To Our Customers

This catalogue cancels all previous lists, quotations or prices.

Orders

Order early so that you may get the varieties and grades you prefer. All orders should be written on separate piece of paper and not mixed with body of letter.

Quantities and Prices

The articles in the following list will be furnished at the annexed prices ONLY when the specified amount shall be taken. Fifty, however, will be furnished at the 100 rate and 5 at the 10 rate. In no case does this mean so many trees of assorted classes, but refers to ONE CLASS of assorted varieties; for instance, 5 apples, 5 pears or 5 plums, and NOT to 2 apples, 2 pears and 1 plum.

Substitutions

Where particular varieties are ordered, it should be stated whether and to what extent substitutions will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection is left entirely to us, we will endeavor to send such sorts as are best suited to your locality.

Packing

All trees and plants are carefully labeled and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material, will be made.

Express or Freight

Always state which way you want your order shipped and give explicit directions as to marking packages.

When it is left to us to choose the mode of conveyance, we will exercise our best judgment, but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

Guarantee, etc.

We warrant all trees and plants to be good, thrifty and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care after they are received by the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace same or refund the amount paid; but in no case will we be liable for any sum greater than the amount originally charged, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery and acceptance by the buyers.

Errors and Shortages

Customers are requested to notify us at once of any errors or shortages so that we may rectify it at once. All claims must be made within one week after receipt of shipment, otherwise it will be assumed that the goods are satisfactory and in accordance with the invoice.

References

Orders from unknown correspondents must be accompanied by cash or satisfactory reference.

PIONEER NURSERY, Monrovia, California.

Hints on Transplanting Deciduous Trees

The situation of the orchard having been decided upon, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. Immediately before planting, be sure to examine the roots carefully, and cut away to a smooth surface all bruised, lacerated and broken roots and rootlets with a sharp knife. When the trees are received they should be immediately unpacked and the roots laid in a trench and well covered with soil, which should then be thoroughly wet down. If delayed in transit thereby becoming dry and suffering from exposure—the bark showing signs of shrivelling—it is a good plan to immerse the trees in a tank over night, and the following day bury root and top completely in damp soil for a few days, until they become normal, and may be safely planted out. In planting the top soil should be broken down into the hole and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may, in light soils, stand from two to three inches deeper than it did in the nursery; but in heavy clay or wet ground, it is advisable to have it stand at the same height as it was before transplanting. When the hole is nearly filled in, a pail of water should be thrown in to settle and wash in the soil around the roots. The earth should be packed very firmly around the roots as it is disastrous to allow the air to enter.

The ground should be kept loose and free from weeds. It is advantageous to spread around the tree for a distance of two or three feet each way a mulch of rough manure or litter, which conserves the moisture and prevents the ground from drying out and baking.

If the location is subject to high winds, plant with the largest branches towards the prevailing wind, and lean the tree slightly in that direction.

We advise pruning directly after planting. If strong winds prevail, prune with the upper bud pointing against the wind. Unbranched trees should be cut back to 18 to 30 inches if planted in orchard; for dooryard or other situations they may be left taller. Ordinarily about 2-3 of the top should be removed from all branched trees, but this must be done according to the best judgment of the operator as no definite rules can be given, the object being to secure a well balanced head. The leading shoot is usually cut back to secure a good branching form. Unbranched figs, persimmons and walnuts are usually not pruned until the second year. Grapes should be trimmed to one stem and this cut back to 6 inches, except on extra large vines.

DISTANCE FOR PLANTING

Standard Apples.....	25 to 30 feet apart each way
Standard Pears.....	20 to 24 feet apart each way
Strong-growing Cherries.....	20 to 24 feet apart each way
Duke and Morello Cherries.....	18 to 20 feet apart each way
Standard Plums and Prunes.....	20 to 24 feet apart each way
Peaches and Nectarines.....	20 to 24 feet apart each way
Apricots.....	24 to 30 feet apart each way
Almonds.....	24 to 30 feet apart each way
Walnuts.....	40 to 50 feet apart each way
Grapes.....	7 to 10 feet apart each way
Currants and Gooseberries.....	.4 by 6 feet
Raspberries and Blackberries.....	.3 to 4 by 5 to 7 feet
Strawberries for field culture.....	.1 to 1½ by 4 to 5 feet
Strawberries for garden culture.....	.1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distance Apart

		Square Method	Equilateral Triangle Method
Distance. 1 foot apart each way, number plants.....		43,560	50,300
Distance. 2 feet apart each way, number plants.....		10,890	12,375
Distance. 3 feet apart each way, number plants.....		4,840	5,889
Distance. 4 feet apart each way, number plants.....		2,722	3,130

Distance. 20 feet apart each way, number plants.....		109	125
Distance. 22 feet apart each way, number plants.....		90	104
Distance. 24 feet apart each way, number plants.....		75	86
Distance. 25 feet apart each way, number plants.....		69	79
Distance. 30 feet apart each way, number plants.....		48	55
Distance. 35 feet apart each way, number plants.....		35	40
Distance. 40 feet apart each way, number plants.....		27	31
Distance. 50 feet apart each way, number plants.....		18	20

Rule—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre, (43,560) will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

About Weights and Shipping

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give a clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 6 to 8 ft., 2 pounds each; 4 to 6 ft., 1½ pounds each; 3 to 4 ft., 1 pound each; 2 to 3 ft., one-half of a pound each. Grape-vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 ft. and up to 12 to 15 ft., 3 to 6 pounds each.

Potted plants in from 3- to 6-inch pots, packed in boxes, weigh from 4 to 12 pounds each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each.

Palms, packed in boxes, with ball of earth, 2- to 3-ft. plants, 40 pounds, and gradually increasing to 110 pounds each on 5- to 6-ft. plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds per flat.

Stock in cans, pints and quarts, 3 to 5 pounds each, gallon cans 6 to 14 pounds, 5 gallon cans 40 to 65 pounds, 8 to 10 gallon cans 75 to 125 pounds each.

Fruit Department

Deciduous

	EACH	10	100
APPLES. SPECIAL VARIETIES			
3 to 4 ft.....	25	\$ 2 00	\$ 18 00
4 to 6 ft.....	35	3 00	25 00

Sorts listed in heavy type have been tested and proved favorable to this locality.

Bismark, Delicate, Kew Garden, **Famouse** or **Snow**, **Maxons** **Early**, **King David**. N.B. Delicate is the same apple sold under a similar trademark name.

COMMON VARIETIES

4 to 6 ft.....	30	2 50	18 00
3 to 4 ft.....	20	1 80	15 00
Arkansas Black , Arkansas Beauty , Baldwin , Yellow Belleflower , Fall Pippin , Gravenstein , Jonathan , Mammoth Black Twig , Maiden Blush , Missouri Pippin , Newtown Pippin , Red Astrachan , Red June , Rhode Island Greening , Rome Beauty , Spitzenberg , Twenty Ounce Pippin Winesap , Stayman's Winesap , White Winter Pearmain , Winter Banana , Yellow Transparent , York Imperial .			

CRAB APPLES (Standard trees, 1 and 2 year)			
4 to 6 ft.....	35	2 50	20 00
3 to 4 ft.....	25	2 00	18 00
Hyslop, Red Siberian , Transcendent , Whitney .			

DWARF APPLES (Grown on Paradise stock root. 1 and 2 year)			
4 to 6 ft.....	40	3 50	30 00
3 to 4 ft.....	35	3 00	20 00
5 gal. cans 4 to 6 ft.....	60	5 00
1 gal. cans. 3 to 4 ft.....	50	4 00

Dwarf apples bear earlier and heavier than the standards. We recommend them to the small grower with limited space. Stock in cans may be had all summer for late planting.

Bismark, **Banana**, **Maiden Blush**, **Fall Pippin**, **Twenty Ounce Pippin**.

APRICOTS (On peach and apricot roots. 1 year)			
4 to 6 ft.....	40	3 50	22 00
3 to 4 ft.....	30	2 50	18 00
Blenheim , Hemskirk , Moorpark , Newcastle , Pringle , Royal , Early Budd , Early , Montgamet .			

CHERRIES (1 and 2 year)			
6 ft.....	40	3 50	25 00
4 to 6 ft.....	35	3 00	20 00
3 to 4 ft.....	25	2 00	15 00
Baldwin , Black Tartarian , May Duke , Morello , Montmorency , Early Richmond , Royal Ann (Napoleon Bigarreau) Lambert , Bing , Black Republican .			

Sour cherries, especially **Morello**, do well in this locality.

FIGS (1 year)			
6 ft.....	60	5 00	40 00
5 ft.....	50	4 00	30 00
4 ft.....	35	3 00	25 00
3 ft.....	25	2 00	15 00
2 ft.....	20	1 80	12 00

BLACK:—**Brunswick**, **Black San Pedro**, **Celente**, **Mission** or **California Black**.

WHITE:—**Adriatic**, **Brown Smyrna**, **Brown Turkey**, **Calimyrna**, **Kadota** (same as **White Pacific**), **Rose Blanche**, **Verdal Longue**, **White Pacific**, **White San Pedro**, **White Smyrna**, and **Capri**.

The **Calimyrna** will not bear unless fertilized with pollen from the **Capri** by means of the fig wasp. The **Smyrna** we list does not require pollenization.

MULBERRY (Black Spanish. <i>Noir de Spain</i>)

To Our Customers

This catalogue cancels all previous lists, quotations or prices.

Orders

Order early so that you may get the varieties and grades you prefer. All orders should be written on separate piece of paper and not mixed with body of letter.

Quantities and Prices

The articles in the following list will be furnished at the annexed prices ONLY when the specified amount shall be taken. Fifty, however, will be furnished at the 100 rate and 5 at the 10 rate. In no case does this mean so many trees of assorted classes, but refers to ONE CLASS of assorted varieties; for instance, 5 apples, 5 pears or 5 plums, and NOT to 2 apples, 2 pears and 1 plum.

Substitutions

Where particular varieties are ordered, it should be stated whether and to what extent substitutions will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection is left entirely to us, we will endeavor to send such sorts as are best suited to your locality.

Packing

All trees and plants are carefully labeled and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material, will be made.

Express or Freight

Always state which way you want your order shipped and give explicit directions as to marking packages.

When it is left to us to choose the mode of conveyance, we will exercise our best judgment, but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

Guarantee, etc.

We warrant all trees and plants to be good, thrifty and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care after they are received by the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace same or refund the amount paid; but in no case will we be liable for any sum greater than the amount originally charged, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery and acceptance by the buyers.

Errors and Shortages

Customers are requested to notify us at once of any errors or shortages so that we may rectify it at once. All claims must be made within one week after receipt of shipment, otherwise it will be assumed that the goods are satisfactory and in accordance with the invoice.

References

Orders from unknown correspondents must be accompanied by cash or satisfactory reference.

Hints on Transplanting Deciduous Trees

The situation of the orchard having been decided upon, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. Immediately before planting, be sure to examine the roots carefully, and cut away to a smooth surface all bruised, lacerated and broken roots and rootlets with a sharp knife. When the trees are received they should be immediately unpacked and the roots laid in a trench and well covered with soil, which should then be thoroughly wet down. If delayed in transit thereby becoming dry and suffering from exposure—the bark showing signs of shrivelling—it is a good plan to immerse the trees in a tank over night, and the following day bury root and top completely in damp soil for a few days, until they become normal, and may be safely planted out. In planting the top soil should be broken down into the hole and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may, in light soils, stand from two to three inches deeper than it did in the nursery; but in heavy clay or wet ground, it is advisable to have it stand at the same height as it was before transplanting. When the hole is nearly filled in, a pail of water should be thrown in to settle and wash in the soil around the roots. The earth should be packed very firmly around the roots as it is disastrous to allow the air to enter.

The ground should be kept loose and free from weeds. It is advantageous to spread around the tree for a distance of two or three feet each way a mulch of rough manure or litter, which conserves the moisture and prevents the ground from drying out and baking.

If the location is subject to high winds, plant with the largest branches towards the prevailing wind, and lean the tree slightly in that direction.

We advise pruning directly after planting. If strong winds prevail, prune with the upper bud pointing against the wind. Unbranched trees should be cut back to 18 to 30 inches if planted in orchard; for dooryard or other situations they may be left taller. Ordinarily about 2-3 of the top should be removed from all branched trees, but this must be done according to the best judgment of the operator as no definite rules can be given, the object being to secure a well balanced head. The leading shoot is usually cut back to secure a good branching form. Unbranched figs, persimmons and walnuts are usually not pruned until the second year. Grapes should be trimmed to one stem and this cut back to 6 inches, except on extra large vines.

DISTANCE FOR PLANTING

Standard Apples.....	25 to 30 feet apart each way
Standard Pears.....	20 to 24 feet apart each way
Strong-growing Cherries.....	20 to 24 feet apart each way
Duke and Morello Cherries.....	18 to 20 feet apart each way
Standard Plums and Prunes.....	20 to 24 feet apart each way
Peaches and Nectarines.....	20 to 24 feet apart each way
Apricots.....	24 to 30 feet apart each way
Almonds.....	24 to 30 feet apart each way
Walnuts.....	40 to 50 feet apart each way
Grapes.....	7 to 10 feet apart each way
Currants and Gooseberries.....	4 by 6 feet
Raspberries and Blackberries.....	3 to 4 by 5 to 7 feet
Strawberries for field culture.....	1 to 1½ by 4 to 5 feet
Strawberries for garden culture.....	1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distance Apart

	Square Method	Equilateral Triangle Method
Distance. 1 foot apart each way, number plants.....	43,560	50,300
Distance. 2 feet apart each way, number plants.....	10,890	12,375
Distance. 3 feet apart each way, number plants.....	4,840	5,889
Distance. 4 feet apart each way, number plants.....	2,722	3,130
Distance. 5 feet apart each way, number plants.....	1,742	2,011
Distance. 6 feet apart each way, number plants.....	1,210	1,397
Distance. 7 feet apart each way, number plants.....	807	928
Distance. 8 feet apart each way, number plants.....	680	785
Distance. 9 feet apart each way, number plants.....	537	620
Distance. 10 feet apart each way, number plants.....	435	502
Distance. 12 feet apart each way, number plants.....	302	348
Distance. 14 feet apart each way, number plants.....	222	256
Distance. 15 feet apart each way, number plants.....	170	222
Distance. 16 feet apart each way, number plants.....	170	195
Distance. 18 feet apart each way, number plants.....	134	154
Distance. 20 feet apart each way, number plants.....	109	125
Distance. 22 feet apart each way, number plants.....	90	104
Distance. 24 feet apart each way, number plants.....	75	86
Distance. 25 feet apart each way, number plants.....	69	79
Distance. 30 feet apart each way, number plants.....	48	55
Distance. 35 feet apart each way, number plants.....	35	40
Distance. 40 feet apart each way, number plants.....	27	31
Distance. 50 feet apart each way, number plants.....	18	20

Rule—Square Method—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre, (43,560) will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

About Weights and Shipping

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give a clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 6 to 8 ft., 2 pounds each; 4 to 6 ft., 1½ pounds each; 3 to 4 ft., 1 pound each; 2 to 3 ft., one-half of a pound each. Grape-vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 ft. and up to 12 to 15 ft., 3 to 6 pounds each.

Potted plants in from 3- to 6-inch pots, packed in boxes, weigh from 4 to 12 pounds each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each.

Palms, packed in boxes, with ball of earth, 2- to 3-ft. plants, 40 pounds, and gradually increasing to 110 pounds each on 5- to 6-ft. plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds per flat.

Stock in cans, pints and quarts, 3 to 5 pounds each, gallon cans 6 to 14 pounds, 5 gallon cans 40 to 65 pounds, 8 to 10 gallon cans 75 to 125 pounds each.

20 to 30 in. potted.	75	5 00

	EACH	10	100
CAROB TREE (<i>Ceratonia siliqua</i> . St. John's Bread).			
4 in. pots, 18 in.	35	3 00
Balled, 24 in.	50	4 00
Gal. cans, 36 in.	60	5 00
5 gal. cans, 48 in.	1 00	8 00
CARISSA grandiflora (Governor's Thorn).			
3 in. pots, 6 to 12 in.	25	2 00	18 00
12 to 18 in.	35	2 50	22 00
5 gal. cans, 24 in.	1 25
CHERIMOYA (<i>Anona cherimolia</i> . Custard Apple).			
3 and 4 in. pots, 12 to 15 in.	25	2 00
18 to 24 in.	45	4 00
24 to 36 in.	65	5 00
DELICIOUS MONSTER (<i>Monstera Deliciosa</i>).			
5 in. pots, 8 to 12 in.	1 50
7 and 8 in. pots, 18 to 24 in.	1 75
8 in. pots, 2 to 3 ft.	2 50
Jap. Tubs, 2 to 4 ft.	5 00	to 8 00
EDIBLE PASSION FRUIT (<i>Passiflora edulis</i>).			
3 in. pots, 12 to 18 in.	20	1 50
Qt. cans, 18 to 30 in.	25
EUGENIA jambos (Rose Apple).			
3 in. pots, 6 to 8 in.	40
5 in. pots, 12 to 18 in.	1 00
Uniflora (Surinam Cherry).			
2½ in. pots, 4 to 6 in.	30
EVERGREEN GRAPE (<i>Vitis Capensis</i>).			
4 in. pots, 12 to 18 in.	40	3 50
6 in. pots, 3 to 4 ft.	75	6 00
FEIJOA Sellowiana (Pineapple Guava).			
3 in. pots, 10 to 15 in.	25	2 25	20 00
6 in. pots, 24 to 30 in.	75	6 00	50 00
5 in. pots, 18 to 24 in.	50	4 00
Balled, 2 to 3 ft.	1 50
HARPEPHYLLUM Caffrum (Kaffir Plum).			
6 in. pots, 1 to 2 ft.	1 50
8 in. pots, 3 ft.	2 00
5 gal. cans, 4 to 5 ft.	3 50
LEMON Guava (<i>Psidium Guava</i>).			
3 in. pots, 12 in.	25	2 00
4 in. pots, 18 in.	35	3 00
5 in. pots, 2 to 3 ft.	50	4 00
LOQUAT (Seedling).			
Balled, 1 to 2 ft.	30	2 50
2 ft.	40	3 50	30 00
3 ft.	50	4 50	40 00
4 ft.	65	5 50	50 00
5 ft.	90	8 00	75 00
MACADAMIA ternifolia (Queensland Nut).			
5 in. pots, 8 to 12 in.	1 25
MANGO (<i>Magnifera Indica</i>).			
3 and 4 in. pots, 1 ft.	75	6 00
5 in. pots, 2 ft.	1 75
PEPINO (<i>Solanum Guatamalense</i>). Melon Shrub.			
4 in. pots, 10 to 15 in.	20	1 75
Gal. cans, 20 in.	35	2 50
PINEAPPLE (<i>Ananas sativa</i>).			
3 and 4 in. pots, 6 to 8 in.	30	2 50
5 in. pots, 8 to 12 in.	45	4 00
SAPOTA Blanco (<i>Casimiroa edulis</i>). Mexican Peach.			
Cans, 12 to 24 in.	35	3 00
24 in.	50
36 in.	75
48 in.	1 50
STRAWBERRY Guava Red (<i>Psidium Cattleianum</i>).			
In flats, 8 to 12 in.	4 00
In flats, 12 to 18 in.	5 00
Cans, 12 to 15 in.	15	1 25	10 00
Cans, 15 to 20 in.	20	1 80	15 00
Cans, 18 to 20 in.	30	2 50
Cans and balls, 24 to 30 in.	50	4 00
5 gal. cans, 3 to 5 ft.	1 00
STRAWBERRY Guava, Yellow			
Gal. cans, 15 to 20 in.	30	2 50	22 00
Gal. cans, 36 in.	60	5 00	45 00
TREE TOMATO (<i>Solanum betaceum</i>).			
7 in. pots, 2 to 3 ft.	50
5 gal. cans, 3 to 5 ft.	75

Flowering and Decorative—In-Doors
 31 to 32

Alocasia macrorrhiza
Anthericum
Anthurium
 Artillery Plant
Asparagus
Aspidistra
Astilbe Japonica
Aucuba Japonica
 Azalea
 Balsam-single, see *Impatiens sultani*
 Bay Trees
 Begonia
Buxus arborescens, see *Trimmed Box*
 Blue Campanula, see *Campanula*
Bryophyllum calicium
 Campanula
Cineraria hybrida
Cyclamen giganteum
 Delicious Monster, see *Philodendron pertusum*
Dracaena
Farfugium

Ficus
Gloxinia hybrida
 Gold Dust Plant, see *Aucuba*
Impatiens sultani
 India Rubber Plants, see *Ficus*
 Lemon-Pot
 Leopard Plant, see *Farfugium*
Monstera Deliciosa, see *Philodendron p.*
 Mosses, see *ferns*
 Otaneite Pot Orange
Philodendron
Philea microphylla, see *Artillery Plant*
 Primrose, see *Primula*
Primula
 Purple Leaved Plant, see *Strobilanthes Dyerianus*
Sciadopytis verticillata
Skimmia Japonica
Spirea Japonica, see *Astilbe J*
 Sprouting Leaf Plant, see *Bryophyllum calicium*
Strobilanthes Dyerianus
 Sultan's Balsam, see *Impatiens sultani*
 Trimmed Box

Ferns

32 to 33

Adiantum
Alsophila australis
Aspidium
Asplenium nidus avis
Blechnum
Cibotium Scheidii
Cyrtomium
Davallia bullata, see *Japanese Fern Ball*
Dicksonia Antartica
Dietyogramma Japonica
 Elk or Stag Horn, see *Platynerium*
 Hanging Baskets
 Japanese Fern Ball
Lastrea chrysoloba
Lycopodium
 Moss, see *Selaginella*
Nephrolepis
Pellaea
Platynerium alaicorne
Platyloma falcata
Polypodium aureum
Polystichum angulare prolifera
 Pteris
Selaginella Emiliana
Sitalobium circutarium
 Sword Ferns, see *Nephrolepis*
 Whitman Fern, see *Nephrolepis Whitmanni*
Woodwardia radicans

Bedding Plants

33 to 34

Ageratum
Alternanthera amabilis
Antirrhinum
Ameria maritima
 Aster
 Baby Marguerite
 Beard Tongue, see *Penstemon*
Begonia
Bellis perennis
Calendula officinalis
 Carnation
Carex Japonica variegata
Centurarea imperialis
Centurarea Candidissima, see *Dusty Miller*
 Cigar Plant, see *Cuphea platycentra*
Cuphea platycentra
 Dusty Miller
Echeveria secunda glauca
 English Daisy, see *Bellis perennis*
 Violet, see *Violet*
 Forget-me-not
Gazania splendens
 Golden Feather, see *Pyrethrum aureum*
 Hen and Chickens, see *Echeveria*
 Ice Plant, see *Mesembryanthemum*
 Lavender Cotton, see *Santolina*
Lippia repens
Lobelia compacta
Mesembryanthemum
 Mourning Bride, see *Scabiosa*
 Moss Verbena, see *Verbena*
Myosotis, see *Forget-me-not*

INDEX—Continued

Pansy
 Penstemon
 Petunia
 Pot Marigold, see *Calendula*
 Pyrethrum aureum
 Santolima chamaecyparissus
 Scabiosa
 Sea Pink, see *Ameria maritima*
 Sedum
 Snap Dragon, see *Antirrhinum*
 Stocks
 Strawberry (ornamental)
 Sunshine and Shadow, see *Gazania splendens*
 Sweet Sultan-Royal, see *Centaurea imperialis*
 Tetratheca ericifolia
 Thrift, see *Ameria maritima*
 Verbena
 Vinca rosea
 Violet

Bulbs
 34 to 35

Agapanthus
 Amaryllis
 Anemone coronaria
 Angel Lily
 Annunciation Lily, see *Lilium candidum*
 Asparagus, see fruit dept.
 Belladonna Lily, see *Amaryllis*
 Bermuda Easter Lily, see *Lilium Harrisii*
 Bleeding Heart
 Bugle Lily, white, see *Watsonia Ardernei*
 Caladium esculentum
 Calla
 Clivia
 Daffodils, see *Narcissus*
 Dahlias
 Dahlia imperialis
 Day Lily, see *Hemerocallis*
 Easter Lily, see *Lilium*
 Elephants Ear, see *Caladium*
 Flag, see *Iris*
 Fleur de Lis, see *Iris*
 Formosa Easter Lily, see *Lilium*
 Freesia
 German Iris, see *Iris*
 Gladiolus
 Gold Banded Japanese Lily, see *Lilium*
 Hemerocallis
 Hippeastrum, see *Amaryllis*
 Hyacinth
 Imantophyllum miniatum, see *Clivia*
 Iris
 Ixia tricolor
 Japanese Iris, see *Iris*
 Lilies, see *Lilium*
 Jonquil, see *Narcissus*
 Leopard Lily, see *Lilium*
 Lilium
 Madonna Lily, see *Lilium*
 Moraea iridiodes
 Mourning Bride Iris, see *Iris*
 Narcissus
 Natal Lily, see *Moraea iridiodes*
 Ornithogalum Arabicum
 Oxalis
 Polianthes tuberosa, see *Tuberose*
 Ranunculus
 Red Freesia, see *Tritonia*
 Rhubarb, see fruit dept.
 Richardia, see *Calla*
 Shell Flower, see *Tigridia*
 Soap Root or Plant
 Spanish Iris, see *Iris*
 Sparaxis tricolor, see *Ixia*
 Sparaxis
 Star of Bethlehem, see *Ornithogalum*
 Tiger Flower, see *Tigridia*
 Tiger Lily, see *Lilium*
 Tigridia

 Polygonum Baldschuanicum
 Pueraria Thunbergii, see Kudzu Vine
 Snail Vine
 Tecoma
 Trumpet Vine, see Tecoma
 Virgin's Bower, see Clematis
 Virginia Creeper, see Ampelopsis
 Vitis, see Grape fruit dept.
 Wistaria
 Woodbine, see Ampelopsis

Palms

38 to 40

Alexandra, see Ptychosperma
 Archontophoenix Alexandra, see Ptychosperma
 Cunninghamiana, see Seaforthia elegans
 Areca
 Australian Fan Palm, see Corypha
 Blue Fan Palm, see Erythea
 Brahea calcearea
 Canary Island Date Palm, see Phoenix
 Canariensis
 Chamaerops excelsa
 Cocos
 Corypha australis
 Cycas
 Date Palm, see Phoenix
 Dracaena
 Dragon Palm, see Dracaena
 Erythea
 Guadalupe Fan Palm, see Erythea
 Howea, see Kentia
 Jubea spectabilis
 Kentia
 Latania Borbonica
 Livistonia
 Palmetto, see Sabal
 Phoenix
 Pritchardia filifera
 Ptychosperma
 Sabal
 Sago Palm, see Cycas revoluta
 Seaforthia elegans
 Trachycarpus, see Chamaerops
 Washingtonia
 Windmill Fan Palm, see Chamaerops excelsa

Roses

40 to 41

Division "A"
 Division "B"
 Specials

Lyonothamnus Floribundus Asplenifolius
Island Ironwood—a Very Rare and Choice Hardy Native Tree
