebellous** (*ser-e-bel'-us*). See *Cerebellar*.

**Cerebellum** (*ser-e-bell'-um*) [dim. of *cerebrum*]. The inferior part of the brain lying below the cerebrum.

INFERIOR ASPECT OF THE CEREBELLUM.

1, 1. Inferior vermiform process. 2, 2. Median fissure. 3, 3. Lobes and lobules. 4. Amygdala or tonsil. 5. Flocculus, subpeduncular lobe or pneumogastric lobule. 6. Pons varolii. 7. Median fissure of pons. 8. Middle cerebellar peduncle. 9. Medulla oblongata. 10. Anterior extremity of circumferential fissure of cerebellum. 11. Anterior border of superior surface. 12. Small or motor root of trigeminus. 13. Large or sensory root. 14. 6th nerve. 15. Facial nerve. 16. Nerve of Wrisberg. 17. Auditory nerve. 18. Glossopharyngeal. 19. Pneumogastric. 20. Spinal accessory. 21. Hypoglossal.

**Cerebral** (*ser'-e-bral*) [*cerebrum*, the brain]. Relating to the cerebrum. **C. Apoplexy.** See *Apoplexy*. **C. Arteries.** See *Arteries*, *Table of*. **C. Index.** See *Index*. **C. Maculae**, spots on the skin caused by slight irritation, and abnormally persistent. They may indicate disorder of the vaso-motor mechanism. **C. Nerves.** See *Nerves*, *Table of*. **C. Pneumonia.** See *Pneumonia*. **C. Surprise**, the speedy, but not long-persistent stupor that often follows sudden mental shock or grave lesion or injury of the brain. **C. Vesicles.** See *Brain-bladder*.

**Cerebralgia** (*ser-e-bral'-je-ah*) [*cerebrum*, the brain; *ἀλγος*, pain]. Pain in the head.

**Cerebralism** (*ser'-e-bral'-izm*) [*cerebrum*, the brain]. The theory that mental operations are due to the activity of the brain; or that thought is a function of the brain.

**Cerebrasthenia** (*ser-e-bras-thē'-ne-ah*) [*cerebrum*, the brain; *ἀσθένεια*, without strength]. Cerebral asthenia. See *Phrenasthenia*.

**Cerebrasthenic** (*ser-e-bras'-then-ik*) [*cerebrum*, the brain; *ἀσθένεια*, without strength]. Characterized by, or pertaining to, cerebrasthenia.

**Cerebration** (*ser-e-bral'-shun*) [*cerebrum*, the brain]. Mental and cerebral activity. **C., Unconscious**, mental activity of which the subject is not conscious.

**Cerebria** (*ser'-e-bre-ah*) [*cerebrum*, the brain]. Temporary cerebral exhaustion (but the term is variously applied by different writers); acute, chronic, partial, and sympathetic cerebria are among the varieties described.

**Cerebric Acid** (*ser'-e-brik*). Same as *Cerebrinic Acid*.

**Cerebrifugal** (*ser-e-brif'-u-gal*) [*cerebrum*, the brain; *fugere*, to flee]. Centrifugal; efferent; transmitting or transmitted from the brain to the periphery.

**Cerebrin** (*ser'-e-brin*) [*cerebrum*, the brain],  $C_{17}H_{33}NO_3$ . A nitrogenous glucosid obtained from brain-tissue, nerves, and pus-corpuscles. It is a light, colorless, exceedingly hygroscopic powder. The term has been applied to an "organic extract" of unknown constitution, derived from brain-tissue.

**Cerebrinacide** (*ser-e-brin'-as-id*) [*cerebrum*, the brain]. One of certain substances found in brain-tissue, and capable of combining with metallic oxids.

**Cerebrinic Acid** (*ser-e-brin'-ik*). See *Acid*.

**Cerebripetal** (*ser-e-brif'-et-al*) [*cerebrum*, the brain; *petere*, to seek]. Centripetal; afferent; transmitting or transmitted from the periphery to the brain.

**Cerebritis** (*ser-e-brif'-tis*) [*cerebrum*, the brain; *ίτις*, inflammation]. Inflammation of the proper substance of the cerebrum, due to traumatism, contiguous inflammation, or septic influence. Headache, possibly vomiting, and convulsions are the most marked symptoms.

**C., Enzoötic**—of horses. Also called staggers, or mad staggers. A disease of horses in the Western United States caused by eating corn that has been attacked by a mold, *Aspergillus glaucus*, the spores of which, finding lodgment in the kidneys and liver, germinate and cause derangements of the circulation with central abscesses. Neither mules, cattle, nor pigs appear to contract this disease.

**Cerebrogalactose** (*ser-e-bro-gal-ak'-tos*). Same as *Cerebrose*.

**Cerebro-hypoid** (*ser-e-bro-hi'-foid*) [*cerebrum*, the brain; *ὑψος*, tissue; *είδος*, likeness]. Resembling the substance of the brain.

**Cerebrol** (*ser'-e-bröl*) [*cerebrum*, brain; *oleum*, oil]. An oily, reddish fluid obtainable from brain-tissue.

**Cerebroma** (*ser-e-bro'-mah*) [*cerebrum*, the brain; *ῥῆμα*, a tumor; *πλ.*, *Cerebromata*]. A growth, outside the cranium, that contains cerebral tissue.

**Cerebromalacia** (*ser-e-bro-mal'-a'-se-ah*) [*cerebrum*, the brain; *μαλακία*, softness]. Softening of the brain-tissue.

**Cerebromedullary** (*ser-e-bro-med-ul'-ar-e*) [*cerebrum*, the brain; *medulla*, marrow]. Relating to the brain and spinal cord.

**Cerebropathy** (*ser-e-bro-p'-a-thē*) [*cerebrum*, the brain; *πάθος*, illness]. 1. A train of symptoms following overwork and approaching the character of insanity. 2. Cerebral disease in general.

**Cerebropsychosis** (*ser-e-bro-sik-o'-sis*) [*cerebrum*, the brain; *ψυχωσις*, animating]. Mental disturbance due to a disease of the psychic centers.

**Cerebro sclerosis** (*ser-e-bro-skle-ro'-sis*) [*cerebrum*, the brain; *σκληρός*, hard]. Sclerosis of cerebral tissue.

**Cerebroscopy** (*ser-e-bro-skop'-ik*) [*cerebrum*, the brain; *σκοπεῖν*, to inspect]. Pertaining to cerebroscopy.

**Cerebroscopy** (*ser-e-bros'-ko-pe*) [*cerebrum*, the brain; *σκοπεῖν*, to inspect]. Ophthalmoscopy in the diagnosis of brain-disease.

**Cerebrose** (*ser'-e-brös*) [*cerebrum*, the brain],  $C_6H_{12}O_6$ . A crystallized sugar isomeric with glucose, occurring in brain-tissue.

**Cerebro-sensorial** (*ser-e-bro-sen-so'-re-al*) [*cerebrum*, the brain; *sensorium*, the organ of sensation]. Pertaining to the cerebral sensorium.

**Cerebroside** (*ser'-e-bro-sid*) [*cerebrum*, the brain]. One of a class of substances occurring in brain-tissue, containing cerebrose, just as glucosids contain glucose.

**Cerebrosis** (*ser-e-bro'-sis*) [*cerebrum*, the brain]. Any cerebral disorder.

**Cerebro-spinal** (*ser-e-bro-spi'-nal*) [*cerebrum*, the brain; *spina*, the spine]. Pertaining to the whole of the brain and spinal structure. **C. Axis.** See *Axis*. **C. Fluid**, the fluid between the arachnoid membrane and the pia-mater. **C. Meningitis.** See *Fever*, *Cerebro-spinal*. **C. System**, the brain, spinal cord, and nerves.

**Cerebro-spinant** (*ser-e-bro-spi'-nant*) [*cerebrum*, the brain; *spina*, the spine]. A medicine that acts upon the brain and spinal cord.

**Cerebrosulphatid** (*ser-e-bro-sul'-fat-id*) [*cerebrum*, the brain; *sulphur*]. Any cerebrinacide containing sulphur.

**Cerebrot, Cerebrote** (*ser'-e-brōt, ser'-e-brōt*) [*ser'-e-brum*, the brain]. A white, fatty principle obtainable from brain substance. Cf. *Cerebra*.

**Cerebrotomy** (*ser'-e-brōt-ō-mī*) [*ser'-e-brum*, the brain; *tomē*, to cut]. Surgical or anatomic section of brain-tissue.

**Cerebrum** (*ser'-e-brum*) [*L.*]. The chief portion of the brain, occupying the whole upper part of the cranium. See *Brain*.

**Cerectomy** (*ser'-e-brōt-ō-mī*). See *Keratomy*.

**Cerencephalot** (*ser'-e-n-sē-fāl-ōt*) [*κεφαλή*, wax; *ἐγκεφαλον*, brain]. Cephalot.

**Cereolus** (*ser'-e-ol-us*) [*ser'-e*, wax; *pl.*, *Ceroli*]. A bougie of waxed linen, often medicated.

**Ceresin** (*ser'-e-sin*) [*ser'-e*, wax]. Ozokerite that has been bleached without distillation; it is used as a substitute for beeswax.

**Cereus** (*ser'-e-us*) [*L.*, "a wax candle"]. A genus of cactus plants. **C. grandiflorus**. See *Night-blossom*, *Cereus*.

**Cerevisia** (*ser'-e-vī-si-ā*) [*L.*]. Ale or beer. **C. fermentum**, beer yeast. The ferment obtained in brewing beer, and produced by *Saccharomyces cerevisia*. It is given in low states of the system. Dose  $\frac{3}{4}$  ss-j.

**Cerin** (*ser'-e-rin*) [*ser'-e*, wax]. An ether of cerotic acid; one of the substances found in wax.

**Cerise** (*ser'-e-sē*) [*ser'-e*, a cherry-tree]. A pigment of a cherry color. See *Pigments*, *Conspectus of*.

**Cerium** (*ser'-e-rum*) [named after the planet *Ceres*].  $\text{Ce} = 140$ ; quantivalence II, IV. One of the rarer metals. See *Elements*, *Table of*. **C. oxalas**,  $\text{Ce}_2(\text{C}_2\text{O}_4)_3 \cdot 10\text{H}_2\text{O}$ , a white, granular powder, insoluble in water or alcohol, but soluble in hydrochloric acid. The oxalate is the only salt commonly employed in medicine. It is a gastric sedative useful in the vomiting of pregnancy. Dose gr. j-x, in pill. **C. valerianate** has been used in the same class of cases. Dose gr. iss.

**Ceromel** (*ser'-e-ro-mel*) [*κερός*, wax; *μέλι*, honey]. Honey cerate; wax one part, honey two or four parts. It is applied to wounds and ulcers, chiefly in Asiatic countries.

**Ceroplastic** (*ser'-e-ro-plas'-tik*) [*κερός*, wax; *πλάσσειν*, to mould]. Modeled, or as if modeled, in wax]. **C. Catalepsy**. See *Catalepsy*.

**Ceroplasty** (*ser'-e-ro-plas'-te*) [*κερός*, wax; *πλάσσειν*, to mould]. The modeling of anatomic preparations in wax.

**Cerosin** (*ser'-e-ro-sin*) [*κερός*, wax]. A wax-like substance forming a white or grayish-green coating on some species of sugar-cane. When purified, it yields fine, light pearly scales.

**Cerosis** (*ser'-e-rō-sis*) [*κηρός*, wax]. That morbid condition of a membrane in which it seems to consist of wax-like scales.

**Cerotene** (*ser'-e-rō-tēn*) [*κηρός*, wax]. An alkylen or olefin,  $\text{C}_{27}\text{H}_{56}$ , obtained from Chinese wax; it melts at  $58^\circ$ ; cerylene.

**Cerotic Acid** (*ser'-e-rōt-ik*). See *Acid*, *Cerotic*.

**Certificate** (*ser'-e-rōt-ik-āt*) [*certificare*, to certify]. A written statement, as for insurance, or in case of birth or death.

**Cerulean Blue**. See *Pigment*, *Conspectus of*.

**Cerulein** (*ser'-e-rō-le-in*). Same as *Alizarin Green*, one of the Alizarins. See *Pigment*, *Conspectus of*.

**Cerumen** (*ser'-e-rū-men*) [*ser'-e*, wax]. The wax of the ear.

**Ceruminous** (*ser'-e-rū-min-us*) [*ser'-e*, wax]. Pertaining to cerumen.

**Ceruse** (*ser'-e-rus*) [*ser'-e-rus*, white lead]. 1. White lead: basic carbonate and hydrate of lead. 2. A white fine powder. **C. of antimony**, white oxid of antimony, also antimonious acid.

**Cervical** (*ser'-e-rīk-āl*) [*cervix*, the neck]. Pertaining to the neck, or to the cervix uteri. **C. Carcinoma**, carcinoma of the neck of the womb. **C. Choke**, in the horse, the lodgment of a foreign body in the esophagus at any point between the "throat-latch" and the shoulder. **C. Endometritis**. See *Endometritis*. **C. Pregnancy**, a rare condition in which from atrophy of the decidua membranes the impregnated ovum is not properly held in place, and dropping, lodges in the cervical canal, where it develops until the uterus, not being able to hold it longer, expels it.

**Cervicen** (*ser'-e-rīs-en*) [*cervix*, the neck]. Belonging solely to the cervix.

**Cervicocardiac** (*ser'-e-rīs-īk-ār'-de-āk*) [*cervix*, the neck; *καρδια*, the heart]. Relating to the neck and the heart, as the cervicocardiac nerves, branches of the vagus.

**Cervicoplex** (*ser'-e-rīs-īp-leks*) [*cervix*, the neck; *plexus*, a network]. The cervical plexus.

**Cervicitis** (*ser'-e-rīs-ī-tis*) [*cervix*, the neck; *ιτις*, inflammation]. Inflammation of the cervix uteri.

**Cervicobrachial** (*ser'-e-rīk-o-brā'-ke-āl*) [*cervix*, the neck; *brachium*, the arm]. Relating to the neck and the arm.

**Cervico-bregmatic** (*ser'-e-rīk-o-breg-mat'-īk*) [*cervix*, the neck; *βρεγμα*, the sinciput]. Relating to the cervix or nucha and the bregma.

**Cervicodynia** (*ser'-e-rīk-o-dīn'-e-ā*) [*cervix*, the neck; *ὄδυνη*, pain]. Cramp or neuralgia of the neck.

**Cervico-facial** (*ser'-e-rīk-o-fā'-shāl*) [*cervix*, neck; *facies*, face]. Relating to the neck and the face.

**Cervico-occipital** (*ser'-e-rīk-o-ok-sīp'-it-āl*) [*cervix*, the neck; *occiput*, the back of the head]. Relating to the neck and the back of the head.

**Cervico-orbicular** (*ser'-e-rīk-o-or-bīk'-u-lār*) [*cervix*, neck; *orbicularis*, circular]. Relating to the neck and the orbicular muscle.

**Cervico-vaginal** (*ser'-e-rīk-o-vāj'-in-āl*) [*cervix*, the neck; *vagina*, a sheath]. Relating to the cervix uteri and the vagina.

**Cerviculate** (*ser'-e-rīk'-u-lāt*) [*cervicula*, a little neck]. In biology, having a slender neck.

**Cervix** (*ser'-e-rīks*) [*L.*]. The neck; also the posterior part of the neck. Applied also to constricted parts of other organs, as the cervix of the bladder, or of the penis. **C. Uteri**, the neck of the womb. **C. Vesicæ**, the neck of the bladder.

**Ceryl** (*ser'-e-rīl*) [*cera*, wax],  $\text{C}_{27}\text{H}_{55}$ . An organic radical found in combination in beeswax.

**Cerylene** (*ser'-e-rīl-ēn*). See *Cerotene*.

**Cesarean, or Cæsarean, Operation** (*ser'-e-rē-an-op-er-ā'-shun*) [*cædere*, to cut]. Extraction of the fetus through an incision made in the abdomen. **C. O., Conservative**, the removal of the fetus through an opening in the anterior abdominal wall, without removing the uterus or its appendages. **C. O., Elective**, one done at a selected time prior to labor. **C. O., Improved**. See *Sänger's Operation*, *Porro's Operation*, etc. **C. O., Post-mortem**, extraction of the child after the mother's death. For the various methods proposed of performing the *Cesarean Operation*, see *Gastro-elytrotomy*, *Laparo-elytrotomy*, *Gastro-hysterectomy*, *Gastro-hysterotomy*, and the operations of *Porro*, *Sänger*, *Porro-Müller*, *Kehrer*, and *Thomas*, under *Operations*, *Table of*.

**Cesarean Section**. See *Operations*, *Table of*.

**Cesium, or Cæsium** (*ser'-e-si-um*) [*L.*, "bluish-gray"],  $\text{Cs} = 132.6$ ; quantivalence I. A rare alkaline metal resembling potassium in physical and chemic properties. **C. bromid**, like the other bromids, is a good sedative, but its cost is very great. The oxalate and nitrate have also been employed medicinally.

- Unof. **C. chlorid**, unof., lowers the pulse-rate and raises the arterial pressure. Dose gr. ij-v.
- Cespitose** (*ses'-pit-os*) [*caespes*, a turf or sod]. In biology, growing in or characterized by tangled or matted tufts.
- Cesspool** (*ses'-pool*) [E. dial., *suss*, a puddle; ME., *pool*]. A reservoir for water; a privy.
- Cestoid**, or **Cestode** (*ses'-toid*, or *ses'-tod*) [*κεστός*, a girdle; *εἶδος*, likeness]. Shaped like a girdle, or ribbon; applied to worms, of which *Tenia* is a type.
- Cetacea** (*se-ta'-se-ah*) [*cetus*, a whale]. An order of mammals living in the sea, as the whale, dolphin, etc.
- Cetaceum** (*se-ta'-se-um*) [L.; *gen.*, *Cetacei*]. Spermaceti. A fatty substance somewhat resembling paraffin in its physical properties. It is obtained from the head of the sperm whale, *Physeter macrocephalus*. It is soluble in ether, chloroform, and boiling alcohol, and is employed only as an emollient. **C.**, **Ceratum**, contains spermaceti 10, white wax 35, olive oil 55 parts.
- C.**, **Ung.** (B. P.), contains spermaceti, white wax, almond oil, and benzoin.
- Cetraria** (*se-tra'-re-ah*) [*cetra*, a short Spanish shield]. 1. A genus of lichens. 2. Iceland moss. A lichen, *C. Islandica*, found in Iceland and other northern countries. It contains a form of starch, *Lichenin*, that gelatinizes when boiled with water. It is a feebly tonic demulcent, sometimes recommended in pulmonary affections. **C.**, **Decoct.**, contains five per cent. of the lichen. Dose  $\frac{3}{4}$  ij-iv.
- Cetrarin** (*se-tra'-rin*) [*cetra*, a short Spanish shield]. The bitter principle of Iceland moss, crystallizing in fine needles, and nearly insoluble in water.
- Cetyl** (*se'-til*) [*cetus*, a whale],  $C_{16}H_{33}$ . An alcoholic radical existing in beeswax and spermaceti.
- Cetylid** (*se'-til-id*) [*cetus*, a whale],  $C_{22}H_{43}O_3$ . Geoghegan's term for the substance in the brain that reduces alkaline solutions of cupric salts.
- Cevadilla** (*sev-ad-il'-ah*). See *Cebadilla*.
- Cevadillin** (*sev-ad-il'-in*) [*cevadilla*],  $C_{34}H_{53}NO_8$ . An uncrystallizable alkaloid obtained from cevadilla.
- Cevadin** (*sev'-ad-in*),  $C_{22}H_{49}NO_9$ . A crystalline alkaloid of cevadilla. See *Veratrin*.
- Ceylon Sickness**. See *Beriberi*.
- Chabert's Disease**. See *Diseases*, *Table of*.
- Chæraphrosyne** (*ke-raf-ros'-in-e*) [*χαίρειν*, to rejoice; *ἀφροσύνη*, senselessness]. Amenomania.
- Chæromania** (*ke-ro-ma'-ne-ah*) [*χαίρειν*, to rejoice; *μανία*, madness]. Amenomania.
- Chæta** (*ke'-tah*) [*χαίτη*, a long hair]. A bristle.
- Chætophorous** (*ke-toff'-or-us*) [*χαίτη*, a long hair; *φέρειν*, to bear]. In biology, bearing bristles.
- Chaffbone** (*chaf'-bon*) [AS., *cauf*, husk; *bān*, a bone]. A name for the inferior maxilla.
- Chagres Fever**. See *Fever*.
- Chain** (*chān*) [ME., *chaine*, a chain]. 1. A series of connected links of metal, etc. 2. In chemistry, a group of like atoms joined together by chemie affinity without the intervention of atoms of another kind. **C.** **Écraseur**, an écraseur of which a chain forms the cutting part. **C.-saw**, a surgeon's saw, the teeth of which are linked together like a chain.
- Chair** (*chār*) [ME., *chaire*, a chair]. 1. A seat of office, as that of a professor. 2. A piece of furniture consisting of a seat with a back support. **C.**, **Vibrating**. See *Shaking Cure*. **C.**, **Whirling**, a revolving-chair in which formerly a maniacal patient was rapidly whirled. This was regarded as both a sedative and a curative procedure.
- Chalastic** (*kal-as'-tik*) [*χαλαστικός*, making supple]. 1. Emollient, softening. 2. An emollient or laxative medicine.
- Chalastodermia** (*kal-as-to-der'-me-ah*). Synonym of *Dermatolysis*.
- Chalaza** (*kal-a'-zah*) [*χάλαζα*, a hailstone]. In biology, one of the twisted cords binding the yolk-bag of an egg to the lining membrane of the shell; or that part of a seed where its coats unite with each other and the nucleus.
- Chalazion** (*kal-a'-ze-on*) [*χαλᾶζιον*, a small hailstone]. A tumor of the eyelid from retained secretion of the Meibomian glands; a Meibomian cyst.
- Chalazonephritis** (*kal-a-zo-nef'-ri'-tis*) [*χάλαζα*, hail; *νεφρον*, the kidney; *ιτις*, inflammation]. Granular nephritis.
- Chalicosis** (*kal-ik-o'-sis*) [*χάλιξ*, gravel]. A disease of the lungs of workmen caused by the inhalation of dust or sand.
- Chalk** (*chawuk*) [ME., *chalk*, lime]. Carbonate of lime. See *Calcium*. **C. Stone**, gout stone—a deposit beneath the skin in gouty patients.
- Chalot's Operation**. See *Operations*, *Table of*.
- Chalybeate** (*ku-lib'-e-at*) [*χάλυψ*, iron]. Containing iron.
- Chalybs** (*ka'-libz*) [L.]. See *Ferrum*.
- Chamber** (*chām'-ber*) [ME., *chamber*, a room]. A cavity or space. **C.**, **Anterior** (of the eye), the space between the cornea and the iris. **C.**, **Posterior** (of the eye), the space between the iris and the lens. The chambers of the eye contain the aqueous humor.
- Chamberlaine's Operations**. See *Operations*, *Table of*.
- Chamberland's Bougie or Filter**. See *Filter*.
- Chamecephalic** (*kam-e-sef-al'-ik*) [*χαμαι*, low; *κεφαλή*, head]. Characterized by chamecephaly.
- Chamecephalous** (*kam-e-sef-al-us*). See *Chamecephalic*.
- Chamecephaly** (*kam-e-sef'-al-e*) [*χαμαι*, low; *κεφαλή*, head]. In craniometry, that condition of the skull in which the cephalic index is 70° or less. A flat and receding skull.
- Chameconcha** (*kam-e-kong'-kah*) [*χαμαι*, low; *κόγχη*, orbit]. In craniometry, an orbital index below 80.01°.
- Chameconchous** (*kam-e-kong'-kus*) [*χαμαι*, low; *κόγχη*, concha]. In craniometry, having an orbital index of not more than 80°.
- Chamecranious** (*kam-e-kra'-ne-us*) [*χαμαι*, low; *κρανίον*, skull]. In craniometry, having the greatest length of the skull proportioned to its height.
- Chameleon Mineral** (*kam-e'-le-on min'-er-al*). An old name for a crude mixture of potassium manganate with potassium nitrate.
- Chamelirin** (*kam-el-ir'-in*) [*χαμαι*, ground; *λίριον*, lily]. A poisonous glucosid from *Chamelirion luteum*; it is a strong heart-depressant.
- Chamelirion** (*kam-el-ir'-e-on*) [*χαμαι*, ground; *λίριον*, lily]. A genus of liliaceous plants having active medicinal and poisonous properties. **C. luteum**, or *carolinianum*, of the U. S. (called *Helonia dioica*), is a uterine tonic and diuretic. Unof.
- Chameopisthius** (*kam-e-o-pist'-the-us*) [*χαμαι*, low; *ὀπίσθιον*]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the hornion and the lambda is from 17° to 24.5°.
- Chameprosopic** (*kam-e-pro-so'-pik*) [*χαμαι*, low; *πρόσωπον*, face]. Low-faced; having the zygomatic facial index below 90°.
- Chamocephalic** (*kam-o-sef-al'-ik*) [*χαμαι*, the ground, low; *κεφαλή*, head]. See *Chamecephalic*.
- Chamois Leather** (*sham'-wah*, or *sham'-e*). See *Leather*.
- Chamois-skin** (*sham'-wah*, or *sham'-e-skin*). Properly the skin or tanned leather of the chamois; now prepared from split sheep-skin. It is used in surgery and for underclothing.

**Chamomile** (*kam'-e-mil*). See *Anthemum* and *Matricaria*.

**Chamoprosopie** (*kam'-pro-sop-ik*) [*χάμος*, on the ground; *-ωσις*, lace]. See *Chamoprosopi*.

**Champagne** (*shim-pain'*) [Fr.]. An effervescent wine (see *Union*), sometimes prescribed as a remedy for nausea and vomiting. For *Champagnes* see *Wines*.

**Champak** (*cham'-pak*) [Beng., *champa*]. A magnoliaceous tree of India and Indo-China, *Michelia champaca*. Its highly fragrant flowers are used for nasal catarrhs and for headaches and eye-disorders; its bark is febrifuge and emmenagogue. See *Michelia*. Unof.

**Chancebone** (*chan'-en*). A name for the ischium.

**Chancre** (*chang'-ker*) [Fr., same]. A term formerly used indiscriminately for any primary venereal ulcer, but now generally conceded to signify the initial lesion of syphilis, a true infecting sore, followed by constitutional symptoms (see *Syphilis*); while *chancre* is employed to designate the infectious but non-constitutional sore. C., **Hard, Hunterian, Indurated, Infecting, Non-suppurating, or True**, the ulcer of venereal origin, that is followed by constitutional syphilis. C., **Non-incubatory, Non-infecting, Simple, or Soft**, a contagious, suppurating, non-syphilitic venereal ulcer, properly called *chancre*. C., **Phagedenic**, chancre with a tendency to erosion. C., **Serpiginous**, a variety of the last that spreads superficially in curved lines.

**Chancroid** (*hang'-kroid*) [*chancre*]. A local, infective process transmitted by sexual intercourse, and characterized by ulceration, local glandular involvement, and often supuration. It has been variously termed the soft, non-indurated, simple, or non-syphilitic chancre. See *Chancre*.

**Change** [*hanj*] [ME., *chanȝen*, to change]. Death. The word is colloquially used either for the establishment or the cessation of the menstrual function. C. of Life, the cessation of the catamenia; the menopause.

**Channel-bone** (*chan'-el-bon*) [ME., *chanel*, a canal; *-en*, a bone]. The clavicle.

**Chantreuil's Method**. In pelvimetry, a method of ascertaining the distance between the tuberosities of the ischia (11 cm.) in estimating the size of the pelvic outlet. The two thumbs are placed upon the tuberosities, and an assistant measures the distance between them.

**Chap** (*chap*) [ME., *chappen*, to cleave]. 1. The jaw (usually in the pl.). 2. A slight or superficial fissure of the skin, usually upon the lips, hands, or nipples.

**Chaptalization** (*chap-tal-iz-ah'-shun*). A method of improving wines consisting in neutralizing the excess of acidity in the must by the addition of marble-dust, and increasing the saccharine content by the addition of a certain quantity of cane-sugar. The wine becomes richer in alcohol, poorer in acid, and the bouquet is not injured.

**Charbon** (*char'-bon*) [Fr.]. The French term for *anthrax*, or *pugetula maligna*.

**Charcoal** (*har'-kol*) [ME., *charcole*]. Coal made by subjecting wood to a process of smothered combustion. See *Carbo animalis* and *Carbo ligni*.

**Charcot Pain**. Pain in the ovarian region.

**Charcot's Disease**, *Sclerose en plaques*. Disseminated, multiple, or insular sclerosis. See *Diseases*, Table of. C., **Joint, or Joint Disease**. See *Arthropathia and Diseases*, Table of. C., **Leyden Crystals**, microscopic, colorless, octahedral or rhomboidal crystals found in the intestinal tract in leukemic and anemic patients and in the sputum of asthmatic and bronchitic patients; so called by Bäumler. Same as *Charcot-Neumann Crystals*. See *Spermin*. C., **S's Method**. See *Hypno-*

*tism*. C., **Neumann Crystals**. See *Spermin*. C., **Robin Crystals**, crystals forming upon leukemic blood when allowed to stand exposed for a few days. C., **s Vibrating Arm-chair**. See *Shaking Cure*.

**Charlatan** (*shar'-lat-an*) [Sp., *charlar*, to prattle]. A quack; a pretender to medical skill; an advertising doctor.

**Charlatanoid** (*shar'-lat-an-oid*) [Sp., *charlar*, to prattle]. A term applied to an organism so closely resembling a charlatan as at times to be almost indistinguishable.

**Charles's Law**. See *Law*.

**Charpie** (*shar'-pe*) [*carpere*, to pluck]. Picked or shredded lint; linen shreds for dressing wounds.

**Charqui** (*char'-ke*) [Chilian]. A name given in South America to strips and slices of beef freed from fat and dried rapidly by sun-heat and sprinkled with maize.

**Charrière's Guillotine**. An instrument for excising the tonsils. See *Operations*, Table of.

**Charta** (*kar'-tah*) [*χάρτης*, paper: *gen. and pl., Chartæ*]. A paper. In pharmacy, a strip of paper as an excipient, the fibers of which are impregnated with the prescribed medicinal substance. Also a wrapper for holding powders or medicines. Of the three official *chartæ*, two are intended as vesicants. C. **epispastica**, or C. **cantharidis**, blistering-paper. C. **em-poretica**, porous or bibulous paper. C. **exploratoria**, test-paper. C. **sinapis**, mustard-paper.

**Chartreuse** (*shar-treez'*) [Fr.]. A tonic cordial, obtained by distillation from various plants growing on the Alps.

**Chartula** (*kar't'-u-lah*) [dim. of *charta*]. A little paper, especially a paper containing a single dose of a medicinal powder.

**Chasma** (*kaz'-mah*), or **Chasmus** (*kaz'-mus*) [*χασμός*, a gaping]. A yawn.

**Chassaignac's Operations**. See *Operations*, Table of.

**Chaste Tree** (*chäst tre*). See *Agnus castus*.

**Chaulmugra Oil** (*chawl-moog'-rah*) [E. Ind.]. A fixed oil expressed from the seeds of *Gynocardia odorata*, a tree native to the E. Indies. It is soluble in alcohol, and its properties are due to *gynocardic acid*. It is thought to be useful in leprosy and is recommended in scaly eczema, psoriasis, and syphilitic skin-affections. For external use, gr. xx of the acid ad  $\frac{5}{8}$  j of petrolatum. Internally, dose grt. v-x of the oil, or gr. ss-ijj of the acid, in capsules. All unof.

**Chaussier**, Line of. See *Lines*, Table of.

**Chautard's Test**. See *Tests*, Table of.

**Chauvel's Operation**. See *Operations*, Table of.

**Chavibetol** (*char'-e-bel'-tol*) [*chavica*, or piper; *betel*],  $C_{10}H_{12}O_2$ . A substance isomeric with eugenol; it occurs in oil of betel.

**Chavica** (*char'-ik-ah*) [native South Sea Island name]. A genus of plants including the long pepper and betel-pepper.

**Chavicin** (*char'-is-in*) [*chavica*, a genus of plants]. An organic basic principle analogous to piperin, found in pepper.

**Chavicol** (*char'-ik-ol*) [*chavica*, a genus of plants],  $C_{11}H_{11}O.H.C_3H_5$ . A substance occurring in the oil obtained from the leaves of *Chavica betel*. It is a colorless oil with a peculiar odor, and boils at  $237^\circ$ ; its sp. gr. at  $20^\circ$  is 1.035.

**Chawstick** (*char'-stik*). See *Chewstick*.

**Check** (*chek*) [ME., *chek*, a sudden stop]. Something restraining. C., **experiment**. See *Control*. C., **ligament**. See *Ligament*. C., **observation**. See *Control*.

**Checker-berry** (*chek'-er-ber'-e*). A popular name for *Gaultheria procumbens*.

**Cheddar Cheese**. See *Cheese*.

**Cheek** (*chek*) [M.E., *cheke*]. The side of the face; it is composed of fat, areolar tissue, muscles, etc.

**Cheese** (*chez*) [M.E., *chese*]. A food prepared from the casein of skimmed or unskimmed milk. In the following table the results of the researches of Payen on the composition of cheese are quoted in 100 parts for the following kinds: (1) Brie, (2) Camembert, (3) Roquefort, (4) Double cream, (5) Old Neufchâtel, (6) New Neufchâtel, (7) Cheshire, (8) Gruyère, (9) Ordinary Dutch, (10) Parmesan. The varieties under I, exhibit an alkaline reaction, and contain, with ammonia, cryptogamic plants, or, as it is termed, are moldy. The varieties under II, so-called boiled, strongly pressed, and salted cheese, exhibit an acid reaction, as also does freshly prepared casein.

|  | I.    |       |       |       |       |
|--|-------|-------|-------|-------|-------|
|  | 1     | 2     | 3     | 4     | 5     |

The character of a few of the different varieties of cheese is as follows: Neufchâtel cheese is a Swiss cream cheese. Limburger cheese is a soft, fat cheese. Fromage de Brie is a soft French cheese, rapidly ripening and developing ammoniacal compounds. Camembert cheese is also a cream cheese. Roquefort cheese is a cheese made from the milk of the ewe. Gruyère cheese is a peculiarly flavored Swiss cheese. Cheddar cheese is a hard cheese made from whole milk. Single and double Gloucester are made, the first from a mixture of skimmed and entire milk, and the second from the entire milk. Parmesan cheese is a very dry cheese, with a large amount of casein and only a moderate percentage of fat. Eidam cheese is a Dutch cheese, also relatively dry, and

covered with red coloring. As to the bacillus of cheese see *Spirillum tyrogonum*, Denecke, under *Bacteria*, Table of.

**Cheese-rennet** (*chez' ren-et*). See *Ladies' Bed-straw*.

**Cheesy** (*chez'-e*) [M.E., *chese*]. Of the nature of cheese.

**C. Degeneration**, caseous degeneration, or caseation.

**C. Tubercle**, a mass of caseously degenerated tissue.

**Cheil-**, or **Cheilo-** (*kil-*, or *kill'-o*). For words thus beginning see *Chil-*, or *Chilo-*.

**Cheiro-** (*kir'-o*). For words thus beginning see *Chiro-*.

**Chekan**, or **Cheken** (*chek'-en*) [Chilian]. 1. The leaves of *Eugenia cheken*, a South American shrub. Its properties are due to an alkaloid and a volatile oil. It is diuretic and expectorant and similar in action to eucalyptus. It is serviceable in chronic catarrh, laryngitis, etc. Dose of the fluid extract 5 ss-j. Unof. 2. The crude resin obtained from *Cannabis indica*.

**Chela** (*ke'-lah*) [*χηλή*, a claw]. In biology, the claw or pincers of a crustacean.

**Chelicera** (*ke-lis'-er-ah*) [*χηλή*, a claw; *κίραξ*, a horn].

In biology, a claw-like appendage of scorpions and spiders, containing a poison-gland in the latter.

**Chelidonic Acid** (*kel-id-on'-ik*). See *Acid*.

**Chelidonin** (*kel-id-o'-nin*) [*χελιδόνιον*, celandine],  $C_{19}H_{17}N_3O_3 + H_2O$ , or  $C_{19}H_{17}NO_4$ . A crystalline alkaloid of celandin (*Chelidonium majus*), of a bitter and acrid taste, and forming colorless salts with acids. It is not a very active substance. See *Sanguinarin*.

**Chelidonium** (*kel-id-o'-ne-um*) [*χελιδόνιον*, celandine]. Celandin. The leaves and stems of *C. majus*, with properties due to a number of alkaloids and acids. It is a drastic cathartic, and externally an irritant, and is of service in jaundice, whooping-cough, and catarrhal pneumonia. Dose of the plant gr. x-xxx; of the juice m℥-xx. Unof.

**Chelidoxanthin** (*kel-id-oks-an'-thin*) [*χελιδόνιον*, celandine]. One of the bitter, crystalline constituents of celandin.

**Cheloid** (*ke'-loid*) [*χηλή*, a claw; *είδος*, form]. A raised or elevated fibroma of the skin; so called from its frequent claw-shape. See also *Keloid*.

**Cheloma** (*ke-lo'-mah*). Same as *Keloid*.

**Chelonin** (*kel'-on-in*). See *Balmomy*.

**Chelotomy** (*ke-lot'-o-me*). See *Kelotomy*.

**Chematropism** (*kem-at'-ro-pizm*). See *Chemotropism*, and *Chemotaxis*.

**Chemic**, **Chemical** (*kem'-ik*, *kem'-ik-al*) [*χημεία*, chemistry]. Of or pertaining to chemistry. **C. Black**. See *Pigments*, *Conspicuous of*. **C. Food**, compound syrup of the phosphates, a very complex preparation used in disorders attended with impaired nutrition. **C. Lung**. See *Neale's Lung*. **C. Pathology**, the chemistry of disease.

**Chemico-radical Theory**. A theory of the constitution of the carbon compounds. It is that the object of organic chemistry is the investigation and isolation of radicals as the more intimate components of the organic compounds.

**Chemiotaxis**, **Chimiotaxis** (*kem'-e-o-taks-is*, *kim'-e-o-taks-is*). See *Chemotaxis*.

**Chemise**, **Rectal** (*she-mèz'*). A form of surgical dressing made of muslin and applied after operations upon the rectum to control or prevent hemorrhage.

**Chemism** (*kem'-izm*) [*χημεία*, chemistry]. Chemic force.

**Chemistry** (*kem'-is-tre*) [*χημεία*, chemistry]. The science of the molecular and atomic structure of bodies.

**Chemocephalus** (*kem-o-sef'-al-us*) [*χαυάι*, low; *κεφαλή*, head]. An individual possessed of a flat head.

**Chemosis** (*ke-mo'-sis*) [*χημωσις*, a gaping]. Conjunctival and sub-conjunctival swelling.

**Chemotactic** (*kēm-e-tak'tik*) [*χημεία*, chemistry; *ταξις*, battle array] Pertaining or relating to chemotaxis.

**Chemotaxis** (*kēm-e-tak'sis*), **Chemiotaxis** (*kēm-e-tak'sis*) [*χημεία*, chemistry; *ταξις*, to order, arrange]. The property of cellular attraction and repulsion. It is displayed by the proteid constituents of the protoplasts of various species of bacteria, as well as by proteids from a great variety of sources. The qualitative *positive* and *negative* are added according as the phenomenon is one of attraction or repulsion.

**Chemotic** (*kēm-ot'ik*) [*χημωτός*, agaping]. Pertaining to or marked by chemosis.

**Chemotropism** (*kēm-ot'rō-pīz-m*) [*χημεία*, chemistry; *τροπή*, a turning, a rout, a putting to flight]. In biology, the destruction of bacteria by phagocytes; the victory of the phagocytes over bacteria, or of bacteria over phagocytes. In biology, the attraction of leukocytes by certain chemie substances held in solution in the blood, either positive or negative. (Cf. *Chemotaxis*.)

**Chenopodium** (*kē-n-e-pō-de-um*) [*χην*, a goose; *πόδιον*, a little foot]. American Wormseed; the fruit of *C. am-antifolium*, or *anthelminticum*, a plant native to the United States with properties due to a volatile oil, which is the only preparation used. It is a mild carminative stimulant, promoting the secretions of the skin and kidneys, and also a very efficient anthelmintic against the round worm. Dose of the oil  $\mathfrak{m}\gamma$ -xv.

**Cheoplastic** (*kē-ō-plas'tik*) [*χεῖν*, to pour; *πλαστικός*, plastic]. Made soft and yielding by heat. **C. Metal**, an alloy composed of tin, silver, and bismuth, with a small trace of antimony.

**Cherry** (*chēr'ē*) [*ME., chery*]. The bark of the common cherry, *Prunus scotina*, a mild bitter and tonic, containing tannin. Dose of fld. ext.  $\mathfrak{z}$  ss-]. *Prunin*, a concentrated ext. Dose gr. j-ijj. **C.-Compound**, each  $\mathcal{O}$  represents cherry-bark  $\mathfrak{z}$  viij, lettuce  $\mathfrak{z}$  iij, horehound  $\mathfrak{z}$  iijss, bloodroot  $\mathfrak{z}$  j, veratrum viride  $\mathfrak{z}$  ss. Dose  $\mathfrak{m}\mathfrak{xv}$ - $\mathfrak{z}$  j. All unof. See also *Choke-cherry* and *Prunus virginiana*. **C.-laurel**, the European evergreen cherry, *Prunus lauro-cerasus*. Water distilled from its leaves is used in the same way as dilute hydrocyanic acid. See *Acid, Hydrocyanic*.

**Cheselden's Operations.** See *Operations, Table of*.

**Chest.** See *Thorax*. **C., Barrel-**, a peculiar formation of the chest observed in cases of long-standing emphysema of the lungs; it is round like a barrel, and in respiration is lifted vertically instead of being expanded laterally. See *Emphysema*. **C. founder.** See *Pneum.* **C. Sweetbread.** See *Sweetbread*.

**Chestnut.** See *Castanea*. **C. Extract.** See *Horse-chestnut bark*. **C.-wood**, a wood used in leather-manufactures, derived from the *Castanea vesca*, and containing from eight to ten per cent. of a tannin that closely resembles gallotannic acid. The extract, containing from 14 to 20 per cent. of tannin, is used largely to modify the color produced by hemlock extract and for tanning and dyeing.

**Chevreul's Test.** See *Tests, Table of*.

**Chevron-bone** (*chē-vr'n-bōn*) [*ML., capro*, a rafter; *hōn*, bone]. One of two bones forming a V-shaped arch behind the caudal portion of the back-bone of many animals.

**Chewstick** [*ML., chion*, to chew; *stiken*, to pierce]. The bark of *Guaiacum domingensis*, a popular aromatic bitter in the West Indies. It is also used as a dentifrice and masticatory. Dose of the fld. ext.  $\mathfrak{z}$  i- $\mathfrak{z}$  iij.

**Cheyne's Operation.** See *Operations, Table of*.

**Cheyne-Stokes Breathing or Respiration.** See *Signs and Symptoms, Table of*. **C. Nystagmus**, a

variety of nystagmus in which the oscillations of the

TRACING OF CHEYNE-STOKES BREATHING.

eyeball have a rhythmic variation similar to the rhythm of Cheyne-Stokes respiration.

**Chian** (*ki'an*) [*χίος*, Chios], Pertaining to Chios, an island in the Aegean Sea. **C. Turpentine.** See *Terebinthina*.

**Chiasm**, **Chiasma** (*ki'azm*, *ki-az'-mah*) [*χιάσμα*, to make a cross, as an X]. The optic commissure.

OPTIC CHIASM AND ADJACENT PARTS.

1. Infundibulum. 2. Tuber cinereum. 3. Corpora albicantia, or mammillaria. 4. Crus cerebri. 5. Pons varolii. 6. Middle cerebellar peduncle. 7. Anterior pyramid. 8. Decussation. 9. Olivary body. 10. Gray tubercle of Rolando. 11. Arciform fibers. 12. Superior extremity of spinal cord. 13, 13. Denticulate ligament. 14. Spinal dura mater. 15. Optic tract. 16. Optic chiasm. 17. 3d nerve. 18. 4th nerve. 19. 5th nerve. 20. 6th nerve. 21. Facial nerve. 22. Auditory nerve. 23. Nerve of Wrisberg. 24. Glosso-pharyngeal nerve. 25. Pneumoglossal nerve. 26, 26. Spinal accessory nerve. 27. Hypoglossal. 28. 1st cervical pair. 29. 2d cervical pair. 30. 3d cervical pair.

**Chiastometer** (*ki-as-tom'-et-er*) [*χιαστός*, crossed; *μέτρον*, a measure]. An instrument for measuring any deviation of the optic axes from parallelism.

**Chibou** (*see-hoo'*) [*Fr.*]. The resin or gum of *Bursera gummifera*, a tree of Florida and tropical America; it is locally valued in diseases of the lung and kidneys, and is used in various plasters and ointments; it is called also *cachibou* and *archipin*. Unof.

**Chibret's Operation.** See *Operations, Table of*.

**Chica Red** (*che'-kah*) [S. Amer.]. See *Pigments, Conspectus of*.

**Chick Pea** (*chik'-pe*) [ME., *chich-pea*]. The plant *Cicer aristinum*; also the pulse derived from it; much used as an article of food in various countries. *Lathyrism* (apparently chronic oxalic-acid poisoning), *q. v.*, sometimes results from the too free use of the chick-pea as a food.

**Chickahominy Fever** (*chik-a-hom'-in-e fe'-ver*). See *Fever*.

**Chicken** (*chik'-en*) [ME., *chiken*, a chicken]. A domestic fowl. **C. Breast**, an abnormally prominent condition of the sternum and of the external region; pigeon-breast; it is seen in rachitic persons, etc. **C. Cholera**, See *Cholera*. **C.-fat Clot**. A clot of blood consisting largely of fibrin, yellowish in color, and containing but few red-cells. **C.-pox**. See *Variella*.

**Chicle** (*chik'-l*) [S. Amer.]. A gum obtained from the *Achras sapota*, a tree of tropical America, and used as a masticatory.

**Chico Red** (*che'-ko*) [S. Amer.]. Same as *Chica Red*.

**Chicory** (*chik'-or-e*) [*κίχαρα*, *chicory*]. *Cichorium intybus*, a composite plant of Europe and Asia, naturalized and growing in the United States. Its ground-root is used to adulterate coffee.

**Chicot** (*che'-ko*) [Fr.]. Kentucky Coffee Bean. The seeds of *Gymnocladus canadensis*. Chicot contains a volatile oil and a glucosid, and is probably a cerebro-spinal stimulant. It is sometimes used as a substitute for coffee. Unof.

**Chiene's (John) Method**. A method of locating the fissure of Rolando. A square piece of paper is folded once, so as to form a triangle. Either of the two equal angles is then 45°. One free edge is then folded back so that this angle is bisected, thus forming an angle of 22.5°. The paper is then unfolded at the first crease, so as to secure an angle of 67.5, the apex of which is placed 1/2 inch behind the mid-point between the glabella and the inion, so that the straight side of the paper corresponds to the middle of the anterior aspect of the head; the other margin of the paper, the fold, corresponds to the fissure of Rolando, the length of which is about 3 3/4 inches. **C.'s Operation**. See *Operations, Table of*.

**Chignon Fungus** (*shèn-yón'*) [Fr.]. A fungoid disease of the hair in which oval or roundish masses surround the hair-shaft at irregular intervals. It is also misnamed *Chignon gregarine*.

**Chigoe** (*chig'-o*) [Fr., *Chique*]. Sand-flea; *Sarcophylla penetrans*, a small parasite of the skin, affecting usually that portion between the toes and fingers; also the red harvest mite, *Leptus irritans*. It is also written *chigo*, *chegoe*, *chigga*, *chiggre*, *chigger*, *jigger*. See *Parasites (Animal)*, *Table of*.

**Chilblain** (*chil'-blàn*) [AS., *cele*, cold; *blegan*, to boil]. Pernio; Erythema pernio. An erythematous local inflammation and swelling of the skin, due to cold. It is most common in the young of lymphatic constitution. The symptoms are an eruption of circular, raised erythematous spots, attended with severe itching or burning; later, bullæ may form, and these may lead to ulceration.

**Child** (*child*) [ME., *child*; *pl.*, *Children*]. A young person. **C.-bed**, the popular term for the condition of a woman during and after labor. **C.-bed Fever**. See *Puerperal Fever*. **C.-birth**, parturition. **C.-crowing**, the crowing sound of the respiration that characterizes *Laryngismus stridulus*, *q. v.* **C.-hood**, the age of childishness; the period before puberty. **C.-murder**. See *Infanticide*. **Children's Diseases**. See *Pediatrics*.

**Chile** (*chil'-e*). See *Capsicum*.

**Chili Saltpeter**. See *Sodium*.

**Chilitis** (*kil'-it-tis*) [*χρῖτις*, lip]. Inflammation of a lip.

**Chill** (*chil*) [ME., *chil*]. A sensation of cold accompanied by shivering, usually appearing shortly after exposure to cold or wet. It is frequently the initial symptom of grave acute disorders, as pneumonia, etc. It is a prominent symptom of various forms of malarial fever. See *Rigor*.

**Chilli** (*chil'-e*). See *Capsicum* and *African Pepper*.

**Chills and Fever**. A popular term for intermittent fever.

**Chilo-angioscope** (*ki-lo-an'-je-o-skop*) [*χρῖλος*, lip; *ἀγγειον*, vessel; *σκοπεῖν*, to look]. An apparatus for observing the circulation of the blood in the human lip.

**Chilolace** (*kil-ok'-as-e*) [*χρῖλος*, lip; *κακός*, evil]. A firm, reddish swelling of the lip in scrofulous children.

**Chiloglossa** (*ki'-lo-glos-ah*) [*χρῖλος*, lip; *γλῶσσα*, tongue]. In biology, the anterior lip, or the membranous protuberance that lies in front of the mandibles and is continued under these in certain arthropods.

**Chilogramma** (*ki-lo-gram'-mah*) [*χρῖλος*, lip; *γραμμα*, a mark; *pl.*, *Chilogrammata*]. Jadelot's labial line. See *Lines, Jadelot's*.

**Chiloma** (*ki-lo'-mah*) [*χρῖλωμα*, a lip]. In biology, a projecting thickened upper lip—as in the camel.

**Chiloplasty** (*ki'-lo-plas-te*) [*χρῖλος*, lip; *πλάσσειν*, to form]. Any plastic operation upon the lip.

**Chilorrhagia** (*ki-lor-a'-je-ah*) [*χρῖλος*, lip; *ῥήγναι*, to burst forth]. Hemorrhage from the lips.

**Chiloschisis** (*ki-los'-kis-is*) [*χρῖλος*, lip; *σχίσαι*, a split]. Hare-lip.

**Chimaphila** (*ki-maf'-il-ah*) [*χρῖμα*, winter; *φιλος*, loving]. Pipsissewa, Prince's Pine; the leaves of *C. umbellata*, an evergreen found in the U. S., an astringent tonic and excellent diuretic. The bruised leaves are used as a rubefacient. It is valuable in dropsy, several forms of kidney disease, and for affections of the urinary passages. **C.**, *Fld. Ext. Dose* 3 ss-ij. **C.**, *Decoctum*. 1 to 17. *Dose* 3j-iiij. Unof.

**Chimaphilin** (*ki-maf'-il-in*) [*χρῖμα*, winter; *φιλος*, loving]. A precipitate from the tincture of *Chimaphila umbellata*, used in cancers; it is a diuretic, discutient, and alterative. *Dose* two to three grains. Unof.

**Chimiotaxis** (*kim-e-o-tak'-is*). See *Chemotaxis*.

**Chimiotetic** (*kim-e-o-tet'-ik*). See *Chemotactic*.

**Chimney-sweep's Cancer**. Cancer of the scrotum, formerly not uncommon among chimney-sweepers.

**Chin** [ME., *chin*]. The mentum; the lower part of the face, at or near the symphysis of the lower jaw. **C.**, *Double*. See *Buccula*. **C.-cough**, whooping-cough. **C.-jerk**. See *Jaw-jerk*, and *Reflexes, Table of*. **C. Reflex**. See *Reflexes, Table of*.

**China** (*kin'-ah*, or *ke'-nah*) [Sp.]. Same as *Cinchona*.

**China** (*ch'i'-nah*) [Pers., *Chini*, China]. A country of Asia.

**C.-blue**. See *Pigments, Conspectus of*. **C.-clay**. See *Pigments, Conspectus of*. **C.-grass**, Ramie; a soft, silky vegetable substance used as a surgical dressing; the fiber of *Bahmeria nivea*. **C.-root**, the rhizome of *Smilax china*, a plant of Eastern Asia; it is used as a substitute for true sarsaparilla. Unof. **C.-root, False**, the plant *Smilax pseudo-china* of N. America. Unof. **C.-white**. Same as *White Lead*.

**Chinese** (*chi-nè's*, or *nè-z*) [Pers., *Chini*, China]. Pertaining or belonging to China. **C. Catarrh**. Synonym of *Influenza*. **C. Foot**, a deformed and undeveloped foot due to atrophy from compression. It is a popular fashion among Chinese ladies. **C. Green**. See *Pigments, Conspectus of*. **C. Red**. Same as *Vermilion*. **C. Twist**, a name given to a variety of silk-thread used in surgery. **C. Wax**, Insect Wax; a

substance deposited by an insect, *Coccus cerifera*, upon the Chinese ash-tree. It is a white, very crystalline, and brittle wax, resembling spermaceti in appearance, with a specific gravity of .073 at 15° C.; it fuses at 82° to 83° C. It is slightly soluble in alcohol and ether, very soluble in benzene. It is used in candle making. **C. White.** Same as *Zin whit.* **C. Yellow.** Same as *King's Yellow* and *Ocher*.

**Chinoidin**, or **Chinoidinum** [*kin-oid-in*, or *kin-oid-in'*], [*Sp., Chin.*]. Quinoidin. A mixture of amorphous alkaloids obtained in the manufacture of quinin. It has the therapeutic properties of quinin.

**Chinolin** [*chen'-lin*]. See *Chinolina* and *Quinolin*.

**Chinolina** [*chen'-lin-ah*] [*Chin.*, quinin],  $C_9H_7N$ . Chinolin, Leukolin. An alkaloidal derivative of quinin and cinchonin, occurring also in coal-tar. It is now generally prepared by heating anilin or nitro-benzol with glycerin and a dehydrating agent. It is a valuable antiseptic and antipyretic, and is useful in pneumonia and typhus and other fevers. It is commonly used in the form of the tartrate because of the deliquescent nature of the other salts. Dose m̄ij to x; of the tartrate gr. v-xv. Unof.

**Chinovin** [*ken'-vin*] [*Chin.*, quinin],  $C_{30}H_{48}O_8$ . A glucoside obtained from *Cinchona*.

**Chinwhelk.** Synonym of *Tinea gycosis*.

**Chiococca** [*ki-oh'-koh'-ah*] [*Chion.*, snow; *kokkos*, a berry]. A genus of rubiaceous plants. See *Cahina*.

**Chionanthin** [*ki-on-an'-thin*] [*Chion.*, snow; *anthos*, a flower]. A precipitate from the tincture of the root-bark of *Chionanthus virginiana*; it is an aperient, diuretic, tonic, and narcotic. Dose 1 to 3 grains. Unof.

**Chionanthus** [*ki-on-an'-thus*] [*Chion.*, snow; *anthos*, a flower]. A genus of oleaceous trees and shrubs. **C. virginiana**, fringe-tree or poison-ash. The root is used as a vulnerary. See also *Fringe-tree*. Unof.

**Chionyphe** [*ki-on'-if'-e*] [*Chion.*, snow; *yphe*, a texture]. A genus of fungi. **C. carteri**, a parasitic fungus, apparently the cause of the disease known as *Fungus Feet*, or *Mithura Feet*, q. v.

**Chip Blower** [*chip' (bl'-er)*]. A warm-air blow-pipe.

**Chiragra** [*ki-ra'-grah*] [*Chir.*, the hand; *agra*, a seizure]. Gout in the hand.

**Chirarthrititis** [*ki-rar'-thrit'-ti*] [*Chir.*, hand; *arthron*, a joint; *itis*, inflammation]. Rheumatism or arthritis of the hand.

**Chirata** [*che-ra't tah*, or *che ra't tah*] [Hind., *chirata* a species of gentian]. Chiretta. The entire plant, *Sarcocolla chirata*. It resembles gentian in its therapeutic properties, and is an excellent tonic. It does not contain any tannin. Dose of the powdered plant gr. xv-xxx. **C., Fld. Ext.**, in glycerin and alcohol. Dose m̄xv-xxx. **C., Infusum** (B. P.). Dose a wineglassful. **C., Tinct.**, ten per cent. in strength. Dose 5 ss ij.

**Chiratin** [*ki-ra't in*] [Hind., *chirata*, a species of gentian],  $C_{12}H_{10}O_6$ . A light-yellow, crystalline, bitter glucoside, obtained from *Chirata*.

**Chiretta** [*ki-r'-ah*]. See *Chirata*.

**Chiretin** [*ki-r'-in*] [Hind., *chirata*, a species of gentian]. A precipitate obtained from the tincture of *chirata*.

**Chirismus** [*ki-ris'-mu*] [*Chirama*, a handling]. 1. Manipulation; a kind of massage. 2. Spasm of the hand.

**Chiromancy** [*ki'-rom-an-ty*]. See *Palmistry*.

**Chiropevimeter** [*ki-ro-pe'-im'-et-er*] [*Chir.*, the hand; *pevis*, the pelvis; *meter*, a measure]. An instrument for use in the manual measurement of the pelvis.

**Chiropodist** [*ki-ro-pod'-ist*] [*Chir.*, hand; *podis*, *podus*, foot]. A surgeon or person who professionally treats

diseases of the hands and feet, especially corns, bunions, etc.

**Chiro-Pompholyx** [*ki-ro-pom'-fo-lyks*] [*Chir.*, hand; *πομφολυξ*, blister]. Dysidrosis; pompholyx; an ill-defined, inflammatory skin-disease confined to the hands and feet, and characterized by the development of peculiar vesicles or blebs, arranged in groups. They are deeply seated and distributed chiefly on the soles and palms and sides of the fingers. Itching, burning, pain, and stiffness are present. The disease is common in neurotic women in the prime of life; it is almost invariably recurrent, and is rare in winter.

**Chirurgeon** [*ki-rer'-jon*] [*Chirourge*, a surgeon]. A surgeon.

**Chirurgia** [*ki-rer'-je-ah*] [*Chir.*, hand; *εργον*, work]. Surgery.

**Chirurgical** [*ki-rer'-jik-al*] [*Chirourgia*, surgery]. Pertaining to surgery.

**Chirurgien Dentiste** [*ki-rer'-je-en den-tist'*] [Fr.]. Surgeon-dentist.

**Chisel Cramp** [*chiz'-el-kramp*]. See *Cramp*.

**Chitin** [*ki'-tin*] [*Chiton*, a tunic],  $C_{15}H_{26}N_2O_{10}$ . The substance composing the chief part of the exoskeleton of many invertebrates, as crabs, lobsters, etc. It is the animal analogue of the cellulose of plants. When heated with concentrated HCl it is decomposed into glycosamin and acetic acid. *Glycosamin* ( $C_6H_{13}NO_5$ ), crystallizes from alcohol in fine needles, is dextro-rotatory, and reduces Fehling's fluid to the same extent as does dextrose, but is not fermentable. **C. Substance**, a gelatinous substance found in hydatid cysts.

**Chittim Bark** [*chit'-im bark*]. See *Cascara Sagrada*.

**Chlamydate** [*klam'-id-at*] [*Chlamis*, a mantle]. In biology, provided with a pallium or mantle.

**Chlamydeous** [*klam-id'-e-us*] [*Chlamis*, a mantle]. In biology, pertaining to the floral envelopes.

**Chlamydospore** [*klam-id-o-spor*] [*Chlamis*, mantle; *σπορά*, seed]. In biology, applied to a spore having its own protective envelop.

**Chloasma** [*klo-as'-mah*] [*Chloazein*, to be pale-green]. Melanoderma; melasma; a condition characterized by dyschromie of the skin of various sizes and shapes, and of a yellow, brown, and black color. They occur chiefly upon the face, and are idiopathic or symptomatic in character. An old name for *Tinea versicolor*. **C. hepaticum**, Liver-spots; a form following dyspepsia and popularly associated with hepatic disturbance. **C. phthisicorum**, the brown patches upon the skin of the forehead or upper portions of the cheeks in tuberculous patients. **C. uterinum**, chiefly located on the forehead, temples, cheeks, nipples, and median line of abdomen. They are marked during pregnancy, and often during menstruation.

**Chloracetic Acid** [*klo-ras'-et-ik*]. See *Acid*.

**Chloral** [*klo'-ral*] [*Chlorin*; *aldehyd*],  $C_2Cl_3HO$ . A pungent, colorless, mobile liquid. The name is often misapplied to chloral hydrate. **C. Butylicum**, **Butyl-Chloral Hydrate** (B. P.), croton-chloral,  $C_{11}H_5Cl_3O$ , a solid occurring in crystalline scales, resembling chloral hydrate, but made with butyl,  $C_4H_9$ , as a base, instead of ethyl,  $C_2H_5$ . Its properties are parallel to those of chloral, but are much feebler. Dose gr. v-xx in syrup. **Syrupus Butyl-Chloral**, 16 grains to the ounce. Dose ʒj-iv. Unof. **C. Hydrate**, a colorless, crystalline solid having the composition  $C_2HCl_3(H_2O)_n$ , the hydrate of chloral. It is a powerful hypnotic, antispasmodic, and depressant to the cerebral, medullary, and spinal centers, and, to a limited extent, is an anesthetic. It is serviceable in fevers accompanied by cerebral excitement, in chorea, convulsions, and all affections requiring a cerebral depressant, and is excellent in delirium tremens, but should be used with

- great caution. Dose gr. v-xx; smaller if combined with potassium or sodium bromid. **C., Syrupus** (B.P.). Dose ʒss-ij. **C.-urethane.** See *Uralium*.
- Chloralamid** (*klo'-ral-am'-id*) [*chloral*; *amid*],  $\text{CCl}_3\text{CH}(\text{OH})\text{NHCHO}$ . A name inaptly applied to chloral formamide. In doses of 30 to 45 grains it is a hypnotic.
- Chloralid** (*klo'-ral-id*) [*chloral*],  $\text{C}_5\text{H}_2\text{Cl}_6\text{O}_3$ . A substance obtained when trichlorolactic acid is heated to  $150^\circ$ , with an excess of chloral; it crystallizes from alcohol and ether in large prisms, is insoluble in water, and melts at from  $114^\circ$  to  $115^\circ$ ; it boils at from  $272^\circ$  to  $273^\circ$ .
- Chloralimid** (*klo'-ral'-im-id*) [*chloral*; *imid*],  $\text{CCl}_3\text{CH.NH}$ . A hypnotic allied to chloral, soluble in alcohol. Dose same as that of chloral hydrate. Unof.
- Chloralism** (*klo'-ral-izm*) [*chloral*]. 1. Chloral poisoning; the morbid state caused by the injudicious use of chloral. 2. The habit of using chloral.
- Chloralize** (*klo'-ral-iz*) [*chloral*]. To put under the influence of chloral.
- Chloralose** (*klo'-ral-os*) [*chloral*; *glucose*]. Anhydroglycochloral; a product of the action of anhydrous chloral upon glucose.
- Chloramyl** (*klo'-ram-il*). See *Anesthetic*.
- Chloranemia** (*klo'-ran-e'-me-ah*). Synonym of *Chlorosis*.
- Chloranil** (*klo'-ran-il*) [*chlorin*],  $\text{C}_6\text{Cl}_4\text{O}_2$ . A compound obtained from many benzene compounds (anilin, phenol, isatin) by the action of chlorin or potassium chlorate and HCl. It consists of bright, golden leaflets, insoluble in water, but soluble in hot alcohol and ether.
- Chlor-anodyne** (*klor-an'-o-din*) [*chlorin*; *an priv.*; *ἄδινη*, pain]. A proprietary remedy introduced as an improvement on chlorodyne. It contains morphin hydrochlorate, tinct. cannab. Ind., chloroform, dilute hydrocyanic acid, and aromatics. Dose for an adult  $\mathfrak{m}\text{xv}$ . Unof.
- Chloranthus** (*klo'-ran'-thus*) [*χλωρός*, yellowish-green; *ἄνθος*, a flower]. A genus of chloranthaceous plants of hot climates. **C. officinalis**, of Java, is a valuable febrifuge and anti-spasmodic. Unof.
- Chlorate** (*klo'-rát*) [*chlorin*]. Any salt of chloric acid. See *Potassii chloras*; *Sodii chloras*, etc.
- Chloremia** (*klo'-re'-me-ah*) [*χλωρός*, green; *αἷμα*, blood]. A blood-disorder, either idiopathic or associated with other ailments, consisting in a diminution of the percentage of the hemoglobin and a decrease in the number of red blood-corpuscles.
- Chlorethyl** (*klo'-reth'-il*). See *Ethyl chlorid*.
- Chloric** (*klo'-rik*) [*chlorin*]. Pertaining to or containing chlorin. **C. Acid.** See *Acid*. **C. Ether.** 1. See *Ethyl chlorid*. 2. See *Spiritus Chloroformi*.
- Chlorid** (*klo'-rid*) [*chlorin*]. In chemistry, a binary compound, one of the elements of which is chlorin. **C. of Iron Test.** See *Tests, Table of*. **C. of Methyl.** See *Anesthetic*. **Chlorids, Test for.** See *Tests, Table of*.
- Chlorin, or Chlorine** (*klo'-rin*) [*χλωρός*, green].  $\text{Cl} = 35.5$ ; quantivalence 1. A non-metallic element. At ordinary temperatures it is a greenish-yellow gas, prepared by decomposing sodium chlorid,  $\text{NaCl}$ . It is highly irritative to the skin and mucous membranes, producing spasmodic closure of the glottis. It is the most valuable of disinfectants. **Chlori, Aqua, C., Liquor** (B.P.), chlorin water, contains 4 per cent. of the gas in solution. It is a good antiseptic wash. Dose, internally,  $\mathfrak{m}\text{x-xxx}$ . **Calx Chlorinata**, "chlorid of lime," a hypochlorite of calcium containing free chlorin; a valuable disinfectant. Dose, internally, gr. ij-vj. **Calx Chlorat, Liq.** (P. B.), con-
- tains 1 pound of the salt per gallon of water. **Sodium Chlorat, Liq., Labarraque's Solution**, sodium carbon ate 10, calx chlorinata 8, water ad 100. Dose  $\mathfrak{m}\text{x-}\mathfrak{z}\text{j}$  in 20 parts of water. **Chlorin Vapor** (B. P.), used for inhalation. **C.-Hunger**, the condition of the body when chlorin (usually in the form of common salt) is lacking. Among the immediate results of this deficiency are indigestion and albuminuria.
- Chloroanemia** (*klo-ro-an-e'-me-ah*). Synonym of *Chlorosis*.
- Chlorobrom** (*klo'-ro-brom*) [*chlorin*; *bromin*]. A solution each ounce of which contains 30 grains of chloralamid and potassium bromid. It is a hypnotic.
- Chlorocruorin** (*klo-ro-kru'-or-in*) [*χλωρός*, green; *cruor*, blood]. A green respiratory pigment from the greenish blood of the Sabella.
- Chlorodyne** (*klo'-ro-din*) [*χλωρός*, green; *ἄδινη*, pain]. A proprietary remedy supposed to contain chloroform, ether, morphin, cannabis Indica, hydrocyanic acid, and capsicum. The various imitations differ widely. It is a good anodyne and narcotic. Dose  $\mathfrak{m}\text{x-xxx}$ , with care. Unof.
- Chloroform** (*klo'-ro-form*) [*chloroformum*, chloroform: *gen.*, *Chloroformi*]. Methyl Terchlorid,  $\text{CHCl}_3$ . A heavy, colorless liquid obtained by the action of chlorinated lime on methyl alcohol. (The commercial article, *C. venale*, contains 2 per cent. of impurities and is unfit for administration.) Administered internally, chloroform produces narcosis and violent gastro-enteritis. Chloroform has an agreeable odor and a sweetish taste. It solidifies in the cold, melts at  $71^\circ$ , boils at  $61^\circ$ , and its specific gravity is 1.526. It is excellent in true cholera and in similar diseases of the stomach and bowels. Externally, it is much employed as an ingredient of rubefacient and anodyne liniments. Mixed with a large per cent. of air and inhaled, it is one of the most valuable of general anesthetics, but occasionally (1:3000) causing death by cardiac paralysis. See *Anesthetic*. Deep injections in the vicinity of the sciatic nerve are recommended in sciatica. **C., Alcoholized**, a mixture of chloroform and alcohol. **C., Ammoniated**, equal parts of ammonia in alcohol and chloroform; antipyretic and anodyne. Unof. **C., Aqua.** Dose ʒss-ij. **C., Liniment**, contains chloroform 30, soap-liniment 70. **C., Liniment., Comp.**, contains chloroform ʒj, oil of turpentine ʒj, tincture of opium ʒiv, tincture of acornite ʒij. Unof. **C., Emulsum**, chloroform 4, expressed oil of almond 6, tragacanth 1.5, water q. s. Dose ʒj-ʒij. **C., Spt.**, pure chloroform 6, alcohol 94 parts. Dose  $\mathfrak{m}\text{x-}\mathfrak{z}\text{j}$ . **Tinct. chloroformi et morphinæ** (B. P.), a substitute for chlorodyne. Each dose of ten minims contains chloroform  $\mathfrak{m}\text{ij}\frac{1}{4}$ , ether  $\mathfrak{m}\text{ij}\frac{1}{2}$ , alcohol  $\mathfrak{m}\text{ij}\frac{1}{4}$ , morphin hydrochlorate gr.  $\frac{1}{8}$ , dilute hydrocyanic acid  $\mathfrak{m}\mathfrak{ss}$ , oil of peppermint  $\mathfrak{m}\mathfrak{ss}$ , fluid extract of licorice  $\mathfrak{m}\text{ij}\frac{1}{4}$ , treacle and syrup q. s. **Tinct. C. Comp.** (B. P.), chloroform 2, alcohol 8, comp. tinct. of cardamon 10. Dose  $\mathfrak{m}\text{xx-}\mathfrak{z}\text{j}$ .
- Chloroformism** (*klo'-ro-for-mizm*) [*chloroformum*, chloroform]. 1. The use of chloroform to excess for its narcotic effect. 2. The symptoms produced by this use of the drug.
- Chlorolymphoma** (*klo-ro-limf-o'-mah*) [*χλωρός*, green; *lympho*, water; *ῥμα*, a tumor]. Another name for chloroma; it is thought by some to be a variety of lymphoma, from its containing lymphocytes.
- Chloroma** (*klo-ro'-mah*) [*χλωρός*, yellowish-green; *ῥμα*, a tumor; *πλ.*, *Chloromata*]. "Green cancer"; a rare variety of sarcoma, of a greenish tint, usually seated upon the periosteum of the bones of the head, or upon the dura.

**Chloronitrobenzene** (*klor-ni-tro-ben'-zen*) [*χλωρος*, green; *nitrum*, niter; *benzen*]. One of the ingredients of *Rebue*, q. 7.

**Chlorophane** (*klor-ro-fan*) [*χλωρος*, green; *φαίνεσθαι*, to appear]. A yellowish green chromophane. See *Chromophane*.

**Chlorophyll** (*klor-ro-fil*) [*χλωρος*, green; *φύλλον*, leaf]. A coloring matter occurring in the chlorophyll-granules in all the green parts of plants. Wax and other substances are associated with it. Its constitution is not yet known. It is the substance by whose agency carbohydrates are formed in green plants.

**Chlorophyllan** (*klor-ro-fil'-an*) [*χλωρος*, green; *φύλλον*, leaf]. A substance obtained from fresh grass by extracting the latter with boiling absolute alcohol. It appears as crystals that melt at 110° C. to a black liquid, which on further heating burns with a luminous flame. It is easily soluble in ether, benzol, and chloroform.

**Chloroplastid** (*klor-ro-plas'-tid*) [*χλωρος*, green; *πλασ-ταω*, to form or mold]. In biology, a chlorophyll-granule. Applied by Lankester to chlorophyll-bearing cells as seen in *Hydra viridis*. Probably these are secretory cells or digestive glands comparable to the liver cells of *Amphioxus*.

**Chlorosarcoma** (*klor-ro-sar-ko'-mah*). See *Chloroma*.

**Chlorosis** (*klor-ro'-sis*) [*χλωρος*, green]. The "green sickness," a disease of young women, associated with anemia and menstrual abnormality, usually suppression. It is the most common form of idiopathic anemia. It is favored by a sedentary life and poor hygiene. The blood shows a marked deficiency in hemoglobin, with some decrease in the number of red corpuscles, together with an increase in its watery elements. The patients do not seem to suffer from any interference with the general nutrition; in fact, there is often a tendency to the accumulation of fat in the tissues. There is present well-marked neurasthenia, with, at times, hysterical manifestations. There can always be heard a systolic bruit at the base of the heart and in the neck, anemic in nature. The bowels are constipated, and there may be some fever. **C. pituitosis**. Synonym of *Enteritis, Pseudo-membranous*. **C. rubra**, cases of chlorosis of moderate grade, with a reddish tint of the cheeks, especially on exertion.

**Chlorotic** (*klor-ro'-tik*) [*χλωρός*, paleness]. Relating to chlorosis. A person affected by chlorosis.

**Chlorozone** (*klor-ro'-zon*) [*χλωρος*, green; *ὄζειν*, to smell]. A yellow liquid assumed to be a mixture of chlorine and ozone; it is formed by passing nascent chlorine through caustic soda; its composition is not known. It is a strong bleaching-agent and disinfectant.

**Chlorphenol** (*klor-fe'-nol*) [*χλωρός*, green; *φαινέξ*, purple red],  $C_6H_4Cl.OH$ . Mono-chlor-phenol, a substance possessed of marked antiseptic and antituberculous properties. It is strongly recommended for inhalation in diseases of the respiratory passages.

**Chlorum** (*klor'-rum*) [*χλωρος*, green; *γεν.*, *Chlori*]. The official pharmacologic name of chlorine. See *Chlorin*.

**Choana** (*cho'-an*) [*χωνυα*, a funnel; *πλ.*, *Choanæ*]. A funnel-like opening. A name applied to the posterior nasal orifice.

**Choanocyte** (*cho'-an-ot*) [*χωνυα*, a funnel; *κύτταρ*, a cell]. In biology, a collar-cell.

**Choanosome** (*cho'-an-ozem*) [*χωνυα*, a funnel; *σώμα*, body]. In biology, that portion of the cavity of a sponge that is lined with collar-cells.

**Chocolate** (*cho'-lat*) [*Mex.*, *chocola*, cacao; *latl*, water]. 1. A dried paste prepared from the powder of cacao beans, see *Cacao*, with various mucilaginous and aromatic ingredients. 2. A beverage prepared from the foregoing. 3. A sugared comfit, variously

compounded and flavored, containing some proportion of the foregoing paste; sometimes medicated, as with cinchona, scammony, or magnesia. **C., African**. See *Iba*.

**Choke** (*chok*) [*ME.*, *choken*, to choke]. To suffocate; to prevent the access of air to the lungs by compressing or obstructing the trachea. **C.-cherry**, the fruit of *Prunus (Cerasus) virginiana*, not the *P. virginiana* of the pharmacopœia; common in the U. S. It is antispasmodic, tonic, and slightly astringent. *Cerasin* is a concentrated extract. Dose gr. ij-viij. Unof. **C.-damp**, a name given by miners to carbonic acid gas. Called also *Black-damp*.

**Choked Disc** (*chokd disk*). See *Papillitis*.

**Choking** (*chok'-ing*) [*ME.*, *choken*, to choke]. Partial or complete suffocation, whether by the lodgment of food, or any foreign body in the larynx, trachea, pharynx, or esophagus, or by the inhalation of any irrespirable gas or vapor. **C. Distemper**, a name applied in Eastern Pennsylvania to cerebro-spinal meningitis in the horse.

**Cholagogic** (*kol-ag-og'-ik*) [*χολή*, bile; *ἀγωγός*, carrying off]. 1. Stimulating the flow of bile. 2. A cholagogue.

**Cholagogue** (*kol'-ag-og*) [*χολή*, bile; *ἀγωγός*, leading]. Any medicine that promotes the flow of bile; an agent that is supposed to stimulate the secretion or excretion of bile.

**Cholalic Acid** (*ko-lal'-ik*). See *Choloidinic Acid*.

**Cholangitis** (*ko-lan-jil'-tis*) [*χολή*, bile; *ἀγγειον*, a vessel]. Inflammation of a bile-duct. It is attended with acute-like paroxysms, chills, fever, and sweating, and jaundice of varying intensity.

**Cholate** (*kol'-at*) [*χολή*, bile]. Any salt of cholic acid.

**Choleate** (*kol'-e-at*) [*χολή*, bile]. Any salt of choleic acid.

**Cholecyanin** (*kol-e-si'-an-in*). See *Bilicyanin*.

**Cholecyst** (*kol'-e-sist*) [*χολή*, bile; *κύστις*, a bladder]. The gall-bladder.

**Cholecystectasia** (*kol-e-sis-tek-ta'-se-ah*) [*χολή*, bile; *κύστις*, a cyst; *ἐκτασις*, a distention]. Distention or dilatation of the gall-bladder.

**Cholecystectomy** (*kol-e-sis-tek'-to-me*) [*χολή*, bile; *κύστις*, bladder; *ἐκτομή*, a cutting off]. Excision of the gall-bladder.

**Cholecystendysis** (*kol-e-sis-ten'-dis-is*) [*χολή*, bile; *κύστις*, a bladder; *ἐνδυσσις*, an entering]. Cholecystotomy, q. v.

**Cholecystenterostomy** (*kol-e-sis-ten-ter-os'-to-me*) [*χολή*, bile; *κύστις*, a bladder; *έντερον*, intestine; *στόμα*, a mouth]. Incision of the gall-bladder and intestine, with suture of the intestinal wound to that of the gall-bladder, so as to relieve the effects of obstruction of the gall-duct by opening a new passage into the intestine.

**Cholecystic** (*kol-e-sis'-tik*) [*χολή*, bile; *κύστις*, a bladder]. Relating to the gall-bladder.

**Cholecystitis** (*kol-e-sis-ti'-tis*) [*χολή*, bile; *κύστις*, bladder; *ιτις*, inflammation]. Inflammation of the gall-bladder.

**Cholecystocolostomy** (*kol-e-sis-to-ko-lol'-to-me*) [*χολή*, bile; *κύστις*, a bladder; *κόλον*, the colon; *τομή*, a cutting]. The surgical establishment of a passage between the gall bladder and the colon.

**Cholecystolithotripsy** (*kol-e-sis-to-lith'-o-trip-se*) [*χολή*, bile; *κύστις*, a bladder; *λίθος*, a stone; *τριβέν*, to crush]. The crushing of gall-stones in the gall-bladder.

**Cholecystoncus** (*kol-e-sis-long'-kus*) [*χολή*, bile; *κύστις*, bladder; *ὄγκος*, a tumor]. A swelling or tumor of the gall-bladder.

**Cholecystorrhaphy** (*kol-e-sist-or'-a-fe*) [*χολή*, bile; *κύστις*, bladder; *ῥαφή*, a seam]. Suture of the gall-bladder.

**Cholecystostomy** (*kol-e-sis-tos'-to-me*) [*χολή*, bile; *κίστις*, a bladder; *στόμα*, mouth]. The surgical establishment of an opening into the gall-bladder.

**Cholecystotomy** (*kol-e-sis-tot'-o-me*) [*χολή*, bile; *κίστις*, bladder; *τίμνειν*, to cut]. Incision of the gall-bladder to remove gall-stones, etc.

**Choledoch** (*kol'-e-dok*) [*χολή*, bile; *δέχεσθαι*, to receive]. 1. Conducting bile. 2. A bile-duct. 3. The common bile-duct.

**Choledochitis** (*kol-ed-o-ki'-tis*) [*χολή*, bile; *δέχεσθαι*, to receive; *ιτις*, inflammation]. Inflammation of the choledoch duct.

**Choledochoduodenostomy** (*kol-ed-o-ko-du-od-en-os'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *duodecim*, twelve; *στόμα*, mouth]. The surgical establishment of a passage between the common bile-duct and the duodenum.

**Choledoch-enterostomy** (*kol-ed-o-ko-en-ter-os'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *έντερον*, bowel; *στόμα*, mouth]. The surgical establishment of a passage between the cavity of the choledoch duct and the small intestine.

**Choledocholithotripsy** (*kol-ed-o-ko-lith'-o-trip-se*) [*χολή*, bile; *δέχεσθαι*, to receive; *λίθος*, a stone; *τρίβειν*, to rub]. The crushing of a gall-stone in the ductus choledochus.

**Choledochostomy** (*kol-ed-o-ko-s'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *στόμα*, mouth]. The formation of a fistula in the gall-duct through the abdominal wall.

**Choledochotomy** (*kol-ed-o-ko-t'-o-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *τομή*, section]. Opening of the common bile-duct by incision.

**Choledochus** (*kol-ed'-o-kus*) [*χολή*, bile; *δέχεσθαι*, to receive]. Receiving or holding bile. **C.**, **Ductus Communis**, the common excretory duct of the liver and gall-bladder.

**Choledology** (*kol-ed-ol'-o-jē*) [*χολή*, bile; *λέγειν*, to speak]. The sum of knowledge concerning bile.

**Choleic** (*kol-e'-ik*) [*χολή*, bile]. Pertaining to the bile.

**Cholein** (*kol-e-in*) [*χολή*, bile]. A mixture of several principles of the bile; a fatty principle found in bile.

**Cholelith** (*kol'-e-lith*) [*χολή*, bile; *λίθος*, a stone]. A biliary calculus or gall-stone.

**Cholelithiasis** (*kol-e-lith-i'-as-is*) [*χολή*, bile; *λίθος*, a stone]. The presence of, or a condition associated with, calculi in the gall-bladder or in a gall-duct.

**Cholemesia** (*kol-em'-es-is*) [*χολή*, bile; *έμεσις*, vomiting]. The vomiting of bile.

**Cholemia** (*kol-e'-me-ah*) [*χολή*, bile; *αίμα*, blood]. The presence of bile in the blood.

**Cholemic** (*kol-e'-mik*) [*χολή*, bile; *αίμα*, blood]. Relating to cholemia; marked or caused by cholemia.

**Cholepyrrhin** (*kol-e-pir'-in*) [*χολή*, bile; *πυρρός*, orange-colored]. The brown coloring-matter of bile. Also called *Bilepyrrhin*.

**Cholera** (*kol'-er-ah*) [*χολέρα*; from *χολή*, bile]. A name given to a number of acute diseases characterized mainly by large discharges of fluid material from the bowels. A synonym of *C. asiatica*. **C. asiatica**, an acute, specific, highly malignant disease, existing in India and the tropics of Asia during the entire year, and occasionally spreading as an epidemic over large areas. It is characterized by excessive vomiting, alvine discharges resembling flocculent rice-water, severe cramps, collapse, and frequently death. The rate of mortality varies from 10 to 66 per cent., the average being over 50 per cent. The cause or specific virus is very generally believed to be the so-called "*comma bacillus*" of Koch, which is contained in the rice-water discharges. Cultures of this germ have in some

instances produced the disease and in others have failed. The virus, whatever it may be, commonly gains entrance into the system by means of the drinking-water; hence in cases of threatened epidemic, and during the prevalence of an epidemic the purity of the water-supply should be carefully investigated.

**C.**, **Bilious**, a form of the disease attended with excessive discharge of bile. **C.**, **Chicken**, a very fatal epidemic disease of fowls, marked by tumefaction of the lymphatic glands, with inflammation and ulceration of the digestive organs. The symptoms peculiar to cholera are wanting. **C.**, **English**. See *C. nostras*. **C.**, **European**. See *C.*, *Simple*. **C. gravior**. Synonym of *C. asiatica*. **C.-hand**, a livid, grayish-blue, corrugated state of the palms of the hand from immersion in water. It is present in death from drowning, and is also called "washerwoman's hand." **C.**, **Hog**, an infectious disease attacking swine and characterized by a patchy redness of the skin, with inflammation and ulceration of the bowels, enlargement of the abdominal glands, and congestion of the lungs. **C. infantum**, the "*summer complaint*" of infants and young children; an acute disease occurring in warm weather, and characterized by gastric pain, vomiting, purgation, fever, and prostration. The cause of the disease is the prolonged action of heat, together with errors in diet and hygiene. It is most common among the poor and in hand-fed babes. The disease is of short duration, death frequently ensuing in three to five days. **C. infectiosa**. See *Cholera asiatica*. **C. morbus**, an acute catarrhal inflammation of the mucous membrane of the stomach and intestines, with enteric pain, purging, vomiting, spasmodic contractions of the muscles, etc. It is a disease of the heated term and is very similar to Asiatic cholera in its symptomatology. **C. nostras**, also called *English Cholera* and *Cholerine*. Same as *C. morbus*. **C. sicca**, a term applied to those cases of Asiatic cholera in which rice-water liquid is found in the intestines after death, though none had been voided during life. **C.**, **Simple**, the diarrhea with cramps, purging, and collapse, common in the autumn or late summer. **C.**, **Summer**. See *C.*, *Simple*. **C. Voice**, the peculiar whispering voice of those in the cold stage of cholera.

**Choleraic** (*kol-er-a'-ik*) [*χολέρα*, cholera]. Pertaining to or resembling cholera. **C. Diarrhea**. See *Diarrhea*.

**Choleraphobia** (*kol-er-af-o'-be-ah*) [*χολέρα*, cholera; *à priv.*; *φόβος*, fear]. Absence of fear during an epidemic of cholera.

**Choleraphonia** (*kol-er-af-o'-ne-ah*) [*χολέρα*, cholera; *à priv.*; *φωνή*, a voice]. Aphonia occurring during an attack of cholera.

**Choleriform** (*kol-er'-if-form*) [*χολέρα*, cholera; *forma*, form]. Resembling or appearing like cholera.

**Cholorigenous** (*kol-er-ij'-en-us*) [*χολέρα*, cholera; *γίνεσις*, production]. Giving origin to cholera.

**Cholerine** (*kol'-er-in*) [dim. of *cholera*]. A mild case of choleraic diarrhea. Also, the initiatory stage of malignant cholera. Also, the zymotic cause or virus of cholera. See *Cholera nostras*.

**Choleroid** (*kol'-er-oid*) [*χολέρα*, cholera; *είδος*, like]. Resembling cholera; choleriform.

**Cholerophobia** (*kol-er-o-fo'-be-ah*) [*χολέρα*, cholera; *φοβος*, fear]. Morbid dread of cholera.

**Cholerrhagia** (*kol-er-a'-je-ah*) [*χολή*, bile; *ρήγνιναι*, to burst forth]. Synonym of *Cholera morbus*.

**Cholesteatoma** (*kol-es-te-at-o'-mah*) [*χολή*, bile (cholesterin); *στέατωμα*, a sebaceous tumor; *pl.*, *Cholest-atomata*]. A tumor containing cells inclosing plates of cholesterol, and occurring most frequently at the base

of the brain, but occasionally in subcutaneous tissue. It often incloses sebaceous glands, hair-follicles, and other dermal structures.

**Cholesteatomatous** (*kōl'-stē-at-m'at-us*) [*χολή*, bile; *στέαμα*, a sebaceous tumor]. Of the nature of, pertaining to, or affected with, cholesteatoma.

**Cholesteremia** (*kōl'-stēr-'mē-ah*), or **Cholesterinemia** (*kōl'-stēr-in-'mē-ah*) [*χολή*, bile; *στεῖον*, stear fat; *αἷμα*, blood]. The retention of cholesterol in the blood; also, the morbid state ascribed to such retention.

**Cholesterol** (*kōl'-stēr-in*) [*χολή*, bile; *στερεός*, solid],  $C_{26}H_{44}O$ , or  $C_{26}H_{42}O$ . A monatomic alcohol, a constituent of bile, and a normal ingredient of nervous tissue. Also the fatty substance forming the acid principle of biliary calculi. It is a glittering, white, crystalline substance, soapy to the touch, crystallizing in thin needles and rhombic plates. It is quite insoluble in water and in cold alcohol, but soluble in solutions of bile salts; it is levo-rotatory.

CHOLESTERIN CRYSTALS.

**Cholestin** (*kōl'-stē-in*) [*χολή*, bile; *στερεός*, complete],  $C_{26}H_{42}NO_6$ . An amorphous, soluble, yellow pigment derived from bilirubin. It is the final product of the oxidation of bile pigments. It is readily soluble in alkalis, alcohol, and chloroform.

**Choleuria** (*kōl'-e-ur'ē-ah*) [*χολή*, bile; *οὔρον*, urine]. The presence of bile in the urine.

**Choleverdin** (*kōl'-tēr-'dīn*) [*χολή*, bile; *viridis*, green]. See *Biliverdin*.

**Cholic** (*kōl'-'ik*) [*χολή*, bile]. Pertaining to the bile. **C. Acid**. See *Acid*.

**Cholin** (*kōl-'in*) [*χολή*, bile],  $C_5H_{13}NO_2$ . A substance found among the products of the decomposition of pig's bile and ox bile, hence its name. It is also found in the extracts of the suprarenals, and is a product of the decomposition of lecithin. It is a colorless fluid, of oily consistence, possesses a strong alkaline reaction, and forms with acids very deliquescent salts. It is a very unstable body. It is soluble in alcohol or ether. It is distinct from, though closely related to, neurin. **C. Group of Ptoamines**, four ptoamines—Choline, Neurin, Betain, and Muscarin—have been thus classified. All these bases may be considered as oxidation products of trimethyl-ammonium hydrate.

**Cholochrome** (*kōl'-s-krom*) [*χολή*, bile; *χρῶμα*, color]. Any bile-pigment.

**Cholocyst** (*kōl-'sīt*). See *Cholecyst*.

**Cholohematin** (*kōl-'hēm'at-in*) [*χολή*, bile; *αἷμα*, blood]. A pigment found in the bile of the ox and sheep. It is probably a derivative of hematin.

**Choloidinic Acid** (*kōl-'id-in'-'ik*). See *Acid*.

**Chololith** (*kōl-'lith*). See *Cholith*.

**Cholithiasis** (*kōl-'lith-'ā-sīs*). See *Cholithiasis*.

**Cholithic** (*kōl-'lith'-'ik*) [*χολή*, bile; *λίθος*, a stone]. Pertaining to a cholith.

**Cholophein** (*kōl-'fē-in*). See *Biliphein*.

**Cholopoiesis** (*kōl-'pō-'i-ō-sīs*) [*χολή*, bile; *ποίησις*, a making]. The formation of bile.

**Cholorrhagia** (*kōl-'rē-'jā-ah*) [*χολή*, bile; *ῥιγνίνα*, to burst forth]. A sudden flow of bile.

**Cholorrhea** (*kōl-'rē-'ah*) [*χολή*, bile; *ῥεῖο*, a flow]. Any excessive discharge of bile.

**Cholosis** (*kōl-'ō-sīs*) [*χολή*, bile]. Any disease caused by or associated with a perversion of the biliary secretion.

**Cholotic** (*kōl-'ōt'-'ik*) [*χολή*, bile]. Due to or associated with a cholosis.

**Choluria** (*kōl-'u-'re-ah*) [*χολή*, bile; *οὔρον*, urine]. The presence of bile, bile-salts, or bile-pigments in the urine. Also, the greenish coloration of the urine.

**Chondodendron** (*kōn-dō-den-'dron*). See *Chondrodendron*.

**Chondral** (*kōn'-drāl*) [*χόνδρος*, cartilage]. Cartilaginous; relating to or composed of cartilage.

**Chondralgia** (*kōn-drāl'-'jē-ah*) [*χόνδρος*, cartilage; *ἄλγος*, pain]. Pain in or about a cartilage.

**Chondrectomy** (*kōn-drek'-'tō-me*) [*χόνδρος*, cartilage; *ἐκτομή*, a cutting out]. Surgical excision of a cartilage, or of a part of one.

**Chondren** (*kōn'-drēn*) [*χόνδρος*, cartilage]. Belonging to a cartilage in itself.

**Chondrification** (*kōn-drif-'ik-a-'shun*) [*χόνδρος*, cartilage; *facere*, to make]. The process of being converted into cartilage; the state of being chondrified.

**Chondrify** (*kōn'-drif-'i*) [*χόνδρος*, cartilage; *fieri*, to become]. To convert into cartilage; to become cartilaginous.

**Chondrigen** (*kōn'-drij-en*) [*χόνδρος*, cartilage; *γενεῖν*, to produce]. That material of the hyaline cartilage which on boiling with water becomes chondrin.

**Chondrigenous** (*kōn-drij-'en-us*) [*χόνδρος*, cartilage; *γενεῖν*, to produce]. Producing chondrin; relating to cartilage that has not hardened.

**Chondriglucose** (*kōn-dre-'glu-'kōs*) [*χόνδρος*, cartilage; *ζάκχης*, sweet]. A material formed by boiling cartilage with mineral acids. It has a sweet taste and the properties of glucose.

**Chondrin** (*kōn'-drin*) [*χόνδρος*, cartilage]. A substance obtained from the matrix of hyaline cartilage by boiling. It resembles gelatin in general properties, but differs from it in not being precipitated by tannic acid. The substance yielding it is *chondrigen*, probably an anhydrid. See also *Glue*.

**Chondritis** (*kōn-dri-'tis*) [*χόνδρος*, cartilage; *τις*, inflammation]. Inflammation of a cartilage.

**Chondroblast** (*kōn-dro-'blast*) [*χόνδρος*, cartilage; *βλαστός*, germ]. A cell of developing cartilage.

**Chondroclasis** (*kōn-drok'-'las-'is*) [*χόνδρος*, cartilage; *κλάσις*, fracture]. The crushing of a cartilage.

**Chondroclast** (*kōn'-dro-'klast*) [*χόνδρος*, cartilage; *κλέειν*, to break]. A cell supposed to be concerned in the absorption of cartilage.

**Chondrocostal** (*kōn-dro-kōs'-'tal*) [*χόνδρος*, cartilage; *costa*, a rib]. Relating to the ribs and their cartilages.

**Chondrodendron** (*kōn-dro-den'-'dron*) [*χόνδρος*, cartilage; *δένδρον*, a tree]. A genus of S. American menispermaceous climbing-plants. **C. glaberrimum** and **C. tomentosum** are among the plants that furnish *Paraíra brava*.

**Chondrodynia** (*kōn-dro-dīn'-'ē-ah*) [*χόνδρος*, cartilage; *δύνη*, pain]. Pain in a cartilage.

**Chondrodystrophia** (*kōn-dro-dis-'trō-'fē-ah*) [*χόνδρος*, cartilage; *δύς*, bad; *τρέφειν*, to nourish]. Fetor rhachiitis.

**Chondroepiphysis** (*kōn-dro-e-'pif-'is-'is*) [*χόνδρος*, cartilage; *ἐπιφύσις*, an outgrowth]. A cartilage that is destined to become an epiphysis; an epiphysis that has been developed from cartilage.

**Chondrofibroma** (*kōn-dro-fi-'brō-'mah*) [*χόνδρος*, cartilage; *fibra*, a fiber; *ῥωμα*, a tumor; *γενεῖν*, to produce]. Chondroma with fibromatous elements.

**Chondrofibromatous** (*kōn-dro-fi-'brō-'mat-'us*) [*χόνδρος*, cartilage; *fibra*, a fiber; *ῥωμα*, a tumor]. Of the nature of chondrofibroma.

**Chondrogen** (*kōn'-dro-jen*) [*χόνδρος*, cartilage; *γενεῖν*, to produce]. 1. See *Chondrigen*. 2. A substance found in fetal and early life, forming a part of the tissue of imperfectly developed cartilage.

- Chondrogenesis** (*kon-dro-jen'-es-is*) [χόνδρος, cartilage; γένεσις, formation]. The formation of cartilage.
- Chondrogenetic** (*kon-dro-jen-et'-ik*) [χόνδρος, cartilage; γένεσις, formation]. Forming cartilage; relating to chondrogenesis.
- Chondrogenous** (*kon-droj'-en-us*) [χόνδρος, cartilage; γένεσις, production]. Of the nature of chondrogen; producing cartilage.
- Chondroglucose** (*kon-dro-glu'-kōs*) [χόνδρος, cartilage; γλυκός, sweet]. One of the glucoses. See *Carbohydrate* and *Glucose*.
- Chondrography** (*kon-drog'-ra-fē*) [χόνδρος, cartilage; γράφειν, to write]. An anatomic description of the cartilages.
- Chondroid** (*kon'-droid*) [χόνδρος, cartilage; εἶδος, form]. Resembling cartilage.
- Chondrology** (*kon-dro'-lo-jē*) [χόνδρος, cartilage; λόγος, science]. The science of cartilages.
- Chondroma** (*kon-dro'-mah*) [χόνδρος, cartilage; ὄμα, tumor]. A cartilaginous tumor. See *Enchondroma*.
- Chondromalacia** (*kon-dro-mal-a'-se-ah*) [χόνδρος, cartilage; μαλακία, softening]. Softening of a cartilage. *C. auris*. Same as *Hematoma auris*.
- Chondromalacosis** (*kon-dro-mal-ak-o'-sis*). See *Chondromalacia*.
- Chondromatous** (*kon-drōm'-at-us*) [χόνδρος, cartilage; ὄμα, a tumor]. Relating to or of the nature of cartilage.
- Chondro-myxoma** (*kon-dro-miks-o'-mah*) [χόνδρος, cartilage; μύξα, mucus; ὄμα, a tumor: *pl.*, *Chondromyxomata*]. A chondroma with myxomatous elements.
- Chondrosarcoma** (*kon-dro-sar-ko'-mah*) [χόνδρος, cartilage; σάρκωμα, sarcoma: *pl.*, *Chondrosarcomata*]. A cartilaginous and sarcomatous tumor.
- Chondrosarcomatous** (*kon-dro-sar-kōm'-at-us*) [χόνδρος, cartilage; σάρκωμα, sarcoma]. Relating to chondrosarcoma.
- Chondrosis** (*kon-dro'-sis*) [χόνδρος, cartilage]. Formation of cartilage.
- Chondrosteous** (*kon-dros'-te-us*) [χόνδρος, cartilage; ὀστέον, bone]. In biology, having a cartilaginous skeleton.
- Chondrotome** (*kon'-dro-tōm*) [χόνδρος, cartilage; τομός, cutting]. An instrument for cutting cartilage.
- Chondrotomy** (*kon-dro't'-o-mē*) [χόνδρος, cartilage; τέμνειν, to cut]. The dissection or surgical division of a cartilage, or the anatomic analysis of a cartilage.
- Chondrus** (*kon'-dru-s*) [χόνδρος, a grain; cartilage]. 1. Irish Moss. The substance of the algae *C. crispus* and *Gigartina mamilliosa*. These yield, on boiling with water, a soluble colloid consisting mainly of mucilage. This is demulcent and somewhat nutrient, and is sometimes used in making *blanc mange*. Dose indefinite. Unof. See *Carragheen*. 2. A cartilage; the ensiform cartilage.
- Chopart's Amputation**. See *Operations, Table of. C. Operations*. See *Operations, Table of*.
- Chopping** (*chop'-ing*). See *Percussion*.
- Chorda** (*kor'-dah*) [*L.*, a cord: *pl.*, *Chordæ*]. A cord, tendon, or filament of nerve. *C. caudalis*, the urochord. *C. dorsalis*. See *Notochord*. *C. spinalis*, the spinal cord. *C. tendineæ*, the tendinous strings connecting the *columnæ carnea* of the heart with the auriculo-ventricular valves. *C. tympani*, a filament of the Vidian nerve that enters the tympanum. *C. umbilicalis*, the umbilical cord. *C. vertebralis*, the notochord; the spinal cord. *C. vocalis*, one of the vocal bands or thyro-arytenoid ligaments.
- Chordal** (*kor'-dal*) [*chorda*, a cord]. Relating to a chorda, especially to the notochord.
- Chordapsus** (*kor-dap'-sus*) [χορδή, an intestine; ἄπτειν, to tie up]. Synonym of *Acute Intestinal Catarrh*.
- Chordee** (*kor-de'*) [χορδή, a cord]. A symptom of gonorrhea consisting of painful erection and downward curvature of the penis.
- Chorditis** (*kor-dit'-tis*) [χορδή, a cord; ιτις, inflammation]. Inflammation of the vocal bands. *C. tuberosa*, a localized thickening on the vocal bands, often bilateral, and situated at the junction of the posterior two-thirds with the anterior third.
- Chordotonal** (*kor-do-to'-nal*) [χορδή, chord; τόνος, tone]. In biology, applied to sense-organs or parts of arthropods that are responsive to sound-vibrations.
- Chorea** (*ko-re'-ah*) [χορεία, dancing]. St. Vitus's dance. A functional nervous disorder, usually occurring in youth, characterized by spasmodic and convulsive contraction and non-rhythmic action of the muscles of the extremities, face, etc. The action of the heart is irregular, and in a large number of cases a systolic murmur is present. Rheumatism is a frequent complication. Chorea may be caused by a number of conditions, among which are fright and reflex irritations, but it is essentially a disease of the later period of childhood, and affects girls about three times as frequently as boys. Occasionally it is seen in the adult, and may become a serious complication of pregnancy, resulting in the death of both fetus and mother. When it occurs late in life it generally resists treatment. *C., Automatic*, an affection in which paroxysms of apparently purposive actions occur independently of the will, as the result of an impulse that arises spontaneously or that occurs in response to a stimulus received from without. *C., Buttonmaker's*, a form of chorea in girls employed in button-mills, the result of application at their trade. The fingers move involuntarily when not at work, following the same motions as when guiding the procession of buttons. It is due to an erethism of the centers in the brain for the hands and fingers. *C., Chronic*. See *C., Huntingdon's*. *C., Electric*. See *Dubini's Disease*. *C., Epidemic*, dancing mania. See *Choromania*. *C. festinans*. See *Paralysis agitans*. *C. germanorum*, a term for the major form of chorea. *C.-habit*. See *Spasm*. *C., Hereditary*. See *C., Huntingdon's*. *C., Hysterical*. See *C., Major*. *C., Huntingdon's*, an affection frequently hereditary, of adult or middle life, characterized by irregular movements, disturbance of speech, and gradual dementia. It was first described by Huntingdon, a physician of Long Island, U. S. *C. insanienis*, maniacal chorea; a grave form of chorea usually seen in adult women, and associated with maniacal symptoms. This may develop from the ordinary form, and usually ends fatally. It may develop during pregnancy. *C., Maniacal*. See *C. insanienis*. *C., Major*, the hysterical chorea of the French, in which there are regular oscillatory movements of the parts. *C., Mimetic*, that which is caused by imitation. *C., Minor*, simple chorea. *C. oscillatoria* is marked by more or less regular oscillations of the head, trunk, or limbs. *C., Post-hemiplegic*. See *Athetosis*. *C., Post-paralytic*, a form of involuntary movement seen in patients after an attack of hemiplegia. *C., Rhythmic*. See *C., Major*. *C., Rotatory*, a hysterical form associated with rhythmic movements of the body or head. *C., School-made*, chorea resulting from overstimulation of children at school by parents and teachers. *C. scriptorum*. See *Crampe, Writers'*. *C., Senile*. See *Paralysis agitans*. *C. spastica*. See *Paraplegia, Infantile Spasmodic*. *C., Sydenham's*, ordinary chorea.
- Choreic** (*ko-ro'-ik*) [χορεία, dancing]. Relating to, of the nature of, or affected with, chorea.

**Choreiform** (*kə-re'if-orm*) [*χόρεα*, dancing; *forma*, form]. Resembling chorea.

**Choreomania** (*kə-ro-mā'ni-ah*) [*χόρεα*, dancing; *μανία*, madness]. Synonym of *Choromania*.

**Choreoid** (*kə-ro'id*) [*χόρεα*, dancing; *εἶδος*, like]. Pertaining or similar to chorea.

**Choreomania** (*kə-ro-mā'ni-ah*). See *Choromania*.

**Chorial** (*kə-ri'al*) [*χόριον*, skin]. Chorionic.

**Chorioblastosis** (*kə-ro-blast'osis*) [*χόριον*, skin; *βλαστάνω*, to germinate]. Any anomaly of growth of the corium and subcutaneous connective tissue.

**Chorio-capillaris** (*kə-ro-kap'il-er-is*) [*χόριον*, skin; *αἷμα*, a hair]. The network of capillaries over the inner portion of the choroid coat of the eye. See *Karyotheca*, *Membrane of*.

**Choriocoele** (*kə-ro-sel'*, or *kə-ro-sel'-le*) [*χόριον*, a skin; *κήλη*, hernia]. A hernial protrusion of the choroid coat of the eye.

**Choroid** (*kə-ro'id*). See *Choroid*.

**Choroidal** (*kə-ro'id'al*). See *Choroid*.

**Chorioideremia** (*kə-ro'id-er-e-me-ah*). See *Chorioideremia*.

**Chorioidiritis** (*kə-ro'id-i-ri'tis*). See *Choroido-iritis*.

**Chorioiditis** (*kə-ro'id-it'is*). See *Choroiditis*.

**Choroido-retinitis** (*kə-ro'id'-o-ret-in-it'is*). See *Choroido-retinitis*.

**Chorion** (*kə're-on*) [*χόριον*, fetal membrane]. The outermost of the fetal membranes, formed from the external layer of the non-germinal epiblast. The chorion lies between the amnion and the decidua (reflexa and vera). **C.**, **Cystic Degeneration of**, a rare myxomatous disease of the chorion, producing the so-called "hydatid mole." It is characterized by rapid increase in the size of the uterus, hemorrhage, often profuse, beginning during the second month of pregnancy, and the discharge of small cysts, whitish in appearance, surrounded by bloody clots. These cysts vary in size from a pin's-head to a filbert. **C. leve**, the smooth or non-villous portion of the chorion. **C.**, **Primitive**, the *Vitelline membrane* (or *Zona pellucida*) during the time of the development of the hollow, structureless villi upon its surface. **C.**, **Shaggy**, or **C. frondosum**, the part covered by villi.

**Chorionic** (*kə-ro-n'ik*) [*χόριον*, the chorion]. Relating to the chorion.

**Chorionitis** (*kə-ro-nit'is*). See *Scleroderma*.

**Choripetalous** (*kə-ri-pet'al-us*) [*χόρις*, asunder; *πέταλον*, leaf]. In biology, applied to a corolla whose petals are distinct.

**Choris** (*kə-ri'*) [*χώρα*, a separation]. In biology, the development of two or more members when but one is expected; a doubling.

**Choroid** (*kə-ro'id*) [*χόριον*, the chorion; *εἶδος*, likeness]. The second or vascular tunic of the eye, continuous with the iris in front and lying between the sclerotic and the retina. **C. Plexus**, a vascular plexus in the lateral ventricles of the brain. **C. Sulcus** (of Schwalbe). See *Schwalbe*, *Fissure of*. **C. Vein**. See *Vin*.

**Choroidal** (*kə-ro'id'al*). See *Choroid*.

**Chorioideremia** (*kə-ro'id-er-e-me-ah*) [*χόριον*, the chorion; *εἶδος*, like; *εἰρηνα*, desolation]. Absence of the choroid; absence of the epithelium of the choroid.

**Choroiditis** (*kə-ro'id-it'is*) [*χόριον*, the chorion; *ιτις*, inflammation]. Inflammation of the choroid coat of the eye. It may be *anterior*, the foci of exudation being at the periphery of the choroid; or *central*, the exudate being in the region of the macula lutea; *diffuse* or *disseminated*, characterized by numerous round or irregular spots scattered over the fundus; *exudative* or *non-suppurative*, when there are isolated

foci of inflammation scattered over the choroid; *metastatic*, when due to embolism; and *suppurative*, when proceeding to suppuration. **C. serosa**. Synonym of *Glaucoma*.

**Choroido-iritis** (*kə-ro'id'-o-i-ri'tis*) [*χόριον*, the chorion; *εἶδος*, like; *ίρις*, the rainbow; *ιτις*, inflammation]. Inflammation of the choroid and the iris.

**Choroido-retinitis** (*kə-ro'id'-o-ret-in-it'is*) [*χόριον*, the chorion; *εἶδος*, like; *retina*, the retina; *ιτις*, inflammation]. Choroiditis with retinitis. **C.-r.**, **Ametropic**, caused by ametropia.

**Choromania** (*kə-ro-mā'ni-ah*) [*χόρος*, a dance; *μανία*, madness]. A nervous disorder manifest at various times and places, and characterized by dancing or other rhythmic movements; epidemic chorea; dancing mania.

**Chreitschönovitsch's Method**. A method of staining tissues. See *Stains*, *Table of*.

**Christian Science** (*kris't-cha'n si'-ens*). An alleged system of therapy; faith-cure, or one form of it.

**Christison's Formula**. A formula for estimating the amount of solids in the urine: Multiply the last two figures of the specific gravity expressed in four figures by 2.33 (or by 2, *Trapp*; or by 2.2, *Labisch*). This gives the amount of solids in every 1000 parts.

**Chromate** (*kro'-mat*) [*χρῶμα*, color]. Any salt of chromic acid.

**Chromatic** (*kro-mat'-ik*) [*χρῶμα*, color]. Relating to or possessing color. **C. Audition**, luminous sensations aroused by sound. See *Photism*. **C. Gustation**. See *Gustation*.

**Chromatin** (*kro'-mat-in*) [*χρῶμα*, color]. The chromatophilous, or tingible portion of the protoplasm, forming a delicate reticular network or plexus of fibrils permeating the achromatin of a typical cell in process of division. It is called also Karyomiton. See *Cell-body*.

**Chromation** (*kro-mat'-shun*) [*χρῶμα*, color]. The process of tingeing or staining.

**Chromatism** (*kro'-mat-izm*) [*χρωματισμός*, coloring]. 1. Abnormal coloration of any tissue. 2. Chromatic aberration.

**Chromatoblast** (*kro-mat'-o-blast*) [*χρῶμα*, color; *βλαστός*, a germ]. Same as *Chromatophore*.

**Chromatodysopia** (*kro-mat-o-dis'-o-pe-ah*) [*χρῶμα*, color; *δυσ*, ill; *ὄψις*, vision]. Color-blindness.

**Chromatogenous** (*kro-mat'-oj'-en-us*) [*χρῶμα*, color; *γεννάω*, to beget]. Producing color.

**Chromatology** (*kro-mat'-ol'-o-je*) [*χρῶμα*, color; *λόγος*, science]. The science of colors. Also the spectroscopic investigation of colors.

**Chromatopathia** (*kro-mat-o-path'-e-ah*) [*χρῶμα*, color; *πάθος*, disease]. Any pigmentary skin-disease; a chromatosis.

**Chromatopathy** (*kro-mat-op'-a-the*). See *Chromatopathia*.

**Chromatophile** (*kro-mat'-o-fil*). Same as *Chromatophilous*.

**Chromatophobia** (*kro-mat-o-fol'-be-ah*) [*χρῶμα*, color; *φόβος*, dread]. Abnormal fear of colors.

**Chromatophore** (*kro'-mat-o-for*) [*χρῶμα*, color; *φόρος*, bearing]. In biology, (1) one of the contractile pigment-sacs, abundant in the skin of many animals, e.g., squid, chameleon; (2) one of the pigmented marginal sense-organs of an Actinozoan; "bourse calcinale;" (3) a plastid containing chlorophyll, or other coloring-matter; color-granule, chromoplast, chromoleucite.

**Chromatophorous** (*kro-mat-off'-or-us*) [*χρῶμα*, color; *φέρω*, to bear]. Containing pigment or pigment-cells.

**Chromatopseudopsis** (*kro-mat-o-su-dop'-sis*) [*χρῶμα*, color; *ψευδής*, false; *ὄψις*, sight]. Color-blindness.

**Chromatopsia** (*kro-mat-op'-se-ah*) [*χρώμα*, color; *ὄψις*, vision]. Abnormal sensation of color. It may be due to disorders of the optic centers, or to drugs, especially *santonin*.

**Chromatopsy** (*kro'-mat-op-se*). See *Chromatopsia*.

**Chromatometry** (*kro-mat-op-tom'-et-re*) [*χρώμα*, color; *ᾠπτεν*, to see; *μέτρον*, a measure]. The testing of the sensibility of the eye with respect to color-perception.

**Chromatoscope** (*kro-mat'-o-skōp*) [*χρώμα*, color; *σκοπεῖν*, to observe]. An instrument for determining the refractive index of colored light.

**Chromatotomy** (*kro-mat-ot'-ko-pe*) [*χρώμα*, color; *σκοπεῖν*, to observe]. The determination of the color of objects.

**Chromatosis** (*kro-mat-ot'-sis*) [*χρώμα*, color]. Pigmentation; a pathologic process or pigmentary disease consisting in a deposit of coloring-matter in a locality where it is usually not present, or in excessive quantity in regions where pigment normally exists.

**Chromatosome** (*kro-mat'-o-som*) [*χρώμα*, color; *σῶμα*, body]. In biology, the "nuclear rods" of the nucleus.

**Chromaturia** (*kro-mat-ur'-re-ah*) [*χρώμα*, color; *οὖρον*, urine]. Abnormal coloration of the urine.

**Chrome** (*krōm*) [*χρώμα*, color]. Chromium, *q.v.* **C.-alum.** See *Pigments, Conspectus of*. **C.-black.** See *Pigments, Conspectus of*. **C.-carmin.** Same as *Chrome-red*. **C.-chlorid.** See *Pigments, Conspectus of*. **C.-garnet.** Same as *Chrome-red*. **C.-green.** See *Pigments, Conspectus of*. **C.-orange.** Same as *Chrome-red*. **C.-red,** a pigment; basic lead chromate. See *Pigments, Conspectus of*. **C.-vermillion.** Same as *Chrome-red*. **C.-yellow,** lead chromate, a pigment. See *Chromium, and Pigments, Conspectus of*.

**Chromesthesia** (*krōm-es-thet'-ze-ah*) [*χρώμα*, color; *αἴσθησις*, perception by the senses]. The association of colors with words, letters, and sounds.

**Chromhidrosis** (*krōm-hid-ro'-sis*). Same as *Chromidrosis*.

**Chromic** (*krōm'-ik*) [*χρώμα*, color]. Pertaining to or made from chromium. **C. Acid.** See *Acid*. **C. Acid Test.** See *Tests, Table of*.

**Chromicize** (*kro'-mis-iz*). To impregnate with chromic acid.

**Chromidrosis** (*krōm-id-ro'-sis*) [*χρώμα*, color; *ἰδρώς*, sweat]. A rare condition of the sweat in which it is variously colored, being bluish, blackish, reddish, greenish, or yellowish. *Black sweat* (*Seborrhœa nigricans*) occurs usually in hysterical girls, the part affected being the face. It is associated with chronic constipation and is due to the presence of indican in the sweat. *Red sweat, hematiidrosis*, may be due to an exudation of blood into the sweat-glands, or to the presence of a microorganism in the sweat. See *Micrococcus hematodes*, Babes, under *Bacteria, Table of*.

**Chromium** (*kro'-me-nm*) [*χρώμα*, color]. Cr = 52.2; quantivalence II and IV. One of the elements of the iron group. The various salts of chromium, especially chromic acid,  $\text{Cr}_2\text{O}_3$ , are much used in the manufacture of pigments and in dyeing textile fabrics. All are poisonous. Potassium dichromate (bichromate of potash),  $\text{K}_2\text{Cr}_2\text{O}_7$ , is used in various pharmaceutical and chemic operations. **C.-green.** Same as *Chrome-green*.

**Chromocrinia** (*kro-mo-krin'-e-ah*) [*χρώμα*, color; *κρίνειν*, to separate]. The secretion of coloring-matter, as in the sweat, etc.

**Chromocytometer** (*kro-mo-si-tom'-et-re*) [*χρώμα*, color; *κύτος*, cell; *μέτρον*, a measure]. An instrument for estimating the proportion of hemoglobin present in the blood.

**Chromocytometry** (*kro-mo-si-tom'-et-re*) [*χρώμα*,

color; *κύτος*, cell; *μέτρον*, a measure; *νόσος*, disease]. The estimation of hemoglobin by means of the chromocytometer.

**Chromodermatosis** (*kro-mo-der-mat-ot'-sis*) [*χρώμα*, color; *δέρμα*, skin]. A skin-disease characterized by discoloration of the surface.

**Chromogen** (*kro'-mo-jen*) [*χρώμα*, color; *γένεσις*, production]. Any principle of the animal or vegetable economy which (though it is itself not of any pronounced color) is susceptible, under suitable circumstances, of being changed into a coloring-matter.

**Chromogenic** (*kro-mo-jen'-ik*) [*χρώμα*, color; *γίνομαι*, production]. 1. Relating to chromogen. 2. Color-producing.

**Chromoleucite** (*kro-mo-lu'-sit'*) [*χρώμα*, color; *λευκός*, white]. Same as *Chromoplastid*.

**Chromopare** (*kro'-mo-pār*) [*χρώμα*, color]. In biology, applied by Beyerinck to those chromogenic bacteria that excrete the pigment, remaining colorless themselves. Cf. *Chromophore* and *Para-chromophor*.

**Chromophan** (*kro'-mo-fan*) [*χρώμα*, color; *φαίνειν*, to appear]. In biology, the pigment of the inner segments of the retinal cones of certain animals. There are at least three varieties, chlorophan, rhodophan, xanthophan. (Ruhnes).

**Chromophile** (*kro'-mo-fil*). Same as *Chromophilous*.

**Chromophilous** (*kro-moff'-il-u'*) [*χρώμα*, color; *σῖλος*, loving]. Readily stained; easily absorbing color; applied to tissues prepared for microscopic study.

**Chromophore** (*kro'-mo-fur*) [*χρώμα*, color; *φέρειν*, to bear]. In biology, applied by Beyerinck to those chromogenic bacteria that possess pigment as an integral part of their organism. Cf. *Chromopare* and *Para-chromophor*.

**Chromophytosis** (*kro-mo-fi-to'-sis*) [*χρώμα*, color; *φυτόν*, a plant]. 1. Any microscopic plant-growth that produces a discoloration of the skin in which it grows; any pigmentary skin-disease caused by microscopic vegetation. 2. A synonym of *Tinea versicolor*, or *Eichstedt's Disease*. See *Tinea versicolor, and Diseases, Table of*.

**Chromoplastid, or Chromoplastidule** (*kro-mo-plas'-tid, or kro-mo-plas'-tid-il'*) [*χρώμα*, color; *πλάσσειν*, to form]. In biology, a pigment-granule imbedded in the protoplasm of a plant or animal. It is also called *chromoleucite*.

**Chromopsia** (*krōm-op'-se-ah*). See *Chromatopsia*.

**Chromoptometer** (*kro-mop-tom'-et-re*) [*χρώμα*, color; *μέτρον*, a measure]. A contrivance for determining the extent of development of color-vision.

**Chromosome** (*kro'-mo-sōm*) [*χρώμα*, color; *σῶμα*, body]. Any one of the nuclear chromatin-fibrils of a cell. According to some observers there is only one such fibril in closely intertwined folds. Others say that the chromosomes are many, and of two varieties, the fine and the coarse.

**Chromostroscope** (*kro-mo-stro'-bo-skōp*) [*χρώμα*, color; *σπράζω*, a twisting; *σκοπεῖν*, to inspect]. A device for showing the persistence of visual impressions of color.

**Chromule** (*kro'-mūl*) [*χρώμα*, color; *ἵλη*, matter]. In biology, coloring-matter in plants, especially when not green, or when liquid.

**Chronic** (*kron'-ik*) [*χρόνος*, time]. Long-continued; of long duration; slow of progress; opposed to *acute*, and to *subacute*.

**Chronicity** (*kro-nis'-it-e*) [*χρόνος*, time]. The state of being chronic or long-continued.

**Chronizoöspore** (*kro-ni-zo'-o-spor*) [*κρόνιος*, late; *ζῶον*, an animal; *σπορά*, seed]. One of the microzoogonidia or minute zoöspores or resting-spores, produced by the water-net, *Hydrodictyon*.

**Chronograph** (*kron'-o-graph*) [*χρονος*, time; *γραφειν*, to write]. An instrument for graphically recording intervals of time, in physiologic and psycho-physical experiments.

**Chronoscope** (*kro'-no-skop*) [*χρονος*, time; *σκοπειν*, to inspect]. An instrument for measuring extremely short intervals of time. **C., A-form**, an apparatus introduced by Galton for measuring the time of certain psycho-physical reactions. It is so called from its outline, which somewhat resembles that of the letter A.

**Chronosteal** (*kro'-neal-te-al*) [*χρονος*, time; *οστεον*, bone]. Relating to the chronosteon.

**Chronosteon** (*kro'-neal-te-on*) [*χρονος*, time (temporal); *οστεον*, bone]. The temporal bone.

**Chronothermal** (*kron-o-ther'-mal*) [*χρονος*, time; *θερμα*, heat]. Pertaining to the theory that all diseases are characterized by periods of intermitting chill and heat; relating to periodicity in changes of bodily temperature.

**Chroöpsia** (*kro'-psia*) [*χρους*, color; *ωψις*, sight]. See *Chroöpsia*.

**Chrotal Epithelium** (*kro'-tal ep-e-thel'-le-um*). The ectoderm.

**Chrotic** (*kro'-tik*) [*χρος*, the skin]. Relating to the skin.

**Chrotoplast** (*krot'-o-plast*) [*χρος*, skin; *πλασσειν*, to form]. A skin-cell; a dermal or epithelial cell.

**Chrymar's Operation**. See *Operations, Table of*.

**Chrysalis** (*kris'-al-is*) [*χρυσος*, gold]. The pupa or secondary stage in the transformation of insects. So called from the golden color of certain chrysalides.

**Chrysamin** (*kris'-am-in*) [*χρυσος*, gold; *amin*],  $C_{26}H_{16}N_4O_6Na_2$ . Flavophenin; a coal-tar color of the oxyazo group, used in dyeing. It dyes on cotton a sulphur-yellow, remarkably fast to light. See *Pigments, Conspectus of*.

**Chrysanilin** (*kris-an'-il-in*) [*χρυσος*, gold; *anilin*],  $C_{19}H_{11}N(NH_2)_2$ . A body obtained as a by-product in the manufacture of rosanilin. It crystallizes from dilute alcohol in golden-yellow needles, melting at about 268°. It is used largely as a dye-stuff, yielding a very beautiful yellow color. See *Pigments, Conspectus of*.

**Chrysanisic Acid** (*kris-an-is'-ik*). See *Acid*.

**Chrysarobin, or Chrysarobinum** (*kris-ar-o'-bin*, or *kris-ar-o-bi'-num*) [*χρυσος*, gold; *aroba* (nat. East Ind.), bark of a leguminous tree],  $C_{30}H_{26}O_7$ . A reduction product of chrysophanic acid; it occurs in goa-powder and araroba-powder. It is a yellow-colored powder, the product of the decay of *Andira araroba*, a Brazilian tree. It is a gastro-intestinal irritant, and is almost a specific when applied locally in psoriasis. It stains the skin a dark yellowish-brown color, which may be removed by a weak solution of chlorinated lime. Dose, internally, gr.  $\frac{1}{4}$ – $\frac{1}{2}$ . **C., Ung.**, contains 10 per cent. of the drug with 90 per cent. benzoated lard.

**Chrysaubin** (*kris-a'-rin*) [*χρυσος*, gold; *aurum*, gold]. See *Orange Colors*.

**Chrysene** (*kris'-en*) [*χρυσος*, gold],  $C_{18}H_{12}$ . A hydrocarbon derived from coal-tar. It is generally colored yellow, but can be rendered perfectly colorless. It is sparingly soluble in alcohol or ether; melts at 250° C. (482° F.); boils at 436°; crystallizes and sublims in silvery leaflets, that exhibit an intense violet fluorescence.

**Chrysenic Acid** (*kris-en'-ik*). See *Acid*.

**Chrysin** (*kris'-in*) [*χρυσος*, gold],  $C_{15}H_{10}O_4$ . A coloring matter found in the bulbs of the European Black Poplar

**Chrysoidin** (*kris-oi'-din*) [*χρυσος*, gold; *ειδος*, like]. 1.  $C_{12}H_{13}N_3Cl$ . A coal-tar color used in dyeing. It is the hydrochlorid of diamidoazobenzene. It consists of dark-violet crystals soluble in water. It dyes bright-yellow on silk and cotton. See *Pigments, Conspectus of*. 2.  $C_{20}H_{16}O_4$ . A yellow coloring-substance found in asparagus berries.

**Chrysoin** (*kris'-o-in*). See *Orange Colors*.

**Chrysolin** (*kris'-o-lin*) [*χρυσος*, gold; *oleum*, oil],  $C_{20}H_{16}O_3(OC_6H_5)OH$ . A coal-tar color of the phthalic group, used in dyeing. It is the sodium salt of benzyl-fluorescein. It produces a yellow color, similar to that of turmeric, on silk, cotton and wool. See *Pigments, Conspectus of*.

**Chrysophan** (*kris'-o-fan*) [*χρυσος*, gold; *φαειν*, to show],  $C_{16}H_{12}O_8$ . A yellow, crystalline body found in rhubarb. It has a distinctly bitter taste, is readily soluble in warm water and diluted alcohol, but insoluble in ether. It is also called *Chrysophanin*.

**Chrysophanic Acid** (*kris-o-fan'-ik*). See *Acid*.

**Chrysophanin** (*kris-o-fan'-in*). See *Chrysophan*, and *Pigments, Conspectus of*.

**Chrysophyl** (*kris'-o-fil*) [*χρυσος*, gold; *φυλλον*, a leaf]. Xanthophyl; a bright golden-yellow crystalline pigment derived from leaves.

**Chrysorrhamin** (*kris-or-am'-nin*) [*χρυσος*, gold; *ρhamnos*, a prickly shrub]. The yellow pigment found in French berries. See *Pigments, Conspectus of*.

**Chthonophagia, or Chthonophagy** (*thon-o-fa'-je-ah*, or *thon-off'-a-je*) [*χθον*, earth; *φαγειν*, to eat]. Dirt-eating; geophagy.

**Churning Sound** (*churn'-ing sound*). A peculiar splashing-sound like that made by a churn, heard in the chest in some cases of pleural effusion.

**Churrus** (*chur'-us*) [Hind., *charas*]. Hemp-resin. See *Cannabis*.

**Chvostek's Sign**. See *Tetany*; also *Signs and Symptoms, Table of*.

**Chylaceous** (*ki-la'-se-us*) [*chylus*, chyle]. Composed of chyle.

**Chylangioma** (*ki-lan-je-o'-mah*) [*chylus*, chyle; *αγγειον*, a vessel]. Retention of chyle in lymphatic vessels with dilatation of the latter.

**Chylaqueous** (*kil-a'-kwe-us*) [*χυλος*, chyle; *aqua*, water]. Like water and chyle. **C. Fluid**, the digested food or nutritive fluid in the somatic or perigastric cavity of invertebrates; it is never enclosed in distinct vessels and represents the blood of higher animals.

**Chyle** (*kil*) [*χυλος*, juice]. The milk-white fluid absorbed by the lacteals during digestion. On standing, it separates into a thin, jelly-like clot and a substance identical with serum. **C.-corpuscle**, any floating cell of the chyle. These cells resemble, and are probably identical with, the colorless blood-corpuscles. **C.-gland**, Cheshire's name for system 11, of the "salivary glands" of bees.

**Chylidrosis** (*kil-id-ro'-sis*) [*χυλος*, chyle; *ιδρωσις*, a sweating]. Milkiness of the sweat.

**Chylification** (*ki-l-, or kil-if-ak'-shun*) [*chylus*, chyle; *facere*, to make]. The forming of chyle from food.

**Chylifactive** (*ki-le-, or kil-if-ak'-ti-*) [*chylus*, chyle; *facere*, make]. Chyle-forming.

**Chyliferous** (*ki-lif'-er-us*) [*chylus*, chyle; *ferre*, to carry]. 1. Chyle forming. 2. Containing chyle.

**Chylific** (*ki-lif'-ik*) [*chylus*, chyle; *facere*, to make]. Making chyle; pertaining to chylification.

**Chylification** (*ki-le-, or kil-if-ak'-shun*) [*χυλος*, chyle; *facere*, to make]. The process by which the chyle is formed, separated and absorbed by the villi of the small intestine.

**Chylificatory** (*ki-lif'-ik-at-o-ro*) [*chylus*, chyle; *facere*, to make]. Chyle making.

**Chylify** (*ki'-lif-i*) [*chylus*, chyle; *facere*, to make]. 1. To make into chyle. 2. To be made into chyle.

**Chylocele** (*ki'-lo-sel*) [*χυλός*, chyle; *κύημα*, a tumor]. An effusion of chyle into the tunica vaginalis testis.

**C., Parasitic.** See *Filaria sanguinis hominis*.

**Chylocyst** (*ki'-lo-sist*) [*χυλός*, juice; *κύστις*, bladder]. The chyle-bladder; the reservoir of Pecquet.

**Chylocystic** (*ki'-lo-sis'-tik*) [*χυλός*, juice; *κύστις*, bladder]. Relating to the chylocyst.

**Chyloderma** (*ki'-lo-der'-mah*) [*χυλός*, lymph; *δέρμα*, skin]. Scrotal elephantiasis, with accumulation of lymph in the thickened skin and in the enlarged lymphatic vessels; lymph-scrotum.

**Chylodochium** (*ki'-o-dol'-ki-um*) [*χυλός*, chyle; *δοχείον*, receptacle]. The receptaculum chyli.

**Chylogaster** (*ki'-lo-gas'-ter*) [*χυλός*, chyle; *γαστήρ*, the stomach]. The duodenum, so-called because of its being the chief seat of chylous digestion.

**Chylogastric** (*ki'-lo-gas'-trik*) [*χυλός*, chyle; *γαστήρ*, stomach]. Pertaining to the chylogaster.

**Chylopericardium** (*ki'-lo-per-ik-ar'-de-um*) [*χυλός*, chyle; *περί*, around; *καρδιά*, the heart]. A rare condition, in which chyle is present in the pericardium, as a consequence of the formation of a channel of communication between a chyle-duct and the cavity of the heart-sac.

**Chylopoiesis** (*ki'-lo-poi-e'-sis*) [*χυλοποίησις*; *χυλός*, chyle; *ποιεῖν*, to make]. Chylification.

**Chylopoietic** (*ki'-lo-poi-e'-ik*) [*χυλός*, chyle; *ποιεῖν*, to make]. Chylification; making or forming chyle.

**Chyloptyalism** (*ki'-lop-ti'-al-izm*) [*χυλός*, chyle; *πινακίζω*, to spit]. Milkiness of the saliva.

**Chylorrhea** (*ki'-lor-e'-ah*) [*χυλός*, chyle; *ῥέειν*, to flow]. The excessive flow of chyle. Also, a diarrhea characterized by a milky color of the feces.

**Chylosis** (*ki'-lo'-sis*) [*χίλωσις*, a converting into juice]. Chylification.

**Chylorhax** (*ki'-lo-rhaks*) [*χυλός*, chyle; *ῥάξ*, the chest]. The presence of chyle within the pleural cavity. It is consequent upon wounds or rupture of the thoracic duct, and is usually fatal.

**Chylous** (*ki' lus*) [*χυλός*, chyle]. Relating to or resembling chyle.

**Chyluria** (*ki'-lu'-re-ah*) [*χυλός*, juice; *οὔρον*, urine]. The passage of milky-colored urine. It is thought to be caused by a disordered condition of the lacteals and is also connected with the presence in the blood of *Filaria sanguinis hominis*. The urine passed is generally above the normal in quantity, has the color of milk, and becomes jelly-like on standing, afterward again becoming liquid. It readily undergoes decomposition. The condition arises from a blocking of the lymph-channels by the parasites. See *Bacillus of Chyluria* under *Bacteria*, *Synonymatic Table of*; also *Filaria sanguinis hominis*, Lewis, under *Parasites (Animal), Table of*.

**Chyme** (*kim*) [*χυμός*, juice]. Food that has undergone gastric digestion and has not yet been acted upon by the biliary, pancreatic, and intestinal secretions.

**Chymiferous** (*kim-if'-er-us*) [*chymus*, chyme; *ferre*, to bear]. Capable of producing chyme.

**Chymification** (*kim-if-ik-a shun*) [*chymus*, chyme; *facere*, to make]. The change of food into chyme by the digestive process.

**Chymophorous** (*kim-off'-or-us*) [*χυμός*, chyme; *φέρω*, to carry]. Chymiferous.

**Chymoplasia** (*kim-o-pla'-ne-ah*) [*χυμός*, juice; *πλάνη*, a roving]. The morbid or abnormal metastasis of chyme or any secretion.

**Chymorrhea** (*kim-or-e'-ah*) [*χυμός*, chyme; *ῥέειν*, to flow]. A discharge of chyme.

**Chymosepsis** (*kim-o-sep'-sis*) [*χυμός*, chyme; *σepsis*, putrefaction]. Putrefactive fermentation of the chyme.

**Chyron** (*ki'-ron*) [*ciron*, *cyron*]. The name given by ancient writers to the itch-mite, *Sarcoptes scabiei*.

**Cibarious** (*sib-a'-re-us*) [*cibum*, food]. Serving as food; nutritious; edible.

**Cicatricial** (*sik-at-rish'-al*) [*cicatrix*, a scar]. Pertaining to or of the nature of a cicatrix. **C. Deformities**, abnormal contractions caused by cicatrices. **C. Tissue**, a form of dense connective tissue, seen in cicatrices.

**Cicaticula** (*sik-at-rik'-u-lah*) [L., dim. of *cicatrix*, a scar]. The germinating point of the fecundated egg.

**Cicatrizant** (*sik'-at-ri-zant*). See *Cicatrizing*.

**Cicatrizing** (*sik'-at-ri-siv*) [*cicatrix*, a scar]. Tending to form a cicatrix.

**Cicatrix** (*sik-at-riks*) [L.: *pl.*, *Cicatrices*]. A scar; a connective-tissue new-formation replacing loss of substance in the skin. It extends as far as the corium. It may be depressed below or elevated above the surface; its color is usually whitish and glistening when old, red or purple when young.

**Cicatrizing** (*sik'-at-ri-zant*) [*cicatrix*, a scar]. 1. Tending to cicatrize or heal. 2. A medicine that aids the formation of a cicatrix.

**Cicatrization** (*sik-at-ri-z-a'-shun*) [*cicatrix*, a scar]. The process of healing.

**Cicer** (*si'-ser*) [L.]. A genus of leguminous plants. See *Chick-pea*.

**Cicuta** (*sik-u'-tah*) [L.]. A genus of umbelliferous plants. **C. virosa**. See *Corubane*.

**Cicutin** (*sik-u'-tin*) [*cicuta*, hemlock]. 1. An alkaloid obtained from *Cicuta virosa*. 2. The same as *Conein*.

**Cicutoxin** (*sik-u-tok'-in*) [*cicuta*, hemlock; *τοξικόν*, poison]. The poisonous active principle of *Cicuta virosa*. It is a viscid, non-crystallizable liquid of unpleasant taste and acid reaction.

**Cider** (*si'-der*) [ME., *cidre*]. The expressed juice of apples or pears. **C. Brandy**. See *Apple-Brandy*.

**C. Vinegar**. See *Vinegar*.

**Cigaret** (*sig-ar-et*). See *Cigarette*.

**Cigarette** (*sig-ar-et*) [Fr., dim. of *cigare*, a cigar]. A roll of inflammable material medicated and adapted for smoking. Nasal catarrhs and spasmodic attacks of dyspnea are among the disorders sometimes treated by cigarette-smoking. **C.-makers' Cramp**. See *Cramp*.

**Cigarmakers' Cramp**. See *Cramp*.

**Ciguë** (*se-gu-e*) [Fr.]. *Cicuta*.

**Cilia** (*sil'-e-ah*) [*cilium*, the eyelid or lash]. The eyelashes. Also, the locomotor and prehensile organs of certain infusoria, and the hair-like appendages of certain epithelial cells, whose function it is to propel fluid or particles along the passages that they line.

**Ciliariscope** (*sil-e-ar'-is-kop*) [*cilium*, eyelid; *σκοπεῖν*, to look at]. An instrument (essentially a prism) for examining the ciliary region of the eye.

**Ciliary** (*sil'-e-a-re*) [*cilium*, an eyelash]. Pertaining to the eyelid or eyelash, and also by extension to the **C. Apparatus**, or the structure related to the mechanism of accommodation. **C. Arteries**—*anterior*, *posterior long*, and *posterior short*, branches of the ophthalmic artery, supplying the recti muscles, the ciliary apparatus, and the posterior structures of the eye, with the exception of the retina. See *Arteries, Table of*. **C. Body**, the ciliary muscle and processes. **C. Canal**, the canal of Fontana. See *Canal*. **C. Ganglion**, the ganglion at the apex of the orbit, supplying the ciliary muscle and iris. See *Ganglia, Table of*. **C. Muscle**, the muscle of accommodation, whose contraction lessens the tension upon the suspensory ligament of the

lens. See *Mucles*, also, *Eye*. **C. Nerves**, branches of the ophthalmic ganglion supplying the anterior structures of the eyeball and the accommodative apparatus. See *Nerves*, *Table of*. **C. Neuralgia**, neuralgic pain of the eye, brow, temple, etc. **C. Processes**, circularly arranged choroidal foldings continuous with the iris in front. **C. Region**, the pericorneal or "danger" zone, corresponding to the position of the ciliary body. **C. Zone**, the ciliary processes collectively.

**Ciliate**, or **Ciliated** [*sil'-e-at', or -a-tid'*] [*cilium*, an eyelash]. Having cilia.

**Ciliation** [*sil-e-a'-shun*] [*alium*, an eyelash]. The condition of having cilia.

**Cilio-spinal** [*sil'-o-spi'-nal*] [*ilium*, an eyelash; *spina*, the spine]. Relating to the ciliary zone and the spine. **C. Center**. See *Center*.

**Cilium** [*sil'-um*]. [*L.*] See *Cilia* and *Eyelash*.

**Cillo** [*sil'-o*], or **Cillosis** [*sil-o'-sis*] [*ilium*, an eyelash]. A continued trembling of the eyelid.

**Cillotic** [*sil-o'-tik*] [*ilium*, an eyelash]. Pertaining to or affected with cillo.

**Cimbria** [*sim'-be-ah*] [*L.*]. The white band seen upon the ventral aspect of the crus cerebri, the tractus pedunculi transversus of Gudden.

**Cimbial** [*sim'-be-a'*] [*cimbria*, a cincture]. Relating to the cimbria.

**Cimex** [*si'-mek*] [*L.*, a bug]. A genus of hemipterous insects. **C. lectularius**, the common bed-bug. A disgusting insect that infests beds, furniture, and the walls of bed-rooms, and that feeds on the human body, puncturing the skin and injecting an irritating fluid to increase the flow of blood. It is characterized by the repulsive odor of its secretion.

**Cimicifuga** [*sim-is-e-fu'-gah*] [*cimex*, a bug; *fugare*, to drive away]. Black Snake Root, Black Cohosh. The root of *C. racemosa*, ord. Ranunculaceae. A stomachic, antispasmodic, aphrodisiac, expectorant, and diuretic. Its action on the heart is similar to that of digitalis. It is efficient as a tonic in many cardiac diseases, in functional impotence, and ovarian neuralgia. **C.**, **Ext. fld.** (alcoholic). Dose  $\text{m}\nu$ -xxx. **C.**, **Ext. liquid.**, (B. P.). Dose  $\text{mij}$ -xxx. **C.**, **Tinct.**, 20 per cent. in strength. Dose  $\text{m}\nu$ - $\text{zj}$ . **Macrotin** (unof.). a resinous extract. Dose gr.  $\frac{1}{2}$ -ij.

**Cimicifugin** [*sim-is-e-fu'-gin*] [*cimex*, a bug; *fugare*, to drive away]. The precipitate from a tincture of the root of *Cimicifuga racemosa*; it is an antispasmodic, diaphoretic, nervin, emmenagogue, parturient, and narcotic. Dose 1 to 2 grains. As an oxytocic, 2 to 3 grains, to be repeated in from 40-60 minutes, if necessary. Unof.

**Cimolia** [*sim-o'-le-ah*], **Cimolite** [*sim'-o-lit'*] [*κυμολία*, earth]. Cimolian earth; a white, soapy clay formerly brought from the Greek island of Cimolus. The ancients prized it as a remedy; now little used, except in the Levant.

**Cina** [*si'-na*] [*L.*]. The plant *Artemisia santonica*. See *Santonica*.

**Cinchamidin** [*sin kam' id in*] [*cinchona*; *amidin*],  $\text{C}_{19}\text{H}_{21}\text{N}_3\text{O}$ . An alkaloid frequently present in commercial cinchonin.

**Cinchocerotin** [*sin-ko'-er-a'-tin*] [*cinchona*; *cera*, wax],  $\text{C}_{27}\text{H}_{48}\text{O}_4$ . A white crystalline alkaloid of calisaya bark.

**Cinchona** [*sin-ko'-nah*] [from the Countess of *Cinchon*]. Peruvian Bark. The bark of several varieties of cinchona, a tree native to the eastern slopes of the Andes and cultivated in India, the most valuable being *C. calisaya*. Other varieties are *C. acuticarpa*, red bark, *C. condamnata*, pale bark, *C. pitayumi*, pitaya bark, and *C. micrantha*. Cinchona bark contains 21 alkaloids, of which 4, quinin, cinchonin, quinidin and cin-

chonidin, are the most important. Cinchona has the same physiologic action and therapeutic uses as its chief alkaloid, quinin. See *Quinin*. It is also an astringent, bitter and stomachic tonic, stimulating appetite and promoting digestion, beneficial in atonic dyspepsia and adynamia, but especially useful in malarial affections. **C.**, **decoctum** (B. P.). Dose  $\text{zj}$ -ij. **C. Febrifuge**. See *Quinetum*. **C.**, **Ext.** Dose gr. j-v. **C.**, **Fld. Ext.** Dose  $\text{m}\nu$ - $\text{zj}$ . **C.**, **Ext. liquidum** (B. P.). Dose  $\text{m}\nu$ -x. **C.**, **infusum**, bark 6, arom. sulphuric acid 1, water 93 parts. Dose  $\text{zj}$ - $\text{zj}$ . **C.**, **Infus. Acidum** (B. P.). Dose  $\text{zj}$ -ij. **C. rubra**, red cinchona, the bark of *C. succirubra*. **C.**, **Tinct.**, 20 per cent. of the bark. Dose  $\text{zss}$ -ij. **C.**, **Tinct.**, **Comp.**, red bark 10, bitter-orange peel 8, serpentaria 2, alcohol 80 parts. Dose  $\text{zj}$ - $\text{zss}$ . **Huxham's Tinct. of Bark**, red bark  $\text{ziv}$ , orange peel  $\text{ziii}$ , serpentaria gr. lxxx, Spanish saffron gr. clx, cochineal gr. lxxx, brandy  $\text{zxl}$ , digested four days, expressed and filtered. Dose  $\text{zss}$ -ij.

**Cinchonamin** [*sin-ko'-nam-in*] [*cinchona*; *amin*],  $\text{C}_{19}\text{H}_{21}\text{N}_3\text{O}$ . An alkaloid of cuprea bark. It occurs in glistening, colorless crystals that are nearly insoluble in water, and but slightly soluble in ether.

**Cinchonicin** [*sin-ko'-ni'-is-in*] [*cinchona*],  $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}$ . An artificial alkaloid derived from cinchonin.

**Cinchonidin**, or **Cinchonidina** [*sin-ko'-id-in*, or *sin-ko'-id-i'-nah*],  $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}$ . An alkaloid derived from cinchona. It is a crystalline substance resembling quinin in general properties. **C. salicylate** (unof.) has decided anti-malarial properties. **C. sulph.**, ( $\text{C}_{20}\text{H}_{24}\text{N}_2\text{O}_2$ ) $\text{H}_2\text{SO}_4 \cdot 3\text{H}_2\text{O}$ , less bitter than quinin and valuable as an antipyretic. Dose gr. j-xx or more.

**Cinchonina**, or **Cinchonin** [*sin-ko'-ni'-nah*, or *sin'-ko'-nin*] [*cinchona*; *gen.*, *Cinchonina*],  $\text{C}_{19}\text{H}_{22}\text{N}_2\text{O}$ . An official alkaloid derived from cinchona. It is a colorless crystalline body, similar to quinin in therapeutic effects, but less active, producing much headache and some muscular weakness. **C. sulph.**, ( $\text{C}_{19}\text{H}_{22}\text{N}_2\text{O}_2$ ) $\text{H}_2\text{SO}_4 \cdot 2\text{H}_2\text{O}$ . Soluble with difficulty in water, but soluble in acidulated water. Dose gr. v-xxx.

**Cinchoninic Acid** [*sin-ko'-nin'-ik*]. See *Acid*.

**Cinchonism** [*sin'-ko'-nizm*] [*cinchona*]. The systemic effect of cinchona or its alkaloids in full doses. The symptoms produced are a ringing in the ears with deafness, headache, often severe, giddiness, dimness of sight, and a weakening of the heart's action.

**Cinchonize** [*sin'-ko'-niz*] [*cinchona*]. To bring under the influence of cinchona or its alkaloids.

**Cinchotin** [*sin'-kot-in*] [*cinchona*],  $\text{C}_{19}\text{H}_{24}\text{N}_2\text{O}$ . An almost insoluble crystalline alkaloid derived from a species of cinchona bark.

**Cincinulus** [*sin-sin'-u-lus*] [*κικιννυλος*, a curl]. In biology, small hooks attached to the stylamblys of crustaceans.

**Cincture** [*sing'-tär*] [*cinctura*, a girdle]. A belt or girdle. **C.-feeling**, a sensation as if the waist were encircled by a tight girdle.

**Cinene** [*si-nen'*] [*cina*, wormseed]. See *Dipentene*.

**Cineol** [*sin'-e-öl*] [*cina*, wormseed; *oleum*, oil],  $\text{C}_{10}\text{H}_{16}\text{O}$ . The principal constituent of wormseed, cajuput, and eucalyptus oils. It is a pleasant camphoraceous liquid, inactive to polarized light, that boils between  $176^\circ$  and  $177^\circ$  C., and crystallizes at  $-1^\circ$  C.; its sp. gr. at  $16^\circ$  is 0.923.

**Cineraria** [*sin-er-a'-re-ah*] [*cinerarius*, pertaining to ashes]. A genus of composite plants. **C. maritima**, the juice of this plant has been long used in Venezuela in the belief that, dropped in the eye, it would cause the absorption of cataract. Unof.

**Cinerea** [*sin-e'-re-ah*] [*cinereus*, ashen]. The gray, emeritious, or cellular substance of the brain, spinal cord, and ganglia. **C.**, **Lamina**, a thin layer of gray

substance extending backward above the optic commissure from the termination of the corpus callosum to the tuber cinereum.

**Cinereum, Tuber.** See *Tuber Cinereum*.

**Cineritious** (*sin-er-ish'-us*) [*cineres*, ashes]. Ash-like or pertaining to ashes. **C. Substance**, the cortex of the brain, from the color of the same. **C. Tubercle**, the tuber cinereum.

**Cinesiology** (*sin-es-e-ol'-o-je*). See *Kinesiology*.

**Cinesis** (*sin-e'-sis*). See *Kinesis*.

**Cinesitherapy** (*sin-es-e-ther'-a-pe*). See *Kinesitherapy*.

**Cinetica** (*sin-el'-ik-ah*) [*κινείν*, to move]. Medicines or diseases that affect the motor apparatus.

**Cingulum** (*sing'-gu-lum*) [*cingere*, to gird: *pl.*, *Cingula*]. 1. A girdle or zone; the waist. 2. Herpes zoster, or shingles, *q. v.*

**Cinnabar** (*sin'-ab-ar*) [*κιννάβαρι*, a pigment]. Mercuric sulphid, HgS. See *Hydrargyrum* and *Vermilion*. **C.-green**. Same as *Chrome-green*.

**Cinnamene** (*sin'-am-ên*). See *Styrol*.

**Cinnamic** (*sin-am'-ik*) [*κιννάμωμον*, cinnamon]. Pertaining to or derived from cinnamon. **C. Acid**. See *Acid*. **C. Aldehyd**. See *Aldehyd*.

**Cinnamomum**, or **Cinnamon** (*sin-am-o'-mum*, or *sin'-am-on*) [*κιννάμωμον*, cinnamon; *gen.*, *Cinnamomi*]. The inner bark of the shoots of several species of *Cinnamomum*, native to Ceylon and China, the latter being known in commerce under the name of *cassia*. Its properties are due to a volatile oil. It is an agreeable carminative and aromatic stimulant, useful when combined with opium for flatulence, colic, enteralgia, etc. **C., Aqua**, 2 parts of oil in 1000 of water. Dose ʒj-ij. **C., Ext. Fld. Arom.**, contains aromatic powder 10 parts, alcohol 8 parts. Dose ʒx-xxx. **C., Oleum**, the volatile oil. Dose gtt. j-v. **C., Pulv. Comp.** (B. P.), cinnamon bark, cardamom-seeds, and ginger. Dose gr. iij-x. **C. saigonum**, Saigon cinnamon. **C., Spt.**, 10 per cent. of the oil in spirit. Dose ʒv-xxx. **C., Tinct.**, 10 per cent. of the powdered bark in alcohol. Dose ʒss-ij. **C. zeylanicum**, Ceylon cinnamon. **Pulvis aromaticus**, aromatic powder, cinnamon, ginger, aa 35, cardamom, nutmeg, aa 15. Dose gr. x-xxx. **C.-brown**. Same as *Phenylene-brown*.

**Cinnamyl** (*sin'-am-il*) [*κιννάμωμον*, cinnamon],  $C_9H_7O$ . The radicle believed to exist in cinnamic acid.

**Cionectomy** (*si-on-ek'-to-me*) [*κίων*, the uvula; *ἐκτομή*, a cutting out]. Ablation of the uvula.

**Cionitis** (*si-on-it'-tis*) [*κίων*, the uvula; *ιτις*, inflammation]. Inflammation of the uvula.

**Cionoptosis** (*si-on-op-to'-sis*) [*κίων*, uvula; *πτῶσις*, a drooping]. Prolapse of the uvula.

**Cionorrhaphia** (*si-on-or-af'-e-ah*) [*κίων*, the uvula; *ῥαφή*, a suture]. See *Staphylorrhaphy*.

**Cionotome** (*si-on'-o-tom*) [*κίων*, the uvula; *τομή*, cutting]. An instrument for cutting off the uvula.

**Cionotomy** (*si-on-ot'-o-me*) [*κίων*, uvula; *τομή*, a section]. Incision of the uvula.

**Circinate** (*sir'-sin-ât*) [*circinatus*, circular]. In biology, rolled inward from the top, like a crozier. **C. Eruption**. See *Wandering Rash*.

**Circinus** (*sin'-sin-us*) [*κίρκινος*, circle]. Herpes zoster; zona.

**Circle** (*sir'-kl*) [*κίρκος*, a circle]. A ring; a line, every point of which is equi-distant from a point called the center. **C. of Diffusion**. See *Diffusion*. **C. of Haller**, 1. The plexus of vessels formed by the short ciliary arteries upon the sclerotic, at the entrance of the optic nerve. 2. The circulus venosus mammæ. See also *Circulus*. **C. of Willis**, the remarkable arterial anastomosis at the base of the brain. The passage between the anterior cerebral arteries anteriorly, and the internal

carotids and middle and posterior cerebral arteries posteriorly, by communicating vessels.

CIRCLE OF WILLIS.

1. Middle cerebral artery. 2. Internal carotid artery. 3. Postero-medial perforating. 4. Posterior inferior cerebral artery. 5. Superior cerebellar artery. 6. Anterior inferior cerebellar artery. 7. Anterior communicating artery. 8. Antero-lateral perforating. 9. Anterior choroid. 10. Posterior communicating. 11. Posterior choroid. 12. Basilar artery. 13. Crus cerebelli cut.

**Circuit** (*ser'-kit*) [*circuitus*, a going round]. The course of an electric current. **C.-breaker**, an apparatus for interrupting the circuit of an electric current.

**Circulation** (*si'-ku-la'-shun*) [*circulatio*, a circular course]. The passage of the blood through various

vessels; distinguished as capillary, fetal, portal, pulmonary, etc. **C., Cross**, a laboratory experiment in which the vessels in one vascular area of an animal are separated from the rest of the circulation by ligation of anastomosing channels, and then supplied with blood from the circulation of a second animal. In this way, for example, the vascular area of the head may be isolated, and precluded from receiving chloroform inhaled by the lungs, but which is distributed to other parts of the body. By connecting the cerebral ends of the severed carotid arteries of one dog with the cardiac ends of the severed carotids of another dog, the cerebral and general circulatory systems of the first dog may presumably be separated. The first animal is called the *fed*, and the animal supplying the area the *feeder*. The experiment is of little value. **C., Collateral**, that through branches and secondary channels after stoppage of the principal route. **C., Fetal**, that of the fetus, including the circulation through the placenta

**SCHEME OF THE CIRCULATION.** a. Right, b. left auricle. A. Right, B. left ventricle. 1. Pulmonary artery. 2. Aorta. L. Area of pulmonary circulation. K. Upper area of systemic circulation. G. Lower area of systemic circulation. o. The superior vena cava. u. Inferior vena cava. d. Intestine. m. Mesenteric artery. o. Portal vein. L. Liver. h. Hepatic vein. (Landois.)

and umbilical cord. **C., First, or Primitive**, that of the embryo, a closed system, carrying nutriment and oxygen to the embryo. **C., Placental**, the fetal circulation. **C., Portal**. See *Portal System*. **C., Pulmonary**, the circulation of blood through the

THE FETAL CIRCULATION.

*a.* Umbilical vein. *b.* Ductus venosus. *c.* Ductus arteriosus. *d.* Hypogastric arteries. *e.* Mesenteric arteries and vein. *f.* Portal vein.

lungs by means of the pulmonary artery and veins, for the purpose of oxygenation and purification. **C., Second**, the fetal circulation, replacing the omphalo-mesenteric system. **C., Systemic**, the general circulation, as distinct from the pulmonary circulation. **C., Third**, that of the adult. **C., Vitelline**, first, or primitive circulation.
