COSMOS, BODDINGTON'S WHITE LADY LENOX

Our Sensational Flower Seed Novelty for 1915

Cosmos, Boddington's White Lady Lenox

At last we have the white variety of our famous Cosmos, Lady Lenox. Ever since we introduced this variety, our friends and hybridizers have been endeavoring to secure the white type, and we must give credit to our friend, Frank E. Witney, gardener to Winthrop Sargent, Esq., Fishkill-on-Hudson, for his persistence in creating this lovely flower. Our grower, Lester L. Morse, of California, who was in our office recently, says that it is the true White Lady Lenox, has all the characteristics, and is a perfect duplicate (except in color) of the **Fink Lady Lenox**. We cannot do better at this time than give a description of this variety as it appeared in our catalogue in 1908:

"This gigantic Cosmos is the forerunner of an entirely new race. It is of extraordinary size and beauty. Visitors to the floral exhibitions last Autumn were enraptured with its size and magnificent color.

"**Size of Flower**, four to five inches in diameter, which is about three times larger than the ordinary Cosmos. **Color**, a delightful shell pink, lighting up beautifully at night. **Form of Flower**, oval petals of splendid substance, forming a perfectly circular flower, which, when cut, lasts an unusual length of time in water. **Habit of Plant**, strong and vigorous, growing 6 to 7 feet high. Flowers may be cut with any length of stem up to 5 feet."

To popularize this new variety and color, we take pleasure in offering the White Lady Lenox:
15 cts. per trade pkt., 2 trade pkts. 25 cts., oz. \$2.00.

Boddington's Flower Seed Novelties and Specialties

The Best Novelty Spencer Sweet Peas for 1915

BOADICEA. A giant opal pink, delicately suffused pale Cattleya mauve. The flowers are of great size and substance, and beautifully waved; a very strong grower, and always abundance of four bloom sprays. A gem for exhibition. (Very scarce.) Pkt. 25 cts., 5 for \$1.00.

DOBBIE'S FRILLED PINK. One of the most charming Sweet Peas ever raised. It is a Duplex form of Countess Spencer at its best. Pkt. 20 cts., 6 for \$1.00.

DON ALVAR. Grown side by side with all the best lavenders, Don Alvar was acknowledged by experts to be the best lavender yet seen. There is no difficulty in getting four- and five-flowered sprays. Pkt. 25 cts., 5 for \$1.00.

HELEN PIERCE SPENCER. Now fixed in true Spencer form. The ground color is white, marbled and penciled with bright blue in thin lines on both wings and standard. Invariably four large blossoms. Pkt. 20 cts., 6 for \$1.00.

JESSIE CUTHBERTSON SPENCER The ground color is rich cream, overlaid with stripes and marblings of bright rose pink. Pkt. 20 cts., 6 for \$1.00.

MARGARET ATLEE. This was a leading novelty last year and it has proved to be a great favorite. The color is warm, salmon pink, perfectly suffused over a cream ground. The cream deepens into bright buff at base of standard and wings and this lights up the flower with great effect. This variety bears a large proportion of duplex flowers, which greatly adds to its effectiveness. Pkt. 20 cts., 6 for \$1.00.

MONTESUMA. The flowers are a pleasing color, being striped with reddishmaroon, the base of the standard showing a touch of orange; a good grower, producing four-flowered sprays in abundance. Pkt. 25 cts., 5 for \$1.00.

NEW MARGARET MADISON. In New Margaret Madison we have a greatly improved strain of the popular lavender color found in our variety Margaret Madison. The color, too, is daintier and prettier and is as near a true lavender as one could wish. Pkt. 20 cts., 6 for \$1.00.

Robert Sydenham

NEW MIRIAM BEAVER. The color is hard to determine, but we think that a soft shell salmon pink on cream ground lightly overlaid with soft hydrangea pink would convey a good idea of its uniqueness. The flowers are large, nicely waved—often *duplexed—and beautifully placed on long, stout stems. All other pinks look "heavy" beside this delightful shade. Pkt. 20 cts., 6 for \$1.00.

NORVIC. This is one of the largest flowered and best strains of White Spencer Sweet Pea yet introduced. The blooms, which are of extraordinary size, are exceptionally well waved. It is quite fixed in character. Pkt. 20 cts., 6 for \$1.00.

ORANGEMAN. A very fine, large-flowered variety of true Spencer form. Color a rich, deep orange, beautifully waved. A very strong grower and equally good for both exhibition and market. Pkt. 20 cts., 6 for \$1.00.

ROBERT SYDENHAM. (Holmes.) One of the most individual colors introduced into the modern Sweet Pea. It is a bright orange salmon self-colored, rather lighter than the Stirling Stent and deeper than Melba or Barbara. It is of immense size and, owing to its soft texture, needs a little shading during the middle of the day. It is a grand acquisition and created a great sensation when exhibited at the Great Annual Exhibition in London. Pkt. 15 cts., 7 for \$1.00.

ROSINA. One of the largest Sweet Peas yet introduced. The standard and wings are a bright, rosy heliotrope, with a distinct wire edge of solferino red on a cream ground, which is particularly effective and distinct from anything seen in Sweet Peas. Pkt. 25 cts., 5 for \$1.00.

ROYAL PURPLE. Was shown at the National and other Shows by Mr. R.

Wright of Formby, and attracted a lot of attention on account of its fine royal purple color, great distinctness and size. Pkt. 20 cts., 6 for \$1.00.

VEILED BRIDE. The ground color is white, daintily flaked and marbled with soft rose pink. The wings and standard are alike colored. Pkt. 20 cts., 6 for \$1.00.

Asterum A splendid, new type of the Hohenzollern Aster, of immense size, center very full. The following is the description by the raiser, Albert A. Sawyer. "The plant itself grows straight up with very strong, sturdy stems, starting near base and reaching from 18 to 24 inches. The three colors are unsurpassed; the lavender has never been produced before, the pink is the beautiful pink of the Rose, and the white is as white as the driven snow. Each plant yields from ten to fifteen blooms, and their solidity is such that they make good shippers."

CHOICE ASTERS OF RECENT INTRODUCTIONDaybreak

Flowers very large and double, of a beautiful shell-pink color. 2 feet high. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

The following six beautiful varieties are seedlings of the well-known Daybreak and Purity and have found much favor and demand among most up-to-date florists; strongly recommended on account of their free-blooming propensities and beautiful shades. Trade pkt. 25 cts., ¼ oz. 85 cts., oz. \$3.00.

Yellow (Lemon Drop)
Pink Improved (America)
Salmon (Salmon King)

Rose (Rosy Morn)
Lavender
Blue (Blue Bird)

The Favorite

Color beautiful blush, changing to rich deep pink as the flower becomes older; the petals wavy reflexed. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Purity

Double flowers of glistening pure white; similar to Daybreak in form and habit of growth. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50. (See illustration.)

Miss Roosevelt (Victoria)

Primrose tint, which after some time changes to a delicate flesh color, like that of the popular Gloire de Dijon Rose. A splendid cut flower. Trade pkt. 25 cts., ¼ oz. \$1.50.

Aster, Lady Roosevelt

The flowers resemble the incurving Chrysanthemum; the color is a gorgeous pink, of marvelous beauty. The mammoth growth of plant insures extra-long stems; 20 to 30 inches long is very ordinary for Aster Lady Roosevelt, and the flowers are very large. Trade pkt. 25 cts., oz. \$5.00.

Vick's Mikado White

An entirely new class of Branching Asters, growing from 16 inches to 2 feet high, and bearing immense curled and twisted flowers on long, stiff stems, resembling at a distance, huge, ragged, Japanese Chrysanthemums. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Vick's Mikado Pink

Extremely fine shade, well set on stiff, long stems; companion to Mikado White. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Snowdrift

Certainly one of the earliest Asters in cultivation. The entire energy of the plant seems given to the production of slender, upright stems 12 to 20 inches long, crowned with immense feathery flowers. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

ASTERS—Continued

Giant Comet Ruby The finely curled flowers, resembling a Chrysanthemum, are raised upon long stems, and open in a glowing scarlet, turning at the close of the period of flowering into dark scarlet. Trade pkt. 25 cts., ¼ oz. \$1.00.

Giant Comet, Queen of Spain Primrose, turning to blush; it has the same beautiful effect of coloring as Miss Roosevelt, in the Victorian class. Trade pkt. 25 cts., ¼ oz. \$1.00.

Vick's Violet King In shape and size the bloom is round, full and large, many of the flowers 4 to 5 inches. Its color is a soft violet-lilac. Trade pkt. 25 cts., oz. \$2.00.

Lavender Gem Flowers are borne on long stems, and are excellent for cutting. Trade pkt. 25 cts., oz. \$2.00.

Hercules, White Flowers are borne on remarkably strong stalks, are all the purest white, of the genuine Hohenzollern form, with very long petals, and attain the enormous diameter of 6, or, with good culture, as much as 7 inches. Trade pkt. 25 cts., oz. \$2.00.

Cardinal The color is, as its name implies, a beautiful shade of cardinal. One of the very best varieties for cutting purposes. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Sunset A seedling from Daybreak. The color of the flowers is a delicate shade of light pink, shading to a rich pink in the center, making a beautiful combination of colors in one deep flower. The flowers are globe shaped and are borne on long stems in profusion. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Crimson King Color a very rich blood crimson, full of fire, making a brilliant bed or border, and very desirable for cutting, the color showing up well under artificial light. Trade pkt. 25 cts., ¼ oz. 60 cts., oz. \$2.00.

Pink Beauty A magnificent variety of strong, free, upright growth, 24 to 30 inches high, blooming from early in August until well on in September, with frequently as many as fifty flowers open at one time on long, strong stems, and averaging 4 inches across, of Chrysanthemum shape, the inner petals incurved, outer reflexed; color a soft, delicate blush pink; a shade that is always in demand for cutting. Trade pkt. 25 cts., ¼ oz. 75 cts., oz. \$2.50.

Royal Purple H.A. The flowers are large, white, full center, well covered, petals flat and incurved. Color a rich shade of royal purple. Season, medium to late. Trade pkt. 25 cts., ¼ oz. 50 cts., oz. \$1.50.

CALCEOLARIA HYBRIDA

Boddington's Perfection

The herbaceous Calceolaria is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colours there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. 1/2 pkt. 60 cts., pkt. \$1.00.

Boddington's Matchless CINERARIAS

In the culture of the Cineraria the one mistake so often made is that of sowing the seed too soon. The plants thus raised, more often than not, make a rank growth; this is not in any sense desirable. By sowing in May and June plants large enough for all decorative purposes can be had. In after treatment the aim should be to secure as hardy a growth as possible. Sturdy plants with leaves of medium size are best.

BODDINGTON'S GIGANTIC CYCLAMEN

The seed of Cyclamen is often sown too early in the year; from the middle of August to the end of September is the best time. The seedlings should be grown on to the flowering stage without any check whatever. When grown cool the results are most satisfactory. Boddington's Gigantic Cyclamen are unequalled for size and quality of the bloom. A magnificent strain of Cyclamen with flowers of extraordinary size and substance.

Snowflake. The largest of all white Cyclamen.

Cherry-Red. Most brilliant and effective.

Quality Florists' Flower Seeds, Our Specialty

BODDINGTON'S MATCHLESS

GIANT PRIMULAS

PRIMULA SINENSIS

Our *Primula Sinensis* seed has been specially grown for us by the most celebrated English Primula specialist. The flowers are remarkable, not only for size, beauty and brilliancy of the colors, but for the great substance of the petals. Considerable care is necessary in order to secure the successful germination of the seed of the choice kinds of *P. Sinensis*. The most suitable periods for sowing are January to May for Autumn, and June to August for Spring blooming. Shallow pans, well drained, are the best, the soil consisting of sandy loam and leaf-mold, worked through a fine sieve; the pans when thus prepared, should be well watered before the seed is sown. Only a slight covering of soil or sand is needed. What has most to be guarded against is drought; the soil should be kept in an equable degree of moisture as possible, never being on the dry side. We attribute more failures to this cause than to any other. Just at the time when the seed commences to germinate the least departure from this is fatal.

Finest Mixed. Many sorts.....	.15		.30

Quality means the best and finest types procurable in their respective classes. We go to specialists for our flower seeds. Our customers, the florist, the private gardener, demand the highest grade. We have no cheap catalogue trade. "Quality" may mean a little higher price. "Quality," in fact, means "quality," and we know that when you buy from us you get it—and our customers know it too.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

- BODDINGTON'S IDEAL PRIZE GIANT MIXED.** Great variety of superb colors.
- CYCLOPS.** Velvety carmine, shading to a broad white border, throat dotted with dark red.
- DUCHESS OF YORK.** Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

- SPOTTED HYBRIDS.** Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.
- SUTTON'S WHITE.** A giant white flowered variety.
- DUKE OF YORK.** Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.
- HER MAJESTY.** This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.
- READING SCARLET.** In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.
- GOLIATH.** Violet and white, fine variety.

Per doz. \$1.50, per 100 \$10.00.

Miscellaneous Bulbs

Lycoris squamigera, or Amaryllis Halli

(THE MAGIC LILY OF JAPAN)

A perfectly hardy Amaryllis, producing beautiful pink flowers.

Lycoris squamigera produces in early Spring foliage which grows until July, when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower-stalks spring from the ground to a height of 2 or 3 feet, developing an umbel of large and beautiful lily-shaped flowers 3 to 4 inches across and from eight to twelve in number, of a delicate lilac pink.

Very useful for cut flowers in the Summer.

Strong-blooming bulbs, each 10 cts., per doz. \$1.00, per 100 \$7.50.

Apios tuberosa (Tuberous-rooted Wistaria). Clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. Tubers, per doz. 20 cts., per 100 \$1.50, per 1000 \$12.00.

Hybrid Roses, Crimson Ramblers, Etc.

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.
