Date of the Catalogue of Plants of New Jersey: The list of fungi by Ellis and Gerard published in Britton's Catalogue in the New Jersey Geological Report was incorrectly cited in Parts I and II of this compilation as 1889. It was later learned through the courtesy of Dr. M. L. Lohman that the correct date has been definitely determined to be 1890. Only the citations to valid new combinations contained in this New Jersey Report are included in the following list of corrections, but it should be noted that in the numerous incidental references to the publication the date should be 1890, not 1889.

### Literature Cited

This list contains all of the available references to articles by Ellis and by Ellis in collaboration with other authors; in addition, it includes those publications by authors other than Ellis in which the first references to Ellis' species are found, both those validly published and nomina nuda. Literature dealing with subsequent synonymy or later disposition of Ellis' species by other mycologists is omitted.
