### THE "J. & P. PREFERRED" DOZEN

A GROUP of Hybrid Tea Roses selected for range of color, thriftiness, beauty, and adaptability to all parts of the country. They have been carefully chosen from a large collection of varieties as best worthy of maintaining the high standard set by the "J. & P. Preferred" Dozens of former years. Ready in autumn 1930 and spring 1931.

Copies of the color pictures of above dozen are available to our customers for sales promotion. Prices on application

Hybrid Tea Roses on Multiflora Japonica stock at Shiloh—a part of our 1930 block

## Roses

**GRADES.** For early fall delivery we offer No. 1 grade only. For late fall and spring delivery we can supply No. 1½ (Medium) grade at 30% off and No. 2 grade at 50% off these prices. The following prices apply on 2-yr. No. 1 grade:

### Ramblers and Climbers

(a) On own roots

(b) Budded

|                                                                                                                                                                                                                    | Per 10 | Per 100 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| b <b>Albertine.</b> Loose clusters of coppery chamois-yellow flowers, changing to coppery rose..                                                                                                                   | \$4 00 | \$35 00 |
| b <b>Alida Lovett.</b> A splendid, large-flowered, light shell-pink climber, lighter than Mary Wallace and a rapid, vigorous grower, although blooming later.....                                                  | 3 00   | 25 00   |
| o <b>American Pillar.</b> Tremendous growth and glossy, permanent foliage. Flowers single, brilliant pink with a white eye, borne in clusters as large as your head. The most popular single-flowered climber..... | 2 20   | 18 00   |
| ob <b>Aviateur Blériot.</b> Buds orange, pink, and apricot; flowers double, medium size, pale yellow to white. Foliage of the handsomest. Growth moderate. One of the most highly regarded yellow climbers.....    | 3 00   | 25 00   |
| o <b>Baltimore Belle.</b> An old sort, still admired by many. The flowers are light pink and cream. Growth tall and rapid.....                                                                                     | 2 50   | 20 00   |
| ob <b>Bess Lovett.</b> Large, well-shaped blooms of bright, light crimson. Much more vigorous and generally more satisfactory than Climbing American Beauty.....                                                   | 3 00   | 25 00   |
| b <b>BONFIRE.</b> Rambler of Dorothy Perkins type, literally covered with large trusses of crimson flowers. Blooms about two weeks ahead of Dorothy Perkins. A splendid forcer for pot trade.....                  | 4 50   | 40 00   |

b **CHAPLIN'S PINK CLIMBER.** A pink replica of Paul's Scarlet Climber of which it is a seedling. Blooms in clusters of 8 to 12 fairly large flowers. It is clear pink with a tuft of yellow stamens. \$7 for 10; \$60 per 100.

|                                                                                                                                                                                                         |      |       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|
| ob <b>Christine Wright.</b> A moderate-growing variety of Mary Wallace type, but is the first climber to bloom. It sometimes bears flowers in summer and autumn. A favorite sort with many growers..... | 3 00 | 25 00 |
| ob <b>Climbing American Beauty.</b> Extremely beautiful large buds and flowers of bright purplish crimson. Best grown as a pillar Rose.....                                                             | 3 00 | 25 00 |
| b <b>Climbing General MacArthur.</b> A climbing sport of the Hybrid Tea of the same name. Bright red blooms, borne freely in June and occasionally thereafter. Moderate vigor.                          | 3 50 | 30 00 |
| ob <b>Climbing Gruss an Teplitz.</b> Vigorous, branching grower, bearing continually bright crimson flowers like the bush Rose of the same name.....                                                    | 3 50 | 30 00 |
| b <b>Climbing Hoosier Beauty.</b> Large, velvety crimson blooms.....                                                                                                                                    | 3 50 | 30 00 |
| b <b>Climbing Lady Ashtown.</b> A splendid, hardy, climbing Hybrid Tea Rose with exquisite, pointed blooms of vivid pink. This is the best climber of its type.....                                     | 3 50 | 30 00 |

## RAMBLER AND CLIMBING ROSES, continued

|                                                                                                                                                                                                                                                                                                                                                     | Per 10 | Per 100 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| b Climbing Lady Hillingdon. Beautiful, large flowers of apricot and saffron-yellow. The plant is very vigorous where the winters are not too severe. It blooms all the time. . .                                                                                                                                                                    | \$3 50 | \$30 00 |
| b Climbing Los Angeles. The same beautiful salmon and gold flowers as the dwarf, but of strong, healthy growth. . . . .                                                                                                                                                                                                                             | 3 50   | 30 00   |
| b Climbing Mme. Caroline Testout. Climbing form of the well-known Hybrid Tea. Probably the hardest of the type and very free-blooming. . . . .                                                                                                                                                                                                      | 3 50   | 30 00   |
| b Climbing Mrs. Aaron Ward. An extremely vigorous climber with flowers larger than the bush variety. . . . .                                                                                                                                                                                                                                        | 3 50   | 30 00   |
| b Climbing Souv. de Claudius Pernet. Yellow like the bush Rose. . . . .                                                                                                                                                                                                                                                                             | 4 00   | 35 00   |
| b Climbing Sunburst. Like the bush Rose of the same name, but a vigorous climber. Flowers fine, sunny yellow. . . . .                                                                                                                                                                                                                               | 3 50   | 30 00   |
| b Climbing Sunstar. Fragrant, orange and vermilion flowers. . . . .                                                                                                                                                                                                                                                                                 | 4 00   | 35 00   |
| ob Crimson Rambler. The old favorite, with large heads of very gay, small, scarlet-crimson flowers. Recommended for large specimen bushes and hedge-rows. . . . .                                                                                                                                                                                   | 2 20   | 18 00   |
| o Dorothy Perkins. Graceful, twining growth of great vigor. Flowers soft shell-pink, small, crinkly, in great clusters. . . . .                                                                                                                                                                                                                     | 2 20   | 18 00   |
| o Dr. W. Van Fleet. Large flowers of exquisite pale pink on fine, long stems. Extremely vigorous, and has marvelously fine foliage. One of our most popular of all climbers. . .                                                                                                                                                                    | 3 00   | 25 00   |
| b Emily Gray. The most beautiful yellow climber, with large golden buds and blooms which do not fade. The foliage is glossy, pointed, and holly-like. Growth very vigorous. . .                                                                                                                                                                     | 3 50   | 30 00   |
| ob Eugène Jacquet. Vigorous, upright grower bearing large clusters of bright cherry-red, double flowers which last a long time. A splendid forcer. . . . .                                                                                                                                                                                          | 3 00   | 25 00   |
| cb Excelsa. Bright crimson flowers in large clusters. Very vigorous and hardy. Preferred by many to Crimson Rambler, and generally called "Red Dorothy Perkins" . . . . .                                                                                                                                                                           | 2 20   | 18 00   |
| ob Flower of Fairfield. Much like Crimson Rambler, but bears occasional flowers in summer and autumn. Frequently called Everblooming Crimson Rambler. . . . .                                                                                                                                                                                       | 3 00   | 25 00   |
| b Gardenia. One of the strongest growers, with beautiful glossy foliage. Buds rich creamy yellow and open flowers yellow at first. Very popular among the yellow climbers. . .                                                                                                                                                                      | 3 00   | 25 00   |
| o Goldfinch. Small, semi-double, yellow flowers, slightly fragrant, borne in clusters. . . .                                                                                                                                                                                                                                                        | 2 20   | 18 00   |
| b Hiawatha. Long, slender canes; fine for arches. Single flowers of American Pillar type, but smaller and redder, with a copper suffusion when nearly open. . . . .                                                                                                                                                                                 | 2 20   | 18 00   |
| o Lady Gay. Very much like Dorothy Perkins, but occasionally blooms in summer and fall. .                                                                                                                                                                                                                                                           | 2 20   | 18 00   |
| b LE REVE. The long-wanted, absolutely hardy, unfading yellow climber. Flowers very large, semi-double, vivid golden yellow both in bud and open. Foliage dark and glossy; growth very vigorous. Superior in color to Gardenia, Goldfinch, and others of that type, and much harder than Emily Gray. A more reliable bloomer than Star of Persia. . | 4 00   | 35 00   |
| b Maréchal Niel. Lovely lemon- and golden yellow flowers on a strong climbing plant. Suitable for mild climates only. . . . .                                                                                                                                                                                                                       | 4 00   | 35 00   |
| b Marie Gouchault. Early-flowering, of Dorothy Perkins type. A fine forcing Rose, with flowers of brilliant light red and salmon-pink. . . . .                                                                                                                                                                                                      | 4 00   | 35 00   |
| b Mary Lovett. Large, Hybrid Perpetual-like flowers of pure snowy white. A very vigorous grower and one of the finest of its color. . . . .                                                                                                                                                                                                         | 3 00   | 25 00   |
| ob Mary Wallace. The outstanding large-flowered pink climber. Very brilliant and invariably satisfactory. Growth is enormous and rapid, and the long-stemmed blooms make good cut-flowers. . . . .                                                                                                                                                  | 3 00   | 25 00   |
| b Mme. Grégoire Staechelin. See Staechelin.                                                                                                                                                                                                                                                                                                         |        |         |
| ob Paul's Scarlet Climber. The most popular red-flowered climber of the day. Flowers large, well-shaped, vivid scarlet-red, fading but little. Has a tendency to bloom again in the fall. . . . .                                                                                                                                                   | 3 00   | 25 00   |
| b PRIMROSE. New hardy yellow climber with double, canary-yellow flowers in great profusion. Lighter than Le Reve and more double. Much harder than Emily Gray. We believe it is the most satisfactory yellow climbing Rose for the North. It is very new and everyone who has it is enthusiastic over its merits. \$6 for 10; \$50 per 100.         |        |         |
| ob Roserie. Exactly like Tausendschön, except that it is several shades darker pink. . . . .                                                                                                                                                                                                                                                        | 3 00   | 25 00   |
| b SCORCHER. An Australian introduction that has created a world sensation. Very vigorous and hardy with handsome vermilion flowers covering the plant in great profusion. There is nothing else like it. . . . .                                                                                                                                    | 12 50  | 100 00  |
| o Silver Moon. The favorite white climber. Flowers semi-double, very large, with brilliant yellow stamens. Growth even more vigorous than American Pillar. Foliage perfect. .                                                                                                                                                                       | 3 00   | 25 00   |
| ob Source d'Or. Double yellow flowers much like Aviateur Blériot, but considered somewhat harder. . . . .                                                                                                                                                                                                                                           | 3 00   | 25 00   |
| b STAECHELIN. This most unique climber was discovered in Spain in 1925 by Mr. Nicholas, now head of our Research Department, and has just been awarded the John Cook Medal for the most outstanding climber. Hardy, vigorous grower. Crimson buds opening to large, perfumed, pale pink flowers. . . . .                                            | 10 00  | 75 00   |
| ob Tausendschön. Vigorous, thornless plant bearing large clusters of medium-sized flowers varying from creamy white to soft pink. One of the most charming and most popular climbers. Sometimes called "Thousand Beauties". . . . .                                                                                                                 | 2 20   | 18 00   |

The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size, and beyond that for multiples of 10

The best block of Baby Roses we have produced in many years. Photographed August, 1930

### RAMBLER AND CLIMBING ROSES, continued

|                                                                                                                                                                                                                                       | Per 10 | Per 100 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| o <b>Trier.</b> Moderate grower with large clusters of small, creamy white flowers. Frequently blooms in autumn.....                                                                                                                  | \$2 20 | \$18 00 |
| o <b>Veilchenblau.</b> Rosy purple buds and flowers turning grayish blue. Extraordinarily vigorous and decidedly unusual in color. Usually called the "Blue Rambler".....                                                             | 3 00   | 25 00   |
| o <b>White Dorothy.</b> Like Dorothy Perkins, except that the flowers are white. The best double, small-flowered white rambler.....                                                                                                   | 2 20   | 18 00   |
| o <b>Wichuraiana.</b> The wild Rose from Korea which is the ancestor of most climbers. A fine ground-cover with glossy leaves and clusters of starry white flowers in midsummer and a profusion of red fruits late in the season..... | 2 50   | 20 00   |
| o <b>Yellow Rambler.</b> Yellow flowers in large clusters.....                                                                                                                                                                        | 2 50   | 20 00   |

### Moss Roses

#### (b) Budded

|                                                                                          | Per 10 | Per 100 |
|------------------------------------------------------------------------------------------|--------|---------|
| b <b>Blanche Moreau.</b> The charming old white Moss Rose with a pale pink heart.....    | \$3 00 | \$25 00 |
| b <b>Crested Moss.</b> Beautiful pink buds and blooms with a feathery, hooded calyx..... | 3 00   | 25 00   |
| b <b>Henri Martin.</b> The best red Moss Rose.....                                       | 3 00   | 25 00   |
| b <b>White Moss.</b> The fine pure white Moss of old-time gardens.....                   | 3 00   | 25 00   |

### Dwarf Polyantha or "Baby" Roses

#### (o) On own roots

#### (b) Budded

|                                                                                                                                                                          | Per 10 | Per 100 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| ob <b>Baby Rambler.</b> The original, light crimson sort with fine heads of small flowers.....                                                                           | \$3 00 | \$25 00 |
| b <b>Baby Tausendschön.</b> A dwarf, everblooming form of Tausendschön. Very pretty and prolific.....                                                                    | 3 00   | 25 00   |
| b <b>Brilliant Echo.</b> Improved Echo; like Roserie in color but more uniform in color.....                                                                             | 4 50   | 40 00   |
| b <b>Cécile Brunner.</b> Small, perfectly formed, pink and gold buds and flowers like tiny Tea Roses. Very popular and always in demand.....                             | 3 00   | 25 00   |
| b <b>Chatillon Rose.</b> Vivid light salmon-pink, semi-double flowers in enormous heads. Lasts a long time and is extremely prolific. Undoubtedly one of the finest..... | 3 00   | 25 00   |
| b <b>Clotilde Soupert.</b> An old-time Polyantha with large, globular flowers of rosy white tinted with pink in the center.....                                          | 3 50   | 30 00   |
| o <b>Echo.</b> A soft pink, dwarf sport of Tausendschön, with the same lovely, frilly flowers. Very free-flowering.....                                                  | 3 00   | 25 00   |

*We cannot undertake to supply long and much assorted lists of stock calling for only small bundles of each kind, as our business is exclusively wholesale and we do not have the facilities to handle retail orders*

## DWARF POLYANTHA OR "BABY" ROSES, continued

|                                                                                                                                                                                                                                                                                                              | Per 10 | Per 100 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| ob <b>Ellen Poulsen.</b> Very popular, small-flowered type of soft rose-pink. Vigorous, healthy, and very free-flowering. . . . .                                                                                                                                                                            | \$3 00 | \$25 00 |
| b <b>Erna Teschendorff.</b> A very popular bright red sort, much brighter than the original Baby Rambler. . . . .                                                                                                                                                                                            | 3 00   | 25 00   |
| b <b>Eva Teschendorff.</b> Dwarf grower with large, frilled, snow-white flowers tinted green. Very dainty. . . . .                                                                                                                                                                                           | 3 00   | 25 00   |
| o <b>George Elger.</b> A delicately beautiful variety shaped like Cécile Brunner, but soft golden yellow in bud and paler in open flower. . . . .                                                                                                                                                            | 3 00   | 25 00   |
| b <b>GOLDEN SALMON.</b> <i>New.</i> Large clusters of striking reddish orange buds and blooms of most amazing color. The compact bushes bloom continually and make a fine mass effect. Attracts unlimited attention and admiration. . . . .                                                                  | 3 50   | 30 00   |
| b <b>Greta Kluis.</b> A bright crimson sport of Baby Tausendschön of the same type in flower and habit. . . . .                                                                                                                                                                                              | 3 00   | 25 00   |
| b <b>Gruss an Aachen.</b> Large flowers like Hybrid Teas, orange-pink in bud, paling to soft salmon-pink and white on opening. This is one of the most remarkable Roses in the world and is unrivaled for mass bedding or edging purposes. It is continually in flower and suffers from no diseases. . . . . | 3 00   | 25 00   |
| ob <b>Ideal.</b> Really the finest dark red—darker, more even color than Miss Edith Cavell. Flowers small and in gigantic clusters. . . . .                                                                                                                                                                  | 3 00   | 25 00   |
| o <b>Jeanne d'Arc.</b> Pure white flowers in large clusters; delightfully perfumed. . . . .                                                                                                                                                                                                                  | 3 00   | 25 00   |
| o <b>Katharina Zeimet.</b> Much the same, but flowers are smaller and more freely produced. A fine edging variety. . . . .                                                                                                                                                                                   | 3 00   | 25 00   |
| b <b>Lady Reading.</b> A bright, light red sport of Ellen Poulsen with all the good traits of that popular variety. . . . .                                                                                                                                                                                  | 3 00   | 25 00   |
| ob <b>Miss Edith Cavell.</b> Brilliant crimson, with white center. Flowers small, in very large bunches. Free grower and bloomer. . . . .                                                                                                                                                                    | 3 00   | 25 00   |
| b <b>Mme. Anth. Kluis.</b> A brilliant crimson-scarlet form of Orleans, with a distinct orange undertone. Very showy and satisfactory in every respect. . . . .                                                                                                                                              | 3 00   | 25 00   |
| b <b>Mrs. W. H. Cutbush.</b> Soft pink flowers in clusters, like a dwarf, everblooming Dorothy Perkins. . . . .                                                                                                                                                                                              | 3 00   | 25 00   |
| b <b>ORANGE PERFECTION.</b> Orange-red. Probably the best of the type for general purposes and a good forcer for pot trade. . . . .                                                                                                                                                                          | 4 00   | 35 00   |
| b <b>Orléans.</b> The most popular light red sort for many years. Fine, bushy plants crowded with clusters of small flowers all season. . . . .                                                                                                                                                              | 3 00   | 25 00   |
| b <b>RUDOLPH KLUIS.</b> Vermilion buds; flowers tinted cerise; of rather large type. Very free-flowering and compact bush. . . . .                                                                                                                                                                           | 3 00   | 25 00   |
| b <b>SUPERBA.</b> The deepest maroon Polyantha. Vigorous bush, throwing large flowering heads in quick profusion. . . . .                                                                                                                                                                                    | 3 00   | 25 00   |
| b <b>Suzanne Miller.</b> Another Orléans sport with bright, fadeless cherry-red blooms. Withstands both hot and rainy weather without damage. . . . .                                                                                                                                                        | 3 00   | 25 00   |
| ob <b>Triomphe Orléanais.</b> One of the earlier improvements on Orléans with more profuse and brighter bloom. Finest of the crimson Polyanthas. . . . .                                                                                                                                                     | 3 00   | 25 00   |
| ob <b>Yvonne Rabier.</b> Fine, bushy plants with abundant foliage and great quantities of medium-sized, very double white blooms. A fine edging variety. . . . .                                                                                                                                             | 3 00   | 25 00   |

(Varieties on own roots 5 cts. less, and available for spring delivery only.)

|                                                                                                                                                                                                                                                                 | Per 10 | Per 100 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| o <b>Alexander Hill Gray.</b> White, tinted lemon and gold. A superb Tea Rose for mild climates. . . . .                                                                                                                                                        | \$3 50 | \$30 00 |
| o <b>American Legion.</b> A popular bright red variety with long stems. . . . .                                                                                                                                                                                 | 3 50   | 32 00   |
| b <b>Angèle Pernet.</b> The most brilliantly colored mandarin and yellow Rose in existence. . . . .                                                                                                                                                             | 4 00   | 35 00   |
| b <b>Angelus.</b> Large, creamy white blooms of exquisite shape, very freely produced. . . . .                                                                                                                                                                  | 3 50   | 30 00   |
| ob <b>Antoine Rivoire.</b> Very double, flat flower of creamy white with lilac shading at the center. A very dependable and popular variety. . . . .                                                                                                            | 3 50   | 30 00   |
| b <b>Aspirant Marcel Rouyer.</b> A stiff, wiry grower with long-pointed buds and exquisitely shaped blooms of orange and pale yellow. Very free-flowering and vigorous. . . . .                                                                                 | 4 00   | 35 00   |
| o <b>Augustine Guinoisseau.</b> A popular old Rose of the La France type but pure silvery white. . . . .                                                                                                                                                        | 3 50   | 30 00   |
| ob <b>Betty.</b> A very popular, vigorous Rose with large, handsome foliage and very long, coppery buds which open to soft pinkish yellow, semi-double flowers of great size. Splendid for massing in large beds. . . . .                                       | 3 50   | 30 00   |
| b <b>Betty Upchurch.</b> One of the finest new Roses, with brilliant copper-red buds and semi-double, salmon-pink flowers stained with copper-pink on the outside. It is a profuse bloomer and one of the outstanding varieties in commerce. . . . .            | 4 00   | 35 00   |
| b <b>Briarcliff.</b> The most recent and the best sport of Columbia. Fine, handsome flowers of the even shade of silvery rose-pink. . . . .                                                                                                                     | 3 50   | 30 00   |
| b <b>CALEDONIA.</b> Large, long-pointed, cone-shaped buds; flowers large, full, double, high-centered, borne singly on long, strong stems. When first open, they are slightly lemon tinted, changing to pure white as they develop. A fine garden Rose. . . . . | 10 00  | 75 00   |

The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size and beyond that for multiples of 10

## TEA, HYBRID TEA AND EVERBLOOMING ROSES, continued

|                                                                                                                                                                                                                                                                                                                                      | Per 10 | Per 100 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| b <b>Charles K. Douglas.</b> A very fine bright red bedding Rose which is becoming very popular as its merits are known. The flowers are large, semi-double, brilliant light crimson with a scarlet undertone, and are produced in great numbers throughout the season. . . . .                                                      | \$3 50 | \$30 00 |
| b <b>CHARLES P. KILHAM.</b> The finest variety on the market of the Mme. Edouard Herriot color. The very double flowers are blazing scarlet-orange at first and open bright orange-pink with fiery centers. Good grower, free-flowering, and excellent both for bedding and cutting. . . . .                                         | 7 00   | 60 00   |
| b <b>Château de Clos Vougeot.</b> The ever-popular, almost black Rose which everybody likes so tremendously. The plants are low and spreading, every shoot tipped with a glowing blackish scarlet bloom of marvelous fragrance. . . . .                                                                                              | 4 00   | 35 00   |
| b <b>Cheerful.</b> Glowing pink, with orange and yellow suffusion; slightly fragrant. . . . .                                                                                                                                                                                                                                        | 4 00   | 35 00   |
| ob <b>Clara Watson.</b> Fine, pointed blooms of pearly white, tinted with peach-color in the center. . . . .                                                                                                                                                                                                                         | 3 50   | 30 00   |
| ob <b>Columbia.</b> Popular greenhouse variety which does well outdoors, producing long-stemmed, pointed flowers of vivid pink throughout the entire season; very perfumed. . . . .                                                                                                                                                  | 3 50   | 30 00   |
| b <b>Constance.</b> Splendid golden yellow buds stained with crimson outside, opening to large, full, rich sunflower-yellow which does not fade. . . . .                                                                                                                                                                             | 4 00   | 35 00   |
| b <b>COURTNEY PAGE.</b> Beautifully shaped blooms of bright scarlet-crimson, overlaid with a fine velvety sheen. Intensely fragrant. . . . .                                                                                                                                                                                         | 4 50   | 40 00   |
| o <b>Crimson Queen.</b> Showy, cupped flower of bright crimson on long, strong stems. . . . .                                                                                                                                                                                                                                        | 3 50   | 30 00   |
| b <b>Crusader.</b> Fine crimson flowers, borne on stiff stems. . . . .                                                                                                                                                                                                                                                               | 3 50   | 30 00   |
| b <b>Cuba.</b> Tall plants with excellent foliage, producing enormous, semi-double blooms of blazing red-orange. Preferred to Padre by many. . . . .                                                                                                                                                                                 | 4 00   | 35 00   |
| b <b>DAME EDITH HELEN.</b> One of the largest and most perfectly shaped pink Roses known. Blooms abundantly, with long, strong stems, and the flowers resemble a perfectly shaped, bright pink Francis Scott Key. It has attracted abundant praise and unstinted admiration everywhere. The most perfumed of all pink Roses. . . . . | 4 00   | 35 00   |
| b <b>Dean Hole.</b> Well-shaped flowers of light rose-pink, with old-gold tints at the base of the petals. . . . .                                                                                                                                                                                                                   | 3 50   | 30 00   |
| b <b>Diadem.</b> Copper-pink flowers, held erect on stiff stems. . . . .                                                                                                                                                                                                                                                             | 3 50   | 30 00   |
| b <b>DORIS TRAYLER.</b> Tall, vigorous growth and long-pointed, orange-yellow buds and blooms. A splendid new yellow Rose of the Feu Joseph Looymans type. . . . .                                                                                                                                                                   | 4 00   | 35 00   |
| b <b>Dorothy Page-Roberts.</b> Large, copper-pink buds and flowers suffused with apricot-yellow. . . . .                                                                                                                                                                                                                             | 3 50   | 30 00   |
| b <b>Double White Killarney.</b> A splendid pure white form of the always popular Killarney, with a few more petals than the type. . . . .                                                                                                                                                                                           | 3 50   | 30 00   |
| ob <b>Duchess of Wellington.</b> A low-spreading but vigorous grower with long, saffron-yellow buds opening to very large, light yellow flowers. Always popular and in great demand. . . . .                                                                                                                                         | 3 50   | 30 00   |
| b <b>DUCHESS OF YORK.</b> Flowers large, very full, of fine form, deep golden yellow, tangerine center. . . . .                                                                                                                                                                                                                      | 6 00   | 50 00   |
| o <b>Ecarlate.</b> A fine bedding or low hedge Rose of great vigor, with splendid foliage and innumerable brilliant vermillion, semi-double flowers from spring until frost. . . . .                                                                                                                                                 | 3 50   | 30 00   |
| b <b>Edel.</b> Splendidly shaped, large, very double white flowers of exquisite texture. Plants vigorous and healthy. . . . .                                                                                                                                                                                                        | 3 50   | 30 00   |
| b <b>EDITH NELLIE PERKINS.</b> A handsome new variety with long-pointed buds of rich orange-pink, opening to fine salmon-pink blooms with a golden underglow. Very fragrant. . . . .                                                                                                                                                 | 6 00   | 50 00   |
| b <b>Edward Mawley.</b> The popular old variety with bright crimson, cupped flowers. . . . .                                                                                                                                                                                                                                         | 3 50   | 30 00   |
| b <b>E. G. HILL.</b> <i>New.</i> Great massive blooms of deep maroon, velvety on inside and glistening outside; very perfumed. . . . .                                                                                                                                                                                               | 7 00   | 60 00   |
| b <b>Eldorado.</b> Splendid, vigorous plants with large, solid, golden yellow buds, opening to very double, handsome, bright yellow blooms. One of our finest yellow Roses and becoming increasingly popular as its merits are known. The most perfumed of yellow Roses. . . . .                                                     | 3 50   | 30 00   |
| b <b>Elsie Beckwith.</b> Beautiful pointed buds with flowers of rich, deep rosy pink. A very vigorous grower. . . . .                                                                                                                                                                                                                | 3 50   | 30 00   |
| b <b>Emile Charles.</b> A vigorous, bushy plant of the Mme. Edouard Herriot type, with brilliant fiery red buds shaded with golden yellow, opening to reddish coral flowers tinted with flame color. . . . .                                                                                                                         | 4 00   | 35 00   |
| b <b>Ethel Somerset.</b> Beautifully shaped buds and flowers of bright shrimp-pink. . . . .                                                                                                                                                                                                                                          | 4 00   | 35 00   |
| b <b>Etoile de Feu.</b> The handsomest bright orange-pink of its type. Much better than Louise Catherine Breslau, Gorgeous, and Arthur R. Goodwin. The plants are very vigorous, low and branching, with healthy foliage, and steadily produce large, blazing blooms of amazing intensity of color. . . . .                          | 4 00   | 35 00   |
| ob <b>Etoile de France.</b> Bushy plants with large, dark crimson blooms. Has long been popular and in great demand. . . . .                                                                                                                                                                                                         | 3 50   | 30 00   |
| b <b>Etoile de Hollande.</b> The finest dark red Rose for general purposes, having great vigor and floriferousness. Its gigantic flowers are velvety crimson and are produced with great freedom throughout the season. This is unquestionably the best and most popular red Hybrid Tea Rose in the world. . . . .                   | 6 00   | 50 00   |

*The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size and beyond that for multiples of 10*

| b <b>Hoosier Beauty.</b> Vigorous plants with large, velvety crimson bloom throughout the season.....                                                                                                                                                                                                                                               | \$3 50 | \$30 00 |
| b <b>H. V. Machin.</b> Robust, stiff-stemmed plants with large, globular, bright crimson flowers. Extremely hardy; fine for cold sections.....                                                                                                                                                                                                      | 3 50   | 32 00   |
| b <b>Imperial Potentate.</b> One of the finest new brilliant pink Roses. Very vigorous grower of free-flowering habit.....                                                                                                                                                                                                                          | 4 00   | 35 00   |
| b <b>Independence Day.</b> Spreading, bushy plants. Brownish orange buds, opening to large, semi-double, vivid apricot-yellow flowers. A bed of it always makes a glorious display of color.....                                                                                                                                                    | 3 50   | 30 00   |
| b <b>Irish Charm.</b> A new introduction from Ireland, with beautifully shaped blush-pink blooms, richly shaded with apricot and gold.....                                                                                                                                                                                                          | 4 00   | 35 00   |
| ob <b>Irish Elegance.</b> Bronzy pink buds and flowers suffused with shades of apricot and yellow. Continually in bloom.....                                                                                                                                                                                                                        | 3 50   | 30 00   |
| b <b>Irish Fireflame.</b> Five-petaled flowers of brilliant orange-pink, somewhat on the Los Angeles shade.....                                                                                                                                                                                                                                     | 3 50   | 30 00   |
| b <b>IRISH HOPE.</b> A new variety with maroon-crimson buds opening to large, crimson-scarlet, fragrant flowers of fine lasting qualities. We believe it is one of the finest new red Roses.....                                                                                                                                                    | 4 00   | 35 00   |
| b <b>Ivy May.</b> A new Rose from England which has shown up remarkably well in our trials and under field-culture. The long-pointed buds open to double, rose-pink blooms, shaded with amber at the base of the petals and suffused with golden yellow at the back and on the edges. We think it is a very fine thing.....                         | 3 50   | 30 00   |
| b <b>JOANNA HILL.</b> <i>New.</i> A glorified Mrs. Aaron Ward. Heavy lemon buds, evolving into a semi-double bloom with Indian yellow center surrounded by bold cream petals. Heavy foliage.....                                                                                                                                                    | 7 00   | 60 00   |
| b <b>John Cook.</b> A dwarf, bushy grower and very floriferous. Very useful as a bedder. The flowers are much like La France—bright rose and silvery pink. Very fine.....                                                                                                                                                                           | 4 00   | 35 00   |
| b <b>JOHN RUSSELL.</b> A vigorous grower of almost Hybrid Perpetual habit, with large flowers borne singly on the top of strong stems. It is rich crimson-scarlet, shaded with black, and at all stages of the bloom is one of the most perfectly formed flowers we have ever seen. It blooms with us continuously from June until frost.....       | 4 50   | 40 00   |
| ob <b>Jonkheer J. L. Mock.</b> A gorgeous, very double, brilliant pink variety shaded darker on the outside of the petals. One of the handsomest Roses grown and attracts admiration wherever seen.....                                                                                                                                             | 3 50   | 30 00   |
| b <b>J. Otto Thilow.</b> One of the finest new Roses of recent years. Dark pink, well-formed, semi-double flowers shaded with gold and amber.....                                                                                                                                                                                                   | 3 50   | 30 00   |
| b <b>JULIEN POTIN.</b> This is the Rose which was introduced to the greenhouse trade several years ago as Golden Pernet. It is a fine grower, slightly richer in color than the original Pernet, with more and better-placed petals, and never shows the black center which disfigured the older Rose.....                                          | 4 50   | 40 00   |
| b <b>Juliet.</b> A strong-growing Hybrid Perpetual type, with large, pointed blooms of old-gold and bright carmine-pink.....                                                                                                                                                                                                                        | 3 50   | 30 00   |
| b <b>K. of K.</b> Strong, bushy plants with semi-single, scarlet, star-shaped flowers in great profusion. An excellent bedder.....                                                                                                                                                                                                                  | 3 50   | 30 00   |
| ob <b>Kaiserin Auguste Viktoria.</b> The standard, double, pure white bedding Rose which has been popular and in great demand for many years.....                                                                                                                                                                                                   | 3 50   | 30 00   |
| o <b>Killarney.</b> An old favorite with splendid, bright pink buds and large, unfading blooms.....                                                                                                                                                                                                                                                 | 3 50   | 30 00   |
| b <b>Killarney Brilliant.</b> Much like Killarney but so bright a pink that it is almost red.....                                                                                                                                                                                                                                                   | 3 50   | 30 00   |
| ob <b>Killarney Queen.</b> Has more petals than Killarney and the color lies between Killarney and Killarney Brilliant.....                                                                                                                                                                                                                         | 3 50   | 30 00   |
| b <b>La France.</b> The oldest Hybrid Tea, with lovely, double, pale pink blooms, more deliciously scented than any other. It is still desired by many who remember its unsurpassed fragrance.....                                                                                                                                                  | 3 50   | 30 00   |
| o <b>La Tosca.</b> Strong, thornless bushes with large, cup-shaped, silvery pink blooms. A fine Rose which merits general popularity.....                                                                                                                                                                                                           | 3 50   | 30 00   |
| b <b>Lady Alice Stanley.</b> Sturdy, active bushes with distinctive, healthy foliage and large, erect, very double flowers of light silvery pink, darker on the outside of the petals. This is one of the best Roses in the list and has been popular since the day of its introduction. Its unusual hardiness recommends it for cold climates..... | 3 50   | 30 00   |
| ob <b>Lady Ashtown.</b> Brilliant, glossy pink flowers of exquisite pointed shape. One of the old stand-bys which is always in great demand.....                                                                                                                                                                                                    | 3 50   | 30 00   |
| b <b>Lady Florence Stronge.</b> A new Rose with pinkish yellow buds opening flesh-pink, shaded with rose and old-gold.....                                                                                                                                                                                                                          | 4 00   | 35 00   |
| b <b>LADY FORTEVIOT.</b> <i>New.</i> Large buds, opening to very large, double, bright golden yellow flowers, flushed with cardinal-red, borne in clusters on long, strong stems. Hardy, continuous bloomer.....                                                                                                                                    | 10 00  | 75 00   |
| b <b>Lady Hillingdon.</b> The always-popular, beautiful apricot-yellow Tea Rose with lovely buds and exquisitely formed open blooms produced continuously. Probably the hardiest of all Tea Roses and undoubtedly the best yellow bedding Rose.....                                                                                                 | 3 50   | 30 00   |

*We cannot undertake to supply long and much assorted lists of stock calling for only small bundles of each kind as our business is exclusively wholesale and we do not have the facilities to handle retail orders*

## TEA, HYBRID TEA AND EVERBLOOMING ROSES, continued

|                                                                                                                                                                                                                                                                                                                                                                  | Per 10 | Per 100 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| b <b>LADY INCHQUIN.</b> Large, full, perfectly shaped, orange-cerise flowers. Very decorative.                                                                                                                                                                                                                                                                   | \$4 50 | \$40 00 |
| b <b>LADY MARGARET STEWART.</b> Stout, erect plants with immense, copper-orange buds, opening to bright golden yellow flowers of wonderful shape and luscious color. It is a severe rival of Rev. F. Page-Roberts and it would not surprise us to see it become even more popular.                                                                               | 5 50   | 45 00   |
| b <b>LADY MARY ELIZABETH.</b> Large, long-pointed buds; flowers large, double, high-centered, lasting, fragrant, brilliant carmine-pink.                                                                                                                                                                                                                         | 4 50   | 40 00   |
| b <b>Lady Pirrie.</b> Tall, very healthy bushes, continuously producing bright copper-pink buds of lovely shape, which open to large, pale bronzy yellow flowers passing to nearly white. Similar in general appearance to Mrs. A. R. Waddell, but a much stronger plant and more beautiful flower. Lady Pirrie is so good that it deserves much wider planting. | 3 50   | 30 00   |
| ob <b>Lady Ursula.</b> Another old stand-by of the highest quality. The bush is very strong and continuously produces its well-shaped, pale pink blooms. Unsurpassed for bedding where a mass of flowers is desired all the time.                                                                                                                                | 3 50   | 30 00   |
| b <b>Laurent Carle.</b> A dwarf, sturdy bush with rich purple-crimson buds and velvety pointed blooms. One of the handsomest Roses in existence.                                                                                                                                                                                                                 | 3 50   | 30 00   |
| b <b>Lieutenant Chauré.</b> Dwarf, bushy plants with bright red, semi-double blooms produced unceasingly.                                                                                                                                                                                                                                                        | 3 50   | 30 00   |
| b <b>Lord Calvert.</b> One of John Cook's Roses, with brilliant velvety red flowers.                                                                                                                                                                                                                                                                             | 3 50   | 30 00   |
| b <b>LORD CHARLEMONT.</b> Glowing scarlet-red flowers of wonderful shape and substance.                                                                                                                                                                                                                                                                          | 6 00   | 50 00   |
| b <b>Los Angeles.</b> Beautifully shaped, fragrant flowers of pale salmon-pink, richly shaded with deep rose and gold. Extremely popular with everyone for its beauty and fragrance.                                                                                                                                                                             | 3 50   | 30 00   |
| b <b>Louise Catherine Breslau.</b> Low-spreading plants with brilliant orange-pink, double flowers.                                                                                                                                                                                                                                                              | 3 50   | 30 00   |
| b <b>LUCIE MARIE.</b> <i>New.</i> Long-pointed buds of deep yellow, splashed with red. As the outer petals unfold, the inner face is yellow with coppery veination, tips of petals lightly tipped pink; slightly fragrant. Most distinct bedding variety.                                                                                                        | 10 00  | 75 00   |
| ob <b>MARGARET McGREDY.</b> The first time in three generations of the house of McGredy that a Rose was thought good enough to be named for a member of that Rose aristocratic family. Much was expected of Margaret, but she won everywhere with flying colors. Brilliant red petals on hinges of deep gold. Buds upright. Seldom out of bloom.                 | 4 00   | 35 00   |
| b <b>MARY PICKFORD.</b> Bud large, long-pointed, orange-yellow; flower large, double, pale yellow, deeper at center, very fragrant.                                                                                                                                                                                                                              | 6 00   | 50 00   |
| b <b>Maud Cuming.</b> A bushy plant of exceptional vigor, with tapered buds and large, globular flowers of salmon-pink, shaded with coral and yellow.                                                                                                                                                                                                            | 4 00   | 35 00   |
| b <b>MAY WETTERN.</b> <i>New.</i> Very deep pink-salmon bloom; fine pointed buds. Fine, strong bush, free from disease.                                                                                                                                                                                                                                          | 4 50   | 40 00   |
| b <b>MEVROUW G. A. VAN ROSSEM.</b> A startling novelty with vivid orange and apricot buds, opening to brownish yellow flowers, strongly shaded with copper-pink. This new variety has created a decided stir wherever it has been seen, and we believe it will be widely popular in this country.                                                                | 10 00  | 75 00   |
| b <b>Miss Cynthia Forde.</b> One of the old stand-bys, with erect stems, good foliage, and brilliant, double pink flowers unceasingly produced.                                                                                                                                                                                                                  | 3 50   | 30 00   |
| b <b>Miss Lolita Armour.</b> Double, globular blooms of orange-pink toning to coppery yellow at the base; extremely fragrant.                                                                                                                                                                                                                                    | 3 50   | 30 00   |
| b <b>MISS ROWENA THOM.</b> A striking novelty of last year with gigantic blooms of brilliant satiny pink, shaded with orange-flame at the center. It has the enthusiastic approval of all who have seen it and we predict great popularity for it.                                                                                                               | 6 00   | 50 00   |
| b <b>Miss Willmott.</b> Large, globular flowers with pointed centers. Pure white when opening, but gradually develops peachy pink tints in the middle. We consider it one of the finest white Roses because of its fine blooming qualities in hot weather.                                                                                                       | 3 50   | 30 00   |
| b <b>Mme. Alexandre Dreux.</b> Dwarf, free-flowering bushes with small, ripe mandarin flowers which always attract attention. A constant bloomer in the nursery.                                                                                                                                                                                                 | 3 50   | 30 00   |
| ob <b>Mme. Butterfly.</b> The finest Rose of the Ophelia type, bright light pink, shaded with gold. Very popular and always in demand.                                                                                                                                                                                                                           | 3 50   | 30 00   |
| b <b>Mme. Caroline Testout.</b> A popular pink variety which everybody knows and wants.                                                                                                                                                                                                                                                                          | 3 50   | 30 00   |
| b <b>Mme. Colette Martinet.</b> Dainty, little, pointed flowers of pale yellow. Attractive for buttonhole use.                                                                                                                                                                                                                                                   | 3 50   | 30 00   |
| ob <b>Mme. Edouard Herriot.</b> The original of all the bright orange-pink varieties and still one of the best. Deserves its wide popularity.                                                                                                                                                                                                                    | 4 00   | 35 00   |
| b <b>Mme. Jules Bouché.</b> Bushy, erect plants with medium-sized, well-shaped, white flowers, lightly tinted with pink at the center, produced abundantly throughout the season. This is the most dependable white Rose for bedding purposes.                                                                                                                   | 3 50   | 30 00   |
| o <b>Mme. Jules Grolez.</b> Brilliant, pointed flowers of satiny rose-pink and exquisite shape.                                                                                                                                                                                                                                                                  | 3 50   | 30 00   |
| ob <b>Mme. Léon Pain.</b> Stocky, spreading plants with beautiful foliage and large, ruffled, light pink flowers of beautiful form and fragrance. A fine thing for bedding and has been popular for many years; almost immune from black-spot.                                                                                                                   | 3 50   | 30 00   |

The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size and beyond that for multiples of 10

|                                                                                                                                                                                                                                                                                                                                                                                                               | Per 10 | Per 100 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|
| b <b>Mme. Poincaré.</b> Handsome new Rose shaped like Antoine Rivoire but of rich, peachy color which is most attractive.....                                                                                                                                                                                                                                                                                 | \$4 00 | \$35 00 |
| b <b>Mme. Ravary.</b> A fine, old-time, cupped golden fawn variety which is still in demand.....                                                                                                                                                                                                                                                                                                              | 4 00   | 35 00   |
| ob <b>Mme. Segond Weber.</b> Blooms very double, bright rose-pink shaded salmon.....                                                                                                                                                                                                                                                                                                                          | 3 50   | 30 00   |
| b <b>Mrs. Aaron Ward.</b> Low, bushy plants with pointed, holly-like foliage and fine fawn-colored buds and open blooms. Has been popular for many years and is still in great demand....                                                                                                                                                                                                                     | 3 50   | 30 00   |
| b <b>Mrs. Ambrose Ricardo.</b> Enormous, incurved flowers of fine peach-yellow, shaded with pink. One of the finest Roses for cutting.....                                                                                                                                                                                                                                                                    | 3 50   | 30 00   |
| b <b>MRS. A. R. BARRACLOUGH.</b> A new variety of giant growth with long, tapering buds and high-pointed blooms of light, glowing pink, tinted with salmon. Although very new, it has made a name for itself, and we think it will be very popular.....                                                                                                                                                       | 4 00   | 35 00   |
| ob <b>Mrs. A. R. Waddell.</b> A stiff, branching grower with flowers much like Lady Pirrie, but darker salmon-pink and sometimes scarlet in the bud. Very free-flowering.....                                                                                                                                                                                                                                 | 3 50   | 30 00   |
| b <b>MRS. BEATTY.</b> Flowers of perfect shape, Maréchal-Niel-yellow; fragrant.....                                                                                                                                                                                                                                                                                                                           | 5 50   | 45 00   |
| ob <b>Mrs. Charles Bell</b> (Salmon Radiance). The most beautiful of the Radiance family, with all the good qualities of Radiance and Red Radiance, but flowers of a clear shade of salmon, turning to pearly pink.....                                                                                                                                                                                       | 3 50   | 30 00   |
| b <b>Mrs. Charles Lamplough.</b> Flower very large, pale lemon-yellow; fragrant. Vigorous....                                                                                                                                                                                                                                                                                                                 | 4 00   | 35 00   |
| b <b>Mrs. C. W. Edwards.</b> A very showy bright red Rose which seems worthy of being included in almost any garden.....                                                                                                                                                                                                                                                                                      | 4 00   | 35 00   |
| b <b>MRS. ERSKINE PEMBROKE THOM.</b> Generally conceded to be immensely superior for garden planting to Souv. de Claudius Pernet and others of that type. The fine long buds open into perfectly shaped, open flowers of rich lemon-yellow. Very vigorous and continuously in bloom.....                                                                                                                      | 4 00   | 35 00   |
| b <b>MRS. HENRY BOWLES.</b> Magnificent flowers of dark, lustrous pink, very freely produced by healthy, vigorous plants. There is no question that this is the finest of the modern pink introductions and is destined to become one of the most popular Roses in America. The rows of it in our fields have been in splendid condition all summer, standing far above older varieties of similar color..... | 4 50   | 40 00   |
| b <b>MRS. HENRY MORSE.</b> The flowers are bright pink with silvery shadings and are incessantly produced by low, branching bushes. It has a larger and more artistic bud than Radiance, on which it is an improvement, and the plant has equal blooming qualities, vigor, and health. This is a modern Rose, much superior to the old-time pinks, and is rapidly becoming very popular.....                  | 4 00   | 35 00   |
| b <b>MRS. LOVELL SWISHER.</b> A new variety with immense, heavy flowers of pale flesh-pink, excellent growth, and strong, erect stems. It is an improvement on Antoine Rivoire, Prince de Bulgarie, and Pharisæer, which it is fast displacing.....                                                                                                                                                           | 4 00   | 35 00   |
| o <b>Mrs. MacKellar.</b> Lovely long cream-white buds and very large flowers.....                                                                                                                                                                                                                                                                                                                             | 3 50   | 30 00   |
| b <b>Mrs. S. K. Rindge.</b> Well-shaped buds and semi-double, open blooms of soft yellow, quickly turning to soft pink.....                                                                                                                                                                                                                                                                                   | 3 50   | 30 00   |
| b <b>MRS. S. W. BURGESS.</b> Bushy plants with charming, fragrant, cream-white flowers shaded with orange and apricot.....                                                                                                                                                                                                                                                                                    | 4 50   | 40 00   |
| b <b>Mrs. Wakefield Christie-Miller.</b> Sturdy, erect plants of distinct habit, with splendid foliage and large, peony-shaped blooms of brilliant light pink. This is one of the most dependable bedding Roses on the market and is becoming more popular and more widely planted every year as it grows in favor with everybody.....                                                                        | 3 50   | 30 00   |
| b <b>Mrs. W. C. Egan.</b> Very strong, branching plants with long-pointed buds and large, star-shaped flowers of very light pearl-pink with golden yellow at the base of the petals..                                                                                                                                                                                                                         | 3 50   | 30 00   |
| b <b>Mrs. W. E. Nickerson.</b> Semi-double, soft silvery pink flowers, shaded with old-gold and salmon.....                                                                                                                                                                                                                                                                                                   | 3 50   | 30 00   |
| b <b>NIGHT.</b> <i>New.</i> The darkest crimson Rose so far raised. The English National Rose Society's Annual describes it as black, shaded maroon. Flowers are medium size, full, of perfect form, sweet scented. Blooms freely.....                                                                                                                                                                        | 15 00  | 125 00  |
| b <b>NORMAN LAMBERT.</b> Stout bushes which freely produce large, blazing orange-yellow buds which open to cup-shaped, canary-yellow blooms brightly edged and flushed with pink and scarlet. A very distinct and worthy variety which attracts unbounded admiration.....                                                                                                                                     | 5 50   | 45 00   |
| ob <b>Old Gold.</b> Wiry bushes of moderate vigor, bearing innumerable reddish orange, single flowers.....                                                                                                                                                                                                                                                                                                    | 3 50   | 30 00   |
| b <b>Ophelia.</b> One of the most popular of all Roses because of the lovely shape of its pearly white blooms and the freedom with which they are produced.....                                                                                                                                                                                                                                               | 3 50   | 30 00   |
| b <b>Padre.</b> Slender, erect plants bearing large, almost single blooms of a more vivid shade of copper-orange than Mme. Edouard Herriot. Makes a stunning picture when planted close together in a large bed.....                                                                                                                                                                                          | 3 50   | 30 00   |
| b <b>PINK BEAUTY.</b> Very vigorous, bushy plants with wonderful foliage and large, cupped blooms of the Radiance type, but several shades lighter pink. It makes a splendid bed because of its compact habit and is always in flower.....                                                                                                                                                                    | 4 00   | 35 00   |
| b <b>PINK PEARL.</b> Of the Columbia type, with larger and darker more brilliant pink blooms. We consider it the finest of the Roses of this class and recommend it unreservedly.....                                                                                                                                                                                                                         | 4 00   | 35 00   |
| b <b>Premier.</b> Beautiful, fragrant, dark rose-pink blooms on erect stems.....                                                                                                                                                                                                                                                                                                                              | 3 50   | 30 00   |
| b <b>Premier Supreme.</b> Similar to Premier, but brighter color—almost red.....                                                                                                                                                                                                                                                                                                                              | 3 50   | 30 00   |

## TEA, HYBRID TEA AND EVERBLOOMING ROSES, continued

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |               |                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-----------------|
| b <b>PRESIDENT HERBERT HOOVER.</b> An outstanding novelty of a really new color combination: Maroon, orange, and gold, rioting in the most contrasting fashion. Long-pointed buds, rigid stems, and a continuous cropper make it one of the most popular florist's Roses. Equally as good in the garden. \$12.50 for 10; \$100 per 100; \$750 per 1000.                                                                                                                                                                           |               |                 |
| ob <b>Radiance.</b> Plants of wonderful foliage and vigor, constantly producing large, brilliant rose-pink blooms of excellent globular shape and intense fragrance. There are probably more Radiance Roses grown and planted than any dozen other varieties put together.                                                                                                                                                                                                                                                        | Per 10 \$3 50 | Per 100 \$30 00 |
| b <b>Rapture.</b> Sport of Butterfly with all its good qualities but more double and more highly colored.                                                                                                                                                                                                                                                                                                                                                                                                                         | 3 50          | 30 00           |
| ob <b>Red-Letter Day.</b> Tall, bushy, persistently blooming plants, with nearly single, starry, brilliant vermillion-scarlet blooms. Very showy.                                                                                                                                                                                                                                                                                                                                                                                 | 3 50          | 30 00           |
| ob <b>Red Radiance.</b> A bright rosy red form of Radiance with the same good habit and blooming qualities.                                                                                                                                                                                                                                                                                                                                                                                                                       | 3 50          | 30 00           |
| b <b>REV. F. PAGE-ROBERTS.</b> Marvelously colored flowers of golden yellow stained with copper, and reddish buff on the outside. One of the most popular in the world and planted in great quantities every year.                                                                                                                                                                                                                                                                                                                | 6 00          | 50 00           |
| b <b>ROBERT HUEY.</b> Bushy plants of exceptional vigor, with bright rose-red flowers produced particularly well during the hot weather.                                                                                                                                                                                                                                                                                                                                                                                          | 4 50          | 40 00           |
| b <b>Rose Hill.</b> Very similar to Columbia, with larger blooms and slightly darker color.                                                                                                                                                                                                                                                                                                                                                                                                                                       | 6 00          | 50 00           |
| ob <b>Rose Marie.</b> Large, dark satiny pink blooms of excellent form and fragrance.                                                                                                                                                                                                                                                                                                                                                                                                                                             | 3 50          | 30 00           |
| b <b>Roselandia.</b> A dark saffron-yellow bloom of the Ophelia type. Generally considered an improved Golden Ophelia.                                                                                                                                                                                                                                                                                                                                                                                                            | 3 50          | 30 00           |
| b <b>RUTH.</b> Vigorous, bushy, and free-blooming plants with orange flowers flushed with crimson                                                                                                                                                                                                                                                                                                                                                                                                                                 | 4 50          | 40 00           |
| b <b>SCHWABENLAND.</b> Large cerise-pink blooms borne singly on long stems. Continuous bloomer. Hardy.                                                                                                                                                                                                                                                                                                                                                                                                                            | 15 00         | 125 00          |
| b <b>Sensation.</b> Handsome buds; large blooms of very deep blackish maroon; highly perfumed. Almost thornless. Healthy foliage. Undoubtedly the finest of the dark Roses.                                                                                                                                                                                                                                                                                                                                                       | 4 00          | 35 00           |
| b <b>Shot Silk.</b> Medium coppery pink flowers, suffused with apricot and yellow; richly perfumed.                                                                                                                                                                                                                                                                                                                                                                                                                               | 4 00          | 35 00           |
| b <b>SIR DAVID DAVIS.</b> One of the new red Roses in which we have great confidence. Flowers are brilliant scarlet-crimson and are borne in great profusion throughout the season. The plants are taller and produce more blooms than Etoile de Hollande, but they are lighter and smaller. A very handsome bedding Rose.                                                                                                                                                                                                        | 4 00          | 35 00           |
| b <b>Souv. de Claudius Pernet.</b> The old standby for a real yellow Rose.                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 3 50          | 30 00           |
| b <b>Souv. de George Beckwith.</b> Very large, salmon-pink flowers of wonderful shape. Vigorous and floriferous bushes.                                                                                                                                                                                                                                                                                                                                                                                                           | 3 50          | 30 00           |
| b <b>Souv. de Georges Pernet.</b> Stout, branching plants with large, brick-red buds opening to pink flowers of gigantic size. A splendid bedding Rose.                                                                                                                                                                                                                                                                                                                                                                           | 3 50          | 30 00           |
| b <b>Souv. de H. A. Verschuren.</b> Light yellow flowers of the Frank Reader and Golden Ophelia type.                                                                                                                                                                                                                                                                                                                                                                                                                             | 3 50          | 30 00           |
| ob <b>Sunburst.</b> Rich yellow, cupped flowers shaded with orange.                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 3 50          | 30 00           |
| b <b>TALISMAN.</b> The most astounding novelty in Roses produced in many a year. Its brilliant orange-red buds open to a large, fragrant, high-pointed bloom of glowing golden yellow, stained with copper-red and orange-rose on the inside of the petal. It is the most magnificently colored flower we have ever seen and arouses astonishment and admiration everywhere. The plants have proved vigorous and healthy outdoors and have withstood severe winters unprotected. It is especially good in spring and late autumn. | 7 00          | 60 00           |
| b <b>Templar.</b> Very full, fragrant, crimson flowers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 3 50          | 30 00           |
| b <b>The Queen Alexandra Rose.</b> Large, velvety scarlet blooms lightened with yellow on the outside and deep gold at the base. Very striking. Nothing else like it.                                                                                                                                                                                                                                                                                                                                                             | 3 50          | 30 00           |
| b <b>Una Wallace.</b> Large, bright cherry-pink flowers of excellent shape; a vigorous upright grower.                                                                                                                                                                                                                                                                                                                                                                                                                            | 3 50          | 30 00           |
| b <b>VATERLAND.</b> Flower large, blood-red with coppery reflexes—an unusual color, fading but little; fragrant. Vigorous, healthy grower with leathery foliage. Nothing like it in Rose colors.                                                                                                                                                                                                                                                                                                                                  | 15 00         | 125 00          |
| b <b>VICTOR WADDILOVE.</b> Pointed carmine-pink flowers suffused with yellow; slightly fragrant.                                                                                                                                                                                                                                                                                                                                                                                                                                  | 5 50          | 45 00           |
| b <b>Ville de Paris.</b> Vigorous plants of strong, wiry growth, producing splendid buds of bright yellow which open into fadeless, double blooms of the Radiance shape. It has proved a fine addition to our yellow Roses, and we believe it will become steadily more popular.                                                                                                                                                                                                                                                  | 5 50          | 45 00           |
| o <b>Viscountess Folkestone.</b> Vigorous plants with large, creamy pink flowers shaded with salmon.                                                                                                                                                                                                                                                                                                                                                                                                                              | 3 50          | 30 00           |
| o <b>Wellesley.</b> An old favorite Tea Rose with bright silvery pink flowers of pointed form.                                                                                                                                                                                                                                                                                                                                                                                                                                    | 3 50          | 30 00           |
| b <b>Wm. F. Dreer.</b> A bright yellow flower of the Los Angeles type, shaded with coppery pink.                                                                                                                                                                                                                                                                                                                                                                                                                                  | 3 50          | 30 00           |

The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size and beyond that for multiples of 10

| <b>COREOPSIS.</b>                                                                   |        |         |
| Lanceolata grandiflora flore-pleno. Large, yellow flowers, fine for cutting.        | \$1 00 | \$8 00  |
| <b>DELPHINIUM</b> (Larkspur).                                                       |        |         |
| (Except as noted). \$80 per 1000.                                                   | 1 25   | 10 00   |
| Belladonna. Clear turquoise-blue.                                                   |        |         |

**Belladonna, Pfitzer's Improved.** Clear sky-blue; stems heavier and flowers heavier and much fuller than old Belladonna. Also has greater keeping qualities. \$1.50 for 10; \$12 per 100.

**Belladonna, Improved (Blue Cave).** New. One of the earliest blooming Delphiniums, flowering about two weeks before the common Belladonna. The beautiful spikes of dark indigo-blue flowers are fine for cutting. Also this variety is a good forcer, because of its fine color, compact spikes, and early blooming habits. \$2 for 10; \$15 per 100.

**Bellamosa.** Deep blue.  
**Formosum.** Rich blue flowers, tinged purple; white eye.  
**Gold Medal Hybrids.** Mixed. Very large spikes.  
**Grandiflorum.** Siberian Larkspur. Azure-blue.  
**Grandiflorum chinense (chinense).** Slender Larkspur (Blue Butterfly). Fine feathery foliage. Large, gentian-blue flowers.  
**Grandiflorum chinense album (chinense album).** Similar to *D. grandiflorum chinense*, but white flowers.

**Hollyhock.** New. The flower-spikes are of enormous size and quite tall. The blooms resemble Hollyhocks, which is how the variety got its name. Mixed colors. \$2.50 for 10; \$20 per 100; \$150 per 1000.

**Hybrid giganteum plenum.** New. Extra-strong grower with dark green foliage. The individual flowers are double and as large as 2 inches in diameter and are of the finest shades of blue. This is undoubtedly one of the finest Delphiniums on the market. \$2 for 10; \$15 per 100.

**Vanderbilt Hybrids, Mixed.** New. Similar to Prize Medal Hybrids, but from a better strain. \$2.50 for 10; \$20 per 100; \$150 per 1000.

## Peonies

Strong divisions with 3 to 5 eyes, and plenty of roots. They are of more generous size than we have usually been able to procure from other growers.

## Perennial Phlox

Strong, 2-year field-grown stock

Our 2-year-old field-grown Phlox should not be compared in value with the small plants from 2-inch pots which are grown in the field only one season.

The wholesale prices in our lists apply on wholesale quantities. Orders should call for 10 of a kind and size and beyond that for multiples of 10

### PYRAMIDAL MAPLE

Rapid-growing, and one of the most effective trees for screens and street-planting, taking the place of the objectionable Lombardy and other Poplars once used for this purpose but now so much in disfavor. The upper picture shows their use as a screen, acting as a rapid-growing boundary marker. The lower picture shows a 3-year-old block of these handsome trees in our Nursery.

## Evergreens for Lining Out

Evergreens of all important varieties! Young, thrifty stock grown with experienced skill and backed by the resources of one of the largest nurseries in the world.

These are really specimen trees in miniature, with full, bushy tops, and abundant, vigorous roots.

For best results, we recommend fall planting. T, indicates once transplanted; TT, twice transplanted; S, seedlings.

Fruit Department

These trees were especially grown for specimens—planted far apart in the rows and root-pruned last year. They were produced to take care of an increasing demand for **EARLY-TO-BEAR FRUIT TREES.**

Special 4-year specimens, 1 in. and up

| Standard Apples             |                    |

Apples  
Statement of Inspection for Trueness to Name, 1930  
Amherst, Mass., July 12, 1930  
To Whom It May Concern:  
I have examined for trueness to name all salable Apple stock now growing in the nurseries of Jackson & Perkins Company, Newark, New York, and I now declare that to the best of my knowledge and belief these trees are true to variety name as they stand in the nursery rows.  
(Signed) A. P. French.

# Terms and Conditions of Sale

This list cancels all previous quotations. All agreements and contracts are made subject to crop losses through unavoidable causes.

**THE PRICES** in this list are based upon present market conditions and are subject to change without notice. We invite correspondence with prospective buyers, and shall be pleased to quote special prices on want-lists for larger quantities than are named herein. On the other hand, these are **wholesale prices** and apply only to **wholesale quantities**; in no case will we fill retail orders, even from nurserymen. All orders should be made up for 10's or multiples of 10.

**TERMS.** The usual terms are offered to those of established credit or whose responsibility is known to us. Cash, security, or satisfactory references are required from unknown parties. All bills are due in sixty days unless other arrangements are made at the time of sale. **All prices are net and not subject to any discount** unless specially agreed upon. Interest charged after maturity.

**SHIPPING.** Customers are requested to give definite instructions for shipping. In the absence of special instructions we will use our own judgment, but with the distinct understanding that it is without responsibility on our part. All shipments travel at the risk and cost of the purchaser. We have the New York Central, the West Shore, the Pennsylvania Railroads, also the Rochester and Syracuse interurban trolley line, enabling us to ship in any direction over trunk lines. Express is handled over three of these routes.

**BOXES** will be charged for at the rates noted below. These prices are somewhat reduced because we are now able to buy lumber somewhat more reasonably. However, these rates do not really cover present actual cost to us.

|                                    |                                    |                                    |
|------------------------------------|------------------------------------|------------------------------------|
| 10 ft. 30 in. x 30 in. .... \$4 50 | 10 ft. 24 in. x 24 in. .... \$3 50 | 10 ft. 18 in. x 18 in. .... \$3 00 |
| 10 ft. 28 in. x 28 in. .... 4 20   | 10 ft. 22 in. x 22 in. .... 3 25   | 10 ft. 14 in. x 16 in. .... 2 50   |
| 10 ft. 26 in. x 26 in. .... 4 00   | 10 ft. 20 in. x 20 in. .... 3 15   | 10 ft. 12 in. x 14 in. .... 2 30   |

Add 50 cents on all sizes of 12-foot boxes; decrease in same proportion for shorter boxes.

**BALES** will be charged at actual cost of the material. We make no charge for packing or for delivery to the railroad station.

**CLAIMS** for any cause must be made promptly on receipt of goods. Any stock that is not exactly as represented must be reported promptly and on authority should be returned to us immediately. We will cheerfully and without question credit back the unsatisfactory plants, or send others; **but we will not entertain claims made after goods have been once accepted**, or when report is not made within ten days after arrival of the stock.

**LIMITED LIABILITY AND NON-WARRANTY.** In the event the nursery stock, or any part of it, sold by Jackson & Perkins Company, Newark, New York, should prove to be untrue to the name under which it is sold, or prove not to be of the kind or quality of nursery stock it was sold for, or ordered for, a replacement of the stock as originally ordered, or intended to be sold, without charge therefor, or a refund of the purchase price shall be a complete and entire satisfaction for any and all liability therefor of the seller, and such replacement or a refund of the purchase price it is agreed shall be the liquidated damages and all the damages to which the purchaser shall be entitled by reason of the premises. Except for such limited liability as herein set out, the seller, Jackson & Perkins Company, gives no undertaking or warranty, expressed or implied, as to the description, quality, growth, productiveness, or any other attribute of the nursery stock sold by Jackson & Perkins Company.

**INSPECTION AND FUMIGATION.** Certificate of Inspection will be furnished with every shipment and, when required, stock will be fumigated.

**SPECIAL NOTICE.** Correspondents are requested to use their printed business letterheads. We do not quote prices to retail buyers nor sell to planters; we have **no retail trade** of our own, and sell **to the trade only**; in justice to our **only** customers, the nurserymen, florists, and dealers, we use every effort to limit the distribution of trade prices to those whom we know to be entitled to receive them. **Use printed stationery, or enclose business card.**

**LOCATION.** We are located 30 miles east of Rochester, N. Y., and cordially invite a visit and inspection of our establishment.

Newark, New York, September 1, 1930

**NEW  
YELLOW  
CLIMBING  
ROSE**

***Primrose***

**C**LEAR, light yellow flowers, bringing for the first time the unfading tones of Souvenir de Claudius Pernet into the Climbing Roses. The plants are hardier than other yellow Climbers, grow vigorously, and bloom profusely. The best hardy yellow Climbing Rose to date.

For prices see Roses (Ramblers and Climbers), and note also the very complete assortment of other varieties.
